The academic average (GPA) is calculated on all the academic years of study leading to the applicant's first undergraduate degree. A cumulative record will not be accepted. Separate transcripts must be sent from each institution attended. An official transcript is one sent directly to the Faculty by the issuing institution. A final official transcript is a transcript sent directly to the Faculty by the issuing institution on the completion of the current academic year. Applicants who have attended institutions, such as some English universities, which do not issue transcripts should contact the Admissions Office for instructions.

Applicants still taking courses leading to an undergraduate degree should arrange for one current official transcript to be sent immediately to expedite the processing of their applications and for two final official transcripts to be sent by the June 30 deadline. Applicants still in the process of completing the minimum 90 credits will receive an offer conditional on maintenance of the GPA achieved on the first 60 credits.

It is not necessary to send UBC transcripts as they are available to the Faculty.

Law School Admissions Test (LSAT)

All applicants, except Letter of Permission applicants, attending non-North American law schools, are required to submit a valid LSAT score. Applicants may take the test more than once, and the highest score will be used. Scores are valid for five years and must be valid as of September. The Admissions Office can access LSAT scores directly from Law Services if the applicant's registration is current.

The latest writing of the LSAT which will be accepted for admission for September is the February writing.

The LSAT Information Book (Canadian Service) may be picked up at UBC Law, the Welcome Centre in Brock Hall at UBC Point Grey Campus, or can be accessed online (www.lsac.org). An applicant wishing to apply to American schools must use the American registration material which is obtainable only from Law Services. Students may also access the LSAT Registration Guide (www.lsac.org) online.

Application Fee

An application processing fee of CAD\$80.00 must accompany the application form.

Personal Statement

All applicants must submit a personal statement of no more than 750 words. The personal statement is an applicant's opportunity to outline those features of the application that distinguish the candidate. The personal statement is also an opportunity for a candidate to highlight his or her non-academic contributions as well as any circumstances that may have contributed to or detracted from the applicant's academic and non-academic success.

Other Documents

Other documents include letters of reference, medical certificates, special circumstances letters, or National Committee on Accreditation letters, where relevant.

Interviews are not part of the admissions procedure but the Director of Admissions, Elaine Borthwick, or one of her assistants, are available to answer any questions in person, or by telephone (604-822-6303), letter, fax (604-822-8108), or email (borthwick@law.ubc.ca). Applicants wishing to meet with her or one of her assistants should make an appointment.

Language Proficiency

Applicants who do not have adequate command of the English language will not be admitted. Applicants may be required to take a test to demonstrate adequate facility with the English language.

Admission Offers

Application processing begins in October. Offers are made to Regular applicants as early as December. The Admissions Committee begins considering applications in all other categories in April. Offers to First Nations applicants are usually made in mid April, to discretionary applicants in June, and final decisions to all other applicants in July.

Deposit

Canadian citizens, permanent residents or landed immigrants who accept the offer of a place at UBC Law must make a deposit of \$300.00 towards tuition at the time of acceptance. All other applicants must make a deposit of \$500.00 towards tuition at the time of acceptance. The deposit will be refunded in full to any applicant who notifies UBC Law in writing (by post or email) on or before April 15 of their intention to withdraw their acceptance. On acceptance, all applicants must also submit two recent passport-size photographs, approximately 1.25" x 1.75".

Appeals

An applicant who is denied admission may request the Admissions Committee to reconsider its decision but only on the ground that the applicant has material information that was not reasonably available to the applicant at the time the Admissions Committee's initial

decision was made. Such new information must be set out in the request for reconsideration. The Committee will then determine whether the information is indeed new material. At this time the Admissions Committee will consider whether to alter its initial decision based upon the new material and the availability of space within the law school class at the time when the reconsideration decision is rendered. The Admissions Committee must receive the request for reconsideration within 30 calendar days of the applicant's initial letter and decision from the Law Admissions Office.

ACADEMIC REGULATIONS

Examinations

Courses will be evaluated by final examination in December or April, unless an additional or alternative method of evaluation is deemed appropriate. In certain circumstances, as set out below, a student is entitled to a re-evaluation in a particular course after the regular evaluations for the year are completed.

The minimum passing grade in an individual course is 50%. In order to pass the year, a student must obtain a passing grade in every compulsory course taken in the year and a weighted average over all courses taken in the year of not less than 55%.

A student is entitled to a re-evaluation in a course under the following circumstances:

- 1) If as a result of the regular evaluations a student has failed one or two, but not more than two, courses (whether compulsory or not) and achieved a weighted average of at least 55% in the courses that were passed, the student is entitled to a re-evaluation in the courses that were failed.
- 2) If as a result of the regular evaluations a student has passed every course but has achieved a weighted average of less than 55% over all courses taken in the year, the student is entitled to a re-evaluation in the two courses in which the lowest grades were received. If the grade received on the re-evaluation is sufficient, the final grade for a course in which the student is re-evaluated will be raised to 50% or whatever higher grade is necessary to yield a weighted average of 55% over all courses taken in the year, otherwise, the original grade will stand.

Grades Results

Grades are available to students online at the Student Service Centre website (www.students.ubc.ca/ssc). Official results for the session are available in mid- to late-May. Official transcripts are obtained through Enrolment Services and may be ordered on the Student Service Centre website (www.students.ubc.ca/ssc).

DEGREE REQUIREMENTS

Regular Program

The Bachelor of Laws program requires a student to acquire a minimum of 92 credits in three Winter Sessions in the Faculty of Law. First year consists of compulsory courses totalling 35 credits. The second and third years (or upper years) consist of two Winter Sessions in each of which a minimum of 28 and a maximum of 34 credits shall be taken. Each session consists of two consecutive terms in each of which a minimum of 12 and a maximum of 18 credits shall be taken.

In the upper years students must take four compulsory courses, one from each of the following lists:

- 1) Public Regulation: LAW 200 Aboriginal Peoples and Canadian Law, LAW 210 Administrative Law, LAW 220 Taxation I.
- 2) Private Regulation: LAW 230 Corporations 1, LAW 240 Family Law, LAW 250 Trusts.
- 3) Procedure: LAW 260 Advanced Criminal Procedure, LAW 270 Civil Procedure, LAW 280 Evidence.
- 4) Law and Society Studies. The contents of this list are determined based on available course offerings in a given year.

A student may not enrol in a course for which another subject is a prerequisite unless the required course was taken and passed earlier. In special circumstances the Associate Dean, Academic Affairs, in consultation with the Faculty member teaching the subject, may waive this stipulation.

A student must undertake, in either second or third year, at least one independent research project and submit a substantial paper (or series of papers) embodying the results of this research. This obligation usually will be satisfied within the seminar program but students may fulfil this obligation by completing a project, for at least four credits, under LAW 493, 494, 495, or 496 (Directed Research).

A student must complete, in either second or third year, one course designated as fulfilling the legal research requirement. This requirement will be met by completing LAW 430, 438, 484, 486, 488, 491, or another course approved for this purpose by the Associate Dean.

Transitional Provisions: Students who commenced their LL.B. prior to Winter Session 2006 and students who will complete their LL.B. in 2007 will continue to follow the former compulsory requirements A and B as set out below.

A. The following upper-year courses are compulsory:

- LAW 345 (Canadian Federalism);
- LAW 346 (Canadian Charter of Rights and Freedoms); and
- LAW 470 (Evidence).

B. A student must undertake, in either second or third year, at least one independent research project and submit a substantial paper (or series

of papers) embodying the results of this research. This obligation usually will be satisfied within the seminar program but students may fulfil this obligation by completing a project, for at least four credits, under LAW 493, 494, 495, or 496 (Directed Research).

Part-Time LL.B. Program

Students may, in their second and third years (which may include the summer sessions between first year, second year, and third year), take work in other departments and schools of the University for credit in the Faculty of Law. Such work may be credited for not more than six credits toward the second or third year credit requirements, but shall not reduce the hours or credits in the winter sessions below the minimum requirement of 28 credits. Each student must receive advance permission to register in such courses from the Associate Dean, Academic Affairs, who will base their judgement on the relevance of the proposed course or seminar to the study of law or to a career in law and of the appropriateness of the proposed course or seminar in the light of the student's course of study in the Faculty of Law.

The part-time program enables students to take a reduced course load. In first year, the student may opt for a part-time course load that ranges from 15 to 26 credits instead of the 35-credit full-time course load. In the upper years, a part-time student may select a course load ranging from 14 to 27 credits. To be eligible for the part-time program, a student must demonstrate special needs. A maximum of ten students per year (30 students in total) will be admitted on this basis. Students admitted in the categories of the National Committee, Advanced Standing, Transfer, or Visiting (Letter of Permission) are ineligible for this program.

Ordinarily students on this program must complete not less than 50% of the normal course load for full-time students in each academic year. In first year, 50% of the normal course load is 16 credits. In the upper years, 50% of the normal course load is 14 to 17 credits. However, in order to facilitate access to funding programs, housing, or to complete the LL.B. program sooner, students may at their option take from 60% to 80% of the normal full-time number of credits per Winter Session. Part-time students are ineligible for scholarships that are based on ranking in the year or class. However, part-time students are eligible for course prizes and other scholarships.

At the commencement of the first or second term of the Winter Session, students in the program may transfer to full-time status with the approval of the Associate Dean, Academic Affairs. Similarly, a full-time student in good standing may, for compelling reasons, transfer to the part-time program provided the maximum number of part-time students will not be exceeded, and subject to the approval of the Associate Dean, Academic Affairs.

Part-time students will make a transition to the new curriculum requirements through consultation with the Associate Dean.

COMBINED BACHELOR OF LAWS AND MASTER OF BUSINESS ADMINISTRATION

For details on this program see the *Faculty of Commerce and Business Administration*, p. 171.

COMBINED MASTER OF ASIA PACIFIC POLICY STUDIES WITH BACHELOR OF LAWS

This degree program permits students to obtain the degrees of M.A. in Asia Pacific Policy Studies (M.A.P.P.S.) and LL.B. through combined enrolment in the Faculty of Law and the Institute of Asian Research.

ADMISSION

Students wishing to pursue the combined M.A.P.P.S./LL.B. degree program must be admitted separately to the Faculty of Law for the LL.B. degree and the Institute of Asian Research for the M.A.P.P.S. degree. In their application submissions to the Faculty of Law and the Institute of Asian Research, students must indicate in writing their desire to enrol in the combined program and the desired area of specialization within the M.A.P.P.S. program. Enrolment in the combined degree program requires the consent of the Dean of the Faculty of Law and the Director of the Institute of Asian Research.

COMBINED DEGREE PROGRAM COMMITTEE

The Combined Degree Program Committee has a Faculty of Law representative designated by the Dean of Law and an Institute of Asian Research representative designated by the Institute Director. The Combined Degree Program Committee is responsible for overseeing admissions, coordinating student supervision, and providing program approval. The Graduate Program Advisor from the Institute of Asian Research serves as Graduate Program Advisor for the combined degree program.

REQUIREMENTS

Students are required to complete all course requirements for graduation in each of the LL.B. and M.A.P.P.S. programs, subject to the following adjustments:

- 1) Students enrolled in the combined degree program who complete the M.A.P.P.S. Core Course (IAR 500) required for the M.A.P.P.S. degree will receive six credits toward completion of their LL.B. degree, which will be counted as the maximum six credits of non-Law courses permitted under the LL.B. course requirements.
- 2) Students enrolled in the combined degree program who complete six credits of Faculty of Law course work acceptable to their respective LL.B. and M.A.P.P.S. program supervisors will receive credit for

these courses toward both the LL.B. and M.A.P.P.S. degrees.

- 3) Law course electives select from: LAW 337, LAW 338, LAW 342, LAW 432, LAW 322, LAW 319, LAW 305, LAW 307, LAW 391.

MODULE CURRICULUM SCHEDULE

Normally the curriculum schedule is as follows:

Curriculum Schedule	Credits
Year One (September – April)	
Students complete required first-year LL.B. curriculum	35
Year Two (September – April)	
Students complete M.A.P.P.S. Core Course (IAR 500)	6
Students complete required upper-year courses for LL.B.	12 – 18
Students begin completion of elective requirements for M.A.P.P.S. and LL.B.	6 (M.A.P.P.S.) / up to 8 (LL.B.)
Year Two (April – September)	
Students complete thesis or practicum requirements for M.A.P.P.S.	12
Year Three (September – April)	
Students complete remaining elective course requirements for M.A.P.P.S. and LL.B.	6 (M.A.P.P.S.) / 28 (LL.B.)
Total Credits	Maximum 119 (30 M.A.P.P.S. / up to 89 LL.B.)

Transitional Provisions: Students who have completed the first year compulsory law curriculum prior to Winter Session 2006 will follow the former requirements for upper year progression. These are described in detail under LL.B. requirements, transitional provisions.

DEGREE CONFERRAL

The M.A.P.P.S. and LL.B. will be conferred at the completion of the combined program after all requirements for both degrees have been met. Students who choose to receive either the M.A.P.P.S. or the LL.B. prior to completion of the combined program may apply for one of the degrees provided all requirements for that degree have been satisfied. Students selecting this option must simultaneously withdraw from the combined program.

EXCHANGE PROGRAMS

Students may earn credits towards their Bachelor of Laws studying abroad in an

exchange program. Education Abroad Programs are institution to institution reciprocal agreements approved by Senate. Students selected for such programs remain registered at UBC, pay tuition and student fees only to UBC, and remain eligible for UBC awards and financial assistance. In recent years, UBC law students have participated in exchanges with Hastings College of the Law (San Francisco); University of Melbourne (Australia); University of New South Wales (Sydney, Australia); University of Copenhagen (Denmark); Glasgow University (Scotland); Sophia University (Tokyo); and Université Jean-Moulin-Lyon 3 (Lyon, France). The Faculty also encourages participation in the Civil Law/Common Law Exchange Program sponsored by the Department of Justice.

LAW SOCIETY OF BRITISH COLUMBIA

The possession of a Bachelor of Laws does not in itself confer the right to practise law in British Columbia. Admission to the Bar of the Province of British Columbia is governed by the Legal Profession Act and the regulations of the Law Society of British Columbia (www.lawsociety.bc.ca). An applicant for admission to the Bar must comply with the requirements of the Law Society as to academic standing, professional training, and ethical standards. These requirements presently include an Admission Program of approximately one year, during which the applicant must serve as an articulated student with a practising member of the Bar and complete a training course and qualifying examinations. Information may be obtained from the Secretary of the Law Society of British Columbia, 845 Cambie Street, Vancouver, BC, V6B 4Z9.

Applicants who intend to practise law in other jurisdictions must obtain information concerning the requirements for entry to the profession, from the governing body of the legal profession in those jurisdictions.

Possession of a criminal record may prevent admission to the Bar. Applicants must consult the appropriate Law Society.

AWARDS AND FINANCIAL ASSISTANCE

Through the generosity of donors such as the Law Foundation of British Columbia, the Faculty is able to award a number of entrance scholarships and awards. Law Foundation Entrance Scholarships are awarded on the basis of academic merit. Law Foundation Entrance Awards are awarded on the basis of need but also with a view to ensuring that the student population continues to diversify. Thus special consideration will be given to applicants who belong to groups which are under-represented in the law school and in the legal profession.

Information about financial aid and a list of other entrance awards, including government student loans, UBC bursaries, and scholarships, can be found at the Student Financial Assis-

tance & Awards website (www.students.ubc.ca/finance). Please refer to this website for application deadline dates. An application should be made even if admission to the Faculty has not yet been granted.

UBC LAW REVIEW

In 1949 the students of the Faculty of Law commenced publication of *Legal Notes*, which was an annual volume containing articles and comments written both by students and by outside contributors. By 1959 the publication had increased both in size and in the number of subscribers to the point where the editors felt that the name should be changed to *The University of British Columbia Law Review*. It is a refereed journal, now published twice yearly. Students are responsible for the soliciting and editing of the material, and for the advertising and sales which make the Law Review self-sufficient. Members of the Faculty give advice and assistance to the Editorial Board of the *Law Review* (www.ubclawreview.org), but the chief responsibility is that of the Board.

CANADIAN JOURNAL OF FAMILY LAW

The *Canadian Journal of Family Law* is published at the UBC Faculty of Law. It is a refereed publication issued semi-annually. Submissions made to the *Journal* are reviewed by qualified external readers, and the format includes articles, commentaries, and book reviews. In the past the *Journal's* subject matter has included writings on topics such as child welfare, evidentiary issues, child abuse, young offenders, and other topics impacting on the family unit.

The *Journal* (faculty.law.ubc.ca/cdnjfl) was started in 1978 and was published under the auspices of the Osgoode Hall Law School in Ontario. In 1982–83 its publication base was moved to the UBC Faculty of Law. It is the only student-run academic journal exclusively dedicated to the study, analysis, and articulation of the increasingly important field of family law.

ACADEMIC STAFF

Professors Emeriti

J. Atrens, B.A. (Sask.) (Oxf.), LL.B. (Sask.), M.A., B.C.L. (Oxf.); W. W. Black, B.A. (Stan.), J.D. (Harv.); C. Bourne, B.A. (Tor.), LL.B. (Cantab), S.J.D. (Harv.); P. T. Burns, Q.C., LL.B., LL.M. (Otago); R. D. Diebolt, Q.C., B.A., LL.B. (Br.Col.), LL.M. (Lond.); D. J. Egleston, B.A., LL.B. (Sask.); R. T. Franson, B.E.P. (Cornell), J.D. (Calif., L.A.); M. A. Hickling, LL.B., Ph.D., LL.D. (Lond.); J. Hogarth, LL.B. (Br.Col.), Dip. Crim., Ph.D. (Cantab.); L. G. Jahnke, LL.B. (Sask.), LL.M. (Lond.); M.L.T. MacCrimmon, B.Sc. (Calif., L.A.), LL.B. (Br.Col.), Dip.Law (Oxf.); D. MacDougall, LL.B. (Melb.), J.D. (Chic.); J. MacIntyre, B.Comm. (Br.Col.), LL.B. (Br.Col.); B. McClean, B.A. (Belf.), LL. B. (Belf.); R. S. Reid, C.D., B.A., M.A. (R.M.C.), LL.B. (Br.Col.); D. E. Sanders, B.A., LL.B. (Alta.), LL.M. (Calif., Berkeley); B. V. Slutsky, B.A., LL.B. (Br.Col.), Ph.D. (Lond.); J. C. Smith, B.A., LL.B. (Br.Col.), LL.M. (Yale); E. C. E. Todd, LL.B., LL.M., LL.D. (Manc.).

Professors

J. C. Bakan, B.A. (S.Fraser; Oxf.), LL.B. (Dal.), LL.M. (Harv.); J. Blom, Q.C., B.A., LL.B. (Br.Col.), B.C.L. (Oxf.), LL.M. (Harv.); M. A. Bobinski, B.A., J.D. (S.U.N.Y./Buffalo), LL.M. (Harv.); S. B. Boyd, B.A. (Bishop's), LL.B. (McG.), LL.M. (Lond.); C. Boyle, LL.B. (Belf.), LL.M. (Qu.); R. M. Elliot, B.Sc. (Hons.), LL.B. (Br.Col.), LL.M. (Lond.); K. B. Farquhar, LL.B., LL.M. (Well.), LL.M. (Mich.); I. Grant, B.A. (Tor.), LL.B. (Dal.), LL.M. (Yale); M. A. Jackson, Q.C., LL.B. (Lond.), LL.M. (Yale); M. LeBaron, B.A. (Chapman), Droit Civil Scholarship Programme (Sher.), M.A. (S. Fraser), LL.B. (Br.Col.); B.W. MacDougall, LL.B. (Melb.), J.D. (Chic.); S. Matsui, LL.B. (Kyoto), LL.M. (Kyoto), J.S.D. (Stan.), LL.D. (Kyoto); R. K. Paterson, LL.B. (Well.), J.S.M. (Stan.); D. J. Pavlich, B.A., LL.B. (Witw.), LL.M. (Yale); P. B. Potter, B.A., M.A. (George Wash.), J.D., Ph.D. (Wash.); I. W. Puc, B.A., B.A. (Oxf.), LL.M. (Alta.); D. Jur. (York); A. F. Sheppard, B.A., LL.B. (Br.Col.), LL.M. (Lond.); J. M. P. Weiler, B.A. (Hons.) (Tor.), LL.B. (Osgoode), LL.M. (Calif., Berkeley); C. F. L. Young, LL.B. (Lond.), LL.M. (Br.Col.).

Associate Professors

J. Benedet, LL.B. (Br.Col.), LL.M., S.J.D. (Mich.); R. Buchanan, A.B. (Prin.), LL.B. (Vic.B.C.), LL.M. (Wis.), S.J.D. (Wis.); G. Christie, LL.B. (Vic.B.C.), Ph.D. (Calif., Santa Barbara); C. Dauvergne, B.A. (Car.), M.A. (Car.), LL.B. (Br.Col.), Ph.D. (A.N.U.); R. Davis, LL.B. (Tor.); E. R. Edinger, B.A., LL.B. (Br.Col.), B.C.L. (Oxf.); S. Hsu, B.S., J.D. (Col.), M.S., Ph.D. (Calif., Davis); K. Mickelson, A.B. (Duke), LL.B. (Br.Col.), LL.M. (Col.); J. Mosoff, B.A. (Tor.), M.A. (York), LL.B., LL.M. (Br.Col.); J. Sarra, B.A., M.A., LL.B., LL.M., S.J.D. (Tor.); I. Townsend-Gault, LL.B. (Dundee); S. M. Wexler, A.B. (Col.), LL.B., LL.M. (N.Y.); M. Young, B.A. (Br.Col.), LL.B., M.A. (Tor.), M.A. (Calif., Berkeley).

Assistant Professors

N. Affolder, LL.B. (Alta.), B.C.L., D.Phil. (Oxf.); T. U. Baik, LL.B. (S.N.U.), LL.M., J.S.D. (Notre D.); L. Biukovic, B.A. (Yugoslavia), LL.B. (Belgrade), LL.M. (Ceu-Hungary), LL.M. (Br.Col.), Ph.D. (Br.Col.); K. Brooks, B.A. (Tor.), LL.B. (Br.Col.), LL.M. (Osgoode); C. Ford, LL.B. (Vic.B.C.), LL.M. (Col.); D. Harris, B.A. (Br.Col.), LL.B. (Tor.), LL.M. (Br.Col.), Ph.D. (Osgoode) (forthcoming); J. McCue, B.A. (Car.), LL.B. (Ott.), LL.M. (Br.Col.); A. Rochette, LL.B., B.C.L. (McG.), LL.M. (Br.Col.); M. Sundara-Rajan, B.A. (Hons.) (McG./Paris), LL.B. (Osgoode), LL.M. (Br.Col.), D.Phil. (Oxf.).

Instructor

S. Sutherland, B.A. (Br.Col.), M.A. (Lond.), LL.B. (Br.Col.), LL.M. (Osgoode).

Others

M. D. Copithorne, B.A., LL.B., LL.D. (Br.Col.); E. Cunliffe, B.C. (Melbourne), LL.B. (Melb.), LL.M. (Br.Col.); M. Hall, B.A. (Hons.) (Br.Col.), LL.B. (Qu.), LL.M. (Br.Col.); N. Harris, B.A. (Simon.F.), LL.B. (Br.Col.); F. Kelly, B.A. (Melb.), LL.B. (Melb.), LL.M. (Br.Col.); E. Lee, LL.B.; R. K. Paisley, B.Sc. (Br.Col.), M.Sc. (Wash.), J.D. (Pepperdine), LL.M. (Lond.); P. Ramsay, Q.C., B.Com, LL.B., LL.M. (Br.Col.); R. Taylor, LL.B. (Br.Col.); M. Warren, B.A. (W.Ont.), LL.B. (Hons.) (E. Anglia), LL.M. (E. Anglia).

Adjunct Professors

M. Ainslie, B.A. (Trin.W.), LL.B. (Br.Col.); J. R. Aldridge, B.A. (Brock), LL.B. (Osgoode), LL.M. (Br.Col.); H. C. Alvarez, B.A. (Br.Col.), LL.B. (Ott.); R. Anderson, B.A. (Tor.), LL.B. (Qu.); T. Bailey, B.Sc., LL.B. (Br.Col.); R. Bandstra, LL.B.; G. Barriere, B.A. (Trent), LL.B. (Br.Col.); K. Bayne, LL.B. (Br.Col.), LL.M. (Col.); C. Bell, LL.B.; D. R. Bennett, B. Comm.,

LL.B. (Br.Col.); J. Blackhawk, LL.B. (Br.Col.); N. Cameron, B.F.A. (Br. Col.), LL.B. (Br. Col.); C. Cattell, B.A. Hons. (Vic.B.C.), LL.B. (Vic.B.C.); K. Cavalier, B.A. (Br.Col.), M.A. (Car.), Ph.D. (N.Western), LL.B. (Br.Col.), LL.M. (Br.Col.); M. Childs, B.A. (Car.), LL.B. (Br.Col.), BCL (Oxf.); D. Christian, B.A. (S.Fraser), LL.B. (Br.Col.); T. Cicchetti, LL.B.; D. Connolly, LL.B. (Vic.B.C.), Ph.D. (Vic.B.C.); D. Creer, LL.B. (Tor.); T. Dion, B.A. (Alta), LL.B. (Br.Col.); J. Festinger, LL.B. (McG.), B.C.L. (McG.); S. D. Frankel, Q.C., B.Sc., LL.B. (Br.Col.); C. Gallant, LL.B.; S. Gamache, LL.B.; C. Giaschi, M.B.A. (York), LL.B. (Osgoode), B.A. Hons (Tor.); J. Goulden, B.Comm. (Calg.), LL.B. (Br.Col.); K. Gounden, LL.B.; J. Gratl, B.A. Phil. (Wat.), M.A. Phil. (Wat.), LL.B. (Tor.); B. M. Green, B.Sc. (Prin.), M.A. (W.Ont.), LL.B. (Osgoode); K. Grieve, B.A. (S.Fraser), LL.B. (Br.Col.); A. Gunn, B.A. (Br.Col.), LL.B. (Tor.), LL.M. (Camb.); D. Hanna, B.A. (S.Fraser), LL.B. (Br.Col.); T. Hawkins, B.A. (S.Fraser), LL.B. (Sask.); I. Hayward, B.A. (Hons.), (Qu.; St. And.), LL.B. (Qu.); R. Holloway, B.A., LL.B. (Br.Col.); A. Hudson, B.A., LL.B. (Br.Col.); J. Jeske, B.Ed. (Alta), LL.B. (Osgoode); D. Jordan, Q.C., B.A., LL.M. (Man.), LL.M. (Br.Col.); W. Kaplan, B.A., LL.B. (Br.Col.), LL.M. (Harv.); K. Keilty, B.A. (Br.Col.), LL.B. (Br.Col.); J. Kleefeld, B.A. (Wat.), LL.B. (Br.Col.), LL.M. (Osgoode); M. J. Korenberg, B.A. (Car.), LL.B. (York); E. Kroft, LL.B. (York), LL.M. (Br.Col.); R. Kyle, LL.M. (Br.Col.), LL.B. (W.Ont.); T. Laliberte, Q.C., B.A., LL.B. (Br.Col.); G. Lang, B.A. (S.Fraser), LL.B. (Br.Col.); R. Lesperance, LL.B.; T. Levy, B.A. (W.Ont.), LL.B. (Osgoode); D. Little, B.Comm. (Br.Col.), LL.B. (Tor.); T. Lo, B.Sc. (Hons.), LL.B. (Br.Col.); L. Lothian, B.A. (Winn.), LL.B. (Manit.), LL.M. (Br.Col.); L. Fax: 604-822-6006

Library and Archival Studies Website
(www.slais.ubc.ca)

The School of Library, Archival and Information Studies offers programs leading to the Doctor of Philosophy, the Master of Library and Information Studies, the Master of Archival Studies, and the Certificate of Advanced Study. The School also offers the Joint Master of Archival Studies/Master of Library and Information Studies Degree Program and, with the participation of the Departments of English, Language and Literacy Education, and Theatre, Film and Creative Writing, the multi-disciplinary Master of Arts in Children's Literature. The mission of the School is to prepare professionals to exercise leadership in planning, implementing and promoting the preservation, organization, and effective use of recorded information and ideas.

The School opened in 1961 as a one-year post-graduate Bachelor of Library Science program. It has grown to include four master's programs and an enrolment of over 250 students. Academic governance of its programs rests with the Faculty of Graduate Studies, but the School remains within the administrative jurisdiction of the Faculty of Arts. Graduates of the School work in institutional libraries and archives, for employers in the private sector, and as self-employed intermediaries between stored information and its seekers.

MASTER OF LIBRARY AND INFORMATION STUDIES

This program prepares graduates for a wide variety of information-based careers in the profit and not-for-profit sectors where the option of salaried or free-lance contract employment is often available. In all employment opportunities, graduates are expected to understand and appreciate the application of computer technology to information management, the information-seeking behaviours of various user groups, and the policies that affect the free flow of information.

Typical jobs held by recent graduates include: knowledge manager for a large corporation, organizing and facilitating information access and dissemination; children's librarian in a public library, providing special programming and reference services; web master for an e-commerce company, designing, maintaining, and analyzing use of a corporate website; and research analyst for an international investment company.

The program in Library and Information Studies has been recognized by the Canadian and American Library Associations since 1962 as fully meeting their standards for the accreditation of graduate education for the library and information professions.

ADMISSION

Prospective applicants may address enquiries and applications for admission to the Admissions Secretary, School of Library, Archival and Information Studies. Specify the Master of Library and Information Studies program. Admission application dates are as follows:

For September admission:

- Domestic students: February 1
- International students: February 1

For January admission:

- Domestic/International students: May 1

The School accepts only students whose personal and academic qualifications appear to make them suitable for successful practice in library, archival, and information professions.

The Program has a limited enrolment. The number of qualified applicants exceeds the number of available places. In recent years, therefore, those accepted have shown academic ability above the minimum required standard specified below.

For admission to the Program, a candidate must:

- 1) possess a four-year bachelor's degree (or its equivalent) from a recognized university in a discipline acceptable to the Admissions Committee for the program;
- 2) have achieved a minimum overall average in the 'B+' range (76% at UBC) in third- and fourth-year level courses of a bachelor's degree; and

- 3) show promise of superior professional performance as attested by letters of reference and the SLAIS questionnaire.

Applicants to the Program from international institutions will be considered on a case by case basis for eligibility. An applicant possessing a bachelor's degree or its academic equivalent who does not meet the requirements of point two above should contact the School's Student Services Coordinator for information regarding possible qualifying course work.

Undergraduate Preparation

A broad educational background is expected of the information professional. In the undergraduate years prospective applicants should select elective courses that will give some acquaintance with the humanities, sciences, and social sciences. In general, it is desirable to have a wide range of reading and recreational interests.

A librarian, archivist, or other information professional must often interpret documents, and/or data in searching systems, in more than one language. The study of major languages other than English at the undergraduate level is therefore recommended as preparation. Efficient use of computers is essential in the information professions today; it is expected that students come into the School with basic computer competence.

Language Requirement

Applicants from a university outside Canada in which English is not the primary language of instruction must present evidence of competency to pursue studies in the English language prior to being extended an offer of admission. The School of Library, Archival and Information Studies requires a score of at least 250 on the computer-based TOEFL, minimum score of 600 on the paper-based TOEFL, or a score of at least 100 on the new internet-based TOEFL introduced in September 2005.

ACADEMIC REGULATIONS

The general academic regulations of the University and of the Faculty of Graduate Studies apply. The following regulations are specific to the School:

- 1) A student may continue in the Program if an overall average of 70% is obtained in the Core courses, and if no individual course is failed (grade below 60%). A student who fails to meet either of these

two requirements must withdraw from the Program.

- 2) A student must maintain an overall average of 70% throughout the Program. A student who fails to meet this requirement will be required to withdraw from the program.
- 3) A student must obtain at least 60% in any course to pass that course. However, only six credits graded under 70% can be credited toward the degree.
- 4) If a student fails a non-Core course in the M.L.I.S. Program, the student may repeat that course if the School so recommends and the Dean approves. A course in which a grade of less than 70% was obtained may be repeated for a higher standing if recommended by the School.
- 5) Field trips are integral parts of both programs; satisfactory participation in them is required of all students.
- 6) A one-time Student Activity Fee will be charged at the start of the program for materials and services provided by the School. The fee is subject to change.
- 7) Written work may be refused a passing mark if it is, in the opinion of the faculty, deficient in English.
- 8) The School reserves the right to require a student to withdraw from the Program if considered to be unsuited to proceed with the study or practice of the library or archival profession.

Methods of Instruction

The School employs a wide variety of instructional methods including lectures, laboratories, discussions, seminars, directed study, colloquia, field trips, and field work. Each student has an individual faculty advisor available for consultation and specific assistance.

Field Trips

Field trips are arranged throughout the school session. For the most part these are visits of observation of a few hours in libraries or archives in the Vancouver area, but day-long or even two-day trips may be required. The student is responsible for most expenses incurred in conjunction with such field trips and with off-campus activities in the practicum/internship/professional experience courses.

Attendance

Regular attendance is expected. A student who cannot attend a class, field trip, etc., should notify the Director's Office or the instructor concerned by telephone or email, preferably in advance if the absence is foreseen.

Part-Time Work

The School's programs are time-consuming, particularly during the first term of familiarization with new vocabulary, concepts, and professional issues. Most students find it unwise to consider more than four to six hours per week of outside work during the first term. Inquiries for part-time work at the University should be directed to *Career Services*, p. 59, in Brock Hall.

Admission to Courses

A student not registered in one of the School's programs who wishes to enrol in or audit any of its courses should apply to the SLAIS Graduate Advisor.

DEGREE REQUIREMENTS

The Master of Library and Information Studies is awarded on completion of 48 credits of work approved by the School and the non-credit practicum (LIBR 595).

The required courses are LIBR 500, 510, 540, 560 (the "Core"), 570, and 590. Students taking the program on a part-time basis are required to take LIBR 500 and/or 560 in their first term. All other LIBR courses require LIBR 500 and 560 as pre- or corequisites. Three or more of the Core courses are prerequisites to most advanced courses, because the Core introduces the knowledge that should be common to all librarians.

With the approval of the advisor, a student may apply to the program up to 12 credits for courses other than those designated 'LIBR' at this university, whether taken at UBC or another institution.

A student who enters the program having previously begun work toward, or obtained, a recognized professional qualification in library and information studies as specified under *Admission*, p. 315, may be exempted from some or all of the required courses. Students who wish to request these exemptions must do so prior to registering in the Program. Such requests should be addressed to the School's graduate advisor, and should enumerate the courses for which exemption is sought as well as a detailed rationale, including previous courses taken and work history, for the exemption. The request will be adjudicated by the School's Graduate Advisor and, if approved, a recommendation for exemptions will go forward to the Faculty of Graduate Studies. There will be no reduction in the total credit requirement to complete the degree.

Practicum

The required non-credit LIBR 595: Practicum, provides directed experience in an information-based organization. It normally takes place following completion of the Core courses plus 12 additional credits, and is arranged by the School after consultation with the student.

Co-operative Work Program

M.L.I.S., M.A.S. and Joint students who have completed 24 credits of course work by their first Co-op work term are eligible to apply to the School's co-op work program. Applications are submitted in October for the work period that begins in May of the following year. Depending on their individual needs, students may elect to take a term of work lasting either four months (January to April, May to August, or September to December), or eight months (January to August, May to December, or September to April), or do two consecutive four-month terms. Students are paid for their work according to industry standards, which will vary depending on the type of library or

information agency. Students do not receive academic credit for their work term, but participation in the co-op is noted on transcripts.

Thesis

A student with research interests should elect to write a thesis. Consultation on this with the School's advisor should begin by the end of the term in which 24 credits have been completed.

First Nations Concentration

The First Nations curriculum concentration in either the M.L.I.S. or M.A.S. program offers students the opportunity to complete courses selected for their relevance to the First Nations librarian or archivist. In addition to the required courses of the chosen program (M.L.I.S. or M.A.S.), a student enrolled in the concentration must also take courses in fundamentals of the School's other program, and elective courses offered by the School and other departments. All elective courses must be chosen for their particular application to First Nations studies. Satisfactory completion of the concentration will be noted on the student's transcript.

Advanced Standing

A student who has completed part of this Master of Library and Information Studies program and subsequently takes courses in an accredited program in the field at another institution may apply to have some credit for those courses applied to this degree provided such courses can be equated with those in this program that the student has not already taken. Students who have completed a 30-credit post-baccalaureate diploma in teacher-librarianship within the past five years may apply for up to 6 credits of advanced standing. Address application for such transfer of credit to the Director.

MASTER OF ARCHIVAL STUDIES

Archives preserve the records created by public and private bodies and individuals in the normal course of their activities and make those records available for a broad range of societal purposes including scholarly research. As such, archives are an important agency of many modern administrations (such as governments, businesses, churches, and universities) and are vital institutions in the preservation of society's documentary heritage. The role of the archivist is to plan and implement programs to appraise, acquire, preserve, and make available records of enduring value to society.

The archivist's work involves promoting and administering the systematic management of records throughout their life cycle, acquiring a broad range of materials of all media, and applying automation to problems of retrieving information from archives – all within a legal and regulatory context. Thus, while maintaining close links with the study of history, professional archival studies also have interdisciplinary links with administrative studies, legal studies, media and communication studies, and library and information studies.

The curriculum accords with the guidelines for archival education published by the Association of Canadian Archivists and the Society of American Archivists.

ADMISSION

Prospective applicants may address enquiries and applications for admission to the Admissions Secretary, School of Library, Archival and Information Studies. Specify the Master of Archival Studies program. The deadline for applications for the session beginning the following September are:

- Domestic students: February 1
- International students: February 1

The School accepts only students whose personal and academic qualifications appear to make them suitable for successful practice in the library and archival professions.

The Program has a limited enrolment. The number of qualified applicants exceeds the number of available places. In recent years, therefore, those accepted have shown academic ability above the minimum required standard specified below.

For admission to the Program, a candidate must:

- 1) possess a four-year bachelor's degree (or its equivalent) from a recognized university in a relevant discipline or in an area which is regarded as appropriate by the Admissions Committee for the program;
- 2) have achieved a minimum overall average in the B+ range (76% at UBC) in third- and fourth-year level courses of a bachelor's degree; and
- 3) show promise of superior professional performance as attested by letters of reference and the SLAIS questionnaire.

Applicants to the Program from international institutions will be considered on a case by case basis for eligibility. An applicant possessing a bachelor's degree or its academic equivalent who does not meet the requirements of point two above should contact the School's Student Services Coordinator for information regarding possible qualifying course work.

Undergraduate Preparation

An undergraduate student considering working in the field of archives should consult the School about useful preparatory courses. An interview may be arranged at any time.

A broad cultural background is expected of the working archivist. The prospective student should therefore endeavour to become acquainted with the humanities, social sciences, and sciences during undergraduate studies. Because of the close link between archives and historical studies of all kinds, particular attention should be paid to studies in history and allied disciplines that take an historical perspective such as anthropology, economics, geography, and sociology. The study of Canadian history is extremely useful preparation for a number of the required courses of the program; successful completion of at least 12 credits in

Canadian history at the undergraduate level is desirable.

The librarian, archivist, or other information professional must often interpret documents, and/or data in searching systems, in more than one language. The study of major languages other than English at the undergraduate level is therefore strongly recommended. Efficient use of computers is essential in the information professions today; it is expected that students come into the School with basic computer competence.

Language Requirement

Applicants from a university outside Canada in which English is not the primary language of instruction must present evidence of competency to pursue studies in the English language prior to being extended an offer of admission. The School of Library, Archival, and Information Studies requires a score of at least 250 on the computer-based TOEFL, minimum Score of 600 on the paper-based TOEFL or a score of at least 100 on the new internet-based TOEFL, introduced in September 2005.

ACADEMIC REGULATIONS

The general academic regulations of the University and of the Faculty of Graduate Studies apply. The following regulations are specific to the School:

- 1) A student may continue in the Master of Archival Studies program if an overall average of 70% is obtained in the required ARST courses of the first term of the first year, and if no individual course among them is failed (grade below 60%). A student who fails to meet either of these two requirements must withdraw from the program.
- 2) A student must maintain an overall average of 70% throughout either the Program. A student who fails to meet this requirement will be required to withdraw from the program.
- 3) A student must obtain at least 60% in any course to pass that course. However, only six credits graded under 70% can be credited toward the degree.
- 4) If a student fails a non-core course in the Program, the student may repeat that course if the School so recommends and the Dean approves. A course in which a grade of less than 70% was obtained may be repeated for a higher standing if recommended by the School.
- 5) Field trips are integral parts of both programs; satisfactory participation in them is required of all students.
- 6) A one-time Student Activity Fee will be charged at the start of the program for materials and services provided by the School. The fee is subject to change.
- 7) Written work may be refused a passing mark if it is, in the opinion of the faculty, deficient in English.
- 8) The School reserves the right to require a student to withdraw from the Program if considered to be unsuited to proceed with

the study or practice of the library or archival profession.

Methods of Instruction

The School employs a wide variety of instructional methods including lectures, laboratories, discussions, seminars, directed study, colloquia, field trips, and field work. Each student has an individual faculty advisor available for consultation and specific assistance.

Field Trips

Field trips are arranged throughout the session. For the most part these are visits of observation of a few hours in libraries or archives in the Vancouver area, but day-long or even two-day trips may be required. The student is responsible for most expenses incurred in conjunction with such field trips and with off-campus activities in the practicum/internship/professional experience courses.

Attendance

Regular attendance is expected. A student who cannot attend a class, field trip, etc., should notify the Director's Office or the instructor concerned by telephone or email, preferably in advance if the absence is foreseen.

Part-Time Work

The School's programs are time-consuming, particularly during the first term of familiarization with new vocabulary, concepts, and professional issues. Most students find it unwise to consider more than four to six hours per week of outside work during the first term. Inquiries for part-time work at the University should be directed to *Career Services*, p. 59, in Brock Hall.

Admission to Courses

A student not registered in one of the School's programs who wishes to enrol in or audit any of its courses should apply to the Director.

DEGREE REQUIREMENTS

The Master of Archival Studies is awarded on the completion of 48 credits of work. In the first year of the program, beginning in Term one of a Winter Session, the student must take six required courses comprising 18 credits (ARST 510, 515, 516, 520, 530, and 593B). The remainder of the program consists of six credits of required courses (ARST 540 and 587) and 24 credits of elective courses or 18 credits of electives and a 6-credit thesis.

With the approval of the student's advisor, a student may apply to the program up to 12 credits for courses other than those designated ARST at this university, whether taken at UBC or at another institution.

Internship

Some extended field experience in an archival repository is highly desirable for a student who has had limited prior contact with the work of the practising archivist. It is usual to undertake this during the summer between the two years of course work. The decision to elect ARST 595: Internship must be confirmed with the

faculty/school advisor by the end of the second week of classes in the second term of studies so that arrangements may be made.

Co-operative Work Program

M.L.I.S., M.A.S. and Joint students who have completed 24 credits of course work are eligible to apply to the School's co-op work program. Applications are submitted in October for the work period that begins in January of the following year. Applications are submitted in January for the work period that begins in May. Depending on their individual needs, students may elect to take a term of work lasting either four months (January to April, May to August, or September to December), or eight months (January to August, May to December, or September to April), or do two consecutive four-month terms. Students are paid for their work according to industry standards, which will vary depending on the type of library or information agency. Students do not receive academic credit for their work term, but participation in the co-op is noted on transcripts.

Thesis

A student with research interests should elect to write a thesis. Consultation on this with the School's advisor should begin by the end of the term in which 24 credits have been completed.

First Nations Concentration

The First Nations curriculum concentration in either the M.L.I.S. or M.A.S. program offers students the opportunity to complete courses selected for their relevance to the First Nations librarian or archivist. In addition to the required courses of the chosen program (M.L.I.S. or M.A.S.), a student enrolled in the concentration must also take courses in fundamentals of the School's other program, and elective courses offered by the School and other departments. All elective courses must be chosen for their particular application to First Nations studies. Satisfactory completion of the concentration will be noted on the student's transcript.

JOINT M.A.S./M.L.I.S

The Joint Degree Program allows students to earn both a Master of Archival Studies and a Master of Library and Information Studies within a reasonable period of time (generally between three and five years). Students considering this option should carefully read the descriptions, including the sections regarding undergraduate preparation for each of the two individual degrees. Students who wish to complete the Joint Degree Program should indicate this as early as possible, preferably on their application submitted to the School prior to admission, or following admission by speaking to a faculty advisor.

ADMISSION

See information under *Master of Library and Information Studies*, p. 315, or *Master of Archival Studies*, p. 317, degree programs.

Language Requirement

See information under *Master of Library and Information Studies*, p. 315, or *Master of Archival Studies*, p. 317, degree programs.

Supervision

Candidates meeting the admission standards above will register in the School of Library, Archival and Information Studies and will be assigned an advisor from each of the two degree programs.

DEGREE REQUIREMENTS

The two master's degrees, M.A.S. and M.L.I.S., are awarded on the completion of 81 credits of work approved by the School plus required non-credit studies such as the practicum in the M.L.I.S. program. Students must complete the following:

- 1) the required courses in the M.L.I.S. program: LIBR 500, 510, 540, 560, 570, 590, and two three-credit LIBR elective courses (21 credits);
- 2) the required courses in the M.A.S. program: ARST 510, 515, 516, 520, 530, 540, and 587 (21 credits);
- 3) either LIBR 500 or ARST 593B (3 credits);
- 4) 15 credits in the M.L.I.S. program;
- 5) 15 credits in the M.A.S. program; and
- 6) 6 additional credits in either program.

Students in the two degrees should not take courses outside those offered in the M.A.S. and M.L.I.S. programs.

Practicum/Internship

A required non-credit practicum provides direct library experience under actual library operating conditions. In addition, some field experience in an archival repository is highly desirable for a student who has had limited prior contact with the work of the practicing archivist. These two work experiences will be scheduled in consultation with the student's advisors.

Co-operative Work Program

Students who have completed 24 credits of course work are eligible to apply to the School's co-op work program. Applications are submitted in September, and the work period begins in May of the following year. Depending on their needs, students may elect to take a term of work lasting either four months (May – August) or eight months (May – December), or do two consecutive four-month terms (May – August and September – December). Students are paid for their work according to industry standards. Students do not receive academic credit for their work, but participation in the co-op work program is noted on transcripts.

Thesis

A student with research interests may elect to write a thesis in one of the two fields, but not both. Consultation with the appropriate faculty advisor should begin before the student has completed one-half of the required courses.

MASTER OF ARTS IN CHILDREN'S LITERATURE

The School, with the participation of the departments of English, Language & Literacy Education, and Theatre, Film, and Creative Writing, offers a multi-disciplinary Master of Arts program in Children's Literature. The Program provides specialized education for graduate students in the study of children's literature using a multi-disciplinary approach. The Program provides each student with the opportunity to study the creative writing and publishing of this literature, examine models of sharing its rich heritage with the young, and also facilitate the literary, social, historic, and psychological analyses of children's literature as literature. This multi-disciplinary approach will expose students to many schools of literary criticism, educational theory, and professional and creative practice. It will acquaint students with the broad literary canon of children's literature across a spectrum of languages and cultures and with a variety of critical perspectives and professional application.

An undergraduate student considering working in the field of children's literature should consult the School about useful preparatory classes. An interview may be arranged at any time.

A broad cultural background is expected of M.A. candidates. Prospective students should select courses that will give some acquaintance with the humanities and social sciences during undergraduate studies. Particular attention should be paid in undergraduate or graduate studies to courses in children's literature, English, writing for children, child psychology, and the history of childhood.

ADMISSION

For admission to the M.A. program, a candidate must:

- 1) possess a four-year bachelor's degree (or its equivalent) from a recognized university in a relevant discipline or in an area which is regarded as appropriate by the Admissions Committee for the program;
- 2) have achieved a minimum overall average in the 'B+' range (76% at UBC) in third- and fourth-year level courses of a bachelor's degree; and
- 3) show promise of success or superior accomplishment in one or more aspects of children's literature as attested by letters of reference and a personal letter of intent.

An applicant possessing a bachelor's degree or its academic equivalent who does not meet the requirements of point 2 above should contact the School's Admissions Coordinator for information regarding possible qualifying work.

DEGREE REQUIREMENTS

The Master of Arts in Children's Literature is awarded on the completion of 30 credits of work, including 24 credits of course work and a 6-credit thesis. The course work will be selected in consultation with the supervisory committee to support the multi-disciplinary

nature of the program. 6 credits of course work may be taken at the 300 or 400 level; the remainder must be at the 500 level and above.

Of the 24 credits of course work, 9 are required including at least 6 at the 500 level:

- 3 credits (Historical Overview) from the following: LIBR 522A, LIBR 522B, ENGL 468, LLED 441;
- 3 credits (Contemporary Children's/Young Adult Literature) from the following: LLED 442, LLED 449, LIBR 522A, LIBR 522B, LIBR 524, LLED 540, LLED 541;
- 3 credits (Research Methodology) from the following: EDUC 500, LIBR 590.

The remaining 15 credits of courses may be chosen from the wide range of offerings available in the Departments of English, French, Language and Literacy Education, Theatre, Film, and Creative Writing, and the School of Library, Archival, and Information Studies; from relevant courses, with the Chair's approval, offered elsewhere at UBC; and from approved courses offered by other institutions.

A maximum of 12 credits earned in courses germane to children's literature, no more than five years prior to entry into the program may be transferred from another institution or another program at UBC. Transfer credit will not be accepted for a course that has been applied to another degree. The degree may be taken on a full-time or part-time basis. Students may begin the program in either term of Winter or Summer Session. The application dates are:

For September admission:

- Domestic students: February 1
- International students: February 1

Thesis

The supervisory committee will advise on, monitor, and evaluate the 6-credit thesis.

DOCTOR OF PHILOSOPHY IN LIBRARY, ARCHIVAL AND INFORMATION STUDIES

INTRODUCTION

The School of Library, Archival and Information Studies offers a program leading to the Doctor of Philosophy. The Ph.D. program is designed to provide advanced research training for outstanding students who have already obtained a Master of Archival Studies (M.A.S.) degree or a Master of Library and Information Studies (M.L.I.S.).

ADMISSION

Admission to the doctoral program requires an M.A.S., an M.L.I.S., or equivalent from a recognized institution indicating a superior level of academic performance in a field of specialization that will support the applicant's Ph.D. research. Students must satisfy the admission requirements of the Faculty of Graduate Studies, and be approved by the School's Doctoral Admissions Committee.

Admission decisions are based on the degree to which the applicant's intended area of research matches faculty expertise, and the suitability of the applicant for advanced graduate work as attested by letters of reference, prior academic performance, record of publications, and work in the field of library, archival, and information studies.

PROGRAM REQUIREMENTS

The Doctor of Philosophy in Library, Archival and Information Studies builds on the successful interdisciplinarity established at the master's level. There is one Ph.D. degree program, but students may specialize by taking a theoretical/research foundations course in either Library/Information Studies or Archival Studies.

The program consists of:

- ARST/LIBR 600;
- ARST/LIBR 620;
- ARST/LIBR 621;
- ARST 610;
- LIBR 610;
- additional coursework as recommended by the research supervisor and/or doctoral committee;
- a comprehensive examination (written and oral components) at an appropriate time as judged by the student's doctoral committee, not before the end of the first year; but before the end of the third year; and
- research leading to a written dissertation (ARST/LIBR 699) that is defended in an oral examination.

CERTIFICATE OF ADVANCED STUDY

Work in information-based organization is changing more quickly than ever before, due to the pervasive influence of electronic information-processing technologies. The Certificate of Advanced Study, which may be undertaken by librarians or archivists, allows the working information professional who already holds a post-graduate degree to engage in concentrated further study in their field. The Certificate program allows the candidate, with advice from faculty members, to build a unique program of course work and independent investigation designed to further their own interests.

PREPARATION

A candidate with experience as a librarian or information specialist must possess a master's degree in library and information studies earned in a program accredited by the American Library Association, or a program of equivalent stature outside North America. A candidate with archival experience must possess a master's degree in archival studies.

Efficient use of computers is essential in the information professions today; it is expected that students come into the program with facility in using computer software including Microsoft Windows.

ADMISSION

Prospective applicants will select an advisor from among the School's full-time faculty members. The applicant and advisor, following consultation with instructors within the School, will design a proposed program of study suitable for the applicant. The proposed program will include a list of courses that the applicant proposes to take, a timetable indicating the applicant's ability and willingness to complete the program within five years, and a one-page description of the extended written work that the applicant proposes to complete as a thesis, research project, or directed study. The proposed program of study, approved both by the applicant and the advisor, must be submitted to the Admissions Committee with the application form.

The program may begin in Term 1 or Term 2 of Winter Session or in Term 1 of Summer Session.

The deadline for application is the first of the month at least two months prior to the proposed start of the certificate program, i.e., July 1, November 1, or March 1.

Language Requirement

Applicants from a university outside Canada in which English is not the primary language of instruction must present evidence of competency to pursue studies in the English language prior to being extended an offer of admission. The School of Library, Archival and Information Studies requires a score of at least 250 on the Test of English as a Foreign Language (TOEFL). This is equivalent to 600 on the older version of the test.

ACADEMIC REGULATIONS

The general academic regulations of the University apply. The following regulations are specific to the Certificate program:

- 1) A student may continue in the Certificate program if an overall average of 70% is maintained through the program.
- 2) A student must obtain at least 60% in any course to pass that course. However, only six credits graded under 70% can be credited toward the Certificate.
- 3) Written work may be refused a passing mark if it is, in the opinion of faculty, deficient in English.
- 4) The School reserves the right to require a student to withdraw from the Certificate program if considered to be unsuited to proceed with the study or practice of the library or archival profession.

CERTIFICATE REQUIREMENTS

A student must complete 24 credits of work approved by the School, concentrating on one or, at most, two aspects of either Library and Information Studies or Archival Studies.

The program of study may consist entirely of course work, or course work and a thesis. Where course work alone is selected, one course must be a directed research project or a directed study.

All requirements must be completed within five years of initial registration.

McBryde, B.A. (Leth.), M.L.S. (Br.Col.); Janet Turner, B.A.A. (Ryerson), M.A.S. (Br.Col.).

TUITION FEE

The tuition fee for all candidates will be equivalent to the cost of a master's degree for Canadian citizens and permanent residents (landed immigrants).

STUDENT AWARDS

The School nominates students with high academic averages (usually A or A+) for Graduate Entrance Scholarships for full-time study. These are normally valued at \$4,000.00 per year. The School nominates students with exceptional academic records for University Graduate Fellowships each October. All full-time continuing students are considered and application procedures are distributed to students who may be eligible. The fellowship would apply to the student's second year of study. The Faculty of Graduate Studies (grad.ubc.ca) administers the competition. In 2004–2005, full, non-renewable and one-year fellowships were valued at \$16,000.00 per year and partial fellowships at \$8,000.00.

ACADEMIC STAFF

Professors

Luciana Duranti, Dott. Lett., M.A.S., M.A. (Rome), Chair, Archival Studies Program; Edie M. Rasmussen, B.Sc. (Br.Col.), M.Sc. (McM.), M.L.S. (W.Ont.), Ph.D. (Sheff.).

Associate Professors

Ann Curry, B.A., B.L.S. (Alta.), M.L.S. (Br.Col.), Ph.D. (Sheff.), Chair, Doctoral Studies Program; Terence M. Eastwood, B.A., M.A. (Alta.), Dip.Ed. (Vic. B.C.); Heather MacNeil, B.A. (Guelph), M.A. (S.Fraser), M.A.S., Ph.D. (Br.Col.); Judith M. Saltman, B.A., B.L.S. (Br.Col.), M.A. (Simmons), Chair, Children's Literature Program; Martin Dowding, B.A. (Trent), M.L.S. (Tor.), M.A. (York), Ph.D. (Tor.); Richard Kopak, B.A. (Alta.), M.L.S., Ph.D. (Tor.); Francesca Marini, B.A. (Bologna), M.A. (Modena), Ph.D. (Calif., L.A.); Joseph Tennis, B.A. (Lawrence), M.L.S. (Indiana), Ph.D. (Wash.).

Senior Instructors

Mary Sue Stephenson, B.A. (Texas), M.L.S., Ph.D. (N.Texas), Chair, Library and Information Studies Program and Coordinator, Information Technology Services.

Sessional Lecturers

Beth Barlow, B.Sc., B.L.S. (Alta.); Sue Bigelow, B.Sc., M.A.C. (Qu.); Alexandra Bradley, B.Ed. (Br.Col.), B.L.S. (Alta.); Dovelie Buie, B.A., M.A.S. (Br.Col.); Jane Cobb, B.A. (Vic.B.C.), M.L.S. (Br.Col.); Beth Davies, LL.B. (Leic.), M.L.I.S. (Br.Col.); Margaret De Vries, B.A., B.Ed., M.A. (Br.Col.); Carol Elder, B.A., M.L.S. (Alta.); Ian Forsyth, B.A. (McG.), M.A. (W.Laur.); Shirley Giggey, B.A. (Car.), M.L.S. (Br.Col.); Dean Giustini, B.A. (Br.Col.), M.L.S. (Tor.); Teresa Gleave, B.A. (Alta.), M.L.I.S. (Dal.); Heather Gordon, B.A. (Calg.), M.A.S. (Br.Col.); Peter Gourlay, B.A. (McG.), M.L.S. (Br.Col.); Lisa Gysel, B.A. (Trin. W.), M.L.I.S. (Br.Col.); Melanie Houlden, B.A., M.L.S. (Br.Col.); Mary Luebbe, B.A. (Lewis and Clark Coll., Portland), M.Libr. (Wash.); Debbie Millward, B.A. (Car.), M.L.S. (Br.Col.); Simon Neame, B.A. (Vic., B.C.), M.L.I.S. (Br.Col.); Greg Rowell, ; Allison Taylor

Medicine Website (www.med.ubc.ca)

The Faculty of Medicine offers undergraduate programs of study leading to the Doctor of Medicine and Bachelor of Medical Laboratory Science. At the postgraduate level, the Faculty offers Postgraduate (Residency) Training programs. Together with the Faculty of Science and the Faculty of Graduate Studies, the Faculty of Medicine offers combined programs leading to the Doctor of Medicine and Bachelor of Science, and *Doctor of Medicine and Doctor of Philosophy*, p. 263.

The School of Rehabilitation Sciences is a part of the Faculty of Medicine that offers training in physical and occupational therapy. The School of Audiology and Speech Sciences is also a part of the Faculty and provides instruction in speech pathology. See *The School of Audiology and Speech Sciences*, p. 161, and *The School of Rehabilitation Sciences*, p. 377, for more information.

DOCTOR OF MEDICINE

The Faculty of Medicine offers a program leading to the Doctor of Medicine. The program requires a preparatory program plus four years of study in Medicine. A physician's education can be broadly divided into four phases:

- pre-medical preparation, which can be completed in a variety of faculties or programs;
- medical school training (four years);
- residency training (two to six years); and
- continuing education.

ADMISSION

Selection of a Program of Pre-Medical Studies

Students planning to apply for admission to the Doctor of Medicine program should select courses that conform with the requirements of a bachelor's degree of their choice. **No particular degree program is considered ideal** as preparation for the study and practice of medicine. A variety of pre-medical academic backgrounds is considered desirable.

Students who have completed programs that include all the prerequisites and who then enrol in unclassified non-degree programs for the sole purpose of improving their academic qualifications for admission are advised that only a small proportion of such candidates ultimately gain admission.

Prerequisites

Candidates for admission must have completed a minimum of three full years of university-level study (90 credits). OAC courses are not considered to be at the university level. The following university-level prerequisite courses (or their equivalent) must be completed by April 30 of the year for which admission is sought.

The following prerequisite courses are required for entry into the Doctor of Medicine program. UBC courses are listed; the equivalents from any recognized post-secondary institution will be accepted. Applicants are strongly encouraged to consult the Faculty of Medicine Admissions website (www.admissions.med.ubc.ca) for more details.

- 1) English, 6 credits. (Any two of ENGL 110, 111, 112, 120, 121. ENGL 112 is recommended.)
- 2) Biology, minimum 6 credits. BIOL 111, 121 and 140L. If taken prior to September 2000, please consult the Faculty website.
- 3) Inorganic Chemistry, minimum 6 credits. CHEM 121 and 123 or CHEM 111 and 113.

- 4) Organic Chemistry, 6 credits. CHEM 203 and 204 OR CHEM 205, 233 and 235.
- 5) Biochemistry, 6 credits. BIOC 300 or 303 preferred. BIOL 201 and BIOC 302 for UBC students only.

Students completing Science One at UBC meet the first-year Biology and Chemistry requirements. Courses in behavioural sciences, biometrics and statistics, and physics are recommended, but not required.

Medical College Admission Test

All applicants must take the Medical College Admissions Test (MCAT) and request that their results be released to UBC. Information and online registration are available at www.aamc.org/students/mcat.

Please note: UBC is not a part of the American Medical College Application Service (AMCAS). You must therefore specify that you would like us to receive your results by providing the UBC code (260). This can only be done **after** your results have been sent to you using MCAT's online "THx system." Applicants are strongly encouraged to use the menu option on the THx System called "Review the status of my THx requests" to confirm that results have been successfully released to UBC.

We do not require applicants to attain a minimum MCAT score to be considered for admission. However, we suggest that applicants review the profile of students admitted. Please refer to the Faculty of Medicine Admissions website (www.admissions.med.ubc.ca/admissions/index.jsp).

Test results from the five years prior to the application deadline are considered valid. The admissions website provides exact dates of valid MCATs. If you have written more than one MCAT, the MCAT with the best overall total score will be used. It is the applicant's responsibility to ensure that all results are released and received by the Admissions Office.

MCAT test scores must be released by the application deadline. Applicants writing the August MCAT exam immediately prior to application are advised they will not receive test results until after the application deadline.

Arrangements to take the Medical College Admission Test may be made with post-secondary institution counselling departments. University bookstores often sell publications related to

the MCAT. Alternatively, applicants may contact the Association of American Medical Colleges, Membership and Publication Orders, 2450 N Street N.W., Washington, DC, 20037-1126, USA; telephone 202-828-0416; www.aamc.org.

Required Academic Standards

Applications for admission will be considered from candidates who have completed all prerequisite courses prior to April 30 of the year for which admission is sought, have taken the MCAT, and who have attained a minimum overall academic average of 70% (GPA of 2.8) based on all university-level courses attempted. Official transcripts showing proof of registration for courses to be completed by April 30 of the year for which admission is sought must be received by the application deadline.

Applicants who have completed university-level courses ten years or more before the date of application may apply in writing to have these grades excluded from the calculation of the overall average. In this case, applicants must have completed 90 credits within the ten years prior to the date of application. If grades on coursework are waived, all coursework of that year and prior would be excluded from consideration (e.g., prerequisite courses taken during the excluded period will not be considered).

Persons who have been required to withdraw from another medical school for academic reasons are not eligible to apply.

Selection Process

The entering class for September 2007 is limited to 224 full-time students. The number of qualified applicants significantly exceeds the number of available positions. Therefore, not every qualified applicant will be offered admission. Admission is based on a selection process which strives to enrol the most highly qualified applicants who will be evaluated on the following criteria:

- 1) Academic criteria at the time of application, including:
 - (a) overall academic record, based on the average of all university-level courses attempted. Consideration is given to performance in courses at senior undergraduate and graduate levels, and to trends in grades from year to year;
 - (b) most recent 60 credits average;
 - (c) prerequisite average, based on the average of the prerequisites at the time of application; and
 - (d) MCAT scores.
- 2) Non-academic criteria, including motivation, maturity, integrity, emotional stability, realistic self-appraisal, social concern and responsibility, reliability, creativity, scientific and intellectual curiosity, attitude toward continuing learning, problem solving and decision-making aptitude, ability to communicate verbally and in writing, leadership potential, capacity to understand and co-operate with others, concern for human welfare, and demonstrated high level of performance in any

aspect of human endeavour. Evaluation of these non-academic criteria is based on:

- (a) a non-academic autobiographical essay submitted by the applicant;
- (b) additional essay by Aboriginal (First Nations, Metis, or Inuit) candidate, if applicable;
- (c) a list of extracurricular activities prepared by the applicant;
- (d) a report of non-academic experiences and rural interest statement;
- (e) three references, when requested;
- (f) panel interview; and
- (g) rural/remote suitability.

The interview is a critical component of the admission process. Applicants selected for an interview will be contacted by the admissions office and will also be asked to submit their reference letters. The interview dates will likely be scheduled for February/March 2006.

The selection of candidates for admission to the UBC Faculty of Medicine undergraduate distributed program is governed by guidelines established by the Senate of UBC, and is the responsibility of the Faculty of Medicine Admissions Selection Committee and the Associate Dean, Admissions. The selection process reflects the values of the UBC Faculty of Medicine and all university partners in the UBC Faculty of Medicine undergraduate distributed program. The process is designed to choose well-rounded students who meet the goals of the expanded, distributed program; who can be expected to perform well in the rigorous curriculum and problem-based learning format; and who can balance and enrich their academic experience with strong non-academic skills and interests. Similarly, selection processes of other Canadian medical schools reflect their own individual values, and are designed to select candidates who would most likely be successful in their respective programs.

The UBC Faculty of Medicine's Associate Dean of Equity oversees the selection process to ensure that all applicants are given careful consideration without regard to age, gender, race, religion, marital or economic status. The selection of candidates is made by consensus of the Admissions Selection Committee. The Admissions Selection Committee reviews and discusses all interviewed applicants. At present, admission is limited to Canadian citizens and permanent residents of Canada. Preference is given to residents of British Columbia. A maximum of ten positions may be made available to out-of-province applicants in the medical program each year. In completing the online application, candidates will provide information to help determine their suitability for education in the North. This information is used in the overall admissions process. With other non-academic criteria, references, interview scores and academic criteria, this information aids the Northern Medical Program (NMP) Admissions Subcommittee in recommending admission of students felt to be appropriate for having their M.D. Undergraduate education at the NMP.

The applicant will have the opportunity to indicate their site preferences at the time of interview. Members of the Admissions Selection Committee are not aware of an applicant's site preference during the selection discussions. Following an admissions decision, applicants offered admission are allocated to sites based on their preferences. The site choice of the accepted student is given priority, unless the available positions at that site have been filled, in which case he/she would be wait-listed for their preferred site (or sites, should the student be offered his/her third choice).

UBC Faculty of Medicine Undergraduate Distributed Program

The UBC Faculty of Medicine offers a distributed program involving 224 students at geographically separated campuses. Twenty-four students will be in the Northern Medical Program located at the University of Northern British Columbia and another 24 will be in the Island Medical Program located at the University of Victoria. The remaining 176 students will be located at UBC.

Application Procedure

Applicants are strongly encouraged to apply using the Faculty of Medicine's Online Admissions System. Applications will be available from June to October 2004 and can be found at the Medicine Admissions website (www.admissions.med.ubc.ca). All inquiries should be addressed to Admissions, Faculty of Medicine, Dean's Office. Supporting documentation must be received by the Admissions office by the application deadline. Final post-secondary transcripts for students currently enrolled in a program of studies must be received by June 15 of the year for which admission is sought.

All residents of British Columbia are required to pay an application fee of CAD\$105.00; out-of-province applicants are required to pay CAD\$155.00. An additional evaluation fee of CAD\$30.00 is required if transcripts are from an institution outside of BC. Applications with incomplete documentation or without the correct fee will not be eligible. Fees are non-refundable and are not applicable to tuition.

UBC Faculty of Medicine will interview a subset of approximately 600 applicants based on results of file reviews of academic and non-academic evaluations. On receipt of an invitation, the applicant will be requested to provide their referees with the reference forms which will be available electronically. The completed reference letters must be received by the Admissions office by the date posted on the website. Each qualified applicant will participate in one interview, in Vancouver, which is typically scheduled in March. A three-member panel consisting of an academic, a clinician and a community person, representing diverse geographic areas of BC will conduct the interview. After the interview, and after receiving further information about the three sites, applicants will determine where they would prefer to study. This information will be confidential until after admis-

sions decisions are made. Please refer to the Faculty website (www.med.ubc.ca).

Notification to successful applicants will be issued by the end of May. Successful applicants are offered a position in the Faculty of Medicine, UBC.

Aboriginal Applicants

The UBC Faculty of Medicine welcomes applications from qualified Aboriginal applicants. The Aboriginal admission process of the Faculty of Medicine has a target of 5% of the annual complement of funded seats in the first year M.D. Undergraduate Program. Aboriginal applicants can apply either to the regular stream of admission or to the Aboriginal admission process. Applicants who self-identify as Aboriginal will be considered under the Aboriginal admission process as well as under the regular admission process. If you wish to apply as an Aboriginal applicant, you will be required to write an additional essay that will be reviewed by the Aboriginal Admissions Subcommittee. Based on your completed application, you may be offered an interview with the Aboriginal Interviewing Panel. Please contact the Aboriginal Programs Coordinator in the Faculty of Medicine at 604-822-3236 or email james.andrew@ubc.ca for further information.

Post-Acceptance Requirements

Upon receipt of an official letter of offer, each successful applicant must send a deposit of CAD\$300.00 payable to the University of British Columbia, by the date specified therein. The deposit is non-refundable but will be applied to tuition fees if the student attends the Doctor of Medicine program in the academic session specified.

Upon acceptance, each applicant must submit to the Student Health Service evidence of immunizations (Tetanus/Diphtheria-Toxoid, Polio, MMR) and a negative TB skin test (if the skin test is positive, a chest x-ray is required).

Undergraduate medical students without immunity to Hepatitis B are at risk for infection. Students who are Hepatitis B antigen positive may pose a risk of passing infection to others. All students are strongly encouraged to know their serological status for Hepatitis B prior to applying to the undergraduate program of the Faculty of Medicine. Students are advised that undergraduate medical students who test positive for Hepatitis B antigen may face certain restrictions in the course of their medical training and may be constrained in their ability to practice.

All undergraduate medical students admitted to the Faculty of Medicine at UBC will have their vaccination records reviewed to determine their risk for communicable diseases. Undergraduate medical students who have not been vaccinated against Hepatitis B will be required to complete a vaccination series, unless they demonstrate they are Hepatitis B surface antigen positive. Sero-conversion will be tested in all medical students either upon entry if they have received

prior vaccination, or upon completion of a vaccination series.

Undergraduate medical students who continue to fail to sero-convert will be tested for the presence of Hepatitis B antigen by the Student Health Service. Students who demonstrate Hepatitis B infectivity may be required to complete a modified course of training and may pursue their studies only as long as their continued involvement does not pose a health or safety hazard to themselves or others and as long as they are able to meet the core requirements for a medical degree at UBC.

The Faculty of Medicine will make every reasonable effort to ensure that a modified course of training will meet professional licensing requirements. Licensing requirements and decisions are within the sole jurisdiction of the College of Physicians and Surgeons of BC. The Faculty of Medicine cannot guarantee that a modified course of training which will lead to the granting of an M.D. degree will be accepted or recognized by this or any other licensing body.

Counselling resources are available to any undergraduate medical student identified as Hepatitis B positive.

Applicants with Disabilities

Applicants to the Faculty of Medicine with disabilities will be considered in accordance with UBC's policy on Academic Accommodation for Students with Disabilities. This policy does not eliminate the need for evaluation or the need to meet essential learning outcomes. Students seeking academic accommodation due to disability must:

- Provide the necessary documentation to the Disability Resource Centre (the University does not provide or assume the cost of diagnostic services), and
- Bring the request for academic accommodation or for changes in accommodation needs to the attention of the appropriate personnel in a timely manner in order to allow for arrangement of accommodations.

Students with disabilities are encouraged to pursue their studies as long as their continued involvement does not pose a health or safety hazard to themselves or others, and as long as they are able to meet the core requirements for a medical degree. The Faculty of Medicine will make every reasonable effort to ensure that any modified course of training will meet professional licensing requirements. However, licensing requirements and decisions are within the sole jurisdiction of the College of Physicians and Surgeons of British Columbia. We cannot guarantee that a modified course of training, which leads to the granting of an M.D. degree, will be accepted or recognized by this or any other licensing body. Similarly, access to the full-range of post-graduate training may be limited for students with disabilities.

For more information please contact the UBC Disability Resource Centre at 604-822-5844 or visit the website (www.students.ubc.ca/access).

Reapplications

Unsuccessful applicants may reapply in subsequent years without prejudice. Candidates who are repeatedly unsuccessful are encouraged to explore other career options. Applications are made available again the following June.

Admission of Students by Transfer

Transfer students may be accepted to the third year of the Doctor of Medicine program only if vacancies exist in that class. Transfers are generally not possible in any other year.

In order to be eligible, students requesting transfer must be in good standing in a Canadian or US medical school accredited by the Committee on Accreditation of Canadian Medical Schools and the Liaison Committee on Medical Education.

The application deadline for transfer students is January 31. Applicants must submit an outline of their University curriculum, application fees (see above), a letter indicating their reasons for wishing to transfer, and a letter from the dean (or designate) of the medical school which they currently attend. Interviews may be required.

Requests for partial year transfers will not be considered.

Applications from Current Graduate Students

Admission of graduate students into the Faculty of Medicine will be made through the existing selection procedures as outlined above. Such students must complete all portions of the program in which they are registered, including the submission of their thesis for examination, by July 1 prior to admission to the Faculty of Medicine. Deferrals will NOT be granted to allow an applicant to complete their graduate programs.

Deferred Entry

Requests for deferred entry will be considered only from students who have completed a first degree, and then only in exceptional circumstances.

Note: Deferral requests must be made at the time of application.

Registration

The academic year of the Faculty of Medicine normally begins late in August for first, second and third years. The academic term for fourth year begins early in September.

Students in each year of the medical program will be notified of registration procedures.

No student will be allowed to register after the first day of instruction in the term, nor will they be admitted to any class after its first session, except by permission of the Dean.

ACADEMIC REGULATIONS

Attendance

Regular attendance is expected of students in all their classes (including lectures, laboratories, tutorials, seminars, etc.). Students who are

unavoidably absent because of illness or disability must report to the Dean's Office.

A student planning to be absent from classes for any reason must obtain prior permission from the Dean's Office.

All students registered in the distributed program at geographically separated campuses will be subject to the same academic regulations.

Examinations

Examinations in the Faculty of Medicine may be held at various times throughout the year. These examinations are obligatory for all students.

Should a student be unavoidably absent from a sessional or final examination because of illness or other reason, the Dean's Office must be notified of the facts in the case before the end of the period during which the examination is scheduled. Failure to observe this rule may result in a failure being recorded in the course.

When a sessional or final examination has been missed through illness or some other justifiable cause, application for deferred examination or special consideration must be made in writing to the Dean not later than 48 hours after the close of the examination period. If the absence was for reasons of health, a physician's certificate indicating the nature and duration of the illness must be submitted to the Dean's Office.

A student may be denied the privilege of writing a sessional examination in any subject because of unsatisfactory work or attendance, and in this case will be considered to have failed the course.

In any course which involves several components (for example tutorial performance, laboratory work and written examinations), a student is required to achieve satisfactory standing in all parts of the course. If the course is repeated, no exemption will ordinarily be granted from the work in any part.

Term essays and examination papers may be refused a passing mark if they are illegible or noticeably defective in English.

The passing mark in the Faculty of Medicine is 60%.

All results of final examinations will be passed upon by a promotions committee. Final examination results will be released by Enrolment Services.

Subjects of the Final Examinations

FIRST YEAR

Three longitudinal courses: Clinical Skills; Doctor, Patient and Society; Family Practice Continuum.

Six sequential courses:

- Orientation
- Principles of Human Biology
- Host Defences and Infection; Cardiovascular; Pulmonary; Fluids, Electrolytes, Renal and GU.

SECOND YEAR

Three longitudinal courses: Clinical Skills; Doctor, Patient and Society; Family Practice Continuum.

Seven sequential courses: Musculoskeletal and Locomotor; Blood and Lymphatics; Gastrointestinal; Endocrine and Metabolism; Integument; Brain and Behaviour; Reproduction; Growth and Development.

THIRD YEAR

Promotion of students from third to fourth year will be based on successful completion of written examinations, oral examinations, clinical performance evaluations for each clinical clerkship, and the interdepartmental OSCE Examination.

The subjects in which students will be assessed in third year will be Anaesthesia; Dermatology; Emergency Medicine; Family Practice; Medicine; Obstetrics and Gynaecology; Ophthalmology; Orthopaedics; Pediatrics; Psychiatry; and Surgery.

FOURTH YEAR

Successful completion of eight weeks of selectives and eight weeks of electives. In term one, based on clinical performance evaluations and case reports.

In term two, the subjects in which students will be assessed are Evidence Based Medicine, Pharmacology and Therapeutics, Health Care and Epidemiology, Doctor Patient Relationships, Palliative Care and Cross Cultural Health Care Ethics and the Law.

Medical Council of Canada Examinations

All persons writing the Medical Council of Canada examinations are required to submit a separate examination fee to that body. This fee is set by the Council and is payable to The Registrar, Medical Council of Canada.

Grading Practices

In the Faculty of Medicine, individual courses in the Doctor of Medicine undergraduate program are graded on an Honours (H), Pass (P), Fail (F) system. The Faculty defines Fail as below 60% and a Pass as 60% or greater, but below Honours. An Honours grade is assigned by individual course directors and approved by the promotions committee.

Advancement

The Faculty will determine the student's fitness for promotion at the end of each session.

A student whose academic standing is unsatisfactory may be required either to withdraw from the Faculty or to repeat all or part of the academic work for the year.

If the progress of a student has been unsatisfactory in any given term, the Faculty may permit a supplemental examination in the course(s) failed, provided that attendance has been satisfactory and no more than two courses have been failed. The supplemental examination program is offered to students who have failed one or more core components within a course (e.g., in-class assessment or the comprehensive examination). A course failure is formally and permanently noted on the student's transcript. The course director(s) or block chair(s) concerned will direct such work as will be necessary to

prepare for the supplemental examination. It is the responsibility of the student to consult the course director(s) concerned about such arrangements. If the student satisfies the requirements of the course(s) concerned and passes each supplemental examination with a mark of at least 65%, he/she will be promoted. If the student does not pass the supplemental examination program, he/she may be required to withdraw from the program or to repeat a portion or the entire work of the year.

Although satisfactory academic performance is prerequisite to advancement it is not the sole criterion in the consideration of the suitability of a student for promotion or graduation. The Faculty reserves the right to require a student to withdraw from the Faculty if considered to be unsuited to proceed with the study or practice of medicine.

Graduation Requirements

A candidate for the Doctor of Medicine must be at least 21 years of age; have fulfilled all the requirements for entrance to the Faculty of Medicine and have attended the four full years of instruction which comprise the medical course. No one will be admitted to candidacy for the Doctor of Medicine who has not been in attendance for the final two years in the Faculty of Medicine at the University of British Columbia.

Each candidate for graduation must have passed all the required examinations in the subjects comprising the medical course, and have received acceptable ratings in certain courses for which satisfactory completion is required but specific marks are not assigned.

The Faculty will recommend to Senate the granting of the Doctor of Medicine to a student who has completed satisfactorily the academic requirements.

Each candidate for the Doctor of Medicine must make formal application, on a form obtainable at Enrolment Services.

DEGREE REQUIREMENTS

The medical course extends through four academic sessions. All students in the distributed program will follow the same course of studies at the geographically separated campuses. All students will be based in Vancouver for the first half of first year, after which students in the Northern Medical Program and Island Medical Program will move to the distant campuses to continue their studies.

The first half of the first year begins with a one-week orientation in which students are introduced to the problem-based learning (PBL) method, receive instruction in medical informatics and are oriented to the profession of medicine and the components of the curriculum. Following the orientation phase, Principles of Human Biology continues for 14 weeks. This course has the PBL tutorial as its primary teaching methodology with supporting lectures and labs. The underlying purpose of this course is to provide an introduction to the core concepts, basic principles and the language of medicine. This will then enable students to participate

effectively in the next component, the Foundations of Medicine. Basic science material is taught in the context of clinical cases and the material learned is interdisciplinary and integrated. The courses in this segment are Host Defences and Infection, Cardiovascular, Pulmonary, and Fluids, Electrolytes, Renal and GU. Clinical Skills I allows students to acquire effective communication skills and to learn how to conduct an interview of a patient. History taking and physical examination skills are learned in relation to the body systems covered in the Foundations of Medicine courses. Family Practice Continuum exposes students to patients and physicians in a medical office setting where they learn and practice clinical skills. This is supplemented by small-group tutorials. The Doctor, Patient and Society course focuses on the scientific basis for the humanities and deals with issues of population health, health care systems, ethics and the doctor-patient relationship.

In the second year of the curriculum, students continue with the Foundations of Medicine component. The courses in this year are Musculoskeletal and Locomotor, Blood and Lymphatics, Gastrointestinal, Endocrine and Metabolism, Integument, Brain and Behaviour, Reproduction and Growth and Development. Clinical Skills II, Doctor, Patient and Society and Family Practice Continuum also run as continuums through the second year in conjunction with the Foundations of Medicine blocks.

The third year is a clerkship and consists of 12 months of clinical studies. The first four months of the final year will consist of advanced electives and selectives. The remainder of the program consists of a classroom-based course, Effective Skills for Medical Practice.

During the program, protected time for independent study has been set aside to allow and encourage students to take responsibility for their own progress in meeting the broad objectives for the undergraduate medical course.

The first two years of the program are given mainly at the university campuses of UBC, UVIC and UNBC. Clinical instruction is given in affiliated teaching hospitals and community resources throughout the province.

Expenses

Equipment, instruments and supplies will be required throughout the four-year program. It is recommended that no purchases be made until details concerning the necessary equipment are provided at the beginning of classes by the courses concerned.

Textbooks

Information regarding textbooks will be given before the start of each course. Not less than CAD\$500 per year should be available for purchasing textbooks and expendable supplies.

Courses Leading to the Doctor of Medicine

Departmental and interdepartmental courses offered by the Faculty of Medicine are listed in detail in Courses (www.students.ubc.ca/calendar/courses.cfm).

The subjects in which instruction is given in the four academic sessions leading to the Doctor of Medicine are as follows:

FIRST YEAR

Three longitudinal courses: Clinical Skills; Doctor, Patient and Society; Family Practice Continuum.

Six sequential courses:

- Orientation
- Principles of Human Biology
- Host Defences and Infection; Cardiovascular; Pulmonary; Fluids, Electrolytes, Renal and GU.

SECOND YEAR

Three longitudinal courses: Clinical Skills; Doctor, Patient and Society; Family Practice Continuum.

Seven sequential courses: Musculoskeletal and Locomotor; Blood and Lymphatics; Gastrointestinal; Endocrine and Metabolism; Integument; Brain and Behaviour; Reproduction; Growth and Development.

THIRD YEAR

Rural Family Practice.

Clinical Clerkships: Medicine; Obstetrics and Gynaecology; Ophthalmology; Pediatrics; Psychiatry; Surgery (including sub-specialties); Anaesthesia; Emergency Medicine; Dermatology; Orthopaedics.

FOURTH YEAR

Sixteen weeks of advanced electives and selectives in clinical subjects.

Effective Skills for Medical Practice course, comprising: weekly themes; pharmacology and therapeutics; healthcare and epidemiology; doctor-patient relationships; ethics and law; palliative care.

ELECTIVES

Information concerning elective offerings may be obtained from the Dean's Office, Undergraduate Education. In addition to formal courses offered by the Faculty of Medicine elective programs arranged by the student may be permissible in individual cases, subject to approval by the Faculty.

INTERPROFESSIONAL ELECTIVES

Under the auspices of the Council, the *College of Health Disciplines*, p. 291, is responsible for the administration of interprofessional courses (IHHS), which are recommended as electives to students in Medicine. For more information see Courses (www.students.ubc.ca/calendar/courses.cfm), IHHS, or visit the website at www.health-disciplines.ubc.ca.

DOCTOR OF PHILOSOPHY AND DOCTOR OF MEDICINE

The M.D./Ph.D. program is a combined program jointly offered by the Faculty of Medicine and the *Faculty of Graduate Studies*, p. 263. Its purpose is to provide selected and highly qualified students the opportunity to combine their medical school experience with intensive scientific training in pursuing a career as clinician-scientists. The program is designed such that students can receive a Doctor of Medicine and a Doctor of Philosophy after seven years of study. The program is built upon the regular Doctor of Medicine curriculum, but is further "customized" to meet the unique career goals of individual students based on their background, previous research experience, and their chosen medical field of expertise. Graduates of the M.D./Ph.D. program are trained as competent physicians as well as skilled scientists who can sustain a successful and competitive clinical investigative career.

In order to be eligible for admission, students must have completed a Bachelor of Science with first-class standing (or equivalent), and have fulfilled all the requirements of acceptance into the Doctor of Medicine program, as well as the doctoral requirements of the Faculty of Graduate Studies. The Medical College Admission Test (MCAT) is required, but the Graduate Records Examination (GRE) is optional.

Applications to the M.D./Ph.D. program should be submitted to the M.D./Ph.D. Program Office: Room D25, Heather Pavilion, Vancouver Hospital Campus, 2733 Heather Street, Vancouver, BC, V5Z 3J5.

The applications to the M.D. Program should be sent to the Dean's Office, Faculty of Medicine.

Potential candidates must be selected by the M.D. Admissions Selection Committee prior to being accepted to the M.D./Ph.D. program.

For further information, please contact Dr. Anthony Chow, Program Director, at 604-875-5063. See www.med.ubc.ca/mdphd for more information.

BACHELOR OF MEDICAL LABORATORY SCIENCE

Medical Laboratory Science is the study of the scientific principles underlying the disciplines practised in diagnostic and medical research laboratories (Clinical Chemistry, Cytology, Cytogenetics, Haematology, Histology, Histochemistry, Microbiology, Microscopy, Molecular Biology, Immunopathology, Toxicology).

To earn a Bachelor of Medical Laboratory Science students must complete a two-year general program. Emphasis is on data analysis and an understanding of the underlying principles of the sub-disciplines of Medical Laboratory Science. The aim is to produce a "generalist" medical laboratory scientist, an individual who can adapt to and understand the changes that are

occurring and will continue to occur in the medical laboratory.

Students are amply trained to pursue careers in teaching, administration, research and development, and industry. Students will also have fulfilled virtually all of the prerequisites for application to medical, dental or graduate school.

APPLICATION AND REGISTRATION

Enquiries should be addressed to the B.M.L.Sc. Program Assistant, Department of Pathology and Laboratory Medicine, The University of British Columbia, GF227-2211 Wesbrook Mall, Vancouver, BC, V6T 2B5; telephone 604-822-7108, fax 604-822-7635. More information is available from the Pathology website (www.pathology.ubc.ca).

ADMISSION

Application for admission to the B.M.L.Sc. program must be made through the Department of Pathology and Laboratory Medicine. Procedures, policies and admission requirements to the University of British Columbia are specified in *Admissions*, p. 13. Applicants for admission must meet the requirements of either Set A or B (not both).

Set A, RT Route

Applicants must have the following:

- 1) Completion of the RT (general) diploma of the Canadian Society of Medical Laboratory Science (CSMLS) or an equivalent diploma; plus,
- 2) Completion of CHEM 231 and 232 (Organic Chemistry, three credits each); plus,
- 3) CHEM 205 and 211 (Physical Chemistry and Analytical Chemistry, 3 credits each).

Set B, Science Route

Science undergraduates and graduates must complete the following UBC courses (or their equivalents) prior to entry to the B.M.L.Sc. program:

FIRST YEAR

- Chemistry (CHEM 121 and 123 or 111 and 113)
- Biology (BIOL 112, 121 and 140)
- English – 6 credits first-year level
- Mathematics – 6 credits first-year level
- Physics – 6 credits first-year level

Plus the following Second-year level courses:

- Cell Biology (BIOL 200)
- Biochemistry (BIOL 201)
- Physical Chemistry (CHEM 205 or 201)
- Analytical Chemistry (CHEM 211)
- Organic Chemistry (CHEM 123, 233 and 235 or 231 and 232 or 203 and 204)
- Medical Microbiology and Immunology (MICB 202)
- Arts Elective – 6 credits, any year level

Students applying for admission directly from secondary schools are not eligible for admission to the B.M.L.Sc. program. Secondary school

students should first apply through the Faculty of Science, completing the requirements in Set B, then apply to the B.M.L.Sc. program during their second year of studies.

International applicants

International applicants must meet the language requirements specified under *English Language Admission Standard*, p. 15, and must have a Grade Point Average of 3.0. Students should note that application fees and tuition fees for International students are significantly higher than those listed for domestic students.

REGISTRATION AND PROGRAM APPROVAL

The following is only a summary of the registration procedures for B.M.L.Sc. students. Complete information may be obtained from the Student Service Centre (www.students.ubc.ca/ssc) or the material mailed to the students with their Letter of Acceptance (new students) or Statement of Grades (returning students).

Students accepted into the B.M.L.Sc. program are expected to follow a strict program of study. Changes to the required program must be requested in writing to the program coordinator anytime prior to the commencement of classes or up to two weeks after the commencement of classes. Students who change their program of study without the written permission of the program coordinator shall suffer the consequences of rescheduling, timetable changes and cancelled courses which in subsequent years may result in lengthening the time to complete the program.

After two weeks of lectures, students are not permitted to change the program for which they are registered except in special circumstances and with the permission of the program coordinator.

After the close of registration, all changes in course registration must be made by students at the B.M.L.Sc. Office. Program changes must be approved by the program coordinator. These changes are processed by the B.M.L.Sc. Office. Students may not take courses for which they have not registered, and may be considered as having failed in all courses dropped without permission.

ADVISING

The B.M.L.Sc. Program Assistant is available to assist undergraduate students in their general academic planning, in interpreting faculty regulations and course requirements, and in resolving academic problems which may arise. The Program Assistant is located in Room G227-2211, Wesbrook Mall. Advising is done on a “first-come first-served” basis.

ACADEMIC REGULATIONS

Examinations

Formal written examinations are required at the end of all courses terminating in December or in April, and also in December for courses continuing all year. Some courses also hold

midterm examinations in October and February. The formal written examination may be replaced by alternative examination procedures only at the discretion of the program coordinator.

Except in cases of medical, emotional or other reasons deemed acceptable by the program coordinator, missed exams will result in a grade of zero. If you are unable to write an exam due to illness, you must inform the Program Assistant **before the exam**. A doctor's letter must be received by the program coordinator within 48 hours of the missed examination. If you are unable to write an exam for a reason other than illness, contact the Program Assistant on the day of the exam and provide a written explanation to the program coordinator within 48 hours.

Missed exams will be made up at the discretion of the program coordinator and course coordinators. Missed final exams may have to be written during the supplemental examination period.

A passing grade is 50% or higher; Second class is 65% to 79%; First class is 80% to 100%.

Supplemental Examinations

Supplementals are not a right but a **privilege** granted by the program coordinator after consideration of a student's complete academic standing. A student who has written final examinations but failed a course or courses may be granted permission to write supplementals in courses for which supplemental examinations are provided. Supplemental exams are given in late July or early August. To be eligible to write a supplemental exam, the student must have:

- 1) Passed the laboratory work, written the final examination and obtained at least 40% standing in the course in which the supplemental is granted;
- 2) In all but the final (graduating) year a candidate who has been granted a supplemental may write it only once. A student who fails a supplemental examination must repeat the course. However, in the graduating year a supplemental examination may be written twice with permission of the program coordinator.

Regular attendance is expected of students in all their classes, including lectures, laboratories, tutorials, and seminars. Students who neglect their academic work and assignments may, on the recommendation of the head of the department, be excluded by the Dean from the final examinations.

In general students who pass a course can use it as a prerequisite for a subsequent course in that subject. However, departments do have the right to bar entrance to their third-year courses to students who obtain only a minimum passing grade in their second-year prerequisite course or courses.

No failed course may be repeated more than once without special permission of the Dean. This does not apply to courses in first-year English, which may be repeated twice.

Limitation of Enrolment

Enrolment in the B.M.L.Sc. program is limited to a maximum of 24 new students each academic year.

Transfer Credit

Students may not receive transfer credit for courses completed at other institutions where those courses were used to obtain a degree. All courses submitted for transfer credit are subject to the approval of Enrolment Services.

Student Academic Performance

Fail standing in session will be assigned unless a student meets the following conditions:

- passes in all credits attempted;
- if taking more than 12 credits, passes in at least three-fifths of them and obtains an overall average of at least 60% in three-fifths of the credits taken;
- if taking 12 or fewer credits, passes in at least one-half of them.

DEGREE REQUIREMENTS

BACHELOR OF MEDICAL LABORATORY SCIENCE

Third Year

CHEM 205 and 211 ¹ (or PATH 300 ²)	7 (6)
CHEM 311	4
PATH 301	4
PATH 303	4
PATH 304	4
PATH 305	4
PATH 306	2
PATH 327	6
PATH 375	3
Total Credits	38 (37)

Fourth Year³

BIOL 300 or HCEP 400	3
PATH 402	4
PATH 404	6
PATH 405	2
PATH 406	6
PATH 407	4
PATH 408	3
PATH 415	2
Arts electives or first year English ⁴	6
Total Credits	36

¹ RT holders only.

² Science students only.

³ An optional elective, PATH 438 (2–6) is available to students in fourth year.

⁴ Whichever is required, may be completed in third year.

English Requirement

To qualify for the Bachelor of Medical Laboratory Science, students must satisfy the English requirement of the University of British Columbia. To do this students must obtain credit for two of ENGL 110, 111, 112, 120 and 121, or their equivalents if taken at another institution. ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. Satisfactory completion of the Language Proficiency Index (LPI)

Examination is prerequisite to all first-year English courses at UBC. For further information see *Language Proficiency Index Requirement for First-Year English*, p. 120.

All students admitted to the B.M.L.Sc. program must take immediate steps to satisfy the English requirement.

Arts Requirement

Students must complete 12 credits of Arts courses, consisting of 6 credits of first-year English and 6 additional credits in Arts courses.

BACHELOR OF MIDWIFERY

Director's Office
Elaine Carty, Director
Deborah Stiles, Program Administrator
B54, 2194 Health Sciences Mall
Woodward Instructional Resources Centre
Vancouver, BC V6T 1Z3
Telephone: 604-822-0771
Midwifery Website (www.midwifery.ubc.ca)

The Midwifery Program prepares students to provide primary care for women and their families through pregnancy and up to the third month after birth. Midwives, although independent practitioners, work as part of the health care team. The four-year program combines broad-based knowledge and understanding in the humanities, and the social and bio-medical sciences.

ACADEMIC ADVISING

Advising sessions are offered to students entering first year before their registration access date.

ADMISSION

All inquiries relating to admission to first year of the Midwifery Program should be addressed to Enrolment Services.

The last day of submission of applications for admission from secondary school to the Bachelor of Midwifery for the Winter Session beginning the following September is January 19, with supplementary documents (see *Other Requirements*, p. 327) to be at the Midwifery Program office by January 19.

Applicants who are not already University of British Columbia students must apply to both the Bachelor of Midwifery Program and the University. Official transcripts are to be in Enrolment Services with the University application as soon as possible after the application deadline. The final day for acceptance of transcripts is June 30.

The Midwifery Program has a limited enrolment. Since the number of qualified applicants is expected to exceed the number of places available, fulfilment of the following requirements is not a guarantee of admission. The Faculty reserves the right of selection of all students for admission to the program.

Admission to the four-year Bachelor of Midwifery will be offered to those students who not only demonstrate academic potential but also

demonstrate the qualities, potential and motivation for competencies to practise as a midwife in BC. Candidates may be invited for an interview at the discretion of the Admissions Committee.

Applicants should review the *English Language Admission Standard*, p. 15, as outlined in the "Admissions" chapter of the Calendar.

Application for admission must be made through Enrolment Services. Procedures, policies and admission requirements to the University of British Columbia are specified in *Admissions*, p. 13. Due to enrolment limitations, not every qualified applicant will be offered admission. Admission is based on a selection process which strives to enrol the most highly qualified applicants. British Columbia Secondary School graduation must include the following courses: Biology 12, English 12, Chemistry 11, Mathematics 11 and 2 additional approved examinable grade 12 courses. If an applicant has a minimum of 24 transferable post-secondary credits, these credits are used as the basis of admission.

Due to enrolment limitations, the academic standing required for admission may be higher than the above average and is subject to change each academic year. Fulfilment of the above requirement does not guarantee admission.

The University will consider granting transfer credit for all transferable post secondary courses completed. The number of credits that can be applied to the Midwifery degree will be determined by the Program in accordance with University regulations about transfer credits.

Other Requirements

Applicants for admission must submit the following additional supplemental admission requirements to the Midwifery Program by January 19:

- Two letters of reference (form provided in the application package). It is recommended that one referee be a teacher, instructor, employer or supervisor;
- A current resumé (form provided in the application package);
- A written personal statement about the applicant's reasons for requesting admission to the Midwifery Program and understanding of the profession of midwifery (format provided in the application package);
- Transcripts from all academic institutions attended, including interim transcripts if applicable;
- Supplemental application form and processing fee. A processing fee of CAD\$107.50 must accompany the supplemental application admissions forms that are returned to the Midwifery Program. This fee is non-refundable and should be made payable to the University of British Columbia, Division of Midwifery. Applications will not be processed unless the fee is received.

Incomplete applications and late applications will not be considered.

Readmission

The Faculty reserves the right to readmit students and to stipulate conditions attached to readmission. Application for readmission to the Program will be reviewed on an individual basis.

ACADEMIC REGULATIONS

The minimum passing grade in each midwifery course is 60%. In clinical midwifery courses the student is required to have successfully completed clinical practice before being allowed to write the final exam.

Although satisfactory academic performance is prerequisite to advancement, it is not the sole criterion in the consideration of the suitability of a student for promotion or graduation. The Faculty reserves the right to require a student to withdraw from the program if considered to be unsuitable to proceed with the study or practice of midwifery.

A student whose academic standing is unsatisfactory may be required either to withdraw from the program or to repeat all or part of the academic work of the year.

DEGREE REQUIREMENTS

English Requirement

To qualify for the Bachelor of Midwifery, all students must have a minimum of three credits in first-year English (completion of 16 Foundation credits in year one satisfies the English Requirement). Completion of the Language Proficiency Index (LPI) examination is prerequisite to all first-year English courses at UBC. (See *Language Proficiency Index Requirement for First Year English*, p. 120).

MIDWIFERY EDUCATION PROGRAM: CURRICULUM OVERVIEW

Year 1

BIOL 153 (Anatomy and Physiology)	7
FDNS 101 (Routes to the 21st Century)	8
FDNS 102 (Knowledge Bases)	8
FDNS 103 (Approaches to Social Understanding)	8
Midwifery mentorship program	non-credit
Total Credits	31

Year 2

MIDW 200 (Birth and its Meaning)	3
MIDW 205 (Theory and Practice)	12
MIDW 210 (Critical Appraisal)	3
MIDW 215 (Ethics Module)	1
MICB 153	3
PHAR 240	3
Electives	6
Total Credits	31

Year 3

MIDW 300 (Theory and Practice)	15
MIDW 305 (Theory and Practice)	12
MIDW 310 (Professional Issues)	3
MIDW 315 (Theory and Practice)	15
Total Credits	45

Year 4

MIDW 400 (Theory and Practice)	15
MIDW 410 (Graduating Essay) ¹	3
MIDW 405 (Clerkship) ²	12
Total Credits	30
Total Program Credits	137

¹ To be taken in Term 1, Year 4.

² To be taken in Term 2, Year 4.

Costs Other than Sessional Fee

There are additional expenses for travel and clinical practice. Students should be prepared for clinical practice outside the Vancouver area and should therefore include travel and living costs for these experiences in estimating total expenses. Information regarding these additional costs is available on the Midwifery website (www.midwifery.ubc.ca).

COLLEGE OF MIDWIVES OF BRITISH COLUMBIA

Students who successfully complete the Bachelor of Midwifery and who are recommended by the Director of the program to the College of Midwives of British Columbia will be admitted to the College Register. Information about the College of Midwives of British Columbia can be obtained from their website. See College of Midwives (www.cmbc.bc.ca). Student registration with the College of Midwives will be required.

POSTGRADUATE EDUCATION

The Faculty of Medicine is prepared to assist and advise students in applying for postgraduate education positions. The Office of the Associate Dean, Undergraduate Education, should be consulted early in the final year for information on the application process.

Placement or assignment of postgraduate positions is not a function of the Faculty of Medicine. The Canadian Resident Matching Service in Ottawa performs this service for all applicants to PGY-1 positions.

CANADIAN RESIDENT MATCHING SERVICE

All accredited postgraduate training in Canada is university integrated. Students do not apply to hospital programs but rather to university programs.

The Canadian Resident Matching Service (CaRMS) is a non-profit corporation that works in close co-operation with the Association of Canadian Medical Colleges. Since its establishment in 1970 it has matched every graduating class. CaRMS uses a computer program that quickly computes the traditional selection process for postgraduate training by matching students and programs with their highest possible choices. It guarantees the process to be fair and unbiased.

The CaRMS brochure and relevant documents for participation in the matching program are available on CaRMS website (www.carms.ca).

Further information is available from the CaRMS office, 2283 St. Laurent Blvd., Suite 110, Ottawa, Ontario, K1P 3H7.

RESIDENT EDUCATION

Specialty training at the University of British Columbia is now offered in one of two streams, namely Family Medicine or a Royal College specialty program. Recruitment is now directly from medical school to these programs. All training must be taken in institutions approved by the Royal College of Physicians and Surgeons of Canada or the College of Family Physicians of Canada. All programs are totally integrated and directed by the Faculty of Medicine. All residents are appointed by the British Columbia Interns and Residents Paying Agency and the University of British Columbia. All residents are required to register as postgraduate residents of the University in order to receive accreditation for their training. Postgraduate courses are offered by individual departments or divisions of the Faculty of Medicine in 59 medical, surgical and laboratory specialties. These courses conform to the specialty training requirements of the Royal College of Physicians and Surgeons of Canada and the College of Family Physicians of Canada and are numbered 700 or higher.

Applications for resident staff appointments should be made to the Program Director of the appropriate division or department of the University. Further information can be found on the Postgraduate Education website (www.med.ubc.ca/postgrad).

DIVISION OF CONTINUING MEDICAL EDUCATION

A Division of Continuing Medical Education has been established within the Dean's Office. Its purposes are to initiate and support programs in continuing medical education for physicians in practice, to initiate and support health sciences inter-professional programs of continuing education, to initiate and support efforts designed to define needs in continuing medical education, to initiate and support programs of evaluation in continuing medical education, to initiate and support experiments in new methods of learning in undergraduate and continuing medical education, and to improve methods of information dispersal in continuing medical education leading to improved patient care.

POSTGRADUATE (RESIDENCY) TRAINING PROGRAMS

Postgraduate courses are offered by individual departments or divisions of the Faculty of Medicine, to graduates of Canadian medical schools. These courses satisfy the specialty training requirements of the Royal College of Physicians and Surgeons of Canada and the College of Family Physicians of Canada and are approved as a prerequisite for the examinations in each specialty. All residents must register as postgraduate residents of the University.

The Royal College of Physicians and Surgeons of Canada requires a minimum of four to six

years of specialty training dependent on the individual specialty. A broad-based clinical PGY1 year is a mandatory component of many specialty programs but is not a requirement for entrance into such programs as pediatrics, internal medicine and the primary surgical specialties. The University of British Columbia is committed to community-based, integrated, Family Medicine and Royal College specialist training. Candidates must expect to perform a significant amount of their training in a rural setting. A number of local, regional and more remote smaller community hospitals have been successfully integrated into such programs as family medicine, pediatrics, psychiatry, obstetrics and gynecology, ophthalmology and general surgery. Ongoing assessments are made through each of the training years and, on satisfactory completion of the program, candidates may apply to sit the certification examination of the Royal College of Physicians and Surgeons of Canada.

Candidates are eligible to sit the certification examinations of the College of Family Physicians of Canada upon completion of the two-year Family Practice program.

Supervision of each training program is the responsibility of the University department or division concerned. Selection of candidates for each program is at the discretion of the resident training program of each department to whom application should be made.

The training programs run throughout the calendar year, commencing July 1. A variety of service rounds, conferences and seminars, small group tutorials, and divisional sessions having a bearing on patient care, but within which a teaching component is clearly defined, are offered.

ANESTHESIA

(Anesthesia is part of the Department of Anesthesiology, Pharmacology and Therapeutics). The postgraduate program in anesthesiology, which is fully approved for Fellowship in the Royal College of Physicians and Surgeons of Canada, provides rotations in Clinical Anesthesia, Internal Medicine, and Basic Science or Clinical Research.

The clinical rotations of the five-year program involve a wide experience of general anesthetic practice, including the sub-specialties of pediatric, obstetric, neuro, cardiac and thoracic anesthesia, as well as experience in acute and chronic pain services. The resident is introduced to clinical responsibility in a graded manner, with the objective of becoming a consultant in anesthesia in its broadest sense. An active academic core of Junior (second-year resident) and Senior (final two years) Tutorials, Seminars, Clinical Anesthesia and Intensive Care Unit Rounds, Clinical Workshops, and Journal Clubs are held weekly throughout the academic year. See Courses (www.students.ubc.ca/calendar/courses.cfm) for details. Clinical and academic evaluations are conducted on a day-to-day basis, as well as with formal written and oral examinations held twice annually. The year of Internal Medicine emphasizes cardiovascular, respiratory, nephrology and hematology, as

well as rotations through intensive care units (adult, pediatric, and neonatal).

The fifth and final year may involve a third year of clinical anesthesia specialty rotations, or a research and teaching fellowship in Physiology and Pharmacology, or a clinical research fellowship in Anesthesia at one of the several University-affiliated teaching hospitals.

COMMUNITY MEDICINE

Postgraduate training in Community Medicine consists of five years in an accredited community medicine training program. One year consists of basic clinical training. The second year is an academic year in the Department of Health Care and Epidemiology, where the resident becomes familiar with the sciences basic to Community Medicine, such as epidemiology, biostatistics, community health, and occupational and environmental hygiene. The resident may use this year as partial fulfillment of a Master of Health Sciences or a Master of Science. Two years consist of increasing responsibility in the areas of public health practice, clinical epidemiology, occupational health, basic research, or health planning. Research is encouraged as a component of the program. Rotations are in health units of the Ministry of Health, or in industry in BC. Rounds and seminars are held each Friday on campus. Resident attendance at the academic day is required. The final year is tailored to the resident's specific interests.

The program is part of the matching process, nevertheless applications from practitioners are encouraged.

FAMILY PRACTICE

The Family Practice Residency is a two-year program in which the resident is given progressively increasing responsibility in patient care and management. Within the Family Practice Units and in community practices, residents are involved directly with ambulatory patients to whom they relate as family physicians and provide primary care on an episodic, continuing and preventative basis under the supervision of Department of Family Practice physicians. In addition, residents receive training in various hospitals in medicine, surgery, pediatrics, obstetrics and gynaecology, emergency, psychiatry, geriatrics and musculoskeletal medicine. Formal rounds, seminars, tutorials, daily chart rounds and journal clubs round out the resident's training in areas particularly pertinent to Family Practice. Training occurs primarily at six different sites: Chilliwack, City (in Vancouver), Northern Rural, Prince George Rural, St. Paul's and Victoria. A two-year program in First Nations Health with an optional third year is also offered. An additional one-year training program of enhanced vocational skills is offered in emergency medicine, surgical skills and anesthesia and shorter training periods are offered in maternal health, psychiatry, addiction medicine and women's medicine, geriatrics and palliative care, and other areas of interest to practicing physicians.

INTERNAL MEDICINE

The training program includes ward work and case conferences on general medical and subspecialty ward services supervised by members of the Faculty. The residents are given progressive responsibility for patient care on medical wards. Investigation and management of disease in ambulatory patients is provided under the direction of faculty members in the General Internal Medicine and medical specialties.

The Department of Medicine utilizes the following facilities: the Vancouver Hospital and Health Sciences Centre (VGH site and UBC site), St. Paul's Hospital, BC Cancer Agency, G. F. Strong Rehabilitation Centre, and the Mary Pack Arthritis Centre. Several Community Care Medicine electives are offered at a variety of non-tertiary care centres throughout British Columbia.

In the Department of Medicine and its subspecialties, courses will be given as indicated in Courses (www.students.ubc.ca/calendar/courses.cfm). At present the following have training programs in addition to the courses listed: Cardiology, Critical Care Medicine, Dermatology, Endocrinology, Gastroenterology, General Internal Medicine, Geriatric Medicine, Haematology, Infectious Disease, Medical Oncology, Nephrology, Neurology, Physical Medicine and Rehabilitation Medicine, Respiratory Medicine, and Rheumatology.

The objectives of this program are to provide up to four years training in medicine for graduate physicians interested in a career in medicine in a community hospital or in an academic centre.

The core training program will consist of graduated experience in the clinical teaching units at the Vancouver Hospital and Health Sciences Centre (both sites), St. Paul's Hospital and Children's Hospital. Rotations are offered in all of the subspecialty training programs.

MEDICAL GENETICS

The Department of Medical Genetics (www.medgen.ubc.ca) offers a fully integrated five-year program leading to certification and fellowship in the Royal College of Physicians and Surgeons of Canada in the specialty of Medical Genetics. This program integrates basic and clinical genetics. Residents complete course work within the Medical Genetics graduate program (see Medical Genetics). Core clinical experience includes rotations in Pediatrics, Internal Medicine, and Obstetrics and Gynaecology. There are laboratory rotations in molecular genetics, cytogenetics, embryopathology and biochemical genetics and a scholarly research project (clinical or laboratory). Core and advanced training in clinical genetics in the Provincial Medical Genetics Program involves exposure to a wide variety of prenatal, pediatric and adult patients referred from throughout the province.

The hospitals and laboratories affiliated with the program include Children's and Women's Health Centre of British Columbia, Vancouver

General Hospital and Health Sciences Centre (12th and Oak and UBC Pavilions), St. Paul's and Royal Columbian Hospitals.

CONTACT INFORMATION

For more information on the Medical Genetics Residency Training Program (www.medgen.ubc.ca/programs/training.htm), please contact the Medical Genetics Residency Program Secretary, Cheryl Slevin, by email (cslevin@cw.bc.ca), or by phone at 604-875-3486.

MEDICAL MICROBIOLOGY

The purpose of this approved residency program is to educate physicians to a level of competence that will enable them to direct the microbiology services in any hospital or other health care facility. Emphasis is placed on the appropriate delivery of diagnostic tests, infection control and consultation services to clinical colleagues who look after patients with infection. It is a five-year program comprising a basic clinical year, two core years of medical microbiology, one year in an elective program approved by the director, and one year of approved clinical training in internal medicine or pediatrics including infectious diseases. The residency is one of five streams in the Department of Pathology and Laboratory Medicine (www.pathology.ubc.ca) and offers opportunities for interactions in the sub-disciplines and specialties within anatomic, general, and neuropathology, and in medical biochemistry. Emphasis is placed on classical microbiological diagnostic strategies and molecular technologies.

OBSTETRICS AND GYNAECOLOGY

A balanced program of academic and practical clinical experience. The academic program consists mainly of weekly specialty rounds in the areas of gynaecology, gynaecologic oncology, high-risk pregnancy and fetal monitoring. Current cases and unusual clinical problems, together with their pathophysiology and management are discussed. A weekly afternoon seminar is held in which topics are assigned and prepared by residents and attending staff. Selected papers from the current literature are presented and critically discussed by the residents and the attending staff. Clinical experience is provided under supervision in the ambulatory care clinics with graduated responsibility being provided in the performance of operating and case room procedures.

OPHTHALMOLOGY AND VISUAL SCIENCES

The Department of Ophthalmology and Visual Sciences offers practical experience in examination, investigation and management of patients in the neuro-ophthalmology, retina, cornea, glaucoma, refraction and contact lens, ophthalmoplastics, genetic and low vision clinics under supervision in addition to general ophthalmology and pediatric ocular motility clinics throughout the week. Instruction and assistance is given in the practical performance of major and minor ophthalmic surgical procedures. The management of patients with emphasis on

solving diagnostic problems and performance of medical and surgical therapy is undertaken on both an in-patient and out-patient basis with follow-up clinics.

ORTHOPAEDICS

The Department of Orthopaedics offers a fully integrated five-year program leading to Certification by, and Fellowship of, the Royal College of Surgeons of Canada in the specialty of Orthopaedics. The program includes core experience in the principles of surgery (general, plastic, intensive care, vascular and orthopaedics), as well as core and advanced training in the areas of general orthopaedics, adult reconstruction, musculoskeletal oncology, trauma, sports related and arthroscopy, hand and microvascular, and pediatric orthopaedics (including trauma). Additionally, protected time in basic research (such as biology or bioengineering) is encouraged.

The hospitals affiliated with the program include the Vancouver Hospital and Health Sciences Centre (12th and Oak and UBC Pavilions), the British Columbia's Children's, St. Paul's, Burnaby General, the Royal Columbian and Prince George Regional Hospitals.

PATHOLOGY

Approved training is available in all sub-specialties of laboratory medicine designed to fulfil the requirements of general or specialized pathology postgraduate programs. Residents will normally rotate through the major university teaching hospitals and are expected to accept increasing responsibilities as they progress. Weekly educational seminars within and between departments include active resident participation. Reviews of interesting cases are also a standard experience. Opportunities are available to gain skills and understanding on biotechnological and molecular applications in diagnoses, bioethics as pertinent to laboratory medicine, and laboratory information management and administration. Residents' progress through the training program is regularly assessed.

PEDIATRICS

Education in pediatrics is a graduated experience using in-patient, ambulatory and community resources. Clinical, technical and communication skills are emphasized throughout. Supervisory, research and consultative skills are also taught and are given greater emphasis in the later years. The pediatric resident has access both to general pediatric patients and a wide variety of sub-specialty patients providing a broad experience during training. Rounds occur daily and an Academic Half Day assures the residents freedom to attend interactive didactic sessions in basic and clinical science, clinical skills, bioethics and research methodology.

PSYCHIATRY

The Royal College of Physicians and Surgeons of Canada is responsible for setting the requirements of all medical postgraduate training in

Canada. The Psychiatry Residency Program at the University of British Columbia operates under the Royal College guidelines.

There are 40 psychiatry residency positions. The academic year runs from July 1 to June 30. The program is now a five-year program for applicants applying directly from a Canadian medical school through the Canadian Resident Matching Service, following successful completion of a four-year undergraduate program in medicine.

Clinical training takes place on hospital in-patient wards, at out-patient units, at community mental health centres and subspecialty clinics. Mandatory rotations include: general hospital in-patient/OPD, child, chronic care, emergency, consultation-liaison, geriatric and community psychiatry. There is provision for 12 months of elective time.

Research is encouraged at each level of the resident's training. One day per week is dedicated to academic seminars on the UBC campus.

The philosophy of our program is to train psychiatrists in the broad aspects of the bio-psycho-social model of medicine and psychiatry.

RADIATION ONCOLOGY (BRITISH COLUMBIA CANCER AGENCY)

PGY-1

This year encompasses several facets of clinical medicine using a standard rotating format. The purpose of this period of training is to introduce and expose the trainee to independent responsibility for decisions involving clinical judgment skills, the further development of an effective and mature physician patient relationship, and the achievement of competence in primary technical skills across a broad range of medical practice. This is essentially a rotating internship and would precede subsequent specific training in radiation oncology.

PGY-2 to 5

One year, which includes six months of approved resident training in internal medicine and three months of training in Medical Oncology. During the training in Radiation Oncology, an additional six months may be approved by the Program Director for training in clinical, basic science or research training relevant to the objectives of the specialty, and acceptable to the Director of the Residency program and to the Royal College.

Three years of radiation oncology (36 months): BC Cancer Agency, Vancouver Clinic, and one to two months mandatory rotations in one of other 3 centers in Cancer Centers in BC (Surrey (two months), Kelowna (one month) or Victoria (one month)).

- site-specific rotations (eight weeks long: head and neck, gynecological oncology, lymphoma, breast, etc.)
- weekly academic half day: didactic instruction in radiobiology, pathology, physics, radiology, principles and practice of

oncology and radiation oncology treatment planning

- annual formal practice radiotherapy planning examinations
- support for annual attendance at North-western Radiobiology Course (Seattle, Edmonton, Vancouver)
- presentation at national and international meetings encouraged
- mid-rotation feedback sessions and end of rotation oral assessments
- fall and spring exams for senior residents

Core Academic Activities Clinical Oncology

- ACU
- Bedside and individual tutorials Treatment Planning occur both in the context of:
- Individual rotations
- Treatment planning drills Radiobiology
- introductory didactic lecture series
- tutorials
- seminar series Physics
- weekly tutorials for PGY-2 and PGY-3
- seminars/problem-based series Pathology
- case-based teaching with clinical and pathological input Radiology
- introduction to normal and abnormal radiological anatomy Other Programs
- Facilitate General Surgery, Respiriology, Otolaryngology, Medical Oncology, Pediatric/Hematology/Oncology/OBGyn and other programs.

Research

Residents are encouraged to do their research throughout their Residency Training Program. Every year we have a Residents' Day Award, where all the residents present their annual research projects. Every second year, there is a grant writing competition (Peter Poon Award). Residents are encouraged to present their research projects at national and international meetings. Residents in good academic standing, with Program Director approval, may seek Radiation Oncology electives in other centres in Canada, the US or overseas. A six month block in research is available as well, and is again at the discretion of the Program Director. The BC Cancer Research Centre and the Genome Sequence Centre have tight collaboration with the Radiation Oncology Department and the entire BC Cancer Agency. Research activities are encouraged and supported by the Program Director, Department Head and Radiation Oncology staff.

RADIOLOGY

The postgraduate program in Radiology is a five-year program fully approved for certification and fellowship in the Royal College of Physicians and Surgeons of Canada. The second year provides core training in physics, chest radiology, gastrointestinal radiology, genitourinary radiology, musculoskeletal radiology, neuroradiology, computed tomography and ultrasound. During the third year the resident consolidates skills in film interpretation

and the basic procedures by functioning as a general radiologist under appropriate supervision. A three-month block of pediatric radiology is also included. During the third and fourth years, rotations are provided in nuclear medicine, angiography, oncologic radiology, mammography and magnetic resonance imaging. Assuming that the Royal College requirements are satisfied, the last two years provide opportunities for the resident to develop special expertise in any of the subspecialty areas or to develop a research project. Residents are on-call to read emergency films and perform emergency imaging studies.

The academic program consists of daily rounds, weekly Grand Rounds and resident seminars during the academic year, a two-year rotating series of core seminars, and a series of five or six lectures by internationally known visiting professors. Residents in their second and fourth years are expected to complete a research project, and residents in their third year are expected to present a Grand Round. Residents also participate in the annual international radiology conference at Whistler, BC. Extensive teaching in non-interpretive skills, including physics, ethics, biostatistics, study design and quality assurance is also offered. All residents attend the six-week Armed Forces Institute of Pathology (AFIP) course in Washington, DC, at the department's expense.

SURGERY

The Department of Surgery postgraduate program for resident training has approved specialty programs in cardiac surgery, emergency medicine, general surgery, neurosurgery, otorhinolaryngology, plastic surgery, pediatric general surgery, radiation oncology, thoracic surgery, urology, and vascular surgery. PGY1 positions are available in emergency medicine, general surgery, neurosurgery, otorhinolaryngology, plastic surgery, and urology. Advanced placement positions are filled following completion of general surgical training in pediatric general surgery, thoracic surgery, and vascular surgery. Entry into all PGY-1 positions is governed by the Canadian Resident Matching Service (CaRMS) Program. Detailed descriptions for PGY-1 positions are available on the CaRMS website (www.carms.ca).

A list of the program directors for each of the specialties follows: Dr. S. Karim, Cardiac Surgery; Dr. B. Chung, Emergency Medicine; Dr. E. M. Webber, General Surgery; Dr. G.J. Redekop, Neurosurgery; Dr. P. Moxham, Otorhinolaryngology; Dr. P. Lennox, Plastic Surgery; Dr. G. Blair, Pediatric General Surgery; Dr. M. Keyes, Radiation Oncology; Dr. K. G. Evans, Thoracic Surgery; Dr. A MacNeily, Urology; and Dr. J. Chen, Vascular Surgery.

Further information on surgical programs in the affiliated hospitals (Vancouver Hospital and Health Sciences Centre, St. Paul's Hospital, Royal Columbian Hospital, and BC Children's Hospital) is available on the Department of Surgery website (www.surgery.ubc.ca) and on

the Postgraduate Education website (www.med.ubc.ca/postgrad/).

Entry into specialty training into each of these programs is via a two-year core surgery program which is under the direction of Dr. E. M. Webber, Director, Postgraduate Education, Department of Surgery. The core program in Surgery incorporates clinical rotations as mandated by the Royal College of Physicians and Surgeons of Canada (RCPSC) training requirements in each entry-level discipline together with didactic sessions on a weekly basis covering the Principles of Surgery curriculum and leading to eligibility for the Principles of Surgery examination of the RCPSC.

LICENCE TO PRACTICE MEDICINE

The possession of the Doctor of Medicine does not, in itself, confer the right to practice medicine in any province in Canada. Each province has a college of physicians and surgeons, as mentioned previously, and these colleges have the final authority to grant a licence to practice medicine within their jurisdictions. The possession of the Licentiate of the Medical Council of Canada (www.mcc.ca) (L.M.C.C.) is one of the major requirements of the provincial colleges of physicians and surgeons for registration.

To be eligible for licensure in BC, graduates will be required to have completed at least two years of postgraduate training with at least eight weeks in each of Medicine, Surgery, Obstetrics and Gynaecology, Pediatrics, and four weeks in each of Emergency and Family Medicine and Psychiatry, in addition to being a Licentiate of the Medical Council of Canada.

Applicants with Certification by the College of Family Physicians of Canada or the Royal College of Physicians and Surgeons of Canada and being Licentiates of the Medical Council of Canada will also qualify for licences to practice.

MEDICAL COUNCIL OF CANADA QUALIFYING EXAMINATION

Application forms and information kits regarding the examination are available online at www.mcc.ca or through the Dean's Office at the Vancouver Hospital and Health Sciences Centre.

Information on licensing to practice medicine in Canada must be obtained by the appropriate licensing body in the province where the student is intending to practice. In BC please refer to the College of Physicians and Surgeons of BC (www.cpsbc.ca).

ACADEMIC STAFF

DIVISION OF CONTINUING MEDICAL EDUCATION

Kendall Ho, Associate Dean and Director.

Division of History of Medicine

PROFESSOR EMERITUS AND LECTURER
John M. Norris, B.A., M.A. (Br.Col.), Ph.D. (Northwestern).

HONORARY LECTURERS

Charles E. Slonecker, D.D.S., Ph.D. (Wash.); Robert Todd, B.A. (Lond.), A.M., Ph.D. (Prin.).

DEPARTMENT OF ANESTHESIA

C.B. Warriner, Head

Honorary Professors

N. Donen, M.B.Ch.B. (Cape T.), FRCP; P.G. Duncan, M.D. (Manit.), FRCP; J.A. Pacey, M.D. (Br.Col.), FRCS; D.J. Stewart, M.B.B.S. (Lond.), FRCP.

Professor

C.B. Warriner, M.D. (Br.Col.), FRCP.

Associate Professor

B.A. MacLeod, B.Sc., M.D. (Br.Col.), FRCP.

Assistant Professors

J.M. Ansermino, M.B.B.Ch. (Johannesburg), F.F.A. (S. Africa), M.Med. (Anesth.), M.M.Inf. (Lond.), FRCP; P.T.L. Choi, B.Sc., M.D. (Br.Col.), M.Sc. (McM.), FRCP; C.R. Ries, M.D. (W.Ont.), Ph.D. (Br.Col.), FRCP; S.K. W. Schwarz, M.D., Dr. med (Gottingen), Ph.D. (Br.Col.), FRCP.

Clinical Professors

D.M. Ansley, M.D. (Sask.), FRCP; D. Blackstock, M.B.Ch.B., B.A.O. (Belf.), FRCP; C.P. Cole, B.Sc., M.D. (Br.Col.), FRCP; M.J. Douglas, M.D. (Sask.), FRCP; A. Enright, M.D., FRCP; E.A. Gofton, B.A., M.B.Ch.B., B.A.O. (Dub.), FRCP; R.P. Grant, B.Sc., M.D. (Br.Col.), FRCP; J.A. Harper, M.D. (Br.Col.), FRCP; A.P. Kliffer, M.D. (Br.Col.), FRCP; R.N. Merchant, M.D. (Br.Col.), FRCP; J.P. O'Connor, B.Sc. (New Br.), M.D. (Dal.), FRCP; D.G. Parsons, M.D. (Br.Col.), FRCP; H. Vaghadia, B.Sc.M.B., B.S. (Lond.), FRCP; S.A. White, M.B.Ch.B. (Belf.), FRCP; D.H.W. Wong, M.B.B.S. (H.K.), FRCP.

Clinical Associate Professors

S.B.C. Baker, M.B.Ch.B. (N.Z.), FRCP; J.L. Berezowskyj, B.Sc., M.D., C.M. (McG.), FRCP; J.P. Blachut, B.Sc., M.D. (Tor.), FRCP; A.J. Boulton, M.B.Ch.B. (Manc.), FRCP; J.B. Bowering, B.Sc., M.D. (Br.Col.), FRCP; I.A. Brodtkin, M.D. (W.Ont.), FRCP; P.A. Burgi, M.B.Ch. (Witw.), FRCP; J.F. Dolman, B.Sc., M.D. (Br.Col.), FRCP; S.M. Ferreira, B.Sc., M.B.B.S. (Lond.), FFA.RCS (Lond.), FRCP; N.R. Froese, M.D. (Manit.), FRCP; C.L. Henderson, M.D. (W.Ont.), FRCP; A.A.S. Kamani, M.D. (Manit.), FRCP; P.C. Kapnoudhis, M.B.Ch.B. (Cape T.), FRCP; R. Klein, M.B.Ch.B. (S.Africa), FRCP; R.J. Lee, LRCP, MRCS, FRCP; D.N. Malm, M.D. (Br.Col.), FRCP; I.L. Martin, B.Sc. (Dal.), M.D. (Nfld.), FRCP; K.V. Mayson, B.Sc., M.D. (Br.Col.), FRCP; W.N. Adjunct Professor

M. Huzmezan, Ph.D., P.Eng.

Jean Templeton Hugill Chair

B.A. MacLeod, B.Sc., M.D. (Br.Col.), FRCP; Centre for Analgesia and Anesthesia, Pharmacology and Therapeutics.

Associate Members

J. Church, B.Sc., M.B., Ch.B. (Brist.), Ph.D. (Lond.), FRCA, Cellular & Physiological Sciences; E. Eich, B.A. (Maryland), Ph.D. (Tor.), Psychology; D.V. Godin, B.Sc., Ph.D. (Ott.), Pharmacology and Therapeutics; M. Lepawsky, B.A. (Lawrence), M.D. (Chic.), C.C.F.P., Family Practice; J.A. McEwen, B.A.Sc., Ph.D. (Br.Col.), P.Eng., Electrical and Computer Engineering; B.C. McGillivray, B.Sc. (Br.Col.), M.D. (Alta.), FRCP, F.C.C.M.G., Medical Genetics; J.G. McLarnon, B.Sc., M.Sc. (Alta.), Ph.D. (Br.Col.), Pharmacology and Therapeutics; E.A. Puil, B.Sc. (Br.Col.), M.Sc., Ph.D. (Alta.), Pharmacology and Therapeutics; J. Y. Tsang, B.Sc. (McG.), M.D. (Tor.), FRCP, Medicine; M. J. A. Walker, B.Sc., Ph.D. (Lond.), Pharmacology and Therapeutics.

DEPARTMENT OF BIOCHEMISTRY AND MOLECULAR BIOLOGY

Christopher Proud, Head

Professors

Gary D. Brayer, B.Sc., Ph.D. (Alta.); Roger W. Brownsey, B.Sc., Ph.D. (Bath); Pieter R. Cullis, B.Sc., M.Sc., Ph.D. (Br.Col.); Shouka T. Dedhar, B.Sc. (Aber.), Ph.D. (Br.Col.); Brett B. Finlay, B.Sc., Ph.D. (Alta.); Ross T.A. MacGillivray, B.Sc. (Leeds), Ph.D. (Miami); George A. Mackie, B.Sc. (Tor.), Ph.D. (C'nell.); A. Grant Mauk, B.A. (Lawrence), M.D., Ph.D. (Med. Coll. of Wisconsin); Lawrence P. McIntosh, B.Sc. (Calg.), Ph.D. (Oregon); Robert S. Molday, B.S. (Penn.), M.S. (Georgetown), Ph.D. (Penn.); Michel Roberge, B.Sc., M.Sc. (Sher.), Dr. rer. Nat. (Heidelberg); Ivan J. Sadowski, B.Sc. (Sask.), M.Sc. (Manit.), Ph.D. (Tor.).

Associate Professors

Franck Duong, B.Sc. (France), Ph.D. (France); Natalie C.J. Strynadka, B.Sc., Ph.D. (Alta.).

Assistant Professors

Leonard Foster, M.Sc. (S.Fraser), Ph.D. (Tor.); LeAnn Howe, B.Sc. (Vic.B.C.), Ph.D. (Vic.B.C.); Eric Jan, B.Sc. (Qu.), Ph.D. (N.W.Chic.); Masayuki Numata, M.D. (Niigata, Japan), Ph.D. (Tohoku, Japan); Philippe Roux, B.Sc. (Montr.), M.Sc. (Montr.), Ph.D. (McG.).

Senior Instructors

Richard Barton, B.Sc., Ph.D. (Br.Col.); Bruce E. Tiberis, B.A. (Arkansas), Ph.D. (Br.Col.); Everard Trip, B.Sc. (N'cle.), Ph.D. (Alta.).

Instructor

Robert Maurus, B.Sc. (Guelph), Ph.D. (Br.Col.); Arina Omer, B.Sc. (Romania), M.Sc. (France), Ph.D. (Br.Col.); Warren Williams, B.Sc. (Cariboo), Ph.D. (Br.Col.).

Associate Members

Dieter Bromme, Oral Biological and Medical Sciences, Dentistry; Elizabeth Conibear, CMMT & Medical Genetics; Dana V. Devine, Pathology and Laboratory Medicine; Lindsay Eltis, Microbiology; Philip Hieter, Biotechnology Laboratory and Medical Genetics, Director; Victor Ling, BC Cancer Agency; Vivien Measday, Land & Food Systems; Alice Mui, Surgery; Michael Murphy, Microbiology; Christopher M. Overall, Dentistry; Stephen G. Withers, Chemistry.

Research Associates

Hilary J. Anderson, B.Sc. (Sus.), Ph.D. (Leic.); Anjuman Begum, Ph.D. (Syd.); Maria Buxade, Ph.D. (Barcelona); Jerzy E. Kulpa, M.Sc., Ph.D. (Wroclaw); Gregory Lee, B.Sc. (Calif.), Ph.D. (Washington); Chunmin Li, B.Sc. (Sichuan), M.Sc. (Sichuan), Ph.D. (Osaka); Barry Liboiron, B.Sc. (Guelph), Ph.D. (Br.Col.); Margarita Malakhova, B.Sc., Ph.D. (Moscow); Marcia Mauk, A.B. (Ripon), Ph.D. (Med. Coll. of Wisc.); Norbert Maurer, M.Sc., Ph.D. (Graz); Gunnar Olovsson, M.Sc., Ph.D. (Uppsala); Xuemin Wang, Ph.D. (Brist.); Yanni Wang, Ph.D. (Sun Yat-sen); Kim Wong, B.Sc., M.Sc. (Malaya), Ph.D. (Br.Col.).

DEPARTMENT OF CELLULAR AND PHYSIOLOGICAL SCIENCES

Christian C.G. Naus, Head

Professors

Kenneth G. Baimbridge, B.Sc., Ph.D. (S'ton.); Bernard H. Bressler, B.Sc. (Sir Geo. Williams), M.Sc., Ph.D. (Manit.); Alison M. J. Buchan, B.Sc. (Aberd.), M.Sc., Ph.D. (Lond.); John Church, B.Sc., M.B., Ch.B. (Brist.), Ph.D. (Lond.), FRCA; Joanne T. Emerman,

B.A. (Hofstra), M.A., Ph.D. (Calif., Berkeley); David Fedida, M.B., B.Sc., Ph.D. (Leeds), B.M., B.Ch. (Oxf.); Christopher H. C. McIntosh, B.Sc., Ph.D. (Lond.), Assistant Head; Ivan Robert Nabi, B.Sc. (McG.), Ph.D. (Weizmann Inst. Science); Christian C.G. Naus, B.Sc. (Qu.), M.Sc. Ph.D. (W.Ont.); William K. Ovalle Jr., B.S. (St. Joseph's), Ph.D. (Temple); James Anthony Pearson, B.Sc. (Durh.), Ph.D. (N'cle., U.K.); A. Wayne Vogl, B.Sc., Ph.D. (Br.Col.); Joanne Weinberg, A.B. (Brown), Ph.D. (Stan.).

Affiliate Professor

Bruce J. Crawford, B.Sc. (Vic.B.C.), M.D. (Br.Col.), Ph.D. (Wash.).

Associate Professors

Eric A. Accili, B.Sc., M.Sc., Ph.D. (Br.Col.); Carol-Ann M. Courneya, B.Sc. (Guelph), M.Sc. (W.Ont.), Ph.D. (Br.Col.); Norman W. Kasting, B.Sc. (Yale), Ph.D. (Calg.); Steven J. Kehl, B.Sc., M.Sc. (Ont.), Ph.D. (Br.Col.); Timothy J. Kieffer, B.Sc., Ph.D. (Br.Col.); Yin Nam Kwok, B.Sc. (Drake), Ph.D. (McG.); David A. Mathers, B.Sc. (Edin.), Ph.D. (Nott.); Edwin D. W. Moore, B.Sc., M.Sc. (Tor.), Ph.D. (Minn.); Timothy O'Connor, B.Sc., Ph.D. (Tor.); Calvin D. Roskelley, B.Sc. (Vic.B.C.), Ph.D. (Br.Col.); T. Michael Underhill, B.Sc., Ph.D. (W.Ont.).

Affiliate Associate Professors

Richard A. Lazenby, B.Sc., M.A. (S.Fraser), Ph.D. (McM.).

Assistant Professors

Douglas Allan, B.Sc. (Hon.), M.Sc. (Aberd.), Ph.D. (Alta.); Shernaz X. Bamji, B.Sc., M.Sc. (Tor.), Ph.D. (McG.); Kurt Haas, B.Sc. (Cornell), Ph.D. (Albert Einstein Coll. of Med.); James D. Johnson, B.Sc., Ph.D. (Alta.); Christopher Loewen, B.Sc., Ph.D. (Br.Col.); Hakima Moukhes, B.Sc. (Morocco), Ph.D. (Universite d'Aix, MarseilleII); Victor Viau, B.Sc. (Concordia), M.Sc., Ph.D. (McG.).

Clinical Assistant Professor

Harvey I. Halperin, B.Sc., M.D. (McG.).

Affiliate Assistant Professors

Catherine Gaul, B.Ed. (New Br), M.Sc. (S.Fraser), Ph.D. (Vic.B.C.); Kuo-Hsing Kuo, M.D., M.Sc. (Taiwan), Ph.D. (Br.Col.); Geoffrey W. Payne, B.Sc., M.Sc., Ph.D. (Mem., Nfld).

Instructors

Majid Doroudi, B.Sc., M.Sc., Ph.D. (Tehran); Pawel M. Kindler, B.Sc., Ph.D., (Ill.); Claudia Krebs, M.D., Ph.D. (Cologne, Germany); Barry Mason, B.Sc., Ph.D. (S.Fraser); Salma Osborne, B.Sc., M.Sc., Ph.D. (Br.Col.); Karen Pinder, B.Sc. (Guelph), Ph.D. (Cape T.).

Associate Members

Eugene C. Cameron, Medicine; Kevan Jacobson, Pediatrics; Joanne A. Matsubara, Ophthalmology; Tim Murphy, Psychiatry; Conrad Park, Pathology and Laboratory Medicine; Colin Price, Oral Medical and Surgical Sciences; Catherine Rankin, Psychology; Lynn Raymond, Psychiatry; Joy Richman, Oral Health Sciences; Chun Y. Seow, Pathology and Laboratory Medicine; Christopher Shaw, Ophthalmology; John D. Steeves, Zoology; David Sweet, Oral Medical and Surgical Sciences; Bruce Verchere, Pathology and Laboratory Medicine; Yu Tian Wang, Department of Medicine, Brain Research Centre.

Honorary Members

Alan G. Hannam, B.D.S. (Adel.), Ph.D. (Brist.), F.D.S., R.C.S. (Engl.), F.A.C.D.S., Honorary Lecturer; Sun Shik Shim, M.D. (Yonsei), M.Sc., Ph.D. (Br.Col.), Honorary Assistant Professor.

Lecturer

Majid Alimohammadi, B.Sc., M.Sc., Ph.D. (Tehran).

DEPARTMENT OF FAMILY PRACTICE

Robert F. Woollard, Head

Professors

Heather McKay, B.Sc. (S.Fraser), M.P.E. (Br.Col.), Ph.D. (Sask.); Donald C. McKenzie, B.Sc. (Guelph), M.D., M.P.E. (Br.Col.), Ph.D. (Ohio); Jack E. Taunton, M.Sc. (S.Fraser), M.D. (Br.Col.), F.A.C.S.M.; Robert F. Woollard, M.D. (Alta.), C.C.F.P., F.C.F.P.

Associate Professors

Kenneth L. Bassett, M.D. (Br.Col.), M.A., Ph.D. (McG.); Joanna Bates, B.Sc., M.D., C.M. (McG.), C.C.F.P.; Betty Calam, M.D. (Br.Col.), C.C.F.P., M.C.I.Sc. F.C.F.P.; Stefan C. W. Grzybowski, M.D. (Br.Col.), M.C.I.Sc. (W.Ont.), C.C.F.P.; David Kuhl, B.A. (Winn.), M.D. (McM.), M.H.Sc. (Tor.), Ph.D. (Br.Col.); Verity H. Livingstone, M.B., B.S. (Lond.), C.C.F.P.; Carl B. Whiteside, B.Sc., M.D. (Alta.), M.C.I.Sc. (W.Ont.), C.C.F.P.

Assistant Professors

Martha Donnelly, B.Sc., M.D. (W.Ont.), C.C.F.P., F.R.C.P.; Garry D. Grams, B.A., M.S.W. (Br.Col.), Ph.D. (Tor.); G.P. Human, M.B., Ch.B. (Stell.), A.C.L.S., L.M.C.C.; Eileen K. McNally Hutton, B.N.Sc. (Qu.), M.Sc.N., Ph.D. (Tor.); Karim Khan, B.Med.Sc., MBBS, Ph.D. (Melb.), FACSP; Christie Newton, B.Sc. (Qu.), M.D. (Qu.), L.M.C.C., C.C.F.P.; Roy J. Oakey, M.B., Ch.B. (Birm.); Ian Scott, B.Sc. (S.Fraser), M.Sc., M.D. (McM.), DOHS, C.C.F.P., FRCTC.

Instructors

Kim Campbell, B.Sc.N. (Alta.), R.M. (Alta.).

Clinical Professors

Ronald T. Abrahams, B.Sc. (McG.), M.D. (Qu.), C.C.F.P.; Robert A. Bluman, B.Sc., M.D. (Br.Col.), C.C.F.P.; Gordon Dickson, B.Sc., M.D. (Br.Col.); Duncan J. Etches, B.Sc., M.D. (Br.Col.), C.C.F.P.; Jeremy Etherington, B.A.Sc. (Leth.), M.D. (Calg.), C.C.F.P. (E.M.); Romayne Gallagher, B.Sc., M.D. (Br.Col.); Gary Gibson, M.D., C.C.F.P., F.C.F.P.; Susan Harris, M.D. (McM.), C.C.F.P.; Bent Hougesen, M.D., M.Sc. (Tor.), M.P.H., (Tulane), F.R.C.P.C., C.C.F.P.; Peter Kirk, M.D. (Scot.), C.C.F.P.; Eva Knell, B.Sc., M.D. (Br.Col.), C.C.F.P.; Donald R. Lloyd-Smith, B.A. (Qu.), M.D., C.M. (McG.); Peter J. Newbery, B.A. (Tor.), M.D. (McM.), C.C.F.P.; John P. Sloan, B.A., B.Sc., M.Sc., M.D. (Br.Col.), C.C.F.P.; Dale Stogryn, M.D. (Alta.), L.M.C.C., C.C.F.P.; Ellen R. Wiebe, M.D. (Br.Col.); J. Galt Wilson, M.D. (Br.Col.), C.C.F.P.; James Wilson, B.Sc., M.D. (Br.Col.), C.C.F.P.

Clinical Associate Professors

Granger R. Avery, M.B., B.S. (Lond.); Tom Bailey, B.Sc., M.D., (Br.Col.), C.C.F.P.; Hector Baillie, B.Sc. (Hon.), M.Sc., M.B., Ch.B. (Glas.); Niloofar Baria, B.Sc., M.D. (Br.Col.), C.C.F.P.; Daniel Beegan, B.Sc., M.D. (Br.Col.), C.C.F.P.; Dara Behrooz, MBBS (Lond.), C.C.F.P.; Jonathan Berkowitz, B.Sc., M.Sc. (Alta.), Ph.D. (Tor.); Peter W. Boronowski, B.Sc., M.D. (Br.Col.), C.C.F.P.; Howard Bright, B.Ed. (S.Fraser), M.D. (Br.Col.), C.C.F.P.; David R. Brook, M.D. (Sask.), C.C.F.P.; D. Alister Browne, B.A., M.A., Ph.D. (Br.Col.); Karen Buhler, B.Sc., M.D. (Br.Col.), C.C.F.P.; Alexander Burak, B.Sc., M.D. (Br.Col.), C.C.F.P.; Claire Cameron, B.Sc., M.D. (Br.Col.); Alfred T. Chan, B.Sc., M.D. (Br.Col.), C.C.F.P.; Trevor Corneil, B.A., M.D. (Qu.), C.C.F.P.; Richard Crow, M.Sc., M.D. (Br.Col.), C.C.F.P.; Alice M. Cumming, B.Sc., M.D. (W.Ont.), C.C.F.P.; George L. Deagle,

M.D., M.Cl.Sc. (W.Ont.), C.C.F.P., F.C.F.P.; Bernhard K. Dobovcnik, B.Sc., M.D. (Br.Col.), C.C.F.P.; Marjorie A. Docherty, M.B.Ch.B. (Aberd.); Mary J. Donlevy, B.S.N. (Alta.), M.D. (Calg.), C.C.F.P.; Helen S. Dougan, B.Sc., M.D. (Br.Col.), C.C.F.P.; G. Michael Downing, M.D. (W.Ont.); John Edworthy, B.Sc., M.D. (Br.Col.), C.C.F.P.; Jonathan P. H. Fine, M.B., B.S. (Lond.); Joseph Finkler, B.Sc., M.Sc., M.D., C.C.F.P. (EM); Michael Fitzmaurice, M.D. (Ott.), C.C.F.P.; Bradley Fritz, B.Sc., M.D. (Br.Col.), C.C.F.P.; Monte M. H. Glanzberg, B.Sc., M.D. (Br.Col.), C.C.F.P.; Peter Granger, M.D. (Tor.); Ian D. Gummeson, B.Sc. (Br.Col.), M.D. (Calg.), C.C.F.P.; Darlene Hammell, B.Sc., M.D. (Tor.); J. Kent Harris, B.Sc., M.D. (Alta.); Keith R. Hatlelid, B.Sc. (Calg.), M.D. (Br.Col.), C.C.F.P. (C); John R. Havens, M.D. (W.Ont.), C.C.F.P.; Sylvia L. Henderson, B.Sc. (Vic.B.C.), M.D. (Br.Col.), C.C.F.P.; Allen B. Hignell, M.D. (Br.Col.), C.C.F.P.; Kirk G. Hollohan, B.M.Sc., M.D. (Nfld.), C.C.F.P.; Frank Hou, B.Sc., Ph.D., M.D. (Br.Col.); William Irvine, M.D. (Br.Col.), C.C.F.P.; Joanne Irwin, B.Sc., M.Sc., M.D. (Qu.), C.C.F.P.; David V. Kason, B.Sc., M.D. (Br.Col.), C.C.F.P.; Jill Kernahan, M.D. (Manit.), C.C.F.P.; Colleen Kirkham, M.D. (Qu.); Gary Knoll, M.D. (Sask.); Peter Lake, M.D. (Calg.), C.C.F.P.; Eugene Leduc, M.D. (Br.Col.), C.C.F.P.; Neil G. Leslie, B.M.Sc., M.D. (Alta.), C.C.F.P.; Nirvair K. Levitt, B.Sc., M.B., Ch.B. (Zambia), C.C.F.P.; Bin K. Lim, B.Sc., M.D., C.M. (McG.), C.C.F.P.; Rhonda S. Low, B.Sc., M.D. (Br.Col.), C.C.F.P.; Donald C. MacDonald, B.Sc., M.D. (Tor.); Arthur J. Macgregor, M.D. (Br.Col.), C.C.F.P.; David W. MacKenzie, B.Sc. (Dal.), M.D. (Nfld.), C.C.F.P.; John W. Mackie, B.Sc., M.Sc. (Mich.), M.D. (Br.Col.), C.C.F.P.; Michael F. Madsen, M.B., B.S. (Lond.), C.C.F.P.; Walter J. Mail, M.D. (Tor.), C.C.F.P.; Michael Makin, M.B., Ch.B. (Cape T.); Rosemary Malleson, M.B., B.S. (Lond.); A. E. Manji, M.B., Ch.B. (Sheff.), C.C.F.P.; Ranbir Mann, B.Sc., M.D. (Manit.); Julian J. Marsden, B.Sc., M.D. (Qu.), C.C.F.P. (Em); Ruth Martin, M.D. (Br.Col.), C.C.F.P.; Garey Mazowita, M.D. (Manit.), C.C.F.P.; Gerald P. McFetridge, B.Sc., M.D. (Br.Col.), P.d.p. (S.Fraser), C.C.F.P.; Raymond McLwain, M.D. (Qu.), C.C.F.P.; Veronica McKinney, M.D. (Sask.), C.C.F.P.; Adi K. M. Mudaliar, M.D. (Br.Col.), C.C.F.P.; Philip A. Muir, M.D. (Br.Col.), C.C.F.P.; Warren D. Murschell, B.M.Sc., M.D. (Alta.), C.C.F.P. (E); Wendy Norman, M.D. (Qu.), C.C.F.P.; Barra F. O'Briain, B.Sc., M.D., C.M. (McG.), C.C.F.P.; Jeffrey L. Pooock, M.R.C.G.P., D.R.C.O.G. (Lond.), C.C.F.P.; Michael Puttick, B.Sc. (Ott.), M.D. (Tor.); Dietmar E. Raudzus, B.Sc., M.D. (Br.Col.), C.C.F.P.; Marianne Rev, B.A. (Tor.), M.D. (McM.), C.C.F.P.; Joan Robillard, M.D. (Manit.), C.C.F.P.; Peter A. Robson, M.B., B.S. (Lond.); Leonard W. Roy, M.D. (Sask.), C.C.F.P.; Kenneth Ryan, B.Sc. (Qu.), M.A.Sc., Ph.D. (Tor.), M.D. (Br.Col.), C.C.F.P.; Sharon Salloum, C.C.F.P.; Philip M. Sestak, B.A., M.D. (Sask.), C.C.F.P.; Stephen Shore, B.Sc. (Guelph), B.Med.Sc., M.D. (Nfld.), C.C.F.P.; Douglas K. Still, M.D.; James D. Stockhill, B.A. (Br.Col.), M.D. (McM.), C.C.F.P.; Thomas Suleiman, B.Sc. (Wurzburg), M.D. (Germany), C.C.F.P.; Thomas Teranishi, B.A., M.S.W. (Br.Col.); Harvey V. Thommasen, B.Sc. (McG.), M.Sc., M.D. (Br.Col.), C.C.F.P.; V. James Thorsteinson, B.Sc. (McG.), B.Sc. (Med.), M.D. (Manit.), C.C.F.P.; Gerrard Vaughan, M.D. (Br.Col.); Paul Walker, B.Sc. (McM.), M.D. (W.Ont.), C.C.F.P. (C); John H. Walton, M.D. (Br.Col.), C.C.F.P.; Karen Wanger, M.D.C.M. (McG.); Ronald Warneboldt, B.Sc., M.D. (Br.Col.), C.C.F.P.; James M. Warren, B.Sc. (Br.Col.), B.A., M.A., M.B., B.Chir. (Cantab.), C.C.F.P.; Christine Whittington, M.B., B.S., (Q'ld.), M.B.A., (Calg.), C.C.F.P.; Brian C. Willoughby, M.D. (W.Ont.), C.C.F.P.; Ronald A. Wilson, B.Sc., M.D. (Br.Col.), C.C.F.P.; Sandra Witherspoon, M.D. (W.Ont.), C.C.F.P.; Paul C. Wong, B.Sc., M.D., C.M. (McG.), C.C.F.P.; Thomas Wong, B.Sc., M.D. (Br.Col.), C.C.F.P.

Clinical Assistant Professors

Evan Adams, M.D., (Calg.); John M. Adams, M.B., Ch.B., M.R.C.P., (U.K.), D.L.O., D.C.H., C.C.F.P. (Canada); Stephen Adilman, B.Sc. (Guelph), M.D. (Br.Col.); Alistair J. Anderson, B.Sc., M.D. (Calg.), C.C.F.P.; Nancy J. Anderson, B.Sc. (McM.), M.D. (Calg.), C.C.F.P.; Carrie A. Armstrong, M.D. (Br.Col.), C.C.F.P., F.C.F.P.; Kathryn J. Atkinson, B.Sc. (S.Fraser), M.D. (Br.Col.), C.C.F.P.; Grant R. Ayling, B.Sc. (Vic., Well.), M.B., C.L.B. (Otago); Richard D. H. Backus, B.Sc., M.D. (Alta.); Richard D. H. Backus, B.Sc., M.D. (Alta.); Ray P. Baker, B.Sc., M.D. (W.Ont.), C.C.F.P., A.S.A.M.; Leon Bard, M.D. (Br.Col.), C.C.F.P.; Sally Barrio, B.Sc. (S.Fraser), M.D. (Br.Col.); Stephen R. Barron, B.Med.Sc., M.D. (Nfld.), C.C.F.P.; Doris Barwich, M.D. (Manit.), C.C.F.P., L.M.C.C.; Lynn Beck, B.Sc., M.D. (Manit.), C.C.F.P.; Erin B. Becker, M.D. (Calg.); Richard Bedell, B.Sc. (Br.Col.), M.D. (Br.Col.); Jeffrey H. Bell, M.D. (Sask.), C.C.F.P.; Antonio Benitez-Gomez, M.D. (Cordoba), C.C.F.P.; Winston Bishop, LRCP, S (I) (Dub.); Rainer Borkenhagen, B.M.E., M.D.C.M. (McG.), C.C.F.P.; Jan Bosman Burg, M.B., Ch.B. (Pretoria, S.Africa); Patricia Boston, M.A., B.A., Ph.D. (McG.), R.N. (N.Y.); Peter Bowen-Roberts, M.B., B.S. (Lond.), C.C.F.P.; Steven Broughton, M.D. (W.Ont.); Anne Bruce, B.S.N., Ph.D. (Br.Col.); Michael L. Buchanan, M.D. (W.Ont.), FRCP; Susan Burgess, M.D. (Qu.), C.C.F.P.; Denis E. Burke Burgess, B.A., M.A. (Br.Col.); Mary T. Burke-Burgess, M.B., B.Ch., B.A.O. (Ireland), C.C.F.P.; Judith I. Bus, B.A., M.D. (Br.Col.); Kathleen A. Cadenhead, B.Hec., M.D. (Br.Col.), C.C.F.P.; Peter R. Callegari, M.B., Ch.B. (Edin.); Kenneth Chan, B.Sc., M.D. (Br.Col.), C.C.F.P.; Bruce H. Chang, M.D. (Br.Col.); Cindy Chang, M.D. (Br.Col.); Terence Chang, B.Sc., M.D. (Br.Col.); Dalton Chen, M.B.ChB (Glas.); Dalton Chen, MBChB (Glas.); Lawrence Cheng, M.D. (W.Ont.), C.C.F.P.; Larry R. P. Collins, B.Sc., M.D. (Br.Col.); Gisele M. Comeau, M.D. (Dal.); Caroline Condon, M.B., Ch.B. (Liv.), D.O. (Eng.), C.C.F.P.; H. Zarowny, B.Sc., M.D., M.Sc. (Manit.); Tony Zuccaro, M.D. (Br.Col.), C.C.F.P.

DEPARTMENT OF HEALTH CARE AND EPIDEMIOLOGY

Martin T. Schechter, Head

Divisions

Epidemiology and Biostatistics: Dr. Joel Singer, Head; Public, Environmental and Occupational Health: Dr. Kay Teschke, Head; Population Health and Health Services Research: Dr. Morris Barer, Head.

Professors Emeriti

T. W. Anderson, M.A. (Hons.), B.M., B.Ch. (Oxf.), Ph.D. (Tor.), FRCP; David V. Bates, M.B., B.Ch., M.D. (Camb.), CM, FRCP, FRCP, FACP, FRSC; A. Crichton, M.A. (Liv.), Ph.D. (Wales); Ned Glick, A.B. (Oberlin Coll.), M.Sc., Ph.D. (Stan.); C. J. G. MacKenzie, M.D. (Qu.), Ph.D. (Tor.), FRCP; John Milsum, B.Sc. (Lond.), S.M., M.E., S.C.D. (M.I.T.); Robert E. Modrow, B.A. (Grove City, Penn.), M.A. (Denver), Ph.D. (Mich.); Brenda J. Morrison, Ph.D. (Br.Col.); Dean H. Uyeno, B.S., M.S.E. (Wash.), Ph.D. (Northwestern).

Professors

Aslam H. Anis, B.S.S. (Hons.) (Dhaka, P'desh), M.A., Ph.D. (Car.); Morris L. Barer, B.Sc., Ph.D. (Br.Col.); Charlyn Black, M.D., Ph.D. (Manit.); Johns H.; Clyde Hertzman, M.D., M.Sc. (McM.), FRCP; Robert Hogg, B.A., M.A. (Vic.B.C.), Ph.D. (A.N.U.); Arminine Kazanjian, B.A. (Loyola), M.A. (Tor.), Ph.D. (Sorbonne); Susan M. Kennedy, B.A., Ph.D. (Br.Col.), M.Sc. (Harv.); Richard G. Mathias, M.D. (Alta.), FRCP; Martin T. Schechter, O.B.C., M.A. (Br.Col.), Ph.D. (Polytechnic, N.Y.), M.D. (McM.), M.Sc. (Tor.), FRCP; Samuel B. Sheps, B.A. (Antioch), M.D. (Case W. Reserve), M.Sc. (McG.), FRCP; Joel Singer, B.Sc. (McG.), M.A., Ph.D. (Wat.); John J. Spinelli, B.Sc., M.Sc., Ph.D. (S.Fraser); Katherine E. Teschke, B.A. (Trent), Dipl.T. (B.C.I.T.), M.P.H. (Calif., Berkeley), Ph.D. (Wash.); Christiaan van Netten, B.Sc. (Vic.B.C.), M.Sc., Ph.D. (S.Fraser); Annalee Yassi, B.Sc., M.D. (McM.), D.O.H.S., M.Sc., FRCP.

Associate Professors

Paul Demers, B.S. (William James Coll., Mich.), M.S., Ph.D. (Wash.); Charles James Frankish, B.A., M.A., Ph.D. (Br.Col.); Jacek Kopec, M.D. (Pomeranian Medical, Poland), M.Sc., Ph.D. (Tor.); Adrian Levy, B.Sc., M.Sc., Ph.D. (McG.); Chris Lovato, B.A. (New Mex.), M.A., Ph.D. (Texas, Austin); Ying MacNab, B.Sc. (Sichuan), M.Sc., Ph.D. (S.Fraser); Stephen A. Marion, B.Sc. (Tor.), M.S. (N.Y.), M.D. (Tor.), M.H.Sc. (Br.Col.), FRCP; Aleck Ostry, B.Sc., M.Sc. (Br.Col.), M.A. (S.Fraser), Ph.D. (Br.Col.); David M. Patrick, M.D. (Ott.), M.H.Sc. (Br.Col.); Jean Shoveller, B.Sc., M.A. (Dal.), Ph.D. (Br.Col.); Boris Sobolev, M.Sc., Ph.D. (Tomsk State Univ., USSR Academy of Sciences).

Assistant Professors

Jane Buxton, M.B.B.S. (Lond.), M.C.E.E., L.M.C.C. (Med. Council of Can.), M.H.Sc. (Br.Col.), FRCP; Bonnie Henry, M.D., M.P.H., FRCP; Patricia Janssen, Ph.D. (Wash.), M.P.H., B.S.N. (Br.Col.);

Mieke Koehoorn, B.Sc. (Dal.), Ph.D. (Br.Col.); Jean Francois Kozak, M.A., Ph.D. (Br.Col.); Steven Morgan, B.A. (W.Ont.), (M.A. (Qu.), Ph.D. (Br.Col.); Monica Naus, M.D. (Alta.), M.H.Sc. (Tor.), FRCP; Babak Pourbohloul, B.Sc., M.Sc. (Iran), Ph.D. (Laval); Robert Reid, B.Med.Sc., M.D. (Alta.), M.P.H., Ph.D. (Balt.); Jerry Spiegel, Ph.D., M.Sc., M.A. (McG.); Patricia Spital, B.A. (McM.), M.A. (Guelph), Ph.D. (McM.); Hubert Wong, B.A.Sc., Ph.D. (Br.Col.).

Clinical Professors Emeriti

Frederic Bass, B.S. (Antioch), M.D. (Case W. Reserve), M.Sc. (Harv.), D.Sc. (Johns H.); John D. Forrester, B.A. (Br.Col.), M.H.A. (Ott.); Joseph N. Nearing, B.Sc., M.D. (Calg.), M.H.Sc. (Tor.), FRCP; Paul Nerland, B.A.; W. G. Povey, B.A. (Wash.), M.D. (Lausanne), FACOG; John H. Smith, M.B., B.Ch., B.A.O. (Belf.), D.P.H. (School of Hygiene), D.I.H. (Soc. Of Apothecaries, Eng.); Annette J. Stark, B.Sc. (Br.Col.), M.P.H. (Pitt.), Ph.D. (N.Carolina); Marie Anne Toupin, B.N. (McG.), M.S. (Colorado), Dip. in Nursing, Dip. In Teaching; Patricia Wadsworth, B.S.N., M.A. (Br.Col.), R.N. FCCHE, FACHE.

Clinical Professors

J. Allan Best, M.Sc. (Qu.), Ph.D. (Wat.); F. John Blatherwick, B.Sc., M.D. (Alta.), D.P.H. (Tor.), FRCP; Richard Gallagher, B.Sc. (Br.Col.), M.A. (W. Wash.); Lorraine Greaves, B.A., M.A. (W.Ont.), Ph.D. (Monash, Aus.); Roland Guasparini, M.D., M.H.Sc. (Br.Col.), FRCP; T. Gregory Hislop, B.Sc. (S.Fraser), M.Sc., M.D., C.M. (McG.); John Millar, B.Sc., M.D., M.H.Sc. (Br.Col.).

Clinical Associate Professors

Ralph Brands, M.D. (W.Ont.), M.H.Sc. (Br.Col.); G. Keith Chambers, B.Sc., M.D., M.H.Sc. (Br.Col.); Arun Chockalingham, B.E., M.S. (Madras), Ph.D. (N.E.L.), F.A.C.C.; Raymond A. Copes, B.A., B.Sc. (S.Fraser), M.D., C.M., M.Sc. (McG.); Patricia Daly, M.D. (Tor.), C.C.F.P., FRCP; Perry Kendall, M.B.B.S. (Univ. Coll.), M.Sc. (Br.Col.), FRCP; David Marsh, M.D., C.C.S.A.M.; Lorna M. Medd, B.A., B.Sc., M.D. (Manit.), M.Sc. (Br.Col.), FRCP; Kirk A. Mitchell, B.A. (Alta.), Dip. in Pub. Ad. (Car.), M.B.A. (York), M.Sc. (Br.Col.); Shaun H. C. Peck, M.A., M.B., Ch.B. (Emmanuel Coll.), M.Sc. (Br.Col.), FRCP; Brian T. Schmidt, O.D. (Wat.), M.Sc. (Br.Col.); Danuta Skowronski, M.H.Sc. (Br.Col.), M.D., B.A. (Qu.); Craig Stephen, Ph.D., D.V.M., (Sask.); Rita Stern, B.A. (Concordia), M.S.W. (Tor.).

Clinical Assistant Professors

Chris Badijk, Ph.D. (Br.Col.), M.Math (Wat.), B. Math (Wat.); Mark Bigham, M.H.Sc. (Br.Col.), M.D. (Qu.), B.Eng. (R.R.M.C.); Marilyn Borugian, B.A., M.Sc., Ph.D. (Br.Col.); G. Keith Chambers, B.Sc., M.D., M.H.Sc. (Br.Col.); John Farley, B.Sc. (Wat.), M.B.B.S. (Lagos); Murray Fyfe, B.Sc., (Vic.B.C.), M.D., (Br.Col.), M.Sc. (Ott.); Paul Hasselback, M.D., M.Sc. (Ottawa), C.C.F.P. (McG.), FRCP (Ottawa); Janet Heavyside-Schechter, B.Sc. (Concordia) D.O.H. (McG.), M.D. (Br.Col.) FRCP; Thomas Lampinen, M.D., B.A. (Chic.), MS (Ill.), Ph.D. (Wash.); Tim Lee, Ph.D. (S.Fraser), MSc. (Br.Col.), BSc. (Br.Col.); Heather Manson, M.H.Sc. (Br.Col.), MD (Br.Col.), BSc (Br.Col.); Mary McBride, B.A., M.Sc. (Br.Col.); Peter D. Riben, B.A., B.Ed. (Sask.), M.D. (Calg.), M.H.Sc. (Br.Col.); Vicki Scott, B.Sc.N., Ph.D. (Vic.B.C.).

Senior Instructor

Gary Poole, B.A. (Br.Col.), M.A. (San Diego), Ph.D. (S.Fraser).

Adjunct Professors

Jack Altman, B.Sc. (McG.), M.A. (W.Ont.), Ph.D. (Chic.); Nelson Ames, B.Sc. M.D. (McM.), M.H.Sc. (Br.Col.), C.C.F.P.; Michael Arbogast, M.B.A. (Qu.),

B.Sc.(Econ.) (Trent); Gillian Arsenault, B.Sc., (S.Fraser), M.D., M.H.Sc. (Br.Col.), C.C.F.P., IBCLC, FRCPC; Rolando Barrios, M.D. (San Carlos, Guatemala), FRCPC; Maria Barroetavena, M.D. (Buenos Aires), M.H.Sc. (Br.Col.), Ph.D. (Br.Col.); Alex Berland, Dip. Nursing (Selkirk), B.Sc.N., M.Sc. (Br.Col.); David W. Birnbaum, B.A. (Calif., Berkeley), M.P.H. (Minn.), Ph.D. (Br.Col.); Robert Breen, B.Sc. (St. Mary's), M.Sc. (Br.Col.); Edward Bruce, M.A. (Regina); Frances Caruth, B.Sc. (Tor.), M.Sc. (Br.Col.); Mark Chase, B.Sc. (Mt. All.), M.Sc. (Br.Col.), C.H.E.; Kathryn Copeman-Stewart, B.Sc. N. (Tor.), M.P.A. (Harv.); Farid Damji, B.Sc., M.H.A. (Br.Col.); Philip Owen Davies, B.Sc. (Guelph), D.V.M., Ph.D. (Lond.); Ian Forbes, B.A.Sc., M.H.Sc. (Br.Col.), M.D. (Calg.); Stephen J. Gray, M.D. (Ott.), B.Sc., M.H.Sc. (Br.Col.); Trevor Hancock, B.Sc., B.S., M.B. (Lond.), M.H.Sc. (Tor.); Bruce Harber, B.A. (Car.), M.H.A. (Ott.), B.A. (St. Par's Coll.); Philip Hassen, B.Sc. (Wayne State), M.P.H. (Mich.); Gerald L. Hastings, B.Com., M.Sc. (Br.Col.); Andrew G. Hazlewood, B.A. (Ryerson); Neva Hilliard, M.H.Sc. (Tor.), M.D. (Nfld.), LMCC, FRCPC, MRO; Marcus J. Hollander, B.A. (McG.), M.A. (Hawaii), M.Sc. (Br.Col.), Ph.D. (Vic.B.C.); David Hsu, B.Sc., M.Sc., M.D. (Br.Col.); Tracy D. Irwin, B.A., M.H.A. (Br.Col.); Andrew Jin, M.D. (Tor.), M.H.Sc. (Br.Col.); Michael Johnson, B.Sc., M.H.Sc. (Tor.), M.B.A. (Br.Col.); Elizabeth Kallstrom, B.Sc., M.Sc. (Br.Col.); Barbara A. Kaminsky, B.A., M.S.W., M.Sc. (Br.Col.); Ann Kelly, B.Sc. (Mt. St. Vin.), M.P.H. (Wash.); Stephen Kenny, B.Sc. (Dal.), M.H.S.A. (Alta.); Arlene King, B.Nursing (Tor.), M.D. (McM.), FRCPC, C.C.F.P., M.H.Sc. (Br.Col.); James Lu, B.Sc., M.H.Sc., M.D. (Br.Col.); Hugh MacLeod, M.A. (R.R.M.C.); Michael D. Mahony, B.Com. (Liv.), F.C.A., Dip. in H.O.M.; J. David Martin, M.D. (Tor.), Cert. in Hospital Admin. (Sask.), M.H.Sc. (Br.Col.); Paul Martiquet, B.Sc., Ph.D., M.D., C.M. (McG.), M.H.Sc., C.C.F.P. (Tor.), FRCPC; Anne McFarlane, M.A. (Tor.), M.Sc. (Sask.); Patrick McGowan, B.A., M.S.W., Ph.D. (Br.Col.); Mark McLean, M.Sc., M.D. (Ott.); William G. Meekison, B.A., M.D. (Br.Col.), D.P.H. (Tor.), FRCP; Dora Nicinski, B.S.N., M.Sc. (Br.Col.); Myles Noël, B.Comm. (Hons.) (Qu.), M.B.A. (Northland); Brian A. O'Connor, M.D., M.H.Sc. (Tor.); Ellen Pekeles, B.Sc. (Tor.), M.H.A. (Ott.); Larry Peters, B.A. (Vic.B.C.), M.A. (Guelph), Ph.D. (Sask.); Peter D. Riben, B.A., B.Ed. (Sask.), M.D. (Calg.), M.H.Sc. (Br.Col.); David C. Richardson, B. Comm. (Br.Col.), M.H.A. (Minn.); Etta L. Richmond, C.G.A. (Br.Col.), Dip. Hosp. Organ. and Management; Lorna Romilly, B.A., M.Sc. (Br.Col.); Laurie J. Soloway, B.Ed. (Regina), M.Ed. (Alta.), LL.B. (Vic.); Barry W. Stevenson, B.Sc. (S.Fraser), M.Sc. (Health Services Planning) (Br.Col.); Greg Stump, B.Sc., M.Sc. (S.Fraser), M.H.A. (Ott.); Darrell Thomson, B.A. (Sask.), M.A. (Regina); Sharmen Vigouret, Cipl. Medical Laboratory, (B.C.I.T.), B.M.L.Sc., M.H.A. (Br.Col.); Dennis Wardman, M.D., FRCPC; Richard Woo, B.Comm. (Br.Col.), C.G.A., C.H.E.; Charles J. Wright, M.B., Ch.B. (Glas.), M.Sc. (McG.), FRCS.

Associate Members

Robert Armstrong, Pediatrics; Ken Basset, M.D. (Br.Col.), M.A., Ph.D. (McG.), Family Practice; Izak Benbasat, Sauder School of Business; C. Laird Birmingham, Medicine; James Busser, Medicine; Andrew J. Coldman, Statistics; Albert Dexter, Sauder School of Business; Dianne Doyle, Nursing; John M. Esdaile, Medicine; Robert G. Evans, Economics; Mark Fitzgerald, Medicine; William J. Godolphin, Pathology and Laboratory Medicine; Robert G. Goldstein, Sauder School of Business; York Hsiang, Surgery; Karin Humphries, M.D.; D.Sc. (Erasmus), M.B.A. (S.Fraser), M.Sc., (Br.Col.) B.G.S. (S.Fraser); Michael Klein, Family Practice; Larry Lynd, M.D.; B.Sc. Pharmacy (Br.Col.), Ph.D. Epidemiology (Br.Col.); David Maberley, Ophthalmology; Michael MacEntee, Dentistry; Carlo Marra, M.D.; Ph.D., Pharm.D.,

Hospital Residency, B.Sc. (Pharm.); Ron McKerrow, Pharmaceutical Sciences; Craig Mitton, M.D.; B.Sc. Biopsych., M.Sc. Health Research, Ph.D. Community Health Sciences †; Julio Montaner, Medicine; Robert Nakagawa, Pharmaceutical Sciences; Peter Nemetz, Sauder School of Business; Lloyd Oppel, M.D.; M.H.Sc. (Br.Col.), M.D. (Br.Col.), B.Sc. (Vic.B.C.); Anita Palepu, Medicine; Elizabeth Peter, Anesthesia; Richard D. Pollay, Sauder School of Business; Jerilyn Prior, Medicine; Pamela Ratner, M.D.; B.Sc. (Alta.1989), M.N. (Alta.1991), Ph.D. (Alta.1995); Elizabeth Riley, Paediatrics; John M. Sehmer, Family Practice; Nicola Shaw, Paediatrics; Erik Skarsgard, Surgery; Lynn Stothers, Surgery; Helen Tremlett, M.D.; Ph.D. Clinical Pharmacy (cardiff), B.Pharm. (Bath. U.); Himat Vaghadia, Anesthesia; Judith Vestrup, Surgery; Peter von Dadelzen, M.D.; M.F.M. (Tor.), D.Phil. (Oxf.), Dip.Obst. (Otago U.), M.B.Ch.B. (Otago U.), B.Med.Sc. (Otago U.); Yair Wand, Sauder School of Business; Helen D. Ward, Medicine; Evan Wood, M.D.; B.Sc. Geography/Environmental Studies (Vic.B.C.), Ph.D. Health Care & Epidemiology; Moira M.W. Yeung, Medicine.

DEPARTMENT OF MEDICAL GENETICS

W. Robert McMaster, Head

Professors Emeriti

Patricia A. Baird, B.Sc., O.C., O.B.C., FRSC, M.D., C.M. (McG.), FRCPC, F.C.C.M.G.; Judith Hall, O.C., B.A. (Mass.), M.S., M.D. (Wash.), F.C.C.M.G., FRCPC, F.A.A.P., F.A.B.M.G., F.C.A.H.S.; Stephen Wood, B.Sc. (Sheff.), M.Sc., Ph.D. (McG.), F.C.C.M.G.

University Professor Emeritus

Patricia A. Baird, B.Sc., O.C., O.B.C., FRSC, M.D., C.M. (McG.), FRCPC, F.C.C.M.G.

Associate Professor Emeritus

Frederick J. Dill, B.Sc., M.A. (Br.Col.), Ph.D. (Calif., Berkeley), F.C.C.M.G.

Professors

Carolyn J. Brown, B.Sc. (Guelph), Ph.D. (Tor.); Michael Burgess, B.A. (Spring Arbor, Mich.), M.A., Ph.D. (Tenn.); Connie J. Eaves, B.A., M.Sc. (Qu.), Ph.D. (Manc.), F.R.S.C.; L. Leigh Field, B.Sc. (Br.Col.), M.A. (Tor.), Ph.D. (Tor.); Jan M. Friedman, M.S., M.D. (Tulane), Ph.D. (Wash.), F.A.A.P., F.A.B.M.G., F.C.C.M.G., FRCPC; Philip A. Hieter, B.A., Ph.D. (Johns H.); Wilfred A. Jefferies, B.Sc. (Vic.B.C.), D.Phil. (Oxon.); Diana M. Juriloff, B.Sc., M.Sc. (Br.Col.), Ph.D. (McG.); Robert J. Kay, B.Sc., Ph.D. (Br.Col.); Dixie L. Mager, B.Sc. (Nebraska), M.Sc., Ph.D. (Tor.); Barbara C. McGillivray, B.Sc. (Br.Col.), M.D. (Alta.), FRCPC, F.C.C.M.G.; W. Robert McMaster, B.Sc., M.Sc. (Br.Col.), D.Phil. (Oxon.); Wendy P. Robinson, B.Sc., Ph.D. (Calif., Berkeley); Ann M. Rose, B.A. (Sask.), M.Sc. (Br.Col.), Ph.D. (S.Fraser); A. Dessa Sadovnick, B.Sc., M.Sc. (McG.), Ph.D. (Br.Col.); Margot I. Van Allen, M.S. (Ill.), M.D. (Chic.), FRCPC, F.C.C.M.G., F.A.A.C.P.D.M., D.A.B.P.

University Killam Professor

Michael R. Hayden, M.B., Ch.B., Ph.D. (Cape T.), D.Ch., D.Phil., (S. Africa), FRCPC, FRSC, University Killam Professor.

Associate Professors

Lorne A. Clarke, B.Sc., M.D., C.M. (McG.), FRCPC, F.C.C.M.G.; Muriel J. Harris, B.Sc. (Br.Col.), M.Sc. (McG.), Ph.D. (Tor.); Steven J.M. Jones, B.Sc. (Hons.) (Brist.), M.Sc. (S.Fraser), Ph.D. (Sanger Institute, U.K.); Sylvie F. Langlois, M.D. (Sher.), FRCPC, F.A.B.P., F.C.C.M.G.; Marco A. Marra, B.Sc., Ph.D.

(S.Fraser); Kelly McNagny, B.Sc. (Worc.), Ph.D. (Alabama); B.F. Francis Ouellette, B.Sc. (McG.), M.Sc. (Calgary); Elizabeth M. Simpson, B.Sc., M.Sc., Ph.D. (Tor.); Wyeth Wasserman, B.Sc., (Wash.), Ph.D. (Wisc.-Madison).

Assistant Professors

Laura Arbour, B.Sc. (Windsor), M.Sc., M.Sc. (McG.), M.D. (McM.), FRCPC, F.C.C.M.G.; Angela R. Brooks-Wilson, B.Sc. (Hons.) (S.Fraser), M.Sc. (Tor.), Ph.D. (Br.Col.); Elizabeth Conibear, B.Sc. (Hons.) (Car.), Ph.D. (Camb.); William Gibson, Ph.D. (Cambr.), M.D. (W.Ont.), B.Sc. (Hons.) (Tor.); Pamela A. Hoodless, B.Sc., Ph.D. (Qu.); Xiaoyan Jiang, M.D. (China), Ph.D. (McG.); Michael Kobor, Ph.D. (Tor.), B.Sc. (Heidel.); Blair R. Leavitt, B.Sc., M.D., C.M. (McG.), FRCPC; Louis LeFebvre, B.Sc. (Hons.) (Laval), Ph.D. (Brit. Col.); Matthew Lorincz, Ph.D. (Calif., Stan.); Fabio Rossi, M.D. (Italy), Ph.D. (Germany); Sarah Townsend, B.S. (C'nell), Ph.D. (Calif., Berkeley); Mark Wilkinson, (1st class Hons.) (Alta.), Ph.D. (Brit. Col.).

Honorary Members

David L. Baillie, B.Sc., M.Sc. (Br.Col.), Ph.D. (Conn.), Honorary Professor; Elizabeth J. Ives, M.D.

Clinical Professors

Patrick M. J. MacLeod, M.D. (Br.Col.), FRCPC, F.C.C.M.G., F.A.B.M.G.; Siu-Li Yong, M.B., B.S., M.Med.(Paed.) (Sing.), D.A.B.Ped., F.R.C.P.C., F.C.C.M.G.

Clinical Associate Professor

M. E. Suzanne Lewis, B.Sc., M.D. (W.Ont.), FRCPC, F.A.A.P., F.C.C.M.G.

Clinical Assistant Professors

Linlea Armstrong, B.Sc., M.D. (Br.Col.), FRCPC; Susan Creighton, B.Sc. (Qu.), M.S. (Sarah Lawrence), Genetic Counsellor, CGC; Anita Dircks, B.Sc. (Br.Col.), M.Sc. (McG.), Genetic Counsellor Training Program Director, CCGG, CGG; Y. Paul Goldberg, M.B., Ch.B., Ph.D. (Cape T.), FRCPC; David Koehn, B.Sc. (Br.Col.), M.Sc. (McG.), Head Genetic Counsellor, CCGG, CGG; Karen Panabaker, B.Sc. (Manit.), M.Sc. (Br.Col.), M.Sc. (McG.), Genetic Counsellor, CCGG, CGG; Millan S. Patel, B.Sc., M.Sc., M.D. (Alta.), FRCPC, FCCMG, FABMG.

Clinical Instructors

Chieko Chijiwa, M.Sc. (S.Lawrence, N.Y.), B.Sc. (McG.), Queb.), Genetic Counsellor, C.G.C.; Christele du Souich, B. Sc., M.Sc. (McG.), Genetic Counsellor, CCGG, CGG; Emily Dwosh, B.Ed. (McG.), M.Sc. (Br.Col.), Genetic Counsellor, CCGG; Kim Gall, B.Sc. (W.Ont.), M.Sc. (Br.Col.), Genetic Counsellor, CGG; Colleen Guimond, B.Sc. (Guelph), M.Sc. (Br.Col.), Genetic Counsellor, C.G.C., M.S.C.S.; Sara Jane Hamilton, B.Sc. (Lakehead), M.Sc. (Br.Col.), Genetic Counsellor, CCGG; Gurdip K. Hulait, B.Sc., M.Sc. (Br.Col.), Genetic Counsellor, CGC, CCGG; Jane Hurlburt, B.Sc. (Br.Col.), M.Sc. (McG.), Genetic Counsellor, R.N., CCGG; Pardeep Kaurah, B.Sc. (UA), M.Sc. (McG.), Genetic Counsellor, CCGG; Stephanie Kieffer, B.Sc. (Br.Col.), M.S. (Sarah Lawrence), Genetic Counsellor, CGC, CCGG; Janet Livingston, B.Sc. (Br.Col.), M.Sc. (Br.Col.), Genetic Counsellor, CCGG; Natasha MacPhee, B.Sc. (St. Mary's), M.Sc. (McG.), Genetic Counsellor; Sarah McIntosh, B.Sc. (Vic.B.C.), M.Sc. (Br.Col.), Genetic Counsellor, CCGG; Kirsten Meagher, B.Sc. (Br.Col.), M.S. (Sarah Lawrence), Genetic Counsellor, CGC; Tracey Oh, B.A. (Hons.) (W.Ont.), M.Sc. (S.Lawrence, N.Y.), Genetic Counsellor; Patricia Power, B.Sc. (Mun.), M.Sc. (Br.Col.), Genetic Counsellor, CCGG; Yolanda Ridge, B.Sc. (Alta.), M.Sc. (Br.Col.) Genetic Counsellor, CCGG, CGG; Rosemarie Rupp, B.Sc. (Sask.), M.Sc.(McG.),

Genetic Counsellor, CGC; **Karan Sangha**, M.Sc. (Br.Col.), B.Sc. (Br.Col.), Genetic Counsellor, C.C.G.C.; **Jennifer Scott**, B.Sc. (Qu.), M.S. (S.Lawrence), Genetic Counsellor, C.G.C.

Associate Members

Jehanne Austin, Psychiatry; **Hugh W. Brock**, Zoology; **Marion B. Coulter-Mackie**, Pediatrics; **Sandra E. Dunn**, Pediatrics; **Thomas A. Grigliatti**, Zoology; **Douglas Horsman**, Pathology and Laboratory Medicine; **R. Keith Humphries**, Medicine; **David Huntsman**, Pathology and Laboratory Medicine; **Peter M. Lansdorp**, Medicine; **Deborah E. McFadden**, Pathology and Laboratory Medicine; **Tanya Nelson**, Pathology & Laboratory Medicine; **Evica Rajcan-Separovic**, Pathology and Laboratory Medicine; **Dorothy Shaw**, Obstetrics and Gynaecology; **Sandra Sirrs**, Endocrinology; **Fumio Takei**, Pathology and Laboratory Medicine; **Hilary Vallance**, Pathology and Laboratory Medicine.

DEPARTMENT OF MEDICINE

Graydon Mencilly, Head
Michael Barnett, Associate Head; **Paul Man**, Associate Head.

Division of Allergy and Immunology

R. Robert Schellenberg, Head

PROFESSOR

R. Robert Schellenberg, M.D. (Manit.)

CLINICAL PROFESSOR

H. C. George Wong, B.Sc. (Manit.), M.D. (Br.Col.), FRCPC, FACP,FAAAL.

CLINICAL ASSOCIATE PROFESSORS

Michael A. J. Mandl, M.Sc. (McG.), M.B.B.S. (Syd.), FRCPC; **Donald F. Stark**, M.D. (Alta.).

CLINICAL INSTRUCTORS

Amin Kanani, M.D. (McG.).

Division of Cardiology

Chris Buller, Head

PROFESSORS

Chris Buller, B.A. (Tor.); **John A. Cairns**, M.D. (Br.Col.), FRCPC; **Charles R. Kerr**, B.Sc., M.D. (Br.Col.), FRCPC; **G. B. John Mancini**, M.D. (Tor.), FRCPC, FACC; **Simon Rabkin**, B.Sc., M.D. (Manit.), FRCPC.

ASSISTANT PROFESSOR

Karin Humphries, M.Sc. (Br.Col.), M.B.A. (S.Fraser), D.Sc. (Netherlands).

PROFESSOR EMERITUS

Henry Mizgala, B.A., M.D. (Queb.).

ASSOCIATE PROFESSOR EMERITUS

Hartmut Henning, B.Sc. (Tuebingen), M.D., Ph.D. (Munich).

CLINICAL PROFESSOR EMERITUS

John A. Boone, B.A., M.D. (Br.Col.), FRCPC; **Doris Kavanagh-Grey**, M.D. (Ott.), FACP, FACC, FRCPC; **Dwight Peretz**, M.D. (Br.Col.), M.Sc. (McG.); **Melville Shaw**, M.D. (W.Ont.), FRCPC, FACP, FACC; **Max Walters**, M.D. (Manit.).

CLINICAL PROFESSORS

Victoria Bernstein, M.R.C.S. (Engl.), L.R.C.P. (Lond.), FRCPC; **Arthur Dodek**, M.D. (Br.Col.), FRCPC; **Jaap N. Hamburger**, Ph.D. (Rotterdam); **Victor F. Huckell**, B.Sc., M.D. (Br.Col.), FRCPC, FACC; **Ian Penn**, M.B., B.S. (Syd.), FRCPC, FRACP; **Donald Ricci**, B.Sc., M.D. (Br.Col.), FRCPC; **John Webb**, B.Sc. (S.Fraser), M.D. (Br.Col.), FRCPC.

CLINICAL ASSOCIATE PROFESSORS

Ronald Carere, B.Sc. (Guelph), M.D. (Ott.), FRCPC; **Anthony Y. Fung**, M.B., B.S. (H.K.), FRCPC; **Kenneth G. Gin**, M.D. (Br.Col.), FRCPC; **Andrew Ignaszewski**,

M.D. (Lubin, Poland), FRCPC; **Marla Kiess**, B.Sc., M.D. (Br.Col.), FRCPC; **Ian MacDonald**, M.D. (Qu.), C.C.F.P., FRCPC; **Christopher Thompson**, M.D., C.M. (McG.), FRCPC; **John Yeung-Lai-Wah**, M.B., Ch.B. (Glas.), FRCPC.

CLINICAL ASSISTANT PROFESSORS

Eve Aymong, M.Sc. (Col.), M.D. (Tor.); **Sammy Chan**, M.D. (Br.Col.), FRCPC; **Brett G. Heilbron**, M.B., Ch.B. (Cape T.), FRCPC; **Saul Isserow**, M.D. (Witw.), FRCPC; **John Jue**, B.Sc., M.D. (Br.Col.), FRCPC; **Pui Kee Lee**, M.B., B.S. (H.K.), M.R.C.P. (U.K.), FRCPC; **Alan Rabinowitz**, M.B., Ch.B. (CAPE T.); **Jacqueline Saw**, B.Sc. (S.Fraser), M.D. (Ott.), FRCPC; **Lynn Straatman**, M.D. (Tor.); **Graham Wong**, B.Sc., M.D. (Br.Col.), MPH (HARVARD).

CLINICAL INSTRUCTORS

Bradley I. Munt, B.Sc., M.D. (Br.Col.), FRCPC; **Stanley Tung**, M.D. (Man.).

ADJUNCT PROFESSOR

Scott Lear, B.Sc. (S.Fraser), Ph.D. (Br.Col.).

ASSOCIATE MEMBER

John Mayo.

Division of Community Internal Medicine

CLINICAL ASSISTANT PROFESSOR

Shavinder Gill, M.B.B.S. (Patiala), FRCPC; **Donald MacRitchie**, B.Sc. (Hons), M.D. (Br.Col.), FRCPC; **Tun Maung**, M.B.B.S. (Yangon), FRCPC; **David Miller**, B.Sc., M.D. (W.Ont.), FRCPC; **Simon Min**, B.Sc. (Br.Col.), M.D. (Tor.), FRCPC; **Dave Williams**, M.B.B.S., B.Sc. (W.I.), M.Sc. (Alta.), M.B.A. (Qu.), FRCPC.

CLINICAL INSTRUCTOR

Doug Skinnider, B.Sc., M.D. (Sask.), FRCPC; **Shannon Walker**, B.Sc., M.D. (Br.Col.), FRCPC.

Division of Critical Care Medicine

John C. Fenwick, Head

PROFESSORS

James A. Russell, A.B. (Prin.), M.D. (Tor.), FRCPC; **Keith Walley**, B.Sc., M.D. (Manit.), FRCPC.

ASSOCIATE PROFESSOR

Peter Dodek, M.D. (Tor.), FRCPC, FACP.

ASSISTANT PROFESSOR

Delbert Dorscheid, M.D., Ph.D., B.Sc. (McG.).

CLINICAL ASSOCIATE PROFESSOR

John Y. Tsang, B.Sc. (McG.), M.D. (Tor.), FRCPC.

CLINICAL ASSISTANT PROFESSORS

Dean R. Chittock, M.D. Medicine (Hon.) (W.Ont.); **Vinay Dhingra**, M.D. (Sask.); **John C. Fenwick**, B.Sc., M.D. (Br.Col.); **David M. Forrest**, B.Sc., M.D. (Alta.); **Gregory Grant**, B.Sc., M.D. (Alta.); **Sean Keenan**, M.D. (Tor.); **Juan Jose Ronco**, M.D. (Buenos Aires).

CLINICAL INSTRUCTORS

Catherine Craig, B.Sc., M.D., M.Sc. (Br.Col.).

ASSOCIATE MEMBERS

George Isaac, B.Sc., M.D. (Dal.), FRCPC.

Division of Dermatology

Harvey Lui, Head

PROFESSORS

Vincent C. Y. Ho, B.Sc., M.D. (Br.Col.), FRCPC; **Harvey Lui**, B.Sc., M.D. (Br.Col.), FRCPC; **David McLean**, B.Sc., M.D. (Manit.), FRCPC; **Jason K. Rivers**, B.Sc., M.D. (Ott.), FRCPC.

ASSOCIATE PROFESSORS

Jan Dutz, M.D. (Qu.); **Neil C. Kitson**, B.Sc. (Hon.), M.D. (McM.), FRCPC, Ph.D. (Syd.); **Gang Li**, M.D. (Nanjing), Ph.D. (Br.Col.).

ASSISTANT PROFESSORS

Kevin McElwee, B.Sc., Ph.D. (UK); **Youwen Zhou**, M.D. (Tor.), Ph.D. (N.Y.).

CLINICAL PROFESSORS EMERITI

Stewart Maddin, M.D. (Alta.); **W. Alastair McLeod**, M.Sc. (Minn.).

CLINICAL PROFESSORS

Alastair Carruthers, B.A., M.A., B.M., B.Ch. (Oxon.), M.R.C.P., FRCPC; **Jerry Shapiro**, B.Sc., M.D. C.M. (McG.), FRCPC; **Laurence Warshawski**, B.Sc., M.D. (Br.Col.), FRCPC.

CLINICAL ASSOCIATE PROFESSORS

Robert J. Conklin, B.Sc., M.D. (Manit.), FRCPC; **Richard M. Haber**, M.D. (TOR.); **Brian T. Kunimoto**, B.Sc., M.D. (Br. Col.), FRCPC; **Roberta C. Ongley**, M.D. (Tor.), FRCPC.

CLINICAL ASSISTANT PROFESSORS

James Bergman, B.Sc. (Winn.), B.Sc. (Manit.), FRCPC; **Brian W. Gregory**, B.Sc. (Car.), M.D. (Ott.), FRCPC; **Patrick Kenny**, M.B., B.Ch., B.A.O. (Nat., Ireland), FRCPC; **Charles E. Morton**, M.D. (Qu.), FRCPC; **Marie B. Prihoda**, M.D. (Alta.), FRCPC; **D. Richard Thomas**, M.A., M.B. (Lond.), FRCPC; **Evert J. Tuyp**, M.D. (W.Ont.), FRCPC; **David Zloty**, M.D. (Alta.), FRCPC.

CLINICAL INSTRUCTORS

John D. Amiss, B.A., M.D., C.M. (McG.), FRCPC; **Sheila Au**, B.Sc., M.D. (Ott.); **Bryce Cowan**, B.Sc., M.D., Ph.D. (Tor.), M.Sc. (Prin.), FRCPC; **Anne Davis**, M.D. (Ott.); **Chih-Ho Hong**, M.D. (Tor.); **Sikina F. Rossi**, M.D. (UBC); **Mohammad Shokravi**, M.D. (Alta.).

ADJUNCT PROFESSOR

Jenifer Thewalt, Ph.D. (S.Fraser).

ASSOCIATE MEMBERS

Nigel Ball, Pathology; **Richard Crawford**, Pathology; **Richard P. Gallagher**, Health Care and Epidemiology; **Magdalena Martinka**, Pathology; **Juliette Prendiville**, Pediatrics; **Haishan Zeng**, Pathology.

Division of Endocrinology and Metabolism

David M. Thompson, Head

PROFESSOR EMERITUS

Keith Dawson, B.Sc., M.D. (Br.Col.).

PROFESSOR

Jerilynn C. Prior, B.A. (Linfield), M.D. (Boston), FRCPC.

ASSOCIATE PROFESSORS EMERITI

Alexander Cairns, M.D. (Br.Col.); **Stephen C. Thorson**, M.Sc., M.D. (Br.Col.).

CLINICAL PROFESSOR

Graeme E. Wilkins, B.A., M.D. (Br.Col.), FRCPC.

CLINICAL ASSOCIATE PROFESSOR

Sabrina Gill, M.D. (Br.Col.), M.P.H. (Harv.), FRCPC; **Hugh Tildesley**, B.Sc., M.D. (McG.), FRCPC.

CLINICAL ASSISTANT PROFESSORS

Richard Bebb, M.D. (Br.Col.); **Marshall Dahl**, M.D. (Br.Col.); **Thomas G. Elliott**, B.M.Sc., M.B.B.S. (Q'ld.), FRCPC; **David L. Kendler**, M.D. (Tor.) FRCPC, FRCPC(C); **Stuart H. Kreisman**, M.D. (McG.); **Sandra Sirrs**, M.D. (Br.Col.), FRCPC; **David M. Thompson**, B.Sc., M.D. (Br.Col.), FRCPC; **Clarissa Wallace**, M.D. (Qu.).

CLINICAL INSTRUCTOR

Michelle Fung, B.A., M.D. (McM.), M.H. Sc. (Br.Col.), FRCPC; **Michelle Johnson**, B.Sc., M.D. (Man.); **Jason M. Kong**, M.D. (Br.Col.); **Robert Mase**, B.Sc., M.D. (Br.Col.).

ADJUNCT PROFESSOR

Diane T. Finegood, Ph.D. (S. Calif.).

ASSOCIATE MEMBERS

Greg Bondy, Pathology; Ralph Rothstein, Pediatrics; Laura Stewart, Pediatrics.

Division of Gastroenterology

Eric Yoshida, Head

PROFESSORS

Hugh J. Freeman, B.Sc. (Loyola), M.D., C.M. (McG.), FRCP, A.B.I.M., A.B.G.E., F.A.C.P., F.A.C.G.; Urs Steinbrecher, B.Sc., M.D. (Alta.), FRCP, A.B.I.M.

ASSOCIATE PROFESSORS

Baljinder Salh, M.B., Ch.B. (LEEDS), M.R.C.P., L.M.C.C., FRCP; Eric Yoshida, M.D. (Tor.), M.H.Sc. (Br.Col.), FRCP.

ASSOCIATE PROFESSORS EMERITI

Frank H. Anderson, B.A., M.D. (Br.Col.), FRCP; W. C. MacDonald, M.D. (Br.Col.).

ASSISTANT PROFESSOR

Isabella Tai, B.Sc., M.Sc., Ph.D., M.D. (Tor.), FRCP(C).

CLINICAL PROFESSORS EMERITI

Hugh Chaud, M.A., B.M., B.Ch. (Oxon.); Stanford Stordy, M.D.C.M. (McG.), FRCP(C).

CLINICAL PROFESSOR

Lawrence S. Halparin, M.D. (Manit.), FRCP.

CLINICAL ASSOCIATE PROFESSORS

Michael Byrne, B.A., M.B. Ch.B., M.A., M.D. (CAMB.); James Gray, M.D. (Br.Col.), FRCP; Wing C. Peter Kwan, M.D. (W.Ont.), FRCP; Allan A. Weiss, M.D. (Br.Col.), FRCP, CME Director.

CLINICAL ASSISTANT PROFESSORS

Jack N. Amar, B.Sc. (McG.), M.D. (Tor.), FRCP; Robert Enns, B.Sc., M.D. (Br.Col.); Siegfried R. Erb, M.D. (W.Ont.), FRCP; Jennifer Telford, B.Sc., M.D. (Br.Col.), M.P.H. (Harv.); John Scott Whittaker, B.Sc., M.D. (Br.Col.), FRCP.

CLINICAL INSTRUCTORS

Nazir Chatur, B.Sc. (S.Fraser), M.D. (Br.Col.), FRCP; Martin Fishman, M.D. (Br.Col.); Eric Lam, B.Sc. (Br.Col.), M.Sc. (Tor.), B.Med.Sc., M.D. (Mem.); Alnoor Ramji, B.Sc., M.D. (Br.Col.).

ASSOCIATE MEMBER

Bruce McManus, Pathology and Laboratory Medicine.

Division of General Internal Medicine

Iain F. Mackie, Acting Head

PROFESSOR EMERITUS

Michael Schulzer, M.A., M.D. (Br.Col.), Ph.D. (Wash.).

PROFESSORS

Gordon G. Page, B.Sc. (Vic.B.C.), M.A., Ed.D. (Br.Col.); James M. Wright, M.D. (Alta.), Ph.D. (McG.), FRCP.

ASSOCIATE PROFESSORS EMERITI

Robert Rangno, B.Sc., M.D., M.Sc. (Manit.), LMCC, FRCP; Harvey D. Sanders, M.D. (Br.Col.), Ph.D. (Manit.).

ASSOCIATE PROFESSORS

Anita Palepu, M.D. (McM.); Donald R. Studney, B.A.Sc., M.A.Sc., M.D. (Tor.), F.A.C.P., FRCP.

CLINICAL PROFESSOR

I. Mackie, M.D. (Tor.), FRCP; Paul Mitenko, B.Sc., M.D. (Manit.), FRCP.

CLINICAL ASSOCIATE PROFESSORS

Rose Hatala, B.Sc., M.D., M.Sc. (McM.); Barry O. Kassen, M.D. (Sask.), FRCP; James Kennedy, M.D. (Nfld.); John M. Onrot, M.D. (Tor.), FRCP.

CLINICAL ASSISTANT PROFESSORS

Richard Arseneau, B.Sc. (Qu.), D.V.M. (Guelph), M.D. (Tor.) FRCP; Brian J. Ayotte, M.D. (Manit.); Hector

Baillie, B.Sc., M.Sc., M.B. Ch.B. (Glas.), FRCP; James R. Busser, M.D. (W.Ont.), M.H.Sc. (Br.Col.), FRCP, MSI Director, Vancouver Hospital; James Dunne, M.B. (Ireland), FRCP; Irene Ma, B.Sc. (Tor.), M.D. (Br.Col.), M.S. (Stan.), FRCP; Laura A. Magee, M.D. (Tor.); May Ong-Lam, B.Sc. (Minn.), M.D. (Tor.), FRCP; Thomas L. Perry, Ph.D., M.D. (Br.Col.); Allister Richmond, B.Sc., M.D. FRCP (Br.Col.); Robert G. Wakefield, B.Sc., M.D. (Stan.); John Ward, B.Sc. (Car.), L.M.C.C., M.D. (Tor.), FRCP.

CLINICAL INSTRUCTORS

Edward Auersperg, M.Sc., M.D. (Br.Col.); Sarah Broder, M.D. (McM.); Sherri L. Caswell, M.D. (Br.Col.); Alex Chong Hen Chan, M.D. (Manit.); Kenneth Cunningham, M.D. (W.Ont.); Timothy Deutscher, B.A. (Alta.); Stephen Duke, B.Sc., M.D. (Ott.); Frank Ervin, B.Sc., M.D. (Dal.); Philippa H. Hawley, B. Med (Southampton); Cheryl Holmes Boulton, M.D. (Br.Col.); Michael Kenyon, MBBCh (Sth. Africa); Nadia Khan, B.Sc., M.D. (Alta.), M.Sc. (Calg.), FCCPC; David D. Kincaid, M.D. (Br.Col.); Kevin Lai, M.B. Ch. (S.A.), FRCP; Mark Lysyshyn, B.Sc. (McM.), M.D. (Qu.), FRCP; Rhonda McKay, B.Sc., M.D. (Sask.); Susan Purkiss, M.D. (McM.); James M. Roberts, M.D. (Calif.); Jennifer Sunderwood, B.Sc., M.D. (Br.Col.); Charles Tai, M.D. (Alta.); Lawrence Winkler, S.B. (M.I.T.), M.D. (Qu.), FRCP; Steven K. Wong, B.Sc., M.D. (Calg.), FRCP.

CLINICAL PROFESSORS EMERITI

Archibald Johnson, M.D. (Ont.); Edward McDonnell, B.A. (Br.Col.), M.D.C.M. (McG.); Bruce Paige, M.B., B.S. (Syd.).

CLINICAL ASSOCIATE PROFESSOR

EMERITUS
Charles S. Rennie, M.D. (Manit.).

ASSOCIATE MEMBERS

Hector Baillie; C. Laird Birmingham, Psychiatry; Patrick Zaidel, Family Practice.

Division of Geriatric Medicine

Janet McElhaney, Head

PROFESSORS

Graydon S. Meneilly, M.D. (Sask.), FRCP.

PROFESSOR EMERITUS

B. Lynn Beattie, M.D. (Br.Col.), FRCP.

ASSISTANT PROFESSOR

Kenneth Madden, M.Sc., M.D. (Qu.); Janet McElhaney, B.Sc. (W.Ont.), M.D. (Alta.).

CLINICAL ASSOCIATE PROFESSORS

Reva Adler, M.D. (N.Y. State); Larry Dian, M.B., Ch.B. (Witw.), FRCP; Janet S. Martini, M.D. (Br.Col.), FRCP.

CLINICAL ASSISTANT PROFESSORS

Maria Chung, B.Sc. (Br.Col.), M.D., C.M. (McG.), FRCP; Amanda Hill, M.B., B.Ch. (Witw.); Peter O'Connor, B.A., M.B., B.Ch., B.A.O., (Dub.), FRCP; Christopher J. Rauscher, M.D. (Manit.), FRCP; Roger Wong, B.M.Sc., M.D., FRCP.

CLINICAL INSTRUCTORS

Kim Barnett, B.Sc., R.N., M.D. (Alta.), FRCP; Marilyn Bater, M.D. (Alta.), FRCP; Kathryn Bell, M.D. (Br.Col.), FRCP; Wendy Cook, Hons. B.A. & B.Sc. (McM.), M.D. (Tor.), M.H.Sc., (Br.Col.); Kim King, B.Sc., M.D. (Br.Col.); Janet V. Kushner-Kow, M.D. (Calg.); Philip Lee, B.Sc., M.D. (Br.Col.), FRCP; Marilyn Malone, M.D. (Br.Col.); Janice Menezes, M.D. (Ott.) FRCP; Caroline Petrossian, B.Sc. (S.Fran.), M.D. (Br.Col.), FRCP; Hetesh Ranchod, M.B. (S.Africa); Dorothy Williams, M.D. (Alta.), FRCP.

Division of Haematology

Michael Barnett, Head

PROFESSORS

Allen C. Eaves, B.Sc. (Acadia), M.D., M.Sc. (Dal.), Ph.D. (Tor.), FRCP, F.A.C.P. M.D., Ph.D. (Tor.); Keith Humphries, B.Sc. (Alta.), M.Sc. (Tor.), M.D., Ph.D. (Br.Col.); Peter M. Lansorp, M.D. (Erasmus), Ph.D. (Amst.); John Schrader, M.B.B.S., B.Med.Sc., Ph.D. (Aust.).

ASSOCIATE PROFESSORS

Clayton Smith, B.A., M.D. (Texas).

CLINICAL PROFESSORS

Penny J. Ballem, B.Sc. (McG.), M.Sc. (W.Ont.), M.D. (Br.Col.), FRCP; Michael Barnett, B.M.E.D. Sc., B.M. B.S. (Nott.); Donna E. Hogge, B.Med.Sc., M.D. (Alta.), FRCP, Ph.D. (Alta.); Thomas John Nevill, M.D. (Tor.), FRCP.

CLINICAL PROFESSOR EMERITUS

Noel A. Buskard, B.A., M.D. (Qu.), FRCP, F.A.C.P.

CLINICAL ASSOCIATE PROFESSORS

W. Barrett Benny, B.Sc., M.D. (Br.Col.), FRCP; Donna Forrest, M.D. (Manit.); Stephen H. Nantel, B.Sc. (McG.), M.D. (Calg.), FRCP, A.B.I.M.; John D. Shepherd, B.Sc. (Br.Col.), M.Sc., M.D. (Calg.), FRCP; Heather Sutherland, B.Sc., M.D. (Sask.), FRCP; Cynthia L. Toze, M.D. (Qu.), FRCP; Linda M. Vickers, M.D. (Br.Col.), FRCP.

CLINICAL ASSISTANT PROFESSORS

Heather Leitch, B.Sc. (Qu.), M.D., Ph.D. (Br.Col.), FRCP; Charles Li, B.Sc. (Alta.), M.D. (Alta.).

CLINICAL INSTRUCTORS

Raewyn Broady, M.B. Ch.B., (N.Z.), FRACP, FRCPA; Lynda Foltz, B.Sc., M.D. (Br.Col.), FRCP; Paul Galbraith, B.Sc., M.D. (Man.); Juley Lavoie, M.D. (Sherbrooke); Chantal LeGer, B.Sc. (McG.), M.D. (Ott.); Tanya Petraszko, M.D. (W.Ont.); Kevin Song, B.Eng., M.D.C.M. (McG.); Gayatri Sreenivasan, M.D. (Br.Col.); Peter W. Tsang, M.D. (W.Ont.); Leslie Zypchen, B.Sc., M.Sc. (Qu.), M.D. (Ott.), FRCP.

ASSOCIATE MEMBERS

Robert Coupland, Pathology and Laboratory Medicine; Connie J. Eaves, Medical Genetics; Douglas E. Horsman, Pathology and Laboratory Medicine; Sheldon C. Naiman, Pathology and Laboratory Medicine.

Division of Infectious Diseases

Neil Reiner, Head

PROFESSORS

William R. Bowie, B.Sc. Med., M.D. (Manit.), FRCP; Robert Brunham, M.D. (Br.Col.); Anthony W. Chow, M.D. (Manit.), FRCP, FACP; Julio Montaner, M.D. (Buenos Aires), M.C.C.E.E., L.M.C.C., FRCP; Neil E. Reiner, A.B. (Oberlin), M.D. (Case W. Reserve), FRCP, FACP; Grant H. Stiver, B.Sc. (Med.), M.D. (Manit.), FRCP.

ASSOCIATE PROFESSORS

Yossef Av-Gay, Ph.D. (Tel Aviv); Elizabeth Phillips, B.Sc., M.D. (Alta.), FRCP; Mark Tyndall, M.D. (Ont.).

ASSISTANT PROFESSORS

Artem Cherkasov, Ph.D. (Russia); Michael Grigg, Ph.D.; Marie de Haan, M.B., Ch.B. (Cape T.), FRCP; Zakaria Hmama, Ph.D. (Calif.); Theodore Steiner, M.D. (Duke).

CLINICAL PROFESSORS

David R. Burdige, B.Sc., M.D. (Br.Col.), FRCP; Robert M. T. Chan, M.D. (Manit.), FRCP, FACP; Peter Phillips, M.D. (Tor.); Michael L. Rekart, M.D. (Ohio).

CLINICAL ASSISTANT PROFESSORS

Paul Harrigan, Ph.D. (Br.Col.), M.Sc., B.Sc. (Hons.); Thomas Kerr, M.A., Ph.D. (Vic.B.C.); Valentina C. Montessori, M.D. (Br.Col.), LMCC, FRCP; David Moore, B.Sc., M.H.Sc. (Br.Col.), M.D.C.M. (McG.);

Natasha Press, B.Sc., M.D. (Tor.); Evan Wood, B.Sc. (Vict.), Ph.D. (Br. Col.)

CLINICAL INSTRUCTORS

Yazdan Mirzanejad, M.D. (Tehran), FRCPC; Robert Reynolds, M.D. (Tor.).

ADJUNCT PROFESSOR

Jasbinda Sanghera, B.Sc., (Lond.), Ph.D. (Br.Col.).

ASSOCIATE MEMBERS

Judith Isaac-Renton, Pathology and Laboratory Medicine; Peter J. Jewesson, Pharmaceutical Sciences; Fawziah Marra, Pharmaceutical Sciences; Robert McMaster, Medical Genetics; Deborah Money, Obstetrics and Gynaecology; David Patrick, Health Care and Epidemiology.

Division of Medical Oncology

Joseph Connors, (Acting Head)

HONORARY PROFESSOR

Nicholas Bruchoovsky, M.D., Ph.D. (Tor.), FRCPC.

ASSISTANT PROFESSOR

Kim Chi, M.D. (Ott.); Stephen Chia, B.Sc., M.D. (Br.Col.); Sharlene Gill, B.Sc., M.D. (Br.Col.), M.P.H. (Harv.), FRCPC; Kerry Savage, B.Sc., M.D. (Br.Col.)

CLINICAL PROFESSORS

Joseph N. Connors, B.S. (Trin.), M.D. (Yale), FRCPC; Karen Gelmon, B.A., M.D. (Sask.), FRCPC; Paul J. Hoskins, B.A. (Oxf.), M.B.B., CHIR. (Cantab.), M.R.C.P. (U.K.), FRCPC; Grant MacLean, B.Sc., MB ChB. (New Z.), FRACP; Robert Murray, M.D. (Sask.), FRCPC; Susan E. O'Reilly, B.Sc., B.A., M.B. (Dub.), B.Ch., B.A.O. (Wales), FRCPC; Amil M. Shah, B.Sc., M.D.C.M. (McG.), FRCPC, F.A.C.P.; Kenneth D. Swenerton, M.D. (Br.Col.), FRCPC; Brian Weinerman, M.D. (Manit.), FRCPC.

CLINICAL ASSOCIATE PROFESSORS

Christopher Coppin, M.A., D.Phil. (Oxf.); Richard J. Klasa, M.D., C.M. (McG.), FRCPC; Paul Klimo, M.D. (Comenius, Czech.); Christian Kollmannsberger, M.D. (Munich); Kevin Murphy, B.Sc., M.D.C.M. (McG.); Kenneth S. Wilson, M.B. FRCP (Edin.), FACP, FRCPC.

CLINICAL ASSISTANT PROFESSORS

Sharon J. Allan, M.D. (Alta.); Helen Anderson, M.B.Ch.B. (Auck.), M.D. (Lond.), FRCPC; Vanessa Bernstein, M.D. (Br.Col.), M.Sc. (Harv.), FRCPC; Cicely J. Bryce, M.D., (Br.Col.), FRCPC; Susan Ellard, B.Sc., M.D. (Tor.); Karamjit Gill, B.Sc., M.D., (ont.); Kong Khoo, B.Sc., M.D. (McM.), FRCPC; Margaret Knowling, B.M.Sc., M.D. (Nfld.), FRCPC; Janessa Laskin, B.Sc. (McG.), M.D. (Br.Col.), FRCPC; Ursula J. Lee, M.D. (Br.Col.); Caroline Lohrlich, B.Sc. (Hons.), M.D. (W.Ont.), FRCPC; Nicol MacPherson, (Hons.) B.Sc., M.D., Ph.D. (Qu.); Barbara Melosky, M.D. (Manit.), FRCPC; R. Michael Noble, B.Sc. (Br.Col.), M.D. (Harv.), A.B.I.M., FRCPC; Brian Norris, B.Sc., M.D. (Ott.), FRCPC; Ravinder P. Sawhney, MBBS (Kashmir); Laurie Sehn, M.D. (McG.); Tamara Shenkier, D.E.C., M.D.C.M. (McG.); David Stuart, S.B., S.M. (M.I.T.), M.D. (Stan.), FRCPC; Marianne Taylor, B.Sc., M.D. (W.Ont.).

CLINICAL PROFESSORS EMERITI

James H. Goldie, M.D. (Tor.); David J. Klaassen, B.A., M.D. (Sask.); Ian Plenderleith, M.D. (Wash.); Hulbert Silver, M.D., Ph.D. (McG.).

CLINICAL INSTRUCTORS

Elaine Bouttell, M.D. (W.Ont.); David Fenton, Hon B.Sc., M.D. (Ont.); Catherine A. Fitzgerald, M.D. (Alta.); Christopher Lee, B.Sc., M.D. (Dal.); Mary MacNeil, M.D. (Dal.); Lee Ann Martin, B.Sc., M.A., M.D. (W.Ont.); Heidi Martins, M.B.Ch.B. (Witw.); Barbara Melosky, B.Sc., M.D. (Manit.); Sheila Souliere, M.D. (Tor.), FRCPC; Judith Sutherland, B.Sc., M.Sc., M.D. (Alta.).

ASSOCIATE MEMBERS

Victor Ling, Pathology and Laboratory Medicine.

Division of Nephrology

Paul Keown, Head

PROFESSORS EMERITI

Eugene C. Cameron, M.D. (Br.Col.), FRCPC; John D.E. Price, M.D.C.M. (McG.); Roger Sutton, M.A., D.M. (Oxf.).

PROFESSORS

Paul A. Keown, M.B., Ch.B. (Manc.), FRCPC, FRCP, FACA, MRCP (U.K.); Gary A. Quamme, B.Sc., D.V.M. (Sask.), M.Sc. (Ott.), Ph.D. (McG.); Norman L. Wong, B.Sc. (Sir George Williams), M.Sc., Ph.D. (McG.).

ASSISTANT PROFESSOR

John Gill, B.Sc., M.D. (Br.Col.), M.Sc. (Tufts).

CLINICAL PROFESSOR EMERITUS

Angus Rae, M.B., B.S., M.R.C.P., M.R.C.P. (Ed.) (Lond.), F.A.C.P., F.R.C.P.(C).

CLINICAL PROFESSORS

Clifford Chan-Yan, M.B., Ch.B. (Cape T.), FRCPC, F.C.P. (S.Africa); Adeera Levin, B.Sc., M.D. (Tor.), FRCPC; Ronald Werb, M.B., Ch.B. (Cape T.), M.R.C.P. (U.K.), FRCPC.

CLINICAL ASSOCIATE PROFESSORS

Victor R. Chan, M.B. (H.K.); David Landsberg, M.D. (Tor.), FRCPC; R. Jean Shapiro, B.A., B.Sc., M.D., C.M. (McG.), FRCPC; Paul Taylor, B.Sc., M.B., B.S. (Lond.), FRCPC; Choi Kit Yeung, M.B., B.S., M.D. (H.K.), FRCPC, FRACP.

CLINICAL ASSISTANT PROFESSORS

Aaron Cass, B.Sc. (McG.), M.D. (Ott.); Anthony Chiu, B.Sc., M.D. (Alta.); Michael Copland, M.D. (Br.Col.), FRCPC; Gerald da Roza, B.Sc., M.D., M.H.Sc. (Br.Col.); John A. Duncan, M.D. (Ott.); Jacek Jastrzebski, M.D. (Warsaw); Mercedes Kiaii, M.D. (Br.Col.); Linda De Luca, M.D. (McM.); Rajinder Singh, M.Ed., B.Sc., M.D. (McG.), FRCPC.

CLINICAL INSTRUCTORS

Abeed Jamal, B.Sc. (UBC), MDCM (McG.); Beverly Jung, B.Sc., M.D. (Br.Col.).

Division of Neurology

Howard Feldman, Head

PROFESSORS EMERITI

Donald B. Calne, B.A., B.Sc., M.A., B.M., B.Ch., D.M. (Oxf.); Andrew Eisen, M.R.C.S., L.R.C.P., L.M.C.C. (U.K.); Seung U. Kim, M.D. (Korea), Ph.D. (Japan); Brian Pate, B.Sc., M.Sc., (Lond.), Ph.D. (McG.); Vincent Sweeney, M.B., Ch.B. (Glasgow).

PROFESSORS

Jason Barton, B.Sc., M.D. (Br.Col.); Neil Cashman, B.A. (Bowdoin), M.D. (Mass.); Doris Doudet, B.S., Ph.D. (Bordeaux); Howard Feldman, D.C.S., M.D., C.M. (McG.), FRCPC; Joel Oger, B.A., M.D. (Rennes), FRCPC; Steven Pelech, B.Sc., Ph.D. (Br.Col.); A Jonathan Stoessl, M.D. (W.Ont.), FRCPC; Joseph Tsui, M.B., B.S. (H.K.), MRCA (U.K.), FRCPC; Yu Tian Wang, M.D. (Shandong).

ASSOCIATE PROFESSOR

Armin Curt, M.D. (Cologne); Lorne F. Kastrukoff, B.Sc., M.D. (Br.Col.), FRCPC; Martin McKeown, M.D. (Tor.).

ASSISTANT PROFESSORS

Neil Cashman, B.A. (Bowdoin), M.D. (Mass.); Ging-Yuek Hsiung, B.Sc., M.H. Sc. (Br.Col.), M.D. (Qu.); Chong Sik Lee, M.D. (Seoul), FRCPC; Sian Spacey, M.B.B.S. (Lond.); Helen Tremlett, B.Sc.(Bath), Ph.D. (Wales).

CLINICAL PROFESSOR

Stanley Hashimoto, M.D. (Alta.).

CLINICAL PROFESSORS EMERITI

Andre R. Anzarut, M.D. (Paris); Paul J. A. Bratty, M.D. (Tor.).

CLINICAL ASSOCIATE PROFESSORS

Jeff H. Beckman, M.D. (W.Ont.), FRCPC; John P. Hooge, M.D. (Sask.), FRCPC; Manouchehr Javidan, M.D. (Iran); Michael W. Jones, M.D. (Br.Col.), FRCPC; Robert D. Keyes, B.Sc., M.D. (Br.Col.), FRCPC; Charles Krieger, M.D., (Tor.), Ph.D. (Lond.), FRCPC; R. Gordon Robinson, B.Sc., M.D. (Br.Col.), FRCPC.

CLINICAL ASSOCIATE PROFESSOR

EMERITUS

David Jones, M.D. (Liv.).

CLINICAL ASSISTANT PROFESSORS

Hector Baillie, BSc.(HONS), MSc., MB ChB, (Glas.) FRCPC; Hannah Briemberg; Stephen D. Clarke, M.D. (Br.Col.), FRCPC; Dean Foti, M.D.C.M. (McG.); Gillian Gibson, B.Sc., M.D. (Calg.), FRCPC; Dean Johnston, B.Sc., M.D. (Br.Col.), M.H.S.C. (Duke), FRCPC; Jeffrey Martzke, M.A., Ph.D. (Lowa); Michelle Mezei, M.D.C.M. (McG.), FRCPC; Alister Prout, M.B., Ch.B. (Cape T.), FRCPC; Phillip Teal, B.M.E.Sc., M.D. (Alta.), FRCPC; Brian Thiessen, M.D. (Sask.); Anthony Troulosee, B.Sc. (McG.), B.Sc., M.D. (Dal.), FRCPC; Andrew Woolfenden, B.Sc., M.D. (Alta.), FRCPC.

CLINICAL INSTRUCTORS

Christopher Bozek, M.D. (Tor.); Kristine Chapman, B.Sc., M.D. (Br.Col.); Anthony D. Costantino, M.D. (Dal.) FRCPC; Virginia Devonshire, M.D. (Calg.), FRCPC; Bradley Hallam, Ph.D. (Fuller); Colleen Murphy, B.A., B.Sc., M.D. (Br.Col.); Penelope Smyth, B.Sc. (S.Fraser), M.D. (Alta.), FRCPC; Charles Tai, M.D. (Alta.); Barry Tessler, B.S., M.D. (Manit.), FRCPC; Michael Varelas, M.D. (Br.Col.), FRCPC.

ADJUNCT PROFESSORS

Daniel Bub, Ph.D. (Roch.); Thomas Ruth, Ph.D. (Clark); Vesna Sossi, M.D. (Br.Col.).

ASSOCIATE MEMBERS

Duncan Anderson, Ophthalmology; Susan Forwell, School of Rehabilitation Sciences; Douglas Graeb, Radiology; Trevor Hurwitz, Psychiatry; Blair Leavitt, Medical Genetics; David Li, Radiology; G. R. Wayne Moore, Pathology and Laboratory Medicine; Lynn Raymond, Psychiatry; Adele Dessa Sadovnick, Medical Genetics; Robert Stowe, Psychiatry.

Division of Physical Medicine and Rehabilitation

Theo Van Rijn, Head

ADJUNCT PROFESSORS

Lyle E. Gross, B.Sc., M.Sc., M.D. (Alta.), FRCPC.

PROFESSOR EMERITUS

Duncan Murray, M.D. (Doul.).

CLINICAL ASSOCIATE PROFESSORS

Hugh Anton, M.D. (Calg.), FRCPC; George Hahn, M.D. (Br.Col.), FRCPC; Wolfgang Schamberger, M.D. (Br.Col.), FRCPC; Andrew Travlos, M.B., B.Ch. (Witw.), FRCPC.

CLINICAL ASSISTANT PROFESSORS

Rida Baruni, M.B.B.Ch. (Tripoli); Pankaj Dhawan, M.B.B.S. (Gujarat); Gabriel Hirsch, M.D., (Hamburg), FRCPC; Susan Jung, M.D. (Chile), FRCPC; Peter Mortifee, M.D. (Br.Col.); Theo Van Rijn, B.Sc., M.D. (Tor.), FRCPC; Andrea Townson, M.D. (Qu.); Michael Vondette, M.D. (Dal.), FRCPC; Claire Weeks, B.Sc. (C.C.N.Y.), Ph.D. (Duke), M.D. (Dal.), FRCPC.

CLINICAL INSTRUCTORS

Mark Adrian, M.D. (Manit.); Mark Crossman; Andrew Dawson, B.Sc., M.D. (Br.Col.); Barbara Hughes, B.Sc., M.D., M.H.Sc. (Br.Col.), FRCPC; David Koo, M.D. (Calg.); Herman Lau, M.D.

(Manit.); Russell O'Connor; Nittin Reebye, M.B.B.S (Bom.), FRCPC; Heather Underwood, M.D. (McM.); Elliot Weiss, M.D. (Tor.), Ex. M.B.A. (Halifax); Rhonda Willms, B.Sc. (S.Fraser), M.D. (Br.Col.), FRCPC; Jennifer Yao, B.Sc. (Hons.), M.D. (Br.Col.), FRCPC.

CLINICAL ASSOCIATE PROFESSOR

EMERITUS
Alexander Pinkerton, M.B., Ch.B. (Glas.).

CLINICAL PROFESSOR EMERITUS
Cecil E. G. Robinson, M.D.C.M. (McG.).

HONORARY PROFESSOR

Paul E. Kaplan, M.D. (Calif., L.A.).

ASSOCIATE MEMBER

Janice Eng, School of Rehabilitation Sciences; William Miller, School of Rehabilitation Sciences; Annalee Yassi, HCEP.

Division of Respiratory Medicine

Paul S.F. Man, (Acting Head)

PROFESSORS EMERITI

Raja T. Abboud, M.D. (Beruit), FRCPC; David Bates; Moira Mo-Wah Yeung, M.B.B.S. (H.K.), M.R.C.P. (Lond.; Edin.), FRCPC, F.A.C.P.

PROFESSORS

Tony Bai, M.B., M.D. (Otago), M.R.C.P. (U.K.), F.R.A.C.P., FRCPC; Vincent Duronio, B.Sc. (Windsor), Ph.D. (W.Ont.); Mark Fitzgerald, M.B.B.C.H. (Dub.), M.R.C.P.(I), FRCPC; John A. Fleetham, M.B., B.S. (Lond.), M.R.C.S., L.R.C.P. (U.K.), FRCPC; Stephen Lam, B.Sc., M.D. (Tor.), FRCPC; Paul S.F. Man, B.Sc., M.D. (Alta.); David Ostrow, B.Sc, M.D. (Manit.), FRCPC, M.A. (Mich.); Peter Paré, M.D. (McG.), FRCPS; Jeremy Road, B.Sc., M.D. (Sask.), FRCPC, LMCC.

ASSOCIATE PROFESSORS

Nasreen Khalil, B.Sc., M.D. (Nfld.); Robert Levy, M.D.C.M. (McG.), FRCPC; C. Frank Ryan, M.B., B.Ch., B.A.O. (N.U.I., Galway), FRCPI, FRCPC, FCCP; Donald Sin, B.Sc., M.D. (Alta.), Master's (Harv.); Stephanus F. Van Eden, M.D. (Stell.); Helen Dimich Ward, B.Sc., M.Sc., Ph.D., (Br.Col.); Pearce G. Wilcox, M.D. (Qu.), FRCPC.

ASSISTANT PROFESSORS

Najib Ayas, M.D. (Atlanta); Victoria Cook; Andrew Sandford, Ph.D. (Oxf.); Scott Tebbutt, B.A. (Oxf.), Ph.D. (E.Anglia).

CLINICAL PROFESSORS

Paul Champion, M.B.B.S. (Lond.), M.R.C.S., L.R.C.P. (Eng.), Ph.D. (Ley.), FRCPC; Nasreen Khalil, B.Sc., M.D. (Nfld.); Lindsay Lawson, B.Sc. (Vic.B.C.), M.D., C.M., M.Sc. (McG.), FRCPC.

CLINICAL ASSOCIATE PROFESSORS

Richard K. Elwood, M.B., B.Ch., (Dub.), M.R.C.P. (U.K.), FRCPC; Barbara E.M. Nakielna, M.B., Ch.B. (Liv.), M.R.C.P. (U.K.), FRCPC.

CLINICAL ASSISTANT PROFESSORS

Richard Cohen, M.B.Ch.B. (Cape T.), FRCPC; Tharwat Fera, M.B., Ch.B. (Cairo), M.D. (Athens), EEMCC, LMCC, FRCPC, ABIM; Mark Turner, M.D. (McG.), FRCPC.

CLINICAL INSTRUCTOR

Jennifer Wilson, M.D. (McM.).

CLINICAL PROFESSOR EMERITUS

Edward A. Allen, M.D.(S.Africa), M.B., Ch.B., FACCPC, FRCPC.

HONORARY PROFESSORS

Morley Lertzman, M.D. (Manit.); Wan Tan-Hogg.

ASSOCIATE MEMBERS

Michael Brauer, School of Occupational and Environmental Hygiene; Alan Lowe, Dentistry; Nester Muller,

Radiology; Clive Roberts, Oral Biological and Medical Sciences.

Division of Rheumatology

John Esdaile, Head

PROFESSOR EMERITUS

Denys K. Ford.

PROFESSOR

Andrew Chalmers, B.Sc. (Cape T.), M.D. (Br.Col.), FRCPC; John Esdaile, M.D. (McG.), MPH (Yale), FRCPC.

ASSOCIATE PROFESSORS

Hyon Choi, M.D. (Seoul), M.P.H., D.P.H. (Harv.).

ASSISTANT PROFESSOR

Jolanda Cibere, M.D. (Sask.), Ph.D. (Br.Col.), FRCPC; Diane Lacaille, M.D. (McG.).

CLINICAL PROFESSORS EMERITI

Harold Robinson, M.D.C.M. (McG.); Ian Tsang, M.B. (Brandon).

CLINICAL PROFESSORS

Kenneth Blocka, M.D. (Sask.), FRCPC; Barry Koehler, M.D. (Tor.), FRCPC.

CLINICAL ASSOCIATE PROFESSORS

Simon H. K. Huang, M.D. (Sask.), FRCPC; Alice V. Klinkhoff, B.A. (McG.), M.D., C.M. (McG.), FRCPC; Robert Offer, M.D. (Br.Col.), FRCPC; A. Caroline Patterson, M.B., Ch.B. (Manc.), FRCP (Lond.), FRCPC; Graham D. Reid, M.B., Ch.B. (Aberd.), FRCPC; Kam Shojania, B.Sc., M.D. (Br.Col.); John P. Wade, M.D. (Br.Col.), FRCPC.

CLINICAL ASSISTANT PROFESSORS

Maziar Badii, B.Sc., M.D. (Br.Col.), FRCPC; Stephanie Ensworth, B.Sc. (Pharm.), M.D. (Br.Col.), FRCPC; John T. Kelsall, M.D. (McG.); Rhonda Shuckett, M.D. (Manit.), FRCPC.

HONORARY PROFESSOR

Howard Stein, M.D. (Tor.).

CLINICAL INSTRUCTORS

Stanley Fenton, M.B., B.Ch., B.A.O. (Belf.), FRCPC; Jean Gillies, M.D. (Br.Col.), FRCPC; John R. Watterson, M.D. (Br.Col.).

ASSOCIATE MEMBER

Jacek Kopce, HCEP.

DEPARTMENT OF OBSTETRICS AND GYNAECOLOGY

Robert M. Liston, Head

Professors Emeriti

Frederick E. Bryans, B.Sc., M.D. (Tor.), FRCSC, FRCOG; Sidney Effer, M.D. (Tor.), FRCPC; Victor Gomel, M.D. (Istanbul), FRCSC; Young S. Moon, M.V.M., D.V.M. (Seoul), M.Sc., Ph.D. (Guelph); Patrick J. Taylor, M.D. (Belf.), FRCSC.

Professors

John L. Benedet, M.D. (Br.Col.), FRCSC; Geoffrey L. Hammond, B.Sc., M.Sc. (Leeds), Ph.D. (Oulu); C.-Y. Gregory Lee, B.Sc. (Taiwan), M.Sc., Ph.D. (Cal. Tech.); Peter C. K. Leung, B.Sc., M.Sc. (Br.Col.), Ph.D. (W.Ont.); Peter F. McComb, M.B., B.S. (W. Aust.), M.R.C.O.G. (Lond.), FRCSC; Danny W. Rurak, B.Sc., M.Sc. (Br.Col.), Ph.D. (Oxon.); Basil Ho Yuen, M.B., Ch.B. (Cape T.), FRCSC.

Associate Professors

Duncan F. Farquharson, M.D. (Tor.), FRCSC; Robert M. Liston, M.B., Ch.B. (St.And.), FRCSC; Colin MacCalman, B.Sc., M.Sc., Ph.D. (McG.); Dianne Miller, M.D. (Br.Col.), FRCSC; Deborah Money, B.Sc., M.D. (Br.Col.), FRCSC; Timothy C. Rowe, M.B., B.S. (Adel.), M.R.C.O.G. (Dal.), FRCSC; M. Amanda

Skoll, M.D. (Sask.), FRCSC; Peter Von Dadelsen, M.D. (Otago), FRCSC.

Assistant Professors

Lori A. Brotto, B.Sc., M.Sc., Ph.D. (Br.Col.); Anthony P. Cheung, M.B.B.S., M.P.H. (Aust.), MRACOG, FRACOG, FRCSC; Kyung-Chul Choi, D.V.M. (Seoul), Ph.D. (Br.Col.); Leanne S. Dahlgren, M.D. (Sask.), FRCSC; Thomas G. Ehlen, M.Sc., M.D. (Germany), FRCSC; Mark S. Heywood, M.B., Ch.B. (Dund.), FRCSC; Sai Ma, B.Sc., M.Sc., Ph.D. (Br.Col.); Leslie Sadownik, M.D. (Alta.), FRCSC.

Clinical Professors

Margo R. Fluker, M.D. (Alta.), FRCSC; Vera M. Frinton, M.D. (Br.Col.), FRCSC; Gerald Marquette, M.D. (Montr.), FRCSC; Thomas R. Martin, M.B. (Durh.), FRCSC; Barry H. Sanders, M.D. (McM.), FRCSC; Dorothy Shaw, M.B., Ch.B. (Edin.), FRCSC.

Clinical Associate Professors

Catherine Allaire, M.D. (Queb.), FRCSC; Jan E. Christilaw, B.Sc. (Wat.), M.D. (McM.), FRCSC; Jonathan L. Cope, B.A. (Cantab.), M.B. (Lond.), FRCSC; Jerome Dansereau, M.D. (Montr.), FRCSC; Alain Gagnon, M.D. (Sherbrooke), FRCSC; Matthew M. Garrey, M.B., B.Ch. (Alta.), FRCSC; Glenn H. Gill, M.D. (Dal.), FRCSC; Yamuna Kalyanpur, M.B., B.S. (India), M.R.C.O.G., FRCSC; Lorena J. Kanke, M.D. (Br.Col.), FRCSC; Nancy Kent, M.D. (W.Ont.), FRCSC; Gary E. J. Kinney, B.Sc. (McM.), M.D. (W.Ont.), FRCSC; Kenneth Lim, M.D. (Br.Col.), FRCSC; Vincent C. Scali, M.D. (McG.), FRCSC; Lynn Simpson, M.D. (W.Ont.), FRCSC; Waldemar G. Unger, M.D. (Br.Col.), FRCSC; David H. L. Wilkie, M.D. (Br.Col.), FRCSC.

Clinical Assistant Professors

Dena Bloomenthal, B.Sc. (Vict.), M.D. (Alta.), FRCSC; Marie-France Delisle, M.D. (Laval), FRCSC; Ellen M. Giesbrecht, M.D. (Calg.), FRCSC; Madhu Gupta, M.B. (Kanpur), FRCSC; Stephen Hudson, M.B., Ch.B. (Cape T.), FRCSC; Alan P. Hunt, M.D. (Johannesburg), FRCSC; Elisabet A.E. Joa, B.Sc., M.D. (Br.Col.), FRCSC; Sayrin Lalji, M.D. (Br.Col.), FRCSC; J. David Mathews, M.D. (W.Ont.), FRCSC; Elissa J. McMurttrie, M.D. (Br.Col.), FRCSC; Debra Millar, B.Sc., M.D. (Br.Col.); Nancy L. Mitenko, B.Sc., M.D. (Calg.), FRCSC; Caroline P. Mueller, M.D. (Alta.), FRCSC; Sheila M. Pride, M.D. (Dal.), FRCSC; Jacqueline Purcell, M.D. (Br.Col.), FRCSC; Shirley A. Reimer, M.D. (Ott.), FRCSC; Mark I. Rosengarten, M.B., B.Ch. (Johannesburg), FRCSC; Valerie Rychel, M.D. (McG.), FRCSC; Jacquelynn Schouls, M.D. (Alta.), FRCSC; Petra Selke, M.D. (Br.Col.), FRCSC; Dale Steele, M.D. (N.S.), FRCSC; Julianne E. Stone, M.D. (Dal.), FRCSC; Francine Tessier, M.D. (Queb.), FRCSC; Sydney Thomson, M.D. (Br.Col.), FRCSC; Dorothy C. Tier, R.N.; John Turner, M.B.B.S. (Lond.), FRCSC; Christina Williams, M.D. (Barcelona), FRCSC; Henry Woo, M.D. (W.Ont.), FRCSC.

Clinical Instructors

Robert Anderson, M.D. (Qu.), FRCSC; Cigdem Arkuran, M.D. (Br.Col.), FRCSC; B. Matthew Bagdan, M.D. (Alta.), FRCSC; Michelle Belanger, M.D. (Ott.), FRCSC; Peter Beresford, M.B.B.Ch. (Cape T.), FRCSC; John K. Cooper, M.D. (Memorial), FRCSC; Michael J. Cox, M.B.B.Ch. (Camb.), FRCSC; Stephanie Fisher, M.D. (Qu.), FRCSC; Brian W. Galliford, M.D. (Br.Col.), FRCSC; Harold G. Hunt, M.D. (W.Ont.), FRCSC; Gary C. Jackson, M.D. (Br.Col.), FRCSC; William G. Johnston, M.B. (Belf.), FRCSC; Stephen Kaye, M.D. (Witw.), FRCSC; William G.R. Kingston, M.B.B.Ch. (Belf.), FRCSC; Patrick J. Mitchell, M.D. (Alta.), FRCSC; David J. Quinlan, M.B., B.Ch. (Witw.), FRCSC; Nicole Racette, M.D. (Queb.), FRCSC; Stephanie A. Rhone, M.D.

(Emory), FRCSC; John G.M. Robertson, B.Sc., M.D. (Br.Col.), FRCSC; Helen J. Robson, M.D. (Man.), FRCSC; Robert P.A. Roy, M.D. (Man.), FRCSC; J. Dewaal Smith, M.B.Ch.B. (Pret.), FCOG; D. Keith Still, M.D. (Alta.), FRCSC; Jagdeep Ubhi, M.D. (Sask.), FRCSC; Douglas Waterman, M.D. (Alta.), FRCSC.

Honorary Professors

Nelly Auersperg, M.D., Ph.D. (Br.Col.); Anthony Perks, B.Sc., Ph.D. (St.And.), FRSM.

Adjunct Professor

Mary Stephenson, B.Sc., M.D., M.Sc. (Br.Col.), FRCSC.

Associate Members

Virginia Baldwin, Pathology and Laboratory Medicine; Penny J. Ballem, Medicine; Philip B. Clement, Pathology and Laboratory Medicine; Peter Cooperberg, Radiology; M. J. Douglas, Anesthesia; Joanne T. Emerman, Anatomy; Susan Harris, Family Practice; Paul Hoskins, Medicine; Sheila M. Innis, Pediatrics; Shaila Misri, Psychiatry; Margaret R. Pendra, Pediatrics; R. Rajamahendran, Animal Science; Kenneth D. Swenerton, Medicine; F. L. Wong, Surgery.

DEPARTMENT OF OPHTHALMOLOGY AND VISUAL SCIENCES

Frederick S. Mikelberg, Head

Professors

Jason Barton, M.D. (Br.Col.), Ph.D. (Tor.), FRCPC, (Joint appointment with Neurology); Max S. Cynader, B.Sc. (McG.), Ph.D. (M.I.T.), FRSC, Director Brain and Spinal Cord Research Centre; Christopher J. Lyons, M.D., M.B.B.S. (Engl.), FRCSC, Director, Postgraduate Training; Frederick S. Mikelberg, B.Sc., M.D., C.M. (Montr.), FRCSC; Robert Molday, B.Sc. (P.A.), M.Sc. (D.C.), Ph.D. (P.A.) (Joint appointment with Biochemistry); Jack Rootman, M.D. (Alta.), FRCSC; Christopher Shaw, B.Sc. (Calif.), M.Sc., Ph.D. (Hebrew); Nicholas Swindale, B.A. (Cantab.), D.Phil. (Suss.), M.A. (Cantab.).

Associate Professors

Duncan P. Anderson, M.D. (Queb.), FRCSC; Robert M. Douglas, B.A. (Qu.), M.A., Ph.D. (Dal.); Deborah E. Giaschi, B.Sc., Ph.D., M.A. (Ont.); Christopher J. Lyons, M.D., M.B.B.S. (Engl.), FRCSC, Director, Postgraduate Training; David Maberley, M.Sc. (Ont.), M.D. (Br.Col.); Joanne A. Matsubara, B.A. (Col.), Ph.D. (Calif., San Diego); Valerie A. White, B.Sc., M.D. (Nfld.), FRCPC (Joint Appointment with Department of Pathology and Laboratory Medicine).

Assistant Professors

Orson Moritz, Ph.D. (Br.Col.); Pierre Zakaruskas, B.Sc. (Queb.), Ph.D. (Br.Col.).

Clinical Professors

Frank Buffam, B.Sc., M.D., C.M. (McG.), FRCSC; Jean D. A. Carruthers, M.D. (Br.Col.), F.R.C.S. (Eng.), FRCSC; Helson C. Chew, M.D. (Taiwan), FRCSC, Clinical Professor Emeritus of Ophthalmology (2003); Thomas A. Demco, B.A. (Wash.), M.D. (Br.Col.), FRCSC; Peter J. Dolman, M.D. (Br.Col.), FRCSC; Paul J. Dubord, B.Sc., M.D. (Alta.), FRCSC; Simon P. Holland, M.B., Ch.B. (Z'bw.), FRCSC; Raymond H. Hollands, M.D. (W.Ont.), FRCSC; Alan L. Maberley, B.Sc., M.D. (Alta.), FRCSC; David F. Rollins, B.Sc., M.D. (Br.Col.), FRCSC; William H. Ross, B.A. (McG.), M.D. (W.Ont.), FRCSC, CS (P.Q.); Stuart W. Smith, M.D. (Br.Col.), FRCSC.

Clinical Associate Professors

Sueda Akkor, M.D. (Turkey), FRCSC; Craig W. Beattie, B.Sc., M.D. (Manit.), FRCSC; Jeffrey A. Blicher, M.D. (Br.Col.), FRCSC; Samuel J. Broome, M.B., Ch.B. (Otago), FRCSC; Roy A. Cline, M.D. (Sask.), FRCSC; Thomas A. Demco, B.A. (Wash.), M.D. (Br.Col.), FRCSC; Michael J. Dobrogowski, M.D. (Br.Col.), FRCSC; Carl V. Jones, B.M., B.Ch., FRCSC; Francis C. H. Law, M.D., (Br.Col.), FRCSC; Janette I. Lindley, B.Sc., M.D. (Nfld.), FRCSC; Patrick E. Ma, M.D. (Alta.), FRCSC; Perry H. Maerov, B.A., M.D. (Alta.), FRCSC; David R. Mallek, M.D. (Br.Col.), FRCSC; Martin McCarthy, B.Sc. (Br.Col.), M.D. (Alta.); Malcolm J. McLean, M.D. (Br.Col.), FRCSC; Peter A. Nash, B.A., M.D. (Alta.); Katherine E. Paton, M.D. (W.Ont.), FRCSC, ABO; Sidney F. J. Pilley, M.B., B.S. (Lond.), D.O. (Eng.), FRCS (Eng.); Michael J. Potter, B.Sc. (Mass.), M.D. (M.O.), Arthur W. Pratt, B.Sc., M.D., C.M. (McG.), D.A.B.O., FRCSC; Matthew Russell, M.B. Ch.B., FRANZCO; Patrick P. Saunders, BSc (Br.Col.), MDCM (McG.), FRCSC; Hugo F. S. Sutton, M.B., B.S. (Eng.), M.R.C.S. (Eng.), A.K.C. (Lond.), FRCSC; Kevin Wade, B.Sc. (Dal.), M.D. (Queb.); Simon J. Warner, B.Sc. (W.Ont.), M.D. (Calg.), FRCSC.

Clinical Assistant Professors

Michael Berman, M.B., Ch.B. (S.Africa), FRCSC; David M. Butler, M.D. (Halifax), FRCSC; Lydia M. Chen, B.Sc., M.Sc., M.D. (Br.Col.), FRCSC; Margo Clarke, B.Sc., M.D., FRCSC (N.S.); Hardy Dhaliwal, B.Sc., M.D. (Manit.); Murray Erasmus, MB Ch B (SA); Pierre Faber, B.Sc. (McG.), M.B.B.S. (Aust.); Jane Gardiner, B.Sc., M.D. (Nfld.); Derek V. Godinho, M.D. (Br.Col.), FRCSC; Ian Hass, M.B., Ch.B. (Otago), C.A.B.O., C.R.C.S.(C); Gregory John Hay, M.D. (Ont.), FRCSC; Ross A. Kennedy, M.D., C.M. (McG.); P. John Konkal, M.D. (Manit.), C.R.C.S.(C), FRCSC; David T.-C. Lin, M.D. (McG.), FRCSC; D. M. McFadden, M.D. (Alta.), FRCSC; Megan Rees, M.D. (Sask.), FRCSC, D.A.B.O.; Matthew Russell, M.B., Ch.B., FRCSC; Suren Sanmugasunderam, B.Sc., M.D. (W.Ont.); Robert Schertzer, B.Sc. (Queb.), M.D. (Dal.), FRCSC; C. Peter Stockkill, B.Sc. (Vic.B.C.), M.D. (Br.Col.), FRCSC; Susan M. A. Wallace, M.D. (Tor.).

Clinical Instructors

Dhar Dhand, B.Sc. (Br.Col.), M.D. (Ont.); David Fine, B.Sc. (Qu.), M.D. (Br.Col.), M.P.H., FRCSC; Ari Gilgison, B.Sc., M.D. (Br.Col.), FRCSC; David A. Heinrichs, M.D. (Br.Col.), M.Sc., FRCSC; Norman H. Hwang, B.Sc., M.D. (Sask.), CCFP, FRCSC; R. B. Khandekar, M.B.B.S., DOMS (India); Simon Lam, B.Sc. MBBS (U.K.), FRCSC; Junica Lin, F.C.L.S.A.; J. M. MacIntosh, M.D. (W.Ont.), FRCSC; David E. Nelson, M.D. (Br.Col.), FRCSC, C.S.P.Q. (Queb.); Hugh Parsons, B.Sc., M.D. (N.S.), FRCSC; Marian T. Roesch, M.D. (Sask.) FRCSC; Stan Shortt, B.Sc., M.D. (Alta.); Kathleen Sullivan, B.Sc., M.D., FRCSC (Br.Col.); Aron M. Tischler, B.Sc., M.D. (Br.Col.), FRCSC; Diane Walker, M.D. (W.Ont.), FRCSC; Anthony Wong, M.D. (Tor.), FRCSC.

Associate Members

Kenneth Bassett, Family Practice; A. R. Buckley, Radiology; Peter Cooperberg, Radiology; Richard Gallagher, Health Care and Epidemiology; Weiguo Jia, Neurosurgery; Jocelyn Lapointe, Radiology; Robert A. Nugent, Radiology; Michael Schulzer, Statistics; Francis Tufaro, Microbiology and Immunology.

Research Associates

Jean Cui, M.D. (P.R. China); Ljubomir Kojic, Shiv Prasad, B.Sc. (Guyana), Ph.D. (Br.Col.).

Adjunct Clinical Assistant Professor

Susan Lewallen, M.D. (Colorado), B.Sc. (Calif.), FRCSC.

DEPARTMENT OF ORTHOPAEDICS

Clive P. Duncan, Head

Professors

Clive P. Duncan, M.B., Ch.B., B.A.O. (Natl., Ireland), M.Sc. (Br.Col.), FRCSC; Stephen J. Tredwell, M.D. (Br.Col.), FRCSC.

Associate Professors

Brian Day (part-time), M.D., Ch.B. (Manc.), M.Sc. (Br.Col.), L.R.C.P., M.R.C.P. (Lond.), F.R.C.S. (Eng.), FRCSC; Marcel F. S. Dvorak, M.D. (Ott.), FRCSC; Bassam A. Masri, B.Sc., M.D. (Br.Col.), FRCSC; Heather A. McKay, R.T., B.Sc., M.P.E. (Br.Col.), Ph.D. (Sask.); Peter J. O'Brien, M.D. (Alta.), FRCSC; Thomas R. Oxland, B.A.Sc., M.A.Sc. (Waterloo), M.Phil., Ph.D. (Yale), P.Eng.; Christopher S. Reilly, M.D. (Br.Col.), FRCSC.

Assistant Professors

Christine M. Alvarez, B.Sc. (Victoria), M.Sc. (Br.Col.); Charles G. Fisher, M.D., FRCSC; Donald S. Garbuz, M.D., C.M. (McG.), FRCSC; Nelson V. Greidanus, M.D. (Alta.), FRCSC; Pierre Guy, M.D., C.M. (McG.), MBA, FRCSC; Brian K. Kwon, M.D. (Queens), Ph.D. (Br.Col.), FRCSC; Robert G. McCormack, M.D. (Qu.), Dip.Sport.Med., FRCSC; William D. Regan, M.D., (Tor.), FRCSC; Bonita J. Sawatzky, B.P.E., M.P.E. (Br.Col.), Ph.D. (S.Fraser); Keith A. Stothers, M.D. (Br.Col.), FRCSC; David R. Wilson, B.Eng (McG.), D.Phil. (Oxon.).

Professor Emeritus

Robert W. McGraw, M.D. (Br.Col.), FRCSC.

Clinical Professors

Richard D. Beauchamp, M.D. (Br.Col.), FRCSC; H. Michael Bell, M.D. (Br.Col.), FRCSC; Piotr A. Blachut, M.D. (Tor.), FRCSC; Kenneth L. B. Brown, M.D. (Manit.), M.Sc. (McG.), FRCSC; Peter T. Gropper, M.D. (Sask.), FRCSC; Robert H. Hawkins, M.D. (Qu.), FRCSC; Richard L. Loomer, B.A. (Gustavus Adolphus), M.D. (Minn.), FRCSC; J. Patrick McConkey, M.D. (Br.Col.), FRCSC; Robert N. Meek, B.Sc., M.D. (Br.Col.), FRCSC; Michael S. Piper, M.D., M.Sc. (Br.Col.), FRCSC; Shafique P. Pirani, M.D. (Lond.), FRCSC; Peter C. Wing, M.B., Ch.B. (Edin.), M.Sc. (Br.Col.), FRCSC; William Y. Yu, M.B., B.S. (H.K.), M.Sc. (Br.Col.), FRCSC.

Clinical Associate Professors

Henry M. Broekhuysse, M.D. (Tor.), FRCSC; Iain G. Dommissie, M.B., Ch.B. (S.Africa), FRCSC; Hubert E. Hawk, B.A. (Case Western Reserve), M.D. (Dal.), M.Sc. (Br.Col.), FRCSC; Graham C. Pate, B.A.Sc. (Br.Col.), M.D. FRCSC; Donald G. Werry, M.D., FRCSC; Paul H. Wright, M.D. (W.Ont.), FRCSC.; Alastair S. E. Younger, M.B., Ch.B. (Aberd.), M.Sc., Ch.M., FRCSC.

Clinical Assistant Professors

Paul B. Bishop, M.D. (Calg.), Ph.D. (Br.Col.); Thomas J. Goetz, B.Sc. Eng., B.Sc., M.D. (Qu.), FRCSC; Andrew Hepburn, M.B., Ch.B., L.M.C.C., FRCSC; Simon G. D. Horlick, B.Sc., LMCC, M.D. (Qu.), FRCSC; Gerard M. McKenzie, M.D., FRCSC, B.Sc. (Br.Col.); Murray J. Penner, B.Sc. (Man.), M.D. (Calg.) FRCSC; Bertrand H. Perey, B.Ch., M.D. (Dal.), FRCSC; Kevin J. Wing, M.D. (Br.Col.), FRCSC.

Clinical Instructors

Christopher Bailey, B.P.E. (Ont.), M.D. (Ont.); J.F. Myles Clough, M.B., Ch.B. (Oxf.), FRCSC; Kenneth Kousaie, M.D. (Ott.); Jordan M. Leith, B.Sc. (Br.Col.), M.Sc. (Chic.), M.D. (Br.Col.), FRCSC; Randall Loch, M.D. (Manit.); Kishore Mulpuri, M.B.B.S. (India), M.S. (India); Kostas Panagiotopoulos, B.Sc. (Queens),

M.D. (Tor.); Donna Smith, B.Sc. (Br.Col.), M.D. (Br.Col.), FRCSC.

Adjunct Professors

James A. McEwen, B.A.Sc., Ph.D. (Br.Col.), P.Eng., Mem.I.E.E.E., Mem. A.A.M.I., Mem. C.M.B.E.S.; Gail M. Thornton, B.Sc., M.S.M.E., Ph.D. (Calg.), P.Eng.

Associate Members

Bernard H. Bressler, B.Sc. (Sir Geo. Williams), M.Sc., Ph.D. (Manit.); Peter A. Crompton, B.Sc. (Dal), B.Eng. (Tuns), M.Sc. (Eng.), Ph.D. (Qu.); Karim M. Khan, MBBS, B.Med.Sc., Ph.D. (Melb.); Peter Munk, B.Sc., M.D., C.M. (McG.), FRCPC.

DEPARTMENT OF PATHOLOGY AND LABORATORY MEDICINE

Richard Hegele, Head

Professors Emeriti

Roger Amy, M.D. (Dal.), FRCPC; Anne Autor, B.A. (Hons.) (Br.Col.), M.Sc. (Br.Col.) (Duke); Satyendra Banerjee, M.Sc. (Calc.), Ph.D. (McM.); William A. Black, M.B., Ch.B. (Glas.), M.R.C.Path., FRCPC; James Cullen, M.D. (Tor.); Derek J. de Sa, B.S., M.B. (India), Ph.D. (Oxon.), FRC, FRCPC; Evan Evans, B.S., M.S. (N.Y.), Ph.D. (Calif.); James A. J. Ferris, M.B., B.Ch., B.A.O., M.D. (Belf.), FFS, FRC, FPCR; Shirley Gillam, B.Sc. (Taiwan), Ph.D. (Kansas City); David F. Hardwick, M.D. (Br.Col.), FRCPC, F.C.A.P.; James C. Hogg, M.D. (Manit.), M.Sc., Ph.D. (McG.), FRCPC, F.R.S.C.; James B. Hudson, M.Sc. (Lond.), Ph.D. (Alta.); Dagmar Kalousek, M.D. (Czech.), FRCPC; Sheldon C. Naiman, M.D. (Tor.), FRCPC; Frederick J. Roberts, B.A., M.D. (Sask.), FRCPC; Kenneth C. H. Suen, M.B., B.S. (H.K.), D.A.B.P., FRCPC; Aubrey Tingle, M.D. (Alta.), Ph.D. (McG.), FRCPC; Juergen Vielkind, B.Sc., M.Sc., Ph.D. (Germany).

Professors

Michael Allard, B.Sc., MD (Br.Col.), FRCPC; Samuel Aparicio, B.A. (Camb.), BN B.Ch. (Oxf.), Ph.D. (Camb.), MA (Camb.); Donald E. Brooks, B.Sc., M.Sc. (Br.Col.), Ph.D. (Oregon); Elizabeth Bryce, B.Sc., (Regina), M.D., Ph.D., (Sask.), FRCPC; Andrew M. Churg, A.B. (Col.), M.D., Ph.D. (Chic.); Nevio Cimolai, B.Sc., M.D. (Alta.), FRCPC; Philip B. Clement, M.D. (Br.Col.), A.P.; Dana Devine, B.A., M.A. (Boston), Ph.D. (Duke); James E. Dimmick, M.D. (Br.Col.), FRCPC; Katerina Dorovini-Zis, M.D. (Athens); Allen Eaves, B.Sc. (Acadia), M.Sc., M.D. (Dal.), Ph.D. (Tor.), FRCPC, FACP; Jiri Frohlich, M.D. (Prague), FRCPC; Colin Fyfe, B.Sc., Ph.D. (Scotland), F.R.S.C.; Blake Gilks, B.Sc. (New Br.), M.D. (Dal.); William J. Godolphin, B.Sc. (Manit.), Ph.D. (Alta.), FACP; Shizu Hayashi, B.Sc., M.Sc. (Br.Col.); Richard Hegele, M.D. (Tor.), Ph.D. (Br.Col.), FRCPC; Judith L. Isaac-Renton, M.D., D.P.H. (Tor.), FRCPC; Gerald Krystal, B.Sc., M.Sc., Ph.D. (McG.); Victor Ling, B.Sc., Ph.D. (Br.Col.); Gillian Lockitch, M.B., Ch.B., M.D. (Cape T.), FRCPC; Ian Mackenzie, B.Sc., M.D. (W.Ont.), FRCPC; Alexander B. Magil, B.Sc. (McG.), M.D. (Qu.), FRCPC; Bruce McManus, B.A. (Sask.), M.Sc. (Penn. State), Ph.D. (Toledo), M.D. (Sask.), FRCPC, FACP, FACC; Michael A. Noble, B.A., M.D. (W.Ont.), FRCPC; David Owen, M.B. (Wales), FRCPC; Martin Petric, B.Sc., M.Sc. (McM.), Ph.D. (Br.Col.); Haydn Pritchard, B.Sc., Ph.D. (Nott.); Jack Rootman, M.D. (Alta.) F.R.C.S., C.R.C.P.(C); William E. Schreiber, B.A. (Ohio), M.D. (Houston); Poul Sorensen, B.Sc., M.D., Ph.D. (Br.Col.); Fumio Takei, B.Sc. (Tokyo), Ph.D. (Br.Col.); Joanne L. Wright, B.Sc., M.D. (Alta.), FRCPC; Herman Ziltener, Pd.D. (Freib.)

Associate Professors

Cedric Carter, M.B., B.S. (Lond.), M.R.C.P. (U.K.), FRCPC; Janet K. Chantler, B.Sc. (St. And.), Ph.D.

(Glas.); David Huntsman, M.D. (Nfld.); Aly Karsan, B.A., M.D. (Qu.); Niamh Kelly, B.A., Ph.D. (Dub.); Mel Krajdjen, B.Sc., M.D. (McG.), FRCPC; John R. O'Kusky, B.Sc. (Loyola), M.Sc. (Ott.), Ph.D. (Laval); Thomas J. Podor, B.Sc. (W.Ont.), M.Sc., Ph.D. (S.Calif.); David Seccombe, M.Sc. (W.Ont.), M.D. (Calg.), Ph.D. (Br.Col.); Chun Seow, B.Sc. (Manit.), Ph.D. (Manit.); Joseph Y. C. Tai, B.Sc. (McM.), M.Sc., Ph.D. (Dal.); Rusung Tan, B.Sc., M.D. (Br.Col.), FRCPC; Bruce Verchere, B.Sc., M.Sc., Ph.D. (Br.Col.); David Walker, B.A., M.A. (Calif., Santa Barbara), Ph.D. (Br.Col.); Valerie White, B.Sc., M.D. (Nfld.), FRCPC (Joint appointment with Department of Ophthalmology); Decheng Yang, M.Sc., Ph.D. (Ill.)

Assistant Professors

Brett Casey, B.A. (Claremont, Calif.), M.D. (Texas); Helene Cote, B.Sc. (Laval), Ph.D. (Br.Col.); Jason Ford, M.D. (Br.Col.), FRCPC; David Granville, B.Sc. (S.Fraser), Ph.D. (Br.Col.); John Hill, B.M.L.Sc., M.Sc., Ph.D. (Br.Col.); Jayachandran Kizhakkedathu, B.Sc. (India), M.Sc. (India), Ph.D. (India); Honglin Luo, M.S. (W. China), M.D. (Chong-qing); Torsten Nielsen, B.Sc. (Br.Col.), Ph.D., M.D., C.M. (McG.), FRCPC; Corinne S. L. Ong, B.Sc. Ph.D. (Birm.); Maureen O'Sullivan, B.Sc. (Ireland), MB.BCh.BAO, MD (Ireland); Erica Rajcan-Separovic, M.Sc., Ph.D. (Belgrade); Cheryl Wellington, Ph.D. (Br.Col.), B.Sc. (Alta); Andrew Weng, B.Sc. (Stan.), M.D. (Chic.), Ph.D. (Chicago).

Clinical Professors

Marcel Bally, B.Sc., M.Sc. (Texas), Ph.D. (Br.Col.); Diponkar Banerjee, FRCPC, Ph.D. (Ott.), M.B.Ch.B. (Makereve Med Sc.); Vagn Bonnevie-Nielsen, M.D., D.M.Sc. (Copenhagen); Richard Crawford, B.Sc., M.D. (Br.Col.), FRCPC; Bakul Dalal, M.B., B.S., M.D. (India); Jorge Denegri, M.S. (Argentina), FRCPC; Arun K. Garg, B.Sc. (Agra), M.Sc. (Agra), Ph.D. (Sask.), M.D. (Br.Col.); Randy Gascoyne, B.Sc., M.D. (Br.Col.); Allen Gown, B.S. (N.Y.), M.D. (Yeshiva); Gershon H. Growe, M.D. (Tor.), FRCPC; Malcolm Hayes, M.B., Ch.B. (Rhodesia); David Hoar, B.Sc. (Br.Col.), Ph.D. (Calif., Davis); Douglas E. Horsman, M.D. (Sask.), FRCPC; Edward C. Jones, B.Sc. (S.Fraser), M.D. (Br.Col.), FRCPC; James Kelly, M.B., B.Ch. (Galway); Michael T. Kelly, B.Sc. (Purdue), M.D., Ph.D. (Indiana); Steven Kleinman, Ph.D. (M.I.T.), M.D. (Calif., San Diego); Mladen Korbelik, B.Sc., M.Sc., Ph.D. (Zagreb); Deborah McFadden, B.A. (Minn.), M.D. (Calg.); Wayne Moore, B.Sc. (Nfld.), M.D. (McG.), FRCPC; Robert O'Connor, M.B., B.Ch., B.A.O. (Dub.), FRCPC; Michael O'Shaughnessy, B.Sc., M.Sc. (N.Y.), Ph.D. (Dal.); Jaakko T. Pantzar, Lic.Med. (Finland), FRCPC, F.C.C.M.G.; Morris Pudek, B.Sc. (S.Fraser), Ph.D. (Br.Col.); Diane Roscoe, B.S. (Penn. State), M.S. (Thomas Jefferson), M.D.; Frances M. Rosenberg, M.D., Ph.D. (Dal.); Miriam Rosin, B.Sc. (Sask.), Ph.D. (Tor.); Mark Scott, B.A., M.A. (Colorado), Ph.D. (Minn.); Christopher Sherlock, M.B., B.S. (Lond.), F.R.S.M., L.M.C.C.; Eva Thomas, B.Sc., M.D. (Sweden), FRCPC; Louis D. Wadsworth, M.B., Ch.B. (Manc.), FRCPC.

Clinical Associate Professors

Nigel Ball, M.D. (St.M.); Kenneth Berean, B.Sc., M.D. (Alta.); Edith Blondel-Hill, B.Sc., M.D. (Alta.); Gregory Bondy, B.Sc., M.Sc., M.D. (W.Ont.), FRCPC; Thomas Cooney, M.B., B.Ch. (Ireland), M.R.C.P.(I), M.R.C.P. (Eng.), FRCPC; Patrick Doyle, M.D. (Br.Col.); FRCPC; John English, B.Sc. (W.Ont.), M.D. (Calg.), FRCPC; Douglas Filipenko, B.Sc., (S.Fraser), M.Sc., (Alta.), M.D., (Br.Col.); Sweeney Han Goh, B.Sc., M.Sc., Ph.D. (Manit.); Dennis Grant, M.D. (Alta.), FRCPC; Laurel Gray, B.Sc. (Tor.), M.D. (Qu.), FRCPC; Lawrence Haley, M.D. (Br.Col.); Anne C. Halstead, M.D. (Tor.); Maria Issa, B.Sc. (P.E.I.), Ph.D., M.Sc. (Br.Col.); Gareth P. Jevon, M.B., Ch.B. (Cape

T.); Calum E. MacAulay, B.Sc., M.Sc. (Dal.), Ph.D. (Br.Col.); John Maguire, M.B., B.Ch., B.A.O. (Dub.); Bonnie Massing, B.Sc., M.D. (Finland), R.T.; Jasenka P. Maticic, M.D. (Zagreb); Muhammad Morshed, B.Sc., M.Sc. (Dhaka), Ph.D. (Yamaguchi); John X. O'Connell, M.B. (Ireland), FRCPC; David Pi, M.B.B.C. (H.K.), FRCPC; Susan D. Porter, B.Sc. (New Br.), Ph.D. (Br.Col.); Robert Power, M.B., B.Ch., B.A.O. (Ireland); Edward L.G. Prydzial, B.Sc., Ph.D. (Tor.); Nadine Urquhart, B.Sc., Ph.D. (Br.Col.); Hilary Vallance, M.D. (Br.Col.); Blair Walker, B.Sc., (Vic.B.C.), M.D. (Br.Col.); Karen J. Whitlow, B.Sc. (S.Fraser), M.Sc. (Ott.), Ph.D. (Br.Col.).

Clinical Assistant Professors

Brian Berry, B.Sc. (St.F.X.), M.D. (Ott.), FRCPC; Banami Bhaumick, B.Sc., M.Sc. (Calc.) Ph.D. (McG); Helene Bruyere, M.Gen., M.D. (Saint-Etienne, France); Sylvie Champagne, M.D. (Sher.), FRCPC; Mukesh Chanabhai, M.B.Ch.B. (Z'bwel.); Jennifer Davis, B.Sc., M.B., B.S. (Aust.); Monika Huboda de Bady, M.D. (Czechoslovakia), FRCPC; Valerian Dias, M.Sc., Ph.D. (Calg.); David Ferguson, B.Sc., M.D. (Alta.), FRCPC; Julia Flint, B.Sc., M.B., Ch.B. (Cape T.), FRCPC (Br.Col.); Deborah Griswold, B.Sc., M.D. (Br.Col.), FRCPC; Glenda Henderson, B.Ch., M.B. (Witw.), FRCPC; Janet Holden, M.D. (Sask.), FRCPC; Jaelyn Hung, B.Sc. (P.E.I.), Ph.D., M.Sc. (Br.Col.); Hugh D. Jones, B.Sc., M.D. (Alta.); Samuel Krikler, M.B., Ch.B. (Rhodesia), L.R.C.P., M.R.C.S. (U.K.); Wan Lam, B.Sc., M.Sc. (Alta.), Ph.D. (Dal.); James Fergal Magee, B.A., B.A.O., B.Ch., M.B., (Dub.); Anil Mangal, M.D. (Fiji), FRCPC; Justin Martin, M.B., B.Ch., BAO (Belf.), FRCPC; Magdalena Martinka, M.D. (Lublin), FRCPC; Elisabeth Maurer, M.Sc., Ph.D. (Graz); Michael McNeely, B.Sc. (Vic.B.C.), M.D. (Manit.), FRCPC; Thomas Mock, B.Sc., M.Sc., Ph.D. (Manit.); Douglas Morrison, B.Sc., M.D. (Calg.), FRCPC; Tanya Nelson, Ph.D. (Br.Col.); Mike Nimmo, B.A., B.Sc. (Qu.), LLB (W.Ont.), M.D. (Br.Col.); Steven Rasmussen, M.D. (Colorado); Marc Romney, B.Sc. (Alta.), M.D. (W.Ont.), D.T.M.&H (Lond., UK); Craig Smith, B.Sc., M.Sc. (Br.Col.); Susan Tha, M.D., (Br.Col.), Ph.D., (McG.); Thomas Thomson, B.Sc., M.D. (Br.Col.); Dirk J.T. van Niekerk, M.B., Ch.B. (Pret.), FRCPC; Paula Waters, B.Sc., Ph.D. (Bath); Hadi Yaziji, M.D. (Damascus School of Med.); Haishan Zeng, B.Sc., M.Sc. (Beijing), Ph.D. (Br.Col.); Peter Zetler, B.Sc., M.D. (Cape T.), FRCPC.

Senior Instructor

Carol Park, B.Sc., M.Sc. (Br.Col.), Ph.D. (Tor.).

Instructors

Amanda Bradley, B.Sc., Ph.D. (Br.Col.); Maria Victoria Monsalve, B.Sc. (Los Andes, Columbia), Ph.D., M.Sc. (Sao Paulo, Brazil).

Clinical Instructors

Terry C. Bainbridge, M.D. (Br.Col.); Sharon Boone, B.Sc. (New Br.), B.M.S., M.D. (Nfld.), FRCPC; Suzanne Chan, BSc, MD (Alta), FRCPC; Larry Cheevers, B.D.S. (Dub.), D.D.S. (Tor.), Dipl. (Am. Board of Forensic Odontology); David Chercover, B.Sc. (Br.Col.), M.D. (Br.Col.); Enid Edwards, B.Sc., M.D. (Sask.), FRCPC (Br.Col.); David Garner, B.Sc. (Alta.), Ph.D. (Br.Col.); Olaf Heisel, M.D. (Saarland, Germany); Scott Henwick, M.D. (Br.Col.) FRCPC; Sherali Hussein, B.Sc., Ph.D. (McM.); Helga Klein-Parker, M.D. (Lübeck); Charles Lee, B.Sc. (Br.Col.), M.D. (Alta.), FRCPC; Elena Levin, M.D. (Kalinin Med. Inst.); Mildred Martins, B.Sc. (Winn.), M.D. (Manit.); Andre Mattman, M.D. (Br.Col.), FRCPC; Robert McGuinness, B.Sc. (Br.Col.), M.D. (Br.Col.), FRCPC, FACP; Senthilselvi Nanthakumar, MBBS (C'bo), FRCPC; R. (Kent) Neuert, B.Sc. (Calg.); Jan Palaty, B.Sc., M.Sc., Ph.D. (Br.Col.); Malcolm Parslow, B.Sc. (Vic.N.Z.), Ph.D. (Calg.); Peter Payne, B.Sc., Ph.D. (Br.Col.); Neal

Poulin, B.Sc. (Winn.), M.Sc., Ph.D. (Br.Col.); Dale Purych, B.Sc., M.D. (Alta.), FRCPC; Grant Roden, B.Med.Sc. (Alta.), M.D. (Alta.), FRCPC; Christof Senger, M.D. (Bamberg, Bavaria), FRCPC; Katherine Serrano, B.Sc., Ph.D. (Br.Col.); Omar Shokeir, M.D. (Sask.); Ingrid Spadinger, B.A.Sc., Ph.D. (Br.Col.); Danny Straathof, B.M.Sc., M.D. (Alta.), FRCPC; Grace Tanhuanco-Kho, M.D. (Philippines); Michael Tyler, B.Sc. (Calg.), B.Sc. (Calg.), M.D. (Calg.), FRCPC; Nicholas van der Westhuizen, M.B., C.H.B. (Rhodesia), FRCPC; Robert Wolber, M.Sc., Ph.D., M.D. (Mich.); Tung Yang, B.Sc., B.M.S., M.D. (Ott.), FRCPC; Wilson Yeung, M.B., B.S. (H.K.), FRCPC; Chen Zhou, M.D. (China), Ph.D. (Sask.), FRCPC(C).

Research Associates

Yangxin Fu, M.Sc. (China), M.D. (China), Ph.D. (China); Ala Aoukati, B.Sc. (Baghdad), Ph.D. (Norway); Troussard Armelle, B.Sc., M.Sc., Ph.D. (France); Hongwei Chen, M.D. (China), Ph.D. (China); Meixei Dan, B.Sc. (China), M.Sc. (China), Ph.D. (China); Mark Elliott, B.Sc., Ph.D., (Tor.); Hahn Huynh, B.Sc., M.Sc., Ph.D. (Br.Col.); Johan Janzen, B.Sc., Ph.D. (Br.Col.); Rajesh Kainthan, B.Sc. (India), M.Sc. (India), Ph.D. (India); Lucy Marzban, Doct. Deg. (Iran), Ph.D. (Br.Col.); Bernard Meshi, M.D. (Albania), M.Sc. (U.K.); Li Min, B.Sc. (Winn.), M.Sc. (Br.Col.), Ph.D. (Br.Col.); Elena Okon, M.Sc. (Moscow), Ph.D. (Russian Acad. Sci.); Annette Plesner, Cand.Sci., Ph.D. (Copenhagen); Neal Poulin, B.Sc. (W.Ont.), Ph.D. (Br.Col.); Manju Sharma, M.B.B.S., M.D. (India); Christina Togno, B.Sc. (W.Ont.), Ph.D. (Br.Col.); Janet Wilson-McManus, B.S. (Colorado), ASCP (Nebraska); Damian Yap, M.Sc., Ph.D. (U.K.); Huifang Mary Zhang, B.Sc., M.S. (Beijing).

Associate Members

Karen Bartlett, Occupational & Environmental Hygiene; Anthony Chow, Medicine; Marion Coulter-Mackie, Pediatrics; Angela Devlin, Pediatrics; Connie J. Eaves, Medical Genetics; Donna E. Hogge, Medicine; Keith Humphries, Medicine; Sheila M. Innis, Pediatrics; William Jia, Surgery; Marla Kiess, Medicine; Piotr Kozlowski, Surgery; Peter Lansdorp, Medicine; Patrick MacLeod, Medical Genetics; Colleen Nelson, Surgery; Tanya Nelson, Medical Genetics; Joel Oger, Medicine; Catherine Pallan, Pediatrics; Peter Pare, Medicine; Neil E. Reiner, Medicine; Paul Rennie, Surgery; Marianne Sadar, Surgery; J. W. Schrader, Medicine; Kirk Schulz, Pediatrics; C. H. Scudamore, Surgery; David Speert, Pediatrics; Richard Stokes, Pediatrics; Eric Webber, Surgery; Mark Wilkinson, Medical Genetics.

Honorary Members

William L. Dunn, B.Sc., M.D. (W.Ont.), Ph.D. (Lond.), FRCPC, Professor; Ralph Durand, B.Sc. (Calg.), Ph.D. (W.Ont.), Professor; Andrew Minchinton, B.Sc. (Hatfield), Ph.D. (Lond.), Assistant Professor; Peggy Olive, B.Sc. (Queb.), M.Sc. (W.Ont.), Ph.D. (McM.), Professor; Branco Palčić, B.Sc., Dipl. Ing. Physics (Yugoslavia), Ph.D. (McM.), Professor; Ravindra Shah, B.D.S. (Bom.), M.S. (N.Y.State), Ph.D. (Qu.), Assistant Professor; Kirsten Skov, B.Sc. (Qu.), Ph.D. (Tor.), Professor. *

DEPARTMENT OF PEDIATRICS

Robert Armstrong, Head

Professors Emeriti

Derek A. Applegarth, B.Sc. (Dur.), Ph.D. (Kings Coll., Durh.), F.C.C.M.G.; James E. Carter, M.B., Ch.B. (Cape T.), C.R.C.P. (C.), FRCPC; A. George F. Davidson, B.Sc., M.D. (Br.Col.), FRCPC; Henry Dunn, M.B., B.Chir. (Lond.), FRCP, D.C.H., R.R.C.P.C.; Peter Hahn, M.D., Ph.D., FRCPC; Judith G. Hall, B.A. (Mass.), M.S., M.D. (Wash.), F.A.A.P., F.C.C.M.G., F.A.B.M.G., FRCPC; Robert H. Hill, B.M., B.Ch.,

FRCPC; David S. Lirenman, B.Sc., M.D. (Manit.), FRCPC, C.R.C.P. (C.), D.A.B.L.M., F.A.C.P.; Margaret Mullinger, M.D., FRCPC; Andrew B. Murray, M.B., Ch.B., M.C.L.Sc., C.C.F.P.; Ross E. Petty, M.D., FRCPC; Gordon E. Pirie, M.D., C.M. (McG.), FRCPC, C.R.C.P.; Geoffrey Robinson, M.D., C.M. (W.Ont.), C.R.C.P., FRCPC; Mavis Teasdale, M.B., Ch.B. (Leeds), D.C.H., L.M.C.C., C.R.C.P., FRCPC; Bluma Tischler, M.D.; Roger S. Tonkin, M.D., C.M. (McG.), FRCPC.

Professors

Ron Barr, B.A. (Bishop's), M.A. (Tor.), M.D.C.M. (McG.), F.R.C.P.(C), C.S.P.Q.; Oscar Casiro, M.D., FRCPC; Philippe Chessex, M.D. (Geneva, Switzerland), ECFMG, FRCPC, L.M.C.C.; Kevin Farrell, M.B., Ch.B. (Edin.), M.R.C.P., C.H.R.C.P., FRCPC, D.C.H.; Alexander C. Ferguson, M.B., Ch.B. (Glas.), E.C.F.M.G. Clinical Instructors

Robert Alisharan, M.B.B.S., D.C.H., D.M. (Jamaica), L.M.C.C., FRCPC; **Anna Banerji**, B.Sc., M.D. (Tor.), FRCPC, ABP; **Amanda Barclay**, B.A., M.D.; **Bernard Behrmann**, M.B., B.Ch., FRCPC; **Simi Bharya**, B.Sc., M.D. (Br.Col.), FRCPC, LMCC, ABP; **Pargat Bhurji**, MD (Bombay), FRCPC; **Karina Breikss**, MD, FRCPC, FAAP; **Ruby Chan**, M.D. (Tor.), FRCPC; **Denise Chapple**, B.Sc., M.D., FRCPC; **Tahir Chaudhry**, M.B.B.S., D.C.H., M.R.C.P., M.D.; **Kwame Danso**, M.B., Ch.B. (Ghana), A.B.P., FRCPC, L.M.C.C.; **Sarah Denny**, B.S., M.Sc., M.D. (McM.), LMCC, FRCPC; **Quynh Doan**, MDCM (McG.), FRCPC, LMCC; **Keyvan Hadad**, B.Sc., M.D. (W.Ont.), FRCPC; **Andrew Henderson**, M.B., B.S., M.R.C.S., L.R.C.P., FRCPC; **Nita Jain**, B.Sc., M.D. (Br.Col.), MCC, ABP, FRCPC; **Tanuja Kodeeswaran**, B.Sc., M.D. (McM.), L.M.C.C., C.P.S.O., D.A.B.P., FRCPC; **Kyle Okano**, B.Sc., M.D., FRCPC; **Derek Prevost**, B.Sc., M.D. (Br.Col.), L.M.C.C., FRCPC; **Trent Smith**, B.P.E. (Hons.), M.D. (Alta.), FRCPC; **Sue Stock**, B.Sc., M.D. (Qu.), FRCPC; **Donald Voaklander**; **Robert W. White**, B.Sc., M.D. (Calg.), FRCPC, L.M.C.C.; **Ruth Wingerin**, M.B. (Cape T.); **Judith Wolfe**, B.Sc., M.D. (W.Ont.), FRCPC; **Grace Yu**, M.D.C.M. (McG.), FRCPC, FAAP.

Associate Members

Laura Arbour, Medical Genetics; **Patricia A. Baird**, Medical Genetics; **Virginia J. Baldwin**, Pathology and Laboratory Medicine; **Stuart H. Fine**, Psychiatry; **Roger Freeman**, Psychiatry; **Norbert Froese**, Anaesthesia; **Robert E. W. Hancock**, Microbiology; **Susan R. Harris**, Rehabilitation Sciences; **Michael C. Klein**, Family Practice; **Gillian Lockitch**, Pathology and Laboratory Medicine; **Chris Lyons**, Ophthalmology; **Patrick MacLeod**, Medical Genetics; **Roey Malleson**, Family Practice; **Bonnie G. Massing**, Pathology and Laboratory Medicine; **Deborah McFadden**, Pathology and Laboratory Medicine; **Barbara C. McGillivray**, Medical Genetics; **Helen R. Nadel**, Radiology; **G. A. R. O'Connor**, Anaesthesia; **Susan Penfold**, Psychiatry; **Martha C. Piper**, Rehabilitation Sciences; **Haydn Pritchard**, Medical Genetics; **Martin Putterman**, Commerce and Business Administration; **Keith Riding**, Surgery; **Stephan Salzberg**, Centre for Asian Legal Studies; **Samuel B. Sheps**, Health Care and Epidemiology; **Derryck Smith**, Psychiatry; **Q. R. Son-Hing**, Surgery; **Paul Sorensen**, Pathology; **P. Steinbok**, Surgery; **Joseph Y. C. Tai**, Pathology and Laboratory Medicine; **Eva Thomas**, Pathology and Laboratory Medicine; **Margot Van Allen**, Medical Genetics; **Louis D. Wadsworth**, Pathology; **Siu-li Yong**, Medical Genetics.

Divisions

Administration, S. MacLeod; **Division of Adolescent Health**, Roey Malleson (Divisional Head), J. Pinzon; **Division of Allergy**, A. C. Ferguson (Head), J. M. Dean; **Division of Biochemical Diseases**, M. Coulter-Mackie, Y. Lillquist, D. Peacock, L. T. K. Wong; **Division of Cardiology**, D. Human (Head), M. Hosking, W. Duncan, J. E. Potts, G. G. S. Sandor, B. Sinclair, M. A. Tipple, S. Sanatani; **Centre for Community Child Health Research**, R. Barr, A. D'Angiulli, M. George, I. Pike; **Division of Critical Care**, D. Wensley (Acting Head), R. J. Adderley, M. Bennett, N. Kissoon, A. MacNab, M. D. Seear, P. Skippen, A. Cogswell; **Division of Dermatology**, J. Prendiville (Head); **Division of Developmental Medicine**, T. Oberlander, B. Armstrong (Dept. Head), S. Clarren, B. Fitzgerald, G. Hahn, H. Ho, J. Hoube, C. Looch, C. Matsuba, E. Mickelson, A. Miller, M. O'Donnell (Head), S. Wellington; **Division of Emergency Medicine**, S. Whitehouse (Head), G. Baldwin, S. Bharya, M. L. Colbourne, C. Davies, N. Deghani, D. Haughton, T. Kodeeswaran, P. Korn, C. Laurie, B. Phillips, M. Pusic; **Division of Endocrinology**, J. P. Chanoine (Head), H. Kitson, D. Metzger, C. Panagiotopoulos, L. Stewart, S. Stock; **Division of Gastroenterology**, C. Barker, D. Israel (Head), E. Hassall, K. Jacobson, R. Schreiber, B. Vallance; **Division of General Pediatrics**, P. Korn (Head), W. Anquist, A. Antrim, R. Alisharan, S. Babul, A. Banerji, A. Barclay, G. M. Baumgard, B. Behrmann, M. A. Beimers, N. Bhanji, P. Bhurji, P. Bhui, B. Boulton, D. Brabyn, K. Breikss, M. Brussoni, C. K. Chan, D. M. C. Chan, D. Chapple, T. Chaudhry, K. Danso, S. Denny, Q. Doan, J. Druker, M. I. de Levie, R. Everett, J. C. Finlay, J. Fraser, P. M. Gelpke, L. Gendreau-Reid, W. Grut, J. Hailey, K. Hadad, J. Hales, J. Hall, A. C. Hamson, M. Hay, A. Henderson, J. Hlady, F. Jagdis, N. Jetha, N. Kent, S. Kent, M. Kovacs, L. Kuttner, A. Laswick, W-Y Lee, H. S. H. Liang, A. Lipson, P. Lloyd-Jones, H. Louie, B. S. MacLean, D. Matthew, P. A. McDermick, K. Okano, D. Peacock, M. S. Phang, J. Popkin, D. Prevost, L. Prisman, D. G. Riddell, R. Rothstein, Z. M. Rutkunas, R. Saunders, H. Siden, J. Simons, D. Smith, T. Smith, K. W. Spacey, P. N. Thiessen, L. Traverse, S. Tulsiane, H. Ukpeh, D. Voaklander, G. Ward, R. Wingerin, J. Wolfe, C. Yong, G. Yu, A. Zajackowska-Kielska, M. Brussoni, S. Denny, N. Jain, A. Laswick, D. Peacock, G. Yu, R. Wingerin, R. White, R. Wishart; **Centre for Healthcare Innovation and Improvement**, S. K. Lee, A. Klassen, N. Shaw; **Division of Hematology and Oncology**, P. Rogers (Head), M. Bond, J. Davis, V. Evdokimova, C. Fryer, Y. Kaikov, S. L. Pritchard, K. Rogers, K. Schultz, P. Sorensen, C. Strahlendorf, J. Wu, C. Pallen, D. Dix, S. Dunn; **Division of Infectious and Immunological Diseases**, D. P. Speert (Head), A. Alimenti, S. Dobson, J. Forbes, A. Junker, J. Ochnio, D. Ou, D. W. Scheifele, R. W. Stokes, A. Tingle, S. Turvey; **Division of Neonatology**, P. Chessex (Head), S. Albersheim, R. Grunau, S. Innis, S. K. Lee, E. W-Y. Ling, B. Lupton, M. Pendray, A. Singh, J. A. Smyth, A. Solimano, A. Synnes, T. Sorokan, V. Venkatesh, M. F. Whitfield, E. Ling, H. Ostovich; **Division of Nephrology**, D. Mastsell (Head), R. Hurley, C. White; **Division of Neurology**, A. Hill (Head), B. Bjornson, M. Connolly, K. Farrell, J. Hukin, E. Roland, K. Selby, K. Wambora, P. K. H. Wong; **Division of Respiriology**, D. Wensley (Acting Head), M. Seear; **Division of Rheumatology**, R. E. Petty (Head), D. Cabral, P. N. Malleson, L. Tucker.

Associate Professor Emeritus

Suzanne Buckley, M.D., FRCPC; **David Hardwick**, ; **David S. Matheson**, B.Sc. (Hons.), M.D. (Calg.), FRCPC.

Clinical Professors Emeriti

William Arnold, M.D.; **Bernard P. Dejong**, M.D. (Br.Col.), C.R.C.P., FRCPC; **Harold Krivel**, M.D. ;

Robert MacLean, M.D. ; Michael Patterson, D.C.H., FRCP (Lond.), FRCPC ; J. Michael Rigg, M.A., M.B., B.Chir. (Cantab.), D.C.H., FRCPC; John A. R. Tibbles, M.B., B.S. (Lond.), D. Obst., R.C.O.G., D.C.H., L.M.C.C., C.R.C.P.(C), M.R.C.P. (Lond.), FRCPC, F.R.C.P.; Gerald Yu.

Clinical Associate Professors Emeriti

Leslie Andrews; Suzanne Buckley, B.Sc., M.D. (Ott.), FRCPC, D.A.B.P.; Umberto Callegarini, M.D. ; Paul Kim; Peter Moore.

Clinical Assistant Professors Emeriti

Kwadwo Asante, B.Sc. (Br.Col.), M.B., Ch.B. (Glas.), A.B.P., FRCPC; Shirley Hazell, B.A. (Br.Col.), M.D. (Tor.); Doreen McConnell.

Associate Member Emeritus

Phillip Ashmore, M.D.

DEPARTMENT OF PHARMACOLOGY AND THERAPEUTICS

Cornelis van Breemen, co-Acting Head
Michael J. A. Walker, co-Acting Head

Professors Emeriti

Ernest Puiil, B.Sc., M.Sc., Ph.D. (Alta); David M. J. Quastel, B.Sc., M.D., C.M., Ph.D. (McG.); Morley C. Sutter, B.Sc. (Med.), M.D., Ph.D. (Manit.); Cornelis van Breemen, D.V.M. (Tor.), Ph.D. (Alta); Michael J.A. Walker, B.Sc., Ph.D. (Lond.).

Professors

Sastry S. R. Bhagavatula, M.Pharm. (Andhra), M.Sc., Ph.D. (Br.Col.); David V. Godin, B.Sc., Ph.D. (Ott.); Ismail Laher, B.Sc. (Lond.), M.Sc. (Br.Col.), Ph.D. (Nfld.); James G. McLarnon, B.Sc., M.Sc. (Alta.), Ph.D. (Br.Col.); Catherine C. Y. Pang, B.Sc. (Pharm.), Ph.D. (Manit.); James M. Wright, M.D. (Alta.), Ph.D. (McG.), FRCPC.

Associate Professors

Kenneth Bassett, BCOMTA, M.D. (Br.Col.), M.A., Ph.D. (McGill); Brian Conway, M.D.C.M. (McG.), FRCPC; Darryl Knight, Ph.D. (W.Aust.); Bernard A. MacLeod, B.Sc., M.D. (Br.Col.), FRCPC.

Associate Professors Emeriti

Robert E. Rangno, B.Sc., M.Sc., M.D. (Manit.), FRCPC; Rudolf Vrba, Dr.Techn.Sc., C.Sc. (Prague), Professor Emeritus, Honorary Associate Professor; Richard A. Wall, A.B. (Calif.), Ph.D. (Edin.).

Assistant Professors

Stephan K. W. Schwarz, M.D., Dr. Med. (Gött.), Ph.D. (Br. Col.), Lecturer; Xiaodong Wang, M.Sc. (Wuppertal), Ph.D. (Gött.).

Affiliated Assistant Professor

Kuo-Hsing Kuo, Ph.D. (Br.Col.), M.Sc., M.D. (Taipei).

Lecturers

Stan Bardall, Ph.D., M.B.A., B.S.P. (Sask.); Jennifer Shabbits, Ph.D. (Br.Col.).

Clinical Professor

Alexander P. Goumeniouk, B.Sc., M.D. (Br.Col.), FRCPC.

Clinical Professor Emeritus

Sultan Karim, Ph.D., D.Sc. (Lond.), LL.B. (Br.Col.).

Clinical Associate Professor

David Ansley, M.D. (Sask.), FRCPC.

Clinical Assistant Professor

Thomas L. Perry, B.Sc. (Br.Col.), M.D. (McG.), FRCPC.

Honorary Members

Michael Bridges, B.Sc., Ph.D. (Br.Col.), Assistant Professor; Caroline Bruce, B.Sc., Ph.D. (Aberdeen), Lecturer; Douglas Talling, B.Sc., Dip. Statistics, Lecturer.

Adjunct Professors

Terrence Barrett, B.Sc., Ph.D. (Br.Col.); Gregory Beatch, B.Sc., Ph.D. (Br.Col.); Chi-Chung Chan, B.Sc., Ph.D. (OH.); Kenneth Curry, B.Sc., Ph.D. (Lond.); Alan Ezrin, Ph.D. (Miami); Yunhao Gong, B.Sc., Ph.D. (Aust.); Ryan Huxtable, B.Sc., Ph.D. (Bristol); Barry Johnson, Ph.D. (Calif.); Malcolm Maclure, S.D. (Harv.); Michael Pugsley, B.Sc., Ph.D. (Br.Col.); Troy Sarich, B.Sc., Ph.D. (Br.Col.).

Associate Members

David Da Yong Chen, B.Sc. (Xiamen), Ph.D. (Alta.); Mihai Huzmezan, B.Sc., M.S., Ph.D. (Camb.), Assistant Professor; Karin Qayumi, M.D., Ph.D. (Kiev); Craig Ries, M.D. (W.Ont.), Ph.D. (Br.Col.), FRCPC., Clinical Assistant Professor; Chun Yong Seow, B.Sc., Ph.D. (Manit.); Lynn Stothers, M.D. (Br.Col.); Brian Warriner, FRCPC Anesthesia (Br.Col.), M.D. (Br.Col.), Professor; Athanasios Zis, M.D. (National Athens), FRCPC.

DEPARTMENT OF PSYCHIATRY

Athanasios P. Zis, Head

Professors Emeriti

Tibor Bezerdi, M.D. (Br. Col.); William Caird, B.A. (Br. Col.), Ph.D. (Qu.); David Crockett, B.A. (Whitman), Ph.D. (Victoria); Chris Fibiger, B.Sc. (Victoria), Ph.D. (Princeton); Stuart Fine, M.B.Ch.B. (Cape T.), F.F. Psych. (S. Africa), F.F.C. Psych. (U.K.), FRCPC; Walter Goresky, B.Sc., M.D. (Alberta) FRCPC; Wolfgang Jilek, B.Sc., M.D. (Vienna); Louise Jilek-Aall, B.Sc. (Teubigen), M.D.(Zurich); Carl Kline, B.A. (Knox), M.D. (North Western); Harry Klonoﬀ, B.A. (Manit.), Ph.D. (Wash.); Jirina Knobloch, Ph.D., M.D. (Charles); Robert Krell, M.D. (Br.Col.), L.M.C.C., FRCPC; Tsung-yi Lin, Ph.D., M.D. (Tokyo); Anthony Marcus, B.A. (Camb.), M.D. (Lond.), FRCPC; Edith G. McGeer, B.A., Ph.D. (Virginia); Patrick L. McGeer, B.A. (Br.Col.), Ph.D. (Prin.), M.D. (Br.Col.); Francis McNair, B.A. (Br. Col., M.D. (McG.); James Miles, B.A. (Sask.), M.D. (McG.) FRCPC; Hugh Parfitt, M.D. (Lond.) FRCPC; Raymond Parkinson, B.A., M.D. (Br. Col.) FRCPC; Susan Penfold, B.Sc., M.D. (Lond.) FRCPC; Lee Pulos, B.A. (Calif. L.A.), Ph.D. (Denver); Gordon Stephenson, B. Sc., M.D. (Toronto) FRCPC; Shan Ching Sung, B.Sc. (Nagoya), Ph.D.(Kyushu), M.D. (Taiwan); Juhn Wada, M.D. (Japan); Louis Woolf, B.Sc., Ph.D. (Lond.).

Professors

Carl Laird Birmingham, B.Sc., M.D., M.H.Sc. (Br.Col.), FRCPC; Campbell Clark, B.Sc. (McG.), M.A. (Br.Col.), Ph.D. (Vic.B.C.); Adele Diamond, B.A. (Swarthmore), Ph.D. (Harvard); William G. Honer, B.Sc., M.D., M.Sc. (Qu.), FRCPC; Raymond Wayne Lam, B.Sc., M.D. (Br.Col.) FRCPC; W. John Livesley, B.A., M.B., Ch.B., Ph.D. (Liv.), M.R.C. Psych., L.M.C.C., FRCPC; Brian MacVicar, B.Sc. (Hons.), M.Sc., Ph.D. (Tor.); Peter D. McLean, B.A., M.A. (Windsor), Ph.D. (Lond.); Timothy H. Murphy, B.S. (Hons.) (St.M. Coll.), Ph.D. (Johns H.); Anthony G. Phillips, B.A., M.A., Ph.D. (W.Ont.); William Piper, B.A. (Hons.) (Wooster), M.A., Ph.D. (Conn.); Lynn Raymond, B.S. (Roch.), M.S. (Hons.), Ph.D., M.D. (Albert Einstein Coll. of Med.); Peter B. Reiner, B.A., V.M.D. Ph.D. (Penn.); Terrance Snutch, B.Sc., Ph.D.

(S.Fraser); Steven Taylor, B.Sc., M.Sc. (Melb.), Ph.D. (Br.Col.); Steven Vincent, B.Sc. (Ott.), Ph.D. (Br.Col.); Lakshmi Yatham, MB, B.S. (Sri Venkat., India), D.P.M. (India), FRCPC; Athanasios Zis, M.D. (National, Athens), FRCPC.

Associate Professors

Jonathan A. E. Fleming, B.A., M.B., B.A.Q., B.Ch. (Dub.), FRCPC; Josie Geller, B.A. (Hons.) (Ott.), M.A., Ph.D. (Br.Col.); Elliot M. Goldner, B.Sc. (Tor.), M.D. (Calg.), M.Hsc. (Br.Col.), FRCPC; Grant L. Iverson, B.A. (N. Iowa), M.A., Ph.D. (W. Virginia); Kerry Jang, B.A. (Hons.), M.A. (S.Fraser), Ph.D. (W.Ont.); Stephen Alan Kline, B.Sc., M.D. (Alta.), FRCPC.

Assistant Professors

Martha Donnelly, B.Sc., M.D. (W.Ont.), FRCPC; Alaa El-Husseini, B.Sc. (Cairo), M.Sc. (Man.), Ph.D. (Br.Col.); Robert Holt, B.Sc. (Br.Col.), Ph.D. (Alta.); Tania Lecomte, B.Sc. (Psych.), M.A., Ph.D. (Montr.); Elton Ngan, B.Sc. (McM.), M.D. (McG.), FRCPC; John Ogrodniczuk, B.A., Ph.D. (Alta.); Weihong Song, M.D. (China), M.Sc. (Purdue), Ph.D. (Indiana); Charlotte Waddell, B.Sc., M.Sc. (Br.Col.), M.D. (McM.), L.M.C.C., C.C.F.P., FRCPC.

Clinical Professors

M. Oluwafemi Agbayewa, M.B., B.S. (Ibadan), M.R.C.Psych. (Lond.), FRCPC; Semion Altman, M.D. (Poland), L.M.C.C., FRCPC; Rosemary Basson, M.B.B.S., M.R.C.P. (Lond.); Ronald E. Braunstein, M.D. (Manit.), D. Psych. (S. Calif.), FRCPC; R. Alan Buchanan, B.Sc., M.D. (Calg.), FRCPC; Maria Corral, B.Sc. (S.Fraser), M.D. (Br.Col.), FRCPS; Stacy L. Elliott, B.A., M.D. (Br.Col.); Diane K. Fast, M.D., C.M. (McG.); Roger D. Freeman, B.A. (Swarthmore), M.D. (Johns H.), D.Psych. (McG.), CRCPC; Soma Ganesan, M.D. (Saigon), FRCPC; Jane Garland, B.Sc., M.D. (Qu.), FRCPC; Trevor Hurwitz, M.B., Ch.B. (Pretoria), M.R.C.P. (U.K.), FRCPC; Riho Kalda, M.D. (Tor), FRCPC; Harry Karlinsky, B.Sc., M.D. (Manit.), M.Sc. (Lond.), FRCPC; William J. Koch, B.A. (Montana) M.A., Ph.D. (Alta.); Lili Kopala, B.Sc. (Alta.), M.D. (Calg.), FRCPC; Pierre P. Lechner, B.Sc. (McG.), M.D. (Qu.), FRCPC; Donald F. Louie, B.Sc. (Vic.B.C.), M.D. (Br.Col.), FRCPC; Keith Marriage, M.B., B.S. (Melb.), FRCPC; Shaila Misri, M.B., B.S. (Calc.), FRCPC; Emilene Murphy, B.A., B.S.W., M.Med.Sci., M.D. (Nfld.), FRCPC; Michael F. Myers, M.D. (W.Ont.), FRCPC; Joseph A. Noone, M.D. (Dub.), FRCPC; Roy J. O'Shaughnessy, M.D. (Ott.), FRCPC; Pratibha N. Reebye, M.B.B.S. (Mysore), D.P.M. (Leeds), FRCPC; Kamal Rungta, M.D. (Tor.), FRCPC; Anthony Schon, M.D. (Manit.), FRCPC; Kristin S. Sivertz, B.Sc. (W.Ont.), M.D. (McM.), FRCPC; Derryck Smith, B.Sc. (Wat.), M.D. (W.Ont.), FRCPC; Richard Williams, M.B., B.S. (Lond.), M.R.C.Psych. (U.K.), M.Phil. (Edin.), LMCC, FRCPC; Sheldon Zipursky, B.Sc., M.D. (Manit.), PRCP, DABPN.

Clinical Associate Professors

Judith Allen, B.A. (Qu.), M.D. (Tor.), FRCPC; Stephen D. Anderson, B.A., M.D. (Br.Col.), FRCPC; Joan Bishop, B.Sc., M.D. (Tor.); Charles R. Brasfield, B.A., M.A. (Texas), Ph.D. (Br.Col.), M.D. (Calg.), FRCPC; Bergljot R. Bright, L.R.C.P. & S.(I), FRCPC; Johann Brink, B.A. (Hons.) (Cum Laude) (S. Africa), M.B., Ch.B. (Cape.T.); Diana Carter, M.B., B.S. (Lond.), C.R.C.P.(C); Peter Chan, M.D. (Br.Col.) FRCPC; Caroline Choo, B.Sc. (1st class Hons.), M.D. (Br.Col.), FRCPC, D.A.B.P.N., L.M.C.C., M.A.C.P.; Jeffrey M. Claman, B.A. (Amherst), M.D. (Br.Col.), FRCPC; Elaine R. Drysdale, B.A., M.D. (Calg.), FRCPC; Sean Flynn, M.D. (Calg.), FRCPC; Robin Friedlander, M.B., Ch.B. (Cape T.), M.Med. (Witw.), F.F.P. (Coll. Med. S.A.), FRCPC, L.M.C.C.; Peter Gibson, B.Sc., M.D.

(Alta.), FRCPC; **Ronald Gibson**, B.A., M.D. (Sask.), FRCPC; **Caroline Gosselin**, M.D. (Sask.), FRCPC; **Valerie Gruson**, B.A. (Tor.), M.D. (Calg.), FRCPC; **Robert Hewko**, B.Sc., M.D. (Alta.), FRCPC; **John A. Higenbottam**, B.A., M.A. (Manit.), Ph.D. (Vic.B.C.); **David Irwin**, B.Sc., M.D. (Br.Col.), FRCPC; **Abdul Karim M. Jiwa**, M.B., Ch.B. (E. Africa), FRCPC, L.M.C.C.; **Arvind Kang**, M.B.B.S. (Punj.), FRCPC; **Nirmal Kang**, M.B., B.S. (Dayanand, India), FRCPC; **Andrzej Koczapski**, B.Sc., M.D. (Br.Col.), FRCPC; **Raymond Liang**, B.Sc. (Alta.), M.D. (Manila), FRCPC; **Susan Lomax**, B.Sc., B.S.N., M.D. (Br.Col.), FRCPC; **G. William MacEwan**, B.Sc., M.D. (Br.Col.), FRCPC; **Akber Mithani**, B.Sc., M.D. (Nfld.); **Richard Monks**, B.Sc. (Car.), M.D. (McG.), FRCPC; **Janine O'Kane**, MBBS (Kings Coll.), FRCPC; **Lance L. Patrick**, M.D. (Br.Col.), FRCPC; **R. Oliver Robinow**, B.Sc. (McG.), M.D., C.M. (W.Ont.), FRCPC; **Carl J. Rothschild**, B.A., M.D. (George Wash.); **Anton Scamvougeras**, M.B., Ch.B.; **Roger D. Shick**, B.A., B.Sc., M.D., D.Psych. (Manit.), FRCPC; **Resa S. Shore**, M.D. (McM.), FRCPC; **Kevin Solomons**, M.V., Ch.B. (Cape T.), FRCPC; **Ronald W. Stevenson**, B.Sc., M.D. (Calg.), FRCPC; **Robert Stowe**, B.Sc. (Car.), B.A. (Br.Col.), M.D. (Qu.), FRCPC; **Edwin Tam**, D.E.C. (Marianopolis Coll.), M.D.C.M. (McG.), FRCPC; **Mark Tapper**, B.A., D.Phil., B.M., B.Ch. (Oxon.), FRCPC; **Reginald Wand**, M.D. (Manit.), FRCPC; **Wahan Wanis**, M.D. (Rostowski), FRCPC; **Margaret Weiss**, B.A. (Brandeis), M.D.C.M. (McG.), FRCPC; **Frances Wilt**, B.Sc., M.D. (Manit.), FRCPC; **Allan Wong**, B.Sc. (Br.Col.), M.D. (Calg.), FRCPC.

Clinical Assistant Professors

Elizabeth Baerg Hall, B.A. (Goshen), M.D. (McM.), FRCPC; **Leon Berzen**, M.B., Ch.B. (Witw.), C.R.C.P.C., L.M.C.C., FRCPC; **Dan Bilsker**, M.A., Ph.D. (S.Fraser); **Myles Blank**, M.D. (Manit.), FRCPC; **Allan Burgmann**, B.Sc., M.D. (Br.Col.), FRCPC; **Caron Byrne**, B.A. (Windsor), M.Sc., M.D. (Manit.); **Laura Chapman**, B.Sc., M.D. (Br.Col.), FRCPC; **Leslie A. Cockhill**, M.D., C.M. (McG.), FRCPC; **Michael Cooper**, B.Sc., M.D. (Br.Col.), FRCPC; **Laura Doyle**, M.D. (Calg.), FRCPC; **Elisabeth J. Drance**, B.Sc. (Br.Col.), M.D. (Br.Col.), FRCPC; **Vikram Dua**, B.Sc. (Hons.) (Tor.), M.D. (McM.), FRCPC; **Craig Emes**, M.D. (Alta.), FRCPC; **David Erickson**, B.A. (Regina), M.A. (S.Fraser), Ph.D. (Br.Col.); **Stephen Fitzpatrick**, B.Sc. (New Br.), M.D. (Dal.), FRCPC; **Wesley H. Friesen**, B.Sc., M.D. (Manit.), FRCPC; **Colleen Froese**, B.Sc. (Br.Col.), M.D. (Br.Col.), FRCPC; **Maria Geizer**, M.D. (Charles), FRCPC (Nfld.); **James G. Harris**, B.Sc., M.D. (Br.Col.), FRCPC; **Lorraine Hathaway**, B.A. (N.Y.State), B.S.W. (Lake.); **Timothy Holden**, M.B., Ch.B., M.Med. (Cape T.), FRCPC; **David Hutnyk**, M.D. (Calg.), FRCPC; **Valerie Kaye**, B.Sc. M.D.C.M. (McG.), FRCPC (Br.Col.); **Stephen Kiraly**, M.D. (W.Ont.), FRCPC; **Teresa M. Kope**, M.D. (Br.Col.), FRCPC; **Endre Koritar**, B.Sc., M.D., C.M. (McG.); **Man Wai Kwan**, B.Sc., M.D. (McG.), FRCPC; **David Leishman**, B.A. (Guelph), M.D. (McM.), FRCPC; **John Mark Levy**, B.A., M.D. (Br.Col.), FRCPC; **Elena Lisiak**, B.A., M.D. (Czech.), FRCPC; **Jake Locke**, M.D. (Br.Col.), FRCPC; **Shao-Hua Lu**, B.Sc., M.D. (Br.Col.), FRCPC; **Kurban Madhani**, M.B., B.S. (Kashmir), FRCPC; **Ronald Manley**, B.Sc. (Hons.) (Trent), M.A., Ph.D. (Qu.); **Biju Mathew**, M.D. (India), FRCPC; **Kathleen McGarvey**, B.Sc. (W.Ont.), M.D. (Br.Col.), FRCPC; **Janette M. McMillan**, B.Sc., M.D. (Br.Col.), FRCPC; **Dorothy McWatters**, M.D. (Qu.); **Hiram Mok**, M.A., M.B., B.Ch., B.A.D. (Dub.), FRCPC; **Colleen Northcott**, B.Sc. (Hons.), Ph.D. (New Br.), M.D. (Manit.), FRCPC; **Bruce D. Patterson**, B.M.S., M.D. (Alta.), FRCPC; **Rainer Persaud**, B.Sc., M.D. (Manit.), FRCPC; **Sidney Perzow**, B.Sc. (Hons.) (McG.), M.D. (Sask.), FRCPC; **Lewis Pullmer**, B.Sc., M.D. (Manit.), FRCPC; **Raj Raina**, M.B.B.S. (India), FRCPC; **Kulwant S. Riari**, B.Sc.II, M.B.B.S. (Raj.), FRCPC; **Deidre M. A. Ryan**,

M.B., B.Ch., B.O.A. (Galway), FRCPC; **Nathan Schaffer**, B.M.Sc., M.D. (Alta.); **Stephen Schertzer**, M.D. (Sher.), FRCPC; **Patricia T. Schwartz**, M.D. (Chile), FRCPC; **Stanley Semrau**, B.Sc., M.D. (Br.Col.); **Leslie Sheldon**, B.Sc., M.D. (Alta.), FRCPC; **Kulbir Singh**, M.B., B.S. (Ranchi, India), FRCPC; **Geoffrey Smith**, B.A. (Hons.) (Vic.B.C.), M.A., Ph.D. (Br.Col.); **Jeanette Smith**, M.B., B.S. (Lond.), FRCPC; **Suja Srikameswaran**, B.A. (Hons.), M.A., Ph.D. (Manit.); **Irena Straszak**, B.A. (McG.), M.D. (McM.), FRCPC, M.H.A. (Ott.); **Arthur Sullivan**, B.A. (Naz.), M.D. (Vermont) FRCPC; **Eduardo Tesler-Mabe**, M.D. (Buenos Aires), FRCPC; **R. Peter Uhlmann**, M.D. (Ill.), FRCPC; **Rene Weideman**, B.A. (Natal), M.A., Ph.D. (Br.Col.); **Jacqueline Weiss**, B.S.W., M.D.C.M. (McG.), FRCPC; **John Michael Whelan**, M.B., Ch.B. B.A.O. (Galway), FRCPC; **Maureen L. Whittal**, B.A. (Br.Col.), M.A., Ph.D. (W. Virginia); **Stephen Wiseman**, M.D. (Calg.), FRCPC; **David Worling**, B.A. (Guelph), M.A. (Tor.), Ph.D. (Tor.); **Elizabeth Zoffman**, B.Sc., M.D. (Br.Col.), FRCPC.

Adjunct Professors

Fumitaka Noda, M.D. (Japan).

Clinical Instructors

Geoffrey Ainsworth, M.B., Ch.B. (Leeds), FRCPC (Br.Col.); **John Anderson**, B.A. (W.Ont.), M.D. (McM.); **Lorraine Andrews**, B.Sc. (Hons.), M.D. (Br.Col.); **Raymond Au**, B.Sc., M.D. (Alta.), FRCPC; **Jehanne Austin**, B.Sc. (Bath), M.Sc. (Br.Col.), Ph.D. (Wales); **Auby H. Axler**, B.Sc., M.D. (Alta.); **Ellen Becker**, R.N. (Jewish Gen.), B.N., M.Ed. (McG.); **Kevin Berman**, M.D. (Qu.); **Maurice Bloch**, B.A. (Hons.) (Cape T.), M.A., Ph.D. (Br.Col.); **David Bond**, B.Sc., M.D. (Memorial), FRCPC; **Tricia Bowering**, B.Sc. (Vic.B.C.), M.D. (Br.Col.), FRCPC; **Lauren Broadway**, B.A., M.D. (Br.Col.), FRCPC; **Paula Campbell**, B.Sc. (Br.Col.), M.D. (Br.Col.), FRCPC; **Maureen Ceresney**, B.Sc. (Qu.), M.D. (Br.Col.), FRCPC; **Harpreet Chauhan**, B.Sc., M.D. (Br.Col.), FRCPC; **Grant M. P. Chernick**, M.D., C.C.F.P., (Manit.), FRCPC; **Adam Chodkiewicz**, B.Sc., M.D. (Alta.), FRCPC; **Abi Dahi**, M.D. (Iran), FRCPC; **Jana-Lea Davidson**, B.Sc., M.Sc., M.D. (Br.Col.), FRCPC; **Miriam Driscoll**, B.A. (S.Fraser), M.D. (Br.Col.), FRCPC; **Patrice M. Dunn**, B.A. (Hons.), M.D. (Br.Col.), FRCPC; **James Fabian**, B.Sc. (McG.), M.D. (Alta.), FRCPC; **Mellisa Fahy**, B.Sc. (Br.Col.), M.Sc. (McG.), M.D. (Br.Col.); **Ingrid Fedorov**, B.A. (Sask.), M.A., Ph.D. (Tor.); **Glenn Freedman**, B.A. (Bishops), M.D. (Alta.); **Darlynne Gehring**, B.S.W. (Calg.), M.S.W. (Br.Col.); **Margot Genge**, M.D. (Nfld.), FRCPC (Dal.); **Garen Gharakhanian**, M.B.B.S. (Karachi), FRCPC; **Andrea Grabovac**, B.Sc., M.D. (Br.Col.), FRCPC; **Linda Healey**, B.M.Sc. M.D. (Memorial) FRCPC; **Theresa Isomura**, B.Sc., M.D. (Br.Col.); **Balaraju Katta**, M.D. (AIIMS), FRCPC; **Samatha Kelleher**, M.D. (Manit.), FRCPC; **Clifford Kerr**, M.B., B.Ch., D.P.M. (Belf.), FRCPC; **Irfan Khanbhai**, B.Sc. (McG.), M.D. (Br.Col.), FRCPC; **Gail Knudson**, B.Sc. (Alta.), Dip. Ed., M.P.E., M.D. (Br.Col.), FRCPC; **Anson Koo**, B.A., M.D. (Br.Col.), FRCPC; **Garth Kroeker**, B.Sc., M.D. (Manit.), FRCPC; **Gary Lazar**, M.D. (Manit.), FRCPC; **Susan Lazar**, B.A., M.D. (Manit.), FRCPC; **Alexander Levin**, M.D. (Tver State, Russia), FRCPC; **C.V. Manjunath**, MBBS (Vellde India), FRCPC; **Doug Maskall**, B.Sc. (Hons.), M.D. (Br.Col.), FRCPC, LMCC; **Daniel E. McDonald**, B.A. (Br.Col.), M.D. (Calg.); **Lee Anne Meldrum**, M.D. (Sask.), FRCPC (Manit.); **Jamal Mirmiram**, MBBS (Karachi), FRCPC; **Sarah Newth**, B.A. (Hons.) (S.Fraser), M.A., Ph.D. (Br.Col.); **Sheila Nolan**, B.Sc. (Alta.), M.D. (Calg.), FRCPC; **Suniti Pande**, MBBS (Deli), FRCPC; **Michael Passmore**, B.Sc., M.D. (Br.Col.), FRCPC; **Sheila Patton**, M.D. (Br.Col.), FRCPC; **Hem Phaterpekar**, M.B.B.S. (India), FRCPC; **Emily Piper**, B.A. (Colorado Coll.), M.A., Ph.D. (Calif. School Professional Psych., Fresno); **Carole Richford**,

B.S.N., M.D. (Br.Col.), FRCPC; **Mark P. Riley**, B.Sc. (Hons), B.Med., B.Surg. (Nott.), L.M.C.C., FRCPC; **Eva Risling**, B.Sc.N. (Tor.), M.D. (W.Ont.), C.C.F.P., FRCPC; **Heather Robertson**, B.Sc. (Alta.), M.D. (McM.), FRCPC; **Brian Scarth**, B.Sc., M.D. (Br.Col.), FRCPC; **Deborah Schwartz**, B.A. (S.Fraser), M.D. (McM.), FRCPC; **Judith Setton-Markus**, M.Ed. (Okla.); **Edward Shen**, B.Sc., M.Sc. (H.K.), Ph.D. (S.Fraser); **Megan Sherwood**, B.Sc. (Tor.), M.D. (Br.Col.), FRCPC; **Victoria Smye**, M.H.Sc. (McM.), B.A. (Brock); **Ingrid Sochting**, B.A., M.A., Ph.D. (S.Fraser); **Michael Stefanelli**, M.D. (Br.Col.), FRCPC; **Christine Taylor**, B.Sc. (Hons.), M.D. (Alta.), FRCPC; **Joseph Tham**, B.M.Sc., M.D., (Alta.); **Agnes To**, B.Sc., M.D. (Br.Col.), FRCPC; **Todd Tomita**, B.Sc. (Qu.), M.D. (Tor.), FRCPC; **David Ward**, B.Sc. (Man.), M.D. (Man.), FRCPC; **William Warrian**, M.D. (Manit.), L.M.C.C., R.C.P.S.C.; **Withold Widajewicz**, M.Sc. (Montr.), M.D. (Poland), FRCPC; **Michael Wilkins-Ho**, B.Sc. (Vic.B.C.), M.D. (Br.Col.), FRCPC; **Angela Wong**, B.Sc., M.D. (Br.Col.), FRCPC; **Katherine Wrixon**, B.Sc. (Hons.), M.D. (Dal.), FRCPC; **David Yaxley**, B.Sc. (Car.), M.D. (Ott.), FRCPC; **June Ye**, M.A., M.D. (China), FRCPC; **Kay Young**, B.Sc., M.D. (Br.Col.); **Timothy Yuswack**, B.Sc., M.D. (Br.Col.), FRCPC.

Honorary Professors

William T. Brown, B.Sc. (McG.), M.D. (Br. Col.); **Eli Debbane**, M.D. (Lebanon), FRCPC; **Paul Termansen**, B.Sc., M.D. (Br.Col.).

Associate Members

Jean-Pierre Chanoine, Pediatrics; **Kalina Christoff**, B.Sc. (New Bulgarian), Ph.D. (Stanf.); **Alexander P. Goumeniouk**, Pharmacology and Therapeutics; **F. Ishu Ishiyama**, Counselling Psychology; **Charlotte Johnston**, Psychology; **Jane McKay**, B.Sc., M.D. (Sask.), FRCPC; **Anton Miller**, Pediatrics; **Randy Patterson**, Psychology; **Thomas L. Perry**, Medicine; **Jorge Pinson**, Pediatrics; **Ric M. Procyshyn**, Pharmaceutical Sciences; **Elizabeth Simpson**, Medical Genetics; **Marvin Westwood**, Psychology; **Sheila Woody**, Psychology.

Divisions and Programs

Division of Adult Psychiatry, Dr. Mark Levy (Head), B.A., M.D. (Br.Col.), FRCPC; **Dr. S. Ganesan** (Director), M.D. (Saigon), FRCPC; **Dr. R. Basson** (Director), M.B.B.S., M.R.C.P. (Lond.); **Dr. S. Misri** (Director), M.B., B.S. (Calcutta), FRCPC; **Division of Basic Neuroscience**, Dr. S. Vincent (Head), B.Sc. (Ott.), Ph.D. (Br.Col.); **Division of Behavioural Science**, Dr. W. Piper (Head & Director), B.A. (Hons.) (Wooster), M.A., Ph.D. (Conn.); **Dr. Carl Laird Birmingham** (Director), B.Sc., M.D., M.H.Sc., (Br.Col.), FRCPC; **Dr. Peter McLean** (Director), B.A., M.A. (Windsor) Ph.D. (Lond.); **Division of Child & Adolescent Psychiatry**, Dr. D. Smith (Head), B.Sc. (Wat.), M.D. (W.Ont.), FRCPC; **Division of Clinical Neuroscience**, Dr. R. Lam (Head & Director), B.Sc., M.D. (Br.Col.), FRCPC; **Dr. T. Hurwitz** (Director), M.B., Ch.B. (Pretoria), M.R.C.P. (U.K.), FRCPC; **Dr. W. MacEwan** (Director), B.Sc., M.D. (Br.Col.), FRCPC; **Division of Forensic Psychiatry**, Dr. R. O'Shaughnessy (Head), M.D. (Ott.), FRCPC; **Division of Geriatric Psychiatry**, Dr. M. Donnelly (Head), B.Sc., M.D. (W.Ont.), FRCPC; **Division of Mental Health Services & Policy**, Dr. E. Goldner (Head & Director), B.Sc. (Tor.), M.D. (Calg.), M.H.Sc. (Br.Col.), FRCPC.

DEPARTMENT OF RADIOLOGY

Nestor L. Muller, Head

Professors

Peter Cooperberg, B.Sc., M.D., C.M. (McG.), FRCPC, M.A.C.R., Vice Chair Academic Affairs; **J. A. Gordon Culham**, B.Sc., M.D. (Manit.), FRCPC; **Brian C.**

Lentle, M.B., B.Ch., M.D. (Wales), DM.RD, FRCPC, Professor Emeritus; David K. Li, B.Sc., M.D. (Br.Col.), FRCPC, Vice-Chair- Administration; Alexander MacKay, B.Sc., M.Sc., Ph.D. (Oxon.); Nestor L. Müller, M.D. (Brazil), Ph.D. (Tor.), FRCPC; Peter Munk, B.Sc., M.D., C.M. (McG.), FRCPC.

Associate Professors

A. R. Buckley, M.B. (Dub.), B.C.H.B.A.O., FRCR, FFR, RCSI; Anna Celler, M.Sc. (Warsaw), Ph.D. (Warsaw); Bruce Forster, M.D., B.Sc., M.Sc. (Br.Col.), LMCC, FRCPC; Philip Harrison, B.Sc. (Br.Col.), M.D. (Alta.), FRCPC; Jocelyne Lapointe, B.A. (Montr.), M.D. (Sher.), FRCPC; Lindsay Machan, M.D. (Alta.), FRCPC; John R. Mayo, B.Sc. (Br.Col.), M.D. (Tor.), FRCPC, Vice-Chair, Research; Robert Nugent, B.M.S., M.D. (Alta.), A.B.R.(D), FRCPC; Qing San Xiang, B.S. (Beijing), M.S., Ph.D. (Calif.).

Assistant Professors

Gordon Andrews, RT(R) (Sask.), M.D. (Sask.), FRCPC; Jacqueline Brown, B.Sc.N. (Br.Col.), M.D., FRCPC; Silvia Chang, B.Sc., M.D. (Br.Col.), FRCPC; Harvey Coxson, B.Sc., Ph.D. (Br.Col.); Stephen G. F. Ho, M.D. (Br.Col.), FRCPC, Director, Residency Training; Piotr Kozłowski, B.Sc., M.Sc., Ph.D. (Krakow, Poland); Gerald M. Legiehn, M.D. (Manit.), FRCPC; Michael Martin, B.M., Sc., M.D. (Alta.), FRCPC; John Mawson, M.B., Ch.B. (Auck.); Savvakis Nicolaou, B.A., M.D. (Tor.), FRCPC; K. J. Poskitt, M.D. (Montr.); Audrey Spielmann, B.Sc. (Br.Col.), M.D. (Br.Col.), FRCPC.

Clinical Professors

John Aldrich, B.Sc., Ph.D. (Nott.); Linda Warren Burhenne, M.D. (Br.Col.), FRCPC; Paula B. Gordon, M.D. (Tor.), FRCPC; Douglas Graeb, M.D. (Tor.), FRCPC, D.A.B.R.; D. Christopher Morris, M.D. (Dal.), FRCPC; Connie M. Siu, M.B., B.S. (H.K.), FRCPC; Philip Switzer, B.Sc., M.D. (McG.), FRCPC; Anthony Wong, M.B., Ch.B. (N.Z.), FRCPC.

Clinical Associate Professors

Shamim Bhimji, M.B., Ch.B. (E. Africa), FRCPC; Robyn Cairns, M.D. (Br.Col.), FRCPC; P. Chipperfield, M.D. (Sask.), FRCPC, D.A.B.R.; Douglas Connell, M.D. (W.Ont.), FRCPC; Borys Flak, M.D., B.Sc. (Alta.), FRCPC; Brian Goodacre, B.Sc., M.D. (Br.Col.), FRCPC; Dorothy Anne Harrison, M.D. (Calg.), FRCPC; Patricia Hassell, B.Sc., M.D., C.M. (McG.), FRCPC; Barry Irish, M.D. (Br.Col.), FRCPC; Douglas H. Jamieson, M.B., Ch.B. (S.Africa); John Mathieson, B.A., M.D. (Calg.), FRCPC; Denise Pugash, B.Sc., M.D.C.M. (McG.); V. Allen Rowley, B.Sc., M.D. (Alta.), FRCPC; Michael Sargent, M.B., Ch.B. (U.K.); David Zacks, M.B. (Cape T.), FRCPC; Charles V. Zwirwich, M.D. (W.Ont.), FRCPC.

Clinical Assistant Professors

John Barberie, B.Sc., M.D. (Br.Col.), FRCPC; Simon Bicknell, B.Sc., M.D. (Br.Col.), FRCPC; Heather Bray, M.D. (Sask.), FRCPC; Larry Breckon, M.D., FRCPC; Yvette Cheong, M.D. (Tor.); Moira Cooper, B.P.E., M.D. (Dal.), FRCPC; Ian Dunn, B.Sc. (Br.Col.), Ph.D. (Tor.), M.D. (Calg.); Emmy Duran, B.Sc., M.Sc., Ph.D. (Roch.); Richard Eddy, B.A., M.D. (Nfld.); Kevin Forkheim, B.Sc., M.Sc., M.D. (Manit.); Ian Gardiner, B.Sc. (Vic.B.C.), M.D. (Br.Col.); Mary F. Graham, B.A., B.Sc. (New Hamp.), M.D., C.M. (McG.), C.S.P.Q., FRCPC; Manraj Heran, B.Sc., M.D. (Br.Col.), FRCPC; Ciaran Keogh, B.A.O., M.B., B.Ch. (Dub.); Robert Koopmans, M.Sc., M.D. (Alta.), FRCPC; Nicola Lapinsky, M.D. FRCPC; D'Arcy Lawrence, M.D. (Tor.), FRCPC; Luck Louis, B.Sc., M.D. (Br.Col.), FRCPC; Richard Mark, B.Sc., M.D. (Manit.); Catherine Phillips, M.D. (Sask.), FRCPC; Stuart Silver, B.Sc., M.D. (W.Ont.), FRCPC; Rick Smith, B.Sc., M.D. (W.Ont.); Vanessa Vanraalte, B.Sc.,

M.D. (Br.Col.); Ian Weir, B.Med.Sc., M.D. (Alta.); Christine Wilson, B.A., M.D. (Sask.), FRCPC; William C. Yee, M.D. (W.Ont.), FRCPC.

Clinical Instructors

Sven E. Aippersbach, B.Sc., M.D. (Alta.), FRCPC; Maura Brown, B.Sc., M.D. (Br.Col.), FRCPC; Derek Chu, B.Sc., M.D. (Alta.), FRCPC; Jen Ellis, M.D. FRCPC; Nicola Finn, B.A., M.D. (Qu.), FRCPC; Catherine H. Fix, RTR, RDMS, RDSC; Walt Hodgins, B.Sc., M.D. (Tor.); Michael Huk, B.Sc., M.D. (Alta.); Alasdair Leighton, M.D. (Br.Col.), FRCPC; James Nugent, M.D., (Qu.), FRCPC; Wayne Patola, RTR, RTMR; Del Pengelly, B.Sc., M.D. (Alta.); David Spouge, B.Sc., M.D. (Br.Col.), FRCPC; Hamid Tahmasebpour, B.Sc. RDMS; Michael Woolnough, M.B., B.S. (Lond.), FRCP, FRCPC.

Clinical Professor Emeritus

Martha Grymaloski, B.A., M.D. (Sask.).

Clinical Associate Professor Emeritus

James Knickerbocker, B.A., M.D. (Manit.).

Associate Members

S. L. Goldenberg, Surgery; Jack Rootman, Ophthalmology; Vesna Sossi, Medicine.

Honorary Professors

Ronald Harrop, B.A., M.A., Ph.D. (Camb.).

Division of Nuclear Medicine

John Powe, Head

PROFESSOR

Donald M. Lyster, B.Sc. (Pharm.), M.Sc., Ph.D. (Alta.).

ASSOCIATE PROFESSORS

Helen R. Nadel, M.D. (Manit.), D.A.B.R., FRCPC; John Powe, M.D. (W.Ont.), FRCPC.

ASSISTANT PROFESSOR

Dan Worsley, M.D. (Br.Col.), FRCPC.

CLINICAL PROFESSOR

Allan S. Belzberg, M.D. (Alta.), FRCPC.

CLINICAL ASSOCIATE PROFESSOR

Philip Cohen, B.A., B.Sc. (New Hampshire), M.D., C.M. (McG.), C.S.P.Q., (FRCPC); George Sexsmith, M.D. (Sask.), FRCPC, Director, Residency Training.

CLINICAL ASSISTANT PROFESSORS

Moira Stilwell, M.D. (Calg.), FRCPC.

CLINICAL ASSOCIATE PROFESSOR

EMERITUS

Ivan J. Szasz, M.B.B.S. (Lond.), FRCSC, FRCPC.

CLINICAL INSTRUCTOR

Juan Carlos Guijon, M.D. (Manit.).

ASSOCIATE MEMBER

Anthony Y. Fung, Medicine.

DEPARTMENT OF SURGERY

Garth L. Warnock, Head

Professors

S.W. Chung, M.D. (Tor.), Ph.D., FRCSC; D. D. Cochrane, M.D. (Tor.), FRCSC; Richard J. Finley, M.D. (W.Ont.), FRCSC, F.A.C.S., Fellow of the American Coll. of Chest Physicians; Martin Gleave, B.Sc., M.D. (Br.Col.), FRCSC; S. Larry Goldenberg, M.D. (Tor.), FRCSC; York N. Hsiang, M.B. (Otago, N.Z.), FRCSC; Thomas Keane, M.B. (Univ. Coll., Dub.), B.Ch., B.A.D., MRCP, FRCPC; Martin McLoughlin, M.D. (Br.Col.), FRCSC, F.A.C.S. (part-time); M. D. Morrison, M.D. (Sask.), FRCSC; Ivo Olivotto, B.Sc., M.D. (Br.Col.), FRCPC; A. K. Qayumi, M.D., Ph.D. (Kiev); P. Steinbok, B.Sc. (N'cle,

U.K.), M.B., B.S. (W. Indies), FRCSC; Garth L. Warnock, B.Med.Sc., M.D. (Alta.), M.Sc., FRCSC, F.A.C.S.

Associate Professors

Noelle L. Davis, M.D. (Calg.), FRCSC; Guy Fradet, M.D. (Laval), FRCSC; Aziz Ghahary, M.Sc. (Tehran), Ph.D. (Manit.), PDF (Manit.); Kendall Ho, M.D. (Br.Col.), FRCPC (McG.); Chris Honey, M.D., D. Phil. (Br.Col.), FRCSC; William W.G. Jia, M.Sc., Ph.D. (Br.Col.); Tim Kieffer, B.Sc., Ph.D. (Br.Col.); A. MacNeily, B.Sc., M.D. (Ont.), FRCSC, FAAP; Mark Meloche, M.D. (W.Ont.), FRCSC (Br.Col.); Colleen Nelson, B.Sc., Ph.D. (Aust.); P. T. Phang, M.Sc., M.D. (Tor.), FRCSC (Nfld.); R. Purssell, M.D. (Br.Col.), E.M.R.C. (McG.), FRCPC; Gary J. Redekop, B.Sc., M.D. (W.Ont.), M.Sc., FRCSC; C. H. Scudamore, B.Sc., M.Sc., M.D. (Br.Col.), F.A.C.S., FRCSC, F.R.C.S. (Ed.), F.R.C.S. (Eng.); A. M. Seal, M.B., M.S. (Lond.), FRCSC; R. Simons, M.B. (Cantab.), FRCS, FRCSC, FACS; E.D. Skarsgard, M.D. (Br.Col.), M.Sc., FACS, FAAP, FRCSC; M. Lynn Stothers, M.D. (Br.Col.), FRCSC; D. C. Taylor, M.D. (Br.Col.), FRCSC; Joel Teichman, M.D. (McG.), S.B., C.M. FRCSC; Eric M. Webber, M.D. (Tor.), FRCSC.

Assistant Professors

R. Abu-Laban, M.D. (Alta.), B.M.Sc., FRCPC; Kourosh Afshar, M.D., FRCSC; Andrew Campbell, M.D. (Ott.), FRCSC; Nadine Caron, B.Sc., M.D. (Br.Col.), M.P.H., FRCSC; Rona Cheifetz, M.D. (Tor.), M.Ed., FRCSC; Michael Cox, B.Sc., Ph.D. (N. Carolina at Chapel Hill); William Gourlay, M.D. (McG.), FRCSC; Emma Guns, B.Sc., Ph.D. (Liv.); Charles Haw, M.D., FRCSC; Cheryl Helgason, Ph.D. (Alta.), B.Sc., M.Sc.; James J. Johnson, M.D., FRCSC; Piotr Kozłowski, M.Sc., Ph.D. (Inst. of Nuclear Physics, Krakow); Megan Levings, Ph.D. (Br.Col.), M.Sc; Alice Mui, B.Sc., Ph.D. (Br.Col.); Christopher Ong, B.Sc., Ph.D. (Br.Col.); Ryan Paterson, M.D. (Br.Col.), FRCSC; Ravindar Sidhu, M.D., B.Sc., M.Ed. (Tor.), FRCSC; Peter Skarsgard, M.D. (Br.Col.), FRCSC; Brian D. Toyota, M.D., C.M. (McG.), M.Sc., FRCSC, (part-time); Sam Wiseman, M.D., B.Sc. (Man.), FRCSC; John Yee, M.D., FRCSC.

Clinical Professors

Geoffrey Blair, M.D. (Tor.), FRCSC; Andris Blokmanis, M.B., B.S. (Melb.), FRCSC, F.R.A.C.S.; James M. Christenson, B.Sc., M.D. (Ott.), C.C.F.P. (Calg.); D. Lynn Doyle, M.D. (Br.Col.), FRCSC; J. Scott Durham, B.Sc. (Regina), M.D. (Sask.), FRCSC; K. G. Evans, B.Sc., M.D. (Br.Col.), FRCSC; D. J. Fairholm, M.D. (Alta.), FRCSC; H. N. Fenster, B.Sc., M.D., C.M. (McG.), FRCSC; Peter D. Fry, M.B. (Dub.), F.R.C.S.(I), FRCSC; J. H. Hay, M.B., B.Chir. (Cantab.), M.R.C.P., D.M.R.T., F.R.C.R.; Robert Hayden, M.D. (McG.), FRCSC; Grant D. Innes, M.D. (Alta.), FRCPC; Michael T. Janusz, M.D. (Manit.), FRCSC; Edmund C. Kostashuk, M.D. (Qu.), C.C.F.P., FRCPC; Jacques LeBlanc, M.D. (Laval), FRCSC; S. V. Lichtenstein, M.D., Ph.D. (Maryland), FRCSC; Neil S. Longridge, M.D., B.Sc., M.B., Ch.B. (N'cle), F.R.C.S. (Eng.), FRCSC; J. Masterson, M.D., FRCSC; Gregor I. McGregor, B.Sc. (Tor.), M.D. (W.Ont.), FRCSC; Alex Nagy, B.Sc. (Loyola), M.D. (Ott.), FRCSC; Mark K. Nigro, M.D. (Alta.), FRCSC; Jock D. S. Reid, M.D. (Calg.), FRCSC; K. H. Riding, M.B., B.S. (Lond.), M.R.C.S., C.R.C.P. (Eng.), FRCSC; Anthony J. Salvian, M.D. (Ont.), FRCSC; Richard J. Warren, M.D. (Br.Col.), FRCSC; Jeremy D. Woodham, M.B., Ch.B. (Manc.), FRCSC; W. Barrie Woodhurst, M.D. (Br.Col.), FRCSC; Jamie E. Wright, M.D. (Alta.), FRCSC; Ritchie A.L. Younger, M.D. (Alta.), FRCSC.

Clinical Associate Professors

Alexander L. Agranovitch, M.D. (St. Petersburg), FRCPC; Donald W. Anderson, M.D. (Alta.), FRCSC;

Eric Berthelet, M.D. (Montr.), FRCPC; N. Peter Blair, M.D. (Qu.), F.R.C.S. (U.K.), FRCSC; Michael C. Boyd, M.D. (Sask.), FRCSC; James C. Boyle, M.D. (Br.Col.), FRCSC; Jeff Brubacher, M.D. (McG.), M.Sc., FRCPC; G. E. Bryce, B.Sc., M.D. (Tor.), FRCSC; Samuel P. Bugis, M.D. (Alta.), FRCSC, Diplomat Amer. Board Surgery, F.A.C.S.; Kevin Bush, M.D. (Br.Col.), FRCSC; Nicholas J. Carr, M.D. (Br.Col.), FRCSC; Jerry Chen, M.D. (Br.Col.), FRCSC; Jeff Coleman, M.D. (W.Ont.); D.J. Courtemanche, M.D. (Br.Col.), FRCSC; Michael S. Dettman, M.D. (Br.Col.); Robert I. Dickson, B.Sc., M.D. (Manit.), FRCSC; J. R. Dmytryshyn, B.A., M.D. (Sask.), FRCSC; Graeme Duncan, M.B., Ch.B. 18 The School of Music

A SCHOOL WITHIN THE FACULTY OF ARTS

Director's Office

J. Read, Director

6361 Memorial Road
Vancouver, BC V6T 1Z2
Telephone: 604-822-3113
Fax: 604-822-4884

Music Website (www.music.ubc.ca)

The School of Music offers programs of study in performance and composition leading to the Bachelor of Music, the Diploma in Collaborative Piano Studies, the Diploma in Musical Performance, the Master of Music, and the Doctor of Musical Arts, as well as programs in musical scholarship leading to the Bachelor of Music, the Master of Arts, and the Doctor of Philosophy. The School also offers Bachelor of Music programs designed for prospective school teachers, elementary and secondary. All Bachelor of Music programs have a performance component. For students with a strong interest in music but little background in performance, the School offers the Bachelor of Arts with a major, minor, or honours in Music. For a description of the Bachelor of Arts, see *Music*, p. 144, in the Faculty of Arts section. For graduate degrees, see *Music*, p. 268, in the Faculty of Graduate Studies section.

BACHELOR OF MUSIC

The School of Music offers a four-year degree program leading to the Bachelor of Music. At the heart of the program is the core curriculum of music theory, music history, performance, and liberal arts electives, in which all majors participate. Academic and performance standards are consistent with those established by the Canadian University Music Society, of which the School is a member.

ACADEMIC ADVISING

Advising is mandatory at both the undergraduate and graduate levels. Returning students are advised at the end of the Winter Session. Newly admitted undergraduates are advised from early June to mid-July. Advising outside these times is available by appointment.

ADMISSION

Admission to the School of Music is limited, and is based upon an evaluation of the total skills and preparation of each applicant, including performance auditions, previous academic

record, proficiency in music theory, and letters of recommendation. To apply to the School, complete two applications. First apply to UBC through the PASBC website (www.pas.bc.ca); indicate the B.Mus. program as the preferred program. The application deadline is February 28. After completing this application, you will receive a UBC student number. You must then complete the Music supplemental application, available on the UBC Student Services website (www.students.ubc.ca/SSC). On this application indicate preferred majors, previous musical training, and preferred dates for a live audition and a theory examination. Complete it as soon as possible, and no later than March 15. In late March the School will contact each applicant to arrange the audition and theory examination, which are typically held in early April. Applicants must also request that two letters of recommendation be sent to the Undergraduate Admissions Officer in the School of Music. At least one of these should be from a music teacher. All letters should be sent directly by the referee and under no circumstances should pass through the hands of the applicant.

Students who are applying to transfer into third year will not be considered for admission unless they have completed six credits of transferable first-year English by April 30 of the year in which they apply. Students applying to transfer into second year must at least be eligible to register in first-year English, usually by having achieved a score of level 5 on the *Language Proficiency Index (LPI) examination*, p. 120, by April 30 of the year in which they apply.

Transfer Credits

Students intending to transfer to UBC from other institutions should plan their programs of study carefully to match, as nearly as possible, the majors outlined here, including both music and non-music courses. The *British Columbia Transfer Guide* (www.bccat.bc.ca) (published by the BC Council on Admissions and Transfer), should be consulted to determine the transferability of specific courses. The year and major to which a transfer student is admitted are based upon both the number of transferable courses and the student's performance ability, as determined by the entrance audition. Therefore, the number of transfer credits awarded for instrumental (or composition) study may be less than the number of corresponding credits the

student has taken at other institutions. Transfer credit awarded for ensemble performance cannot be used to satisfy the ensemble requirements for the third and fourth years.

DEGREE REQUIREMENTS

Additional Majors and Minors Outside Music

Students enrolled in the B.Mus. program can combine their major with a major or minor of the B.A. program. For successful completion of the B.A. major, they must take at least 42 credits in a field or specialization, of which 18 must be in courses numbered 300 or above; in addition, they must fulfil all the requirements set by the Faculty of Arts department or program. For successful completion of a B.Mus. with an Honours in Mathematics, see the requirements of the *Combined Honours in Mathematics and Another Subject*, p. 143, under Mathematics in the Faculty of Arts.

A very limited number of B.Mus. students may also minor in Commerce. Eligibility is restricted as specified for the B.A. Minor in Commerce. Enrolment must also be approved by the senior undergraduate advisor in the School of Music.

DOUBLE MAJOR

A student who is exceptionally qualified may undertake two majors concurrently in the B.Mus. To graduate with a double major, a student must be admitted to the two majors by established procedures (by audition, for most majors), and must satisfy the continuation requirements of both majors each year, and must complete all course requirements for both majors. Neither of the majors may be General Studies.

Performing Organizations

All students in the Bachelor of Music programs participate in the large and small instrumental and choral ensembles sponsored by the School of Music to develop their skill as musicians and to experience a wide range of repertoire. The ensembles are also open to qualified non-music majors, who may be accepted by audition and who may receive credit for participating (consult faculty listings). The ensembles are the University Singers, University Choral Union, University Symphony Orchestra, University Wind Ensemble, University Opera Ensemble, the Contemporary Players, the Asian Music Ensembles, the Jazz Ensemble, the Collegium

Musicum Ensembles, and various chamber groups. No more than half of a student's small ensemble credit is to be in Jazz Ensemble. Where the term 'large ensemble' is used in lists of degree requirements, it refers to MUSC 150 (Large Instrumental Ensemble), 153 (University Singers), and 154 (University Choral Union).

Specific ensembles may tour extrasessionally. Student participation in such tours, while desirable, is not obligatory. Students should inform ensemble directors of their plans as early as possible in the Winter Session.

Recitals by Faculty and Students

Recitals include the following:

- Faculty Recitals. Members of the faculty present formal recitals throughout the academic year. All students in the Bachelor of Music program are expected to attend.
- Wednesday Noon-Hour Recitals. On many Wednesdays, recitals feature outstanding soloists and chamber ensembles. Students in the Bachelor of Music program are expected to attend.
- Student Recital Series. More formal recitals are presented occasionally during the academic year. Normally several students will share one of these periods on the recommendation of the faculty. Attendance is expected of students majoring in performance.
- Graduation Recitals. All students majoring in performance (except opera) must present full-length graduation recitals in partial fulfilment of their degree requirements. Students in the Bachelor of Music program are expected to attend.

Minimum Achievements in Piano

Where piano is neither the major nor the concentration instrument, the student will be required to achieve the following keyboard proficiencies, normally by taking piano as a secondary instrument.

First-year students with little or no keyboard experience will be placed in Class Piano, MUSC 141.

Students with some previous piano experience may be exempted from all or part of the piano requirement by demonstrating proficiency in the skills listed below. They must take other Music electives to make up for the credits of any secondary piano courses from which they are exempted. For details, consult the undergraduate coordinator of the keyboard performance division.

By the end of first year of study, students must be able to:

- perform independently-prepared repertoire at the level of Grade IV as defined by a recognized examining board;
- sight-read pieces at the level of Grade II;
- transpose pieces at the level of Grade II;
- improvise accompaniments using common-practice harmonies and/or contemporary techniques (melody and accompaniment; accompaniment alone); and

- play: major and minor scales in keys up to and including four sharps and four flats; triads, chords, and arpeggios, in the same keys as above; and chromatic scales from any note.

By the end of second year of study, students must be able to:

- perform independently-prepared repertoire at the level of Grade VI;
- sight-read pieces at the level of Grade IV;
- transpose pieces at the level of Grade IV;
- improvise accompaniments utilizing more extensive harmonic and contrapuntal vocabulary (melody and accompaniment; accompaniment alone);
- play complete scales, triads, chords, and arpeggios in all keys;
- play ensemble scores, with preparation and also at sight.

Annual Review in the Performance and Composition Majors

All students enrolled in the Performance and Composition Major Programs will be reviewed annually to determine whether they should be allowed to continue in their course of study.

Non-Music Electives

The following courses are acceptable for credit as non-Music electives in the Bachelor of Music:

- all courses in the Faculty of Arts (other than Music courses) and Science;
- all courses in Family Studies (FMST);
- 18 credits in courses outside Arts, Science, and Family Studies.

Courses in musical performance, conducting, and arranging offered by the Faculty of Education are not acceptable for credit in Music degrees, except as specified in the programs of the Elementary and Secondary Education Streams of the General Studies Major.

English Requirement

To qualify for the Bachelor of Music, students must satisfy the Language Proficiency Index requirement (see *Language Proficiency Index Requirement for First-Year English*, p. 120) and first-year English requirements as stipulated by the Faculty of Arts (see *English Requirement*, p. 120, under Faculty of Arts, Degree Requirements).

Private Instrumental Instruction

Students may be registered for private instruction on their principal instrument only in a session in which they are taking at least 15 credits, and only if they are taking concurrently, or have already taken, all ensembles required in their major for the year level of their private instrumental instruction.

COMPOSITION

This four-year program is formulated for student swith particular capabilities in musical composition.

A student will not be allowed to enrol in this program unless ability in composition has

already been demonstrated by submitting copies of original scores to the Composition division.

Composers will have opportunities to hear their works performed by ensembles of students and faculty during their four years at the University.

To be eligible for graduation, a student majoring in Composition must compose at least 45 minutes of music and have it performed. In each year of the program, there must be at least one public premiere performance of the student's work. Performance dates and locations must be documented, including a recording if possible, and submitted to the principal composition teacher. Reading sessions by an orchestra or another large ensemble are acceptable as performances only upon approval of the Composition division.

¹ Composition I: It is possible to commence a Major in Composition after one year in another field. In such a case the Composition division will decide whether the student must take all of MUSC 107, 207, 307, and 407.

² At least 2 credits of piano are required each year. Students may study either at the concentration level (182, 282, 381, 481) or at the secondary level (172, 272, 371, 471). Students who study at the concentration level must meet jury requirements.

³ Additional credits of ensemble are not permitted to fulfill the Music Elective requirement.

⁴ Students will choose two courses from MUSC 410-415.

GENERAL STUDIES

This curriculum is designed to provide a general higher education in music, including performance, and to prepare students for professional work in a wide variety of fields such as criticism, broadcasting, editing, and arts management. The degree will allow continuation toward graduate degrees.

All applicants for the Major in General Studies will be required to audition on the instrument of their greatest competence. Students are required to study for four years in a concentration of their own choice; possibilities are piano, organ, voice, guitar, harp, strings, woodwinds, brass, percussion, and some historical instruments such as harpsichord, lute, viola da gamba, early flutes, recorder, and other instruments as instruction is available.

Students interested in preparing to teach music in BC schools should see *General Studies: Elementary Education Stream*, p. 355, or *General Studies: Secondary Education Stream*, p. 355, in the following sections.

¹ The concentration instrument is usually the one on which the student is most competent, and on which the student auditioned to enter the School.

² Normally secondary-level lessons in piano; see *Minimum Achievements in Piano*, p. 354 under Degree Requirements for the B.Mus.

³ The large and small ensembles chosen are normally those most appropriate to the student's concentration instrument. Substitutions can occasionally be made after consultations with the student's adviser, and with some consideration being given to the needs of the ensembles. Piano concentrators will take MUSC 167 in their third year (possibly supplemented by MUSC 169, with permission of the instructor). In their fourth year, if the coordinator of the keyboard division approves, they will take MUSC 161 and possibly 169, or else another small ensemble. Students with concentrations in historical instruments will take 6 credits of small ensemble (usually Collegium Musicum, starting in the second year) and 6 credits of large ensemble.

⁴ The non-Music electives may be freely chosen, except that at least 12 credits must be in the same department, with at least 6 of these at the 200-level or higher. If English is chosen to fill this requirement then 12 credits must be selected beyond those necessary to complete the literature requirement.

⁵ In each of third and fourth years a total of 14 credits, comprised of small ensemble and music electives, must be taken with a minimum of 2 credits and a maximum of 6 credits of small ensemble. The 2-credit small ensemble minimum may be waived if inappropriate to the concentration instrument or to the needs of the student, or by decision of the Director, in which case the Music electives will be increased from 12 to 14 credits. Extra credits of large ensemble beyond those required for this major may not be used as Music electives. Students with keyboard concentrations must take MUSC 349. Those with harpsichord concentrations must take MUSC 333 and 433. Those wishing to concentrate on historical instruments are advised to take 12 credits of music history courses (from MUSC 350, 352, 353, 354, and 355) as part of their Music electives.

GENERAL STUDIES: ELEMENTARY EDUCATION STREAM

This curriculum is a preparation for studies in education leading to certification as a teacher in BC elementary schools. It is intended to develop relevant skills in music performance along with a broad knowledge of musical styles. Students who successfully complete this program will have the prerequisites for admission to the Elementary Teaching Program in the Faculty of Education.

The first two years of the program are identical to the first two years of the Major in General Studies, except that the Large Ensemble and the Non-Music Electives should be selected in conformance with footnotes 2 and 3 below.

GENERAL STUDIES: ELEMENTARY EDUCATION

Third Year

MUSC 300	3
MUSC 301	3
Music Electives ¹	4
MUSC 311	2
Music 312	2
Music 313	2
MUSC 382	4
Large Ensemble ²	3

Music Education Electives ⁴	3
Total Credits	34

Fourth Year

Music Elective(s) ¹	6
MUSC 482	4
Large Ensemble ²	3
MUSC 131 ⁵	2
Class Instrument (MUSC 102, 112, or 122)	2
Non-Music Electives ³	12
Music Education Elective(s) ⁴	3
Total Credits	32

¹ Of the 12 required Music elective credits, at least six must be in history, theory, ethnomusicology, orchestration, or composition. At most 2 credits of small ensemble may be elected.

² For orchestral instrument concentrators, one of the four required large ensembles must be a choir (MUSC 153 or 154), and the remaining three will be Large Instrumental Ensemble (MUSC 150).

³ The non-Music Electives should be chosen to satisfy the admissions requirements of the Elementary Teaching Program of the Faculty of Education.

⁴ Students should consult with Music Education faculty to determine which courses are most suitable as electives.

⁵ Students are required to take MUSC 131 if they have had no previous vocal instruction. Voice concentrators and secondaries will take 2 additional credits of Music Elective instead of MUSC 131.

GENERAL STUDIES: SECONDARY EDUCATION STREAM

This curriculum is a preparation for studies in education leading to certification as a music teacher in BC secondary schools. Successful completion of the program, or a program with comparable requirements, is a prerequisite for admission into the B.Ed. (Secondary) program in the Faculty of Education, with music as the major teaching field.

The curriculum is based on that of the Major in General Studies (see *General Studies*, p. 355), with the following differences:

1) Second Year: Students must take MUSC 122 (2).

2) All Years:

- Large Ensemble: for instrumental concentrators, one of these, in the four years, must be a choir, and the remaining three will be Large Instrumental Ensemble.
- Non-Music Electives: students should consult the Faculty of Education for distribution requirements.

GENERAL STUDIES: SECONDARY EDUCATION

Third Year

Music Performance (Secondary) ³	2
Large Ensemble	3
MUED 302	4
MUED 303	4
Non-Music Electives ²	12
Music Electives	5
Total Credits	34

¹ 2 credits of the Music Elective may be in additional small ensemble work. MUSC 102 is recommended as an elective for string players.

² The non-Music electives may be freely chosen, except that at least 12 credits must be in the same department, with at least 6 of these at the 200-level or higher. If English is chosen to fill this requirement then 12 credits must be selected beyond those necessary to complete the literature requirement.

³ Voice concentrators take an appropriate level of their secondary instrument; those with previous secondary voice instruction take an appropriate level of voice or of the secondary instrument begun in the third year; those without previous voice instruction take MUSC 131.

GUITAR

All students planning to major in Guitar in the Bachelor of Music program are required to audition just prior to the beginning of classes. Transfer students from other colleges and universities will audition at the same time. The auditions will determine the admission of students to the performance program and whether they will be allowed to transfer credits in guitar performance from other universities and colleges.

In general, the entrance level corresponds to the Toronto or Western Board Grade X, and there must also be the probability of significant development during the years of study at the University. The possession of a diploma is not a guarantee of acceptance.

Students accepted as first-year Guitar majors will be expected to attain annual levels corresponding approximately to those given below. The works cited are given as guides to the levels of technical and musical achievement to be attained and do not indicate specific repertoire requirements.

Entrance auditions and term examinations will include sight reading and quick study in addition to the performance of prepared repertoire. Third-year students will be required to study French and Italian lute tablature systems (in their private lessons). Fourth-year students will be expected to transcribe a work from the repertoire of another instrument (e.g., piano, violin).

- 1) End of First Year. Etudes (Villa-Lobos: No. 1, Mignone: No. 10); Dowland: *Lacrimae Pavan*; Weiss: *Fantasia*; Sor: *Fantasia Op. 7*; Berkeley: *Theme and Variations*.
- 2) End of Second Year. Etudes (Villa-Lobos: No. 6, Sor: [Segovia] No. 12); Dowland: *Fantasia*; Bach: *Third Lute Suite*; Somers: *Sonata*; Torroba: *Suite Castellana*.
- 3) End of Third Year. Etudes (Villa-Lobos: No. 2, Dodgson: [Quine] No. 20); Bach: *Prelude, Fugue and Allegro*; Sor: *Sonata Op. 22*; Walton: *Bagatelles*; Concertos (e.g., Castelnuovo-Tedesco); vocal and instrumental accompaniments; chamber works. Third-year recital.
- 4) End of Fourth Year. Etudes (Villa-Lobos: No. 10, Mignone: No. 3); Bach: *Fourth Lute Suite*; Castelnuovo-Tedesco: *Sonata*; Britten: *Nocturnal*; Bolcom: *Seasons*; Concerto (e.g. Rodrigo: *Aranjuez*); vocal and instrumental accompaniments; chamber works. Fourth-year recital.

¹ Normally secondary-level lessons in piano; see *Minimum Achievements in Piano*, p. 354, under Degree Requirements for the B.Mus.

² Students may elect any one of MUSC 150, 153, or 154, with the permission of the School.

³ It is often desirable that students take the guitar ensemble section of MUSC 160 in each of their first and second years, and that they either continue with the ensemble or elect one of the following courses in each of their third and fourth years: MUSC 156, MUSC 163, MUSC 165. Should appropriate small ensemble courses not be available in any given year, the required credits will be waived and the Music Elective requirement increased correspondingly.

HARPSICHORD

This major is designed for students planning a performing or teaching career in Harpsichord performance of both solo repertoire and continuo practice for music of the 16th, 17th, and 18th centuries.

All students who plan to major in harpsichord, including transfer students from other colleges and universities, must audition prior to the commencement of the academic year. Specific requirements for the audition are outlined on the B.Mus. application form. Students in the first or second year of a Bachelor's program in Piano or Organ who demonstrate an aptitude for harpsichord performance may apply to change their major to Harpsichord.

Students in this major will be expected to attain annual levels corresponding approximately to those given below:

- 1) End of First Year. J.S. Bach: *French Suite*; F. Couperin: *Suite from Bks. I-II*; Byrd: *Pavan and Galliard*; Frescobaldi or Froberger: *Canzona or Ricercar*; J.C. Bach: *Sonata*.
- 2) End of Second Year. J.S. Bach: *Toccatà*; L. Couperin: *Suite*; Gibbons: *Fantasia*; Frescobaldi or Froberger: *Toccatà*; Haydn: early *Sonata*; continuo work (from figured basses) in small ensembles.
- 3) End of Third Year. J.S. Bach: *English Suite or Partita*; Rameau: *Suite*; Rossi or Picchi: *Toccatà*; Sweelinck: *Chromatic Fantasy*; C.P.E. Bach: *Sonata Wq.51*; continuo work (from figured and unfigured basses) in large and small ensembles; chamber music for obbligato harpsichord, e.g., Bach sonatas for violin and harpsichord. Third-year recital.
- 4) End of Fourth Year. J.S. Bach: *Chromatic Fantasy and Fugue*; Forqueray: *Suite*; Byrd: *Walsingham Variations*; Frescobaldi: *Cento Partite*; C.P.E. Bach: *Prussian Sonata*; chamber music from the 17th and 18th centuries for both continuo and obbligato harpsichord, e.g., Rameau: *Pièces de Clavecin en Concert*. Fourth-year recital.

Performance examinations also include sight-reading and quick study for both solo repertoire and continuo realization.

¹ For students who enter the Harpsichord major after one year of General Studies concentrating in piano or organ, MUSC 182 (4) and 171 (2) will be accepted in lieu of MUSC 193 (6). In this case, MUSC 333 and 433 may be taken in the second and third years, respectively.

MUSIC SCHOLARSHIP

Combining broad upper-level course work in music theory, music history, and ethnomusicology with the performance standards of the B.Mus., this program provides a strong preparation for graduate work in music scholarship. The major begins in the third year of undergraduate study, following two years in another major. Admittance is not automatic: students must submit a written application explaining their interest in the program. Normally an applicant will not be admitted without at least an overall 80% average in the first- and second-year core courses in music theory and history, and at least a 75% average in first-year English.

MUSIC SCHOLARSHIP

Music Electives ³	15
Non-Music Electives ⁴	18
Total Credits	63(67)

¹ Students will choose two courses from MUSC 350-358.

² Students interested in ethnomusicology should take one or both of the Asian Music Ensembles, MUSC 165.

³ Electives must include at least 9 credits of music theory, music history, or ethnomusicology in addition to those required in the program. MUSC 349, Keyboard Harmony, is required of keyboard concentrators and recommended for students interested in theory. As not all courses are offered every year, students should meet with an advisor to determine which courses are best suited to the student's interests. With the approval of a supervising faculty scholar, a student may undertake a one-term, 3-credit research project, MUSC 402.

⁴ PHYS 341 is recommended for students interested in music theory. Students interested in ethnomusicology should consider courses in Anthropology or Asian languages. Students contemplating graduate study in theory or history should study German.

OPERA

This course of instruction is limited to those students wishing to pursue a career in either performance or production of opera. A successful audition and interview with the director of Opera prior to enrolment in course work is required of all prospective Opera majors.

- First Year. Vocal development, musicianship, and tone production are emphasized. Stress is laid on vocal materials best suited to the student's individual requirements and development. Exploration of operatic styles is begun.
- Second Year. Technical and interpretive vocal studies are continued. Further exploration of styles in both song and operatic literature is stressed.
- Third Year. Considerable vocal development is expected. Production and performance of operatic scenes or complete operas become a part of the student's curriculum. Emphasis on good singing techniques is continued. An increasing number of operatic arias is required as part of the student's vocal repertoire. Styles continue to be stressed. Practical work in movement and acting for the lyric stage is introduced.
- Fourth Year. Continued emphasis on vocal techniques especially on the vocal-dramatic techniques of operatic vocal literature. Operatic acting skills are further developed. Considerable understanding of representative operatic styles is expected. Performance and production of scenes or complete operas continue.

³ To be chosen in consultation with the Opera division advisor.

ORCHESTRAL INSTRUMENT

The Major in an Orchestral Instrument is formulated for students who plan to become professional performers or a teachers in schools of music or private studios.

Before entering this course of study, the student must successfully audition for the School. In general, the entrance level corresponds to the Toronto or Western Board Grade X, and there must also be the probability of significant development during the years of study at the University.

Although solo performance is stressed, all students in this program will constantly participate in large and small ensemble activity. Solo recitals are required at the end of the third and fourth years.

A detailed syllabus of repertoire representing standards of expectation in performance during undergraduate study is available on application to the School of Music.

ORCHESTRAL INSTRUMENT

¹ Normally secondary-level lessons in piano; see *Minimum Achievements in Piano*, p. 354, under Degree Requirements for the B.Mus.

² In the four years of the program, 14 credits of small ensemble are required. The ensembles taken in any given year will be determined in consultation with the ensemble directors. Wind and Percussion students must take 2 credits of MUSC 305, at least 4 credits of MUSC 162, and at least 2 credits of MUSC 157, 163, 164, or 165. String students must take 8 credits of MUSC 160 or 159, and 6 credits of any small ensemble, including 2 credits of MUSC 157 or MUSC 163.

³ MUSC 309, MUSC 310, MUSC 311, and MUSC 312 are highly recommended as especially appropriate to this major. Additional credits of ensemble are not permitted for fulfilling the Music Elective requirements.

ORGAN

A student planning to pursue a career as recitalist, teacher of organ, or church organist should enrol in this program.

All students who plan to major in Organ, including transfer students from other colleges and universities, must audition in the spring prior to the commencement of the academic year. Specific requirements for the audition are outlined in the B.Mus. application form.

In general, the entrance level corresponds to the Royal Conservatory Associateship or its equivalent.

Students accepted as Organ Performance majors will be expected to attain annual levels corresponding approximately to those listed below. In addition to solo repertoire, the areas of sight reading and quick study will be tested.

- End of First Year. Bach: Trio Sonata No. 1; Mendelssohn: Sonatas No. 1 or 6; Messiaen: Le Banquet Celeste.
- End of Second Year. Bach: Dorian Toccata; Franck: Chorales; Dupré: Prelude and Fugue in G minor.
- End of Third Year. Bach: Fantasia and Fugue in G minor; Hindemith: Sonatas; Durufle: Suite. Third-year recital.
- End of Fourth Year. Bach: Trio Sonatas No. 5 and 6; Reger: Fantasia; Messiaen: Transports de Joie. Fourth-year recital.

¹ To be elected after consultation with the Department of Religious Studies and School of Music. Students are also advised to take one or more non-credit courses from one of the theological colleges on campus after consultation with the School of Music and the college concerned.

² Students will choose two courses from MUSC 410 to 415.

PIANO

All students who plan to major in Piano, including transfer students from other colleges and universities, must audition in the spring prior to the commencement of the academic year. Specific requirements for the audition are outlined in the B.Mus. application form.

In general, the entrance level corresponds to the Royal Conservatory Associateship or its equivalent. However, students must realize that they will be accepted contingent solely on the probability of rapid development during the four-year program. The possession of a diploma in itself is not a guarantee of acceptance.

Students accepted as first-year Piano majors will be expected to attain annual levels corresponding approximately to those given below. The works cited are given only as flexible guides to the levels of technical and musical achievement to be attained and do not indicate specific repertoire requirements. Naturally, it is assumed that artistic and musical achievement will keep pace with technical growth at every stage of the student's development.

- End of First Year. Virtuoso études (e.g., Chopin: Op. 10, No. 5); Bach: French Suite No. 3; Beethoven: Sonata Op. 7; Schumann: Papillons; Bartok: Bagatelles; Concertos (e.g., Mozart: K. 453).
- End of Second Year. Virtuoso études (e.g., Chopin: Op. 25, No. 3); Bach: English Suite No. 4; Beethoven: Sonata, Op. 28; Schubert: Sonata, Op. 122; Ravel: Sonatina; Concertos (e.g., Liszt: No. 1).
- End of Third Year. Virtuoso études (e.g., Liszt: Paganini Etudes); Bach: Toccata in C minor; Beethoven: Sonata, Op. 57; Brahms: Scherzo, Op. 4; Stravinsky: Sonata; Concertos (e.g., Rachmaninoff: No. 2); vocal and instrumental accompaniments; piano chamber works. Third-year recital.
- End of Fourth Year. Virtuoso études (e.g., Chopin: Op. 10, No. 2); Bach: Chromatic Fantasy and Fugue; Beethoven: Sonata, Op. 110; Schumann: Kreisleriana; Stockhausen: Klavierstücke; Concertos (e.g., Brahms: Nos. 1 and 2); vocal and instrumental accompaniments; piano chamber works. Fourth-year recital.

In general, entrance auditions and term examinations for Piano majors include sight reading in addition to the performance of prepared repertoire.

¹ Students may elect MUSC 169 for their collaborative work with singers, supervised by their assigned chamber music instructor. One additional small or large ensemble may be taken as a music elective.

VOICE

Students planning to major in Voice must successfully audition before the Vocal division just prior to the beginning of classes, singing music of their own choice.

- First Year. Tone production and diction are stressed. Song-literature from the early Italian period and from oratorio is usually emphasized. During the first year the student will be carefully evaluated in regard to voice, musicianship, and physical

stamina for the purpose of determining whether he or she has the combination of talents needed for successful performance.

- Second Year. Technical and interpretative studies are continued. The repertoire will be expanded as the student's technical facility develops. As the use of foreign language is increased, French and German songs will comprise a larger share of the literature to be studied.
- Third Year. Considerable vocal agility, volume, range, and pleasing tone quality should be achieved in the third year. Frequent group recitals will be encouraged. Operatic and oratorio arias are a necessary part of the repertoire as well as wide-ranging choices in several languages. Ability to perform contemporary English, Canadian, and American songs will be expected. A third-year recital is required.
- Fourth Year. The fourth year should be devoted to the interpretative aspects of singing, supported by a growing technical command. It will be assumed that the student can satisfactorily perform any of the standard repertoire for his or her vocal classification. A fourth-year recital is required.

¹ Normally secondary-level lessons in piano; see *Minimum Achievements in Piano*, p. 354, under Degree Requirements for the B.Mus.

² Languages other than English: in certain cases students may concentrate on one or two of the languages required, and the indicated sequence may be altered.

³ MUSC 311 or MUSC 313, and MUSC 441 are highly recommended electives.

BACHELOR OF ARTS

The Bachelor of Arts in Music is designed for students interested in studying music as one of the liberal arts. It can also lead successfully to graduate work in music theory, music history, or ethnomusicology. For a description of the Bachelor of Arts Major, Honours, and Minor programs in Music, see *Music*, p. 144, under the Bachelor of Arts in the Faculty of Arts.

COURSES FOR STUDENTS

MAJORING IN OTHER FIELDS

The School offers a number of courses intended for students with little or no formal background in music. A selection from among the following courses will be offered each year including:

- MUSC 103, 104, 321, 322, 324, 325, and 326. These courses are not acceptable for credit toward the Bachelor of Music or toward the Bachelor of Arts Major, Honours, or Minor in Music.
- MUSC 328, 345, 428, and certain sections of 403, as indicated in the online course schedule. These courses are acceptable for credit toward the Bachelor of Music and toward the Bachelor of Arts Major, Honours, and Minor in Music.

Students who play musical instruments may enrol for credit in ensembles, such as MUSC 150, 153, 154, 156, 157, 160, 163, 164, and 165. An audition may be required. These courses are acceptable for credit toward the Bachelor of Music and toward the Bachelor of Arts Major, Honours, and Minor in Music.

DIPLOMA IN COLLABORATIVE PIANO STUDIES

The School of Music offers the Diploma in Collaborative Piano Studies. The unique demands of collaborative work with singers and instrumentalists require specialized training for pianists. The Diploma program combines repertoire study with a diverse array of courses designed to enhance specific skills in preparation for, or in place of, graduate degree work in collaborative piano.

ADMISSION

Enrolment in the program is limited. Applicants must hold a bachelor's degree, normally in piano performance, including several years of experience in collaborative work, in both vocal and chamber music, and with very strong proficiency in sight reading. Qualified candidates will be selected based on audition. Some study of German and either French or Italian is recommended. Prospective students should inquire at the School of Music for application information.

DIPLOMA REQUIREMENTS

The Diploma program consists of the following 29 credits of work, which must be completed within two years:

DIPLOMA IN COLLABORATIVE PIANO STUDIES

Core	
MUSC 170	2
MUSC 442 or 512	4
MUSC 443	3
MUSC 468	2
MUSC 561	2
MUSC 593	6
Total Credits	19
Electives	
MUSC 102	2
MUSC 131 or 271	2
MUSC 135 or 235	2
MUSC 333 or 433	2
MUSC 365 or 465	2
Contemporary Players	2
Collegium Musicum Ensemble	2
Total Credits	10

DIPLOMA IN MUSIC PERFORMANCE

The Diploma in Music Performance is an advanced program designed to prepare vocalists and instrumentalists for professional performing careers through private instruction and intensive solo and ensemble performance experiences.

ADMISSION

Prospective students should inquire at the School of Music office for application information. Only gifted performers with good prospects for a professional career, and who hold a university degree in music performance or have considerable equivalent experience, will be considered. Admission to the program is by audition, and enrolment is strictly limited. The minimal standard varies by instrument. In general, applicants should have training equivalent to that of B.Mus. Performance graduates of UBC; for example, singers should have a working command of three languages, and all applicants should have extensive familiarity with the repertoire for their instrument.

PROGRAM OF STUDY

A two-year residency is required. All students are admitted on a probationary basis for the first year. Continuation into the second year is contingent upon excellent progress, participation in the musical activities at the School, and a year-end performance jury, and must be approved by the full-time faculty in the appropriate Performance division.

The total number of credits required for the Diploma is 30, and must satisfy program requirements designed for each student by supervising faculty within the following general outline. Students must take two years and 12 credits of private performance instruction (MUSC 593), two years comprising at least 8 credits of suitable ensembles, and 10 credits of electives. Depending upon the student's program and background, additional coursework may be required, for example MUSC 170, 336 and 436 for Opera diploma students.

The specific ensembles required in the program will be determined by supervising faculty. Orchestral instrumentalists must play at least one year in a large ensemble (MUSC 550) and in a wide range of small ensembles (MUSC 556–569). Opera students will take MUSC 539 twice.

Electives should be directly related to performance skills and must be approved by a full-time faculty supervisor. They may include, for example, study in language and theatre (for singers) or in conducting and instrumentation (for instrumentalists) beyond that achieved in previous degrees.

ACADEMIC STAFF

Professors

William E. Benjamin, B.Mus. (McG.), M.F.A., Ph.D. (Prin.); Martin C. Berinbaum, B.S. in Trumpet and Music Ed. (S.Calif.), M.S. in Trumpet (Juilliard); Gregory G. Butler, B.Mus. (McG.), M.A., Ph.D. (Tor.); Stephen G. Chatman, B.Mus. (Oberlin), M.M., D.M.A. (Mich.); Jane A. Coop, B.Mus. (Tor.), M.Mus. (Peabody); Keith Hamel, B.Mus. (Qu.), A.M., Ph.D. (Harv.); Nancy Hermiston, B.Mus. (Tor.); J. Evan Kreider, B.A. (Goshen), M.Mus., Ph.D. (Indiana); David Metzger, B.A. (Dickinson Coll.), M.Phil, Ph.D. (Yale); Jesse Read, B.Mus. (Jacksonville), M.Mus. (Vic.B.C.); John B. Roeder, B.A. (Harv.), Ph.D. (Yale); Rena Sharon, B.Mus., M.Mus. (Indiana); Michael Tenzer, B.A. (Yale), Ph.D. (Calif., Berkeley).

Associate Professors

Richard Kurth, B.Sc. (Tor.), M.Mus. (Hartford), Ph.D. (Harv.); Vera Micznik, Diploma (Bucharest Conservatory), M.A. (Virginia), Ph.D. (S.U.N.Y., Stony Brook); Bruce Pullan, B.A., M.A. (Camb.); Eric J. Wilson, B.Mus., M.Mus. (Juilliard).

Assistant Professors

Sara Davis Buechner, B.Mus., M.Mus. (Juilliard), D.M.A. (Manhattan); Dorothy Chang, B.Mus., M.Mus. (Mich.), D.M.A. (Indiana); Eugenia Choi, B.Mus., M.Mus. (Juilliard); Alan Dodson, B.Mus. (Mt. All.), M.Mus., Ph.D. (W.Ont.); Alexander J. Fisher, B.M. (Northwestern), M.A. (Indiana), M.A., Ph.D. (Harv.); Corey Hamm, B.Mus. (Alta.), M.Mus., D.M.A. (Minn.); David Harding, B.M. (Juilliard); Nathan Hesselink, B.Mus. (Northwestern), M.A. (Mich.), Ph.D. (Lond., School of Oriental and African Studies); Roelof Oostwoud, Diploma, Opera School

(Tor., Royal Conservatory of Music); Jasper Wood, B.Mus., M.Mus. (Cleveland Institute of Music).

Instructors

Terence Dawson, B.Mus. (Mt. All.), M.Mus., D.M.A. (Br.Col.), Piano; Robert Pritchard, D.M.A. (Br.Col.), Theory.

Lecturers

Peter Barcza, Diploma (Tor.), Voice; Anne Berman, Ph.D., M.A. (Calif.), B.Mus. (Oberlin), Theory, Computer Music; Sonja Boon, M.Mus. (Indiana), Performance Practice and Early Music; David Boothroyd, B.A. (Mt. Allison), M.A. (Western); David Branter, B.Mus., M.Mus. (Indiana), Saxophone; Michael Bushnell, B.A. (Bennington Coll.), M.A., Ph.D. (S.U.N.Y., Stony Brook), Film Music; Susan Chai, M.Mus. (Mich.), Class Piano; Amanda Chan, B.Mus. (Br.Col.), M.Mus. (S. Calif.), Piano; Gordon Cherry, B.Mus. (Eastman), Trombone; Roger Cole, B.Mus. (Juilliard), Oboe; Rita Costanzi, B.Mus., Performers Certificate (Eastman), Harp; Gregory Cox, B.Mus. (Eastman), Trombone; Nancy DiNovo, M.Mus. (Tor.), Violin; Bruce Dunn, Conducting; Alice Enns, A.R.C.T., B.Mus. (Manit.), B.A. (Sask.), Piano; Richard Epp, B.Mus. (Manit.), M.Mus. (S.Calif.), Opera, Voice Accompanist, Opera and Song Repertoire, Vocal Accompanist; Dennis Esson, M. Mus., B.Mus. (Br.Col.), Jazz Ensemble; Brenda Fedoruk, B.Mus. (Br.Col.), Flute; Salvador Ferreras, B.Mus. (Windsor), Percussion; Kenneth J. Friedman, B.Mus. (S.Calif.), M.S. (Juilliard), Double Bass; Taras Gabora, Violin; Marisa Gaetanne, M.Mus. (Br.Col.), Voice; Peter Gal, B.Sc. (Mc.G.), Class Woodwinds; Vernon Griffiths, M.Mus. (Manhattan), Percussion; Mei Han, B.A. (Beijing Workers' Coll.), M.A. (Br.Col.), Chinese Ensemble; Patricia Hoy, B.Mus. (Texas, Austin), M.Mus., D.M.A. (S.Calif.), Piano; Cris Inguanti, B.Mus. (Northwestern), M.Mus. (Manhattan), Clarinet; Tom Keenlyside, B.Mus. (Br.Col.), Film Music Composition; Benjamin Kinsman, B.Mus. (Acadia), French Horn; Brandon Konoval, D.M.A. (Br.Col.), Music Appreciation, Music Theory; Helen Lee, Voice; Karen Lee-Morlang, B.Mus., DPST (Br.Col.), Collaborative Piano; James Littleford, B.Mus. (Br.Col.), Class Brass; Paul Luchkow, B.Mus., M.Mus. (Br.Col.), Collegium Musicum; Ramona Luengen, B.Mus., M.Mus. (Br.Col.), D.M. (Tor.), Theory, Music Appreciation; Giorgio Magnanensi, Diploma (S. Cecilia), Composition, Contemporary Players; Alan Matheson, B.Mus. (Northwestern), Trumpet; David McCoy, B.Mus., M.Mus. (Br.Col.), Piano; Lorna McGhee, Diploma (Royal Acad. Music), Flute; Richard Mingus, M.Mus. (Ohio), French Horn; Michael Murray, B.Mus. (W. Wash.), Diploma (Royal Conservatory of Music), Organ; Julia Nolan, B.Mus. (Br.Col.), M.Mus. (Indiana), Saxophone; Ray Nurse, Collegium Musicum; Doreen A. Oke, B.Mus. (Br.Col.), Harpsichord, Collegium Musicum; Beth Orson, B.Mus. (Oberlin), Oboe; Gene Ramsbottom, Clarinet; Henri-Paul Sicsic, D.M.A. (Rice), Piano; Eugene Skovorodnikov, B.Mus. (Voroshi Iovgrad), M.A. (Kharkov), D.M.A. (Leningrad), Piano; Stephen Smith, D.M.A. (Br.Col.), Choral Coach/Accompanist; Douglas Sparkes, B.Mus. (Tor.), Trombone; Frederick Stride, B.Mus. (Br.Col.), Jazz Ensemble, Jazz Theory and Arranging; Michael Strutt, Guitar; Heather Thomson-Price, Voice; Dale Throness, B.A. (Winn.), M.Mus. (Br.Col.), Voice; Elizabeth Volpe, B.Mus. (Tor.), Harp; Ellis Wean, Tuba; Miranda Wilkins Wong, A.R.C.T., B.Mus. (Vic.B.C.), M.Mus. (Johns H.), Piano.

19 The School of Nursing

A SCHOOL WITHIN THE FACULTY OF APPLIED SCIENCE

Director's Office

Sally Thorne, Director

T201–2211 Wesbrook Mall
Vancouver, BC V6T 2B5
Telephone: 604-822-7417
Fax: 604-822-7466

Nursing Website (www.nursing.ubc.ca)

The School of Nursing offers baccalaureate, master's, and doctoral programs. Students with advanced standing can complete the baccalaureate program leading to a Bachelor of Science in Nursing in five terms of 300- and 400-level upper-division courses. Registered nurses can take a program leading to a Bachelor of Science in Nursing. Baccalaureate graduates are offered a program leading to a Master of Science in Nursing. For master's graduates, the School of Nursing offers a program leading to a Doctor of Philosophy in Nursing. For details of these graduate programs, see *Nursing*, p. 269, in the Graduate Studies section.

The mission of the School, as a leading provincial, national, and international centre for nursing education, research, and practice scholarship, is to prepare outstanding nurses who are committed to excellence and innovation. Through its extensive programs of research, the School of Nursing also strives to develop and transmit knowledge regarding nursing practice and the human experience of health, illness, and healing.

BACHELOR OF SCIENCE IN NURSING

The baccalaureate program offers courses in the theory and practice of nursing. Students with significant progress toward a degree in another field or with a previous bachelor's degree begin studies in nursing with the 300-level courses. Registered nurse students also enter the program at the 300-level and may complete the program in Nursing through on-campus study, distance delivery, or a combination of modes.

ACADEMIC ADVISING

Advising is recommended. Students with advanced standing, post-RN students, and students with other academic concerns are expected to seek advising. The School reserves the right to require advising prior to registration.

ADMISSION

All inquiries relating to the Bachelor of Science in Nursing (BSN) program should be directed to the School of Nursing. Students considering application should refer to the School of Nursing website (www.nursing.ubc.ca) for more details.

The last day for submission of applications for the Winter Session beginning the following September or January is February 28, with necessary documents and official transcripts to be received in Enrolment Services by May 15. For registered nurses, application and documentation submitted to the Undergraduate Program Records Office in the School of Nursing by June 1 will be processed for either September or January admission. Once accepted, registered nurse students should consult a faculty advisor in order to determine their course sequence.

The School of Nursing has a limited enrolment. Since the number of qualified applicants usually exceeds the number of places available, fulfilment of the following requirements is not a guarantee of admission. The faculty reserves the right of selection of all students for admission and readmission to the School.

Applicants whose first language is not English must demonstrate competence in both oral and written English. Please refer to the *English Language Admission Standard*, p. 15, in the Admissions chapter.

Admission from Secondary School
Admission directly from Secondary School is suspended, effective September 2006.

Admission with Advanced Standing
Advanced standing includes a bachelor's degree or significant progress (48 credits) toward a degree in another field of study.

The School will select for admission those students who not only demonstrate academic potential, but who also most aptly display a motivation to study nursing and who demonstrate that they possess the qualities and skills most necessary to be a caring and competent professional nurse. Candidates may be invited for an interview at the discretion of the admissions committee.

Applicants from post-secondary institutions are required to have a minimum "C" average, or

grade point average of 2.0 (calculated on a 4-point scale). **Note:** Due to enrolment limitations, the academic standing required for admission is higher than the above average and is subject to change each academic year. Applicants who have completed college and/or university courses should consult the third and fourth year advisor in the School of Nursing. The University will consider granting transfer credit for all appropriate post-secondary courses completed. The following courses are required:

- English (3–6) (ENGL 112 is recommended)
- BIOL 153 (7) or BIOL 155 (6) or equivalent (pending approval by Senate, BIOL 153 and BIOL 155 will be renumbered as BIOL 253 and BIOL 255, respectively, for 2006 Winter Session).

The following courses are recommended: BIOL 112 and MICB 202 or 3 credits of microbiology.

Applicants for admission for advanced standing must submit the following additional supplemental admission requirements to Undergraduate Program, School of Nursing, T201–2211 Wesbrook Mall, Vancouver, BC, V6T 2B5, by February 28:

- 1) Name and contact information for two individuals who can provide reference information. It is recommended that one referee be a teacher, instructor, employer or supervisor.
- 2) A current resumé (structured form provided in the application package).
- 3) A brief written personal statement about the applicant's reasons for requesting admission to the School of Nursing and understanding of the profession of nursing. (Format to be provided in the application package.)
- 4) Supplemental application form and processing fee. A processing fee of CAD\$107.50 must accompany the supplemental application admission forms that are returned to the School of Nursing. This fee is non-refundable and should be made payable to the UBC School of Nursing. No applications will be processed unless the fee is received.

Inquiries and requests for a supplemental application package may be addressed to the School of Nursing (information@nursing.ubc.ca).

Incomplete applications and late applications will not be considered.

Applicants with advanced standing who are accepted will be sent a letter of acceptance and details about the registration procedures.

Admission for Registered Nurses

Registered nurses who have a Diploma in Nursing from a recognized institution will be considered for admission to the RN-BSN program. Although science prerequisites and course content are a standard element in most Canadian diploma programs, applicants from programs not including such requirements will require an additional 6 credits of human anatomy and physiology at a post-secondary level, with Chemistry 11 (or equivalent) strongly recommended.

BC applicants applying as registered nurses for on-campus or distance study must hold current practising nurse registration in BC. Out-of-province applicants wishing to complete the program by distance education must hold current practising nurse registration in the province in which they reside. International students must meet general eligibility criteria of nurse registration in BC. Students presently completing a nursing diploma program can make application for a conditional acceptance. A letter from the Director of the School of Nursing indicating the anticipated date of completion of the program should be included with the application. Official acceptance will only be granted upon successful completion of the RN examination and CRNBC registration or eligibility for membership.

Provided they meet the entry requirements, in addition students can also apply for advanced standing towards a maximum of 21 of the 45 credits required for the award of RN-BSN. Students may apply for prior learning to be considered for advanced standing towards their RN-BSN award based upon any combination of the following: transfer credit for relevant courses from other higher education institutions; credit for post-basic continuing education courses in nursing; and credit for demonstrable acquired competencies from relevant experiential learning in nursing (with a maximum of 6 out of the total of 21 credits being in the last two categories). Application for advanced standing must be through submission of a professional portfolio. The portfolio will be assessed by the School of Nursing Prior Learning Assessment and Recognition Committee, and credit awarded provided such work meets all the requirements of the University and the School of Nursing. There may be fees associated with this assessment, and applicants are directed to the School of Nursing website (www.nursing.ubc.ca) for more information.

Supplemental Application Form and Processing Fee

A University application and a supplemental application package must be completed and returned to the School of Nursing by June 1. Along with the supplemental application form, two confidential assessment forms, a resumé,

and a personal statement must be submitted. A processing fee of CAD \$107.50 plus \$50.00 for out-of-province applicants must accompany the supplemental application forms. These fees are non-refundable and should be made payable to the UBC School of Nursing. No applications will be processed unless the fee is received. Late applications will not be considered.

The School will select for admission those students who demonstrate the potential for academic success, leadership and ability to advance the nursing profession. Admission to the Post-RN program is based on evidence of the ability to achieve in an academic nursing program. Examples of evidence include, but are not limited to: a) 12 university or college credits with a minimum average of 67%, b) a minimum grade average of 67% in high school if the applicant graduated within the last five years.

Further examples of indicators of the ability to achieve include: success in specialty nursing courses, a specialty certificate, and professional accomplishments. Strong letters of reference that address the applicant's academic ability, leadership, critical thinking, and communication skills are required. A personal interview may be one component of the admissions criteria. Selection for interview will be based on an admissions index calculated from the admissions application submission data. Applicants will be ranked in relation to other applicants, and interviews will be held with selected applicants. Details regarding the supplemental application process can be found at the School of Nursing website (www.nursing.ubc.ca/start12.asp).

Readmission

The School reserves the right to readmit students and to stipulate conditions attached to readmission. Application for readmission to the School will be reviewed on an individual basis.

ACADEMIC REGULATIONS

Advancement

The minimum passing grade in each nursing course is 60%. The minimum cumulative grade average to continue in the program is 65%.

In clinical nursing courses the student is required to have successfully completed clinical practice before being allowed to write the final examination.

Supplemental examinations are not offered.

Students who do not achieve the minimum grade average for promotion will normally be required to discontinue study in the School of Nursing for at least one year.

Students admitted as registered nurses must maintain current practising provincial registration and provide evidence of it upon request in order to continue in the program.

Although satisfactory academic performance is a prerequisite to advancement, it is not the sole criterion in the consideration of the suitability of a student for promotion or graduation. The School of Nursing reserves the right to require a student to withdraw from the School if consid-

ered to be unsuited to proceed with the study or practice of nursing.

Costs Other Than Sessional Fee

There are additional expenses for uniforms, travel, and clinical practice. Students should be prepared to have clinical practice outside the Vancouver area and therefore should include travel costs for this experience in estimating total expenses. Students must have access to a car for transportation to minimize time and effort expended in travel to the varied areas used for clinical experiences. It is the student's responsibility to arrange transportation to clinical practice settings and to arrive at scheduled times. The School will provide applicants with information regarding these additional costs.

Time Period for Program Completion

Students entering the Bachelor of Science in Nursing program must normally meet all requirements within a maximum of five years from initial enrolment. Post-RN students must normally meet all requirements within a minimum of 12 months and a maximum of six years after beginning the first nursing course. Students interrupting their program are advised that curriculum changes may necessitate a period of supplementary work to enable them to fit into the subsequent courses.

Where time normally permitted for completion of degree has elapsed, candidates will be required to provide evidence to justify special consideration.

DEGREE REQUIREMENTS

English Requirements

To qualify for the Bachelor of Science in Nursing, all students must have a minimum of 3 credits in English. Students entering the program from secondary school (or those with advanced standing) must have completed the 3 credits of first-year English prior to taking clinical nursing courses. Completion of the Language Proficiency Index (LPI) examination is prerequisite to all first-year English courses at UBC. (See *Language Proficiency Index Requirement for First-Year English*, p. 120.) Post-RN students are encouraged to complete the required 3 credits of English prior to entry into the nursing program. Students who wish to complete the program in 12 months must have completed 3 credits of English prior to admission.

First and Second Year Requirements

Please Note: Admission directly from secondary school is suspended, effective September 2006.

Students in the second year of the program must complete all of the following requirements prior to progressing to 300-level nursing courses. A minimum of 48 credits is required.

- ENGL (3) (ENGL 112 is recommended)
- BIOL 153 (7) (pending approval by Senate, BIOL 153 will be renumbered as BIOL 253, for 2006 Winter Session).
- MICB 153 (3)

- PSYC courses at the 100- or 200-level (3–6)
- Electives chosen in consultation with a faculty advisor and considering the following: a balance of 100- and 200-level courses, normally with no more than 15 credits at the 100-level; courses in the biological, health and social/behavioural sciences that contribute to students' understanding of processes in health and illness
- Recommended courses in second year include FNH 250, PHAR 240, PATH 375, STAT 203, IHHS 200, IHHS 404. Faculty advisors are available for consultation regarding the selection of elective courses.

THIRD AND FOURTH YEAR COURSES

Term 1

NURS 310	3
NURS 320	4
NURS 330	6
NURS 350	3
Total Credits	16

Term 2

Required Nursing Courses

NURS 450	3
NURS 453	3
Clinical Nursing Courses	6 credits minimum
Non-Clinical Nursing Courses	15–24 credits
Electives	9–18 credits
English First Year	3
Total Credits	45

INTERPROFESSIONAL ELECTIVES

Under the auspices of the Council, the *College of Health Disciplines*, p. 291, is responsible for the administration of interprofessional courses (IHHS), which are recommended as electives to students in Nursing. For more information see Courses (www.students.ubc.ca/calendar/courses.cfm), IHHS, or visit the College of Health Disciplines website (www.health-disciplines.ubc.ca).

Post-RN Program

Registered nurse students are required to complete a program of 45 credits, consisting of 27–33 credits of nursing courses, 9–15 credits of electives, and 3 credits of first-year English. RN students will build a program in consultation with a faculty advisor.

REGISTERED NURSES ASSOCIATION OF BC

Students who successfully complete the Bachelor of Science in Nursing program and who are recommended by the Director of the School of Nursing to the College of Registered Nurses of British Columbia (www.crnbc.ca) will be eligible to write the nurse registration examination and to apply for nurse registration in BC on passing the examination.

Information relative to other requirements for registration may be obtained from the College of Registered Nurses of British Columbia, 2855 Arbutus Street, Vancouver, BC, V6J 3Y8. Applicants who have reason to believe they may not be eligible for registration should consult the professional association before beginning studies.

AWARDS AND FINANCIAL ASSISTANCE

Student Financial Assistance & Awards publishes information on awards and financial assistance on their website (www.students.ubc.ca/finance). It contains a list of current academic awards (scholarships and prizes) and financial assistance (grants, bursaries, and loans). Students are encouraged to refer to the website to determine awards for which they may be eligible and for interpretation of “full-time” study as it relates to eligibility for scholarships and other forms of financial assistance. For further information and award application forms contact Student Financial Assistance & Awards, The University of British Columbia, 1036–1874 East Mall, Vancouver, BC, V6T 1Z1; Tel: 604-822-5111.

The following awards are not administered by Student Financial Assistance & Awards:

- Registered Nurses Foundation. A number of bursaries are offered through the Foundation. Information is available from the Registered Nurses Foundation of BC, 2855 Arbutus Street, Vancouver, BC, V6J 3Y8.
- Victorian Order of Nurses for Canada. Bursaries available to students in the final year of the Bachelor of Science in Nursing program. Information and application forms may be obtained from the National Director, Victorian Order of Nurses for Canada, 5 Blackburn Avenue, Ottawa, Ontario, K1N 8A2.
- Heart and Stroke Foundation of Canada. Nursing research fellowship for graduate students undertaking study in some area of cardiovascular or stroke research. Information available from the Heart and Stroke Foundation of Canada, 1402–222 Queen St., Ottawa, Ontario, K1P 5V9.

- Local CRNBC Districts. Many Districts and other local organizations offer bursaries and/or loans to students from their area. Information can be obtained from the Director of the School of Nursing or the College of Registered Nurses of BC.
- Canadian Nurses Foundation Awards. Members of the Canadian Nurses Association may apply for awards and fellowships valued at \$4,500 to \$6,000 for study at the doctoral level, \$3,000 for study at the master's level, and \$1,500 for study at the baccalaureate level in nursing. Application forms may be obtained from CNF after November 1 and must be submitted by April 30. Information and/or application forms are available from the Canadian Nurses Foundation, 50 The Driveway, Ottawa, Ontario, K2P 1E2.

ALUMNI ASSOCIATIONS

Many School of Nursing alumni associations offer bursaries and/or loans to their members. Information about these would be obtainable from the Director of the School from which you have graduated.

ACADEMIC STAFF

SCHOOL STAFF

Honorary Professors

Madeleine Dion-Stout, B.N. (Leth.), M.A. (Car.), Ph.D. (Hon.) (Br.Col.), Nursing consultant; Verna Splane, B.Sc. (Col.), M.P.H. (Mich.), R.N., Consultant, Splane Associates; Beverly Witter Du Gas, B.A. (Br.Col.), M.N. (Wash.), Ph.D. (Br.Col.), LL.D. (Windsor), R.N.; Glennis Zilm, B.S.N. (Br.Col.), B.J. (Car.), M.A. (S.Fraser), R.N., Freelance writer, editor, and nursing historian.

Annette Browne, B.N. (Manit.), M.S.N. (Rhode Island), Ph.D. (Br.Col.), R.N.; Wendy Hall, B.N. (Manit.), M.S.N. (Br.Col.), Ph.D. (Manc.), R.N.; Angela Henderson, B.S.N., M.S.N. (Br.Col.), Ph.D. (C.) (Manc.), R.N.; Carol Jillings, B.S. (San Francisco), M.S.N. (Br.Col.), Ph.D. (Union), R.N.; Gloria Joachim, B.S.N. (Maryland), M.S.N. (Br.Col.), R.N.; M. Judith Lynam, B.Sc.(N) (McG.), M.S.N. (Br.Col.), Ph.D. (Kings Coll., London), R.N.; Jo Ann Perry, B.S. (Adelphi, N.Y.), M.S.N. (Br.Col.), Ph.D. (Wash.), R.N.; Patricia Rodney, B.S.N. (Alta.), M.S.N., Ph.D. (Br.Col.), R.N.; Elizabeth M. Saewyc, B.S.N. (Minn.), M.N., Ph.D. (Wash.), R.N.; Colleen Varcoe, B.S.N., M.S.N., Ph.D. (Br.Col.), R.N.

Assistant Professors

Lynda G. Balneaves, B.S., B.N., M.N. (Manit.), Ph.D. (Br.Col.); Geertje Boschma, B.S.N. (HBO-V; Groningen, Netherlands), Drs. (Groningen), M.S.N., Ph.D. (Penn.); Connie Canam, B.N. (Dal.), M.S.N. (Br.Col.), Ph.D. (Vic.B.C.), R.N.; Lyren Chiu, B.S.N. (National, Taiwan), M.S.N. (Calif., San Francisco), Ph.D. (Texas, Austin), R.N.; V. Susan Dahinten, B.A. (S.Fraser), M.B.A. (Br.Col.), M.S.N. (Gonzaga), Ph.D.

(Br.Col.), R.N.; **Anne Dewar**, B.A., B.Sc.N. (Sask.), M.H.P. (N.S.W.), Ph.D. (Q'ld U.T.), R.N.; **Bernard Garrett**, B.A. (Hons.), (Portsmouth Polytechnic), P.G. Cert. Ed. (Wales), Ph.D. (Portsmouth), R.N.; **John Oliffe**, M.Ed., (Vic.U.T.), Ph.D., (Deakin), R.N.; **Alison Phinney**, B.A. (McG.), M.Sc. (McG.), Ph.D. (Calif., San Francisco), R.N.; **Jane Alison Rice**, B.S.N. (Br.Col.), M.S. (Calif., San Francisco), R.N.; **Victoria Smye**, B.A. (Brock), M.H.Sc. (McM.), Ph.D. (Br.Col.), R.N.; **Fay Warnock**, B.Sc. (Alta.), M.S.N. (Alta.), Ph.D. (Alta.), R.N.; **Sabrina Wong**, B.S.N. (Br.Col.), M.S.N., Ph.D. (Calif., San Francisco), R.N.

Senior Instructors

Marion Clauson, B.S.N., M.S.N. (Br.Col.), R.N.;
Joanne Ricci, B.S.N., M.S.N. (Br.Col.), R.N.

Instructors

Elsie Tan, B.S.N., M.S.N. (Br.Col.), R.N.; **Paula Tognazzini**, B.S.N., M.S.N. (Br.Col.), R.N.

Lecturers

Cathy Ebbelohj, B.S.N., M.S.N. (Br.Col.), R.N.;
Rochelle Einboden, B.Sc.N., M.N. (Tor.), R.N.; **Lynne Esson**, B.S.N. (Vic.B.C.), R.N.; **Marlee Groening**, B.S.N., M.S.N. (Br.Col.), R.N.; **Cathryn Jackson**, B.S.N., M.S.N. (Br.Col.), R.N.; **Mary Lou Jennings**, B.S. Health Sci. (Chapman Coll.), M.S.N. (Calif., San Francisco), R.N.; **Linda A. Kowalski**, B.Sc. (Rochester), Ph.D. (S.Fraser), R.N.; **Maura Macphee**, B.S. (Mich.), M.S. (Purdue), B.S. (N. Carolina), M.S.N. (N. Colorado), Ph.D. (Colorado), R.N.; **Katharine O'Flynn-Magee**, B.S.N., M.S.N. (Br.Col.), R.N.; **Margaret Osborne**, B.N. (McG.), M.Ed. (Calg.), Ph.D. (Texas), R.N.; **Margaret Simpson**, B.N., M.N. (Calg.), Ph.D. (H.K.); **Sharon Thompson**, B.S. Health Sci. (Chapman Coll.), R.N.; **Beverley Valkenier**, B.Sc.N. (Tor.), M.S.N. (Br.Col.), R.N.

Clinical Associates

Carol Bassingthwaite, B.S.N., M.S.N. (Br.Col.), R.N.; **Margaret Cunningham**, B.S.N., M.S.N. (Br.Col.), R.N.; **Patricia Dunn**, B.S. (Chicopee, Mass.), M.S.N. (Br.Col.), R.N.; **Cheryl Entwistle**, B.S.N. (Ott.), M.Ed. (Br.Col.), R.N.; **Sharon Lowe**, B.S.N. (Br.Col.), R.N.; **Helga Marshall**, B.Sc.N. (Tor.), M.S.N. (Br.Col.), R.N.; **Enid Muirhead**, B.S.N., M.S.N. (Br.Col.); **Valerie Rogers**, B.S.N., M.S.N. (Br.Col.).

Clinical Assistants

Frances Affleck, B.S.N. (Vic.BC), R.N.; **Tatijana Dunat**, R.N.; **Farah Jetha**, B.S.N. (Br.Col.), R.N.; **Jennifer Lawton**, R.N.; **Linda Leung**, B.S.N., B.Sc. (Br.Col.), R.N.

Adjunct Professors

Romilda Ang, B.S. (Br.Col.), M.Sc.(A) (McG.), R.N., Clinical Practice Leader, Rehabilitation, Vancouver Coastal Health Authority; **Rhea Arcand**, B.Sc., M.Sc. (Alta.), R.N., Nursing consultant; **Lynne Baillie**, B.Ed., M.Ed., Ph.D. (Sask.), BC Cancer Agency; **Melanie Basso**, B.S.N., M.S.N. (Br.Col.), R.N., Senior Practice Leader-Perinatal, Children's and Women's Health Centre of B.C.; **Faye Bebb**, B.S.N. (Vic.B.C.), R.N., Clinical Nurse specialist, Youth Health Program, Children's and Women's Health Centre of B.C.; **Fiona Bees**, B.S.N. (Br.Col.), Intensive Care Nursing Cert., (Br.Col.), M.S.N. (McG.), R.N., Regional System Therapy Process Leader, BCCA; **Lynette Best**, B.S.N., M.S.N. (Br.Col.), Director, Nursing Practise, St. Paul's, Providence Health Care; **David Birnbaum**, B.A. (Calif., Berkeley), M.P.H. (Minn.), Ph.D. (Br.Col.); **Bernice Budz**, B.N. (Leth.), M.N. (Br.Col.), R.N., Clinical Nurse Specialist, Cardiac, St. Paul's, Providence Health Care; **Mollie Butler**, B.S.N., M.P.A. (Vic.B.C.), R.N., Health Consultant and Researcher; **Gail Butt**, M.H.S. (Clin. Practice), (McM.), R.N., Associate Director, BC Hepatitis Services, BC Centre for Disease Control;

Patti Byron, B.S.N., M.S.N. (Br.Col.), R.N., Program Manager, Oncology/Hematology, BMT, Children's and Women's Health Centre of B.C.; **Marcia Carr**, B.N. (McG.), R.N., Clinical Nurse Specialist, Geropsychiatry and Geriatrics, Nurse Continence Advisor, Simon Fraser Health Region; **Anne Carten**, B.S.N. (Sask.), M.N. (Alta.), R.N., Clinical Nurse Practitioner, Children and Youth Program, Vancouver Coastal Health Authority; **Rosemary Cashman**, B.A. (Chic.), M.Sc. (McG.), R.N., Advanced Practise Nurse, Neuro-oncology, B.C.C.A.-Vancouver Centre; **Loryle Cander**, B.S.N. (Alta.), M.S.N. (Br.Col.), R.N., Clinical Nurse Specialist, Children's and Women's Health Centre of B.C.; **Alice Chan**, B.Ed., B.S.N. (Br.Col.), M.S.N. (Mass.), R.N., R.P.N., Clinical Nurse Specialist, Mental Health, Vancouver Hospital, Vancouver Coastal Health Authority; **Heather F. Clarke**, B.H.Sc. (Qu.), M.N., Ph.D. (Wash.), R.N.; **Lisa Constable**, B.S.N. (Vic.B.C.), M.S.N. (Br.Col.), R.N., Clinical Nurse Specialist, Trauma, Fraser Health Authority, New Westminster; **Marilyn J. Crawford**, B.N., M.N. (Calg.), R.N., Vice President, Client Relations, Right Management Consultants, Vancouver; **Joyce Davison**, B.N., M.N., Ph.D. (Manit.), R.N., Clinical Assistant Professor, Dept. of Surgery, UBC; **Gina Dingwell**, M.A. (S.Fraser), R.N., Private Practice, Vancouver; **Sharon Dixon**, B.S.N., M.S.N., (Br.Col.), R.N., Nursing Systems Process Leader and Informatics Specialist, Providence Health Care; **Dianne Doyle**, B.S.N., M.S.N. (Br.Col.), R.N., V.P., St. Paul's, Providence Health Care; **Anne Earthy**, B.N. (McG.), M.A. (Adult Ed.), (Br.Col.), R.N., Clinical Nurse Specialist, Gerontology, Fraser Health Authority; **Marci Ekland**, B.S.N., M.S.N., (Br.Col.), R.N., Certified Reg., Rehab. Nurse (Ill.), Sexual Health Clinician, Vancouver Hospital, Vancouver Coastal Health Authority; **Christine Emery**, B.S.N., M.S.N., (Br.Col.), R.N., Clinical Nurse Specialist, Hospice/Palliative Care, Fraser Health Authority; **Hilary Espezel**, B.S.N., M.S.N. (Br.Col.), R.N., Research Nurse, Children's and Women's Health Centre of B.C.; **Barbara Findlay**, B.S.N. (Br.Col.), R.N., Research Associate, Samuelli Institute, Alexandria, V.A.; **Barbara Fitzgerald**, B.S.N. (McM.), M.N. (Penn.), R.N., Clinical Practice Leader/Advanced Practice Nurse, Toronto Sunnybrook Regional Cancer Centre; **Barbara Fitzsimmons**, B.S.N., M.S.N. (Br.Col.), R.N., Patient Services Director, Oncology/Hematology/BMT, A179; **Doreen Fofonoff**, B.N., M.N. (Calg.), R.N., Clinical Nurse Specialist, Providence Health Care; **Sharon Galloway**, B.N. (Manit.), M.S.N. (Br.Col.), R.N., Clinical Nurse Specialist, Vancouver Hospital, Vancouver Coastal Health Authority; **Irene L. Goldstone**, B.N. (McG.), M.Sc. (Br.Col.), R.N., Director, Professional Education and Care Evaluation, BC Centre for Excellence in HIV/AIDS; **Anna Gravelle**, B.Sc.N. (Windsor), M.S.N. (Br.Col.), R.N., Cystic Fibrosis Nurse Clinician, Children's and Women's Health Centre of B.C.; **Barbara Greenlaw**, B.N. (McG.), M.A. (S.Fraser), R.N., Education Consultant; **Deb Gue**, B.N., M.S.N. (Br.Col.), R.N., Clinical Nurse Specialist, Vancouver Hospital, Vancouver Coastal Health Authority; **Gillian Harwood**, B.A. (Guelph), M.Ed. (Br.Col.), R.N., Health Services Administrator, Burnaby Community, Fraser Health Authority; **Doreen Hatton**, B.S.N., M.S.N. (Br.Col.), R.N., Formerly Clinical Nurse Specialist, BC C&W; **Phyllis Hunt**, B.N. (Dal.), M.S.N. (Br.Col.), R.N., Geriatric Clinical Specialist, Peace Arch Hospital; **Carolyn Iker**, B.S.N., M.S.N. (Br.Col.), R.N., Perinatal Clinical Nurse Specialist, Children's & Women's Health Centre of B.C.; **Rosella Jefferson**, B.S.N. (W.Ont.), M.S.N. (Br.Col.), R.N., Clinical Nurse Specialist, Children's and Women's Health Centre of B.C.; **Kay Johnson**, B.A. (Royal Roads), B.H.S. (O.L.U.), R.N., Director, Griefworks BC; **Annamarie Kaan**, M.C.N. (Cardiothoracic) (Austrian Catholic U.), R.N., Clinical Nurse Specialist, Heart Failure and Heart Transplantation, Providence Health Care; **Patricia Keith**, B.M. (McG.), M.A.

(S.Fraser), Ph.D. (Br.Col.), R.N., Regional Planning Leader, Maternity and Paediatrics, Vancouver Hospital, Vancouver Coastal Health Authority; **Claudette Kelly**, B.Sc.N. (Alta.), M.A. (Br.Col.), Ph.D. (W. Aust.), R.N., Educator and Researcher, Kamloops, B.C.; **Holly Kennedy-Symonds**, B.Sc. (Bran.), M.H.Sc. (Health Care Practice) (McM.), R.N., Clinical Nurse Specialist, Vancouver Hospital, Vancouver Coastal Health Authority; **Kori Kingsbury**, B.S.N., M.S.N., (Br.Col.), R.N., Director Coordination Cardiac Services, Provincial Health Services Authority; **Karen Kline**, B.Sc.N., M.Sc.N. (Tor.), R.N., Nursing Consultant; **Vita Kolodny**, B.S., M.S. (McG.), Health Care Consultant, Vancouver; **Arden Krystal**, B.S.N., M.H.A. (Br.Col.), R.N., Director, Health Services, Burnaby Community, Fraser Health Authority; **Sheila Lamb**, B.S.N. (Vic.B.C.), M.S.N. (Br.Col.), R.N., Clinical Nurse Specialist, Vancouver Hospital, Vancouver Coastal Health Authority; **Barbara Lawrie**, B.S.N. (Vic.B.C.), M.S.N. (Br.Col.), R.N., Regional Manager, Program Development, Health Care Professional & Patient/Client Education, Vancouver Coastal Health; **Rachel Lawson**, B.S.N., M.S.N. (Br.Col.), R.N., Clinical Resource Nurse, Sunny Hill Health Centre for Children; **Adaire Leander**, B.S.N., M.S.N. ((Br.Col.), R.N., Program Leader and Clinical Nurse Specialist, Palliative Care, Fraser Health Authority; **JoAnn Leavey**, B.A.A. (Nursing), M.Ed., Ph.D. (Tor.), R.N., Health Consultant; **Lily Lee**, B.N. (Manit.), M.S.N. (Texas), R.N., IBCC, Nursing Administration, Royal Columbian Hospital; **Martha Mackay**, B.S.N., M.S.N. (Br.Col.), CNCC(C), R.N., Clinical Nurse Specialist, St. Paul's, Providence Health Care; **Heather Mass**, B.N., M.Sc. (Calg.), R.N., Chief of Nursing, Children's and Women's Health Centre of B.C.; **Marsha McCall**, B.Sc. (Alta.), M.Sc. (Br.Col.), Vancouver Richmond Health Board; **Mary McCullum**, B.S.N., M.S.N. (Br.Col.), R.N., Nurse Educator, Hereditary Cancer Program, BCCA; **Amy McCutcheon**, B.Sc.N., M.Sc.N., Ph.D. (Tor.), R.N., Executive Lead, Professional Practice, and Chief Nursing Officer, Vancouver Coastal Health Authority; **Deborah McTaggart**, B.A. (Hon.), M.Sc. (Alta.), Ph.D. (Br.Col.), R.N., Counselling Psychologist, Vancouver BC; **Janice Muir**, B.S.N. (Vic.B.C.), M.S.N. (Oregon), R.N., Clinical Nurse Specialist, St. Paul's, Providence Health Care; **Filomena Nalawajek**, B.S.N., M.S.N. (Alta.), R.N., Director, Programs and Services, Canuck Place; **Molly Nevin-Haas**, M.S.N., C.P.M.H.N., R.N., School Nurse, Fairbanks North Star Borough School District, Fairbanks, AK; **Heather Nichol**, B.S.N., (Br.Col.), M.S.N. (Tor.), R.N., Clinical Nurse Specialist, Children's and Women's Health Centre of B.C.; **Becky Palmer**, B.S.N. (Br.Col.), M.N. (Alta.), Ph.D. (Br.Col.), R.N., Director of Professional Practice, Nursing and Allied Health, Vancouver Coastal Health; **Lynne Palmer**, B.S.N. (Vic.B.C.), M.S.N. (Br.Col.), R.N., Clinical Nurse Specialist, Family Birthing Unit, Surrey Memorial Hospital, Fraser Health Unit; **Sarah Payne**, M.A. Midwifery, (Thames Valley), R.N., Clinical Nurse Specialist, Socially Complex Admissions, Children's and Women's Health Centre of B.C.; **Karen Pielak**, B.S.N., M.S.N. (Br.Col.), R.N., Nurse Epidemiologist, BC Centre for Disease Control; **Marilyn Porter**, B.N. (Dal.), M.S.N. (Br.Col.), R.N., Regional Professional Practive/Academic Leader, BCCA; **Patricia Porterfield**, B.Sc. (Alta.), M.S.N. (Br.Col.), R.N., Clinical Nurse Specialist, Palliative Care, Vancouver Hospital, Vancouver Coastal Health Authority; **Natasha Prodan-Bhalla**, B.S.N. (Western), MN/ACNP (Tor.), R.N., Clinical Nurse Specialist, Providence Health Care; **Janice Radford**, B.S.N., M.S.N. (Br.Col.), R.N., Director, Surrey Health Services, Fraser Health Authority; **Sheila Rankin-Zerr**, B.Sc., M.Ed. (Ott.), R.N., Board of Directors, Delta Hospice Society; **Jocelyn Reimer-Kent**, B.N., M.N. (Manit.), R.N., Clinical Nurse Specialist, Royal Columbian Hospital; **Lenore Riddell**, B.S.N., M.S.N. (Br.Col.), R.N., Children's and Women's Health Centre of BC; **Dafna**

Rippel, M.D., (Tel-Aviv University), I.M.S., Technion Faculty of Medicine), M.H.A. (Ben-Gurion, University of Negev, Israel); **Della Roberts, B.S.N.** (Alta.), M.S.N. (Br.Col.), R.N., Clinical Nurse Specialist, Palliative Care, Fraser Health Authority; **Betty Ross, B.S.N.** (Vic.B.C.), M.S.N. (Br.Col.), R.N., Clinical Nurse Specialist, Respiratory Sciences, Vancouver Hospital, Vancouver Coastal Health Authority; **Joanne Roussy, B.Sc., M.Sc.** (Montr.), Ph.D. (Br.Col.), R.N.; **Marilyn Rugg, B.S.N.** (Br.Col.), M.N. (Wash.), Clinical Nurse Specialist, Chemical Dependency Resource Team, Vancouver Hospital, Vancouver Coastal Health Authority; **Margaret Scaia, B.S.N.** (Br.Col.), M.N. (Calg.), Nursing Consultant; **Jennifer Scarr, B.N.** (Manit.), M.S.N. (Br.Col.), R.N., Community Health Services Educator – Infant, Children & Youth, Vancouver Coastal Health; **Linda Schwartz, B.N.** (Manit.), M.S.N. (Br.Col.), R.N., Clinical Nurse Specialist, Vancouver Hospital, Vancouver Coastal Health Authority; **Patricia Semeniuk, B.N.** (McG.), M.A. (Br.Col.), R.N., Regional Director, Health Care Professional & Patient/Client Education, Vancouver Coastal Health; **Leah E. Shapera, B.S.N., M.S.N.** (Br.Col.), R.N., Geriatric Clinical Specialist, Mount St. Joseph Hospital; **Maureen Shaw, B.N., M.N.** (Calg.), R.N., Gerontology, Clinical Nurse Specialist, Vancouver Hospital, Vancouver Hospital Health Authority; **Loretta Solomon, B.S.N., M.S.N.** (Br.Col.), Health Services Administrator, Fraser Health Authority; **Mary Spencer, B.N.**, (New Br.), M.S.N. (Br.Col.) R.N., Clinical Nurse Specialist, Cardiac Sciences, Children's and Women's Health Centre of B.C.; **Victoria Stafford, B.A., B.N.** (Qu.), M.Sc. (Portland), R.N.; **Victoria Stafford, B.A., B.N.** (Qu.), M.Sc. (Portland), R.N.; **Janine Stevenson, B.S.N.** (Br.Col.), R.N., Outreach Nurse, B.C. Centre for Disease Control Society; **Lynn Stevenson, B.S.N., M.A.** (Vic.B.C.), R.N., Chief of Professional Practice/ Nursing, Vancouver Island Health Authority; **Miriam Stewart, B.S.N.** (Br.Col.), R.N., Director Health Services, Fraser Health Authority, Burnaby; **Cynthia Stutzer, B.S.N.** (Delaware), M.S. (Oklahoma), R.N., Clinical Nurse Specialist, Oncology, Children's and Women's Health Centre of BC; **Sharon Tobert, B.S.N., M.A.** (Br.Col.), R.N., Community Practice Consultant, Burrard Health Unit; **Tracey Truant, B.S.N., M.S.N.** (Br.Col.), Regional Nurse Leader: Education and Practice, BCCA; **Greg Trueman, B.S.N., M.N.** (Alta.), Clinical Nurse Specialist, Gerontology; **Elaine Unsworth, B.S.N., M.S.N.** (Br.Col.), R.N., Clinical Nurse Specialist, Residential Care, Providence Health Care; **Rena van der Wal, B.S.N.** (Br.Col.), M.N. (Alta.), R.N., Professional Practice Director, Nursing & Allied Health, Vancouver Coastal Health; **Janet Walker, B.S.N., M.S.N.** (Br.Col.), R.N., Nurse Consultant, Walker Consultants; **Barb Warren, B.N.** (Manit.), M.S.N. (Br.Col.), R.N., Clinical Practice Leader, Peace Arch Hospital; **Joan Wearing, B.N.** (McG.), M.N. (Wash.), R.N., Nursing Policy Consultant, College of Registered Nurses of B.C.; **Nora Whyte, B.S.N., M.S.N.**, (Br.Col.), R.N., PHC Consulting Ltd; **Sandra Whytock, B.Sc.N.** (Alta.), M.Ed. (Ott.), M.S.N. (Br.Col.), Clinical Nurse Specialist, Elder Care Program, Providence Health Care; **Wendy Winslow, B.S.N., M.S.N.** (Br.Col.), R.N., Nursing Policy Consultant, College of Registered Nurses of B.C.; **Linda Yearwood, B.S.N., M.S.N.** (Br.Col.), R.N., Nurse Consultant; **Susan Young, B.N.** (McG.), M.S.N. (Manit.), R.N., Clinical Nurse Specialist, Nephrology, St. Paul's, Providence Health Care; **Juhree Zimmerman, B.S.N.** (Iowa Wesleyan), M.Ed. (Calg.), R.N., Nursing Consultant.

Associate Members

Patricia Boston, B.A., M.A. (Concordia), Ph.D. (McG.), Clinical Assistant Professor, Dept. of Family Practice, UBC; **Joan L. Bottorff, B.Sc.** (Alta.), B.Ed., M.Ed. (Sask.), M.N., Ph.D. (Alta.), R.N., Professor and Dean, Faculty of Health and Social Development, (Br.Col., Okanagan); **Gregory Hislop, B.Sc.** (S.Fraser), M.Sc., M.D. (McG.), Senior Epidemiologist, BC Cancer Agency; **Patricia Janssen, B.S.N.** (Br.Col.), M.P.H., Ph.D. (Wash.), R.N., Assistant Professor, Dept. of Health Care and Epidemiology, UBC.

ASSOCIATED AGENCIES WITH CLINICAL STAFF

British Columbia Cancer Agency, British Columbia's Children's & Women's Hospital & Health Centre, Burnaby General Hospital, Fraser Health Authority, G. F. Strong Rehabilitation Centre, Holy Family Hospital, Lions Gate Hospital, Mount St. Joseph Hospital, Peace Arch Hospital, Provincial Health Services Authority, The Richmond Hospital and Richmond Community Health Services, Royal Columbian Hospital, St Paul's Hospital, Surrey Memorial Hospital, UBC Hospital, Vancouver Coastal Health Authority, Vancouver General Hospital.

20 The School of Occupational and Environmental Hygiene

A SCHOOL WITHIN THE FACULTY OF GRADUATE STUDIES

Director's Office

Dr. Michael Brauer, Director

3rd Floor, 2206 East Mall
Vancouver, BC V6T 1Z3
Telephone: 604-822-9595
Fax: 604-822-9588

Occupational and Environmental Hygiene
Website (www.soeh.ubc.ca)

The School of Occupational and Environmental Hygiene is a teaching and research unit whose mandate is to study exposures, health effects, and control strategies in the work and community environments. The School's primary objective is to prepare professional and research hygienists with the expertise to evaluate risks from physical, chemical, and biological exposures, and with the skills and sensitivities to effect changes that will protect human health and well-being. Given the nature of the discipline, the School emphasizes applied research and interdisciplinarity. The School has formal academic links to units in the Faculties of Medicine, Applied Science, Science, Commerce, and Graduate Studies.

The study of workplace and community environments draws upon multiple disciplines, requiring diversity in the faculty members, students, and in the program of study. Therefore, students in the School have a wide variety of educational backgrounds, including the physical, chemical, and biological sciences; engineering; resource management; environmental health; pharmaceutical sciences; medicine; nursing; and kinesiology. Graduates are employed throughout Canada and abroad. Although many become practitioners in the comprehensive practice of occupational and environmental hygiene, others choose to specialize in hygiene issues related to their undergraduate field. There are excellent opportunities for hygiene professionals in management, policy analysis, inspection, advocacy, teaching, and research positions in public and private companies, government agencies, labour organizations, universities and colleges, and in private consulting.

Faculty members within the School have established world-renowned research programs involving diverse interactions with regional, national, and international communities. The research falls into five broad thematic areas: acoustics, noise and vibration; bioaerosols; exposure assessment and epidemiology;

occupational and environmental respiratory disease; and occupational and environmental policy and risk assessment. The School welcomes the participation of students in this research, and encourages them to develop research interests of their own.

In support of the research and teaching programs, the School has comprehensive exposure assessment laboratories for the analysis of a wide range of chemical, physical, and biological agents. These facilities include a broad spectrum of laboratory and field survey instrumentation which is available for student projects, faculty research, and selected non-university investigations. Research facilities include specialized laboratories for the study of acoustics, air pollution, microbiological hazards (including bioaerosols), and a mobile laboratory for conducting field surveys of pulmonary function.

MASTER OF SCIENCE

The School offers professional and research-oriented graduate education leading to the Master of Science. Because of the varied backgrounds of students, the program is course-intensive. A unique feature of the program is that students have the choice of registering in a project (Applied Option), usually completed in 20 months by a full-time student, or a thesis (Research Option), usually completed in 20 to 24 months. Part-time study is also possible. A typical class will have eight to 12 students.

The program provides graduates not only with the proficiency to practise as a hygiene professional, but also with the intellectual, social, and ethical groundwork to forge new approaches to issues affecting the health and well-being of the community.

Students are encouraged to become active in the world of hygiene by attending meetings of professional associations and by participating in local and international conferences. Students are subsidized to attend an annual meeting of researchers and practitioners, jointly sponsored by the University of Washington and the University of British Columbia, to discuss occupational and environmental health issues.

ORIENTATION AND ACADEMIC ADVISING

All entering students are required to attend an orientation session on the first day of Term 1, Winter Session, to become acquainted with the School's faculty members, staff, and fellow students.

All students are assigned a faculty advisor prior to the beginning of their first term. Students choosing the Research Option will typically choose their thesis supervisor and committee after the first term of classes.

ADMISSION

Prospective students should have completed a bachelor's degree in such areas as the physical, chemical, or biological sciences, or engineering. There are no specific prerequisite courses. However, interested individuals are encouraged to develop some breadth of knowledge during their undergraduate program by selecting courses in such fields as physiology, statistics, organic chemistry, physics, and calculus.

All applicants must meet the academic standing requirements of the Faculty of Graduate Studies. In exceptional circumstances, candidates with other backgrounds, or mature students who have had significant formal training and relevant professional experience to offset deficiencies in standing, may be admitted with the approval of the Director of the School and the Dean of Graduate Studies.

APPLICATION

The deadline for applications is January 31. A complete application for admission includes the following:

- an application for admission to the Faculty of Graduate Studies;
- three confidential letters of reference;
- two official transcripts;
- a letter of intent;
- official Graduate Records Examination (GRE) results (general test);
- proof of proficiency in the English language; and
- the application fee.

Applications for admission to the Faculty of Graduate Studies are available from the School. Applicants may also choose to use the online application on the Graduate Studies website (grad.ubc.ca).

Letters of reference should be written by individuals knowledgeable about the candidate's academic qualifications and abilities. Forms for this purpose are provided with the application, available from the School or from the Graduate Studies website. Applicants with professional experience are encouraged to solicit a letter of recommendation from a professional in the field. All reference letters must be mailed directly to the School by the referees.

Official transcripts must cover all post-secondary academic work and must be sent directly to the School. If any transcript is not in English or French, an official translation must be provided.

The applicant's letter of intent should indicate any relevant work history, and include a statement of education and career goals, reasons for seeking admission to the School, and plans for either full or part-time study.

For more information on the Graduate Records Examination, visit the GRE website (www.gre.org).

English Language Proficiency Requirement

Proof of proficiency in the English language is required if English is not the applicant's native language. Foreign applicants are required to complete the TOEFL (Test of English as a Foreign Language), TWE (Test of Written English) and TSE (Test of Spoken English) satisfactorily before any offer of admission can be made. The minimum acceptable TOEFL (or equivalent) score is 100 (on the old scale, this is equal to 600 paper-based, or 250 computer-based). For more information on the Test of English as a Foreign Language, visit the TOEFL website (www.toefl.org).

ACADEMIC REGULATIONS

The academic regulations of the University and of the Faculty of Graduate Studies apply. (See the chapter *Academic Regulations*, p. 45, in this Calendar and *Academic Regulations*, p. 223, under the Faculty of Graduate Studies.) Students who do not make satisfactory progress in the program may be asked to withdraw at any time.

DEGREE REQUIREMENTS

There are two options of study: the Applied Option and the Research Option. Students are asked to declare their choice by January of their first year of full-time study.

All students must attend the Occupational and Environmental Hygiene Seminar, OCCH 595, for a minimum of three terms. All students must also complete at least three non-credit training workshops from a list of approved workshops.

Applied Option

The Applied Option includes 39 credits of courses (30 credits of core courses and 9 credits of approved electives) and a 6-credit project (OCCH 598), generally requiring 20 months of full-time study or equivalent amount of time on a part-time basis. Students must successfully complete a comprehensive examination in order to graduate.

For information on required core courses, please contact the School or visit the SOEH website (www.soeh.ubc.ca).

The project (OCCH 598) includes a three-and-one-half-month practicum work term, usually in the summer after completion of the first full academic year. Employers may be from British Columbia, other provinces in Canada, or abroad. It is likely that the placement may require temporary relocation and therefore some additional expense. Work term positions are paid a salary by the employer, and some include a stipend for travel or moving expenses. Students have found these placements extremely rewarding.

Research Option

The Research Option includes 33 credits (4.5 credits of core courses, 16.5 credits selected from a list of additional core courses, and 12 credits of electives) and a 12-credit thesis, culminating in an oral examination. For information on required core courses, please contact the School or visit the SOEH website (www.soeh.ubc.ca).

The Research Option generally requires 20 to 24 months of full-time study or the equivalent on a part-time basis.

Students in both options are required to participate in two weekly seminar programs designed to enhance research and professional competencies.

DOCTOR OF PHILOSOPHY

The School offers a Doctor of Philosophy program for advanced study in research in the area of Occupational and Environmental Hygiene. The Doctor of Philosophy is primarily a research degree; students should enter with a strong background in their field of study.

SUPERVISORY COMMITTEES

A supervisory committee consists of the research supervisor and a minimum of two other faculty members to advise the student and develop the program of studies. The SOEH Graduate Advisor will be informed of the program of study and will sign off once the program is approved.

PROGRAM

Each doctoral student's program is designed by the supervisory committee in consultation with the student to reflect individual requirements. The first year of the doctoral program usually involves course work in preparation for the comprehensive examination and development of the thesis proposal. Students with a master's degree in Occupational and Environmental

Sciences must complete a minimum of nine credits of courses selected in consultation with the supervisory committee. Students with master's degrees in other disciplines must complete a minimum of 18 credits of courses, selected in consultation with the supervisory committee; 9 of these credits must be selected from the list of courses provided for the research-option master's degree in Occupational and Environmental Hygiene. Specific course requirements are decided by the candidate's committee in consultation with the candidate; additional courses may be necessary in support of the proposed thesis research. In addition to the standard course work, all doctoral students must participate in the research in progress seminar (OCCH 640) throughout their doctoral program. This will be a pass/fail course.

Doctoral students take a comprehensive exam upon completion of their course requirements. The focus is on theory, issues and methods in the student's area of specialization. The format will be decided in consultation with the supervisory committee. Students will design their research programs in consultation with their supervisory committee and prepare a thesis research proposal. After the thesis proposal has been approved, the candidate's efforts are devoted to research and preparation of the thesis.

ADMISSION

Applicants for admission must have a master's degree in Occupational and/or Environmental Sciences or a related field (e.g., engineering, natural sciences, health sciences), with high academic standing from a recognized institution. To ascertain the School's ability to fulfil potential applicants' objectives, a statement is required describing the applicant's research interests and objectives; this should be submitted with the application package. Ph.D. applicants are strongly encouraged to view the faculty research interests sections of the SOEH website (www.soeh.ubc.ca) and to make contact with at least one prospective research supervisor prior to submitting an application for admission.

Applications to transfer to the Ph.D. program after completion of the first year of the master's program will be considered in exceptional cases. All applicants must satisfy the general regulations of the Faculty of Graduate Studies of UBC, and must be accepted by the School of Occupational and Environmental Hygiene Admissions Committee.

The application deadline is January 31.

See *Application*, p. 367, under Master of Science for further details.

ACADEMIC REGULATIONS

The academic regulations of the University and of the Faculty of Graduate Studies apply. (See the chapter *Academic Regulations*, p. 45, in this Calendar and *Academic Regulations*, p. 223, under the Faculty of Graduate Studies.) Students who do not make satisfactory progress in the program may be asked to withdraw at any time.

PROFESSIONAL REGISTRATION

Upon completion of the program, students can begin working toward professional certification by such bodies as the Canadian Registration Board of Occupational Hygienists (Registered Occupational Hygienist, ROH) or the American Board of Industrial Hygiene (Certified Industrial Hygienist, CIH).

For more information, visit the Canadian Registration Board of Occupational Hygienists website (www.crboh.ca) or the American Board of Industrial Hygiene website (www.abih.org).

AWARDS AND FINANCIAL ASSISTANCE

Candidates wishing to apply for university, national, or international graduate awards and fellowships should check the application dates for these awards. Information on many of these awards is available from the Research Services website (www.orsil.ubc.ca). Some awards have application deadlines in the fall of the year preceding the year to which admission is sought. For awards which require prior acceptance to the program, students should submit their applications to the School at least two weeks prior and indicate the deadline they are trying to meet.

ACADEMIC STAFF

Professors

Michael Brauer, B.A. (Calif., Berkeley), Sc.D. (Harv.); **Murray Hodgson**, B.Sc. (Hons.) (Qu.), M.Sc., Ph.D. (Ston.), C. Eng; **Susan M. Kennedy**, B.A., Ph.D. (Br.Col.), M.Sc. (Harv.); **Katherine E. Teschke**, B.A. (Trent), Dipl.T. (B.C.I.T.), M.P.H. (Calif., Berkeley), Ph.D. (Wash.).

Associate Professor

Paul Demers, B.S. (William James Coll., Mich.), M.S., Ph.D. (Wash.).

Assistant Professors

Karen Bartlett, B.A. (Vic.B.C.), M.Sc., Ph.D. (Br.Col.); **Hugh Davies**, B.Sc. (Alta.), M.Sc., Ph.D. (Br.Col.).

Lecturer

Lydia Ma, M.Sc., Ph.D. (Br.Col.).

Associate Members

Gordon S. Bates, Chemistry; **Michael Buzzeli**, Geography; **Ray Copes**, Health Care and Epidemiology; **Judy Isaac-Renton**, Pathology and Laboratory Medicine; **Tom Knight**, Sauder School of Business (Commerce); **Mieke Koehoorn**, Health Care and Epidemiology; **Tim McDaniels**, Community and Regional Planning; **Aleck Ostry**, Health Care and Epidemiology; **Jerry Spiegel**, Liu Institute for Global Issues; **Christiaan van Netten**, Health Care and Epidemiology; **Helen Dimich Ward**, Medicine; **Annalee Yassi**, Institute of Health Promotion Research; **Maira Yeung**, Medicine.

Adjunct Members

John Beckett, C.R.S.P.; **David Bell**, B.Sc. (Dal.), C.I.H.; **Ed Chessor**, B.Sc. (Alta.), M.B.A. (S.Fraser), P.Eng., C.I.H.; **Warren Fox**, B.Sc. Hons. (Alta.), Dip.T. (BCIT), M.Sc. (S.Fraser); **Anya Keefe**, B.A.Sc., M.Sc. (Br.Col.); **Judy Village**, B.Sc. (Wat.), M.Sc. (S.Fraser); **Geoffrey Wright**, B.A.Sc., M.A.Sc., Ph.D. (UT).

Affiliates

Jingnan Guo, B.Sc. (Nanjing), Ph.D. (W.Aust.); **Dick Heederik**, M.Sc., Ph.D. (Wageningen); **P. J. E. Quintana**, M.P.H. (Calif., San Diego), Ph.D. (Calif., Berkeley).

Pharmaceutical Sciences Website
(www.pharmacy.ubc.ca)

The Faculty of Pharmaceutical Sciences offers courses leading to the Bachelor of Science in Pharmacy and to the Master of Science, Doctor of Pharmacy, and Doctor of Philosophy. For information on graduate programs, see *Pharmaceutical Sciences*, p. 272, under the Faculty of Graduate Studies, Degree Programs. The Faculty of Pharmaceutical Sciences was established in 1945 and is housed in the George T. Cunningham Building. The first wing of the building was completed in 1960 and is used primarily for the undergraduate program. The research wing was completed in 1970 and provides space for the graduate program.

BACHELOR OF SCIENCE IN PHARMACY

The program leading to the Bachelor of Science in Pharmacy is designed to prepare graduates to enter a wide variety of careers associated with pharmacy in community pharmacies and hospitals, in industry and government service, and in other specialized fields. The program satisfies the requirements of the College of Pharmacists of BC for academic qualification for licensing in the Province of British Columbia. It also meets standards approved by the Canadian Council for the Accreditation of Pharmacy Programs.

ACADEMIC ADVISING

Advising is not required for most students but is available on request. The Faculty reserves the right to make advising mandatory prior to registration for students with academic problems. Call 604-822-0344 to arrange an appointment with an advisor.

ADMISSION

To be considered for admission to the four-year Bachelor of Science in Pharmacy program, a student must first achieve an average grade of at least 65% in the courses listed below or their equivalents at an approved college or university. Because of the limitations in clinical clerkship sites, laboratory facilities, and resources, enrolment is limited.

The Faculty will select for admission those students who not only demonstrate academic potential but who also most aptly display a motivation to study pharmaceutical sciences and who demonstrate that they possess the qualities and skills most necessary to be a caring and potentially competent pharmacist. Candidates may be invited for an interview at the discretion of the admissions committee.

Students are not admissible to the Faculty directly from a high school or secondary school program (BC Grade 12 or equivalent obtained in any province). Admission to the Faculty is to the first year of a four-year program following a post-secondary year. Students must complete at least 30 credits of course work by the end of the academic term in which application is made. The prerequisite courses are:

Biology	BIOL 112, plus BIOL 121 and BIOL 140
Chemistry	CHEM 111 & 113 or CHEM 121 & 123
English	1st year (6 credits). ENGL 112 is recommended.
Mathematics	MATH 102 (recommended) or MATH 100, 104, 120, 180 or 184, plus MATH 103 (recommended) or MATH 101, 105 or 121
Physics	PHYS 101
Electives	As required to fulfill the 30-credit minimum or equivalent.

Also acceptable is the UBC Science One program or the Coordinated Science Program (General Science Option) and 6 credits of first-year English.

Applicants without these specific UBC courses need to present a full year each (i.e., 2 semesters) of:

- first-year university Biology with a lab
- first-year university Chemistry with a lab

- first-year university English (for which UBC gives transfer credit)
- first-year university Calculus, and
- one semester of first-year university Physics equivalent to UBC Physics 101, with a lab,
- plus electives as required to fulfil 30 credit minimum.

If admitted, these non-UBC applicants may need to register in BIOL 112 if they have insufficient background for second-year Microbiology. Students who have any doubts about their preparedness for the first-year Pharmacy program should consult an advisor at undergrad@interchange.ubc.ca or telephone 604-822-0344. Non-UBC students taking courses in BC may also wish to consult the BC Transfer Guide (www.bccat.bc.ca).

All applicants must submit the following additional supplemental admission requirements to Undergraduate Admissions, Faculty of Pharmaceutical Sciences, 2146 East Mall, Vancouver, B.C., V6T 1Z3, by February 28, 2006, 5:00 pm PST.

Pharmacy College Admission Test (PCAT)

All applicants are required to take the PCAT test in order to be considered for admission. The PCAT is a multiple-choice, general aptitude test that measures five content areas: Verbal Ability, Reading Comprehension, Quantitative Ability, Biology, and Chemistry. It is administered by Harcourt, Inc. For further information about the PCAT test, please visit www.pcatweb.info.

Please ensure that you have registered to write the PCAT well in advance of the Pharmacy Application deadline. Seating for the PCAT is limited and the deadline for registration is well in advance of the sitting. Application for the test is made directly to The Psychological Corporation. Information available at: www.pcatweb.info.

The PCAT must be written within the two years prior to an application for admission and the score reported directly to the Faculty of Pharmaceutical Sciences. If more than one PCAT score report is received for an applicant, only the most recent scores will be used.

Other Requirements

Applicants must submit the following:

- Two letters of reference (structured form provided in the Faculty's Online Pharmacy Application);
- A current resumé (structured form provided in the Faculty's Online Pharmacy Application);
- Written personal statements from the applicant as instructed in Online Pharmacy Application; and
- Online Pharmacy Application and Processing Fee. No applications will be processed unless the fee of CAD\$125.00 is received.

APPLICATION

Application inquiries may be addressed to Enrolment Services at 604-822-3014 or 604-822-5544, or to the Faculty of Pharmaceutical Sciences (pharask@interchange.ubc.ca) at 604-822-0344 or the Faculty website (www.pharmacy.ubc.ca). The UBC application form and transcripts are to be sent to Enrolment Services with the appropriate fee. The Online Pharmacy Application (PCAT scores, reference letters, resumé, and personal statements) and processing fee must be submitted online from the Faculty's website (www.pharmacy.ubc.ca).

Because enrolment in the Faculty is limited and competitive, applicants should be aware that satisfying the minimum entrance requirements does not guarantee admission but only ensures eligibility for selection. Such selection shall be solely within the discretion of the Faculty of Pharmaceutical Sciences. In the selection of applicants, preference is given to well qualified residents of British Columbia who are Canadian citizens or permanent residents of Canada. Consideration may also be given to under represented areas of BC.

Applications received with incomplete documentation or without the correct fees will not be processed. Late applications will not be considered.

Registration

Applicants who are accepted will be sent a letter of acceptance and details of the registration procedures.

ACADEMIC REGULATIONS

Regular attendance is expected of students in all their classes (including lectures, laboratories, tutorials, and seminars). Students who neglect their academic work and assignments may be excluded from the final examinations. Students who are unavoidably absent because of illness or disability should report to their instructors on return to classes.

Students who because of illness are absent from a December or April examination must submit a certificate, obtained from a physician to the Student Health Service, as promptly as possible.

In any course that involves laboratory work a student must complete the laboratory assignments with a satisfactory record before being admitted to the written examination of the

course. A student may be required by the Faculty to discontinue such a course, during any term, because of failure to maintain a satisfactory standing in laboratory work, or because of absence from an appreciable number of laboratory periods through illness or other causes.

The passing mark for a course in the Faculty of Pharmaceutical Sciences is 50%.

A student who has failed in 12 credits or more will be considered to have failed in the work of that year, and will not receive credit for any of the courses passed in that year.

Any student whose academic record, as determined by the tests and examinations of the first term, is found to be unsatisfactory, may be required to discontinue attendance at the University for the remainder of the session.

Term essays and examination papers may be refused a passing mark if they are noticeably deficient in the quality of written English, including the correct use of grammar, spelling, and punctuation.

Although satisfactory academic performance is prerequisite to advancement, it is not the sole criterion in the consideration of the suitability of a student for promotion or graduation. The Faculty reserves the right to require a student to withdraw from the Faculty if that student is considered to be unsuited to proceed with the study or practice of pharmacy.

Dean's Honour List

Graduating students and students promoted to second, third or fourth year with a standing of 80% or better in the previous Winter Session will receive the notation 'Dean's Honour List' on their records. A program of at least 90% of a full course load for the year must have been carried in order to receive this designation.

Promotion Requirements

To be promoted, a student in the Faculty of Pharmaceutical Sciences must pass all of the required courses of the program year in which the student is registered and obtain a minimum average standing of 60% in the required courses of the program year in which the student is registered.

The following notes apply to these requirements:

- Required courses are used for this computation—elective courses are excluded. Failure in elective courses requires that the course be repeated, or an approved alternative course be taken;
- A student who by these regulations is not promotable may be required to repeat the work of that year or to withdraw from the Faculty and will not be able to take any of the required courses of subsequent years;
- A student who fails to meet promotion standards for a second time, either in a repeated year or a subsequent year, will normally be required to withdraw from the Faculty;
- Courses for which credit has not been obtained must be repeated or permissible substitutes taken, in the next regular

session attended. In the Winter Session, the total for all courses taken may not exceed 41 credits except with approval of the Dean; and

- A student with standing deficient in more than 6 credits, although not permitted to register in the higher year, may be allowed to continue by registering in the lower year and taking courses in accordance with the previous paragraph.

Supplementals and Examinations for Higher Standing

Supplemental examinations are not available in all courses. In courses in which proficiency is judged on a continuing basis throughout a term, or in courses where the final examination contributes less than 40% of the course grade, no supplemental examinations are provided. In courses where supplemental examinations are allowed, it is recommended that the supplemental examination should be a comprehensive examination of the full year's work and should receive a substantial value of the total mark. The supplemental mark should replace all of the marks received on the written examinations of the lecture content of the course.

- 1) In courses where supplemental examinations are allowed, a student who has obtained an average of at least 50% in the final examinations of the session may be granted supplemental examinations in the subject or subjects failed, provided a final grade of not less than 40% was obtained. Notices will be sent to students to whom such supplemental examinations have been granted.
- 2) In any one session no candidate will normally be granted supplemental privileges in more than six credits.
- 3) A student who has failed in 12 credits or more will be considered to have failed in the work of that year, and will not receive credit for any of the courses passed in that year.
- 4) A supplemental examination may be written only once except in the case of a Final Year student who may write twice. Should a supplemental be failed the course concerned must be repeated or a suitable substitute taken.
- 5) Where supplemental privileges are granted, the standing will be recalculated for purposes of promotion based on the actual marks obtained in these examinations.
- 6) In any one session, for purposes of promotion, a student may be allowed to rewrite a maximum of six credits of course work for higher standing. These six credits of course work will be the subject or subjects in which the student has obtained the lowest standing or at the discretion of the Dean.
- 7) The total of supplementals and examinations for higher standings should not normally exceed six credits.
- 8) The above policy applies only to courses administered by the Faculty of Pharmaceutical Sciences. Faculties and departments

responsible for other required or elective courses in the pharmacy program may have different policies on supplementals and examinations for higher standing.

DEGREE REQUIREMENTS

Bachelor of Science in Pharmacy (for students admitted for September 2003 and subsequent years)

The first week of the first year will include both scheduled course work and a formal orientation program. This orientation will introduce students to the Faculty, its expectations for academic and professional conduct, and some of the skills required to succeed in the program.

¹ Taken in the summer after completing second year.

² Taken in the summer after completing third year.

³ Of the 18 elective credits required in the program, 6 must be chosen from outside the Faculty and 12 must be chosen from offerings within or approved by the Faculty.

⁴ Students must meet minimum requirements for community and institutional practice experience before opting for alternate practice sites.

Students admitted to the program prior to September 2002 who do not complete the program by April 2006 will take courses as required by the Dean's Office to fulfil the degree requirements.

Clinical Clerkships and Additional Expenses

Required clinical clerkships in facilities that have been approved as affiliated teaching sites by the Faculty of Pharmaceutical Sciences will be supervised by University-appointed personnel. These clerkships may be scheduled in community and hospital pharmacies, health care agencies and institutions, manufacturers in the pharmaceutical industry, and with selected pharmacy organizations. Clerkship sites outside the greater Vancouver area are also used. All students will be required to spend 12 of their 20 weeks of clerkship outside the Greater Vancouver area.

Students will be required to pay the B.Sc. (Pharm.) practice fee. See *Program and Course Fees*, p. 29, in the Fees, Financial Assistance and Scholarships chapter. Students should be prepared for clinical clerkships in sites around British Columbia and therefore should also include travel and accommodation costs for these experiences in estimating total personal expenses.

College Registration Requirement

Students must register with the College of Pharmacists of British Columbia during their first year in the Faculty of Pharmaceutical Sciences. This registration will be completed during Term 1 of Winter Session. Proof of such registration will be a requirement for admission into both the Pharmacy Skills Professional Practice Centre and structured practical experience courses.

English Requirements

To qualify for the Bachelor of Science in Pharmacy, students must satisfy the Faculty of Pharmaceutical Sciences English Requirement. To do this, students must obtain six credits of first-year English. Other English communication skills requirements are under Faculty review. Satisfactory completion of the Language Proficiency Index (LPI) is prerequisite to all first-year English courses at UBC. (See *Language Proficiency Index Requirement for First-Year English*, p. 120)

Interprofessional Electives

Under the auspices of the Council, the *College of Health Disciplines*, p. 291, is responsible for the administration of interprofessional courses (IHHS), which are recommended as electives to students in Pharmaceutical Sciences. For more information see "Courses Descriptions" or visit the website at www.health-disciplines.ubc.ca.

CONTINUING PHARMACY PROFESSIONAL DEVELOPMENT

Continuing Pharmacy Professional Development is sponsored jointly by the Faculty of Pharmaceutical Sciences and the College of Pharmacists of British Columbia.

Mission Statement: The Division of Continuing Professional Pharmacy Development serves pharmacists by providing quality, evidence-based, life-long learning opportunities, in a variety of innovative learning formats, to enhance knowledge, skills, and abilities to improve practice and patient health outcomes.

The goals of the Division of Continuing Pharmacy Professional Development include the following:

- 1) To enhance and refine the development of local and national needs-based professional continuing professional development programs and activities that support advancement of learning for pharmacists;
- 2) To enhance the availability and accessibility of quality continuing professional development programs for all pharmacists, regardless of distance and/or scheduling constraints;
- 3) To develop and deliver programs optimizing the use of existing, emerging, and engaging technologies;
- 4) To provide education and support to the Regional Coordinators Network to enable them to assess learning needs and develop and evaluate continuing professional development programs for the pharmacists in their communities;
- 5) To encourage pharmacists to become self-directed, life-long learners, and to assist pharmacists in developing plans for their own continuous learning;
- 6) To provide innovative programs for certification and/or enhancing professional credentials; and

- 7) To design and conduct research projects to foster continuous quality improvement, innovation, and excellence.

RESIDENCY PROGRAMS

HOSPITAL PHARMACY RESIDENCY PROGRAM

A one-year post-graduate hospital pharmacy residency program is offered by a number of hospitals in British Columbia in affiliation with the Faculty of Pharmaceutical Sciences and the BC Branch of the Canadian Society of Hospital Pharmacists. These residencies are conducted following standards established for accreditation by the Canadian Hospital Pharmacy Residency Board. Residencies normally commence in June of each year. Some residency positions are available to commence in February. Those selected are registered as Residents in the Faculty of Pharmaceutical Sciences and are assessed the applicable program fee as indicated in Fees, Financial Assistance and Scholarships chapter. The residencies are offered by the Departments of Pharmacy in the following agencies: Children's and Women's Health Centre of British Columbia, Lions Gate Hospital, Fraser Health Authority, St. Paul's Hospital, Vancouver Hospital & Health Sciences Centre, Prince George Regional Hospital, and Vancouver Island Health Authority.

Admission

Graduates of any Canadian pharmacy school are eligible for admission. All candidates must satisfy the requirements for registration with the College of Pharmacists of BC. Graduates of foreign pharmacy schools must be registrants of the Pharmacy Examining Board of Canada. The selection is highly competitive and is determined using a matching process conducted by the BC Hospital Residency Program Committee and the Canadian Society of Hospital Pharmacists. The decision is based on applicant hospital preferences, interviews, letters of reference, and academic performance during the undergraduate pharmacy program.

Application

Application forms and descriptive literature may be obtained from the Faculty's website (www.pharmacy.ubc.ca). Inquiries may also be directed to the residency coordinators in the pharmacy departments in any of the hospitals offering a residency program. The closing date for submission of completed applications is usually in mid to late October for entry into programs the following June. The closing date for applications for February residencies is usually in mid-October of the preceding year.

Program Requirements

The residency program consists of required and elective rotations in the resident's hospital and other affiliated hospitals and agencies. A certificate signifying completion of the program is awarded jointly by the hospital and the University based on satisfactory performance in rotation assignments, oral and written assess-

ments, and project work as determined by the BC Hospital Pharmacy Residency Program Committee.

COMMUNITY PHARMACY RESIDENCY PROGRAM

A one-year post-graduate community pharmacy residency program is offered by the Faculty of Pharmaceutical Sciences. The program has been developed through the cooperative efforts of representatives from the College of Pharmacists of BC, practicing community pharmacists, and the Faculty. These groups also provide on-going support and guidance as participants in the Community Pharmacy Residency Program Committee. Those selected are registered as Residents in the Faculty of Pharmaceutical Sciences and are assessed the applicable program fee as indicated in *Program and Course Fees*, p. 29.

Admission

Graduates of any Canadian pharmacy school are eligible for admission. All applicants must satisfy the requirements for registration as a pharmacist with the College of Pharmacists of BC. The selection is highly competitive and is determined using a process conducted by the Community Pharmacy Residency Program Committee based on applicant interviews, letters of reference, as well as academic and clinical performance during the undergraduate pharmacy program.

Residency Program Completion Requirements

The residency program consists of required and elective rotations in selected community pharmacies and affiliated agencies. A certificate signifying completion of the program is awarded by the Faculty based on satisfactory performance in rotation assignments, oral and written assignments, and project work as determined by the program committee.

Application

Application forms and descriptive literature may be obtained from the Faculty's website (www.pharmacy.ubc.ca), inquiries may also be directed to the community pharmacy residency coordinator. The closing date for submission of completed applications is usually mid-December for entry into the program the following July.

GRADUATE PROGRAMS

INTRODUCTION

The Faculty of Pharmaceutical Sciences offers opportunities for advanced study leading to the *Master of Science (M.Sc.)*, p. 272, and *Doctor of Philosophy (Ph.D.)*, p. 272, in the following research areas: drug discovery, drug delivery and transport, drug metabolism, pharmacokinetics and toxicology, pharmacogenomics and pharmacogenetics, drug actions and disease processes, neuropharmacology, pharmaceutical health outcomes and pharmacotherapeutics, and pharmaceutical education.

The programs are open to those holding undergraduate or graduate degrees from recognized universities, whether in pharmacy or other related disciplines. A minimum TOEFL score of 600 (paper) or 250 (computer) is required.

See the Pharmaceutical Sciences website (www.pharmacy.ubc.ca).

DOCTOR OF PHARMACY

The Faculty of Pharmaceutical Sciences also offers opportunities for study leading to the Doctor of Pharmacy (Pharm.D.) in the field of clinical pharmacy. The Pharm.D. program is open to applicants who possess a Bachelor of Science in Pharmacy or equivalent and are eligible for registration with the College of Pharmacists of British Columbia. Students must observe the following:

- 1) A student may apply for admission to the Doctor of Pharmacy (Pharm.D.) program by writing to the Pharm.D. program Admissions Committee, Faculty of Pharmaceutical Sciences;
- 2) Class size is limited. All application materials must normally be received by January 15 to be considered for admission in the same year;
- 3) All students are admitted to the program only at the start of the Winter Session (the beginning of September);
- 4) Applicants for the Pharm.D. program must hold a bachelor's degree in pharmacy or equivalent, with 80% or higher in at least 12 credits of course work, and at least 74% in the remaining course work in the last two years of the Bachelor of Science in Pharmacy program and:
 - (a) hold current registration as a pharmacist in British Columbia, or
 - (b) hold registration (Qualifying Examination) with the Pharmacy Examining Board of Canada and be eligible for registration as a qualifying candidate with the College of Pharmacists of British Columbia. Students with questions regarding this eligibility are encouraged to contact the College;
- 5) Applicants who have a bachelor's degree, or its academic equivalent, that does not meet the requirements of Item 4 above, but who have had sufficient formal training and relevant professional experience to offset such deficiencies may be granted admission on the approval of the Faculty of Pharmaceutical Sciences;
- 6) A residency in hospital or community pharmacy practice is desired, but not mandatory;
- 7) Admission to the Pharm.D. program will be in one of the following categories.
 - (a) Full standing. Granted to applicants who have met both of the requirements noted in Item 4 above.
 - (b) Provisional standing. May be granted to applicants with deficiencies in Item 4(a) above.

- 8) There must be clear evidence that the student is competent to pursue studies in the English language. Students may be required to complete a satisfactory TOEFL before any offer of admission can be made;
- 9) Admission is based on the above criteria, interviews and reference letters.

Ms. Shirley Wong, Graduate Secretary

COLLEGE OF PHARMACISTS OF BRITISH COLUMBIA

The possession of a B.Sc. (Pharm.) does not in itself confer the right to practise pharmacy in any province of Canada. In order to practise pharmacy in the Province of British Columbia, it is necessary to be registered as a pharmacist with the College of Pharmacists of British Columbia.

All applicants for registration as pharmacists with the College of Pharmacists of British Columbia are required to be registrants of the Pharmacy Examining Board of Canada.

Details of registration procedures and English language proficiency requirements may be obtained from the Registrar of the College of Pharmacists of British Columbia, 200-1765 West 8th Avenue, Vancouver, BC, V6J 1V8; web (www.bcpharmacists.org); telephone 604-733-2440, or email (info@collegepharmacists.bc.ca).

PHARMACY EXAMINING BOARD OF CANADA

The Board provides for examinations and issues a certificate to the successful candidate that may be filed with a Canadian provincial licensing

body in connection with an application for licence to practise Pharmacy under the laws of that province. Information relative to the dates of examinations, application forms, etc., may be obtained from the Registrar, Pharmacy Examining Board of Canada (www.pebc.ca), Suite 601, 415 Yonge Street, Toronto, Ontario M5B 2E7; Tel: 416-979-2431.

ACADEMIC STAFF

FACULTY ADMINISTRATION

Robert D. Sindelar, Dean
Helen M. Burt, Associate Dean, Research & Graduate Studies; David W. Fielding, Associate Dean, Academic; Marguerite M. Yee, Director, Student Services.

Associate Members

Emma Guns, Ph.D., The Prostate Centre, VGH;
Christopher E.R. Orvig, Ph.D., Chemistry.

DIVISION OF BIOMOLECULAR AND PHARMACEUTICAL CHEMISTRY

Ronald E. Reid, Chair

Professors

Stelvio M. Bandiera, B.Sc. (Wat.), M.Sc. (Dal.), Ph.D. (Guelph); Keith M. J. McLane (On Leave), B.Sc. (Pharm.), Ph.D. (Alta.); Ronald E. Reid, B.S.P. (Sask.), Ph.D. (Lond.); Robert D. Sindelar, B.A. (Millikin), M.S., Ph.D. (Iowa).

Assistant Professor

Adam Frankel, B.A. (Calif., Santa Barbara), Ph.D. (Calif., Los Angeles).

Senior Instructor

Simon P. Albon, B.Sc., M.Sc. (Br.Col.).

Instructor

Fatima Marankan, B.Sc. (Niamey, Niger), M.Sc. (Laval, Queb.), Ph.D. (Ill.).

Professor Emeritus

Frank S. Abbott, B.S.P., M.S. (Sask.), Ph.D. (Purdue).

Adjunct Professor

Brad Popovich, B.A. (Oakland U., Rochester), M.S. (S.Lawrence Coll., Bronxville), M.Sc., Ph.D. (McG.).

Associate Member

Thomas A. Grigliatti, B.S. (S.Clara U.), M.Sc. (S.Franisco State U.), Ph.D. (Br.Col.).

DIVISION OF PHARMACEUTICS AND BIOPHARMACEUTICS

Kishor M. Wasan, Chair

Professors

Helen M. Burt, B.Pharm. (Bath), Ph.D. (Br.Col.); K. Wayne Riggs, B.Sc. (Pharm.), M.Sc., Ph.D. (Br.Col.); Kishor M. Wasan, B.Sc. (Pharm.), M.Sc.(Pcut.), Ph.D. (Texas).

Associate Professor

Thomas Chang, B.Sc. (Psych.), B.Sc. (Pharm.), Ph.D.(Pcol), (Br.Col.).

Assistant Professors

Urs Hafeli, B.Sc. (Pharm.) (F.I.T., Zurich, Switzerland), Ph.D. (P.S.I., Villigen, Switzerland); Sylvia Ng (P/T), B.Sc., M.Sc. (Br.Col.), Ph.D. (Tor).

Adjunct Professors

Marcel Bally, B.Sc., M.Sc. (Texas A&M), Ph.D. (Br.Col.); Richard Liggins, B.Sc. (Pharm.), Ph.D. (Br.Col.); Ric Procyshyn, B.Sc. (Pharm.) (Man.), Ph.D. (Br.Col.), Pharm.D. (Br.Col.); Ellen Wasan, B.Sc.(Pharm.) (Houston), Ph.D. (Case Western Reserve U., Cleveland), Ph.D. (Br.Col.); Dawn Waterhouse, B.Sc., M.B.A. (S.Fraser), Ph.D. (Br.Col.); Donald T. Yapp, B.Sc., Ph.D. (Br.Col.).

Professor Emeritus

James E. Axelson, B.S. (Wash.), Ph.D. (N.Y. State, Buffalo).

DIVISION OF PHARMACOLOGY AND TOXICOLOGY

Brian Rodrigues, Chair

Professors

Sidney Katz, B.Sc., M.Sc., Ph.D. (McG.); Kathleen M. Macleod, B.Sc. (Mc.G.), Ph.D. (Alta.); Brian Rodrigues, B.Sc., M.Sc. (Karachi), M.Sc., Ph.D.(Br.Col.); Peter J. Soja, B.Sc. (Southeastern Mass.), M.Sc., Ph.D. (Br.Col.).

Associate Professor

Thomas K.H. Chang, B.Sc. (Pharm.), Ph.D. (Br.Col.); Ujendra Kumar, B.Sc., M.Sc. (Meerut U., India), Ph.D. (Jodhpur U., India).

Assistant Professor

Brian E. Cairns, B.Sc. (Honours), B.Sc. (Pharm.), Ph.D. (Br.Col.); Lucy Marzban, Assoc. Degree (Shahid Beheshti U., Iran), Doctoral Degree (Tehran U., Iran), Ph.D. (Br.Col.); Judy M.Y. Wong, B.Sc., M.Sc., Ph.D. (Tor).

Adjunct Professors

Shawn C. Black, B.Sc., M.Sc., Ph.D. (Br.Col.); Glen Tibbits, B.Ed. (McG.), M.S., Ph.D. (Calif., L.A.).

Professors Emeriti

Gail D. Bellward, B.S.P., M.S.P., Ph.D. (Br.Col.); John H. McNeill, B.Sc. (Pharm.), M.Sc. (Alta.), Ph.D. (Mich.), FRSC, FIACS, FACN, FACHS.

DIVISION OF CLINICAL PHARMACY

Peter J. Jewesson, Acting Chair

Professors

Mary H. H. Ensom, B.S., Pharm.D. (Kentucky), FASHP, FCCP, FCSHP; Peter J. Jewesson, B.Sc. (Pharm.), Ph.D. (Br.Col.), FCSHP; Marc Levine, B.Sc. (McG.), B.Sc. (Pharm.) (Br.Col.), Ph.D. (McM.); James P. McCormack, B.Sc., B.Sc. (Pharm.) (Br.Col.), Pharm.D. (S. Carolina).

Associate Professors

Bruce C. Carleton, B.Pharm. (Wash.), Pharm.D. (Utah); Fawziah Marra, B.Sc. (Pharm.), Pharm.D. (Br.Col.).

Associate Professors, Part-time

Peter S. Loewen, B.Sc. (Pharm.), Pharm.D. (Br.Col.).

Assistant Professors, Part-time

Patricia Gerber, B.Sc.(Pharm.), Pharm.D. (Br.Col.); Leela John, B.Sc., B.Sc.(Pharm.) (Alta.), Pharm.D. (Br.Col.); Adil S. Virani, B.Sc. (Pharm.), Pharm.D. (Br.Col.).

Senior Instructor

Penelope F. Miller, B.Sc. (Pharm.) (Br.Col.), M.A. (San Diego State).

Clinical Assistant Professors

For a complete listing of our Clinical Faculty please see the website (www.pharmacy.ubc.ca).

Clinical Instructors

For a complete listing of our Clinical Faculty please see the website (www.pharmacy.ubc.ca).

Adjunct Professors

Paul Cheng, B.Sc. (Pharm.) (Br.Col.), M.B.A. (W.Ont.), Surrey Memorial Hospital; **Derek Daws**, B.Sc., B.Sc. (Pharm.) (Br.Col.), B.C. Drug and Poison Information Centre; **Robin J. Ensom**, B.Sc. (Pharm.) (Br.Col.), Pharm.D. (S. Carolina), FCSHP, St. Paul's Hospital; **John Hope**, B.Sc. (Pharm.) (Br.Col.), Burnaby Hospital; **Barbara Jewesson**, B.Sc. (Pharm.) (Br.Col.), VHHSC; **Sam Louie**, B.Sc. (Pharm.) (Br.Col.), Lion's Gate Hospital; **Robert Nakagawa**, B.Sc. (Pharm.) (Br.Col.), FCSHP, Simon Fraser Health Region; **Ian Sheppard**, B.Sc. (Pharm.) (Br.Col.), Children's and Women's Health Centre of B.C.; **Barbara Thompson**, B.Sc. (Pharm.) (Br.Col.), Riverview Hospital.

DIVISION OF PHARMACY PRACTICE

David W. Fielding, Acting Chair

Professor

David W. Fielding, B.Sc. (Pharm.), M.Sc. (Dal.), Ed.D. (Br.Col.), Dr. Tong Louie Chair in Pharmacy Administration.

Assistant Professors

Rosemin Kassam, B.C. (Pharm.) (Alta.), Pharm.D. (Tor.); Larry D. Lynd, B.S.P. (Sask.), Ph.D. (Br.Col.); Carlo A. Marra, B.Sc. (Pharm.), Pharm.D., Ph.D. (Br.Col.).

Assistant Professor, Part-time

Judith A. Soon, B.Sc. (Pharm.), M.Sc., Ph.D. (Br.Col.).

Senior Instructors

Lynda Eccott, B.Sc. (Vic.B.C.), M.Sc. (Br.Col.); Marion Pearson, B.Sc. (Pharm.) (Br.Col.); Marguerite Yee, B.Sc. (Pharm.) (Br.Col.).

Instructor

Ingrid Price, B.Sc. (Okanagan Coll.), M.A., Ph.D. (Br.Col.).

Instructor, Part-time

Arun Verma, B.Sc. (Bioc.), B.Sc. (Pharm.), M.Sc., Ph.D. (Br.Col.).

Lecturers

Colleen Brady, B.Sc. (Hons. Biol), B.Sc. (Pharm.) (Alta.); Catherine Ekelund, Diplome d'Etat de Pharmacie, (U. Paris XI); Sandra E. Huttery, B.S.P. (Sask.); Janice Moshenko, B.Sc., M.Sc. (Br.Col.); Hilary Watson-McCormack, B.Sc. (Pharm.) (Br.Col.).

Lecturers, Part-time

Anar Dossa, B.Sc., Pharm. (Br.Col.), CDE; Tamiz Kanji, B.Sc. (Pharm.), (Br.Col.); Angela Kim-Sing, B.Sc. (McM.), B.Sc.(Pharm.) (Br.Col.), Pharm.D. (Medical U. of S. Carolina); Mona Kwong, B.Sc. (Pharm.), M.Sc. (Br.Col.); Sheryl Peterson, B.Sc. (Agr.), B.Sc. (Pharm.) (Br.Col.); Rola Priatel, B.Sc. (Pharm.) (Br.Col.).

Professors Emeriti

Finlay A. Morrison, Pharm.D. (Calif.); Bernard E. Riedel, C.D., B.Sc., M.Sc. (Alta.), Ph.D. (W.Ont.).

Adjunct Professor

Marshall Moleschi, B.Sc. (Pharm.), (Br.Col.).

Associate Member

Aslam Anis, B.S.S. (Dhaka U., Bangladesh), M.A., Ph.D. (Car.).

Affiliated Agencies

Clinical staff in Pharmacy Departments of numerous health care agencies provide teaching services to the Faculty. For a complete listing of these Pharmacy Departments and their clinical preceptors see the website (www.pharmacy.ubc.ca).

Affiliated Community Pharmacies

Pharmacy staff at numerous community pharmacy sites provide teaching services to the Faculty. For a complete listing of these pharmacies and their clinical preceptors see the website (www.pharmacy.ubc.ca).

CONTINUING PHARMACY PROFESSIONAL DEVELOPMENT

Janice Moshenko, Director
Sheryl Peterson, Assistant Director.

REGIONAL COORDINATORS

The Division of Continuing Pharmacy Professional Development works closely with a province-wide network of Regional Coordinators to ensure that continuing education programs are accessible to pharmacists throughout BC. For a complete listing of current Regional Coordinators, please visit the UBC CPPD website (www.pharmacy.ubc.ca/cppd/index.html).

Rehabilitation Sciences Website
(www.rehab.ubc.ca)

The School of Rehabilitation Sciences provides professional preparation in the rehabilitation sciences, and awards the following degrees:

- **Professional Degree Programs:** The School first offered the Master of Occupational Therapy and Master of Physical Therapy programs as of September 2004. (The last degrees for the Bachelor of Science in Occupational Therapy and the Bachelor of Science in Physical Therapy were awarded in May 2005). The Master of Occupational Therapy and Master of Physical Therapy degrees provide the professional education necessary to obtain a license to practice occupational therapy and physical therapy, respectively. They differ from the research master's degree that prepares practitioners with advanced research skills and requires completion and defense of a thesis.
- **Research Degree Programs:** Opportunity for graduate study leading to a Master of Science in Rehabilitation Sciences and Doctor of Philosophy is also available. Our research programs are designed to prepare individuals to conduct research independently and in collaboration with other scientists. Students will investigate an area of research relevant to rehabilitation through critical analysis of problems related to basic sciences, clinical practice, or to development of theory.
- **Online Programs:** The Master of Rehabilitation Science (M.R.Sc.) is a 30-credit, non-thesis, online master's degree developed by the School of Rehabilitation Sciences. In addition to requiring the five graduate courses (15 credits) in the Graduate Certificate in Rehabilitation,

learners in this advanced master's degree will also complete other courses and a major project. This master's degree has been designed for occupational therapists, physical therapists, and other health professionals with a baccalaureate degree who have already established their eligibility to practice in their discipline but want advanced knowledge to inform their practice. The Graduate Certificate in Rehabilitation consists of five graduate-level courses, developed by the Schools of Rehabilitation Science(s) at The University of British Columbia in Vancouver, British Columbia and McMaster University in Hamilton, Ontario. The program has been designed for rehabilitation practitioners who want up-to-date knowledge and skills for best practice.

MASTER OF OCCUPATIONAL THERAPY

Occupational therapists provide specialized rehabilitation services to maintain, restore, or improve the ability of children and adults to perform the occupations of daily life, which may be impaired as a result of illness, injury, congenital or acquired disabilities, or social disadvantage. Occupational therapists focus on adapting the environment or improving the person's skills, to enhance performance in the areas of self care (eating, dressing, personal hygiene), productivity (household work, employment, school), and leisure activities, thereby improving overall health and quality of life.

The Master of Occupational Therapy degree provides the professional education necessary to obtain a license to practice occupational therapy. It differs from the research master's degree which prepares practitioners with advanced research skills and requires completion and defense of a thesis.

Applicants must meet the admissions requirements of the Faculty of Graduate Studies, and admission is offered on a competitive basis. The annual enrolment and class size is limited to 40 seats.

REQUIREMENTS

Completion of a recognized baccalaureate degree in any field and the successful completion of the following prerequisites:

- Biological Sciences (3 credits)
 - Social Sciences (3 credits)
 - Behavioural Sciences (3 credits)
- 10) Academic standing of a minimum B+ (76%) average in senior level courses (300 and 400 level)
 - 11) 70 volunteer hours or work experience with people with disabilities
 - 12) Three reference letters (two verifying volunteer hours and experience and one verifying the applicant's ability to succeed in a graduate program.) Forms to facilitate the reference letters will be provided.
 - 13) Residency: Primary consideration is given to residents of British Columbia. Out-of-province residents or international students will only be considered in special circumstances or in the event that there are not enough eligible BC applicants.
 - 14) English competency: Applicants who have completed a degree from a university outside Canada in which English is not the primary language of instruction must present evidence of competency to pursue studies in the English language prior to being extended an offer of admission. Acceptable English language proficiency tests for applicants to the Master of Occupational Therapy program are:
 - (a) TOEFL (Test of English as a Foreign Language): a minimum score of 580 (paper version); 237 (computer version);
 - (b) MELAB (Michigan English Language Assessment Battery): a minimum overall score of 81;
 - (c) IELTS (International English Language Testing Service): a minimum overall band score of 6.5 is required with a minimum score of 6.0 in each component of the academic (not general) IELTS test.
 - 15) Interview: Applicants who meet the above minimum requirements are eligible for interview consideration (verbal communication skill, maturity, and personal suitability). Fulfilment of the minimum requirements, however, does not guarantee an

interview. Selection of interview candidates is based on the academic standing in the senior level courses.

The full-time Master of Occupational Therapy curriculum spans two calendar years and comprises six terms.

The Master of Occupational Therapy program includes the following courses:

Course	Credits
ANAT 392 Gross Anatomy of the Limbs and Trunk	4
RHSC 420 Elements of Neuroanatomy & Neurophysiology	4
RSOT 511 Fundamentals of Theory and Practice	3
RSOT 513 Health, Illness and Occupation	3
RSOT 515 Practice Skills and Therapeutic Procedures I	3
RSOT 519 Professional Practice I	10
RSOT 521 Occupational Analysis, Activity and Participation	3
RSOT 525 Practice Skills and Therapeutic Procedures II	3
RSOT 527 Evidence for Practice I: Research Paradigms and Methods	3
RSOT 537 Evidence and Reasoning in Practice	2
RSOT 541 Theory and Practice: Advanced Applications	3
RSOT 545 Practice Skills and Therapeutic Procedures III	4
RSOT 547 Evidence for Practice II: Project	6
RSOT 549 Professional Practice II	18
RSOT 551 Societal and Environmental Influences on Practice	3
RSOT 553 Developing Effective Programs	3

APPLICATION FOR ADMISSION

Persons interested in applying to the Master of Occupational Therapy program may call or write for application materials or use the School of Rehabilitation Sciences website (www.rehab.ubc.ca). Individuals interested in applying to the Master of Occupational Therapy program should complete and submit necessary forms and transcripts **no later than February 1** in the year of application to be eligible for beginning the course of study in late August.

MASTER OF PHYSICAL THERAPY

Physical therapists specialize in the assessment and treatment related to movement. Common movement disorders result from impairment of the neuromuscular, musculoskeletal, respiratory, or cardiovascular systems. Following assessment of their clients, physical therapists often use physical agents such as therapeutic exercise, heat, cold, and electrical stimulation to increase muscle strength and function, reduce pain, promote general health and fitness, and prevent disability. As specialists in movement dysfunction, physical therapists also provide expertise in human mobility, carefully analyzing gait patterns and prescribing treatment regimens or devices (such as braces, crutches or wheelchairs)

to enable clients to move independently through their environments.

In many settings, therapists serve as members of a team of rehabilitation specialists, which may include physicians, nurses, social workers, special educators, speech pathologists and psychologists. Physical therapists work in hospitals, rehabilitation centres, psychiatric institutions, industrial facilities, government and voluntary health agencies, schools, extended care facilities, the client's home, or in private practice.

The Master of Physical Therapy degree provides the professional education necessary to obtain a license to practice physical therapy. It differs from the advanced or research master's degree which prepares practitioners with advanced research skills and requires completion and defense of a thesis.

Applicants must meet the admissions requirements of the Faculty of Graduate Studies, and admission is offered on a competitive basis. The annual enrolment and class size is limited to 40 seats.

REQUIREMENTS

- Completion of a recognized baccalaureate degree in any field and the successful completion of the following prerequisites:
 - (a) 1st year Biology (6 credits or equivalent)
 - (b) 1st year Physics (3 credits or equivalent)
 - (c) Chemistry 12 or higher
 - (d) Basic Human Anatomy (3 credits or equivalent)
 - (e) Basic Human Physiology 301 (6 credits or equivalent)
 - (f) Psychology (3 credits or equivalent)
 - (g) Statistics (3 credits or equivalent)
- Academic standing of a minimum B+ (76%) average in senior level courses (300 and 400 level)
- 70 volunteer hours or work experience with people with disabilities
- Three reference letters (two verifying volunteer hours and experience and one verifying the applicant's ability to succeed in a graduate program.) Forms to facilitate the reference letters will be provided.
- Residency: Primary consideration is given to residents of British Columbia. Out-of-province residents or international students will only be considered in special circumstances or in the event that there are not enough eligible BC applicants.
- English competency: Applicants who have completed a degree from a university outside Canada in which English is not the primary language of instruction must present evidence of competency to pursue studies in the English language prior to being extended an offer of admission. Acceptable English language proficiency tests for applicants to the Master of Physical Therapy program are:
 - (h) TOEFL (Test of English as a Foreign Language): a minimum score of 580

(paper version); 237 (computer version);

- (i) MELAB (Michigan English Language Assessment Battery): a minimum overall score of 81;
- (j) IELTS (International English Language Testing Service): a minimum overall band score of 6.5 is required with a minimum score of 6.0 in each component of the academic (**not** general) IELTS test.

Applicants who meet the above minimum requirements are eligible for interview consideration (verbal communication skill, maturity and personal suitability). Fulfilment of the minimum requirements, however, does not guarantee an interview. Selection of interview candidates is based on the academic standing in the senior level courses.

The full-time Master of Physical Therapy curriculum spans two years and two months in length and comprises seven terms.

The Master of Physical Therapy program includes the following courses:

Course	Credits
ANAT 392 Gross Anatomy of the Limbs and Trunk	4
PHYL 301 Human Physiology	6
RHSC 420 Elements of Neuroanatomy & Neurophysiology	4
RSPT 512 Directed Studies in Pathology in Rehabilitation	6
RSPT 514 Clinical Practice I	3
RSPT 516 Clinical Decision-Making I	2
RSPT 518 Exercise and Movement	2
RSPT 524 Clinical Practice II	10
RSPT 526 Clinical Decision-Making II	1
RSPT 528 Case-based Integration I	1
RSPT 532 Rehabilitation Research I	3
RSPT 538 Case-based Integration II	1
RSPT 544 Clinical Practice III	18
RSPT 546 Clinical Decision-Making III	3
RSPT 548 Case-based Integration III	1
RSPT 558 Case-based Integration IV	2
RSPT 564 Clinical Practice IV	10
RSPT 566 Clinical Decision-Making IV	4
RSPT 572 Rehabilitation Research II	2
RSPT 578 Case-based Integration V	1

APPLICATION FOR ADMISSION

Persons interested in applying to the Master of Physical Therapy program may call or write for application materials or use the School of Rehabilitation Sciences website (www.rehab.ubc.ca). Individuals interested in applying to the Master of Physical Therapy program should complete and submit necessary forms and transcripts **no later than February 1** in the year of application to be eligible for beginning the course of study in late August.

MASTER OF REHABILITATION SCIENCE

The online Master of Rehabilitation Science (M.R.Sc.) program is intended for qualified professionals who practice in rehabilitation settings. The program requires 30 credits of required and elective coursework that includes a major project, and successful completion of a comprehensive examination in which the ability to transfer cumulative knowledge to rehabilitation practice is assessed. The degree may be completed part-time or full-time within five years.

Graduate Certificate in Rehabilitation program students may be eligible to request transfer credits.

ADMISSION REQUIREMENTS

Applicants must meet the admissions requirements of the Faculty of Graduate Studies; admission is offered on a competitive basis.

Requirements

- Completion of a recognized four year baccalaureate degree at an accredited academic institution.
- Applicants must be an occupational therapist, physical therapist or rehabilitation practitioner in a related health and human services discipline.
- Academic standing of a minimum B+ (76%) average in senior level courses (300 and 400 level).
- Three reference letters (at least two of which should be written by an individual who has knowledge of the applicant's academic and/or research abilities).
- Submission of a Faculty of Graduate Studies Application Form (available through www.rehab.ubc.ca).
- Submission of a statement of intent to the School of Rehabilitation Sciences.
- English competency. Applicants who have completed a degree in which English is not the primary language of instruction must present evidence of competency to pursue studies in the English language prior to being extended an offer of admission.

Recommended: Completion of an introductory course in Statistics.

The School reviews applications twice a year, April 30 and September 15 for September and January cohorts respectively.

The required course work (21 credits including the 6-credit major project) includes the following: RHSC 501 (Evaluating Sources of Evidence), RHSC 503 (Reasoning and Decision-Making), RHSC 505 (Measurement in Practice), RHSC 507 (Developing Effective Rehabilitation Programs), RHSC 509 (Facilitating Learning in Rehabilitation Contexts), RHSC 587 (Major Project, Part I), RHSC 589 (Major Project, Part II), and electives (students select 9 of these 12 credits) : RHSC 500 (Advanced Concepts for Rehabilitation Research), or INDS 502 (Advanced Concepts in Health Research), or RHSC 581 (Writing to

Enhance Practice), or RHSC 583 (Applying Research to Practice).

For more information about the online Master of Rehabilitation Science (M.R.Sc.) program and admission requirements and procedures please go to the Rehabilitation Sciences website (www.rehab.ubc.ca).

MASTER OF SCIENCE

The Master of Science program is designed to prepare individuals to conduct research independently and in collaboration with other scientists. Students will investigate an area of knowledge within rehabilitation and develop skills that permit a critical analysis of problems which can be related to basic sciences, clinical practice, or to development of theory.

The program may be pursued by full or part-time students. Full-time study would normally require approximately 24 months, including completion of the thesis. A minimum of 30 credits is required for the degree. This consists of 18 credits of required course work in the School of Rehabilitation Sciences at the 500-level, which includes a 12-credit thesis. Twelve elective credits are also required, and these may be selected from courses offered within the School or from other academic units. At least six of the elective credits must be at the 500-level or above.

The specific courses taken will depend on the area of research concentration chosen, in consultation with a research supervisor. Once accepted, each student must have a plan of studies approved by his/her research supervisor and/or the graduate co-ordinator.

Courses regularly offered in the School include INDS 502/RHSC 500 (Advanced Concepts for Rehabilitation Research), RHSC 502 (Rehabilitation Theory), RHSC 504 (Directed Studies), RHSC 506 (Current Topics in Rehabilitation), RHSC 510 (Disability: Social, Economic, and Political Influences), RHSC 515 (Exercise Physiology and Metabolism in Injury and Disease), and RHSC 520 (Neurorehabilitation). Courses regularly offered as part of the post-graduate certificate in Rehabilitation include: RHSC 501 (Evaluating Sources of Evidence), RHSC 503 (Reasoning & Decision Making), RHSC 507 (Developing Effective Rehabilitation Programs), RHSC 505 (Measurement in Practice), RHSC 509 (Featuring Learning in Rehabilitation Contexts). These courses are available as electives to qualified graduate students. For details, please refer to the website (www.rehab.ubc.ca).

Minimum admission requirements include a degree in occupational therapy, physical therapy, or a related rehabilitation profession, an academic record which meets the requirements of the Faculty of Graduate Studies, and completion of a minimum of 3 credits in research methodology and/or analysis. Applicants from non-Canadian universities are required to provide general GRE (Graduate Record Examination) scores as part of their application. Preference will be given to applicants who hold degrees in occupational or

physical therapy, are qualified to practice their rehabilitation profession in British Columbia, and who have had recent clinical experience providing rehabilitation care.

Persons interested in applying to the program should request additional program and application information from the School of Rehabilitation Sciences.

DOCTOR OF PHILOSOPHY

The School of Rehabilitation Sciences offers a program for advanced research study and original investigation in Rehabilitation Sciences at the Doctor of Philosophy (Ph.D.) level. This program is governed by the general requirements for the Doctor of Philosophy as described by the Faculty of Graduate Studies.

The program will focus on the discipline of Rehabilitation Sciences, the study of providing treatment and education to persons with temporary or permanent disability to return them to maximum function, well-being, and personally-satisfying levels of independence.

A thesis-based master's degree in Rehabilitation Sciences, or in other related fields of study along with appropriate undergraduate and graduate courses, is normally required for admission. Appropriate coursework will be selected in consultation with the candidate's committee and will depend on the student's background and field of study. RHSC 500 and RHSC 502 are required courses. All candidates are required to complete a written and oral comprehensive examination after completion of all course work. Following the comprehensive examination, the student will present a formal thesis proposal for approval by the candidate's committee before proceeding to the research which will culminate in a formal thesis defence. The major requirement of the Ph.D. is completion of a research thesis demonstrating ability to conduct significant and original scientific research.

Students entering the Ph.D. program will be required to spend a minimum of two terms of uninterrupted duration (eight months) in full-time status at the University.

GRADUATE CERTIFICATE IN REHABILITATION

This **interdisciplinary, graduate-level web-based rehabilitation certificate** is targeted to occupational therapists and physical therapists, and other health professionals who want to update their knowledge and skills to better meet the "best practice" demands of the current health care environment. The program provides useable, evidence-based skills for the rehabilitation workplace.

Each course draws on the research and rehabilitation practice experience of those currently shaping the field. The collaboration between the University of British Columbia and McMaster University to develop and deliver the courses brings greater content expertise to learners. It also brings skill in web-based and problem-based learning that

can enhance learners' experience and ability to apply what they learn to practice.

The five courses in the program enable participants to develop essential knowledge and skills required for best practice in rehabilitation. Learners who successfully complete the five courses will receive the Certificate.

ADMISSION

For academic eligibility applicants require:

- Completion of a recognized baccalaureate degree at an accredited academic institution. Applicants must be an occupational therapist, physical therapist, or rehabilitation practitioner in a related health and human services discipline.

Recommended: completion of an introductory course in Statistics

- Academic requirements:
 - academic standing of a minimum B+ (76%) average in senior level courses (300 and 400 level)
 - English competency: Applicants from a university outside Canada in which English is not the primary language of instruction must present evidence of competency to pursue studies in the English language prior to being extended an offer of admission.
- Professional requirements: To achieve 'professional' eligibility, an applicant must be:
 - an occupational therapist, physical therapist, or a professional in a related health or rehabilitation discipline
 - eligible to practice in their discipline

For more information about the Graduate Certificate in Rehabilitation please go to www.rehab.ubc.ca.

COLLEGE OF OCCUPATIONAL THERAPISTS OF BC

On completion of all academic courses and clinical fieldwork requirements, graduates in Occupational Therapy are eligible to write the national Certification Examination offered by the Canadian Association of Occupational Therapists (CAOT).

The Occupational Therapy program at UBC is accredited by the CAOT, and meets or exceeds the academic accreditation standards of the World Federation of Occupational Therapists (WFOT).

UBC graduates who successfully complete the examination are eligible to apply for membership in the College of Occupational Therapists of British Columbia (COTBC). Registration is required to practice in BC.

Registrants are also eligible to apply for membership in CAOT and the provincial professional organization, the BC Society of Occupational Therapists (BCSOT).

COLLEGE OF PHYSICAL THERAPISTS OF BC

On completion of all academic courses and clinical fieldwork, graduates in Physical Therapy are required to write the Physiotherapy Competency Examination (PCE, formerly PNE). Successful completion of the PCE is required for registration with the College of Physical Therapists of BC. Registration is required in order to practice physiotherapy in BC.

The Physical Therapy program at UBC is accredited by an external organization, and students must graduate from an accredited program in order to write the PCE.

Upon receipt of a license to practice, graduates in Physical Therapy are eligible for membership in the Canadian Physiotherapy Association (CPA) and its provincial branch, the Physiotherapy Association of British Columbia (PABC).

ACADEMIC STAFF

Professors

E. Dean, B.A., Dip. (P.T.) (Manit.), M.S. (S.Calif.), Ph.D. (Manit.); I. Dyck, Dip. (O.T.) (Engl.), B.A., M.A. (Manc.), Ph.D. (S.Fraser); J. Eng, B.Sc. (P.T.) (Brit. Col.), M.Sc. (Tor.), Ph.D. (Wat.); S.R. Harris, B.S. (P.T.), M.Ed., Ph.D. (Wash.).

Associate Professors

C. Backman, B.S.R. (Br.Col.), M.S. (Wash.), Ph.D. (Br.Col.); L. Holsti, B.S.R. (Br.Col.), M.A. (Br.Col.), Ph.D. (Br.Col.); T. Jarus, B.O.T. (Hebrew), M.A., Ph.D. (N.Y.); L. Jongbloed, Dip. (O.T.) (S.A.), B.Sc. (O.T.) (W.Ont.), M.A., Ph.D. (Br.Col.); L. Li, B.Sc. (P.T.) (McG.), M.Sc. (P.T.) (W.Ont.), Ph.D. (Tor.); D.L. MacIntyre, Dip. (P.T.) (Alta.), B.S.R. (P.T.), M.P.E., Ph.D. (Br.Col.); W.H. Miller, B.Sc. (OT) (Br.Col.), M.Sc. (O.T.) (W.Ont.), Ph.D. (W.Ont.); W.D. Reid, B.M.R. (P.T.) (Manit.), Ph.D. (Br.Col.); S.J. Stanton, Dip. (O.T.) (N.Z.), B.S.R. (O.T.), M.A. (Br.Col.).

Senior Instructors

L. Bainbridge, Dip. (P.T.), B.S.R., M.Ed. (Br.Col.); S.J. Forwell, B.Sc. (O.T.) (W.Ont.), M.A. (S.Calif.); D. Redenbach, Dip. (P.T.) (Alta.), B.S.R. (P.T.), M.Sc., Ph.D. (Br.Col.); M. Sutro, B.S. (O.T.) (Calif., San Jose), M.A. (S.Calif.), Ph.D. (Br.Col.).

Clinical Professors

G. Fearing, B.S. (O.T.) (Kansas); B. Loveridge, B.P.T., M.Sc., Ph.D. (Manit.); L. McCloy, Dip. (P. and O.T.) (Tor.), B.A. (Br.Col.).

Clinical Associate Professors

R.J. Anson, Dip. (O.T.) (Engl.), B.S.R. (O.T.) (Br.Col.); C. Busby, B.Sc. (O.T.) (Tor.); M.J. Clark, B.Sc. (O.T.) (W.Ont.); R. Corbett, B.S.R. (Br.Col.); D. Daechsel, B.S.R. (O.T.), M.Sc. (Br.Col.); J. Gauthier, B.Sc., B.S.R. (Br.Col.); S. Jordan, B.S.R. (Br.Col.), M.B.A. (Wash.); K. Junaid, Dip. (P.T.) (Engl.), B.S.R. (Br.Col.), M.Sc. (Br.Col.); M. Lee, Dip. (O.T.) (H.K.), M.B.A. (Wash.);

D. Mah-Jones, B.Sc. (O.T.) (Alta.); S.R. Mannell, Dip. (P.T.) (Engl.); S.M. Murphy, Dip. (P.T.) (Engl.); J. Richardson, Dip. (P.T.); J. Rihela, B.S.R. (Br.Col.); L. Roxborough, B.S.R. (Br.Col.); E.A. Swain, B.App.Sc. (P.T.) (Melb.), M.A. (Col.); T.A. White, B.S.O.T. (Wayne State).

Clinical Assistant Professors

D. Arsenaault, B.S.R. (Br.Col.); B. Barr, Dip. (P. & O.T.) (Tor.), B.P.T. (Manit.); M. Barr, B.Sc. (P.T.) (Br.Col.), M.A. (S.Fraser); M. Bozzer, B.S.R. (Br.Col.); S. Bressler, B.O.T. (McG.), M.A. (R.R.M.C.); P.S. Brookman, Dip. (P.T.) (Engl.); P. Bustamante, B.O.T. (Chile); K. Calsaferrri, B.S.R. (O.T.), M.Sc. (Br.Col.); N. Cho, B.S.R. (Br.Col.), M.B.A. (City); J. Duivestein, B.S.R. (Br.Col.); M.L. Fulkus, B.P.E., B.Sc. (O.T.) (Alta.), M.Sc. (Br.Col.); R. Goodman, B.Sc. (P.T.) (Dal.); I.M. Harris, B.Sc. (O.T.) (Qu.); A.M. Hoens, B.Sc. (P.T.) (Br.Col.), M.Sc. (Aust.); B. Hudson, B.Sc. (P.T.) (McG.); M. Johnston, Dip. (P.T.) (Ireland); K. Kennedy, B.Sc. (P.T.) (Qu.); M. Konkin, B.M.R. (O.T.) (Manit.); M.T. Kyi, B.Sc. (O.T.) (Br.Col.); P. Lieblich, B.P.T. (McG.); B. Lundgren, Dip. (P.T.), B.Sc. (P.T.) (Manit.); M. McCuaig, B.Sc. (Br.Col.), M.A. (S.Calif.); J. Millard, Dip. (O.T.) (Engl.), B.S.R. (O.T.) (Br.Col.); A. Neale, Dip. (O.T.); B. Porter, B.S.R. (Br.Col.); B. Robinson, Dip. (O.T.), B.Sc. (O.T.) (Alta.); J. Ross, B.S.R., M.Sc. (Br.Col.); J. Spence, B.S.R. (Br.Col.); L.J. Stan, B.S.R., M.Ed. (Br.Col.), Ed.D. (Brigham Young); S. Stewart, Dip. (O.T.) (Engl.); S.N. Stewart, B.Sc. (P.T.) (Qu.); P. Straathof, B.S.R. (Br.Col.); K.M. Van Der Hoop, B.S.R., M.Sc. (Br.Col.); K. Varallyai, Dip. (P.T.) (Aust.); M. Westby, B.Sc. (P.T.) (Br.Col.); E.E. Wills, Dip. (P.T.) (Ireland), B.S.R. (P.T.) (Br.Col.).

Clinical Instructors

J. Bay, B.Sc. (Kin.) (S.Fraser), B.Sc. (P.T.) (W.Ont.); C. Beach, B.Sc. (P.T.), M.Sc. (Rehab.) (Qu.), Ph.D. (U.K.); D. Betz, B.Sc. (O.T.) (Br.Col.); G.R. Beverley, Dip. (P.T.) (Engl.); H. Boyes, B.Sc. (O.T.) (Br.Col.); V.H. Brittain, B.Sc. (P.T.) (Ireland); S. Broolin, B.Sc. (Kin.) (S.Fraser), B.Sc. (P.T.) (Aust.); W. Chan, Dip. (O.T.) (H.K.), B.Sc., M.B.A. (Wash.); S. Charchun, B.Sc. (Biochem.), B.Sc. (O.T.), (Br.Col.); M.L. Chin, B.Sc. (O.T.), (Br.Col.); J. Chisholm, B.S.R., M.Sc. (Rehab.), (Br.Col.); A. Craig, B.S.R. (Br.Col.); B. Crocker, Dip. (Remedial Gym) (England), Reg. (P.T.) (Br.Col.); L. Cyr, B.Sc. (O.T.) (Dal.); I.L. Davidson, B.S.R. (Br.Col.); C. Davis, B.Sc. (P.T.) (Alabama); D. Drynan, B.Sc. (O.T.), M.Ed. (Tor.); T. Dumont, B.P.E., B.Sc. (P.T.) (Alta.), M.Sc. (Rehab.) (Br. Col.); G. Ebert, Dip. (P.T.) (Alta.); P. Erlendson, B.Sc. (O.T.) (McG.); C.M. Faulkner, B.S.R. (Br.Col.); J. Fischer, B.Sc. (O.T.) (Qu.); C. Fraser, B.A., B.Sc. (O.T.), (Br.Col.); K. Friesen, B.E. (Windsor), B.P.E., B.Sc. (O.T.) (McM.); S. Garret, B.S.R. (Br.Col.); J. Garrett, B.A. (Qu.), B.Sc. (P.T.) (Tor.); B. Gordon, Dip. (O.T.) (Manit.); T. Green, B.Sc. (O.T.) (Br.Col.); R.C. Groves, B.S.R. (Br.Col.); S. Hale, B.Sc. (Rehab.) (Alta.); M. Harris, Dip. (P.T.); S. Haskett, B.Sc. (O.T.) (Br.Col.); S. Hearsey, Dip. (P.T.) (U.K.), B.S.R. (Br.Col.), M.B.A. (S.Fraser); H. Hermans, B.S.A. (Br.Col.), B.Sc. (P.E.) (Wash.); R. Hocking, B.A. (Car.), B.Sc. (P.T.) (Alta.); C. Horii, B.S.R. (Br.Col.); H. Jebson, Dip. (P.T.) (Otago Polytechnic), B.H.S. (P.T.) (Open U.); C. Kennedy, B.Sc. (P.T.) (Qu.); J. Kipnis, B.Sc. [Concordia (Alta.)], B.Sc. (P.T.) (London, Ont.); M. Kuo, B.Sc. (P.T.) (Br.Col.), M.P.H. (Wash.); M. Landry, B.S. (O.T.) (Quinnipiac U.); Y. Le, B.Sc. (P.T.) (Br.Col.); C. Lefavre, B.Sc. (O.T.) (Alta.); J. Letkemen, B.M.R. (P.T.) (Manit.); C. Levy, B.Sc. (O.T.) (S. A.); S. Leyland, B.S.R. (Br.Col.); S. Leznoff, B.Sc. (O.T.) (W.Ont.), B.Ed. (Ott.), M.A. (Ed.) (Br.Col.); W. Lintott, B.Sc. (O.T.) (W.Ont.); J. Lowcock, B.Sc. (P.T.) (Qu.); H. MacInnis, B.Sc. (O.T.) (E. Mich.); M. Mackay, B.Sc. (O.T.) (Qu.); L. Magnan, B.Sc. (P.T.) (Ott.), M.Sc. (Rehab.) (McG.);

Y.J. Mansfield, B.S.R. (Br.Col.); **D. Maxwell**, B.Sc. (Kin.) (Ott.), B.Sc. (P.T.) (Qu.); **R. McDonald**, Dip. (O.T.), B.Sc., M.Sc. (U.K.); **M. McIlwaine**, Dip. (P.T.) (Ireland), Dip. (Health Care Mgmt.) (B.C.I.T.); **A. McLean**, B.Sc. (O.T.) (Br.Col.); **A. McMichael**, Dip. (P.T.) (Engl.); **B. McNair**, B.Sc. (O.T.) (Alta.); **D. Mills**, B.S.R. (Br.Col.); **K.A. Mills**, B.A., B.Sc. (O.T.) (W.Ont.); **J.G. Montgomery**, B.Sc. (P.T.) (Br.Col.); **T. Moran**, Dip. (P.T.) (England); **P. Mortenson**, B.Sc. (O.T.), M.Sc. (Rehab.) (Br.Col.); **W. Mortenson**, B.Sc. (O.T.) (Alta.), M.Sc. (Br.Col.); **J. P. Moscovitch**, B.O.T. (McG.); **M. Nelson**, B.Sc. (O.T.), M.Sc. (Rehab.) (Qu.); **T. Newlands**, B.S.R. (Br.Col.); **A. Ng**, B.Sc. (P.T.) (H.K.); **M. Nolan**, B.Sc. (P.T.) (Ireland); **J. H. Oldham**, Dip. (P.T.) (Otago); **G. Olund**, B.Sc. (Bio.), B.Sc. (O.T.) (Br.Col.); **N. Pearson**, B.A. (B.P.H.E.), B.Sc. (P.T.), M.Sc. (Qu.); **J. Pillsworth**, Dip. (P.T.) (Engl.); **J. Poon**, Dip. (O.T.), B.Sc. (Hons.) (Kin.), M.Sc. (O.T.) (San Jose); **D. Powell**, B.S.R. (Br.Col.); **A. E. Rankin**, B.Sc. (P.T.) (McG.), M.Sc. (P.T.) (U.W.O.); **T. Readman**, Dip. (O.T.) (Engl.); **L. L. Reinhardt**, B.Sc. (O.T.) (Alta.), M.Sc. (Rehab.) (Br.Col.); **J. Ritson**, Dip. (O.T.) (U.K.); **M. Rizzardo**, B.P.E., M.P.E., B.Sc. (P.T.) (Br.Col.); **T. Ross**, B.M.R. (O.T.) (Manit.); **A. Scott**, B.S.R. (Br.Col.); **J. Selman**, B.Sc. (Psych.) (Vic.B.C.), B.Sc. (O.T.) (Br.Col.); **C. Sheffield**, B.Sc. (O.T.) (Qu.); **J. Shortreed**, B.Sc. (O.T.) (Qu.), M.Ed. (W.Ont.); **S. Sinanan**, B.A., B.Sc. (O.T.) (Br.Col.); **K. Skarpnes**, B.S.R. (Br.Col.); **L.A. Smith**, B.Sc. (O.T.) (Qu.); **J. Summersides**, B.Sc. (P.T.) (Alta.); **A.G. Taylor**, B.Sc. (P.T.) (Br.Col.); **F. Varona**, B.S.P.T. (Philippines); **A. Voute**, B.Sc., B.Sc. (P.T.) (Tor.); **V. Ward**, B.Sc. (P.T.) (U.A.); **N. Wellwood**, B.Sc. (O.T.) (Br.Col.); **P. Wilson**, B.A., B.S.R. (Br.Col.); **G. Yoneda**, B.S.R., M.B.A. (Br.Col.).

Adjunct Professors

A.V. Krassioukov, M.D. (Volgograd, Russia), Ph.D. (St. Petersburg, Russia); **J.R. Watzke**, B.A. (Psych.) (Calif., Berkeley), Ph.D. (Lund, Sweden).

Associate Members

A. Chalmers, Medicine; **S.A. Hashimoto**, Medicine; **T. Inglis**, Human Kinetics; **K. Khan**, Medicine; **J. Kopec**, Medicine; **H. McKay**, Medicine; **D. C. McKenzie**, Medicine; **T. Oxland**, Medicine; **D. Sanderson**, Human Kinetics; **B. Sawatzky**, Medicine; **B. Sheel**, Human Kinetics; **T. A. Van Rijn**, Rehabilitation Medicine; **D. Warburton**, Human Kinetics; **R. Y. M. Wong**, Geriatric Medicine.

Science Website (www.science.ubc.ca)

The Faculty of Science offers Major, Honours, General and Integrated Sciences undergraduate programs leading to the Bachelor of Science.

The Bachelor of Science can be earned in the fields of Astronomy, Atmospheric Science, Biochemistry, Biology, Biophysics, Chemistry, Cognitive Systems, Computer Science, Earth and Ocean Sciences, Environmental Sciences, General Science, Geography, Geology, Geophysics, Integrated Sciences, Mathematics, Mathematics and Economics, Microbiology, Oceanography, Pharmacology, Physics, Physiology, Psychology, Statistics, and Statistics and Economics. Biophysics, Climatology, Geology, Geophysics, Oceanography and Physiology are offered only as Honours programs. Co-operative Education programs are available in many disciplines. A Diploma in Computer Science and a Diploma in Meteorology are also offered. For information about graduate degrees, see the *Faculty of Graduate Studies*, p. 217.

BACHELOR OF SCIENCE

To earn a Bachelor of Science students must follow one of the following programs:

- Major. This program involves specialization in a single field. It may lead to graduate study if sufficiently high standing is obtained.
- Double Major. This program involves specialization in two fields. Students in this option will have to complete the degree requirements of two programs in Science or one in Science and one in Arts. It may lead to graduate study if sufficiently high standing is obtained.
- Honours. This program usually involves intense specialization in a single field or combination of fields (Combined

Honours), and is the normal route to graduate study. An Honours program requires maintenance of a high academic standing and may involve preparation of a graduating thesis.

The following two programs provide a broad and flexible education in science. These programs are appropriate and useful for those continuing in other professional areas such as Dentistry, Education, Law, Medicine, or Veterinary Medicine. These programs are not normally intended for students planning to continue with graduate study in science. With careful planning and sufficiently high standing it is possible to go on to graduate study, but this may require additional qualifying studies at some universities.

- The General Science Program. This program provides the opportunity for some specialization in either one or two of the following areas: Chemistry, Earth Science, Life Science, Mathematical Science, and Physics. The General Science route that requires concentrations in two areas provides excellent preparation for prospective secondary school teachers. General science programs are not normally intended for students planning to continue with graduate study in science. With careful planning and sufficiently high standing it is possible to go on to graduate study, but this may require additional qualifying studies and some universities.
- The Integrated Sciences Program. This program offers flexibility in course selection, academic support in building a coherent program, and Integration Courses to provide a framework to acquire the tools of research and communication. Students select one area of specialization from Earth and Ocean Sciences, Mathematical Sciences, Natural Sciences, Life Sciences, or a rationalized combination of courses that cross the boundaries of these areas. Admission to this program is limited and requires application to the ISP Board of Admissions. This program may lead to graduate study if care is taken in course selection and if sufficiently high standing is obtained.

The following options are available:

- Minor. An optional minor program comprising courses taken in Science but outside the main area of specialization or in

another faculty (Arts, Commerce and Business Administration, Human Kinetics, or Land and Food Systems) may be completed as part of the Bachelor of Science. The minor allows students to focus their electives in a single subject or field of specialization.

- Part-time Program. Some degree programs are amenable to part-time study. Students should inquire at the *Science Information and Advising Centre*, p. 383, for further information and direction in arranging a part-time study program.
- Co-operative Education Programs. Co-operative Education integrates students' academic education (classroom-based learning) with relevant, supervised and paid work experience (work-based learning) in employer organizations. Co-operative Education programs are optional and supplementary to academic programs in a department. For detailed information, see *Co-operative Education Programs*, p. 392, under Bachelor of Science, Co-op and Minor Options.

ADVISING

Advising service is available Monday through Friday in the Science Information and Advising Centre, Room A150, Chemistry/Physics Building, 6221 University Boulevard, telephone 604-822-3820. Front counter staff and academic advisors are there to assist undergraduate students in their general academic planning, in interpreting faculty regulations and course requirements, and in resolving academic and personal problems. Academic and personal assistance is also available through the Advising website (www.essential.science.ubc.ca/academic/advising).

Email Communication

Email is the preferred means for the Faculty of Science administration and faculty members to communicate important messages to students. It is the responsibility of all science students to ensure that their current email address is accurately recorded on the Student Service Centre (www.students.ubc.ca/ssc) and to read email sent to that account on a regular basis. Free email accounts (www.netinfo.ubc.ca) are available for all UBC students, but any email account may be registered through the SSC.

ADMISSION

Application for admission to the Faculty of Science must be made through Enrolment Services. Procedures, policies, and admission requirements to the University of British Columbia and the Faculty of Science are specified in the chapter *Admissions*, p. 13, of this Calendar. Approved examinable Grade 11 and 12 courses are also listed there. Students may find it to their advantage to present credit for as many of Biology 12, Chemistry 12, and Physics 12 as possible. Certain programs have reduced requirements in one or more of these subjects for students with Grade 12 credit.

For applicants who meet minimum academic requirements but who do not meet the required competitive average for early admission, additional academic criteria, such as achievement in standardized tests, results from national or international competitions, or compelling evidence of outstanding leadership may be considered. Details are available at the Faculty of Science website (www.science.ubc.ca).

Students admitted to the Faculty of Science by transfer from other post-secondary institutions must present credit for MATH 100 (or equivalent) and must either have met the English Requirement of the Faculty of Science (see *Transfer Credit*, p. 385, under Bachelor of Science, Academic Regulations, and *English Requirement*, p. 388, under Bachelor of Science, Degree Requirements) or be eligible to enrol in first-year English at the time of admission.

Students admitted by transfer and those admitted to a second-degree program (see *Second Degree Studies*, p. 391, under Bachelor of Science, Degree Requirements) will be admitted to the year level that is appropriate according to the First-Degree Promotion Requirements. The Promotion Requirements are based on the number of credits completed (both total and in Science courses) and degree of completion of the Lower-Level Requirements including English (see *Lower-Level Requirements*, p. 389, under Bachelor of Science, Degree Requirements).

Applicants who cannot meet the requirements as specified should submit an appeal to Enrolment Services with their application forms. The Dean, who has discretionary powers on admissions, will consider all appeals.

Students applying for admission from secondary schools outside of BC/Yukon must meet the minimum requirements applied to graduates from British Columbia secondary schools for admission to first year. A student required to discontinue from another faculty may be permitted to register only by special permission, and should consult the Dean's Office. A student with unsatisfactory standing from another post-secondary institution will not be admitted.

Students interested in applying to the Science One program must apply through Enrolment Services for admission to the Faculty of Science and, in addition, submit a formal application directly to the Program Office (see *Science One Program*, p. 392).

International Baccalaureate and Advanced Placement

Credit may be granted for some courses in the International Baccalaureate and Advanced Placement enriched secondary school programs. Such students are advised to consult departmental advisors at UBC before registering in any second-year courses. Prospective UBC students who have completed or are registered in a secondary school calculus course should see *UBC-SFU-UVIC-UNBC Calculus Examination Certificate*, p. 16.

For detailed information about advanced credit for courses taken in the International Baccalaureate or Advanced Placement programs, consult the Welcome website (www.students.ubc.ca/welcome/admission.cfm). Advanced credit will count toward a degree program, but does not count as part of the credit load in the first year at UBC.

Registration and Program Approval

Students are required to follow the program regulations that were in effect at the time that they were admitted to the Faculty of Science at UBC and the program regulations that were in effect at the time they were accepted into the program.

The following is only a summary of the registration procedures for science students. Students should refer to registration information on the Student Service Centre (www.students.ubc.ca/ssc) and the Faculty of Science Student website (www.escience.ubc.ca).

Note: It is the responsibility of students who are registered on a waiting list to determine if they have been placed in the course by the department. It is also the responsibility of students to determine that they have the prerequisite for any course in which they register. If uncertainties arise, students should consult the appropriate department.

After two weeks of lectures, students (full-time or part-time) are not permitted to change the program for which they are registered except in special circumstances and with the permission of the Dean.

In Winter Session, students may drop one-term courses within two weeks of their commencement and two-term courses within 3 weeks of commencement. All record of registration in the courses will be removed from the student's transcript. Thereafter, students may withdraw from a one-term course up to the end of the sixth week of classes, and from a two-term course up to the end of the twelfth week of classes. Courses dropped during this latter period will be indicated by a withdrawal standing ('W') on the student's transcript. Students may drop or withdraw from courses using the Student Service Centre (www.students.ubc.ca/ssc). After these dates, students are not normally permitted to withdraw from courses but may apply for academic concession (see *Academic Concession*, p. 50, in the Academic Regulations chapter of this Calendar).

Students may not take courses for which they have not registered.

First-Year Students

First-year students do not choose a program or specialization and are not required to obtain program approval before registering. Students must be careful, however, to select courses appropriate for the program they plan to enter in second year. See *Lower-Level Requirements*, p. 389, under Bachelor of Science, Degree Requirements. Students should seek advice from the Science Information and Advising Office if their first-year program is non-standard because of advanced placement or transfer credit.

First-year students wishing to enrol in Science One must submit a formal application for admission to this course of study to the director of Science One by May 15. First-year students wishing to enrol in the Coordinated Science Program can register directly through the Student Service Centre (www.students.ubc.ca/ssc). The Science One Program and the Coordinated Science Program are described under *First-Year Programs*, p. 391, under Bachelor of Science.

Second, Third, and Fourth-Year Students

Students entering second and subsequent years must select a major, honours, general, or Integrated program as outlined by the Faculty of Science.

Students seeking admission to the Integrated Science Program (ISP) must submit a formal application after completing 60 credits (see *Integrated Sciences Program*, p. 417, under Bachelor of Science).

Students intending to do a Double Major in Science must select one of the majors upon entry into their second year and then obtain approval for the other before the start of their third year. A form is available from the Faculty of Science Student website (www.escience.ubc.ca) for this purpose; it requires approval of advisors in both major areas and of the Dean.

Students intending to do a Double Major in Science and Arts must obtain approval from the Science Information and Advising Office in their first year and then select their Science Major upon entry into second year and their Arts Major upon entry into third year (see *Program Requirements*, p. 389, under Bachelor of Science, Degree Requirements). Interested students are encouraged to plan first- and second-year courses so as to meet the prerequisite requirements for the desired Major areas concurrently (see program listings for *Bachelor of Arts*, p. 117, and for *Bachelor of Science*, p. 383).

Students intending to do a Minor in Science, Arts, or Land and Food Systems must obtain approval before the start of their third year. A form is available from the Faculty of Science Student website (www.escience.ubc.ca) for this purpose; Students intending to do a Minor in Commerce must apply in second term of their second year (see *Minor in Commerce*, p. 393, under Bachelor of Science, Co-op and Minor Options).

Unless students are registered in a specific program their academic records cannot be adjudicated for graduation.

Students not meeting the academic standing required for compulsory courses in a given program may be required to withdraw from that program. In many instances changes from one program to another are possible in later years. Changes in program may result in lengthening the time to complete the Bachelor of Science. Returning students are encouraged to obtain program advice before the end of Term 2. All study programs are subject to approval by the department(s) concerned.

With the approval of the Dean, departments may require, as a prerequisite for entering a program, that a student obtain at least 60% in a specified first-year course basic to the field of the major, unless special permission is received from the head of the department.

ACADEMIC REGULATIONS

Examinations

Formal written examinations are required at the end of all courses and also in December for two-term courses. These are scheduled during official examination periods at term end. The formal written examination may be replaced by alternative examination procedures only at the discretion of the head of the department and with the permission of the Dean.

Supplemental examinations and examinations for higher standing are not available in any course in the Faculty of Science.

Passing the final examination may not in itself be sufficient to pass a given course. Students may be denied a passing grade for unsatisfactory work during the session or if their essays, laboratory reports, or examination papers are deficient in English. Furthermore, in any Science course that has both laboratory work and written examinations, students must complete and pass both parts to pass the course. A student who fails the laboratory work may be refused permission to take the final written examination.

Regular attendance is expected of students in all their classes, including lectures, laboratories, tutorials, and seminars. Students who neglect their academic work and assignments may, on the recommendation of the head of the department, be excluded by the Dean from the final examinations.

In general, students who pass a course can use it as a prerequisite for a subsequent course in that subject. However, departments do have the right to bar entrance to their programs and third-year courses to students who obtain only a minimum passing grade in their first- or second-year prerequisite course or courses.

No failed course may be repeated more than once without special permission of the Dean. This does not apply to courses in first-year English or Mathematics, which may be repeated twice. Courses on the Science Credit Exclusion List are considered to be the same course for the purposes of this rule.

Limitation of Enrolment

Enrolment in the Faculty of Science is limited and admission to the Faculty does not guarantee that space will be available in any specific program, course, or section. Where the limitation of enrolment becomes necessary, the criteria for implementation normally are academic standing in the preceding Winter Session and grades in prerequisite courses. Students are encouraged to consult individual department or program offices for details of any restrictions on enrolment. Students are encouraged to register on their assigned date of registration.

Students registered in any Science course that has a laboratory must attend their first scheduled laboratory class in that course. Failure to do so will result in termination of the student's registration in the course. Students who are unable to attend their first scheduled laboratory class in a course must notify the head (or designate) of the department concerned within 48 hours of the time affixed for that class or have their registration in the course terminated.

It is the responsibility of students registered in a waiting list to determine if they have been placed in the course by the department.

A student who has passed a course will not be permitted to repeat that course for higher standing. Courses on the *Credit Exclusion List for Science*, p. 394, are considered to be the same course for the purposes of this rule.

Corequisites are courses that must either be taken concurrently with another course or successfully completed before taking the other course. Prerequisites are courses that must be successfully completed before another course.

Prerequisites can be fulfilled with equivalent courses or exempted with the permission of the instructor. Credit excluded courses are courses that have sufficient overlap in content that credit will be given for only one course or combination of courses listed in the *Credit Exclusion List for Science*, p. 394, in this chapter.

Credit Excluded courses are not equivalent, so permission of a program advisor is required for substitution of a required course with a course from the Credit Exclusion list.

Recommended courses provide background that would be helpful for the student when taking another course but are not required.

Credit

Although full-time students take at least 24 credits per Winter Session, and a standard load is 30 credits per Winter Session, many programs require more. First-year students especially should note that a standard load is five lecture courses a term (some may be combined lecture-lab courses, some may be lecture-only) with or without separate lab courses and the number of credits will often exceed 30. The minimum number of credits required for any Bachelor of Science is 120 credits but some programs require more. Full-time students must normally complete graduation requirements within seven calendar years following admission to first year or its equivalent.

First-year students at UBC or students transferring to UBC from another institution must request permission from the Dean's Office in order to register for more than 37 credits. No student may take more than 39 credits per Winter Session without special permission of the Dean. Students who fail a course in one Winter Session will not be allowed to attempt more than 30 credits in their next Winter Session, except with special permission of the Dean.

Part-time students are urged to complete graduation requirements in a reasonably short time to avoid complications resulting from program changes, or from substantial changes in course material, or from both.

Students transferring to the Faculty of Science from other faculties at the University of British Columbia must consult the Science Information and Advising Office regarding transfer of credits to the Bachelor of Science.

Credit earned as an unclassified student does not automatically apply to a Bachelor of Science program should the student subsequently be accepted in the Faculty of Science.

Transfer Credit

Students who are accepted on transfer from other post-secondary institutions must present credit for MATH 100 (or equivalent). They also must either have met the English requirement (See *English Requirement*, p. 388, under Bachelor of Science, Degree Requirements) or be eligible to enrol in first-year English (see point [1] under "English Requirement") before they will be permitted to register in any courses for credit. Students who have accumulated 60 or more credits either at UBC or elsewhere, and who have not fulfilled the English requirement, will not be permitted to enrol in courses other than first-year English until the requirement is met.

The University will not grant a degree for studies that represent less than the equivalent of two regular Winter Sessions (60 credits). In general transfer credit is limited to the first two years (60 credits) of a degree program, wherever those credits were completed.

Credit at a more senior level is possible if prior written permission has been obtained from the Dean. Under no circumstances will a student be granted transfer credit for more than 12 credits of upper-level course work. Although transfer credit allowed by the Dean may be included in the required 48 credits numbered 300 or above, a B.Sc. program must include a minimum of 30 credits of upper-level UBC Science courses specified by the program.

The Admission Office provides students with general information about transfer credits. Not all credits will apply towards specific degree requirements. Questions about the applicability of transfer credits should be directed to the appropriate department.

Summer Session Credit

Summer Session credit will count toward a degree program, but Summer Session courses do not count as part of the full-time program in

a Winter Session. The maximum credit for any Summer Session is 14 credits, except with the permission of the Dean. It is not possible to take two laboratory science courses concurrently in Summer Session. Summer Session is assessed independently of Winter Session (see *Continuation Requirements*, p. 386, in this section).

Concurrent Studies at UBC and Another Post-Secondary Institution

Students currently registered at UBC may not take courses for credit toward the B.Sc. at another institution without prior written permission from the Dean's Office. The Faculty has no obligation to grant transfer credit unless a letter of permission has been obtained. Students granted a letter of permission must reduce their UBC course load appropriately. It is the student's responsibility to ensure that an official transcript from the other institution is forwarded to Undergraduate Admissions in Enrolment Services. Transfer credit will be limited to lower-level courses and must not exceed 50% of the credits required for the degree.

Student Academic Performance

SCIENCE SCHOLAR

Graduating students and students promoted to second, third, or fourth year with a standing of 90% or better in the previous year will receive the notation 'Science Scholar' on their records. The average is calculated on the best 27 credits in Winter Session, but students must have passed all courses in order to receive this designation. Students in a co-operative education or an education abroad program who are registered at UBC for only one term in Winter Session must complete at least 15 credits and pass all credits attempted with a standing of at least 90% in order to receive the designation.

DEAN'S HONOUR LIST

Graduating students and students promoted to second, third, or fourth year with a standing of 80% or better in the previous year will receive the notation 'Dean's Honour List' on their records. The average is calculated on the best 27 credits in Winter Session, but students must have passed all courses in order to receive this designation. Students in a co-operative education or an education abroad program who are registered at UBC for only one term in Winter Session must complete at least 15 credits and pass all credits attempted with a standing of at least 80% in order to receive the designation.

GRADUATION STANDING

In an honours or combined honours program the categories of degree are Class 1 and Class 2, calculated on the basis of a minimum of 42 credits of courses, numbered 300 or above, designated as part of the program by the department, and approved by the Dean.

In a major or double major program the graduation standing is based on a minimum of 30 credits of courses, numbered 300 or above, designated as part of the program by the department(s), and approved by the Dean.

In the General Science program the graduation standing is based on the required work of the third and fourth years including a minimum of 30 credits of courses numbered 300 or higher.

In the Integrated Sciences program graduation standing is based on the required work of the third or fourth years including a minimum of 30 credits of science courses numbered 300 or higher, among which must be 9 credits of Integration courses (ISCI) and 18 credits of upper-level courses in the area of focus.

CONTINUATION REQUIREMENTS

Students who do not achieve a level 5 on the LPI examination before completing 30 credits of Science-eligible courses, taken either at UBC or another post-secondary institution, will not be permitted to register in any additional credit courses until they successfully complete the LPI. See *Exemptions*, p. 120, under Language Proficiency Index Requirement for First-Year English. See also *English Requirement*, p. 388, under Bachelor of Science, Degree Requirements.

Students who do not meet the 6-credit first-year English requirement before completing 60 credits of Science-eligible courses (30 credits for second-degree students), taken either at UBC or transferred from another post-secondary institution, will not be permitted to register in any additional credit courses other than first-year English until that requirement is satisfied. Students who approach the 60-credit limit will be restricted in taking further credits so as not to exceed the limit.

Continuation requirements are listed in the table "Summary of Continuation Requirements" below. Subject to the above conditions, students who pass all courses in any Winter or Summer Session will be assigned a Pass standing and will be eligible to continue their studies. Students who fail one or more courses, but attain a sessional average of 55% or more in any Winter or Summer Session, will also be assigned a Pass standing and will be permitted to continue their studies.

Students who attain a sessional average of less than 50% in any Winter or Summer Session will be assigned a Fail standing. They will be required to withdraw from the Faculty, unless this sessional average is based on fewer than 12 credits (Winter Session) or 6 credits (Summer Session) and there is no Fail or Academic Probation (ACPR) on their previous record, in which case they will be permitted to continue.

Students who fail one or more courses and attain a sessional average of at least 50% but less than 55% in a Winter or Summer Session will be placed on Academic Probation (ACPR). They will be permitted to continue their studies unless they had a Fail standing in any prior session or they were on Academic Probation in the previous session, in which case they will be assigned a Fail standing and required to withdraw from the Faculty.

Students assigned Academic Probation in one session will be removed from Academic Probation if, in a following session, they pass all courses and attain an average of at least 55% on at least 12 credits.

Students required to withdraw from the Faculty for poor academic performance or for failing to meet promotion requirements within the maximum credit limits (see *Promotion Requirements*, p. 390, under Bachelor of Science, Degree Requirements) or who otherwise leave UBC while ACPR is on their transcript may apply for readmission after one full year, but no student has the right to readmission. Applications for readmission should be submitted to the Undergraduate Admissions Office. Applications will be considered by the Science Admissions, Adjudication, and Appeals Committee. In considering an application for readmission, the committee will take into account any and all evidence of a student's ability to perform satisfactorily at the university level. Under normal circumstances, the committee will expect students required to withdraw before completing 60 Science-eligible credits and those who leave with ACPR on their transcript to demonstrate their abilities by completing the following amount of work at a BC College or similar institution and attaining an overall GPA of 2.50, calculated on all university-transfer work attempted after they were required to withdraw. A negative decision may be appealed to the Senate Admissions Committee. That committee does not change decisions of the Faculty based on academic grounds but may grant an appeal if due process was not followed by the Faculty. Thus, unless the appellant supplies additional information in support of special consideration, the appeal to Senate is unlikely to succeed.

Students required to withdraw after completing more than 60 Science-eligible credits are encouraged to take courses at a college or similar institution, even though some of the credits so earned may not be transferable to UBC.

Credits Completed Before Withdrawal	College Transfer Credits Required Before Applying For Readmission
30 or fewer	30
31-45	24
46-60	12
more than 60	no requirement

SUMMARY OF CONTINUATION REQUIREMENTS

Sessional Average, Course Success	Student Previously in Good Standing	ACPR on Student Record	Fail on Student Record
55% or higher, passed all courses	Pass, eligible to continue	Pass, eligible to continue; ACPR lifted if enrolled in 12 or more credits	Pass, eligible to continue
At least 50% but less than 55%, passed all courses	Pass, eligible to continue	Pass, eligible to continue; ACPR carried forward	Pass, eligible to continue
55% or higher, failed one or more courses	Pass, permitted to continue	Pass, permitted to continue; ACPR carried forward	Pass, permitted to continue
At least 50% but less than 55%, failed one or more courses	ACPR, permitted to continue	Fail, required to withdraw	Fail, required to withdraw
Below 50%; enrolled in 12 or more credits (Winter) or 6 or more (Summer)	Fail, required to withdraw	Fail, required to withdraw	Fail, required to withdraw
Below 50%; enrolled in under 12 credits (Winter) or under 6 (Summer)	Fail, permitted to continue	Fail, required to withdraw	Fail, required to withdraw

ACADEMIC CONCESSION

Academic concessions are a privilege, not a right, and are granted only by the Dean or designate.

Among the academic concessions that may be granted are permission to withdraw from or drop a course after the normal deadlines, Aegrotat standing or Deferred standing, and withdrawal from the university. For further information, see *Academic Concession*, p. 50, in the chapter “Academic Regulations” of this Calendar.

Students who are absent for short periods of time or are unable to complete tests or other graded work because of short-term illness, or for other reasons, should normally discuss with their instructors how they can make up for missed work, according to written guidelines given them at the start of the course (see *Grading Practices*, p. 47, in the chapter “Academic Regulations” of this Calendar). Students who do not agree with an instructor’s decision have the right to request academic concession through the Science Information and Advising Office. Students whose academic performance or attendance is severely affected by medical, emotional, or other problems must consult the Science Information and Advising Office as soon as possible, and certainly before the end of an academic term, if they wish to request academic concession. Students absent from formal end-of-term examinations have the responsibility to request academic concession from the Science Information and Advising Office. Students may not make arrangements directly with the instructor without the involvement of the Science Information and Advising Office. Failure to follow appropriate procedures will normally result in the refusal of the Dean to grant an academic concession.

In order to request academic concession, a student who is absent from any formal examination must report within 48 hours of the end of the examination (in person, by telephone at 604-822-3820, or by email (acadcon@science.ubc.ca)). Untimely notification will not normally be accepted. Students will be required to complete a “Request for Academic Concession” form and provide the necessary supporting documentation.

Before missing an examination, students should consider that deferred standing is not granted

automatically even with supporting documentation. Students must make every effort to avoid missing examinations. Students who have on-going health or emotional problems should consult Student Health Services or Student Counselling. Any student who has once been granted an academic concession should not assume they will be granted another.

DEFERRED STANDING

Deferred standing may be granted by the Dean if the student has been fulfilling course expectations during the term and obliges the student to write the next scheduled final examination. If the student did not write and pass examinations or hand in assignments or successfully complete laboratories or is in other ways not in good academic standing in the course, then Deferred standing will not be granted.

For many courses, the deferred examination will be scheduled by Enrolment Services to take place in the summer for Winter Session offerings and in December for Summer Session offerings (see “Dates and Deadlines” in chapter 1 of this Calendar). However, there are important exceptions for many Science courses.

Some Science courses schedule make-up examinations in January for Term 1 Winter Session courses that are prerequisite to Term 2 courses. A student with Deferred standing in one of those courses is expected to write the January examination. No other examination will be offered.

Other Science courses are offered in the next term of the same Winter Session or in the next Summer Session, and writing the scheduled examination for that offering is normally the required means of fulfilling Deferred standing. Students with Deferred standing are responsible for consulting their instructor or the department involved for the date of the next examination and the arrangements for writing it. Students granted Deferred standing in Winter Session courses must complete all outstanding course requirements by August 23 following. Students granted Deferred standing in Summer Session courses must complete all outstanding course work by December 25 following. See *Standings*, p. 48. Those dates do not replace the special arrangements for some Science courses described above.

Extensions of Deferred standing are not normally granted. If an examination is not written

according to the guidelines above, the student’s partial grade will stand as the final grade. Science students who do not fulfill their obligations by writing the required deferred examination may submit a written appeal to the Associate Dean, Students.

DEGREE REQUIREMENTS

Graduation Requirements

An honours or combined honours program requires a minimum of 132 credits but may require more. A Major, General Science, or Integrated Sciences program requires a minimum of 120 credits but may require more.

A minor program comprising courses in another faculty may be completed toward the Bachelor of Science in conjunction with a Major, General Science, Integrated Sciences, or Honours program in Science and requires at least 18 credits of courses numbered 300 and higher in a single subject or field of specialization.

A Minor program comprising courses in another discipline in Science may be completed toward the Bachelor of Science in conjunction with a Major or Honours program in Science and requires at least 18 credits of courses numbered 300 or higher in a single subject or from a program.

A Double Major in Science in most cases will require more than 120 credits. The exact number of credits required will depend on the particular choices of the majors. Students who are in the double major program must satisfy all degree requirements of one department, including all course, breadth, and Faculty requirements. The breadth requirement may be satisfied with upper-level Science courses taken for the second major. As far as the second department is concerned a student need only satisfy all departmental requirements at the 300 or higher level and any lower-level program requirements that are not part of the first major program. Students contemplating the double major should endeavour to satisfy course prerequisites for both departments in their first two years.

A Double Major in Science and Arts program requires a minimum of 120 credits, but in most cases will require more. Students who are in the double major program must satisfy all degree

requirements for a Bachelor of Science Major in one area. As far as the Arts Major is concerned a student need only satisfy Faculty of Arts and program requirements for the Bachelor of Arts Major. Courses may satisfy requirements for both programs. Students should endeavour to satisfy lower-level course prerequisites for both programs in their first two years.

In order to graduate in a Co-operative Education Program, students must successfully complete the required number of work terms in addition to the regular academic program requirements. Credit earned through co-operative work placement courses numbered 298, 299, 398, 399, 498, and 499 in the Faculty of Science can be used only towards graduation in the Co-operative Education Program and will not fulfill requirements of honours, major, double major, General Science, Integrated Sciences, or minor programs.

Students are responsible for selecting a program that meets all the Faculty and departmental requirements. Students who have interrupted their studies may find that requirements have changed since the period of their previous enrolment. They must consult the Dean and the department involved.

A student who does not meet the graduation requirements for the Bachelor of Science within a maximum of 180 credits of course work attempted will be required to withdraw from the Faculty of Science.

English Requirement

To qualify for the Bachelor of Science, students must satisfy the English requirement of the Faculty of Science. To do this students must obtain credit for two of ENGL 110, 111, 112, 120, and 121, or their equivalents if taken at another institution. ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121.

All students admitted to the Bachelor of Science program must take immediate steps to satisfy the English requirement. The following notes apply.

- 1) Students admitted directly from secondary school are required to take English in their first year if eligible to do so. To be eligible, students must have written the Language Proficiency Index (LPI) examination and obtained a score of level 5. For details on this examination, and exemptions from it, see *Language Proficiency Index Requirement for First-Year English*, p. 120.
- 2) Students admitted directly from secondary school who have not obtained a score of level 5 on the LPI will be permitted to register in no more than 12 credits of course work per term until a satisfactory LPI score is achieved. Students unable to enrol in a first-year English course because of an unsatisfactory LPI score are advised to take a non-credit writing course through the UBC Writing Centre.
- 3) Students who do not achieve a level 5 LPI score before completing 30 credits toward the Bachelor of Science will not be permitted to register in any additional credit courses until they obtain a level 5 score.

- 4) Students who are accepted on transfer from other post-secondary institutions, or who are readmitted to the Faculty after being required to discontinue, must either have met the English requirement or be eligible to enrol in first-year English before they will be permitted to register in any courses for credit. This usually requires achievement of a level 5 or better on the LPI exam in the summer prior to admission for the fall term (see *Language Proficiency Index Requirement for First-Year English*, p. 120).
- 5) Students admitted to a first-degree program who have not met the English requirement by the time they have completed 60 credits of course work toward the Bachelor of Science, taken either at UBC or at another post-secondary institution, will not be permitted to enrol in courses other than first-year English until the English requirement is met.
- 6) Students admitted to a second-degree program who have not met the English requirement by the time they have completed 30 credits of course work at UBC toward the Bachelor of Science will not be permitted to enrol in courses other than first-year English until the English requirement is met.
- 7) Once admitted to UBC, students will not normally be permitted to satisfy the English requirement at another institution.

Science Requirement

At least 72 credits must be in science courses. Geography courses designated as carrying Science credit are numbered 00–09 in the last digits, plus GEOG 370, 372, 373, and 470. (GEOG 449 also carries science credit, but only for B.Sc. honours students in Geography.) In addition to PSYC 348 and 448, all Psychology courses numbered 60 or above in the last two digits have Science credit. Only the following courses in the Faculty of Land and Food Systems have Science credit: FNH 350, 351, 450, and 451. Some courses in the Faculty of Medicine have Science credit: ANAT 390, ANAT 391; all BIOC, PCTH, and PHYL courses; MEDG 410-421.

Arts Requirement

At least 18 credits must be in Arts courses, which must include 6 credits of first-year English and at least 12 other credits in Arts courses that are for credit toward the Bachelor of Arts.

The Arts requirement can be met by Geography courses numbered 20 and above in the last two digits except those numbered 40–48 and 70–79 in the last two digits. (For further restrictions on students in the B.Sc. in Geography, see *Geography*, p. 416, under Bachelor of Science.)

Arts or Science Breadth Requirement

Each Major program must include a broad range of experience in the core disciplines of Science and Arts. Of the electives available in the program after the lower-level requirements, Arts requirement, and program requirements have been met, at least 9 credits must be in

Science courses outside the field of the major or in additional Arts courses (or in a combination of Science and Arts courses). Refer to the following table for definitions of the field of the Major. ISCI 311, 320, 322, 333, and 411 may count as breadth electives in all major programs. Major programs other than Cognitive Systems may also count COGS 200 as a breadth elective.

Courses in the Field of Major

Astronomy	ASTR, MATH, PHYS
Atmospheric Science	ATSC, EOSC (Oceanography), GEOG (Science), PHYS
Biochemistry	BIOC, BIOL, CHEM, MICB, and all courses offered for Science credit by departments in the Faculty of Medicine.
Biology	BIOC, BIOL, MICB, MRNE, EOSC 371, 470, 471, 474, 475, 476, 478; PSYC 304, 306, PSYC (Science), and Science credit courses in the Faculties of Medicine and Land & Food Systems
Chemistry	CHEM, PHYS, BIOC
Cognitive Systems – CID Stream	CPSC, LING, PHIL, PSYC
Cognitive Systems – Cognition & Brain Stream	PSYC, PHIL, CPSC
Computer Science	CPSC, MATH, STAT
Earth & Ocean Sciences	EOSC, ATSC
Environmental Sciences	Courses in the <i>Area of Concentration</i> , p. 415.
Geography	GEOG
Mathematics	MATH, STAT, CPSC
Microbiology & Immunology	MICB, BIOL, and science credit courses in the Faculty of Medicine.
Pharmacology	BIOC, BIOL, PCTH, PHYL, and science credit courses in the Faculty of Medicine.
Physics	PHYS, ASTR, MATH
Psychology	PSYC, BIOC, BIOL, COGS, PCTH, PHYL
Statistics	STAT, MATH, CPSC

Double major and combined major programs satisfy the breadth requirement using their program requirements unless the program combines areas within the same field of major. In such cases, the breadth requirement must be satisfied with additional credits.

Upper-Level Requirement

For upper-level course requirements, see the table “Summary of Minimum Program Requirements” below. For the Bachelor of Science major, 30 of the 48 upper-level credits must be in Science courses. The remaining 18 upper-level credits for the major may be in any faculty. Those 18 upper-level credits may include upper-level Geography courses numbered 10 to 19, 40 to 48, and 70 to 79 in the last two digits which are not designated as either Science or Arts. Students in Honours, Double Major, or Minor in Science options have higher requirements for upper-level Science credits; they may also take 18 credits in any faculty, but at most 6 credits will count toward the minimum upper-level requirements.

SUMMARY OF MINIMUM PROGRAM REQUIREMENTS

	Major	Major+Minor in Science	Major+Major (Science)	Honours	Honours+Minor in Science
Total Credits	120	120	120	132	132
of which courses 300+	48	48	60	48	60
Total Science Credits	72	72	72	72	72
of which courses 300+	30	42	54	42	54
Total Arts Credits	18	18	18	18	18
Max. Credits not in Science or Arts (optional)	18	18	18	18	18

Other Credit Allowances

Up to 18 credits of course work in a faculty other than Science or Arts may be taken for credit towards the Bachelor of Science. These courses may not replace specific courses in a Science program or count towards the 72 credits of Science or the 18 credits of Arts courses required by the B.Sc. or the 9 credits of breadth required by the Major programs. The 18 credits may, however, count toward the required upper-level credits for the B.Sc. subject to the upper-level requirement. See *Upper-Level Requirement*, p. 388, in this section.

Double Counting

Students enrolled in a combined program, e.g., Double Major, Major+Minor in Science, or Honours+Minor in Science, are allowed to double-count a limited number of credits. The second major or the minor may normally contain no more than 6 upper-level credits that are also counted toward the core requirements for the first major or honours. Thus, in order to graduate, double major students must have at least 54 upper-level Science credits, Major+Minor in Science students must have at least 42, and Honours+Minor in Science students must have at least 54; this number of credits cannot be arrived at by double-counting. There is no maximum number of credits that can be double-counted. Students should be aware that by double-counting they could substantially weaken the intellectual content of one of their specialties.

Lower-Level Requirements

In the first 60 credits, every student, unless enrolled in Science One (see note below), must complete (or have advance credit or placement in) the minimum requirements in English, physical sciences, computational sciences, biology or another science, and in laboratory science described below.

Advance credit or placement may be granted where appropriate when the equivalent of any or all of these courses is completed at another institution prior to admission to the University.

Note: No more than 3 credits of the Faculty of Science lower-level requirements may be deferred beyond the first 60 credits completed; ENGL and MATH 100 (or 102 or 104 or 180 or 184 or 120) may not be deferred.

Students intending to apply for entry to Applied Science, Commerce and Business Administration, Forestry, Pharmaceutical Sciences, or Rehabilitation Sciences should refer to the

entrance requirements for each of these academic units. These requirements must of course be included within the normal program in the Faculty of Science.

Students intending to do graduate work in the sciences are reminded that competence in the reading of scientific literature in one or two languages other than English is sometimes required.

Students are reminded that the regulations listed under *Student Academic Performance*, p. 386, in Bachelor of Science, Academic Regulations apply.

ENGLISH

Students take two of ENGL 110, 111, 112, 120, or 121. ENGL 112 is recommended. One of these may be deferred to second year.

COMPUTATIONAL SCIENCES

Students take one of MATH 100, 102, 104, 180, 184, or 120 and 6 computational credits. These courses are normally in CPSC, MATH, or STAT. Some programs may allow the completion of other computational courses to satisfy 3 credits of the requirement. These alternative courses are specified in the program descriptions.

Students who intend to pursue an honours program requiring 6 credits of calculus should consider MATH 120/121, as these enriched courses provide a foundation for such programs.

PHYSICAL SCIENCES

Students take CHEM 111 if credit was not obtained for Chemistry 12 and 3 credits of 100-level PHYS (normally PHYS 100) if credit was not obtained for Physics 12. All students take 6 credits of CHEM and/or PHYS lecture courses at the 100-level beyond CHEM 111 and PHYS 100.

Students who intend to pursue an honours program should consider PHYS 121/122, as these enriched courses provide a foundation for such programs.

OTHER SCIENCES

Students who do not have credit for Biology 11 or 12 take 3 credits of 100-level BIOL. Students with credit for Biology 11 or 12 complete 3 credits of an ASTR, BIOL, EOSC, or science-credit GEOG or PSYC lecture course.

LABORATORY SCIENCE

Students take two one-term laboratory courses chosen from ASTR, BIOL, CHEM, EOSC, GEOG, PHYS, and PSYC. These may be stand-alone labs or parts of lecture-lab courses included in other requirements listed above.

ADDITIONAL LOWER-LEVEL COURSES

Students take additional courses chosen from Science or Arts to a total of at least 60 credits. A B.Sc. program may include up to 18 credits from a Faculty other than Science or Arts; see *Other Credit Allowances*, p. 389, in this section.

Students should consult the intended program of study to determine the correct choice of courses to fulfill both the Faculty of Science requirements listed above and the introductory requirements for the desired program. Students who are uncertain of their intended honours, major, General Science, or Integrated Sciences program should choose electives so as to provide maximum flexibility in their choice of program.

SCIENCE ONE

Students with credit for Science One and BIOL 140 have met all first-year Biology, Chemistry, Mathematics, and Physics requirements for programs in the Faculty of Science, and satisfy the lower-level requirements for physical sciences, other sciences, and laboratory science and 6 of the required 9 credits in computational science.

Program Requirements

Students are reminded that regulations apply as listed under Bachelor of Science, Academic Regulations, *Student Academic Performance*, p. 386. Choice of program and option will be limited if good academic standing is not maintained. Permission to pursue more than one of the following types of primary program will not normally be given: honours, combined honours, major, combined major, double major, Integrated Sciences, General Science.

Programs require varying numbers of credits but no Bachelor of Science program requires fewer than 120 credits.

Programs may require specific lower-level (i.e. 100- and 200-level) and upper-level (i.e. 300 and above) courses. See the *Bachelor of Science program listings*, p. 395, in this section.

HONOURS AND COMBINED

HONOURS PROGRAM

Honours candidates are required to follow the program as set out in the Calendar, to complete all courses attempted, and to maintain a minimum overall 68% average in each academic session.

Honours candidates in a co-operative education program are required to complete at least 15 credits in each study term. Other honours students are required to complete at least 30 credits in each Winter Session.

Self-declaration and meeting the minimum requirements are not a guarantee that a student will be able to continue in an honours program. Interested students are urged to consult the program's website for information and directions. Some honours programs require consultation with a program advisor.

MAJOR PROGRAM

A major program is intended to provide depth of study in one discipline while allowing sufficient elective space for a student to explore

other areas of study. In addition to the lower-level requirement (i.e., English, physical sciences, computational sciences, other sciences, and laboratory science), the Arts Requirement, and the program requirements, each major program requires at least nine credits in Science courses outside the field of the major or in additional Arts courses (or in a combination of Science and Arts. See *Arts or Science Breadth Requirement*, p. 388). The field of the major is defined for each program in the *Bachelor of Science program listings*, p. 395. At most 18 credits may be in courses in a faculty other than Science or Arts but individual program requirements may limit the number of such credits that contribute to minimum degree requirements.

COMBINED MAJOR

This program involves specialization in two fields, but students in this program complete defined combinations of the degree requirements of two programs in Science. Currently this program limits combinations to those of Computer Science and another field. This program may lead to graduate study if sufficiently high standing is obtained.

DOUBLE MAJOR IN SCIENCE PROGRAM

Students in the double major programs must satisfy all degree requirements of one department, including all Faculty of Science requirements. As far as the second department is concerned a student need only satisfy all departmental requirements at the 300 or higher level and any lower-level program requirements that are not part of the first major program.

Students intending to major in two areas must discuss their plan with academic advisors in both programs, preferably before the end of their first Winter Session but definitely before the end of second year. Normally students will be registered in the first major during second year and will add the second major upon registering for third year (see *Registration and Program Approval*, p. 384, under Bachelor of Science, Admission). All double major programs need the approval of both departments and a senior faculty advisor (for application form, see www.escience.ubc.ca). The second major may normally contain no more than 6 upper-level credits that are also counted toward the core requirements for the first major. Entry into and continuation in a double major program requires that the student remain in good academic standing. Students should be aware that in most cases it will not be possible to complete a double major in four years. See the information regarding the double major under *Graduation Requirements*, p. 387, in this section.

DOUBLE MAJOR IN SCIENCE AND ARTS PROGRAM

Students must satisfy all degree requirements for a bachelor of Science Major in one program, including all Faculty of Science requirements. As far as the Arts Major is concerned a student need only satisfy any remaining Faculty of Arts and program requirements for the Bachelor of Arts Major. Courses may satisfy requirements for both programs.

Students should endeavour to satisfy lower-level course prerequisites for both programs in their first two years. Entry into, and continuation in, a double major program requires that the student remain in good academic standing.

The B.A. Major in Music is available as a second major for a B.Sc. student but it has limited access to performance courses. The Bachelor of Music is not available as a second major. Students interested in combining studies in science and musical performance should consult advisors in both faculties prior to admission to UBC to discuss the appropriate faculty in which to enrol and to develop an academic plan.

MINOR PROGRAM

Students intending to embark on a minor program should see *Minor Programs*, p. 393. All minor programs must be approved by a senior faculty advisor.

GENERAL SCIENCE PROGRAM

Students in the General Science Program who have completed the first year should select courses in consultation with an advisor in the Science Information and Advising Office at the beginning of the second year and each subsequent year, if questions arise as to program requirements.

Students in the following B.Sc. Major programs may not complete a B.A. Major in the same subject: Geography, Mathematics, Mathematical Sciences, Psychology.

INTEGRATED SCIENCES (IS) PROGRAM

Students intending to apply for the Integrated Sciences Program after completing 60 credits should take care in selecting second-year courses which may be requirements for upper-level courses in their proposed area of focus. Integrated Sciences advisors may be consulted in planning a course of study. Changes to previously approved IS programs are permitted but must be approved by an IS advisor.

PART-TIME PROGRAM

Any course load less than 24 credits in Winter Session is considered part-time study. Students do not need permission of the Dean's Office for part-time study but should be aware that program requirements and courses may change over time (see *Credit*, p. 385). Normally, pursuing an honours program or a double major is not permitted through part-time study. Students should select courses and programs in consultation with the departmental advisors.

Successful completion of a total of 18 or more credits, of which 12 or more must be from first-year Science credits; or successful completion of Science One. A student who does not meet the minimum requirements for promotion to second year within a maximum of 60 credits of course work attempted will be required to withdraw from the Faculty of Science.

Promotion Requirements

Students in the Faculty of Science are required to make steady progress toward graduation. The total number of credits, the number of science credits, and the specifications of the student's program (in second year and after) are all considered in the decision to promote. The

decision is based on courses completed to the end of Winter Session. Registration in a program in second year is not a guarantee of continuing status in that program; maintenance of a competitive academic record is required. A student with second- or third-year standing who does not satisfy the following promotion requirements may be denied promotion to the next year level in the program and be removed from the program and required to gain admission to another. A student removed from a program who does not gain admission to another may be required to withdraw from the Faculty of Science. Students changing from one program to another will have their year standing reassessed.

PROMOTION TO SECOND YEAR

Promotion to second year requires successful completion of a total of 24 or more credits, of which at least 12 must be from the Faculty of Science lower-level requirements or equivalent advanced credit (see Lower-Level Requirements in this chapter). Students must meet the minimum requirements for promotion to second year within a maximum of 48 credits of course work attempted (i.e., passed or failed) after admission to first year in the Faculty of Science. Those who do not will be required to withdraw from the Faculty of Science.

Students admitted to or newly promoted to second year must declare a program before they start to register for courses for the next Winter Session. All continuing students are urged to consult program websites for information and directions before the end of their first Winter Session and not to wait until the registration period in the summer. Some programs require prior approval from a program advisor. Students who are promoted to second year but are either (1) on academic probation after first year, or (2) have a failed first year but have been permitted to continue (see Continuation Requirements in the chapter), must gain approval from a program advisor before they will be permitted to register as a second-year student.

PROMOTION TO THIRD YEAR

Promotion to third year requires successful completion of 48 or more credits. These must include 6 credits of first-year English, at least 15 science credits from the lower-level requirements (see Lower-Level Requirements in this chapter) or equivalent advanced credit, and at least 15 additional science credits eligible for credit in the student's program. Programs may identify one or more second-year courses that must be passed for promotion to third year.

Second-year students are required to achieve an average of at least 60% on the first attempts in three-fifths (3/5) of the credits (rounded up to the nearest whole course) for the named courses (i.e., not electives) in the second year of their declared program. For the General Science and Integrated Sciences programs, the 15 additional science credits used to calculate the average must prepare the student to take required upper-level courses in at least two General Science subject areas. Students who do not meet the minimum average will normally be removed from that program and required to gain admis-

sion to another. Some programs have limited enrolment and will not be able to accept all students who meet the minimum promotion requirements. Students must meet the minimum requirements for promotion to third year in a B.Sc. program with a maximum of 78 credits of coursework attempted or be required to withdraw from the Faculty of Science.

PROMOTION TO FOURTH YEAR

Promotion to fourth year requires successful completion of a total of 78 or more credits. Of these, 50 or more must be Science credits including all of the Faculty of Science lower-level requirements (see Lower-Level Requirements in this chapter), all courses specified in the first and second years of the program (but not all electives), and at least 40% of the credits in courses specified in the upper years of the program (i.e., not electives). Programs may identify one or more upper-level courses that must be passed for promotion to fourth year. In exceptional circumstances, a student who does not meet the promotion requirements may be removed from the program. A student must meet the minimum requirements for promotion to fourth year in a B.Sc. program within a maximum of 108 credits of course work attempted. Those who do not will be required to withdraw from the Faculty of Science.

Students must meet all the graduation requirements for the degree within a maximum of 180 credits of coursework attempted. Those who do not will be required to withdraw from the Faculty of Science.

POST-SECONDARY APPLICANTS

Students applying for admission to second and third years from British Columbia colleges and universities or from institutions outside the province must meet, in addition to the present University admission requirements, the Faculty of Science minimum requirements as applied to UBC students for promotion to that stage. Students admitted to UBC who have not completed either 6 credits of transferable first-year ENGL or achieved at least a level 5 on the LPI test will be placed in second year but will not be permitted to register in the Faculty of Science until they demonstrate a level 5 on the LPI test.

Second Degree Studies

REQUIREMENTS FOR THE BACHELOR OF SCIENCE

Students with a recognized undergraduate degree may be eligible to pursue a Bachelor of Science Major program as a second degree. Students are required to undertake a second degree program in a discipline distinct from that studied for a previously granted degree. If the previous degree included more than four core upper-level courses in a discipline, then the UBC second degree may not normally be taken in that discipline. The pursuit of an honours, General Science, or Integrated Sciences program as a second degree normally is not permitted.

Students admitted to a second degree must consult the Faculty of Science Student Information and Advising Centre and the appropriate pro-

gram advisor regarding specific second degree requirements prior to commencing the program. Transfer credit is not assigned to second-degree students.

Students are expected to complete a second degree in a timely manner. A part-time study program must be approved in advance by the Science Information and Advising Centre.

For a major second degree, students must complete a minimum of 60 credits at UBC while enrolled in their second degree program and must satisfy all Faculty and departmental requirements of their chosen program. All upper-level Faculty and departmental requirements must be met through second degree credits only. Specific departmental requirements completed prior to commencement of the second degree may not be repeated, and must be replaced by additional courses in order to satisfy the 60-credit and upper-level requirements. The remaining degree requirements and course prerequisites can be satisfied by any combination of first- and second-degree credits. Students with limited background for their chosen program may find it necessary to complete more than 60 credits to fulfill all degree requirements.

ENGLISH REQUIREMENT

All B.Sc. students must complete 6 credits of first-year ENGL courses. Any second-degree student who has not completed the English Requirement upon admission must complete it within the first 30 credits completed at UBC (see *English Requirement*, p. 388, in this chapter). Achievement of level 5 or better on the LPI test normally is required prior to taking ENGL courses.

Failure to complete the English requirement will result in a block on further registration until the requirement is met. No co-op work term or study abroad will be permitted if this requirement has not been met.

PROMOTION REQUIREMENTS

The promotion requirements above apply only to students admitted from high school or on transfer from another post-secondary institution. Students admitted on the basis of prior study (i.e., completion of a first degree) are subject to special promotion requirements based on the year level to which they were admitted. Promotion decisions are made at the end of each Winter Session.

Admission or promotion to second year requires completion of at least 12 required lower-level Science credits (either with UBC credits or from prior study); see Lower-Level Requirements in this chapter. First-year students must meet the minimum requirements for promotion to second year within a maximum of 36 credits of course work attempted (i.e., passed or failed) after admission to the second degree program. Those who do not will be required to withdraw from the Faculty of Science.

Second-year students must declare a major before they start to register for courses for the next Winter Session. All students are urged to consult the program's website for information

and directions before the end of Winter Session and not to wait until the registration period. Some majors require prior approval from a program advisor. Students who are promoted to second year and either (1) are on academic probation after first year, or (2) have a failed year but have been permitted to continue (see Continuation Requirements in this chapter), must gain approval from a program advisor before they will be permitted to register.

Admission or promotion to third year requires completion of any of the following specification with either UBC credits or credits from prior study: at least 3 credits of the English requirement, all of the lower-level Science requirements (including all of the Computational Sciences requirement), and a total of at least 30 Science credits required for the declared program. Programs may identify in the Calendar one or more second-year courses that must be passed for promotion to third-year.

Second-year students are required to achieve an average of at least 60% on the first attempts in three-fifths (3/5) of the credits (rounded up to the nearest whole course) for the named courses (i.e., not electives) in the second year of their declared program. Students who do not meet the minimum average normally will be removed from that program and required to gain admission to another. Some programs have a limited enrolment and will not be able to accept all students who meet the minimum promotion requirements.

Second-year students must meet the minimum requirements for promotion to third-year within a maximum of 36 credits of coursework attempted (i.e., passed or failed) while in second year. Those who do not will be required to withdraw from the Faculty of Science.

Promotion to fourth-year requires completion of the following, either with UBC credits or from prior study: all of the lower-level requirements including 6 credits of ENGL; and, a total of at least 45 Science credits. In addition, at least 18 UBC credits must have been completed successfully including at least nine credits of Science courses numbered 300 or above. Programs may identify in the Calendar one or more third-year courses that must be passed for promotion to fourth year. Third-year students must meet the minimum requirements for promotion to fourth year within a maximum of 36 credits or coursework attempted (i.e., passed or failed) while in third year. Those who do not will be required to withdraw from the Faculty of Science.

Second-degree students are permitted to be registered in fourth year for no more than two winter sessions without the prior approval of the Dean.

FIRST-YEAR PROGRAMS

The Faculty of Science offers three options for enrolment in first year:

- 1) The standard program, in which students admitted to the Faculty of Science design their own program according to the requirements listed above, selecting both

the courses and the sections they wish to attend.

- 2) The Coordinated Science Program (CSP), in which students admitted to the Faculty of Science attend a standard timetable of core science courses, plus an interdisciplinary workshop, together as a group. Students register separately for electives, including at least 3 credits of first-year English.
- 3) The Science One Program (25 credits plus 2 credits for corequisite Biology 140 Lab) is an academically rigorous interdisciplinary course. A separate application is required.

For additional information on first-year programs, visit the Faculty of Science website (www.science.ubc.ca).

Coordinated Science Program

Students with a broad interest in science and the relationships between various scientific disciplines may wish to register in the Coordinated Science Program (CSP). Within CSP, the General Science Option (GSO) consists of special sections of BIOL 121/140, CHEM 121/123, MATH 100/101, and PHYS 101/102. The Computer Science Option (CSO) consists of CPSC 111/121, MATH 100/101, BIOL 121, CHEM 121, and PHYS 101.

All CSP students attend their lectures together and have access to the CSP study space, creating a smaller social and learning community within first-year science.

The CSP instructors teach their courses at the same academic level as the standard program and work together to coordinate their course lecture material. They also select topics that promote scientific inquiry across all disciplines. The CSP teaching team also includes two lecturers who run the CSP workshops.

Each week, CSP students meet in smaller groups of about 30 for a two-hour interdisciplinary workshop. These involve participation in a variety of hands-on activities, discussions and debates, group projects, and student-led presentations. The workshops provide the opportunity to develop problem solving, critical thinking, and communication skills useful in all scientific disciplines and future careers. The workshops are not tutorial sessions. Rather, they are a chance to take a deeper look at course material and to explore connections between the sciences.

These workshops require a weekly two-hour commitment from students, in addition to time scheduled for the lectures and labs. CSP students are expected to participate fully in workshop activities. The two-term CSP Workshop will be worth 1 credit, with students receiving a mark on a pass/fail basis.

Students who have been admitted to the Faculty of Science and have taken Biology 11, Calculus 12, Physics 12, and Chemistry 12 (or their equivalents) are eligible for the program. Students who are interested in the program but who lack prerequisites should contact the Coordinated Science Program Office

(csp@interchange.ubc.ca) at 604-822-0274 to discuss their options. Because writing is a significant part of the CSP, proficiency in English is very strongly recommended.

Additional information about the program is available from the CSP website (www.science.ubc.ca/~csp).

Science One Program

Science One, an intensive alternative to the standard first year in the Faculty of Science, is a 25-credit program of study spanning two terms. Enrolment in Science One requires enrolment in the first-year biology lab course BIOL 140. The program is interdisciplinary and integrates the essential material of first-year Biology, Chemistry, Mathematics, and Physics through lectures, tutorials, workshops, and laboratories. Science One has a home base and a computer lab as well as excellent student support. The aim of the curriculum is to provide a coherent focus for the student's first-year Science studies, and a sense of being a member in a community of learners. Information about Science One and application forms may be obtained from the Science One Office (science1@interchange.ubc.ca), 464-6356 Agricultural Road, Vancouver, BC, V6T 1Z2; telephone 604-822-5552, fax 604-822-5551, or from the Science One website (www.science.ubc.ca/~science1). The deadline for receipt of completed applications is April 30. (Students are notified of their status by May 31.)

Late applicants may be considered until May 31.

ADMISSION

Admission to Science One requires a formal application. Enrolment is limited. Prerequisites for enrolment in Science One are admission to the Faculty of Science; marks of 'B' or better in each of Biology 11 or 12, Chemistry 12, Mathematics 12 and Physics 12, plus, at least 80% in English 12 or English Literature 12 or a satisfactory score (level 5 or better) on the *Language Proficiency Index (LPI) examination*, p. 120. Students who are lacking a prerequisite are advised to call the Science One Office to discuss their options.

ELECTIVES

Students enrolled in Science One may register for up to an additional 11 credits of electives. With the proper choice of electives, Science One satisfies prerequisite requirements for entry into all second-year programs in the Faculty of Science.

Students are advised to register as early as possible for English electives to ensure seats in the MWF 8:00 am or 9:00 am classes, which are compatible with the Science One schedule. Students who have not obtained at least 80% in English 12 or English Literature 12 (or BC equivalent) must write the LPI exam and achieve a level 5 standing before classes begin in September. For information about English eligibility and the LPI (Language Proficiency Index) requirement, see *English Language Admission Standard*, p. 15, and *English Language Proficiency Index*, p. 120, in this Calendar. Any questions about scheduling English electives or using Advanced Placement credits

for English should be addressed to the English Department at 604-822-5651.

Second-year Psychology courses may be open as electives to Science One students; arrangements must be made through the Science One Office. Please register for the Science One Program and other elective(s) first – record all relevant course registration information before calling the Science One office with the request.

Arts electives (which may include one additional first year English course) are chosen from Faculty of Arts courses numbered 100 to 199 for which students have the appropriate prerequisite. There are in addition a limited number of 200- and higher-level Arts courses for which students may be eligible. For further information, refer to the publication, *Courses Open to First-Year Students* which is available in the Arts Advising Office, telephone 604-822-4028.

Science One students are required to take BIOL 140 (a 2-credit Biology laboratory course) in their first year.

WITHDRAWAL

Students who enrol in Science One are expected to remain in the program for the complete session, but they may drop it without penalty during the period officially allowed for course changes. On successful completion of the program, students receive one composite mark for Science One and are promoted to second-year standing in the Faculty of Science.

ADVISING AND PROGRAM APPROVAL

Science One advisors will be available during the summer months. Appointments may be made by calling the Science One Office at 604-822-5552 after admission to the program. Students who are contemplating a specific department or another faculty after Science One, are advised to contact that department or faculty directly to ensure that they meet their elective prerequisites for second year.

CO-OP AND MINOR OPTIONS

Co-operative Education Programs

The Co-operative Education programs are intended to integrate the academic education (classroom-based learning) of interested and qualified students with relevant, supervised, and paid work experience (work-based learning) with employer organizations. Co-op students gain valuable skills that help guide them through their academic education, as well as prepare them for future job markets upon graduation.

The Faculty of Science offers Co-operative Education programs in the disciplines of Atmospheric Sciences, Biochemistry and Molecular Biology, Biology, Chemistry, Computer Science, Geology, Mathematics, Microbiology and Immunology, Pharmacology and Therapeutics, Physics and Astronomy, and Statistics. Initiatives are underway to offer the program to students in other departments in the Faculty.

Co-operative Education programs are optional and supplementary to academic programs in a department. Students who wish to be considered for the program must meet all require-

ments of their departments and will be selected on the basis of academic performance and suitability for the work environment. Total enrolment is subject to the availability of appropriate work placements. Students admitted into the program will register in the appropriate Co-operative Education courses for each work term, once a suitable position is confirmed, and will be required to pay the Co-operative Education program fee (see *Program and Course Fees*, p. 28, in the “Fees, Financial Assistance, and Scholarships” chapter of this Calendar). In addition, a co-op workshop fee is to be paid by all students accepted into the program. There will not be a tuition fee in addition to this.

Each successfully completed Co-operative Education course will be assigned 3 credits and will be recorded on the student’s transcript. In order to graduate in a Co-operative Education Program, a student must have completed the required number of work terms in addition to the normal academic requirements of the department. Co-operative Education course credits cannot be used in lieu of or to complement academic course credits required by the department.

To inquire about application deadlines and for further information, please contact the Co-operative Education Program Office, Room 170 Chemistry/Physics Building, The University of British Columbia, 6221 University Blvd, Vancouver, BC, V6T 1Z1; fax 604-822-9676. Information is also available through the Co-op website (www.sciencecoop.ubc.ca).

Minor Programs

Students who wish to focus their electives may, with the approval of a senior faculty advisor, undertake an optional minor program in conjunction with a Bachelor of Science program. The designation of the minor will be applied to the transcript upon graduation if permission has been granted and the requirements are met. Permission to pursue a minor will be denied if the student is not making good progress in the primary specialization. Permission to pursue more than one minor will not normally be given. The following five types of minor program are available: Minor in Land and Food Systems, Minor in Arts, Minor in Commerce, Minor in Human Kinetics, and Minor in Science. Entry into and continuation in a minor option requires that the student remain in good academic standing. Information on minor programs is also available on the eScience website (www.escience.ubc.ca).

MINOR IN LAND AND FOOD SYSTEMS
A minor in Land and Food Systems may be undertaken by students in a Major, Honours, General Science, or Integrated Sciences program. Upon completion of one of the following four minor programs, the notation “Minor in [Subject]” will be denoted on the student’s transcript.

The Applied Animal Science Minor will consist of 6 credits selected from BIOC 300, BIOL 310, BIOL 334, FNH 350, and 12 credits selected from AGRO 311, AGRO 312, AGRO 315, AGRO 316, AGRO 327, AGRO 360, AGRO

411, AGRO 414, AGRO 418, AGRO 460, FNH 452, FNH 453, FNH 454 for a total of 18 credits.

The Food and Resource Economics Minor will consist of ECON 310, ECON 311 and 12 credits selected from ECON 371, FNH 355, FRE 302, FRE 306, FRE 340, FRE 374, FRE 385, FRE 420, FRE 475 for a total of 18 credits. Students who have completed ECON 101 and 102 prior to entry into the program may use these courses in lieu of ECON 310 and 311, but may require additional upper-level credits to satisfy graduation requirements.

The Horticulture Minor will consist of 6 credits selected from BIOL 316 (AGRO 326), BIOL 327 (AGRO 327), BIOL 317 (AGRO 328), BIOL 351 (AGRO 324) and 12 credits selected from AGRO 322, AGRO 360, AGRO 420, AGRO 421, AGRO 423, AGRO 428, FNH 330, LARC 316 for a total of 18 credits.

The Nutritional Sciences Minor will consist of FNH 350, FNH 351, and 12 credits selected from FNH 301, FNH 355, FNH 370, FNH 371, FNH402, FNH 451, FNH 452, FNH 453, FNH 454, FNH 470, FNH 473, FNH 490 for a total of 18 credits.

Space in many Science and Land and Food Systems courses is limited. Admission to a Land and Food Systems Minor does not guarantee access to courses agreed upon for the minor.

MINOR IN ARTS

A Minor in Arts may be undertaken by students in a major, honours, General Science or Integrated Sciences program. An acceptable program must comprise courses in the Faculty of Arts that are for credit toward a Bachelor of Arts and consists of 18 upper-level credits in a single subject or field of specialization. Students should design a coherent and academically sound course of studies for their proposed Minor, which must be approved by a senior faculty advisor in the Faculty of Science Dean’s Office at the beginning of the second year. All courses must be acceptable for a Bachelor of Arts Major in the proposed subject area or field, but a student is not bound by the other requirements that the Faculty of Arts sets for a Major or Minor in the field. The following restrictions should be noted.

A Minor in Mathematics may not be undertaken by students in the Faculty of Science. Students majoring in one of the earth science programs (Earth and Ocean Science, Geography, Geology, Geophysics, Oceanography) may not undertake a Minor in Geography. Other students intending to Minor in Geography should take GEOG 101 (or 102 and 103) as a prerequisite; other Geography courses must be selected from those that carry Arts credit in the Faculty of Science. Students in the B.Sc. program in Psychology may not undertake a Minor in Psychology; other students intending to Minor in Psychology must select only those Psychology courses that carry Arts credit in the Faculty of Science.

Upon successful completion of the Minor program, the notation, ‘Minor in Arts’ will be denoted on the student’s transcript. Students

wanting a subject-designated Minor may also undertake a Minor in a specific Arts discipline *Minor Program*, p. 123, which requires the completion of at least 30 credits in a single subject field of specialization of which at least 18 of these credits must be numbered 300 or higher.

MINOR IN COMMERCE

A Minor in Commerce may be undertaken by students in a major, honours, General Science or Integrated Sciences program. Enrolment in this program is strictly limited. An application form may be obtained from the Faculty of Science Student Information and Advising Centre or from the eScience website (www.escience.ubc.ca). The completed form must be returned no later than May 15. At the time of application, students must be eligible for third year standing in the Faculty of Science with a cumulative average of at least 68% in the previous two years. Meeting the stated requirements does not guarantee admission into the program.

Applicants must have successfully completed one of MATH 100, 102, 104, 120, 180, 184, or Science One and both ECON 310 and 311 (or 101 and 102). The program will consist of COMM 329(3), COMM 457(3), COMM 465(3), COMM 473(3), COMM 493(3), and one of COMM 399(3) or COMM 458(3) for a total of 18 credits.

Note: Students may encounter difficulty fitting the COMM courses into their Science program timetable; careful planning is essential. Upon successful completion of this program, the notation ‘Minor in Commerce’ will be placed on the student’s transcript.

MINOR IN HUMAN KINETICS

A Minor in Human Kinetics may be undertaken by students in a major, honours, or General Science program. Enrolment in this program is strictly limited. An application form may be obtained from the Faculty of Science Advising Office and the completed form must be returned no later than May 15. At the time of application, students must have completed PHYS 100 or 101 and be eligible for third year standing in the Faculty of Science with a cumulative average of at least 68% in the previous two years, and be eligible to enrol in either PHYL 301(6), or BIOL 363(3) and 364(2). Students who do not complete this physiology requirement in their third year will be dropped from the minor. Meeting the stated application requirements does not guarantee admission into the program.

The program will consist of 18 credits selected from the following list of courses: HKIN 303(3), HKIN 353(3), HKIN 361(3), HKIN 363(3), HKIN 364(3), HKIN 368(3), HKIN 389(3), HKIN 461(3), HKIN 463(3), HKIN 464(3), HKIN 468(3), HKIN 469(3), HKIN 471(3), HKIN 473(3).

Students admitted to the Minor in Human Kinetics have the prerequisites waived for all HKIN 3** courses listed above. However, students should be aware of the 300-level prerequisites for some 400-level Human Kinetics

courses. Students may encounter difficulty fitting the HKIN courses into their Science program timetable; careful planning is essential. Upon successful completion of this Minor program, the notation 'Minor in Human Kinetics' will be placed on the student's transcript.

MINOR IN SCIENCE

A Minor in Science may be undertaken by students in an Honours or Major program. Courses taken for the Minor must be courses in the Faculty of Science that are acceptable for a Bachelor of Science Major or Honours in the proposed subject area or field. The Minor consists of 18 upper-level credits either in a single subject or selected from a program. Students should design a coherent and academically sound course of studies for their proposed Minor, which must be approved by program advisors in both the major (or honours) and minor areas and by the Dean during the second year. Approval will be withheld if the course of study for the Minor is deemed to overlap excessively with the course of study for the major or honours.

Students registered in other degree programs may, with approval of a departmental advisor in Science, a senior Faculty advisor in the Faculty of Science Dean's Office and a senior advisor in their home faculty, undertake a Minor in Science program in conjunction with their degree program. Students are strongly encouraged to consult with advisors in both Faculties before taking the necessary courses.

Upon completion of the Minor program, the notation, 'Minor in [subject]' will be denoted on the student's transcript. Space in many Science courses is limited. Admission to a Science Minor does not guarantee access to courses agreed upon for the minor.

A student completing a Minor in Science in conjunction with a major or honours program may use courses to fill program requirements in both areas of specialization (see *Double Counting*, p. 389, under Bachelor of Science, Degree Requirements). However, to complete a Major plus Minor in Science requires at least 42 upper-level credits of Science courses; to complete an Honours plus Minor in Science requires at least 54.

CREDIT EXCLUSION LISTS

Each line below lists courses in which there is sufficient overlap that credit may be obtained for only one selection. This does not imply that courses listed together are interchangeable. Program specifications may require a specific course selection. A student who fails a course may attempt that course once more or may attempt one other from the same Credit Exclusion List, but only once. A student who passes a course may not take for higher standing that course or another course on the same Credit Exclusion List.

Atmospheric Science

- 1) ATSC 409, ATSC 506, OCGY 510

Biochemistry

- 1) BIOC 300, 302, 303
- 2) BIOC 300, BIOL 201
- 3) BIOC 303, 503

ASTRONOMY

The Department of Physics and Astronomy (www.physics.ubc.ca) offers opportunities for study in Astronomy at the bachelor's, master's, and doctoral levels. For information on graduate degrees, see *Astronomy*, p. 234, in the Graduate Studies section.

Major Program

MAJOR (0030): ASTRONOMY (ASTR)

First Year

ENGL 100-level ¹	6
CHEM 121, (111, 113)	4
MATH 100-level ²	6-8
PHYS 107, 108, 109 (101, 102) ³	7(6)
Electives ⁴	6-9
Total Credits	30-34

Second Year⁵

ASTR 201, 202 ⁶	6
MATH 217(200, 317), 221 (223), 215	10-12
PHYS 209	3
PHYS 206 ⁷	3
Electives ⁴	8-11
Total Credits	30-35

Third Year

ASTR 303	3
MATH 316 or PHYS 312	3
PHYS 301, 308	6
PHYS 200, 203, 206 ⁸	9
Electives ⁴	9
Total Credits	30

Fourth Year

ASTR 402	3
ASTR 404, 405	6
PHYS 304, 403	6
Electives ⁸	15
Total Credits	30

Minimum Credits for Degree

¹ ENGL 112 is recommended. Qualified students are encouraged to consider 120 and/or 121. 3 credits of English may be deferred until second year.

² One of MATH 100, 102, 104, 180, 184, or 120 and one of MATH 101, 103, 105, or 121.

³ Students without Physics 12 should consult departmental advisor as early as practical. Normally they must take PHYS 100 prior to PHYS 101 or 121.

⁴ The elective credits taken throughout the program must include at least 12 credits in the Faculty of Arts (in addition to the 6 credits of 100-level English) and a further 9 elective credits in Arts or Science outside the field of the Major (Physics, Astronomy, Mathematics, are therefore excluded). Students without Biology 11 or Biology 12 must take 3 credits of 100-level BIOL. Up to 12 elective credits may be taken in any faculty. The remaining elective credits may be taken in any courses in Arts or Science, including the subject of the Major. Enough elective credits in Arts and Science

courses numbered 300 or higher must be taken so that the program's total number of Arts and Science credits at the 300-level or higher is at least 48, with at least 30 of these credits being in Science. Recommended elective: CPSC 111. Students interested in senior chemistry courses or who are planning to enter a career in teaching are reminded that they should take a second course of introductory chemistry.

⁵ Admission requirement: 60% Standing in first-year Physics courses or permission of department head.

⁶ One or both of these courses may be deferred to third year.

⁷ Students who have not obtained a standing of at least 68% in PHYS 102, PHYS 121, or PHYS 122 should substitute PHYS 216.

⁸ Qualified students are encouraged to take PHYS 206 in second year.

Honours in Physics and Astronomy

See *Physics*, p. 423.

ATMOSPHERIC SCIENCE

A program of undergraduate studies, and master's and doctoral degrees in Atmospheric Science and the Diploma in Meteorology are offered cooperatively by the Departments of Earth and Ocean Sciences and Geography. Students should direct enquiries to the Associate Chair of the Atmospheric Science Program. For information concerning the diploma program see *Diploma in Meteorology*, p. 432. For information on graduate degrees, see *Atmospheric Science*, p. 235, in the Graduate Studies section. For more information, visit the Atmospheric Science website (www.geog.ubc.ca/atmos).

Co-operative Education Program

A five-year optional Co-operative Education program is available in Atmospheric Science. The program is intended to help prepare interested and qualified students for technical careers in atmospheric science within government, university, or industrial settings. This is achieved through a minimum of 14 months of approved work placement under the supervision of practising professionals. Faculty advisors visit students at their place of work and provide advice on technical reports required of all students in the program. To be eligible, students must be admissible into third year of the B.Sc. Major in Atmospheric Science with a minimum overall grade of 72%.

Admission is by application to the Co-op Office in April of the second year. Selection of students will be based on academic performance and general suitability to the work environment as determined by resume and interview. Total enrolment in the program is subject to the availability of work placements and faculty advisors. Work placements are arranged by mutual agreement between employers and students. Participating students must register for ATSC 398, 399, 498, and 499 as appropriate, and pay the required Co-operative Education program fee per course. (See *Program and Course Fees*, p. 28, in the "Fees, Financial Assistance, and Scholarships" chapter of this Calendar.) Graduation in the Co-operative Education program requires a student to complete each of ATSC 398, 399, 498, and

499, in addition to the normal academic requirements.

To enquire about application deadlines and for further information, please contact the Associate Chair of the Atmospheric Science program or the Co-operative Education Program Office, Room 309, Hennings Building, The University of British Columbia, 6224 Agricultural Road, Vancouver, BC, V6T 1Z1; fax 604-822-9676. Information is also available through the Co-op website (www.sciencecoop.ubc.ca).

Programs

MAJOR (0167): ATMOSPHERIC SCIENCE (ATSC)

First Year

ENGL 100-level ¹	6
CHEM 121, 123 (or 111,113)	8
MATH 100 or 102 or 104 (or 120 or 180 or 184)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
PHYS 107 (or 101) ²	3
PHYS 108, 109 (or 102)	4(3)
Arts Elective	3
Elective ^{2,3}	3
Total Credits	32(35)

Second Year

ATSC 201	3
EOSC 211 (or CPSC 111)	3(4)
EOSC 250	3
GEOG 200	3
MATH 200, 215, 221	9
PHYS 216	3
Arts Elective ³	3
Elective ^{3,4,5}	3
Total Credits	30(31)

Third and Fourth Years

ATSC 301 ⁶ , 303 ⁶	6
ATSC 404 ⁶ , 405 ⁶	6
GEOG 300, 304	6
PHYS 312 or MATH 316	3
PHYS 313	3
STAT 241 or 200	3
Arts Electives ³	6
ATSC Electives ⁷	6
Electives ^{3,4,5}	21
Total Credits	60

Minimum Credits for Degree 122

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² Students without Physics 12 must normally take PHYS 100 before 101. Qualified students are encouraged to take PHYS 107/108/109.

³ 18 credits of electives must be numbered 300 or higher.

⁴ 9 credits must be Science courses from outside the Major field, or Arts. The Major field includes all Atmospheric Science, Oceanography, Geography (Science) and Physics courses.

⁵ Students without Biology 11 or 12 must take 3 credits of 100-level BIOL.

⁶ Offered in alternate years.

⁷ Selected from ATSC 406, ATSC 409, ATSC 414, EOSC 354; GEOG 401, 402; PHYS 314.

HONOURS (0429): ATMOSPHERIC SCIENCE (ATSC)

First Year

ENGL 100-level ¹	6
CHEM 121, 123 (or 111, 113)	8
MATH 120 (or 100 or 102 or 104 or 180 or 184)	3(4)
MATH 121 (or 101 or 103 or 105)	3(4)
PHYS 107 (or 101) ²	3
PHYS 108, 109 (or 102)	4(3)
Elective ^{3,4}	6
Total Credits	32(35)

Second Year

ATSC 201	3
CHEM 201	3
EOSC 211	3
MATH 215, 217, 221	9
PHYS 200, 206	6
STAT 241 or 200	3
Arts Electives	6
Total Credits	33

Third and Fourth Years

ATSC 301 ⁶ , 303 ⁶ , 404 ⁶ , 405 ⁶ , 449	18
ATSC Electives ⁷	6
CHEM 302, 304	6
GEOG 300, 304	6
MATH 300, 301, 316, 400	12
PHYS 301 or 354	3
PHYS 314	3
Arts Electives	6
Electives ⁵	9
Total Credits	69

Minimum Credits for Degree 134

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits for first-year English may be deferred until second year.

² Students without Physics 12 must normally take PHYS 100 before 101. Qualified students are encouraged to take PHYS 107, 108, and 109.

³ Students without Biology 11 or 12 must take 100-level Biology.

⁴ Recommended electives: EOSC 100-level or GEOG 102.

⁵ 6 credits total may be in any faculty.

⁶ Offered in alternate years.

⁷ Selected from ATSC 406, 409, 414; EOSC 354; GEOG 401, 402.

COMBINED HONOURS (1372): ATMOSPHERIC SCIENCE AND COMPUTER SCIENCE (ATSC, CPSC)

First Year

ENGL 100-level ¹	6
CHEM 121 (111)	4
CPSC 111, 121	8
MATH 120 (or 100 or 102 or 104 or 180 or 184)	4(3)
MATH 121 (or 101 or 104 or 105)	4(3)
PHYS 101, 102 (107, 108, 109) ²	6(7)
Electives ^{2,3}	3
Total Credits	33(36)

Second Year

ATSC 201	3
CPSC 211, 213, 221	12
MATH 215, 217, 223	10
PHYS 216	3
STAT 200 or 241	3

Total Credits	34

Third and Fourth Years

ATSC 301, 303, 404, 405	12
ATSC 449 or CPSC 449 ⁴	6
CPSC 302, 303, 310, 320	13
CPSC course numbered 300 and above ⁵	3
CPSC 403 or CPSC 402	3
CPSC course numbered 400 and above ⁵	3
GEOG 300, 304	6
MATH 316	3
PHYS 313	3
Arts Electives	12
Elective ⁵	3
Total Credits	67

Minimum Credits for Degree 134

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² Students without Physics 12 must take PHYS 100. Such students please see PHYS advisor. Qualified 107/108/109, students are encouraged to take PHYS 107/108/109.

³ Students without Biology 11 or 12 must take 100-level Biology.

⁴ Students who intend to take CPSC 449, must take CPSC 349 (a seminar of 0 credits) in the third year.

⁵ CPSC 313, 421 and CPSC 420 are recommended.

BIOCHEMISTRY

The Department of Biochemistry and Molecular Biology (www.biochem.ubc.ca) offers opportunities for study leading to bachelor's, master's and doctoral degrees. For information on graduate degrees, see *Biochemistry and Molecular Biology*, p. 235, in the Graduate Studies section.

The Major program provides a strong background in biochemistry and is sufficiently flexible for students to develop their interests in allied fields (e.g., microbiology, food science, and chemistry). It is also appropriate for students who anticipate a professional career in the health sciences. The Honours program is the recommended route for students interested in graduate studies in biochemistry or related disciplines. However, students enrolled in a major program with a strong academic record may also apply for graduate studies. For more information, see the Biochemistry website (www.biochem.ubc.ca).

Internship Education Program

The department offers an optional Internship (Co-op) Education Program (Honours and Majors). The program is open to interested and qualified students and is intended to provide additional practical and technical biochemical and molecular biological experience in

academic and industrial research laboratories. This is normally achieved through a period of 12 to 15 months of approved work placement under the supervision of practicing professionals. A faculty advisor will be assigned to each internship student. Acceptance into the program is based upon academic standing and general suitability to perform in a technical research environment. The first phase is a placement for three or four months (summer following third year) in an academic research or industrial laboratory (either at UBC or at an off-campus site). This is normally followed by placement in off-site laboratories for three consecutive, four-month terms. Placements are arranged by mutual agreement of the student, employer and faculty advisor through the Office of Co-operative Education. Students participating in the internship program must register for off-site placements by using BIOC 398, 399, 498 and, where appropriate, 499, and pay the co-op education program fee for each course. After completion of the work terms, students return to the University for completion of the normal fourth year major or honours academic requirements. This program requires five years and is not a requirement for admission to the graduate program in Biochemistry and Molecular Biology. Enrolment in the internship program is limited; continuation in the program is contingent on the availability of suitable work placements. For more information, see the Biochemistry undergraduate programs (www.biochem.ubc.ca/Undergrad.html) page or contact the Co-operative Education Program Office. Information is also available through the Co-op website (www.sciencecoop.ubc.ca).

Programs

MAJOR (0244): BIOCHEMISTRY (BIOC)

First Year	Credits

Minimum Credits for Degree 127

- ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.
- If students do not have Biology 12, then they must also take BIOL 111, in addition to BIOL 121 and BIOL 140.
- If students do not have Chemistry 12, then they must take CHEM 111 and CHEM 113 in place of CHEM 121 and CHEM 123.
- Students must complete one of MATH 100, 102, 104, or 120. Alternatively, those not qualified for these courses due to lack of the calculus prerequisite can complete MATH 180 or 184.
- The requirement of 6 credits of Physics must include PHYS 101 (3) and any other PHYS course that is available for credit in the Faculty of Science. Although students with Physics 12 may defer 3 credits of Physics until second year, students are encouraged to complete this program requirement in their first year. If students do not have Physics 12, then they must take PHYS 100 as part of the required 6 credits of Physics.
- The 33 or 36 credits of electives must meet the following criteria: a) A maximum of 12 credits may be taken in a faculty other than Arts or Science; b) At least 12 credits must be in the Faculty of Arts (and in addition to the 6 credits of first-year English); c) A further 9 credits must be either Science electives outside the field of the Major or in Arts. The field of the Major for Biochemistry is defined as all Biochemistry, Biology, Chemistry, and Microbiology courses and all courses offered for Science credit by departments in the Faculty of Medicine; d) At least 12 credits must be for courses numbered 300 or higher.

⁷ CHEM 233 and 235, as well as CHEM 205 taken after the 2001/2002 academic year, are not acceptable for the Major in Biochemistry program and no credit will be given for these courses.

⁸ BIOC 303 and BIOL 334/335 are prerequisites to required fourth year courses and must be taken during the third year.

⁹ All students with a Major in Biochemistry are required to register for the laboratory course BIOC 301 in the third year of their program. Students who cannot take BIOC 301 in their third year must switch to another program. They are not eligible to continue with a biochemistry program.

HONOURS (0186): BIOCHEMISTRY (BIOC)

First Year

ENGL 100-level ¹	6
BIOL 112 ²	3
BIOL 121, 140	5
CHEM 121, 123 (111, 113) ³	8
MATH 100 or 102 or 104 (or 120 or 180 or 184) ⁴	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
PHYS ⁵	6
Total Credits	34(36)

Second Year

BIOL 200, 201	6
CHEM 203, 204 ⁶	8
CHEM 201 and either 202 or 211	6(7)
MATH 200	3
MICB 202	3

Second Year (Continued)

Electives ⁷	12
Total Credits	38(39)

Third Year

BIOC 303	6
BIOC 301	3
BIOL 334, 335	6
CHEM 313, 333	7
CHEM 304, 305	6
Electives ⁷	6
Total Credits	34

Fourth Year

BIOC 402, 403	6
BIOC 404	3
BIOC 410	3
BIOC 420	3
BIOC 421 and/or 449	3-6-9
Biochemistry and Molecular Biology Electives ⁸	9-6-6
Electives ⁷	6-6-3
Total Credits	33
<i>Minimum Credits for Degree</i>	139

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² If students do not have the prerequisites for BIOL 112, then they must take BIOL 111 in the first year and BIOL 112 in the 1st term of the second year. Students who have credit for Biology 12 may defer BIOL 112 to the 1st term of the second year, allowing 3 credits of electives in the first year.

³ If students do not have Chemistry 12, then they must take CHEM 111 and CHEM 113 in place of CHEM 121 and CHEM 123.

⁴ Students must complete one of MATH 100, 102, 104, or 120. Alternatively, those not qualified for these courses due to lack of the calculus prerequisite can complete MATH 180 or 184.

⁵ The requirement of 6 credits of Physics must include PHYS 101 (3) and any other PHYS course that is available for credit in the Faculty of Science. Although students with Physics 12 may defer 3 credits of Physics until second year, students are encouraged to complete this program requirement in their first year. If students do not have Physics 12, then they must take PHYS 100 as part of the required 6 credits of Physics.

⁶ CHEM 233 and 235, as well as CHEM 205 taken after the 2001/2002 academic year, are not acceptable for the Honours in Biochemistry program and no credit will be given for these courses.

⁷ Electives must include at least 12 credits in the Faculty of Arts (in addition to the 6 credits of first-year English). Students are encouraged to complete the Arts requirements by the end of the third year. A total of 9 to 12 credits of electives is available in the third and fourth years.

⁸ A total of 6 or 9 credits of Biochemistry and Molecular Biology electives is required in the third and fourth year from the following list: BIOC 435 (3); 3 credits of 300- or 400-level Chemistry courses; 3 credits of Microbiology courses from MICB 302, 306, 405 or 409; PHYL 301(6). Select 9 credits from these courses if only 3 credits were chosen from BIOC 421/449. Select 6 credits if 6 or 9 credits were chosen from the advanced laboratory courses of BIOC 421/449. Note: Only one course may be selected from each of the four groups above to fulfill this program requirement.

Minimum Credits for Degree 140

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² If students do not have Biology 12, then they must also take BIOL 111, in addition to BIOL 121 and BIOL 140.

³ If students do not have Chemistry 12, then they must take CHEM 111 and CHEM 113 in place of CHEM 121 and CHEM 123.

⁴ Students must complete one of MATH 100, 102, 104, or 120. Alternatively, those not qualified for these courses due to lack of the calculus prerequisite can complete MATH 180 or 184.

⁵ The requirement of 6 credits of Physics must include PHYS 101 (3) and any other PHYS course that is available for credit in the Faculty of Science. Although students with Physics 12 may defer 3 credits of Physics until second year, students are encouraged to complete this program requirement in their first year. If students do not have Physics 12, then they must take PHYS 100 as part of the required 6 credits of Physics.

⁶ Electives must include at least 12 credits in the Faculty of Arts (in addition to the 6 credits of first year English).

⁷ CHEM 233 and 235, as well as CHEM 205 taken after the 2001/2002 academic year, are not acceptable for the Combined Honours program and no credit will be given for these courses.

⁸ Students are encouraged to complete the Arts requirement early in their program.

BIOLOGY

The Departments of Botany (www.botany.ubc.ca) and Zoology (www.zoology.ubc.ca) jointly offer one undergraduate degree, that is a degree in Biology. For information on graduate programs in Biology, see *Botany*, p. 236, and *Zoology*, p. 286, in the Graduate Studies section. Students wishing to undertake a graduate program in Biology should contact the life science departments most appropriate to the field of specialization.

There are several undergraduate degree options leading to a Major or Honours in Biology or combined Honours in Biology and Chemistry or Biology and Oceanography. It is also possible to obtain a Minor in Arts or Commerce together with a Major in Biology. Students planning to enter a majors or honours degree option should register in General Biology in their second year in preparation for selecting one of the options in their third year. See the *Biology Program Guide* (www.zoology.ubc.ca/bpg) for details.

Certain courses in marine science are offered by the Western Canadian Universities Marine Biological Society at the Bamfield Marine Station on Vancouver Island. Up to 12 credits may be taken at the Bamfield Marine Station in the spring or summer period preceding registration for the fourth year. For details, please consult the Departments of Botany and Zoology.

Co-operative Education Program

This optional program integrates academic study and supervised work experience. Enrolment is limited. Admissibility to the third-year Biology Bachelor of Science program is prerequisite for admission. Detailed information is available from the Biology Program Office, Room 2521, Biological Sciences Building, or the Co-operative Education Program Office, Room 170, Chemistry/Physics Building, The University of British Columbia, 6221 University Boulevard, Vancouver, BC, V6T 1Z1; fax 604-822-9676. Information is also available through the Co-op website (www.sciencecoop.ubc.ca).

First-Year Course Options

BIOL 121 is prerequisite to all Biology courses, except BIOL 153, 343, 344, 345, 346, 445, and 446.

BIOL 112, 121, and 140 are prerequisites for admission to Major or Honours options in the Biology program. Students who have completed Biology 12 may enter these courses directly. Students with no high school biology will need to take BIOL 111 prior to registering in these courses. Students who have grade 11 biology may enter BIOL 112 if they have taken Chemistry 12, and they may use BIOL 112 as the only prerequisite to BIOL 121 and BIOL 140.

Students interested in meeting the entrance requirements of the Faculties or Schools of Agricultural Sciences, Dentistry, Forestry, Medicine, Pharmaceutical Sciences, Human Kinetics, and Rehabilitation Sciences should consult the appropriate office to determine the first-year biology requirement.

Second-Year Standing in Biology

Enrolment in the Biology Program is limited. Preferred access to the required biology and chemistry courses will be given to students accepted to the second year General Biology Program. You can apply on-line (www.zoology.ubc.ca/bpg) for entry into General Biology year 2. Admission is based on academic performance and completion of first year program requirements. Applications will be accepted in January and April. Students transferring from other institutions into the Biology Program second-year and who have completed the prerequisite courses may submit late applications as needed. For further information see the Biology Program website above.

Third-Year Standing in Biology

Enrolment in Biology Programs is limited. All students must apply on-line (www.zoology.ubc.ca/bpg) for entry to majors or honours programs at the third-year level. Admission and continuation to the third-year programs is based on academic performance and completion of second-year program requirements. Applications for entry into the Biology Program will be accepted during the months of January and April. For further information on our programs and admission process, please see the Biology Program website above. Students transferring from other institutions into the third-year Biology Program and who have completed the prerequisite courses may submit late applications as needed.

Biology Honours Programs

Students wishing to enter a Biology Honours program must have a 75% average in courses taken during the previous Winter Session.

First-Year Requirements

The following first-year requirements apply to all Biology Majors and Honours options.

MAJOR AND HONOURS: BIOLOGY (BIOL)

First Year	
ENGL 100-level ¹	6
BIOL 111 ²	3-0
BIOL 112	3
BIOL 121 ²	3
BIOL 140	2
CHEM 121, 123 (111, 113)	8
MATH 100 or 102 or 104 (or 120 or 180 or 184)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
PHYS 101 ³ (121)	6-3
Elective ^{2,3}	3-0
Total Credits	34

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² Students with Biology 12 are not required to take BIOL 111 and instead are encouraged to take 3 credits of 100-level Arts or Science elective courses or 200-level BIOL courses. BIOL 112, 121, and 140 are required of all students.

³ Students without credit for Physics 12 will be required to replace 3 credits of elective with PHYS 100 prior to PHYS 101.

Total Credits	30

Fourth Year	
CPSC 313	3
Other CPSC courses numbered 300 or above ⁶	6
Arts electives	9
Electives ^{7,8}	3
CPSC courses numbered 400 or above ⁶	6
BIOL 400 level	3
Total Credits	30

Minimum Credits for Degree 127

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² Students pursuing a Co-op program in Computer Science are advised to also take CPSC 211 in their

first year or in the summer following their first year. Co-op students will then be in a position to take one or both of CPSC 211 and CPSC 213 in term one of second year before going out on a Co-op work term.

³ Students lacking high school Biology or Chemistry 12 must take BIOL 111 before taking BIOL 112 or 121. Students with Chemistry 12 and either Biology 11 or Biology 12 may take BIOL 112.

⁴ CHEM 205 is a prerequisite for all Biochemistry courses. Students lacking Physics 12 must take PHYS 100 to meet the lower-level course requirements for a B.Sc.

⁵ Must be taken in third year.

⁶ Suggested courses for those interested in Bioinformatics are CPSC 304, 404, and 445.

⁷ It is strongly recommended that students take at least 2 of BIOL 204, 205, 209, 210. Students interested in phylogenetics should also take upper-level organismal courses. MATH/STATS 302 and BIOC 402 or 404 and MICRO 405 are recommended for those interested in bioinformatics. MATH 361 and 462 are recommended for those interested in modeling biological processes.

⁸ At least 48 credits in total must be upper level (300+).

Students must contact a Computer Science Advisor for entry into this program. *Combined Honours: Computer Science and Biology*, p. 403, is also offered.

BIOL 447	3
BIOL 449	6
Conservation Electives	12
Systematics/Evolution Electives	12
Arts Electives	6
Electives ⁴	3-6
Total Credits	73

Minimum Credits for Degree 139

¹ BIOL 240 is optional in 2005/06.

² Choose second year courses that are prerequisites for desired upper-level electives.

³ Must be taken in third year. Students are not permitted to take more than one of BIOL 351, 360 and 363.

⁴ BIOL 347 is recommended. Consult a Biology advisor before choosing electives.

CONSERVATION ELECTIVES
See the *Biology Program Guide* (www.zoology.ubc.ca/bpg/) for the list of program electives.

EVOLUTION AND SYSTEMATICS ELECTIVES
See the *Biology Program Guide* (www.zoology.ubc.ca/bpg/) for the list of program electives.

MAJOR (0289): ECOLOGY AND ENVIRONMENTAL BIOLOGY (ECOL)

Second Year	
BIOL 200, 201	6
BIOL 240 ¹	1
One of BIOL 204, 205	4
One of BIOL 209, 210	4
CHEM 233, 235, 205	7
Electives ²	12
Total Credits	34

Third and Fourth Years	
BIOL 300	3
BIOL 302, 303	6
BIOL 334	3
All of BIOL 351 and 352; or all of 361, 364, and one of BIOL 363, 404 or 409	7

Third and Fourth Years (Continued)

BIOL 336 or 335	3
Ecology Electives	18
Electives ²	21
Total Credits	61
<i>Minimum Credits for Degree</i>	128

¹ BIOL 240 is optional in 2005/06.

² Electives must be taken to ensure that all Faculty of Science requirements are met: a) At least 12 credits in addition to the English requirement must be from Arts to satisfy the Arts requirement of 18 credits; b) An additional 9 credits must be from Arts or Science outside of the field of the Major to satisfy the breadth requirement. The field of the Major for all Biology Major programs is Life Sciences which includes all courses in Biochemistry, Biology, Microbiology, and Marine Sciences. Also included are EOSC 371, 470, 471, 474, 475, 476, 478; PSYC 304, 306, and courses numbered 60 or higher in the last two digits, and courses in the Faculties of Medicine and Agricultural Sciences that have Science credit; c) 18 credits may be from any Faculty but students must ensure that they have at least 48 upper-level credits including at least 30 credits from the Faculty of Science.

³ Must be taken in third year. Students are not permitted to take more than one of BIOL 351, 360, and 363.

CHEM Elective ⁸	3
Total Credits	31

Minimum Credit for Degree 139

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of English may be deferred until second year.

² Students must take BIOL 111 as an elective if they lack the prerequisites for either BIOL 112 or 121. BIOL 112 can be used as a prerequisite to BIOL 121 if students have Chemistry 12 and Biology 11 or 12. Students who do not need BIOL 111 are encouraged to take 3 credits of 100-level Arts or Science courses or 200-level BIOL courses. BIOL 112, 121, and 140 are required of all students.

³ Chosen from 100-level Arts or Science courses or 200-level BIOL courses.

⁴ BIOL 240 is optional in 2005/06.

⁵ Must be taken in third year. Students are not permitted to take more than one of BIOL 351, 360, and 363.

⁶ Organismal: 3 or 4 credits from: BIOL 204, 205, 209, 210, MICB 202, BIOL 317-324, and 332.

⁷ Biology courses pertaining to organisms suggested.

⁸ To be chosen from 400-level CHEM lecture courses.

COMBINED HONOURS: BIOLOGY AND OCEANOGRAPHY
See *Oceanography*, p. 413.

COMBINED HONOURS (1460):

CPSC 3** or above	6
12 credits ⁶ from BIOC 302, 402, BIOL 301, 331, 336, 337, 347, 350, 431, 433, 434, 435, 447 ⁷	12
Bioinformatics Electives ⁸	6
Arts Electives	9
Total Credits for Third and Fourth Years	67

Minimum Credits for Degree 138

¹ BIOL 121 is required for several upper-level biology electives. Students lacking Physics 12 must take PHYS 100 to meet the lower-level course requirements for a B.Sc.

² One of CHEM 235, CPSC 213, or MATH 200 can be deferred to third year.

³ CHEM 203 and 204 are also acceptable.

⁴ Taken in fourth year; the thesis topic must be related to Bioinformatics. Students intending to take CPSC 449 must take CPSC 349 in their third year.

⁵ We recommend that at least one of the remaining courses should be taken as part of the 6 credits of CPSC courses numbered 300 or above.

⁶ It is possible to replace some of these credits by a Life Science course not on this list, as long as the replacement is approved by a Biology program advisor.

⁷ Required for students intending to take BIOL 449.

⁸ Bioinformatics electives can be upper-level BIOC, BIOL, CPSC, MATH, MICB, or STAT courses.

BIOTECHNOLOGY

The Department of Microbiology and Immunology (www.microbiology.ubc.ca) at the University of British Columbia and the Biotechnology Program at the British Columbia

Institute of Technology (BCIT) offer a five-year joint degree Co-operative Education Program that integrates academic study at both institutions with related and supervised work experience. Enrolment is limited. Entry into the program is at the second-year level and requires completion of the first-year prerequisites listed below with at least the minimum admission average set by the UBC Faculty of Science for transfer into second year. Applicants will also be judged on suitability for cooperative work experience by the UBC and BCIT Co-operative Education coordinators.

A special application is required. Information is available from either the Department of Microbiology and Immunology, The University of British Columbia, 300–6174 University Boulevard, Vancouver, BC, V6T 1Z3; telephone 604-822-3308, or the BCIT Biotechnology Program, 3700 Willingdon Avenue, Burnaby, BC, V5G 3H2; telephone 604-432-8324. The deadline for applications to UBC Enrolment Services is February 28. Late applications and transfers will be considered if space is available. See the application details (www.bcit.ca/study/programs/8950bsc) (mid-April).

The first year of the program is a first-year science program that can be taken at UBC or another institution. The second and third years (taken at the BCIT campus) include two four-month work terms along with academic and technical studies. The fourth and fifth years (taken at the UBC campus) include two four-month work terms and advanced studies. Students must meet the Faculty of Science requirement to continue in this Honours program (see the *Honours program*, p. 389, requirements for the Faculty of Science). Completion of the requirements for the first three years of the program earns a Diploma of Technology in Biotechnology.

Completion of the requirements for the entire five-year program earns an Honours Bachelor of Science in Biotechnology. The credentials are awarded jointly by UBC and BCIT. Students who fail to maintain the Honours program requirements in their fourth or fifth year could ask to have their BCIT courses evaluated on a course-by-course basis for potential UBC credit in the Microbiology and Immunology major.

Electives	6
Total Credits⁵	45

Minimum Credits for Degree¹ 140

¹ The credits in Science at UBC are weighted differently than credits at some other colleges and universities because labs and extra work are credited separately. Where possible, applicants from colleges or other universities should take the first year equivalents of the listed UBC courses. If the equivalent courses taken elsewhere are listed as three credit courses, the total credits will be 30 credits rather than 33 credits. 3 credits of PHYS may be deferred until year four or five if an elective is substituted in first year.

² ENGL 112 is recommended.

³ Students without Biology 11 or 12 must take BIOL 111. Applicants from other universities and colleges may substitute 6 credits of introductory biology courses for two BIOL 111, 112, 121. Students should be aware that BIOL 140 is a prerequisite for many upper-level BIOL courses at UBC. To maintain flexibility in their ability to study at UBC, students should consider including BIOL 140 in their first year at UBC even though this course is not required in the Biotechnology program.

⁴ Applicants from other universities and colleges may substitute 6 credits of introductory chemistry courses that include labs for the combination of CHEM 111, 113 or 121, 123.

⁵ The credit for the work terms is not included in the academic credits needed for the degree or the totals for the academic year. Students must take at least one work term as either a Fall work term or a Winter work term. The remaining work term may be done as either a Fall, Winter, or Summer work term. The program must end with a final study term.

⁶ Some courses only fit particular timetables. Plan schedules to have a minimum of 15 credits in each academic term of year four and five.

⁷ The program must have a minimum of 12 credits of Arts. The BCIT credits include 9 credits that are considered as Arts. If you have other Arts credits then the corresponding number of Arts electives can be used as free electives to take any course available for credit in Science.

Co-operative Education Program: Biotechnology in Microbiology and Immunology

See the *Microbiology and Immunology*, p. 421.

BOTANY

The Department of Botany (www.botany.ubc.ca) offers programs of study jointly with the Department of Zoology leading to the Bachelor of Science in Biology.

The Department of Botany offers programs leading to the master's and doctoral degrees in a wide range of contemporary plant studies, including phytogeography, ecology (including ecophysiology), ethnobotany, systematics (including chemotaxonomy), morphology and plant development, cytology, membrane biochemistry and physiology, chemical ecology, and molecular genetics. For information on graduate degrees, see *Botany*, p. 236, in the Graduate Studies section and the Department of Botany's Graduate Brochure, available in the Botany Office.

CHEMISTRY

The Department of Chemistry (www.chem.ubc.ca) offers opportunities for study leading to bachelor's, master's and doctoral degrees. For information regarding facilities for graduate study and graduate degrees, see *Chemistry*, p. 238, in the Graduate Studies section. It is assumed that all students entering courses of the Department have passed Chemistry 11 or the equivalent; those who have not must consult the Department before registering.

Students entering second-year Chemistry programs who meet program requirements (see *Honours and Combined Honours Program*, p. 389, under Bachelor of Science, Degree Requirements) may simply register in either Major, Honours, or Combined Honours using the appropriate program descriptions. The progress of continuing Chemistry students will be reviewed at the end of each academic year. Students making satisfactory progress do not require annual program approval. Students with unsatisfactory standing in Honours or Combined Honours will be contacted by the Department. Students in the General Science program are invited to consult a departmental advisor concerning appropriate courses.

Co-operative Education Program

Co-operative Education is a process of education which integrates academic study with related and supervised work experience in co-operating employer organizations.

A Co-operative Education program is available for students in Chemistry. The program is intended to help prepare interested and quali-

fied students for research careers in industry with sixteen months of work placement supervised by practising professionals. Faculty advisors also visit students at their place of work and provide advice on technical reports required of all students in the Program.

To be eligible, students must be admissible into the third-year Chemistry B.Sc. program with second-class standing. Admission is by application to the Co-op Office in February prior to third year (transfer students may be considered later). Selection of students will be based on academic performance and general suitability to the work environment as determined by resumé and interview. The total enrolment will be subject to the availability of appropriate work placements and faculty advisors. The work placements are arranged by mutual agreement between students and employing organizations. Participating students register for CHEM 398, 399, 498, or 499 as appropriate, and pay the Co-operative Education Program Fee per course (see *Program and Course Fees*, p. 28, in this Calendar).

Graduation in the Co-operative Education program requires a student to complete each of CHEM 398, 399, 498, 499, in addition to the normal academic requirements. Students will have each satisfactorily completed course noted on their academic record. Detailed information on the program may be obtained from the Department of Chemistry or from Science Co-op Programs, Room A170, Chemistry/Physics Building, The University of British Columbia, 6221 University Boulevard, Vancouver, BC, V6T 1Z1; fax 604-822-9676. Information is also available through the Co-op website (www.sciencecoop.ubc.ca).

Courses

PRIMARILY FOR FIRST-YEAR STUDENTS
CHEM 111, 113 or CHEM 121, 123 is the normal prerequisite for admission to chemistry programs. The difference between the two lies in the background of the student: those students with credit for Chemistry 11 only take CHEM 111, 113, whereas those with credit for Chemistry 12 take CHEM 121, 123.

PRIMARILY FOR SECOND-YEAR STUDENTS

Students who have not taken a first-year Chemistry course at the University of British Columbia are assumed to have read *General Chemistry*, Petrucci, Harwood, Herring, 8th Ed., Prentice-Hall, 2002.

PRIMARILY FOR THIRD-YEAR STUDENTS
It is recommended that students taking BIOL 201 (or BIOC 300) should have completed a university-level biology course with cell biology content (e.g. BIOL 111, BIOL 112).

Honours and Major students are required to take CHEM 304, 309, 310, 311, and 312 prior to CHEM 425. This should be done in third year.

PRIMARILY FOR FOURTH-YEAR STUDENTS

It is recommended that students taking BIOL 201 (or BIOC 300) should have completed a university-level biology course with cell biology content (e.g. BIOL 111, BIOL 112).

Major students are required to take the integrated laboratory course CHEM 425, or, with permission, CHEM 449. Honours students are required to take CHEM 449.

Co-op Major students take CHEM 415 plus an additional 3xx/4xx CHEM elective or, with permission, CHEM 449 instead of CHEM 425.

LABORATORY AND TUTORIAL COURSES
Students taking any course which has an associated laboratory and/or tutorial must register in these secondary activities in addition to the lecture portion of the course. No exception will be made. Students who believe they may qualify for an exemption from a laboratory (e.g., if repeating the course, or have transfer credit from another institution) are advised to contact the appropriate laboratory instructor directly. Students who miss the first laboratory meeting of a course without having made prior arrangements with the instructor concerned risk having their registration in the course cancelled and their space reallocated to another student.

Programs

MAJOR (0409): CHEMISTRY (CHEM)

First Year	
ENGL 100-level ¹	6
CHEM 121, 123 (111, 113)	8
MATH 100 or 102 or 104 (or 180 or 184 or 120)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
PHYS 100- or 200-level	6
BIOL ²	3
Electives ³	3
Total Credits	32(34)
Second Year	
CHEM 201, 202	6
CHEM 203, 204	8
CHEM 211	4
MATH 200	3
MATH 221	3
Electives ^{3,4}	9
Total Credits	33
Third and Fourth Years	
BIOL 201 ⁴ (BIOC 300) ⁵	3(6)
CHEM 304 ⁶	3
CHEM 309 ⁶ , 310 ⁶	6
CHEM 311 ⁶	4
CHEM 312 ⁶	3
CHEM 330 (313)	4
CHEM 425 ^{7,8}	6
CHEM Electives ^{7,8,9}	6
Electives ^{3,5}	27(24)
Total Credits	62
<i>Minimum Credits for Degree</i>	<i>127</i>

- ¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.
- ² Students with credits for Biology 11 or 12 may substitute 3 credits of ASTR, EOSC, or Science credits GEOG or PSYC.
- ³ At least 12 additional credits must be in the Faculty of Arts. A further 9 elective credits must be in Arts or in Science electives outside the field of the Major (which is defined as all Chemistry, Physics, and Biochemistry courses). A further 18 elective credits may be taken in any faculty. Possible electives might include Computer Science courses and/or another Science and/or ENGL 301. Enough elective credits must be numbered 300 or higher so that the total of 300 or higher level courses in the program, including specified courses, are at least 48 credits; at least 36 of these 48 credits must be in the Faculty of Arts or Science.
- ⁴ The preferred prerequisite for this course is BIOL 200, but Chemistry majors students with third or fourth year standing are allowed to register without it.
- ⁵ Students who take BIOC 300 reduce the electives required in third/fourth year to 24 credits.
- ⁶ Must be taken in third year.
- ⁷ With permission, CHEM 449 may be substituted for CHEM 425.
- ⁸ Students registered in the Co-op program must substitute CHEM 415 (to be taken entirely in one term) for CHEM 425. In this case, 9 credits of Chemistry electives are required. With permission, Co-op students may substitute CHEM 449 for CHEM 415 and 3 credits of Chemistry electives.
- ⁹ Chosen from 300- and 400- level CHEM courses.

MAJOR (2995): ENVIRONMENTAL OPTION

First Year	
ENGL 100-level ¹	6
CHEM 121, 123 (111, 113)	8
MATH 100 or 102 or 104 (or 180 or 184 or 120)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
PHYS 100- or 200-level	6
Earth Science courses ²	6

CHEM 312 ⁷	3
CHEM 330 (313)	4
CHEM 425 ^{8,9}	6
STAT 200 or 241	3
Electives ^{4,5,6}	27
Total Credits	62

Minimum Credits for Degree 127

- ¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

- ² Selected from EOSC 110; GEOG 102, 103, 200, 205, 207. Students are discouraged from taking both GEOG 102 and 200. The most suitable GEOG courses for first-year students are 102, 103.
- ³ Chosen from BIOL 111, 112, 121, 140, in keeping with prescribed prerequisites.
- ⁴ At least 12 further credits must be in the Faculty of Arts. A further 9 credits must be either Science electives outside the field of the Major or in Arts. The field of the Major in Chemistry (Environmental Option) is defined as all Chemistry, Biochemistry, and Physics courses. A further 18 elective credits may be taken in any faculty.
- ⁵ 3 elective credits must be from BIOL 112, 302, 303; GEOG 200, 205, 207 (if not already taken as part of the Earth Science requirement); ECON 101/102 or 310/311; EOSC 329, 370, 371, 429, 430, 431, 475; SOIL 200 or other environmentally directed courses from outside Chemistry, approved by a Chemistry Department adviser. Suggested general electives include Computer Science courses, and/or ENGL 301 and/or further courses from the list above.
- ⁶ Enough credits must be numbered 300 or higher so that the total of 300- or higher-level Arts and Science courses, including specified courses, is at least 48 credits; at least 36 of these 48 credits must be in the Faculty of Arts or Science.
- ⁷ Must be taken in third year.
- ⁸ With permission, CHEM 449 may be substituted for CHEM 425.
- ⁹ Students registered in the Co-op program must substitute CHEM 415 (to be taken entirely in one term) for CHEM 425. In this case, 3 credits of Chemistry electives are required. With permission, Co-op students may substitute CHEM 449 for CHEM 415 and 3 credits of Chemistry electives.

MAJOR (1377): MATERIALS CHEMISTRY OPTION

First Year	
ENGL 100-level ¹	6
CHEM 121, 123 (111, 113)	8

³ CPSC 124/CPSC 126 is recommended.

⁴ Electives must include 12 credits of Arts.

⁵ PHYS 206 is recommended.

Honours: Chemical Engineering – Chemistry Honours

Chemical Engineering-Chemistry Honours is a program jointly administered by the Departments of Chemical and Biological Engineering and Chemistry. Enquiries regarding the program and student advising should be made to the faculty advisors in either department. The completion of the Bachelor of Applied Science in Chemical Engineering-Chemistry Honours will normally take five years of university study. Entry to the program is normally from first year Applied Science. To obtain permission to enter the program students must consult the faculty advisors in the Departments of Chemical and Biological Engineering and Chemistry. For details of the program, see *Chemical Engineering –*

Chemistry Honours, p. 99, under Faculty of Applied Science, Bachelor of Applied Science. To complete the program satisfactorily, students must obtain a minimum overall second-class average in their Chemistry courses numbered 300 and higher.

Other Combined Honours Programs

Combined Honours in Biochemistry and Chemistry, see *Biochemistry*, p. 396.

Combined Honours in Biology and Chemistry, see *Biology*, p. 398.

Combined Honours in Chemistry and Oceanography, see *Oceanography*, p. 413.

Chemical Physics Combined Honours, see *Physics*, p. 423.

COMBINED HONOURS: CHEMISTRY AND ANOTHER SUBJECT

Minimum Credits for Degree 138

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² Students with credits for Biology 11 or 12 may substitute 3 credits of ASTR, EOSC, or Science credits GEOG or PSYC.

³ Electives must include at least 12 credits in the Faculty of Arts.

⁴ Students intending to take CHEM 320 must take MATH 221 as a prerequisite.

⁵ The choice between 307 (305), 320 and 330 (313), 333 will depend on the other subject.

⁶ Must include at least 3 credits numbered 400 and above.

⁷ This may be substituted by an equivalent thesis course in the other department.

COGNITIVE SYSTEMS

For information on the B.Sc. Major in Cognitive Systems: Cognition and Brain, see the listing under *Psychology*, p. 428.

COGNITIVE SYSTEMS: COMPUTATIONAL INTELLIGENCE AND DESIGN

For information on the B.Sc. in Cognitive Systems: Computational Intelligence and Design, see the listing under *Computer Science*, p. 411.

COMPUTER SCIENCE

The Department of Computer Science (www.cs.ubc.ca) offers opportunities for study leading to bachelor's, master's, and doctoral degrees. For information on the Bachelor of Arts in Computer Science, see the upcoming Computer Science entry in the Arts section. For information on graduate degrees, see *Computer Science*, p. 240, in the Faculty of Graduate Studies section. All students who intend to take Honours in Computer Science must consult the head of the Department.

High school or college transfer students can apply directly to the Computer Science degree program when they apply for admission to UBC by selecting the Bachelor of Science, Computer Science major as their choice of program on the UBC application form. The Department of Computer Science accepts applications year-round from current UBC Science students. For application forms and information regarding admission and continuation requirements, students are advised to review the Department of Computer Science undergraduate website (www.cs.ubc.ca/ugrad).

Admission to a degree program in Computer Science is a prerequisite for receiving a B.Sc. in Computer Science.

Co-operative Education Program

Co-operative Education is a process of education which integrates academic study with related and supervised work experience in co-operating employer organizations.

A year-round Co-operative Education program is available for students in Computer Science. The program is intended to help prepare interested and qualified students for careers in the computing industry with a minimum of 17.5 months of work placement supervised by practicing professionals. Faculty advisors also visit students at their place of work and provide advice on technical reports required of all students in the program.

To be eligible, students must be admitted to the second year of the Bachelor of Science program in Computer Science. Selection of students will be based on academic performance and general suitability to the work environment as determined by resumé and interview. The total enrolment will be subject to the availability of appropriate work placements and faculty advisors. The work placements are arranged by mutual agreement between students and employing organizations. Participating students register for CPSC 298, 299, 398, 399, or 499 as appropriate, and pay the Co-operative Education program fee for each course (see *Program and Course Fees*, p. 28, in this Calendar). Graduation in the program requires a student to complete each of CPSC 298, 299, 398, 399 and 499, in addition to the normal academic requirements. Students who complete less than five courses will have each satisfactorily completed course noted on their academic record.

Detailed information on the program may be obtained from the Department of Computer Science or from the Co-operative Education Program Office, Room 309, Hennings Building, The University of British Columbia, 6224 Agricultural Road, Vancouver, BC, V6T 1Z1; fax 604-822-9676. Information is also available through the Co-op website (www.science-coop.ubc.ca).

Admission and Continuation Requirements for Honours and Combined Honours

Students who wish to register in an Honours or Combined Honours program in Computer Science, must seek approval from the Department Honours advisor prior to registering for second year.

To be admitted to an Honours or Combined Honours program in Computer Science, students must:

- 1) Complete all courses attempted, including at least 30 credits in the Winter Session of the first year; and
- 2) Obtain a minimum average of 76%. Achievement of this minimum does not guarantee admission.

To be permitted to continue in an Honours or Combined Honours program in Computer Science, students must:

- 1) Complete all courses attempted, including at least 30 credits in the previous Winter Session (or at least 15 credits per academic term, for Co-op students); and
- 2) Obtain an average of 72% or higher.

Electives

The following courses have a great overlap with some of the first or second-year Computer Science courses and cannot be used as electives in any degree or combined degree program in Computer Science:

- CSED 402, 420, 422, 424, 450
- EECE 314
- COMM 337, 432

Programs

MAJOR (0376) AND HONOURS (0154):
COMPUTER SCIENCE (CPSC)

First Year

ENGL 100-level ¹	6
CPSC 111, 121 ²	8
MATH 100 or 102 or 104 (or 180 or 184 or 120)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
PHYS 101 ³ , (or PHYS 107 ⁴)	3(4)
CHEM 121 ⁵ or PHYS 102 (or PHYS 108 ⁴)	3(4)
BIOL ⁶ or ASTR or EOSC or Science credit GEOG or PSYC ⁷	3
Electives	3
Total Credits	32(34)

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² Students pursuing a Co-op program in Computer Science are advised to also take CPSC 211 in their first year or in the summer following their first year. Co-op students will then be in a position to take one or both of CPSC 221 and CPSC 213 in term 1 of second year before going out on a Co-op work term.

³ Students without credit for Physics 12 must complete PHYS 100 in addition.

⁴ Students who chose to take PHYS 107 and/or PHYS 108 may need to take PHYS 109 or other lab courses to complete the Laboratory Science requirements of the Faculty of Science.

⁵ Students without credit for Chemistry 12 must take CHEM 111 and one of CHEM 113 and PHYS 102. These students may delay 3 credits of CHEM or PHYS until second year. Students without credit for Chemistry 12 must take CHEM 111 and one of CHEM 113 and PHYS 102. These students may delay 3 credits of CHEM or PHYS until second year.

⁶ Students without credit for Biology 11 or 12 must take 3 credits of 100-level BIOL.

⁷ These credits may be deferred until second year.

MAJOR (0376): COMPUTER SCIENCE (CPSC)

Second Year

CPSC 211, 213, 221	12
MATH 200, 221	6
STAT 241 ¹	3
Electives ²	12

Other CPSC courses numbered 300 or above	9
Further CPSC courses numbered 400 or above	9
MATH or STAT courses numbered 300 or above ³	6
Electives ²	27
Total Credits	61

Minimum Credits for Degree

126

¹ May be replaced by STAT 200 provided MATH/STAT 302 is included as one of the required MATH or STAT courses in third and fourth year. This alternative is recommended for students with an interest in further STAT courses.

² Electives (42 credits, including 3 credits in first year) must include the following: a) At least 12 credits must be in the Faculty of Arts (Arts Electives); b) Of the remaining 30 credits of electives (i.e., other than the Arts Electives), at least 9 credits must be in either Science courses outside the

field of the Major or in Arts. The field of the Major in Computer Science is defined as Computer Science, Mathematics and Statistics; c) Of the remaining 21 credits, up to 18 credits may be in any faculty; d) The remaining 3 credits must be from the Faculties of Arts or Science; e) At least 15 of the 42 elective credits must be in courses numbered 300 or higher.

³ Mathematics courses in analysis, applied mathematics, linear algebra, differential equations, and probability and statistics courses are recommended.

HONOURS (0154): COMPUTER SCIENCE (CPSC)

Second Year

CPSC 211, 213, 221	12

Courses in other subject area numbered 300 or above ³	21
Electives ⁵	18
Total Credits	61

Minimum Credits for Degree

126

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² Students pursuing a Co-op program in Computer Science are advised to also take CPSC 211 in their first year or in the summer following their first year. Co-op students will then be in a position to take one or both of CPSC 221 and CPSC 213 in term 1 of second year before going out on a Co-op work term.

³ Courses in these entries are selected with consultation of an advisor of the other subject.

⁴ Students should note that the courses taken in the first and second year must satisfy the B.Sc. requirements listed in the Lower-Level Requirements section of the Faculty of Science degree requirements.

⁵ 3 of these 6 credits may be deferred to third year. In some cases BIOL 300 may substitute for a STAT selection.

⁶ Electives (21 credits or more) must include the following: a) At least 12 credits must be in the Faculty of Arts (Arts Electives); b) If the other subject is Mathematics or Statistics, the remaining 9 elective credits (i.e. other than the Arts electives), must be either in Arts or in Science courses other than Computer Science, Mathematics, and Statistics; c) If the other subject is other than Mathematics and Statistics, the remaining 9 credits may be in any faculty; d) At least 6 or the 21 elective credits must be in courses numbered 300 or higher.

Additional PHYS courses numbered 300 or above ⁸	3
Electives ⁵	15
Total Credits	61
Minimum Credits for Degree	125

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² Students pursuing a Co-op program in Computer Science are advised to also take CPSC 211 in their first year or in the summer following their first year. Co-op students will then be in a position to take one or both CPSC 221 and CPSC 213 in term 1 of second year before going out on a Co-op work term.

³ Students without Physics 12 must normally take PHYS 100 prior to PHYS 101 or 107, such students should seek academic advice before registering. Qualified students are encouraged to take PHYS 107/108/109.

⁴ Students without credit for Biology 11 or 12 must take 3 credits of 100-level BIOL.

⁵ Students without credit for Chemistry 12 must take CHEM 111 as an elective. This CHEM requirement may be delayed until second year.

⁶ Electives (18 credits) must satisfy the following: a) At least 12 credits must be in the Faculty of Arts (Arts Electives); b) The remaining 6 credits may be in any faculty. At least 2 of the 18 elective credits must be in courses numbered 300 or higher.

⁷ Students with sufficiently high grades in first-year MATH may replace MATH 200 and 317 with MATH 217 and 2 credits of electives, in consultation with an advisor.

⁸ Students interested in computer modeling and simulation should take both CPSC 302, 303 and at least one of CPSC 402, 403, PHYS 410.

⁹ Students who have taken CPSC 319 may replace this requirement with any upper-level PHYS course.

<i>Minimum Credits for Degree</i>	137

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² Students without Physics 12 should consult a departmental adviser as early as practical. Normally they must take PHYS 100 prior to PHYS 101 or 107.

³ The elective credits taken throughout the program must include at least 12 credits in the Faculty of Arts (in addition to the 6 credits of 100-level English) and 6 credits from the Faculty of Science. Students without Biology 11 or Biology 12 must take 3 credits of 100-level BIOL. Students interested in senior chemistry courses or who are planning to enter a career in teaching are reminded that they should take a second course of introductory chemistry.

⁴ May be replaced with MATH 200 and MATH 317 (using 3 elective credits).

⁵ Fourth-year PHYS electives are ASTR 402, 403, 404; EECE 480; MATH 345, 401, 402, 405, 418, 420, 450; PHYS 400, 401, 402, 405, 407, 410, 437, 447, 473, 474. Qualified students are encouraged to take 500-level Physics courses for which they must have permission of the Faculty of Science and the Dean of the Faculty of Graduate Studies.

⁶ Students who elect to take CPSC 449 must take CPSC 349 in their third year.

COMBINED HONOURS (1376): COMPUTER SCIENCE AND STATISTICS (CPSC, STAT)

STAT courses numbered 400 and above	6
6 credits from CPSC 340, 404, 420, MATH 418, 419, 420, 421 or further Statistics courses numbered 400 or above	6
Arts Elective	6
Total Credits	36
<i>Minimum Credits for Degree</i>	135

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² Students pursuing a Co-op program in Computer Science are advised to also take CPSC 211 in their first year or in the summer following their first year. Co-op students will then be in a position to take one or both of CPSC 211 and CPSC 213 in term one of second year before going out on a Co-op work term.

³ Students without credit for Chemistry 12 must take CHEM 111 and one of CHEM 113 and PHYS 102. These students may delay 3 credits of CHEM or PHYS until second year.

⁴ Students who chose to take PHYS 107 and/or PHYS 108 may need to take PHYS 109 or other lab courses to complete the Laboratory Science requirements of the Faculty of Science.

⁵ Students without credit for Biology 11 or 12 must take 3 credits of 100-level BIOL. These credits may be deferred until second year. Students lacking Physics 12 must take PHYS 100 to meet the lower-level course requirements for a B.Sc. Students lacking Chemistry 12 must take CHEM 111 to meet the lower-level course requirements for a B.Sc. Students require 6 credits of PHYS or CHEM beyond the basic requirement.

⁶ Students obtaining 68% or higher in MATH 226 may replace MATH 220 with 3 elective credits.

⁷ May be replaced by MATH 419 in fourth year.

⁸ CPSC 402 is offered every other year; students should take it in their third or fourth year, when it is offered.

⁹ Courses in Databases are recommended.

Software Engineering Option

Admission into the Software Engineering option is limited and based on academic performance. Students who wish to enter the option have to apply to the Department of Computer Science before the end of their second year. More information may be obtained from the

Department of Computer Science website (www.cs.ubc.ca).

The program leads to a Bachelor of Science degree. It is not a CEAB accredited engineering degree program leading to the designation Professional Engineer (P.Eng.).

MAJOR (1200): COMPUTER SCIENCE AND SOFTWARE ENGINEERING

Other CPSC module courses numbered 400 or above ¹²	3
PHIL 451	3
Other non-CPSC module courses numbered 300 or above ^{12,14}	12
Electives ^{8,15}	21
Total Credits	60

Minimum Credits for Degree 124

- ¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.
- ² Students pursuing a Co-op program are advised to also take CPSC 211 in their first year or in the

summer following their first year. Co-op students will then be in a position to take CPSC 221 in term 1 of second year before going out on a Co-op work term.

- ³ All B.Sc. programs must include two terms of laboratory science. These may be stand-alone labs or parts of lecture-lab courses included in the other requirements listed above. Details are given at *Lower-Level Requirements*, p. 389.
- ⁴ Students without credit for Chemistry 12 must complete CHEM 111 and either CHEM 113 or PHYS 102 (or PHYS 108). These students may delay 3 credits of CHEM or PHYS until 2nd year.
- ⁵ Students without credit in Biology 11 or Biology 12 must take 3 credits of 100-level biology.
- ⁶ B.Sc. requires 72 Science credits.
- ⁷ These credits may be deferred until second year.
- ⁸ Students should consider the following when selecting elective credits: a) B.Sc. requires 72 credits Science courses; b) At least 12 credits must be Arts electives; c) A Cognitive Systems major must select nine credits of Arts or Science electives outside their field of major, that is, outside the core departments of Computer Science, Linguistics, Philosophy, and Psychology.
- ⁹ It is recommended that first-year courses of modules be selected for these electives.
- ¹⁰ The prerequisite PHIL 220 may be waived for PHIL 320 with the consent of the instructor.
- ¹¹ It is recommended that students take some of the first-year courses shown in these modules as elective courses.
- ¹² For the list of courses in each module, see the Cognitive Systems website (www.cogsys.ubc.ca/students/modules.htm). Courses explicitly required will not be credited as module courses.
- ¹³ Students must achieve a grade of greater than 72% in this course, or else must take another 3 credits of MATH or STAT in order to be admitted to CPSC 320. Students interested in further STAT courses must take STAT 200, as STAT 241 does not serve as a prerequisite for higher level STAT courses.
- ¹⁴ PSYC 465 cannot be used for credit.
- ¹⁵ At least 48 credits of 300 or above courses are required for the B.Sc. degree, of which at least 30 must be Science credits.

EARTH AND OCEAN SCIENCES

The Department of Earth and Ocean Sciences (www.eos.ubc.ca) concerns itself with Earth history and the structure and properties of the Earth, from core to atmosphere. The Department of Earth and Ocean Sciences is built from the former departments of Geological Sciences and Oceanography, the Geophysics part of the former Department of Geophysics and Astronomy, and the interdepartmental Atmospheric Sciences program.

The Major program in Earth and Ocean Sciences is available for students who have a general interest in the earth sciences. For students intending to pursue a professional career in geological sciences, geophysics or oceanography, Honours programs are preferred. For details of the programs available see *Geological Sciences*, p. 412, *Geophysics*, p. 412, and *Oceanography*, p. 413. However, with careful course selection students may still use an EOSC Majors degree towards professional registration as a geoscientist. See Majors advisor for more details.

The Department also offers several non-laboratory general courses for students from other faculties (EOSC 310, 311, 312, 314, and 315). These courses are not for credit in the Faculties

of Science and Applied Science. EOSC 326 is restricted to students who have Biology 100 level and third-year standing in Science. EOSC 370 and 371 are offered to students who have completed first-year Science. For more information, contact the Department of Earth and Ocean Sciences, 604-822-2449 or visit the departmental website (www.eos.ubc.ca).

Earth and Ocean Sciences Program

MAJOR (1223): EARTH AND OCEAN SCIENCES

First Year

ENGL 100-level ¹	6
PHYS 101 or 107 ²	3
CHEM 121, 123 (or 111, 113)	8
EOSC 100-level ³	6
EOSC 111	1
MATH 100 or 102 or 104 (or 120 or 180 or 184)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
Electives ⁴	3
Total Credits	33(35)

Second Year

EOSC or ATSC courses numbered 200 or above ^{5,6}	12
Electives ⁷	18
Total Credits	30

Third and Fourth Years

EOSC or ATSC courses numbered 300 or above ⁸	30
Electives ⁷	30
Total Credits	60
<i>Minimum Credits for Degree</i> ⁹	<i>123</i>

- ¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or ENGL 121. 3 credits of first-year English may be deferred to second year.
- ² Students without Physics 12 must normally take PHYS 100 before 101. Qualified students are encouraged to take PHYS 107.
- ³ 3 credits may be deferred until second year. The requirement for these courses may be waived if a student has completed upper-level courses in each of the solid and fluid earth sciences.
- ⁴ Students without Biology 11 or 12 must take 3 credits of 100-level BIOL.
- ⁵ 6 credits may be delayed to third year if 300-level or higher courses are used for this requirement. See advisor.
- ⁶ If EOSC 211 is not chosen as 3 of the EOSC/ATSC 200 level credits, an additional 3 credits from MATH, CPSC, or STAT are required before the end of third year.
- ⁷ The 48 credits of electives in years two and above must include 12 credits in Arts, an additional 9 credits in Science, and an additional 9 credits in Arts or Science outside the field of the major (defined as EOSC and ATSC). 18 credits may be in any faculty.
- ⁸ A maximum of 6 credits may be replaced by credits from (BIOL 302, BIOL 303, CHEM 301, CHEM 302, GEOG 300, or GEOG 304).
- ⁹ Note that 48 of the 123 credits must be 300-level or above.

Atmospheric Science Programs

See *Atmospheric Science*, p. 395, in this section for information on major, honours, and combined honours programs available.

Geological Sciences Programs

The Department of Earth and Ocean Sciences (www.eos.ubc.ca) offers two undergraduate programs in Geology: Bachelor of Science with Honours, and Bachelor of Applied Science. For information on graduate degrees, see *Geological Sciences*, p. 254, under the Faculty of Graduate Studies. The Honours program is recommended for students who wish to undertake graduate studies or pursue a professional career in the geological sciences. Normally, students enter the Honours program before the beginning of the third year. The Majors program in *Earth and Ocean Sciences*, p. 411, is available for students who have a broad interest in the Earth Sciences as it relates to geology. Those who wish to pursue a professional career in the discipline are encouraged to enrol in the Honours Geology program. The Geological Engineering program leads to the Bachelor of Applied Science and is a professional program in engineering. For further information on the Bachelor of Applied Science program see *Geological Engineering*, p. 103, under the Faculty of Applied Science, Bachelor of Applied Science. Students who desire to register as Professional Geoscientists after graduating should contact the Association of Professional Engineers and Geoscientists of British Columbia to ascertain course and other requirements. Students interested in environmental science may pursue this within Geology Honours or in Combined Honours program such as Geology-Oceanography or Geology-Chemistry.

Elective courses in Geological Sciences are arranged in four streams:

- 1) environmental geology;
- 2) sedimentary geology and geobiology;
- 3) crustal and mantle processes; and
- 4) mineral deposits.

Students should consult the *Geological Sciences Program Guide* (available from the Earth and Ocean Sciences Office) and obtain guidance from a Geological Sciences advisor when formulating their program.

Students taking Geology courses may be required to participate in field trips.

CO-OPERATIVE EDUCATION PROGRAM

This optional program integrates academic study and supervised work experience. Enrolment is limited. Admissibility to Honours Geological Sciences or Combined Honours Geology and another subject is prerequisite for admission. Detailed information is available from the main office of the Department of Earth and Ocean Sciences (www.eos.ubc.ca) or the Co-operative Education Program Office, Room 309, Hennings Building, the University of British Columbia, 6224 Agricultural Road, Vancouver, BC V6T 1Z1; fax 604-822-9676. Information is also available through the Co-op website (www.sciencecoop.ubc.ca).

HONOURS PROGRAMS

HONOURS (0462): GEOLOGICAL SCIENCES

First Year	
ENGL 100-level ¹	6
CHEM 121, 123 (or 111, 113)	8
EOSC 110 or 112 or 114 or 116	3
EOSC 111	1
MATH 100 or 102 or 104 (or 120 or 180 or 184)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
PHYS 107 (or 101) ²	3
PHYS 108, 109 (or 102)	4(3)
Arts Elective	3
Total Credits	33(36)

Second Year	
CHEM 201 or 205	3
EOSC 211, 212, 220, 221, 222, 223 ³	18
MATH 200	3
MATH 221 or STAT 200	3
Arts Elective	3
Electives ⁴	6
Total Credits	36

Third and Fourth Years	
Two of EOSC 320, 321, 322	6
One of EOSC 327, 333	3
EOSC 323, 328 ⁵ , 329	9
EOSC 330, 332, 449	12
EOSC 250 or 350	3
Additional EOSC 300-level	3
Additional EOSC 400-level	6
Arts Electives	6
Electives ⁶	18
Total Credits	66

Minimum credits for degree 135

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or ENGL 121. Three credits of first-year English may be deferred to second year.

² Students without Physics 12 must normally take PHYS 100 before 101. Qualified students are encouraged to take PHYS 107/108/109.

³ Includes a field school in May of second year (extra fee to be paid).

⁴ Students without Biology 11 or 12 must take 100-level Biology.

⁵ Field School in May after third year (extra fee to be paid).

⁶ At least 48 total credits must be numbered 300 or above. At least 42 total science credits must be numbered 300 or above.

COMBINED HONOURS: GEOLOGY AND ANOTHER SUBJECT (GEOL)

First Year	
ENGL 100-level ¹	6
CHEM 121, 123 (or 111, 113)	8
EOSC 110 or 112 or 114 or 116	3
EOSC 111	1
MATH 100 or 102 or 104 (or 120 or 180 or 184)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
PHYS 101 (or 107) ³	3
PHYS 102 (or 108, 109) or BIOL 121, 140 ²	3(5)

First Year (Continued)

Arts Elective	3

Second Year

EOSC 211, 212, 220, 221, 222, 223	18
MATH 200	3
Credits required by other discipline	12
Total Credits	33

Third and Fourth Years

Geology courses numbered 300 and above ⁴	21
EOSC 328	3
Credits required by other discipline	24
Electives	6
EOSC 449 or other department 449	6
Arts Electives	9
Total Credits	69
<i>Minimum Credits for Degree</i>	135

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or ENGL 121. 3 credits of first-year English may be deferred to second year.

² Students without Biology 11 or 12 must take 3 credits of 100-level BIOL.

³ Students without Physics 12 must normally take PHYS 100 before 101.

⁴ EOSC courses numbered 320 to 329, 330 to 339, 340 to 349.

Timetabling and other problems may not permit programs in Geology and certain other departments. Students planning careers in Geological Sciences should consult the departmental advisor for elective courses appropriate to their interests.

COMBINED HONOURS: GEOLOGY AND GEOGRAPHY
See *Geography*, p. 416.

Geophysics Programs

The Department of Earth and Ocean Sciences (www.eos.ubc.ca) offers Honours and Combined Honours programs in geophysics. The major program in *Earth and Ocean Sciences*, p. 411, is available for students who have a broad interest in the Earth Sciences as it relates to geophysics. Those who wish to pursue a professional career in the discipline are encouraged to enrol in the Honours Geophysics program. For information on graduate degrees see *Geophysics*, p. 255, under the Faculty of Graduate Studies.

CO-OPERATIVE EDUCATION PROGRAM

This optional program integrates academic study and supervised work experience. Enrolment is limited. Admissibility to Honours Geophysics or Combined Honours Geophysics and another subject is prerequisite for admission. Detailed information is available from the main office of the Department of Earth and Ocean Sciences of the Co-operative Education Program Office, Room 309, Hennings Building, the University of British Columbia, 6224 Agricultural Road, Vancouver, BC V6T 1Z1; fax 604-822-9676. Information is also available through the Co-op website (www.sciencecoop.ubc.ca).

HONOURS PROGRAMS

Geophysics is an interdisciplinary physical science concerned with the nature of the earth and its environment and as such seeks to apply the knowledge and techniques of physics, mathematics, and chemistry to understand the structure and dynamic behaviour of the earth and its environment. The required sequence of Mathematics, Physics, and Geophysics courses is designed to provide a basic structure on which to build a coherent honours program with science electives normally selected from Geophysics, Geology, Astronomy, Oceanography, Mathematics, Physics, and Chemistry courses.

HONOURS (0380): GEOPHYSICS (GEOP)

First Year

ENGL 100-level ¹	6
CHEM 121, 123, (or 111, 113)	8
EOSC 110 or 112 or 114 or 116	3
EOSC 111	1
MATH 100 or 102 or 104 (or 120 or 180 or 184)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
PHYS 107 (or 101) ²	3
PHYS 108, 109 (or 102) ²	4(3)
Elective ³	3
Total Credits	33(36)

Second Year

EOSC 211, 212	6
EOSC 222, 250	6
MATH 200, 221, 215	9
PHYS 203 or 313	3
Electives ⁴	12
Total Credits	36

Third and Fourth Years

EOSC 352, 353, 354	9
EOSC 450, 453, 454	10
EOSC 449	6
MATH 316 (or PHYS 312)	3
MATH 317	3
PHYS 301 or 354	3
Electives ⁴	30
Total Credits	64

Minimum Credits for Degree 134

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or ENGL 121. 3 credits of first-year English may be deferred to second year.

² Students without Physics 12 must normally take PHYS 100 before 101. Qualified students are encouraged to take PHYS 107/108/109.

³ Students without Biology 11 or 12 must take 100-level Biology.

⁴ The electives must contain 12 credits of Arts and 6 credits of Geology.

COMBINED HONOURS: GEOPHYSICS AND ANOTHER SCIENCE SUBJECT¹

First Year

ENGL 100-level ²	6
CHEM 121, 123 (or 111, 113)	8
EOSC 110 or 112 or 114 or 116	3
EOSC 111	1

First Year (Continued)

MATH 100 or 102 or 104 (or 120 or 180 or 184)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
PHYS 107 (or 101) ³	3

MATH 317	3
PHYS 301 or 354	3
EOSC 449 (or thesis in other discipline)	6
Electives ⁵	30
Total Credits	64

Minimum Credits for Degree 134

¹ Combined honours programs must be approved by advisors from both disciplines at the time that the program is declared. Not all disciplines offer combined honours programs. Example programs for combined honours geophysics and other subjects are listed at www.eos.ubc.ca.

² ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or ENGL 121. 3 credits of first-year English may be deferred to second year.

³ Students without Physics 12 must normally take PHYS 100 before 101. Qualified students are encouraged to take PHYS 107/108/109.

⁴ Students without Biology 11 or 12 must take 100-level Biology.

⁵ Within the specified electives all students must meet the requirements of the other program. The available elective credit in each of the different years may be adjusted to allow for specific program combinations as long as there is a minimum of 134 total credits and a maximum of 140 specified total credits within the framework for Honours Programs in the Faculty of Science. The framework for Honours Programs specifies that there must be at least 30 credits in each Winter Session, four terms must have five-or-fewer lecture course equivalents and four terms must have six-or-fewer lecture course equivalents. In all programs there must be at least 12 credits of Arts and 9 credits of calculation courses. If less than 18 additional credits are specified by the other program, further courses must be selected in consultation with the program advisors.

Oceanography Programs

The Department of Earth and Ocean Sciences (www.eos.ubc.ca) offers oceanography degree programs in Honours Fisheries Oceanography, Combined Honours Oceanography and Biology, and Combined Honours Oceanography and Another Subject. The Major program in *Earth and Ocean Sciences*, p. 411, is available for students who have a broad interest in earth science as it relates to Oceanography. Those who wish to pursue a professional career in the discipline are encouraged to enrol in one

of the Combined Honours programs in Oceanography and another subject. Example programs in Combined Honours include Oceanography and Chemistry, Oceanography and Geology, Oceanography and Geophysics, and Oceanography and Physics. See www.eos.ubc.ca for example programs. For information on graduate degrees, see *Oceanography*, p. 271, under the Faculty of Graduate Studies.

Formal program approval must be obtained from both departmental advisors before registering in second, third, and fourth years of the Combined Honours programs. Enrolment in all combined Oceanography Honours and the Fisheries Oceanography Honours programs requires an academic average of 72%.

A general first-year course, EOSC 112, is offered. Non-laboratory general courses, EOSC 314 and EOSC 315, are offered to students who are not in Science or Applied Science, while EOSC 370 and 371 are offered to students who have completed first-year Science. Students intending to register for an undergraduate Oceanography program can undertake the Major program, a Combined Honours program with another science, or the Fisheries Oceanography Honours program. Formal program approval must be obtained from both departmental advisors before registering in second, third, and fourth years of the Combined Honours programs. Enrolment in all combined Oceanography Honours and the Fisheries Oceanography Honours programs requires an academic average of 72%. All Oceanography (OCGY) courses have been renumbered as EOSC courses, with the conversion described on the Earth and Ocean Sciences website (www.eos.ubc.ca).

Minimum Credits for Degree 137

- ¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or ENGL 121. 3 credits of first-year English may be deferred to second year.
- ² The prerequisite for BIOL 112 is Chemistry 12 and either Biology 11 of Biology 12. Students lacking the prerequisites must take BIOL 111 before attempting either BIOL 112 or BIOL 121 or BIOL 140.
- ³ Students without Physics 12 must normally take PHYS 100 before 101.
- ⁴ Choose at least 12 credits from BIOL 204, 205, 209, 210; CHEM 201, 202, 205, MATH 200, 317; MICB 202. These choices must include at least 6 credits of courses on organisms, e.g., BIOL 204, 205, 209, 310, or MICB 202. Additional EOSC courses may be taken as electives in third and fourth years. 3 credits of PHYS may be deferred until second year to create elective space in first year.

- ⁵ MATH 200 is recommended in second or third year.
- ⁶ Recommended that this course be taken in third year.
- ⁷ If BIOL 449 is taken, an additional 6 credits of EOSC courses must be chosen as part of the upper level science electives.

ENVIRONMENTAL SCIENCES

The Bachelor of Science program in Environmental Sciences is designed to give students a broad perspective on the environment. The program concentrates on understanding the major environmental issues facing human societies and it adopts an integrative cross-disciplinary approach to the study of these issues. The program provides a significant background in chemistry, earth and ocean sciences, life sciences, and social sciences. The core courses, ENVR 200, 300, and 449, examine environmental issues through seminars and student projects. Students are required to select an Area of Concentration that includes required and elective courses.

Both Major and Honours programs are offered. Admission is based on academic performance and an essay submitted with the application for admission. For the Honours program, Students require a minimum 72% average in prior courses for admission, and must maintain at least a 68% average for continuation in the program. Students normally apply to the Major or Honours program after first year. For additional information, see the Environmental Sciences website (www.science.ubc.ca/envsc).

Programs

MAJOR (1263): ENVIRONMENTAL SCIENCES (ENSC)

First Year¹	
ENGL 100-level ²	6
BIOL 121, 140	4
CHEM 121, 123 (111, 113)	8
MATH 100 or 102 or 104 or 180 or 184 (or 120)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
PHYS 101	3
Electives ^{3,4}	6-0
Total Credits	33(35)

Second Year	
GEOG 200	3
BIOL 302	3
BIOL 303	3
CHEM 202, 201 (205)	6
ENVR 200	3
Elective ^{5,6,7}	12
Total Credits	30

Third and Fourth Years	
ENVR 300 ⁸	3
EOSC 370 or 371	3
GEOG 205	3
MATH 200	3
STAT 200 or BIOL 300 ⁹	3
Electives ^{5,10}	30
Area of Concentration ⁷	15

Third and Fourth Years (Continued)

Total Credits	60
Minimum Credits for Degree	123

- Students eligible to enrol in Science One are encouraged to do so. Students with credit for Science One and BIOL 140 have met all first-year Biology, Chemistry, Mathematics, and Physics requirements for programs in the Faculty of Science and satisfy the lower-level requirements for physical sciences, other sciences, and laboratory science and 6 of the required 9 credits in computational science.
- ENGL 112 is recommended. Qualified students are encouraged to consider 120 and/or 121. 3 credits of English may be deferred until second year.
- Students without Biology 12 must replace 3 credits of electives with BIOL 111 before taking 121. Students with Biology 12 are encouraged to take a 3-credit elective. One of EOSC 110, 112, or GEOG 102, 103 is recommended.
- Students without Physics 12 must replace 3 credits of electives with PHYS 100 before taking PHYS 101. Students may defer taking PHYS 101 to second year.
- Electives must be chosen so that along with required courses, the program minimum total of 123 credits includes a minimum of 72 Science credits, 18 Arts credits, 9 credits in fields outside the Area of Concentration (see below), and 48 upper-level credits of which 30 must be in Science. For information on which Geography courses count as Arts or Science (or neither), see the course listing in the Calendar.
- Students interested in the Life Sciences concentration should consider one of BIOL 204, 205, 209, or 210 in second year.
- See *Areas of Concentration*, p. 415, below.
- Must be taken before ENVR 449 (see footnote 10)
- Students should consider which statistics course will fulfil prerequisites for upper-level courses they intend to take. Should be taken in third year. STAT 200 does not fulfil an upper-level credit requirement.
- ENVR 449 is a recommended elective for fourth year. Students in the Major program must obtain permission from the program Director to take the course.

HONOURS (0589): ENVIRONMENTAL SCIENCES (ENSC)**First Year¹**

ENGL 100-level ²	6
BIOL 121, 140	4
CHEM 121, 123 (111, 113)	8
MATH 100 or 102 or 104 or 180 or 184 (or 120)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
PHYS 101	3
Electives ^{3,4}	6-0
Total Credits	33(35)

Second Year

GEOG 200	3
BIOL 302	3
BIOL 303	3
CHEM 202, 201 (205)	6
ENVR 200	3
Electives ^{5,6,7}	18
Total Credits	36

Third and Fourth Years

CHEM 301	3
ENVR 300 ⁸	3

Third and Fourth Years (Continued)

ENVR 449 ⁹	6
EOSC 370 or 371	3
GEOG 205	3
MATH 200	3
SOIL 200	3
STAT 200 or BIOL 300 ¹⁰	3
Electives ⁵	24
Area of Concentration ⁷	15
Total Credits	66
Minimum Credits for Degree	135

- Students eligible to enrol in Science One are encouraged to do so. Students with credit for Science One and BIOL 140 have met all first-year Biology, Chemistry, Mathematics, and Physics requirements for programs in the Faculty of Science and satisfy the lower-level requirements for physical sciences, other sciences, and laboratory science and 6 of the required 9 credits in computational science.
- ENGL 112 is recommended. Qualified students are encouraged to consider 120 and/or 121. 3 credits of English may be deferred until second year.
- Students without Biology 12 must replace 3 credits of electives with BIOL 111 before taking 121. Students with Biology 12 are encouraged to take a 3-credit elective. One of EOSC 110, 112, or GEOG 102, 103 is recommended.
- Students without Physics 12 must replace 3 credits of electives with PHYS 100 before taking PHYS 101. Students may defer taking PHYS 101 to second year.
- Electives must be chosen so that along with required courses, the program minimum total of 135 credits includes a minimum of 72 Science credits, 18 Arts credits, and 48 upper-level credits, of which 42 must be in Science. For information on which Geography courses count as Arts or Science (or neither), see the course listing in the Calendar.
- Students interested in the Life Sciences concentration should consider one of BIOL 204, 205, 209, or 210 in second year.
- See *Areas of Concentration*, p. 415, below.
- Must be taken before ENVR 449.
- Must be taken in fourth year.
- Students should consider which statistics course will fulfil prerequisites for upper-level courses they intend to take. Should be taken in third year. STAT 200 does not fulfil an upper-level credit requirement.

MAJOR OR HONOURS: AREAS OF CONCENTRATION

Students must select one of the following AOCs. A minimum of 15 science credits must be taken from the AOC, and these cannot be used to fulfil any other requirements of the program. Required courses are listed for the AOC. For electives, see the program Director or the Environmental Sciences website (www.science.ubc.ca/envsc). For the Major program, the field inside the AOC is defined.

- Chemical analysis of the environment: CHEM 301, 302; EOSC 220, 327, 430. The field includes courses in Chemistry, and Earth and Ocean Sciences.
- Physical analysis of the environment: EOSC 250, 350; GEOG 270, 300. The field includes courses in Earth and Ocean Sciences and courses in Geography that have Science credit.

- The atmosphere and water: CHEM 301, 302; EOSC 329, 370; GEOG 300. The field includes courses in Earth and Ocean Sciences and courses in Geography that have Science credit.
- Life Sciences: Systematics: One of BIOL 204, 205, 209, or 210. The field includes courses in Biology, and Microbiology and Immunology.
- Life Sciences: Ecology: one of BIOL 204, 205, or 209 or 210; two of BIOL 301, 402, 404, 405, 407, 408, 409, 411, 416, or 418. The field includes courses in Biology, and Microbiology and Immunology.
- Life Sciences: Conservation Biology: BIOL 204, 205, 209 or 210; two of BIOL 301, 402, 404, 405, 407, 408, 409, 411, 416, or 418. The field includes courses in Biology, and Microbiology and Immunology.
- Computer Modelling: CPSC 111, 121, 211, 221; STAT 241. The field includes courses in Computer Science, Mathematics, and Statistics.

GENERAL SCIENCE PROGRAM

The General Science program recognizes five designated subject areas of the Faculty of Science. These areas are:

- Chemistry (CHEM 0081);
- Earth Science (Atmospheric Science, Geography courses for Science credit except for GEOG 307, 407, Earth and Ocean Science except for EOSC 310, 311, 312, 314, 315, 371, 470, 471, 474, 475, 478) (ERSC 0225);
- Life Science (ANAT 390, 391, Biochemistry, Biology, GEOG 307, 407, Marine Science, Medical Genetics, Microbiology, Pharmacology, Physiology, Psychology courses for Science credit and EOSC 371, 470, 471, 474, 475, 478) (LFSC 0440);
- Mathematical Science (Computer Science, Mathematics, Statistics) (MASC 0029); and
- Physics and Astronomy (PHYS 0271).

For first-year requirements for entry into the General Science program, see *Lower-Level Requirements*, p. 389, under Bachelor of Science, Degree Requirements. Students must register in the courses that are prerequisite to the courses of their proposed areas of concentration.

All degree requirements must be fulfilled in accordance with Faculty of Science requirements. Students may, with the approval of a senior faculty advisor, undertake an optional Minor program in Arts or Commerce in conjunction with the General Science program. See *Minor Programs*, p. 393, under Bachelor of Science, Co-op, and Minor Options.

To satisfy the requirement of at least 30 credits of Science courses numbered 300 and above, the student may select one of two routes within the General Science program:

- Route A. At least 18 credits numbered 300 or higher must be selected from one of the five subject areas specified above and 12

credits numbered 300 or higher from another of these five areas. Students in Route A will register in both areas of specialization.

- Route B. At least 18 credits must be selected from courses numbered 300 or higher in one of the five subject areas listed above plus at least 6 credits in courses selected from each of two other subject areas for a total of 30 credits in three subject areas. Students in route B will register in the 18-credit major area of specialization only.

Courses selected must be acceptable for Major or Honours programs in the specific areas of concentration.

Students who successfully complete the B.Sc. General Science program will have recorded on their transcript the area or areas of concentration.

GEOGRAPHY

The Department of Geography (www.geog.ubc.ca) offers opportunities for study leading to bachelor's, master's, and doctoral degrees. For information on the Bachelor of Arts, see *Geography*, p. 135, under the Bachelor of Arts in the Faculty of Arts section. For information on graduate degrees, see *Geography*, p. 253, in the Faculty of Graduate Studies section.

Students entering the major, honours, or a combined honours program must consult the science advisor of the Department of Geography. Students in the upper years of a Major program must choose a concentration in at least *two* topic areas (Biogeography, Climatology, Geomorphology, Hydrology) and select their courses accordingly (see Department of Geography Undergraduate Guide).

Students registered in the Bachelor of Science Geography program must take at least 6 credits of Arts courses outside the Department of Geography in addition to 100-level English.

The following Geography courses may be used as free electives, with due regard to prerequisites. They may not be used for either Science or Arts 'designated' credit: GEOG 210, 310, 311, 312, 315, 316, 317, 318, 319, 371, 374, 375, 410, 412.

Programs

MAJOR (0216): PHYSICAL GEOGRAPHY (PGEO)

First Year

ENGL 100-level ¹	6
MATH 100 or 102 or 104 (or 120 or 180 or 184)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
CHEM 121, 123 (111, 113)	8
PHYS 101 (107) ²	3
GEOG 102 or 103 ³	3
Science Elective ⁴	6
Total Credits	32(34)

Second Year

GEOG 200, 205, 207, SOIL 200	12
One of GEOG 210, 290	3

Second Year (Continued)

One of STAT 200, FRST 231	3
One of MATH 200, 221 or CPSC 100-level	3
Science Electives	6
Arts Elective	3
Total Credits	30

Third Year

GEOG 306, 309 ⁵ , 310, and EOSC 211	12
Two of GEOG 300, 307, 308, EOSC 329	6
GEOG 373 or 376	3
Arts Elective ⁷	6
Electives ⁷	6
Total Credits	30

Fourth Year

Two of GEOG 318, 319, 404, 410, 412	6
Four of ATSC 301, 303, GEOG 304, 401, 402, 403, 405, 406, 407, 408, 409, EOSC 350 ⁷ , 429, BIOL 324	12
Arts elective	3
Electives ⁷	9
Total Credits	30

Minimum Credits for Degree 122

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² Students without Physics 12 must take PHYS 100 prior to PHYS 101 or 107.

³ Special arrangements may be made for students unable to take this course in first year.

⁵ Prerequisite MATH 200.

⁴ PHYS 102 (108) or EOSC 2505 recommended. Students who take PHYS 107 and 108 should strongly consider PHYS 109. Students without BIOL 11 or 12 must take 3 credits of Biology.

⁶ Field Course taken in May; extra fee to be paid.

⁷ Enough elective credits must be numbered 300 or higher that the total 300-level or higher courses in the program, including specified courses, is at least 48 credits; at least 9 credits must be outside the field of Major, the field of Major comprising all courses in Geography.

⁸ Selected to satisfy the requirements for two areas of concentration. See the Department of Geography Undergraduate Course Guide.

HONOURS (0568): CLIMATOLOGY (CLIM)

First Year

ENGL 100-level ¹	6
CHEM 121, 123 (111, 113)	8
GEOG 102 ²	3
MATH 100 or 102 or 104 (or 120 or 180 or 184)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
PHYS 107 (101) ³	3
Science Electives ⁴	4
Total Credits	30(32)

Second Year

GEOG 200, ATSC 201	6
CPSC 100-level	3
EOSC 250	3
GEOG 205	3
MATH 200, 221	6
Arts Electives	6

Second Year (Continued)

Science Elective	3
Total Credits	30

Third Year

EOSC 370	3
GEOG 300, ATSC 301, 303	9
GEOG 309 ⁵ , 310	6
MATH 215 and PHYS 312	6
PHYS 314 or EOSC 354	3(4)
STAT 200	3
Elective	3
Arts Elective ⁶	3
Total Credits	36(37)

Fourth Year

GEOG 304, 401, 402	9
GEOG 449	3
GEOG 376	3
Three of EOSC 477, CHEM 302 ⁷ , ATSC 404, 405	9
Arts Elective	3
Elective	9
Total Credits	36

Minimum Credits for Degree 132

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² Special arrangements may be made for students unable to take this course in first year.

³ Students without Physics 12 must take PHYS 100 prior to PHYS 101 or 107.

⁴ PHYS 108 (102) recommended. Students who take PHYS 108 should strongly consider PHYS 109. Students without BIOL 11 or 12 must take 3 credits of Biology.

⁵ Field Course taken in May; extra fee to be paid.

⁶ ENGL 301 is recommended.

⁷ CHEM 201 (or 205) is prerequisite to this course.

COMBINED HONOURS (2278) GEOGRAPHY AND GEOLOGY (GEOG, GEOL)

First Year

ENGL 100-level ¹	6
MATH 100 or 102 or 104 (or 120 or 180 or 184)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
CHEM 121, 123 (111, 113)	8
PHYS 107 (101) ²	3
EOSC 110 ³ or GEOG 103 ⁴	3
Science Electives ⁵	4
Total Credits	30(32)

Second Year

EOSC 220, 221, 222	9
EOSC 223 ⁶	3
GEOG 200, 205	6
MATH 200, 221	6
STAT 200	3
Electives	3
Total Credits	30

Third Year

EOSC 330 or GEOG 306	3
SOIL 200	3

Third Year (Continued)

EOSC 211, 329	6
GEOG 308	3
GEOG 309 ⁶	3
CHEM 201 or 205	3
GEOG 373 or 376	3
MATH 215	3
Arts Elective ⁷	6
Elective ⁷	4
Total Credits	36

Fourth Year

Two of GEOG 403, 404, 405, 406, 408	6
GEOG 449 or EOSC 449	6
EOSC 320, 323	6
EOSC 327 or 333	3
Arts Elective ⁷	6
Elective ⁷	9
Total Credits	36

Minimum Credits for Degree 132

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² Students without Physics 12 must take PHYS 100 prior to PHYS 101 or 107.

³ EOSC 111 is recommended to accompany this course.

⁴ Special arrangements may be made for students unable to take this course in first year.

⁵ PHYS 102 (108) recommended. Students who take PHYS 108 should strongly consider PHYS 109. Students without Biology 11 or 12 must take 3 credits of Biology.

⁶ Field Course taken in May; extra fee to be paid.

⁷ Electives in the second, third, and fourth years combined must include at least 12 credits of courses numbered 300 or above. Students should consult the course guides available from the Departments of Geography and Earth and Ocean Sciences.

INTEGRATED SCIENCES PROGRAM

The objective of the Integrated Sciences Program (ISP) is to provide a strong science education with an interdisciplinary component. The program offers flexibility in course selection to independently motivated students who have cross-disciplinary interests. The ISP may be appropriate preparation for many professional degree programs (e.g. in Health Sciences, Education, Law, Journalism, M.B.A. programs), as well as for graduate programs. Admission to graduate studies in certain fields may require additional qualifying studies. The Honours option is recommended for excellent students considering graduate studies. These students are advised to consult the appropriate graduate advisor in the department they plan to attend and plan their program accordingly.

The Integrated Sciences Program provides:

- an opportunity for students to design their own interdisciplinary course of study;
- an admission process which encourages students to develop their educational goals under an advisor's guidance; and
- Integration (ISCI) courses to guide students in developing a wider perspective of scientific concepts which cross disciplinary boundaries.

These courses aimed at developing a broad appreciation of the links between disciplines and their impact on society. The focus of these courses will be on student-initiated learning to reinforce skills in information gathering, and analysis and presentation in written, oral and visual forms.

For detailed information about the program see the ISP website (www.science.ubc.ca/~isp).

Admission

Students will be admitted to the ISP on the basis of:

- fulfilment of the requirements for promotion to third-year standing in the Faculty of Science as described under *Promotion to Third Year*, p. 390, under Bachelor of Science, Degree Requirements
- a statement of academic goals
- a proposal for the courses that will be completed for graduation
- a rationale for the choice of these courses, emphasizing the integrative nature of the program
- past academic performance and successful completion of the key prerequisites
- to enter the Honours option, a minimal overall grade average of 68% prior to joining ISP is required.

Application

Students must use the online application at www.science.ubc.ca/~isp. Students must find an ISP mentor (see ISP website for a list of ISP advisors) who guides them during the application process and approves their application. Students may submit applications at any time during the year. Students interested in taking summer courses in preparation for the ISP are encouraged to apply in their second year. In these cases, admission to the program will be granted on a conditional basis only. Students develop their own curriculum based on an overarching theme of integrating scientific disciplines of their choice. Normally, the proposed courses will contain a cluster of credits of 300- or 400-level courses bridging the scientific disciplines that the student wishes to integrate. Inclusion of several 400-level courses in a program is essential, since a good standing in these may influence the opportunities a student may have after graduation. Entry into the program commits the student to complete a specified list of upper-level Science courses. Any change in the original list of courses requires approval of the ISP. To change their course list, students must have approval from the ISP administration or from their ISP mentor.

While the ISP will strive to accommodate as many students as possible, some enrolment restrictions may apply. Students whose programs are uniquely suited to the integrative, flexible character of the program but would not be easily accommodated by departmentally based programs within the Faculty will have priority. In addition, evidence of student inde-

pendence, responsibility and past academic performance will be considered.

Information about the Integrated Sciences Program, application forms, and guidelines for preparing a program are available from the Integrated Sciences Program Office, LSK Building, 303C-6356 Agricultural Road, The University of British Columbia, Vancouver, BC, V6T 1Z4, or from the ISP website (www.science.ubc.ca/~isp).

Graduation Requirements

For the ISP degree options, the Faculty graduation requirements as stated under *Graduation Requirements*, p. 387, under Bachelor of Science, Degree Requirements apply, with the exception of the breadth requirement. The required credits in the Areas of Concentration and the Integration (ISCI) courses fulfil part of the minimum upper-level credit requirement.

Requirements for ISCI (1039): Integrated Sciences Program

- Completion of a minimum of 18 credits of 300- or 400-level courses in the areas of integration as designated in their application.
- 9 credits of Integration Courses (ISCI). An ISCI course must be taken in a student's first term in the program. Since the topics of these courses may change from year to year, students should plan their programs to select ISCI courses in which they are most interested. Registration in ISCI courses will be limited, and ISP students will be given priority.
- In addition to the 9 ISCI credits mentioned above, students must take the 1-credit seminar course ISCI 300.
- ISP students will develop a strong program of upper-level science courses, in consultation with ISP advisors. Students are expected to develop programs with 39 or more credits of upper-level science and with several 400-level courses.

Requirements for ISCI (001511): Honours Integrated Sciences Program

- 6 credits Honours thesis. Honours students in ISP write an Honours thesis that fits within the interdisciplinary mandate of the Program and the scientific disciplines that students are integrating. Students must take a 6-credit Directed Research course (449 course) in a suitable department that fits with the topic of their thesis. They may need to have certain prerequisites to take these courses. For their research thesis, students are encouraged to arrange for co-supervision by faculty members representing the disciplines that the student is integrating. If desired, ISP provides an ISP examiner (i.e., a faculty member associated with ISP) for thesis examinations of ISP Honours student.
- Completion of a minimum of 36 credits of 300- or 400-level courses in the areas of integration as designated in their application. At least 12 of those credits must be at

the 400 level. It is recommended that students take research related courses (topics courses, seminars, research methodologies) in preparation of their Honours thesis 449 course.

- 12-credits of Integration Courses (ISCI). An ISCI course must be taken in a student's first term in the program. Since the topics of these courses may change from year to year, students should plan their programs to select ISCI courses in which they are most interested. Registration in ISCI courses will be limited, and ISP students will be given priority.
- In addition to the 12 ISCI credits mentioned above, students have to take the 1-credit seminar course ISCI 300.
- In addition to the Faculty continuation and graduation requirements for Honours students, ISP Honours students need to maintain a minimum average of 75% in each term of their tenure in the Honours ISP.

Options

Options within the ISP include the following:

- Directed studies in the ISP. The Integrated Sciences Program encourages directed study experiences for undergraduate students (courses numbered 448 in ISP or Science departments). Space is usually limited and ISP advisors will assist students wishing to apply to Science departments for directed study. Directed studies credits will not count towards the required credits of ISCI Courses.
- Minor. Students may, with the approval of their ISP mentor, undertake an optional Minor program in Arts or in Commerce in conjunction with the ISP.

Co-operative Education Program

Co-operative Education is a process of education which integrates academic study with related and supervised work experience in co-operating employer organizations. An optional Co-operative Education Program is available for students in the Integrated Sciences Program.

The Program is intended to help prepare interested and qualified students for research careers in industry, university, or government settings with 16 months of work placement (i.e. four work terms) in at least two different research areas supervised by scientists in industrial, academic, or governmental positions. Faculty advisors also visit students at their place of work and provide advice on technical reports required of all students in the program.

To be eligible, students must be in the Integrated Sciences program with at least high second-class standing, and they must have completed at least one semester in this program, which includes having taken at least one Integrated Sciences core course (ISCI). Admission is by application to the Science Co-op Office in conjunction with the application to the Integrated Sciences program, or in April prior to fourth year (transfer students may be considered later). Selection of students will be

based on academic performance and general suitability to the work environment as determined by resume and interview. The total enrolment will be subjected to the availability of appropriate work placements and faculty advisors.

The work placements are arranged by mutual agreement between students and employing organizations. Participating students register for ISCI 398, 399, 498, or 499 as appropriate, and pay the Cooperative Education Program fee per course (see *Program and Course Fees*, p. 28).

Graduation in the Co-operative Education Program for Integrated Sciences requires a student to complete all of ISCI 398, 399, 498, and 499, in addition to the normal academic requirements. Students can decide the timing of their work placements upon consultation with the Co-op office and with their academic advisor in ISP.

Two examples of standard schedules are:

- 1) ISCI 398 in Winter Session (Term Two) of third year, ISCI 399 in Summer Session following third year, ISCI 498 in Summer Session following fourth year, ISCI 499 in Winter Session (Term One) of fifth year.
- 2) ISCI 398 in Summer Session following third year, ISCI 399 in Winter Session (Term One) of fourth year, ISCI 498 in Winter Session (Term Two) of fourth year, ISCI 499 in Summer Session following fourth year. Students will have each satisfactorily completed course noted on their academic record.

Detailed information on the program can be obtained from the Coordinator for the Integrated Sciences Program or from the Office of Co-operative Education in Room 170, Chemistry and Physics Building, The University of British Columbia, 6221 University Boulevard, Vancouver, B.C. V6T 1Z1.

MATHEMATICS

The Department of Mathematics (www.math.ubc.ca) offers opportunities for study leading to doctoral, master's, and bachelor's degrees. For information on the Bachelor of Arts in Mathematics, see *Mathematics*, p. 142, in the Faculty of Arts section. For information on graduate degrees, see *Mathematics*, p. 264, in the Graduate Studies section.

Students should note that the first digit in the number of a course is intended to convey the level of mathematical maturity at which the course is conducted rather than the year in which it must be taken.

Co-operative Education Program

Detailed information is available from the Mathematics Department or the Co-operative Education Program Office, Room 170, Chemistry/Physics Building, 6221 University Blvd, Vancouver, B.C., V6T 1Z1, telephone 604-822-9677, fax 604-822-9676. Information is also available through the Science Co-op website (www.sciencecoop.ubc.ca).

Major Programs

The Department offers a large selection of courses in various areas of pure and applied mathematics and requiring various levels of mathematical sophistication. The student is advised to consult a Mathematics advisor during the second year or when considering a Major in Mathematics in order to design a coherent program of study suitable to the student's interests and abilities.

MAJOR (0456): MATHEMATICS (MATH)

First Year	
ENGL 100-level ¹	6
CHEM 111 ^{2,3}	0-4
MATH 100 or 102 or 104 (or 120 or 180 or 184) ⁴	3-4
MATH 101 or 103 or 105 (or 121)	3-4
PHYS 100-level ³	6
CPSC 111/211 or CPSC 111/MATH 210 ⁵	7-8
Laboratory requirement ⁶	0-2
BIOL, ASTR, EOSC, GEOG, or PSYC ⁷	3
Electives ^{8,9}	2-5
Total Credits ¹⁰	31-36

Second Year	
MATH 200 (or 226)	3
MATH 220 ¹¹	3
MATH 221 (or 223), 215 ¹²	6
Arts Elective	6
Elective(s) ^{8,9}	12
Total Credits	30

Third and Fourth Years	
Mathematics courses numbered 300 or above	24
MATH, STAT, or CPSC courses numbered 300 or above ¹²	6
Arts Elective	6
Electives ^{8,9}	24
Total Credits	60

Minimum Credits for Degree 120

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² This requirement applies only to students without credit for Chemistry 12.

³ Total credits in PHYS/CHEM courses must include 6 from beyond PHYS 100, CHEM 111.

⁴ See *UBC-SFU-UVIC-UNBC Calculus Examination Certificate*, *p. 16

⁵ One of these sequences must be completed during the first two years. Note: MATH 210 may not be offered every year.

⁶ All B.Sc. programs must include two terms of laboratory science. These may be stand-alone labs or parts of lecture-lab courses included in the other requirements listed above. Details are given at *Lower-Level Requirements*, p. 389.

⁷ Only courses eligible for credit in the Faculty of Science may be used to satisfy this requirement. Students without credit in BIOL 11 or BIOL 12 must use BIOL. This requirement may be deferred until second year.

⁸ Electives must be chosen to ensure that the program contains at least 48 credits from courses at the 300 level or above. The program must contain at least 72 credits in Science courses.

⁹ At least 9 credits must be chosen from outside the field of the major, i.e., outside MATH, STAT, and CPSC. Non-elective credits from First Year, includ-

ing credits described in footnote 7, cannot be used toward this requirement.

¹⁰ Students who earn more than 30 credits in first year may reduce the number of unrestricted electives taken in later years.

¹¹ Students obtaining 68% or higher in MATH 226 are not required to take MATH 220.

¹² MATH 215 may be deferred until third year.

Recommendations

The Department makes the following recommendations:

- 1) Mathematically able students are encouraged to take the honours stream MATH 120, 121, 223, 226, and 227.
- 2) In second year, MATH 221 should be taken in Term 1. It is possible to take (with appropriate prerequisites) some of MATH 307, 308, 312, 317, 340, and MATH/STAT 302 (as well as MATH 300) in the second year.
- 3) Students interested in pursuing statistics to some depth should take STAT 200 and MATH/STAT 302 in the second year. This will prepare them for more advanced Statistics courses such as STAT 305, 306, 404, and 405.
- 4) Major students should consider taking some of MATH 300, 320, 322.
- 5) MATH 302 and MATH 307 are courses which are useful in many areas of mathematics.
- 6) Students interested in operations research should take MATH 340, 441, 442, and 443. They are also advised to take MATH 303, STAT 305, and 306, and some advanced Computer Science courses.
- 7) Students interested in teaching are advised to take MATH 308, 309, 312, 313, 414, 446.
- 8) Students interested in becoming actuaries can make substantial progress toward this career goal while majoring in Mathematics or Statistics. These students should consult the actuarial advisors in the Mathematics and/or Statistics Departments for detailed advice on course selection and advice on taking the Society of Actuaries' exams.
- 9) Students interested in the physical sciences should take MATH 317 which is important for MATH 300, 316.
- 10) Students interested in Economics should consider taking ECON 420 and 421, and should consult an advisor in the Economics Department for other appropriate Economics courses. A joint Major in Mathematics and Economics is available. See below.
- 11) In selecting electives, students should consider pursuing an area of application of mathematics in some depth. They should also ensure that they fulfil all the graduation requirements of the Faculty of Science.

Major in Mathematical Sciences

The Major in Mathematical Sciences is offered with Departments of Computer Science and Statistics.

MAJOR (0185): MATHEMATICAL SCIENCES (MASC)

First Year	
ENGL 100-level ¹	6
CHEM 111 ^{2,3}	0-4
CPSC 111, 121	8
MATH 100 or 102 or 104 (or 120 or 180 or 184) ⁴	3-4
MATH 101 or 103 or 105 (or 121)	3-4
PHYS 100-level ⁵	6
BIOL, ASTR, EOSC, GEOG, or PSYC ⁶	3
Laboratory Requirement ⁷	0-2
Elective	3
Total Credits ⁸	32-40

Second Year	
CPSC 211, 213, 221 ⁹	12
MATH 200 (or 226), 221 (or 223)	6
MATH 220 ¹⁰	3
MATH/STAT 302	3
STAT 200	3
Arts Electives	6
Total Credits	33

Third and Fourth Years	
MATH 303 ¹¹ , 307, 215, 340	12
Four courses from CPSC 302, 303, 310, 313, 319, 320 ⁹	12
STAT 305, 306, 404	9
Arts Elective	6
Electives ^{12,13}	21
Total Credits	60
<i>Minimum Credits for Degree</i>	125

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² This requirement applies only to students without credit for CHEM 12.

³ Total credits in PHYS/CHEM courses must include 6 from beyond PHYS 100, CHEM 111.

⁴ See *UBC-SFU-UVIC-UNBC Calculus Examination Certificate*, p. 16.

⁵ Total credits in PHYS/CHEM courses must include 6 from beyond PHYS 100, CHEM 111.

⁶ Only courses eligible for credit in the Faculty of Science may be used to satisfy this requirement. Students without credit in one of BIOL 11 or BIOL 12 must use BIOL. This requirement may be deferred until second year.

⁷ All B.Sc. programs must include two terms of laboratory science. These may be stand-alone labs or parts of lecture-lab courses included in the other requirements listed above. Details are given at *Lower-Level Requirements*, p. 389.

⁸ Students who earn more than 30 credits in first year may reduce the number of unrestricted electives taken in later years.

⁹ Students should note that some CPSC courses have enrolment restrictions. Registration in the program does not guarantee access to these courses.

¹⁰ Students obtaining 68% or higher in MATH 226 may replace MATH 220 with 3 credits of electives.

¹¹ MATH 418 may be substituted for Math 303.

¹² Electives must be chosen to ensure that the program contains at least 48 credits from courses at the 300 level or above.

¹³ At least 9 credits must be chosen from outside the field of the major, i.e., outside MATH, STAT, and CPSC. Non-elective credits from First Year

cannot be used toward this requirement.

MAJOR (1135): MATHEMATICS AND ECONOMICS (MATH, ECON)

First Year	
ENGL 100-level ¹	6
ECON 100, 102 ²	6
MATH 104 (or one of 100, 102, 120, 180, 184) ³	3-4
MATH 105 (or one of 101, 103, 121)	3-4
PHYS 100-level ⁴	6
CHEM 111 ^{4,5}	0-4
CPSC 111/211 or CPSC 111/MATH 210 ⁷	7-8
Laboratory Requirement ⁶	0-2
Elective(s) ^{9,10}	0-6
Total Credits ¹¹	31-36

Second Year	
ECON 304, 305	6
MATH 200 (or 226), 215, 220, 221 or 223	12
BIOL, ASTR, EOSC, GEOG, or PSYC ⁸	3
Electives ^{9,10}	9
Total Credits	30

Third and Fourth Years	
ECON 306, 325 ¹² , 326, 490	12
MATH 320	3
ECON courses numbered 300 or above	3
ECON courses number 400 or above	3
MATH courses numbered 300 or above ¹³	9
Science courses numbered 300 or above	18
Elective(s) ^{9,10}	12
Total Credits	60

Minimum Credits for Degree 121

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² This requirement can also be satisfied by taking ECON 307 and 3 additional credits of Economics numbered 300 or above.

³ See *UBC-SFU-UVIC-UNBC Calculus Examination Certificate*, p. 16.

⁴ Total credits in PHYS/CHEM courses must include 6 from beyond PHYS 100, CHEM 111.

⁵ This requirement applies only to students without credit for Chemistry 12.

⁶ All B.Sc. programs must include two terms of laboratory science. These may be stand-alone labs or parts of lecture-lab courses included in the other requirements listed above. Details are given at *Lower-Level Requirements*, p. 389.

⁷ One of these sequences must be completed during the first two years. Note: MATH 210 may not be offered every year.

⁸ All students must take 3 credits in ASTR, BIOL, EOSC, or in PSYC and GEOG courses with Science credit. Students without credit in BIOL 11 or BIOL 12 must use BIOL to satisfy this requirement. This requirement may be deferred until second year.

⁹ The program must contain at least 72 credits in Science courses. It must include 48 credits from courses numbered 300 or higher.

¹⁰ At least 9 credits must be chosen from outside the field of the major, i.e., outside MATH, STAT, and CPSC. Non-elective credits (including those described in footnote 8) cannot be used toward this requirement.

¹¹ Students who earn more than 30 credits in first year may reduce the number of unrestricted electives taken in later years.

¹² STAT 200 can substitute for ECON 325.

¹³ Suitable electives include MATH 302, 303, 321, 402, 403, 418, 419, 443.

COMBINED MAJOR (1429): COMPUTER SCIENCE AND MATHEMATICS
Students admitted to this program must satisfy the admission and continuation requirements for majors students in both the Department of Mathematics and the Department of Computer Science.

First Year

ENGL 100-level ¹	6
CHEM 111 ^{2,3}	0-3
CPSC 111, 121 ⁴	8
MATH 100 or 102 or 104 (or 120 or 180 or 184) ⁵	3-4
MATH 101 or 103 or 105 (or 121)	3-4
PHYS 100-level ³	6
Laboratory Requirement ⁶	0-2
ASTR, BIOL, EOSC, GEOG or PSYC ⁷	3
Electives ⁸	0-3
Total Credits⁹	32-36

Second Year

CPSC 211, 213, 221	12
MATH 200 (or 226 ¹⁰)	3
MATH 220 ¹⁰	3
MATH 221 (or 223), 215 ¹¹	6
Arts Electives	6
Electives ^{8,12}	3
Total Credits	33

Third and Fourth Years

CPSC 310, 313, 320	10
CPSC 302 or 303	3
One of CPSC 402, 403, 420, 421	3
CPSC courses numbered 300 or higher	3
CPSC courses numbered 400 or higher	3
MATH courses numbered 300 or higher	21
Arts Elective	6
Electives ^{8,12,13}	12
Total Credits	61
<i>Minimum Credits for Degree</i>	<i>126</i>

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until 2nd year.

² Students with credit for Chemistry 12 may replace CHEM 111 with CHEM 121 or with 3 credits of electives.

³ Total credits in PHYS and CHEM must include 6 from PHYS 100, CHEM 111.

⁴ Students pursuing a Co-op program are advised to add CPSC 211 to their course selections in first year.

⁵ See UBC-SFU-UVIC-UNBC Calculus Examination Certificate, p. 16.

⁶ All B.Sc. programs must include two terms of laboratory science. These may be stand-alone labs or parts of lecture-lab courses included in the other requirements listed above. Details are given at *Lower-Level Requirements*, p. 389.

⁷ Only courses eligible for credit in the Faculty of Science may be used to satisfy this requirement. Students without credit in BIOL 11 or BIOL 12 must use BIOL. This requirement may be deferred until 2nd year.

⁸ At least 9 elective credits must be chosen from outside the field of the major, i.e., outside MATH, STAT, and CPSC. Non-elective credits from First

Year, including credits described in footnote 7, cannot be used toward this requirement.

⁹ Students who earn more than 32 credits in first year may reduce the number of unrestricted electives taken in later years.

¹⁰ Students obtaining 68% or higher in MATH 226 may replace MATH 220 with 3 credits of electives.

¹¹ MATH 215 may be deferred until third year.

¹² STAT 200 is recommended.

¹³ Electives must be chosen to ensure that the program contains at least 48 credits from courses at or above the 300 level.

Honours Programs

Students planning to take a Bachelor of Science with Honours in Mathematics, or in Mathematics combined with another subject, should note the following:

- 1) To be admitted into an Honours Mathematics program, a student must obtain at least 68% in MATH 121 or average at least 80% in 6 credits of 100-level MATH courses. Honours degree candidates are expected to maintain an overall 68% average, complete all courses attempted, and complete at least 30 credits in every winter session.
- 2) The courses MATH 120, 121, 223, 226, and 227 provide a firmer foundation for advanced study than the alternatives shown in parentheses.
- 3) Students are encouraged to choose electives that result in studying another subject to substantial depth.
- 4) For students who plan to work in Mathematics, study in French, German, or Russian is recommended.

HONOURS (0166): MATHEMATICS (MATH)

First Year

ENGL 100-level ¹	6
CHEM 111 ^{2,3}	0-4
MATH 120 (or 100 or 102 or 104 or 180 or 184)	4(3)
MATH 121 (or 101 or 103 or 105)	4(3)
PHYS 107, 108 (or 100 level) ³	6
CPSC 111/211 or CPSC 111/MATH 210 ⁴	7-8
Laboratory Requirement ⁵	0-2
BIOL, ASTR, EOSC, GEOG, or PSYC ⁶	3
Electives	0-6
Total Credits⁷	31-36

Second Year

MATH 226 (or 200), 227 (or 317)	6
MATH 223 (or 221)	3
MATH 220 ⁸	3
MATH 215 ⁹	3
Arts Electives	6
Electives ¹⁰	15
Total Credits⁷	36

Third and Fourth Years

MATH 300, 320, 321, 322 ¹¹	12
MATH 412 or 422 ¹¹	3
15 credits ¹¹ from MATH 400-405, 412, 416-429, 433-440, 443, 449 ¹²	15
Mathematics courses numbered 300 or above	9

Third and Fourth Years (Continued)

Science courses numbered 300 or above ¹³	12
Arts Elective	6
Electives	9
Total Credits⁷	66
<i>Minimum Credits for Degree</i>	<i>132</i>

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² This requirement applies only to students without credit for Chemistry 12.

³ Total credits in PHYS/CHEM courses must include 6 from beyond PHYS 100, CHEM 111.

⁴ This requirement must be completed in the first two years. Note that MATH 210 may not be offered every year.

⁵ All B.Sc. programs must include two terms of laboratory science. These may be stand-alone labs or parts of lecture-lab courses included in the other requirements listed above. Details are given at *Lower-Level Requirements*, p. 389.

⁶ Only courses eligible for credit in the Faculty of Science may be used to satisfy this requirement. Students without credit in one of BIOL 11 or BIOL 12 must use BIOL. This requirement may be deferred until second year.

⁷ The program requires at least 30 credits in each Winter Session. Subject to this restriction, students who earn more than 30 credits in first year may reduce the number of unrestricted electives taken in later years.

⁸ Students obtaining 68% or higher in MATH 226 may replace MATH 220 with 3 credits of electives.

⁹ MATH 215 may be deferred until third year.

¹⁰ PHYS 206 is recommended.

¹¹ An overall 68% average is required in these 30 credits to obtain a Bachelor of Science with Honours.

¹² MATH 449 is recommended.

¹³ Recommended: PHYS 301, 304; CPSC 302, 303; STAT 460, 461.

COMBINED HONOURS: MATHEMATICS (MATH) WITH ANOTHER SUBJECT

First Year

Same as Mathematics Honours.

Second Year

Same as Mathematics Honours.

Third and Fourth Years

MATH 320, 321 ¹	6
9 credits ¹ from MATH 300, 301, 316, 322, 331	9
12 credits ¹ from MATH 400-405, 412, 416-429, 433-440, 443, 449	12
Arts Elective	6
Electives ²	33
Total Credits	66

¹ A 68% overall average is required in these 27 credits to obtain a Bachelor of Science with Honours in Mathematics.

² Including courses as specified by the other department, but not exceeding 30 credits in third and fourth year.

MICROBIOLOGY AND IMMUNOLOGY

The Department of Microbiology and Immunology (www.microbiology.ubc.ca) offers opportunities for study leading to doctoral, master's, and bachelor's degrees. For information on graduate degrees, see *Microbiology and Immunology*, p. 266, in the Faculty of Graduate Studies section.

The Department offers versatile major and Honours programs leading to the Bachelor of Science. All students take the same core courses but appropriate choices of selections allow students to develop training in diverse areas such as applied microbiology, environmental microbiology, immunology, medical microbiology, microbial physiology, molecular genetics, and virology. Enrolment in the MBIM Honours programs, and the combined CPSC/MBIM Honours programs, require a sustained, annual academic average above 75% in second, third, and fourth year of these programs.

Co-operative Education Program: Biotechnology in Microbiology and Immunology

This optional program integrates academic study with related and supervised work experience. The work placements are arranged by mutual agreement between the students and the employing organizations. Enrolment is limited. Admission is by application to the Science Co-op Office in February prior to third year (transfer students may be considered later). Selection will be based on previous academic performance and general suitability to the work environment as assessed by resumé and interview. Admissibility to the third-year Microbiology and Immunology Bachelor of Science program is prerequisite for admission. Graduation from the Co-op program requires completion of four work terms, the normal courses required for the program. Detailed information is available from the Department of Microbiology and Immunology (www.microbiology.ubc.ca) or the Co-operative Education Program Office, Room 170 Chemistry & Physics Building, The University of British Columbia, 6221 University Boulevard, Vancouver, BC, V6T 1Z1; fax 604-822-9676. Information is also available through the Co-op website (www.science-coop.ubc.ca).

Programs

MAJOR (1153): MICROBIOLOGY AND IMMUNOLOGY

First Year	
BIOL 112	3
BIOL 121, 140 ¹	5
CHEM 121, 123 (111, 113)	8
ENGL 100-level ²	6

MICB 202	3
Electives ^{5,6}	15
Total Credits ⁵	31
Third Year ⁸	
BIOL 335	3
MICB 300, 302, 322, 323	12
Third or Fourth Year ⁸	
BIOC 302 ⁹	3
MICB 324 ¹⁰	3
Additional MICB selections.	9
Another MICB selection or a selection from BIOC 402, 403, 410; BIOL 316, 334, 421; CHBE 381, MEDG 421; EOSC 475	3
Electives ⁵	21
Fourth Year ⁸	
MICB 401	3
MICB 421	3
Minimum Credits for Degree ⁸	125

- Students lacking Biology 11 or Biology 12 must take BIOL 111 before taking BIOL 112.
- ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.
- All of these courses are suitable prerequisites for later MATH courses. They differ in the expected student background and the types of examples used in the problems.
- Students require 6 credits of PHYS, including PHYS 101 in order to graduate. Students lacking Physics 12 must take PHYS 100 before taking PHYS 101, the PHYS 101 may be deferred to second year. Students with Physics 12 may take PHYS 101 as the first course in PHYS and defer the second 3 credits of PHYS until any time before they graduate. This second PHYS may be taken at any level.
- The 36 elective credits in the program must include: a) At least 12 credits numbered 300 or higher to meet the Faculty requirement for 48 credits of upper-level courses; b) At least 12 credits from the Faculty of Arts (in addition to the 6 credits of first year English); c) At least 9 credits outside the field of the major. These credits must be taken as science courses from other departments in the Faculty of Science or courses in the Faculty of Arts. The field of the major is defined as the named courses and selections in the program, all MICB and BIOL courses and all courses offered in the Faculty of Medicine for Science credit; d) At least 3 credits of either CPSC or additional MATH or STAT or BIOL 300 to meet the Faculty requirement for a program total of at least 9 credits of computational credits.
- BIOL 240 is a recommended elective.
- CHEM 201 may be substituted for CHEM 205. The combination of CHEM 203 and 204 are accepted as a substitute for CHEM 205, 233, and 235 if students have credit for CHEM 203 and 204.
- The minimum total program requirement is 125 credits. The normal course load for the program is 30 credits in each Winter Session of third or fourth year.
- BIOC 303 may be substituted for BIOC 302 by using three credits of elective space.
- Until September 2001 students were required to take MICB 409 or BIOL 334. That requirement has been replaced with MICB 324 for students entering third year on or after September 2002. The genetics courses may be taken as selections.

HONOURS (1154): MICROBIOLOGY AND IMMUNOLOGY (MBIM)

First and Second Years	
Same as for Major. ¹	65 (67)
Third Year ¹	
BIOL 335	3
MICB 300, 302, 322, 323	12
Third or Fourth Year ¹

CPSC 313	3
MICB 324	3
MICB 323 or MICB 401	3
Additional CPSC at or above 300 level	6
Electives ^{5,6,7,9}	15

Fourth Year ¹⁰	
CPSC 445	3
MICB 405	3
Additional CPSC at 400 level	3
Additional MICB at 400 level	3
<i>Minimum Credits for Degree</i>	128

¹ Students lacking Biology 11 or Biology 12 must take BIOL 111 before taking BIOL 112.

² Students intending to pursue Co-op may include CPSC 211 in the first year in order to use the CPSC model for Co-op that starts after first year. Alternatively they may use the MICB model for Co-op that starts in third year.

³ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and ENGL 121. 3 credits of first year ENGL may be deferred to second year.

⁴ Each of these courses are suitable prerequisites for any later MATH courses. They differ in the expected student background and the types of examples used in the problems.

⁵ BIOL 121 is a mandatory requirement for all advanced BIOL courses except BIOL 200, 201, 334, and 335. Students lacking Physics 12 must take PHYS 100 to meet the lower-level course requirements for a B.Sc.

⁶ Additional MATH or STAT would be beneficial. BIOL 240 is recommended. Some of the courses in the selection list are on the credit exclusion list. Only one course on the list can count for credit. Students may substitute an elective in second year and defer 3 credits of this 6-credit selection requirement to third year.

⁷ CHEM 205 is a necessary prerequisite if students intend to choose BIOC 302 or 303 as an elective in third or fourth years.

⁸ Space in MICB 322 is limited. Availability depends on the demand by the other programs. Students must complete MICB 322 to be accepted to the program.

⁹ The calculation requirements and breadth requirements of the Faculty of Science are satisfied by the combination of programs in the combined major. However, the 18 elective credits in the program must include: a) Three credits numbered 300 or higher to meet the Faculty requirement for 48 credits of upper-level courses; b) At least 12 credits from the Faculty of Arts (in addition to the 6 credits of first year English).

¹⁰ The normal course load for the program is 30 credits in one Winter Session and 31 credits in the other Winter Session of third and fourth year.

COMBINED HONOURS (1373): COMPUTER SCIENCE & MICROBIOLOGY AND IMMUNOLOGY

First Year	
BIOL 112 ¹ , 140	5
CHEM 121, 123	8
CPSC 111, 121	8

<i>Minimum Credits for Degree</i>	137

¹ Students lacking Biology 11 or Biology 12 must take BIOL 111 before taking BIOL 112.

² ENGL 112, 120, and 121 are recommended courses.

³ BIOL 121 is required for all upper-level biology courses except BIOL 200, 201, 334, and 335.

⁴ Students lacking Physics 12 must take PHYS 100 to meet the lower-level course requirements for a B.Sc. The program requires a minimum of 12 credits of Arts courses. Students with suitable PHYS and Arts credits from other sources may substitute open electives. BIOL 240 is recommended in the second year.

⁵ To continue in the program students must maintain at least 75% average in the second, third, and fourth year.

⁶ One of CHEM 235, CPSC 213, or MATH 200 can be deferred to third year.

⁷ Transfer students with credit for CHEM 203 and CHEM 204 are exempted from the requirement for CHEM 205, 233, and 235. CHEM 201 may be substituted for CHEM 205.

⁸ Typical course loads are 15 to 18 credits per term. To be in an Honours Program students must complete a minimum of 30 credits in each Winter Session.

⁹ Space in MICB 322, 323 is limited. Students must complete MICB 322 in third year to stay in the program.

¹⁰ We recommend that at least one of the remaining courses be taken as part of the 6 credits of CPSC courses numbered 300 or above.

¹¹ The thesis topic must be related to Bioinformatics. Students intending to take CPSC 449 should take CPSC 349 in their third year.

PHARMACOLOGY

The Department of Anesthesiology, Pharmacology, and Therapeutics (www.pharmacology.ubc.ca) offers opportunities for study leading to doctoral, master's, and bachelor's degrees. For information on graduate degrees, see *Pharmacology*, p. 272, in the Graduate Studies section. For further information on other courses within the department, see the *Faculty of Medicine*, p. 321. All students who intend to take the B.Sc. in Pharmacology must consult the undergraduate advisor.

Enrolment in PCTH 300 is restricted to students in the third year of the various Pharmacology programs. Students who wish to enter Pharmacology programs need to have completed all prerequisites and obtained an average of greater than 75% in each of their first and second years.

The aim of the programs is to produce a graduate broadly trained in all aspects of pharmacology. The programs emphasize the experimental and laboratory aspects of pharmacology and students learn both whole animal and isolated tissue techniques as well as biochemical and chemical procedures. Skills that are stressed include the ability to search for information, design appropriate experiments, carry out experiments individually and as a member of a team, analyse data, and communicate and write effectively.

Co-operative Education Program

The Department offers an optional five-year Co-operative Education program (Honours and Major). In addition to classical laboratory-based university instruction, the student will receive 12 to 16 months of work placement (i.e., three to four work terms) in at least two different research areas supervised by scientists in a pharmaceutical company or equivalent. The work placements are arranged by mutual agreement among students, faculty, and employing organizations. Faculty advisors will visit students at their place of work and provide advice on technical reports. Work placement starts in May or September after the completion of third year and continues through fourth year.

Students in the Honours program will take additional credits in second, third, and fifth years and will conduct a laboratory-based research project for six months (September to March) during fifth year within the Department and present an Honours thesis (PCTH 449). Students participating in the Co-op program register for PCTH 398, 399, and 498, in addition to the normal academic requirements, and pay the Co-op Education program fee for each course (see *Program and Course Fees*, p. 28, in this Calendar). PCTH 499 is optional for stu-

dents who wish to have four work placements.

Admission

Students must apply to the Department for admission to the B.Sc. and B.Sc. Co-op program no later than March 31 prior to third year. Selection of students will be based on academic performance and suitability for pharmacological research. Detailed information on the program may be obtained from the Department of Anesthesiology, Pharmacology and Therapeutics, The University of British Columbia, 2176 Health Sciences Mall, Vancouver, BC, V6T 1Z3.

Programs

FIRST-YEAR REQUIREMENTS

First Year	
ENGL 100 level ¹	6
BIOL 112, 121 ² , 140	7
CHEM 121, 123 (111, 113)	8
MATH 100 or 102 or 104 (or 120 or 180 or 184)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
PHYS ³	6
Total Credits	33

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² Students lacking BIOL 12 must take BIOL 111 before taking BIOL 121.

³ At least 3 credits of PHYS in addition to PHYS 101.

MAJOR (0311): PHARMACOLOGY (PCTH)

Second Year	
BIOL 200, 201	6
CHEM 201 (or 205)	3
CHEM 211	4
CHEM 233, 235 ¹	4
MICB 202	3
BIOL 300 (or STAT 200)	3
Electives ^{2,4}	9
Total Credits	32

Third and Fourth Years

BIOC 301 ³	3
BIOC 302, (303)	3-6
PCTH 300, 302, 400, 404	18
PHYL 301	6
Electives ^{2,4}	30-27
Total Credits	60

Minimum Credits for Degree 125

¹ The combination of CHEM 203 and 204 are accepted as a substitute for CHEM 233 and 235 if students have credit for CHEM 203 and 204.

² Electives include: a) Sufficient courses numbered 300 or higher in Arts or Sciences to meet the Faculty requirements for 48 credits of upper-level courses; b) At least 12 credits from the Faculty of Arts (in addition to ENGL); c) At least 9 credits must be Arts or Science electives outside field of the Major. The Field of the Major is defined as most, BIOC, BIOL, PCTH, and PHYL courses, and most courses offered for Science credit by departments in the Faculty of Medicine.

³ Must be taken in third year.

⁴ Suggested electives: ANAT 390, 391; ASTR 101,

102; BIOC 410; BIOL 331, 334, 335, 442; CPSC 122, 128 or 124, 126; EOSC 110, 120, 326, 370; MEDG 410, 419, 420; MICB 302, 403, 405; PATH 375; PCTH 448; PHIL 120, 125; PHYL 422, 423, 424, 426; PHYS 330, 405; PSYC 100, 263.

HONOURS (0019): PHARMACOLOGY (PCTH)

Second Year	
BIOL 200, 201	6
CHEM 201 (or 205)	3
CHEM 211	4
CHEM 233, 235 ¹	4
MICB 202	3

PHYL 422 or 423 or 424	3
Electives ^{3,5,6}	21-15
Total Credits	66

Minimum Credits for Degree 136

¹ The combination of CHEM 203 and 204 are accepted as a substitute for CHEM 233 and 235 if students have credit for CHEM 203 and 204.

² Electives include: a) Sufficient courses numbered 300 or higher in Arts or Science to meet the Faculty requirement for 48 credits of upper-level courses; b) At least 12 credits from the Faculty of Arts (in addition to ENGL).

³ Suggested electives: ANAT 390, 391; ASTR 101, 102; BIOC 410; BIOL 331, 334, 335, 442; CPSC 122, 128 or 124, 126; EOSC 110, 120, 326, 370; MEDG 410, 419, 420; MICB 302, 403, 405; PATH 375; PCTH 448; PHIL 120, 125; PHYL 422, 423, 424, 426; PHYS 405; PSYC 100, 263.

⁴ Must be taken in third year.

⁵ Students in the Co-op program can replace PHYL 303 with a 3-credit Science elective.

⁶ Electives include: a) Sufficient courses numbered 300 or higher in Arts or Sciences to meet the Faculty requirements for 48 credits of upper-level courses; b) At least 12 credits from the Faculty of Arts (in addition to ENGL); c) At least 9 credits must be Science electives outside field of the Major. The Field of the Major is defined as most, BIOC, BIOL, PCTH, and PHYL courses, and most courses offered for Science credit by departments in the Faculty of Medicine.

PHYSICS

The Department of Physics and Astronomy (www.physics.ubc.ca) offers opportunities for study leading to bachelor's, master's, and doctoral degrees. For information on graduate degrees, see *Physics*, p. 274, in the Graduate Studies section.

Students may select their electives so as to obtain a concentration in an area of their interest. See the *Physics and Astronomy Program Guide* (www.physics.ubc.ca/undergrad/programs.php) for an outline of appropriate courses and other information. Students entering second-year Physics or Astronomy programs are encouraged (but not required) to obtain program approval before registering.

Any second-year student who meets program requirements may simply register in either Honours or Major using the appropriate program descriptions. Continuing third- and fourth-year Physics or Astronomy students making satisfactory progress do not require program approval. Students wishing to transfer into Physics or Astronomy in third year must contact the Department to obtain program approval.

Students in the General Science program are invited to consult a departmental advisor concerning appropriate courses.

Courses Primarily for First-Year Science Students

Physics 11 (BC secondary school) or equivalent is a prerequisite for all students entering the Faculty of Science. Students lacking Physics 11, but wishing to enter, should submit a special appeal to Enrolment Services with their application to take PHYS 100.

Science students with Physics 11, but not Physics 12 are required to take 3 credits of Physics. Normally this requirement is met by taking PHYS 100. PHYS 101, 102 or 107, 108, 109 constitute a standard first-year Physics program.

PHYS 100 is intended primarily for students who have completed only BC secondary school Physics 11 or its equivalent. Credit will not be given to students with credit for Physics 12.

PHYS 101 normally requires Physics 12 or PHYS 100. Students with only Physics 11 but with a good mathematics background may with permission from an advisor skip PHYS 100 and enrol in PHYS 101. They will still need to take six credits of Physics. Credit will be given for only one of PHYS 101, 107.

PHYS 107 is open to students who have obtained an 'A' in Physics 12 and Mathematics 12, and who are particularly interested in physical science and/or its application to other fields or disciplines.

Students planning to go into Physics or Applied Science (and some other programs) are required to take PHYS 102, or PHYS 108 plus PHYS 109, in addition to PHYS 101 and 107. PHYS 102 has PHYS 101 or 107 as prerequisite, while PHYS 108 requires either PHYS 107, or PHYS 101 with an 'A' standing. Admission into second-year Honours Physics generally requires PHYS 107, 108, 109, and a clear first-year pass with either overall second-class standing in 30 credits or at least 68% in each of PHYS 107, 108, 109, and MATH 100, 101 (120, 121). Students who were not eligible for PHYS 107, 108 may substitute PHYS 101, 102 provided all other minimum requirements were also met. Credit will only be given for one of PHYS 102, 108. Science One satisfies the entrance requirement for all physics programs.

Non-science students without Physics 11 may take PHYS 100 in their second or later year.

Courses for Students Not Specializing in Physics

PHYS 330 (3) is primarily for students in the Faculty of Science who are not specializing in Physics.

PHYS 340 (3), 341 (3), and 343 (3) are for students not in the Faculty of Science. PHYS 317 (3) and PHYS 318 (3) are recommended for General Science, pre-architecture, and education students.

Co-operative Education Program

Co-operative education is a process of education which integrates academic study with related and supervised work experience in co-operating employer organizations.

A Co-operative Education program is available for students in Physics. The program is intended to help prepare interested and qualified students for research careers in industry with twenty months of work placement supervised by practising professionals. Faculty advisors also visit students at their place of work and provide advice on technical reports required of all students in the program.

To be eligible, students must be admissible into the second-year Physics Bachelor of Science program with second-class standing. Admission is by application to the Co-op Office in April prior to second year (transfer students may be considered later). Selection of students will be based on academic performance and general suitability to the work environment as determined by resume and interview. The total enrolment will be subject to the availability of appropriate work placements and faculty advisors. The work placements are arranged by mutual agreement between students and employing organizations. Participating students register for PHYS 298, 299, 399, 498, or 499 as appropriate, and pay the co-operative education program fee per course (see *Program and Course Fees*, p. 28, in this Calendar).

Graduation in the program requires a student to complete each of PHYS 298, 299, 399, 498 and 499, in addition to the normal academic requirements. Students will have each satisfactorily completed course noted on their academic record.

Detailed information on the program may be obtained from the Department of Physics or from the Co-operative Education Program Office, Room 309 Hennings Building, The University of British Columbia, 6224 Agricultural Road, Vancouver, BC, V6T 1Z1; fax 604-822-9676. Information is also available through the Co-op website (www.sciencecoop.ubc.ca).

Programs

MAJOR (0524): PHYSICS (PHYS)

First Year

ENGL 100-level ¹	6
CHEM 121 (111)	4
MATH 100 level ²	6-8
PHYS 107, 108, 109 (101, 102) ³	7(6)
Electives ⁴	6-8

MATH 215, 221	6
PHYS 200 ⁷ , 216 ⁷	6
PHYS 209	3
Electives ⁴	12
Total Credits	30

Third Year⁸	
MATH 317 ⁶	3
PHYS 309 or 319	3
PHYS 312	3
PHYS 313, 412 ⁹	6
PHYS/ASTR Elective ¹⁰	3
Electives ^{4,7}	12
Total Credits	30

Fourth Year¹¹	
PHYS 301 or 354	3
PHYS 308	3
PHYS 349, 409 or 420	3
PHYS/ASTR Electives ¹⁰	6
Electives ⁴	15
Total Credits	30

Minimum Credits for Degree 120

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or ENGL 121. Three credits of first-year English may be deferred to second year.

² One of MATH 100, 102, 104, 180, 184, or 120 and one of MATH 101, 103, 105, or 121.

³ Students without Physics 12 must normally take PHYS 100 prior to PHYS 101 or 107, such students should seek academic advice before registering. Qualified students are encouraged to take PHYS 107/108/109.

⁴ The elective credits taken throughout the program must include at least 12 credits in the Faculty of Arts (in addition to the 6 credits of 100-level English) and a further 9 total elective credits in Arts or Science outside the field of the Major (Physics, Astronomy, Mathematics, are therefore excluded). Students without Biology 11 or 12 must take 3 credits of 100-level BIOL. For students with Biology 11 or 12 at least 3 credits must be a science course, ASTR, BIOL, EOSC, or Science credit GEOG, or PSYC. Up to 12 elective credits may be taken in any courses in Arts or Science, including the field of the Major. Enough elective credits in Arts of Science courses numbered 300 or higher must be taken so that the program's total number of Arts and Science credits at the 300-level or higher is at least 48, with at least 30 of these credits being in Science. A Computer Science course numbered 100 or higher is recommended. Students interested in senior chemistry courses or who are planning to enter a career in teaching are reminded that they should take a second course of introductory chemistry.

⁵ Admission requirement: overall average of 60% in first-year Physics or permission of the Department Head.

⁶ Students with sufficiently high grades in first-year MATH may take MATH 217 and 2 credits of electives instead of MATH 200 and MATH 317.

⁷ Students may opt to take PHYS 200 or PHYS 216 in third year, in exchange for an additional 3 credits of electives in second year. Qualifying students may replace PHYS 216 with PHYS 206.

⁸ Consultation with a Physics departmental advisor is recommended before entering third and fourth year.

⁹ PHYS 304 may be taken in place of, or in addition to, PHYS 412.

¹⁰ To be chosen from ASTR or PHYS courses 300-level and above. Some courses intended for Honours students require approval from appropriate instructor(s).

¹¹ PHYS 203 or the combination CHEM 201 and CHEM 304 may replace PHYS 313.

PHYS 409	3
Electives ^{4, 14}	18
Total Credits	33

Minimum Credits for Degree 133

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or ENGL 121. 3 credits of first-year English may be deferred until second year.

² First-year Physics, Biology, Chemistry, and Mathematics can be replaced by Science One (25 credits).

³ Students without Physics 12 should consult departmental advisor as early as practical. Normally they must take PHYS 100 prior to PHYS 101 or 107.

⁴ The elective credits taken throughout the program must include at least 12 credits in the Faculty of Arts (in addition to the 6 credits of 100-level English) and 6 credits from the Faculty of Science. Students without Biology 11 or Biology 12 must take 3 credits of 100-level BIOL. For students with Biology 11 or 12 at least 3 credits must be a science course, ASTR, BIOL, EOSC, or Science credit GEOG, or PSYC. At least one computer science course recommended. Students interested in senior chemistry courses or who are planning to enter a career in teaching are reminded that they

should take a second course of introductory chemistry. In first year, 2 of the elective credits can be used to take the 4 credit math courses MATH 120 and 121.

⁵ Admission Requirements: A clear pass from first year with an overall standing of at least 68% in each first-year Physics and Mathematics course. An average standing of at least 68% must be obtained in each year to remain in the Honours program.

⁶ Students who are interested in taking MATH 320, 321 later in their program are advised to substitute MATH 226, 227 for MATH 217. MATH 200, 317 can also be substituted for MATH 217. Either substitution would require using 3 credits of Science elective.

⁷ MATH 221 or MATH 152 can be substituted for MATH 223 under exceptional circumstances. MATH 223 can be taken in first year.

⁸ Co-op students should replace PHYS 209 with PHYS 259 and make up an additional credit in Year 3 or Year 4 by taking PHYS 389.

⁹ PHYS 308 can be deferred to the fourth year or replaced by PHYS 458 in fourth year.

¹⁰ Students who are interested in mathematical physics are encouraged to take MATH 320 and MATH 321 as electives. At least 3 credits must be a 300- or 400-level Physics or Astronomy course.

¹¹ With permission of the head of the department, another course may replace MATH 400.

¹² Co-op students may substitute other Physics courses with the permission of the head of the department.

¹³ PHYS 403 may be replaced by PHYS 455.

¹⁴ A minimum of 6 elective credits must be at least 400-level Physics or Astronomy courses. Suggested fourth-year electives are ASTR 402, 403, 404; EECE 480; MATH 345, 401, 402, 405, 418, 420, 450; PHYS 400, 405, 407, 410, 437, 447, 473, 474. Qualified students are encouraged to take 500-level Physics courses for which they must have permission of the Faculty of Science and the Dean of the Faculty of Graduate Studies.

Minimum Credits for Degree 134

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² First-year Physics, Biology, Chemistry, and Mathematics can be replaced by Science One (25 credits).

³ Students without Physics 12 should consult departmental advisor as early as practical. Normally they must take PHYS 100 prior to PHYS 101 or 107.

⁴ BIOL 112 is the preferred prerequisite for BIOL 200. Students in Biophysics program may substitute BIOL 112 with BIOL 121. Students without Biology 11 and 12 should consult departmental advisor as early as practical. Normally they must take BIOL 111 prior to BIOL 112 or 121.

⁵ The elective credits taken throughout the program must include at least 12 credits in the Faculty of Arts (in addition to the 6 credits of 100-level English) and 6 credits from the Faculty of Science.

⁶ Admission Requirements: A clear pass from first year with an overall standing of at least 68% in each first-year Physics and Mathematics course. An average standing of at least 68% must be obtained in each year to remain in the Honours program.

⁷ Students planning to take upper-level Chemistry courses should select CHEM 201. Students entering the program prior to 2002 take CHEM 231, 323(6) rather than CHEM 233, 235(4).

⁸ PHYS 206 may be postponed to third year.

⁹ BIOL 240 is the laboratory associated with BIOL 200/201. It is not required, but students in biophysics program are encouraged to take the lab.

¹⁰ MATH 200 plus MATH 317 can replace MATH 217.

¹¹ Using 3 credits of Bio-science electives students may replace BIOC 302 by BIOC 303(6).

¹² See *Bio-Science Electives*, p. 425.

Bio-Science Electives

Of the 18 credits of bio-sciences in the third and fourth years, at least 3 credits must include a laboratory course: BIOC 301, BIOL 337, BIOL 350, BIOL 351, BIOL 352, BIOL 353, BIOL 437, MICB 322, MICB 323 are recommended. The electives should concentrate mainly on one of the following broad categories:

- 1) Molecular and Cell Biology;
- 2) Microbiology (Biology on the level of organisms); or
- 3) Applied Biology (mainly medical applications).

The student's list of electives must be approved by a Physics advisor, who will direct the student to the appropriate Life Science advisors. The program should give the student good working knowledge of one sub-field in the biological sci-

ences. Most of such electives have prerequisites; early consultation with an advisor is, therefore, recommended.

The following is a list of suggested Bio-Science electives:

- Anatomy: ANAT 390, 391
- Biochemistry: BIOC 301, 303, 402, 403, 410
- Biology: BIOL 301, 303, 320, 325, 327, 330, 331, 334, 335, 336, 337, 341, 350, 351, 352, 353, 355, 408, 414, 415, 425, 430, 433, 434, 437, 455, 458, 463, 464
- Chemistry: CHEM 304, 305, 405
- Mathematics: MATH 361
- Microbiology: MICB 202, 321, 324, 409
- Physiology: PHYL 301, 426
- Physics: PHYS 404, 405, 437

HONOURS (0009): PHYSICS AND ASTRONOMY (PHYS, ASTR)

First Year

ENGL 100-level ¹	6
CHEM 121 (111) ²	4
MATH 120 (or 100 or 102 or 104 or 180 or 184) ²	4(3)
MATH 121 (or 101 or 103 or 105) ²	4(3)
PHYS 107, 108, 109 (101, 102) ^{2,3}	6-7
Electives ^{2,4}	8

ASTR 405 or PHYS 409	3
ASTR 449 or PHYS 449	6
PHYS 403, 402	6
Electives ^{7,8}	12
Total Credits	33

Minimum Credits for Degree 132

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² First-year Physics, Biology, Chemistry, and Mathematics can be replaced by Science One (25 credits).

³ Students without Physics 12 should consult a departmental advisor as early as practical. Normally they must take PHYS 100 prior to PHYS 101 or 107.

- ⁴ The elective credits taken throughout the program must include at least 12 credits in the Faculty of Arts (in addition to the 6 credits of 100-level English) and 6 credits from the Faculty of Science. Within the first 60 credits students without Biology 11 or Biology 12 must take 3 credits of 100-level BIOL. At least one Computer Science course is recommended. Students interested in senior chemistry courses or who are planning to enter a career in teaching are reminded that they should take a second course of introductory chemistry. In first year, 2 of the elective credits can be used to take the 4 credit math courses MATH 120 and 121.
- ⁵ Students who are interested in taking MATH 320, 321 are advised to substitute MATH 226, 227 for MATH 217. MATH 200, MATH 317 can also be substituted for MATH 217. Either substitution would require using 3 credits of Science elective for MATH 227 or MATH 317.
- ⁶ MATH 221 or MATH 152 can be substituted for MATH 223 under exceptional circumstances. MATH 223 can be taken in first year.
- ⁷ At least one Computer Science course is recommended. Of the elective credits available throughout the program, 12 credits must be in the Faculty of Arts. 3 of these credits must be upper level Arts or Science.
- ⁸ ASTR 403 and PHYS 407 are recommended. See Honours (0344): Physics (PHYS) table above for a suggested list of fourth-year electives. MATH 400 is recommended.

COMBINED HONOURS (0517):

Total Credits for degree	66
Minimum Credits for Degree	135

- ¹ Proposed combinations require written approval of both departments. Some combinations are not possible.

- ² ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or ENGL 121. 3 credits of first-year English may be deferred to second year.
- ³ Students without Physics 12 must normally take PHYS 100 before 101. Qualified students are encouraged to take PHYS 107/108/109.
- ⁴ Other subject credits must be chosen in consultation with the advisor for the other subject.
- ⁵ Students without Biology 11 or 12 must take 3 credits of 100-level BIOL. Other students must take 3 credits of electives in BIOL, EOOSC, ASTR, GEOG that has Science designated credit or PSYC that has Science designated credit. CHEM 123 and CPSC courses are also recommended.
- ⁶ MATH 217 can be replaced by MATH 226 and 227 or MATH 200 and 317.
- ⁷ If the Honours thesis (449) is chosen from the other discipline replace PHYS 449(6) by PHYS 409(3) and one of PHYS 401 or PHYS 403.
- ⁸ The following courses are recommended: CPSC 302, PHYS 400, 407, 410, 473, 474; MATH 301, 318, 400.

COMBINED HONOURS PROGRAM IN PHYSICS AND MATHEMATICS

- ¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

- ² First-year Physics, Biology, Chemistry, and Mathematics can be replaced by Science One (25 credits).
- ³ Students without Physics 12 should consult a departmental adviser as early as practical. Normally they must take PHYS 100 prior to PHYS 101 or 107.
- ⁴ The elective credits taken throughout the program must include at least 12 credits in the Faculty of Arts (in addition to the 6 credits of 100-level English) and 6 credits from the Faculty of Science. Students without Biology 11 or Biology 12 must take 3 credits of 100-level BIOL. For students with Biology 11 or 12 at least 3 credits must be a Science course, ASTR, BIOL, EOSC, or Science credit GEOG, or PSYC. At least one Computer Science course is recommended. Students interested in senior chemistry courses or who are planning to enter a career in teaching are reminded that they should take a second course of introductory chemistry. In first year, 2 of the elective credits can be used to take the 4 credit math courses MATH 120 and 121.
- ⁵ MATH 200 and MATH 317 with an average of 80% or better may be substituted for MATH 226, 227. Math 223 may be taken in the first year.
- ⁶ PHYS 313 with 80% or better may be substituted for PHYS 203.
- ⁷ PHYS 206 may be postponed to third year.

PHYSIOLOGY

The Department of Cellular and Physiological Sciences (www.physiology.ubc.ca) offers opportunities for study leading to doctoral, master's, and bachelor's degrees. For information on graduate degrees, see *Physiology*, p. 275, in the Faculty of Graduate Studies section. For further information on other courses within the Department, see the *Faculty of Medicine*, p. 321.

Completion of first year program requirements and the second year organic chemistry requirement are prerequisites to all courses in Physiology.

Enrolment in PHYL 303 is restricted to Physiology and Pharmacology Honours students. First preference for entry into third Honours year will be given to those students who have completed all prerequisites and who have achieved a cumulative First class standing for their first- and second-year required courses, including First class marks in the required biology and chemistry courses, and who have completed at least 33 credits in the Winter Session of second year. Second preference will be given to those who have a cumulative average of at least 75% in first and second year, First class marks in the required biology and chemistry courses and who meet the 33-credit criterion (above). Students who meet the 75% and 33 credit criteria, but do not have a First class average, or those who do have a First class record, but do not meet the 33-credit criterion, must consult a Physiology advisor. Students may register provisionally, but could be de-registered by the department. Science requirements state that permission of the department head is required to enter each year of an Honours program, or to interrupt such a program.

Students should note that required courses must be taken in the year in which they appear in the program (e.g., BIOC 301 and 302 will be taken in the third year of a student's program, MATH 200 in the second year, etc.). Permission of the Department of Cellular and Physiological

Sciences is required to alter the progression through the program.

For students who are not in the Physiology Honours program, admission to PHYL 422, 423, 424, or 426 requires a cumulative average of 75% over at least 90 credits attempted in the first 3 years of a student's program and a minimum mark of 75% in PHYL 301 or its equivalent, or the consent of the head of the department

Students wishing to undertake directed studies at the undergraduate (PHYL 448) or graduate (PHYL 548) level must seek departmental approval prior to registration.

*Minimum Credits for Degree*⁸ 137

¹ ENGL 112 recommended. Qualified students are encouraged to consider ENGL 120 and/or 121.

² Students lacking Biology 12 must take BIOL 111 before taking BIOL 121.

³ Student must take 3 credits of PHYS in addition to PHYS 101.

⁴ At least 12 credits must be from the Faculty of Arts in addition to ENGL.

⁵ Sufficient courses numbered 300 or higher in Arts or Science to meet Faculty requirements for upper-level courses. Suggested electives: ANAT 390, 391; ASTR 101, 102; BIOL 331, 334, 335, 442; MICB 302, 402; PCTH 305; CPSC 122, 128, or 124 or 126; PSYC 100, 201; PHIL 120, 125.

⁶ Students should note that they may obtain credit

for only one of the introductory courses in Statistics listed under *Credit Exclusion Lists*, p. 394.

⁷ Students will normally be required to take PHYL 430 and 449 in the same Winter Session.

⁸ This program requires a minimum of 137 credits for graduation.

PSYCHOLOGY

The Department of Psychology (www.psych.ubc.ca) offers opportunity for study leading to bachelor's, master's, and doctoral degrees. For information on the Bachelor of Arts, see *Psychology*, p. 147, under the Bachelor of Arts in the Faculty of Arts section. For information on graduate degrees, see *Psychology*, p. 276, in the Faculty of Graduate Studies section.

Students wanting to enter the Major or Honours program must apply online at the Psychology website (www.psych.ubc.ca/undergrad.htm) for admission to the B.Sc. PSYC Major Program.

Students registered in Psychology programs must take 15 credits of Faculty of Arts courses other than Psychology. Science electives may not be Psychology courses. In addition to PSYC 348 and 448, all Psychology courses numbered 60 or higher in the last two digits have Science credit.

Programs

Total Credits	30
<i>Minimum Credits for Degree</i>	<i>122</i>

- PSYC 100 is required in first year if student has credit for Biology 12 and Chemistry 12.
- Students with Biology 12 may substitute 3 credits of electives for BIOL 111.
- Students without Physics 12 must take PHYS 100 before taking PHYS 101.
- Students may substitute PSYC 101 and 102 for PSYC 100.
- The preferred prerequisite for this course is BIOL 112, but Psychology Majors students are allowed to register without it.
- General electives may be Psychology courses; Arts electives and Science electives may not.
- At least 24 credits of electives (including Arts electives and Arts Psychology electives) must be numbered 300 or above. At least 6 of these must be non-Psychology courses in the Faculty of Science. 9 credits of electives must be taken outside of the field of the major. Field of the major is defined as any course in Psychology, Biology, Physiology, Biochemistry, or Pharmacology. 12 credits of electives may be taken in any Faculty.
- PSYC 366, together with 6 credits of first year Math, satisfies the faculty computation requirement.

HONOURS (0139): PSYCHOLOGY (PSYC)

Admission to the Honours program requires at least a 76% average in second year, including at least 80% in PSYC 260. Graduation requires an average of at least 80% in 12 credits of Psychology courses numbered 300 or above.

In addition to meeting the specific department course requirements, Honours candidates are required to complete all courses attempted, including at least 30 credits in each winter session, and to maintain a minimum overall 68% average in each academic session.

At least 6 of these must be non-Psychology courses in the Faculty of Science. 9 credits of electives must be taken outside of the field of the major. Field of the major is defined as any course in Psychology, Biology, Physiology, Biochemistry, or Pharmacology. 12 credits of electives may be taken in any Faculty.
- PSYC 366, together with 6 credits of first year Math, satisfies the faculty computation requirement.

Faculty of Science Departmental Guidelines for the Minor B.Sc., Science Minor in Psychology

For a PSYC Science minor, students are required to take PSYC 100, or PSYC 101 and PSYC 102 and 18 or more credits of 300- or 400-level Psychology courses numbered 60 or higher in the last two digits.

B.Sc., Arts Minor in Psychology

For a PSYC Arts minor, students are required in First Year to take PSYC 100, or PSYC 101 and PSYC 102, in Second Year, PSYC 217 and 218, in Third and Fourth Years, at least 18 credits of 300- or 400-level Psychology courses, excluding 340, 348, 440, or 448.

B.Sc. Major in Cognitive Systems

The Cognitive Systems (COGS) Major program (B.Sc. or B.A.) provides an opportunity to concentrate on interdisciplinary studies of mental functioning, with a specialization in one of the following 3 streams: A) Cognition and the Brain, B) Language, C) Computational Intelligence and Design. Faculty of Science undergraduate majors can enrol in either the Cognition and Brain stream (whose supervisory department is Psychology), or Computational

Intelligence and Design (whose supervisory department is Computer Science). Students registered in the Faculty of Arts can enrol in either the Cognition and Brain stream (Psychology) or the Language Stream (whose supervisory department is Linguistics). Although the subject matter of Cognitive Systems is inherently interdisciplinary, the aim is to ensure that graduates of the program possess the background competence to be able to enter general graduate programs in one of the supervisory disciplines or in cognitive science itself. All students in the program are required to take a team-taught interdisciplinary course (COGS 200), background courses in both Computer Science and Philosophy, and a "capstone" fourth-year research-oriented course (COGS 400).

Admission to the Cognitive Systems program, normally at the end of the first or second year, is based on academic performance. Admission requires a minimum overall average of 68% in the preceding two years as well as a minimum grade of 68% in COGS 200; however, achievement of this minimum average does not guarantee acceptance into the program. Once admitted to the program, students must maintain at least a 68% yearly average for continuation. For additional program and admission information about the B.Sc. streams in Cognitive Science contact either the Department of Psychology or the Department of Computer Science. The web pages for these departments contain information regarding the COGS program and admissions to it.

MAJOR COGNITIVE SYSTEMS (1225): COGNITION AND BRAIN

First Year¹

CPSC 111, 121	8
MATH 100 or 102 or 104 (or 120 or 180 or 184)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
PHYS 101 ² or 107 ⁴	3
CHEM 113 ³ or 121	4
ENGL 100-Level	6
PSYC 100 ⁵	6
Total Credits	33 (35)

Second Year

COGS 200	3
PHIL 220	3
Arts Electives	6
Electives ^{6,7,8,9,10}	18
Total Credits	30

Third and Fourth Years

COGS 300	3
COGS 401, 402	6
PHIL 441, 451	6
PSYC 365	3
Arts Electives	6
12 credits from:	12
PSYC 304 ¹¹ , 309, 333, 334, 336, 337, 360 ¹¹ , 361, 363, 364, 367, 368, 412, 461, 463, 465	
BIOL 353 ¹¹ , 455, 458	
6 credits from:	6

Third and Fourth Years (Continued)

PHIL 320, 340, 440, 452, 461	
CPSC 303, 312, 322, 422	
LING 300, 316, 319, 427	
Electives ^{7,8,9,10,12}	18
Total Credits	60
<i>Minimum Credits for Degree</i>	<i>123</i>

- Students without Biology 11 or Biology 12 must take 3 credits of 100-level biology.
- Students without credit for Physics 12 must complete PHYS 100 in addition.
- Students without credit for Chemistry 12 must complete CHEM 111 in addition. These students may delay 3 credits of CHEM or PHYS until second year.
- Students who choose to take PHYS 107 need to take PHYS 108 or other lab courses to complete the Laboratory Science requirement.
- Students attempting to become a COGS major must take either PSYC 100 or PSYC 101,102 as early in their program as possible, taking PSYC 100 in the first year if possible. If more physics, biology or chemistry than listed must be taken, PSYC 101 or 102 can be taken in first year and the other in second year, or PSYC 100 must be taken in the second year.
- PSYC 217, 218 are highly recommended. PSYC 205 and 263 should also be considered.
- Students attempting to become a COGS major should choose electives to obtain prerequisites to appropriate third and fourth year courses.
- At least 72 credits of Science courses are required to qualify for the B.Sc. degree.
- At least 9 credits of courses outside field of major field are required to qualify for the B.Sc. degree; these 9 credits exclude PSYC, PHIL, CPSC courses.
- At least 30 credits of 300 or above Science courses and at least 48 credits of 300 or above courses are required for the B.Sc. degree.
- Credit will not be granted for more than one of PSYC 304, PSYC 360, and BIOL 353.
- Some of these may be selected from the lists of courses from which required courses are taken.

STATISTICS

The Department of Statistics (www.stat.ubc.ca) offers programs of study leading to bachelor's, master's, and doctoral degrees. For information on graduate degrees, see *Statistics*, p. 283, in the Faculty of Graduate Studies section.

Before registering for each of the second, third, and fourth years, every student who intends to commence or continue any of the programs listed below should consult an advisor in the Department.

The Statistical Consulting and Research Laboratory, operated by the Department of Statistics, is intended to provide statistical advice to the University's faculty and, with the approval of their supervisors, to graduate students working on research problems. In providing this service to the University, the Department hopes to foster interdisciplinary collaboration in research projects involving statistics. The Statistical Consulting and Research Laboratory also acts as a statistical research support unit and provides students in Statistics with opportunities for actively learning to apply statistics.

Major Programs

MAJOR (0562): STATISTICS (STAT)

First Year	
ENGL 100-level ¹	6
CHEM 111 and 113, or 121	8(4)
CPSC 111/211 or CPSC 111/MATH 210 ²	7(8)
MATH 100 or 102 or 104 (or 120 or 180 or 184)	3(4)
MATH 101 or 103 or 105 (or 121)	3(4)
PHYS 101 or 107 ³	3
Electives ^{3,4,5}	3(6)
Total Credits	32(34)

Second Year

MATH 200, 220, 221	9
STAT 200	3
STAT/MATH 302	3
Arts Elective	6
Electives ^{4,5}	9
Total Credits	30

Third and Fourth Years

In third year: STAT 305, 306 and MATH 307	9
In fourth year: STAT 404	3
MATH 303	3
Statistics courses numbered 300 or above	6
Statistics courses numbered 400 or above	6
Mathematics courses numbered 300 or above	3
Thematic concentration courses numbered 300 or above ⁶	9
Arts Elective	6
Electives ⁵	15
Total Credits	60
<i>Minimum Credits for Degree</i>	<i>122</i>

- ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.
- This requirement must be completed in the first two years. Note that MATH 210 may not be offered every year.
- Students without Physics 12 must replace the elective with PHYS 100 before taking PHYS 101. If students choose CHEM 121 for 4 credits then they must have 6 credits of electives.
- Students without Biology 11 or 12 must take 3 credits of 100-level BIOL. Students with Biology 12 must take at least 3 science credits labeled AS-TR, BIOL, EOSC, Science credit GEOG or PSYC. These requirements must be fulfilled before end of second year.
- For requirements, see 'Electives' below.
- These courses should be chosen from an area in which statistical ideas are relevant, and some of the courses should have clear statistical or probabilistic content. A student's choice of thematic concentration courses must be approved by a departmental adviser. More information about the thematic concentration, including some examples of course choices, can be found through the Statistics Department website (www.stat.ubc.ca).

ELECTIVES

Electives must include the following:

- at most 12 elective and thematic concentration credits may be in faculties other than Science and Arts;
- at least 6 elective credits must be for courses numbered 300 or above;

- at least 9 elective and thematic concentration credits must be in Science electives outside the field of the Major¹ or in Arts; and
- a sufficient number of elective and thematic concentration credits must be in Science, to fulfil the Faculty requirement that at least 72 of the 120 total credits for a B.Sc. degree be in Science courses.

¹ The field of the Major for Statistics is defined as all Statistics, Mathematics, and Computer Science courses.

Major in Mathematical Sciences

See *Mathematics*, p. 419.

B.Sc. Combined Major in Statistics and Economics

Admission to the program is subject to the admission restrictions and application process that currently pertains to the Major in Economics. For the *B.A. Combined Major in Economics and Statistics*, p. 132, see the listing under the Faculty of Arts.

COMBINED MAJOR (1330): STATISTICS AND ECONOMICS

First Year	
ENGL 100-level ¹	6
CPSC 111/211 or CPSC 111/MATH 210 ²	7(8)
ECON 101, 102	6
MATH 104 (or one of 100, 102, 120, 180, 184)	3 (4)
MATH 105 (or one of 101, 103, 121)	3 (4)
Science Requirements ³	6
Total Credits	31(34)

Second Year

ECON 301 (or 304 or 201 or 206), 302 (or 305 or 202 or 207)	6
ECON 325 or STAT 200 ⁴	3
MATH 200 (or 226), 220, 221 (or 223)	9
STAT 302	3
Science Requirement ³	3 (9)
Electives ^{5,6,7,8}	0 (6)
Total Credits	30

Third and Fourth Years

ECON 303 (or 306 or 307)	3
ECON 326 or STAT 306 ⁹	3
ECON 425	3
ECON 490	3
Economics courses numbered 300 and above	3
MATH 303 or 307	3
STAT 305	3
STAT 404	3
Statistics courses numbered 300 and above	3
Statistics courses numbered 400 and above	3
Electives ^{5,6,7,8}	30
Total Credits	60

Minimum Credits for Degree 122

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² This requirement must be completed in the first two years. Note that MATH 210 may not be of-

ferred every year.

³ Students take CHEM 111 if credit was not obtained for Chemistry 12 and 3 credits of 100-level PHYS (normally PHYS 100) if credit was not obtained for Physics 12. All students take 6 credits of CHEM and/or PHYS at the 100-level beyond CHEM 111 and PHYS 100. Students who do not have credit for Biology 11 or 12 take 3 credits of 100-level BIOL. Students with credit for Biology 11 or 12 take 3 credits of an ASTR BIOL, EOSC, or science-credit GEOG or PSYC lecture course. The Science Requirements must be completed by the end of second year.

⁴ If STAT 200 is selected, an additional ECON elective numbered 300 or higher must be taken at some point in the program, to ensure the total number of ECON credits is at least 30.

⁵ At least 9 elective credits must be outside the field of the Major (CPSC, ECON, MATH, STAT).

⁶ Enough elective credits must be chosen from Science, so that the total number of Science credits is at least 72, of which at least 30 must be numbered 300 or above.

⁷ Enough elective credits must be numbered 300 or above, so that the total number of credits numbered 300 or above is at least 48.

⁸ At most 12 elective credits may be in Faculties other than Science and Arts.

⁹ If STAT 306 is selected, an additional ECON elective numbered 300 or higher must be taken at some point in the program, to ensure the total number of ECON credits is at least 30.

COMBINED MAJOR (1375): COMPUTER SCIENCE AND STATISTICS
See *Computer Science*, p. 409.

Honours Programs

Students planning to take the Honours program in Statistics or a Combined Honours program in Mathematics and Statistics, should note the following:

- To be admitted to either of these programs in second year, a student must obtain at least 65% in MATH 121 or 80% in MATH 101 and an 80% average in MATH 100/101.
- Students must obtain formal program approval from a departmental advisor (from both departments for the Combined Honours program) before registration will be considered complete for second, third, and fourth years. Ideally this would be done before registration, but program approval can also be obtained in the first two weeks of the academic year.
- To continue in these programs, a student must obtain an overall 68% grade-point average in each academic year.

HONOURS (0051): STATISTICS (STAT)

First Year

ENGL 100-level ¹	6
CHEM 111 and 113 (or 121)	8-4
CPSC 111/211 or CPSC 111/MATH 210 ²	7-8
MATH 120 (or 100 or 102 or 104 or 180 or 184)	3-4
MATH 121 (or 101 or 103 or 105)	3-4
PHYS 121 or 101 ³	3
Electives ⁴	3-6
Total Credits	32-36

Second Year

MATH 2205, 223 (or 221)	6
MATH 226 ⁵ , 227 (200, 317)	6
STAT 200	3
STAT/MATH 302	3
Arts Elective	6
Electives ⁴	9
Total Credits	33

Third and Fourth Years

In third year: STAT 305, 306 and MATH 303 ⁶ , 307, 320, 321	18
In fourth year: STAT 404, 460 and 461 and 6 credits chosen from MATH 418, 419, 420, 421 and Statistics courses numbered 400 or above	15
Statistics courses numbered 300 or above	3
Statistics courses numbered 400 or above	6
Additional courses chosen from Computer Science and Mathematics courses numbered 300 or above	6
Arts Elective	6
Electives ⁵	15
Total Credits	69

Minimum Credits for Degree 134

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² This requirement must be completed in the first two years. Note that MATH 210 may not be offered every year.

³ Students without Physics 12 must replace the elective with PHYS 100 before taking PHYS 101. If students choose CHEM 121 for 4 credits then they must have 6 credits of electives.

⁴ Students without Biology 11 or 12 must take 3 credits of 100-level BIOL. Students with Biology 12 must take at least 3 science credits labelled ASTR, BIOL, EOSC, Science credit GEOG or PSYC. These requirements must be fulfilled before end of second year.

⁵ Students obtaining 68% or higher in MATH 226 are not required to take MATH 220.

⁶ May be replaced by MATH 419 in fourth year.

COMBINED HONOURS (0550): MATHEMATICS AND STATISTICS (MATH, STAT)

First Year

ENGL 100-level ¹	6
CHEM 111 ^{2,3}	0-4
CPSC 111/211 or CPSC 111/MATH 210 ⁴	7-8
MATH 120 (or 100 or 102 or 104 or 180 or 184)	3-4
MATH 121 (or 101 or 103 or 105)	3-4
PHYS 100-level ³	6
Electives ⁵	3-6
Total Credits	31-35

Second Year

MATH 220 ⁶ , 223 (or 221)	6
MATH 226 ⁶ , 227 (200, 317)	6
MATH 215 ⁷	3
STAT 200	3
STAT/MATH 302	3
Arts Elective	6
Electives ⁵	6
Total Credits	33

Third Year

MATH 303 ⁸	3
MATH 320, 321 ⁹	6
9 credits from MATH 300, 301, 316, 322, 323, 331 ⁹	9
STAT 305, 306	6
Arts elective	6
Elective ¹⁰	3-6
Total Credits	33(36)

Fourth Year

STAT 404, 460 and 461	9
Statistics courses numbered 400 and above	3
12 credits from: MATH 400-403, 416-429, 440, 449 ⁹	12
Electives ¹⁰	9
Total Credits	33(36)

Minimum Credits for Degree 134

¹ ENGL 112 is recommended. Qualified students are encouraged to consider ENGL 120 and/or 121. 3 credits of first-year English may be deferred until second year.

² This requirement applies only to students without credit for CHEM 12. Students with CHEM 12 take 6 credits of electives.

³ Total credits in PHYS/CHEM courses must include 6 from beyond PHYS 100, CHEM 111.

⁴ This requirement must be completed in the first two years. Note that MATH 210 might not be offered every year.

⁵ Students without Biology 11 or 12 must take 3 credits of 100-level BIOL. Students with Biology 12 must take at least 3 science credits labelled ASTR, BIOL, EOSC, Science credit GEOG or PSYC. These requirements must be fulfilled before end of second year.

⁶ Students obtaining 68% or higher in MATH 226 are not required to take MATH 220.

⁷ May be deferred until the third year.

⁸ May be replaced by MATH 419 in fourth year.

⁹ An overall 68% average is required in these 27 credits to obtain this combined Honours degree.

¹⁰ Electives in third and fourth years must include at least 6 credits selected from Statistics courses numbered 300 or above.

COMBINED HONOURS: COMPUTER SCIENCE AND STATISTICS

See the *Computer Science*, p. 410.

PROBABILITY AND STATISTICS

The following list of courses in Probability and Statistics, while not complete in the sense that there are many other courses which deal with the uses of statistics in particular fields of study, contains most of the courses in which principles and techniques of probability and statistics are discussed.

Anthropology	ANTH 418, 527, 528
Biology	BIOL 300, 301
Commerce	COMM 290, 291, 411, 581, 582, 583, 682, 684
Economics	ECON 325, 326, 425, 426, 526, 527
Educational Psychology and Special Education	EPSE 482, 483, 484, 592, 596, 597, 682
Forestry	FRST 231, 430, 431, 530, 531, 533, 539
Geography	GEOG 374

Health Care and Epidemiology	HCEP 400
Human Kinetics	HKIN 371
Mathematics	MATH 302, 303, 418, 419, 544, 545, 608
Pharmacology and Therapeutics	PCTH 404, 512
Physics	PHYS 509
Political Science	POLI 380, 381
Psychology	PSYC 218, 359, 366, 545
Rehabilitation Sciences	RHSC 402
Sociology	SOCI 418
Statistics	STAT courses
Wood Science and Industry	WOOD 335

Co-operative Education Program

This optional program integrates academic study with related and supervised work experience. Enrolment is limited. Detailed information is available from the Department of Statistics or the Co-operative Education Program Office, Room 309 Hennings Building, The University of British Columbia, 6224 Agricultural Road, Vancouver, BC, V6T 1Z1; fax 604-822-9676. Information is also available through the Co-op website (www.science-coop.ubc.ca).

VETERINARY MEDICINE

The Western College of Veterinary Medicine (W.C.V.M.) was established at the University of Saskatchewan to serve the four western provinces. A pre-veterinary program is required in preparation for admission to the four-year veterinary program at the W.C.V.M., and may be completed at UBC in the Faculty of Science or the Faculty of Land and Food Systems (formerly Agricultural Sciences).

The course requirements for admission to W.C.V.M. are:

- 1) 6 credits each of English, Biology, Biochemistry, Chemistry, Physics, and Mathematics or Statistics;
- 2) 3 credits each of genetics, organic chemistry, and introductory microbiology; and
- 3) additional electives to complete 60 credits. These prerequisites can be met in a number of departments in the Faculty of Science. However, since genetics and certain courses in Biochemistry are offered only in third year, it will normally take longer than the minimum time to meet all requirements.

Competition for admission to W.C.V.M. is severe, and although pre-veterinary requirements can be met in two years, few applicants are currently admitted with less than three years of university coursework. Therefore, pre-veterinary students who are enrolled in the Faculty of Science are advised to follow a program that also satisfies the requirements of a Bachelor of Science program at UBC. Further information regarding entrance to Veterinary Medicine may be obtained from the Dean's Office, Faculty of Land and Food Systems, UBC; or directly from the University of Saskatchewan.

ZOOLOGY

The Department of Zoology (www.zoology.ubc.ca) offers programs of study jointly with the Department of Botany leading to a bachelor's degree in Biology. There is no undergraduate degree in Zoology.

The Department of Zoology also offers programs leading to the master's and doctoral degree. For information on graduate degrees, see *Zoology*, p. 286, in the Faculty of Graduate Studies section.

Facilities are available for advanced study and research in the following areas: aquaculture, biological oceanography, comparative physiology, developmental and cell biology, ecology, entomology, ethology, fish biology and fisheries, genetics, ichthyology and limnology, marine biology, parasitology, vertebrate and invertebrate zoology, and zoogeography. Attention is directed to the following applied fields.

Ecology

The Ecology Group in the Department of Zoology offers research opportunities at the local, national, and international level in aquatic, evolutionary, mathematical, population, and resource ecology.

Entomology

Courses of study are offered through the Department of Zoology and the Faculties of Forestry and Land and Food Systems. Zoology offers introductory and advanced courses in entomology and maintains a museum collection and specialized library. Forestry has courses in insect ecology and in the special problems of forest entomology and forest protection. In the Faculty of Land and Food Systems, the Department of Plant Science offers courses in economic entomology, biometeorology, insect physiology, pesticides, biological control, and plant-disease vectors.

At the graduate level, there is research guidance in problems relating to the classification, structure, function and bionomics of insects, as well as in special areas, such as biological control, biochemical genetics, and plant-insect relationships.

Fish Biology and Fisheries

The Fish Biology and Fisheries Group maintains a strong tradition in fish-oriented research at the University of British Columbia. Studies range from physiology, ethology, biomechanics, systematics and evolution, through marine and freshwater ecology, to fisheries oceanography and management (population modelling, and fisheries economics).

In addition to facilities on campus, federal and provincial agencies encourage research in cooperation with government scientists, many of whom serve on students' research advisory committees. Wildlife management courses of study permitting a student to enter this field of applied zoology can be obtained either through the Bachelor of Science (B.Sc.), the Bachelor of Science in Agroecology (B.Sc. [Agro.]), or the Bachelor of Science in Forestry (B.S.F.). In each

instance the master's degree is essential and students should not attempt to enter the field unless they can meet the academic requirements for it.

BACHELOR OF COMPUTER SCIENCE

INTEGRATED COMPUTER SCIENCE

The Integrated Computer Science (ICS) program is designed particularly for students who wish to complement their previous studies and experience with advanced study in computer science. The program offers opportunities for study leading to a second bachelor's degree, the B.C.S. degree.

Prerequisites

Candidates for admission must have completed a recognized bachelor's degree in a field that does not overlap with computer science. The following high school and university-level courses are required. BC high school and UBC courses are listed; the equivalents from any recognized high school or post-secondary institution will be accepted.

- 1) BC Principles of Mathematics 12;
- 2) English, 3 credits (Any one of ENGL 110, 111, 112, 120, 121);
- 3) CPSC 100 (or equivalent knowledge of computer usage).

Applicants with a strong academic record who have not completed all prerequisite courses are encouraged to apply.

Admission

Admission is based on a selection process that strives to enrol the most highly qualified applicants. Not every qualified applicant will be offered admission. Applicants are evaluated on the following criteria:

- 1) Academic criteria at the time of application, including:
 - (a) Overall academic record, based on the average of all university-level courses attempted. Consideration is given to trends in grades from year to year;
 - (b) Most recent 60-credit average. A minimum of a B average is required.
- 2) Non-academic criteria, including motivation, maturity, integrity, realistic self-appraisal, creativity, scientific and intellectual curiosity, attitude toward lifelong learning, problem-solving and decision-making aptitude, ability to communicate verbally and in writing, and capacity to understand and cooperate with others. Evaluation of these non-academic criteria is based on:
 - (a) two confidential letters of reference, and a statement of interest submitted by the applicant;
 - (b) a self-assessment of the applicant's work history;
 - (c) a personal interview with members of the selection committee.

The interview is a critical component of the admission process. Not all applicants will be invited for an interview. Applicants selected for an interview will be contacted by the B.C.S. selection committee, prior to the end of April.

Application Procedure

Applications should be made through the central Enrolment Services, Undergraduate Admissions Office of UBC. Documents for the evaluation of non-academic criteria (e.g., letters of reference, statement of interest, self-assessment of work history) must be submitted to the ICS Director, Department of Computer Science. Forms, instructions, and deadlines are available on the Department's website (www.cs.ubc.ca).

Degree Requirements

Third Year

CPSC 111 ¹ , 121, 211, 221, 213	20
ENGL 100-level ²	3
ENGL 301 ³	3
MATH 180 (or 100 or 102 or 104 or 184 or 120) ¹	4(3)
STAT 203 ¹	3
Upper-level Electives ⁴	3
Total Credits	36(35)

Fourth Year

CPSC 310, 313, 320	10
CPSC courses numbered 300 or above	6
CPSC courses numbered 400 or above	6
Upper-level Electives ⁴	12
Total Credits	34

Minimum Credits for Degree

69

¹ Requirements completed prior to commencement of the degree may not be repeated and must be replaced after consultation with an advisor.

² ENGL 112 is recommended for the first-term English requirements.

³ ENGL 301 may be deferred to a later term.

⁴ Upper-level elective credits must be approved by an advisor. These credits should be either additional credits in the previous degree area or in another area the student wishes to combine with computer science.

Co-operative Education Option

A co-operative education option is also available for this degree. Since this is a special second degree program, the co-op option requires a minimum of two work terms. To graduate in the co-op option, students are required to complete CPSC 298 and 299 work terms in addition to the normal academic requirements. Normally, the two work placements are scheduled after the completion of the first academic year. A complete schedule and additional information on the program can be obtained from the Computer Science department and its website (www.cs.ubc.ca).

Promotion Requirements

Students are normally admitted into third year. Promotion to fourth year requires the completion of the following:

- CPSC 111, 121;
- 3 credits of ENGL 100;
- MATH 180 or equivalent;

- 3 credits of upper-level electives.

Academic Regulations

Same as those for the Bachelor of Science degree.

DIPLOMA IN COMPUTER SCIENCE

The Department of Computer Science offers a Diploma in Computer Science. The program is designed for students without previous experience in programming and for mature students whose knowledge of programming is no longer current. The program provides students with the opportunity to acquire the specific skills and work experience needed to start a career in information technology. A Diploma in Computer Science will be awarded to candidates upon successful completion of the program.

The diploma program provides an opportunity for individuals with skills and expertise in areas outside traditional computer science to acquire the specific technical skills and work experience needed to start a career in information technology.

The program is an internship program that combines university courses (46 credits) and supervised work experience (6 or 9 credits). The program normally takes 24 to 28 months to complete. The program includes four academic terms, an eight-month internship (i.e., work term) after the third academic term, and an optional four-month work term in the summer prior to the third academic term.

Applicants must possess a bachelor's degree and have a strong academic record. The bachelor's degree must not be in a computer science related area (unless the applicant's knowledge is out of date).

Students are selected based on academic background, work history, letters of reference, and an interview. Excellent communication skills are required for acceptance into the program.

Contact the Department of Computer Science (www.cs.ubc.ca) for application material. There will be a preliminary application fee of CAD\$100.00. Once admitted to the program, students are assigned a student number and are given eligibility to register.

DIPLOMA IN METEOROLOGY

The Diploma in Meteorology offers an intensive one-year program in theoretical and applied meteorology. It is designed for students with little or no background in meteorology who wish to direct their experience to environmental applications or to gain employment as a meteorologist.

Admission is based on an acceptable academic record (usually a bachelor's degree in physics, applied mathematics, engineering, or similar disciplines). Typically this should include about 27 credits of Mathematics (up to introduction to partial differential equations) and Computer

Science (including some numerical analysis), and 21 credits of Physics.

The diploma program requires a minimum of 30 credits of coursework in Atmospheric Science. Each student will plan an individual program in consultation with the Associate Chair of the Atmospheric Science program. For those with sufficient mathematics and physics but no meteorology a typical program would include: ATSC 404, 405; ATSC/GEOG 300, 301, 303, 304 plus 12 credits from CHEM 302, EOSC 370, GEOG 401, 402, 403, MECH 482, PHYS 314, SOIL 314. An exemption of up to 12 credits for courses already taken will be allowed. Students granted exemptions will be required to add electives of appropriate undergraduate or graduate courses. Additional courses may be added or substituted by the Associate Chair to make up the mathematics or physics background of the student. The total load is not to exceed 36 credits.

ACADEMIC STAFF

DEPARTMENT OF BOTANY

C. J. Douglas, Head

Honorary Professors

R. J. Bandoni, B.S. (Nevada), M.S., Ph.D. (Iowa), Curator of the Mycological Collections; T. Bisalputra, M.Sc. (New Engl.), Ph.D. (Calif., Davis); B. A. Bohm, B.A. (Alfred), M.S., Ph.D. (Rhode Island); R. E. Foreman, B.A. (Colorado), Ph.D. (Calif.); G. C. Hughes, B.S. (Georgia Southern), M.S., Ph.D. (Flor. State); J. R. Maze, B.A. (Humboldt), M.S. (Wash.), Ph.D. (Calif., Davis); K. M. Patel, B.Sc. (Sardar Patel, India), M.S. (Calif., Davis); G. E. Rouse, B.A., M.Sc., Ph.D. (McM.), F.L.S.; R. F. Scagel, M.A. (Br.Col.), Ph.D. (Calif.), F.R.S.C., F.L.S., Curator of the Phycological Collections; W. B. Schofield, B.A. (Acadia), M.A. (Stan.), Ph.D. (Duke), D.Sc. (Acadia), Curator of the Bryophyte Collections; F. J. R. Taylor, B.Sc., Ph.D. (Cape T.), F.R.S.C.

Professors

R. E. DeWreede, B.A. (W. Mich.), Ph.D. (Hawaii); C. J. Douglas, B.A. (Lewis and Clark), M.S., Ph.D. (Wash.); F. R. Ganders, B.A., B.S. (Wash. State), M.A., Ph.D. (Calif.), F.L.S.; G. W. Haughn, B.Sc. (Dal.), Ph.D. (C'nell.); W. Maddison, B.Sc. (Tor.), Ph.D. (Harv.); L. Rieseberg, B.A. (Southern College, Chattanooga), M.S. (Tennessee), Ph.D. (Wash.); C. Suttle, B.Sc., Ph.D. (Br.Col.); R. Turkington, B.Sc. (Ulster, Coleraine), Ph.D. (N. Wales, Bangor); G. Wasteneys, B.Sc. (Car.), Ph.D. (Aust. Ntl.).

Associate Professors

M. L. Berbee, B.S. (Minn.), M.S., Ph.D. (Calif., Davis); J. Bohlmann, Diplom, Ph.D. (Tech. U. Braunschweig); G. E. Bradfield, B.Sc., M.Sc. (W.Ont.), Ph.D. (Monash); P. G. Harrison, B.Sc. (Br.Col.), Ph.D. (Dal.); R. Jetter, Diplom (Munich), Ph.D. (Kaiserslautern); P. J. Keeling, B.Sc. (W.Ont.), Ph.D. (Dal.); L. Kunst, B.Sc., M.Sc. (Zagreb), Ph.D. (Mich.); L. Oliveira, B.Sc., M.Sc. (Porto), Ph.D. (Br.Col.); J. Whitton, B.Sc. (McG.), M.S., Ph.D. (Conn.).

Assistant Professors

K. Adams, Ph.D. (Indiana); J-G Chen, B.S., M.S., Ph.D. (Nanjing Agricultural China); N. Fast, B.Sc. (Br.Col.), Ph.D. (Dal.); S. Graham, B.Sc. (St.And., Scotland), M.Sc., Ph.D. (Tor.); B. Leander, B.S., M.A. (Humboldt State), Ph.D. (Georgia); X. Li, Ph.D.

(Oklahoma State); **L. Samuels**, B.Sc. (McG.), Ph.D. (Br.Col.); **P. D. Tortell**, B.Sc. (McG.), Ph.D. (Prin.); **M. Vellend**, Ph.D. (C'Nell).

Senior Instructors

C. A. Borden, B.Sc. (Mass.), M.Sc. (Br.Col.); **T. J. Crawford**, B.Sc. (Vic.B.C.), M.Sc., Ph.D. (Wash.); **M. W. Hawkes**, B.Sc., Ph.D. (Br.Col.); **E. Rosenberg**, B.Sc. (S.Fraser); **S. Singh**, B.Sc. (Punj.), M.Sc. (Punj. Agri.), Ph.D. (A.N.U.).

Instructors

C. Berezowsky, B.Sc., M.Sc. (Sask.), Ph.D. (Guelph); **S. Ellis**, B.Sc., M.Sc. (Br.Col.); **K. Nomme**, B.Sc., M.Sc. (Br.Col.).

Research Associates

S. Chowrira, B.Sc., M.Sc. (U. Agricultural Sciences, Bangalore), Ph.D. (Wash.); **E. Gilchrist**, B.A. (Dal.), B.Sc., Ph.D. (Br.Col.); **H. Kennedy**, B.S., M.S., Ph.D. (Calif., Davis).

Postdoctoral Fellows

I. Agnarrson, Ph.D. (George Wash.); **D. Bird**, Ph.D. (Calg.); **L. Burri**, Ph.D. (Lausanne); **K. Carpenter**, Ph.D. (Calif., Davis); **G. Dean**, Ph.D. (Durh.); **S. Greer**, Ph.D. (Alabama); **B. Hamberger**, Ph.D. (Max Planck Inst.); **T. Hooker**, Ph.D. (Br.Col.); **M. Hoppenrath**, Ph.D. (Hamburg); **A. Kotzer**, Ph.D. (Oxf. Brookes); **W. Li**, Ph.D. (South China); **Z. Liu**, Ph.D. (Northeast Normal); **M. Oudot**, Ph.D. (Rennes I); **N. Patron**, Ph.D. (E. Anglia); **J. Sambatti**, Ph.D. (Calif., Davis); **C. Slamovits**, Ph.D. (Buenos Aires); **K. M. (C.) Tsui**, Ph.D. (H.K.); **S. Wang**, Ph.D. (Nanjing Agricultural); **Y. Wang**, Ph.D. (China Agricultural Univ.); **B. Williams**, Ph.D. (Lond.); **X. Wu**, Ph.D. (Sing.); **H. Zheng**, Ph.D. (Oxford Brookes).

Adjunct Professors

G. Bakkeren, B.Sc., M.Sc., Ph.D. (Basel); **C. J. French**, B.Sc., Ph.D. (Manc.); **M. D. Jones**, B.Sc. (Calg.), Ph.D. (Tor.); **S. Lindstrom**, B.A. (Reed), M.Sc., Ph.D. (Br.Col.); **H. Sanfanon**, D.E.C., B.Sc., Ph.D. (Laval); **T. Tomascik**, B.Sc. (Tor.), Ph.D. (McG.).

Associate Members

S. M. Berch, B.Sc., M.Sc. (Wat.), Ph.D. (Laval); **Q. Cronk**, UBC Botanical Garden and Centre for Plant Research; **B. Ellis**, Agricultural Sciences; **T. Goward**, B.A. (Mt.All.) Curator of Lichens; **R. Guy**, Forest Sciences; **L. Harrison**, Chemistry; **D. Justice**, UBC Botanical Garden and Centre for Plant Research; **S. Lund**, Wine Research Centre; **S. Otto**, Zoology; **A. Riseman**, UBC Botanical Garden and Centre for Plant Research; **K. Ritland**, Forest Sciences.

DEPARTMENT OF CHEMISTRY

E. R. Grant, Head

Honorary Professors

L. G. Harrison, B.Sc., Ph.D. (Liv.), F.C.I.C.; **R. Stewart**, M.A. (Br.Col.), Ph.D. (Wash.), F.C.I.C., F.R.S.C.

Professors

R. J. Andersen, B.Sc. (Alta.), M.Sc., Ph.D. (Calif., Berkeley); **M. W. Blades**, B.Sc. (St.M.), Ph.D. (Alta.); **D. E. Brooks**, M.Sc. (Br.Col.), Ph.D. (Oregon); **E. E. Burnell**, M.Sc. (Nfld.), Ph.D. (Brist.); **L. D. Burntack**, B.Sc. (Manit.), Ph.D. (Alta.); **M. Ciufolini**, B.S. (AL), Ph.D. (Mich.); **M. B. Comisarow**, B.Sc. (Alta.), Ph.D. (Case Western Reserve), F.R.S.C.; **D. H. Dolphin**, B.Sc., Ph.D. (Nott.), F.R.S.C.; **D. Douglas**, B.Sc. (McM.), Ph.D. (Tor.); **M. D. Fryzuk**, B.Sc., Ph.D. (Tor.), F.C.I.C., F.R.S.C.; **C. A. Fyfe**, B.Sc., Ph.D. (St.And.), F.R.S.C.; **M. C. L. Gerry**, B.A., M.Sc. (Br.Col.), Ph.D. (Cantab.), F.C.I.C.; **E. R. Grant**, B.S.

(Occidental Coll.), Ph.D. (Calif.); **J. W. Hepburn**, B.Sc. (Hons.) (Wat.), Ph.D. (Tor.), F.R.S.C.; **F. G. Herring**, B.Sc., Ph.D. (Lond.), F.C.I.C.; **P. Legzdins**, B.Sc. (Car.), Ph.D. (M.I.T.); **L. McIntosh**, B.Sc. (Calg.), Ph.D. (Oregon); **T. Momose**, B.Sc., M.Sc., Ph.D. (Japan); **C. Orvig**, B.Sc. (McG.), Ph.D. (M.I.T.), F.C.I.C.; **G. N. Patey**, B.Sc. (Nfld.), M.Sc., Ph.D. (Tor.), F.R.S.C.; **G. A. Sawatzky**, B.Sc., Ph.D. (Man.); **M. Shapiro**, B.Sc. (Hebrew), M.Sc. (Hebrew), Ph.D. (Hebrew); **J. Sherman**, B.A., (Haverford), Ph.D. (Calif., L.A.); **M. Tanner**, B.Sc. (Alta.), Ph.D. (Calif., L.A.); **S. G. Withers**, B.Sc., Ph.D. (Brist.), F.R.S.C.

Associate Professors

J. Barth, Ph.D. (Berlin); **G. S. Bates**, B.Sc. (W.Ont.), Ph.D. (Alta.); **D. Bizzotto**, B.Sc. (Calg.), Ph.D. (Guelph/Wat.); **D. Chen**, B.Sc. (Xiamen), Ph.D. (Alta.); **K. J. Orians**, B.A., Ph.D. (Calif., Santa Cruz); **M. Thachuk**, B.Sc. (W.Ont.), Ph.D. (Wat.); **M. Wolf**, B.Sc. (Dal.), Ph.D. (M.I.T.).

Assistant Professors

A.K. Bertram, B.Sc. (P.E.I.), Ph.D. (Wat.); **K. C. Chou**, B.S. (Taiwan), Ph.D. (Calif.); **G. Dake**, B.Sc. (Br.Col.), Ph.D. (Stan.); **D. Gates**, B.Sc. (Dal.), Ph.D. (Tor.); **R. Jetter**, Diploma (Munich), Ph.D. (Kaiserslautern), Dr. Habil (Wuerzburg); **J. Kast**, Diplom, Ph.D. (Konstanz); **P. Kennepohl**, B.Sc. (Concordia), Ph.D. (Stan.); **H. Li**, B.S. (Tianjin), Ph.D. (Munich); **J. A. Love**, B.S. (Allegheny Coll.), Ph.D. (Stan.); **W. A. MacFarlane**, B.Sc. (Vic.B.C.), Ph.D. (Br.Col.); **M. J. MacLachlan**, B.Sc. (Br.Col.), Ph.D. (Tor.); **D. M. Perrin**, B.A. (Calif., Berkeley), Ph.D. (Calif., L.A.); **L. L. Schafer**, B.Sc. (Guelph), Ph.D. (Vic.B.C.); **S. K. Straus**, B.Sc. (McG.), Ph.D. (Physikalische Chemie-Schweiz); **J. T. Stuckless**, B.Sc. (Nfld.), Ph.D. (Tor.); **Y. A. Wang**, B.Sc. (Jilin, China), Ph.D. (Indiana).

Senior Instructors

B. L. Cliff, B.Sc., Ph.D. (Br.Col.); **S. Nussbaum**, B.Sc., M.Sc., Ph.D. (Hebrew); **P. Rasmussen**, B.Sc., M.Sc. (Acadia), Ph.D. (McM.); **P. Wassell**, B.Sc. (Exc.), Ph.D. (Br.Col.); **D. Zendrowski**, B.Sc. (Trent).

Instructors

N. Burlinson, B.Sc. (Fairfield), M.Sc. (Maryland), Ph.D. (Catholic U., Wash.); **S. Iyer**, B.Sc. (Madur.), Ph.D. (Vic.B.C.).

Adjunct Professors

M. Abrams, B.A. (Bowdoin), Ph.D. (M.I.T.); **T. Q. Hu**, B.Sc. (China), M.Sc., Ph.D. (Br.Col.); **K. J. Reimer**, B.Sc., M.Sc. (Calg.), Ph.D. (W.Ont.); **R. N. Young**, B.Sc. (Vic.B.C.), Ph.D. (Br.Col.).

DEPARTMENT OF COMPUTER SCIENCE

W. Aiello, Head

Professors

U. Ascher, B.Sc., M.Sc. (Tel Aviv), Ph.D. (Minn.); **K. S. Booth**, B.S. (Cal.Tech.), M.A., Ph.D. (Calif., Berkeley); **A. Condon**, B.Sc. (University Coll.), Ph.D. (Wash.); **J. Friedman**, B.A. (Harv.), Ph.D. (Calif., Berkeley); **M. Greenstreet**, B.S. (Cal.Tech.), M.S., Ph.D. (Prin.); **G. J. Kiczales**; **D. G. Kirkpatrick**, B.Sc. (Br.Col.), M.Sc., Ph.D. (Tor.); **L. V. S. Lakshmanan**, B.Eng. (Karaikudi), M.Eng., Ph.D. (Bangalore); **J. J. Little**, A.B. (Harv.), M.Sc., Ph.D. (Br.Col.); **D. Lowe**, B.Sc. (Br.Col.), Ph.D. (Stan.); **A. K. Mackworth**, B.A.Sc. (Tor.), M.A. (Harv.), D.Phil. (Suss.); **R. Ng**, B.Sc. (Br.Col.), M.Math (Wat.), Ph.D. (Maryland); **D. K. Pai**, B.Tech. (I.T.T.), M.Sc., Ph.D. (C'nell.); **D. L. Poole**, B.Sc. (Flinders), Ph.D. (A.N.U.); **R. S. Rosenberg**, B.A.Sc., M.A.Sc. (Tor.), Ph.D. (Mich.); **R. J. Woodham**, B.A. (W.Ont.), S.M. E.E., Ph.D. (M.I.T.).

Associate Professors

C. Conati, M.S. (Milan), M.S., Ph.D. (Pitts.); **A. Doucet**, M.Eng. (INT France), Ph.D. (Paris-Sud Orsay); **W. S. Evans**, B.Sc. (Yale), Ph.D. (Calif., Berkeley); **M. J. Feeley**, B.Sc., M.Sc., Ph.D. (Wash.); **W. Heidrich**, B.Sc. (Erlangen-Nurnberg), M.Math (Wat.), Ph.D. (Erlangen-Nurnberg); **H. Hoos**, B.Sc. (Darmstadt), M.Sc., Ph.D. (Darmstadt); **A. J. Hu**, B.Sc., Ph.D. (Stan.); **N. C. Hutchinson**, B.Sc. (Calg.), M.Sc., Ph.D. (Wash.); **K. MacLean**, B.S. (Stan.), M.S. (Camb.), Ph.D. (Camb.); **G. C. Murphy**, B.Sc. (Alta.), M.Sc., Ph.D. (Wash.); **R. Rensink**, B.Sc. (Wat.), M.Sc. (Br.Col.), Ph.D. (Br.Col.); **M. vande Panne**, B.A.Sc. (Calg.), M.A.Sc., Ph.D. (Tor.); **S. T. Vuong**, B.Sc. (Cal. State), M.Eng. (Car.), Ph.D. (Wat.); **A. S. Wagner**, B.Sc. (Dal.), M.Sc. (Alta.), Ph.D. (Tor.).

Assistant Professors

R. Bridson, B.Math., M.Math. (Wat.), Ph.D. (Stan.); **G. Carenini**, M.S. (Milan), Ph.D. (Pitt.); **J. F. de Freitas**, B.Sc., M.Sc. (Witw.), Ph.D. (Camb.); **K. De Volder**, M.S. (Vrije), Ph.D. (Vrije); **M. Friedlander**, B.A. (C'nell), M.S., Ph.D. (Stan.); **C. Greif**, B.Sc., M.Sc., (Tel Aviv), Ph.D. (Br.Col.); **C. Krasic**, B.Math., M.Sc. (Wat.), Ph.D. (O.H.S.U.); **K. Leyton-Brown**, B.Sc. (McM.), M.Sc., Ph.D. (Stan.); **J. McGreener**, B.Sc. (W.Ont.), M.Sc. (Br.Col.), Ph.D. (Tor.); **I. Mitchell**, B.A.Sc., M.Sc. (Br.Col.), Ph.D. (Stan.); **T. Munzner**, B.S., Ph.D. (Stan.); **K. Murphy**, B.A. (Camb.), M.Sc. (Penn.), Ph.D. (Calif., Berkeley); **R. Pottinger**, B.S. (Duke), M.S., Ph.D. (Wash.); **A. Sheffer**, B.Sc., M.Sc., Ph.D. (Jerusalem); **E. Wohlstatter**, B.S., Ph.D. (Calif., Davis).

Senior Instructors

P. Belleville, B.Sc., M.Sc. (McG.), Ph.D. (S.Fraser); **P. Carter**, B.Sc. (Sheff.), M.Sc. (Br.Col.), Ph.D. (Br.Col.); **I. A. Cavers**, B.Sc., M.Sc., Ph.D. (Br.Col.); **K. Eiseitl**, Ph.D. (Calif., Irvine); **G. Tsiknis**, B.Sc. (Patras), M.Sc., Ph.D. (Br.Col.).

Instructors

D. Acton, B.Sc., M.Sc., Ph.D. (Br.Col.); **E. Knorr**, B.Math (Wat.), M.Sc., Ph.D. (Br.Col.); **S. Wolfman**, B.S. (Duke), M.S., Ph.D. (Wash.).

Adjunct Professors

C. Bouillier, B.Sc. (Dal.), M.Sc., Ph.D. (Tor.); **B. Fisher**, B.A. (Hiram), Ph.D. (Calif.).

Associate Members

R. Anstee, Mathematics; **M. Ito**, Electrical and Computer Engineering; **P. Lawrence**, Electrical and Computer Engineering; **G. Schrack**, Electrical and Computer Engineering; **B. Wetton**, Mathematics; **C. Woo**, Commerce and Business Administration.

DEPARTMENT OF EARTH AND OCEAN SCIENCES

P. L. Smith, Head

Honorary Professors

P. M. Bradshaw, B.Sc. (Car.), Ph.D. (Dur.); **S. E. Calvert**, B.Sc. (R'dg.), Ph.D. (Calif., San Diego), F.R.S.C.; **W. M. Cameron**, B.A., M.A. (Br.Col.), Ph.D. (Calif.); **R. L. Chase**, B.Sc. (W. Aust.), Ph.D. (Prin.); **W. R. Danner**, M.Sc., Ph.D. (Wash.); **R. M. Ellis**, B.A., M.Sc. (W.Ont.), Ph.D. (Alta.); **W. K. Fletcher**, B.Sc., Ph.D. (Imperial Coll.); **P. H. Leblond**, B.A. (Laval), B.Sc. (McG.), Ph.D. (Br.Col.), D.Sc. (Nfld.), F.R.S.C.; **A. G. Lewis**, B.Sc., M.Sc. (Miami), Ph.D. (Hawaii); **G. S. Pond**, B.Sc., Ph.D. (Br.Col.); **M. Raudsepp**, B.Sc. (McM.), M.Sc., Ph.D. (Manit.); **R. D. Russell**, M.A., Ph.D. (Tor.), F.R.S.C.; **A. J. Sinclair**, B.A.Sc., M.A.Sc. (Tor.), Ph.D. (Br.Col.), P.Eng; **F. J. R. Taylor**, B.Sc.,

Ph.D. (Cape T.), F.R.S.C.; T. J. Ulyrch, B.Sc. (Lond.), M.Sc., Ph.D. (Br.Col.).

Professors

R. J. Andersen, B.Sc. (Alta.), M.Sc. (Calif., Berkeley), Ph.D. (Calif., San Diego); **N. J. Balmforth**, B.Sc., (Lond.), Ph.D. (Camb.); **M. G. Bostock**, B.Sc., M.Sc. (Qu.), Ph.D. (A.N.U.); **P.Eng.**; **R. M. Bustin**, B.Sc., M.Sc. (Calg.), Ph.D. (Br.Col.); **G. K. C. Clarke**, B.Sc. (Alta.), M.A., Ph.D. (Tor.), F.R.S.C., F.A.G.U.; **R. M. Clowes**, M.Sc., Ph.D. (Alta.), F.R.S.C. (on leave); **G. M. Dipple**, B.Sc. (Indiana), M.A., Ph.D. (Johns H.) (on leave); **R. Francois**, B.Sc., (Ecole Supérieure des Textiles, Belgium), M.Sc., (S'ton), Ph.D. (Br.Col.); **L. A. Groat**, B.Sc. (Qu.), Ph.D. (Manit.); **M. Healey**, B.Sc., M.Sc., (Br.Col.), Ph.D. (Aberd.); **W. W. Hsieh**, B.Sc., M.Sc., Ph.D. (Br.Col.); **O. Hungr**, B.A.Sc., M.Sc. (Ott.), Ph.D. (Alta.), P.Eng., P.Geog.; **R. G. Ingram**, B.Sc., M.Sc. (McG.), Ph.D. (M.I.T.; Woods Hole); **J. K. Mortensen**, B.A.Sc., M.A.Sc., (Br.Col.), Ph.D. (Calif., Santa Barbara); **D. W. Oldenburg**, B.Sc., M.Sc. (Alta.), Ph.D. (Calif.); **J. K. Russell**, B.Sc. (Manit.), M.Sc., Ph.D. (Calg.); **J. L. Smith**, B.Sc. (Alta.), Ph.D. (Br.Col.), F.R.S.C., F.A.G.U.; **P. L. Smith**, B.Sc. (Lond.), M.S. (Portland State), Ph.D. (McM.); **D. G. Steyn**, B.Sc., M.Sc. (Cape T.), Ph.D. (Br.Col.), Associate Dean (Grad. Studies); **R. B. Stull**, B.Sc., Ph.D. (Wash.); **C. Suttle**, B.Sc., Ph.D. (Br.Col.); **D. A. Weis**, B.Sc., M.S., Ph.D. (Universite Libre de Bruxelles).

Associate Professors

S. E. Allen, B.Sc. (Qu.), Ph.D. (Cantab.); **P. Austin**, B.A. (Whitman Coll.), Ph.D. (Wash.); **R. D. Beckie**, B.A.Sc. (Wat.), M.A., Ph.D. (Prin.), P.Eng.; **K. A. Grimm**, B.Sc. (Denison), M.S. (Wis.), Ph.D. (Calif., Santa Cruz); **C. L. Johnson**, B.Sc. (Hons) (Edin.), Ph.D. (U.C.S.D.); **L. Kennedy**, B.Sc., M.Sc. (New Br.), Ph.D. (Texas A and M); **K. J. Orians**, B.A., Ph.D. (Calif., Santa Cruz) (on leave); **R. Pawlowicz**, B.Sc. (Qu.), Ph.D. (M.I.T.; Woods Hole); **J. S. Scoates**, B.Sc. (Qu.), Ph.D. (Wyoming).

Assistant Professors

C. DiBacco, B.Sc., M.Sc. (Dal.), Ph.D. (Scripps Inst. of Oceanography); **E. Eberhardt**, B.Eng., M.Sc., Ph.D. (Sask.); **E. Hearn**, B.A. (Rice U. Texas), M.S. (Calif., Berkeley), Ph.D. (Oregon); **F. Herrmann**, M.Sc., Ph.D. (Delft Univ. of Tech.); **M. Jellinek**, A.B. (Hamilton Coll., NY), M.Sc. (Idaho), Ph.D. (A.N.U.); **M. Kopylova**, B.Sc., M.Sc. (Moscow), Ph.D. (Russian Acad. Sci.); **M. Maldonado**, B.A. (Smith College, USA), Ph.D. (McG.); **U. Mayer**, Dipl. Ing. (Sturt.), Ph.D. (Wat.); **E. Pakhomov**, B.Sc., M.Sc. (Kazan State U., Russia), Ph.D. (P.P. Shirov Inst. of Oceanography, Russian Academy of Sciences); **L. Pandolfo**, B.Sc. (Laval) Ph.D. (Yale); **A. Ridgwell**, B.A. (Camb.), M.Sc. (Nott.), Ph.D. (East Anglia); **S. Rowins**, B.Sc. (Qu.), M.Sc. (Ott.), Ph.D. (W. Aust.); **P. D. Tortell**, B.Sc. (McG.), Ph.D. (Prin.).

Adjunct Professors

R. G. Anderson, B.Sc.(H.) (Br.Col.), Ph.D. (Car.); **S. J. Billings**, B.Sc. (La Trobe), B.Sc. (Hons – ANU), Ph.D. (University of Sydney); **E. Carmack**, B.Sc., (Arizona State), Ph.D. (Wash.); **K. L. Denman**, B.Sc. (Calg.), Ph.D. (Br.Col.); **M. G. G. Foreman**, B.Sc. (Qu.), M.Sc. (Vic.B.C.), Ph.D. (Br.Col.); **J. Haggart**, B.S. (Arizona U.), M.S., Ph.D. (Calif., Davis); **M. Holzer**, B.Sc., Ph.D. (S.Fraser); **J. L. Jambor**, B.A., M.Sc. (Br.Col.), Ph.D. (Car.); **J. M. Journey**, B.Sc. (St. Lawrence), M.Sc., Ph.D. (Qu.); **R. L. Kirilin**, B.Sc., M.Sc., (Wyoming), Ph.D. (Utah State); **H. Melling**, B.Sc., M.Sc., Ph.D. (Tor.); **B. B. Narod**, M.Sc. Ph.D. (Br.Col.); **T. F. Pedersen**, B.Sc., (Br.Col.), Ph.D. (Edin.); **K. W. Savigny**, B.Sc. (Qu.), Ph.D. (Alta.), P.Eng., P.Geog.; **B. Scott Smith**, B.Sc., Ph.D. (Edin.); **J. F. Thompson**, B.A. (Oxon.), M.Sc., Ph.D. (Tor.); **I. Thomson**, B.Sc. (Hons.), Ph.D. (Lond.), D.I.C., (Imp. Coll., Lond); **R.**

E. Thomson, B.Sc., Ph.D. (Br.Col.); **K. Von Salzen**, M.Sc., Ph.D. (Tech. Univ. of Munich); **D. M. Ware**, B.Sc., Ph.D. (Br.Col.); **C. S. Wong**, B.Sc., M.Sc. (H.K.), Ph.D. (Calif., San Diego).

Honorary Lecturer

D. Athaide, B.Sc. (McG.), M.Sc. (Br.Col.).

Lecturers

F. Jones, B.Sc. (McG.), M.Sc. (Br.Col.), P.Eng.

Senior Instructor

M. L. Bevier, B.Sc. (Calif., Santa Cruz), M.Sc. (Br.Col.), Ph.D. (Calif., Santa Barbara).

Instructor

S. Harris, B.A. (Wesleyan U., C.T.), Ph.D. (Oregon State U.); **S. E. Sutherland**, B.Sc. (Plym.), Ph.D. (Leic.), P.G.C.E. (Sheff.).

Visiting Scientists, Scholars & Professors

G. Anderson, B.Eng. (McG.), M.A.Sc., Ph.D. (Tor.); **N. Cetin**, B.Sc., M.Sc. (Middle East Tech. U.); **C. Deyell**, B.Sc. (Qu.), Ph.D. (Br.Col.); **K. Kingdon**, M.Sc. (Br.Col.); **R. Kumar**, B.Sc. (Hons), M.Sc., Ph.D. (Osmania U.); **G. Kuscus**, B.Sc. (Middle East Tech. U., Turkey), Ph.D. (Keele U,UK); **D. Lutes**, B.Sc., M.Sc. (Manit.); **M. G. Maxwell**, B.Sc. (Royal Military Coll. Canada), M.A. (U. of Ottawa), Ph.D. (UBC); **L. K. Neil**, B.Sc. (Winn.); **R. Nissen**, B.Sc. (Br.Col.), M.Sc., Ph.D. (U. of Toronto); **M. Szczodrak**, M.Sc. (Jagiellonian U., Cracow), Ph.D. (Br.Col.); **S. Walker**, B.Sc. (Hons) (McM.), M.Sc. (Br.Col.).

Associate Members

G. Flowers, B.A. (Colorado U.), Ph.D. (Br.Col.); **B. Gladman**, Physics and Astronomy; **T. Gordon**, Geological Sciences, (Calg.); **M. T. Kelly**, Pathology and Laboratory Medicine; **G. A. Lawrence**, Civil Engineering; **G. Schubert**, B. Eng. Physics (Cornell), M. Aero. Eng. (Cornell), Ph.D. (Calif., Berkeley); **J. K. Smit**, Microbiology and Immunology.

Honorary Research Associates

T. L. Clark, B.A.Sc. (Br.Col.), M.Sc., Ph.D. (Tor.); **C. L. Johnson**, A.B. (Harvard/Radcliffe), Ph.D. (Scripps); **T. E. McCandless**, B.Sc., M.Sc. (Utah), Ph.D. (Arizona, Tucson).

Research Associates

A. Ahmad, B.Sc., M.Sc., (Karachi), Ph.D. (U. of Calif., Davis); **J. Barling**, B.Sc., (Edin.), Ph.D. (Monash); **L. Chikatamarla**, B.Eng. (Osmania), M.Eng. (I.I.T.), Ph.D. (James Cook); **K. Foster**, B.Sc. (Canberra), M.Sc. (ANU); **R. M. Friedman**, B.Sc. (N.E. Ill.), M.Sc. (Chic.), Ph.D. (Br.Col.); **Q. Geng**, B.Sc. (Nanjing), M.Sc. (Chin. Acad. of Sciences), Ph.D. (Peking); **P. Hammer**, B.Eng. (Sask.), M.Sc., Ph.D. (Calif., San Diego); **K. Hickey**, B.Sc., M.Sc. (Auck.), Ph.D. (James Cook); **B. Kieffer**, B.Sc., M.Sc. (Clermont-Ferrand), Ph.D. (Grenoble-U. Libre de Bruxelles); **I. Kuscus**, B.Sc., M.Sc., Ph.D. (Middle East Tech. U.); **H. Modzelewski**, B.Sc. (Warsaw), M.Sc. (Inst. Geop. Warsaw), Ph.D. (Br.Col.); **F. Nan**, B.S., M.S. (Beijing I.T.), M.S. (Flor.State), Ph.D. (Mich.State); **E. Pani**, B.Eng., Ph.D. (Cagliari); **N. Phillips**, B.Sc. (Col. School of Mines), M.Sc. (Br.Col.); **R. Pieters**, B.Sc., Ph.D. (Calif., Santa Barbara); **C. Schoof**, M.Sc., Ph.D. (Oxf.); **L. Song**, B. Eng., M.Eng. (Chengdu), Ph.D. (Sichuan); **R. Tosdal**, B.A. (Calif., Santa Barbara), M.Sc. (Qu.), Ph.D. (Calif., Santa Barbara); **D. E. Williams**, B.Sc. (Lond.), Ph.D. (Br.Col.); **A. Wu**, B.S., M.S., Ph.D. (Nanjing); **R. Zhang**, B.S., M.S., Ph.D. (Central South U. of Tech. China).

Post Doctoral Fellows

B. Ainslie, B.Sc. (Qu.), M.Sc., Ph.D. (Br.Col.); **A. Baig**, B.Sc., M.Sc. (Alta), M.A., Ph.D. (Prin.); **J. Brauch**, B.Sc., M.Sc. (Kiel U.), Ph.D. (Bremen U.); **S. Challa**, B.Sc. (Nagar), M.Sc. Tech. (I.I.T.Jawaharlal Nehru), Ph.D. (I.I.T.); **C. Chamberlain**, B.Sc. (Birm.), M.Sc. (Leic.), Ph.D. (Roy. School of Mines, London); **P. Duuring**, B.Sc. (Hons) (Australia), Ph.D. (Australia); **D. Giordano**, Ph.D. (I.M.P.G.Ludwig Maximilian U. Munich); **C. Gueguen**, B.Sc., M.Sc. (Western Brittany, Brest), Ph.D. (Geneva); **B. Hunt**, B.Sc., M.Sc. (Rhodes U.), Ph.D. (Tas.); **T. Ivanochko**, B.Sc., M.Sc. (Br.Col.), Ph.D. (Edin.); **C. I. Lee**, B.S., M.Sc., Ph.D. (Pykyong Nat'l. U.); **N. Lhomme**, B.Sc., M.Sc. (Joseph Fourier U.), Ph.D. (Br.Col./Joseph Fourier U.); **S. Li**, B.Sc., M.Sc., (Shandong), Ph.D. (Chin. Acad. Sciences); **J. Mair**, B.Sc., Ph.D. (W.Aust.); **F. Nauret**, M.Sc. (Universite de Bretagne Occidentale), Ph.D. (Max Planck Inst./ Gutenberg U.); **C. Pausz**, M.Sc., Ph.D. (Vienna); **W. Pretorius**, B.Sc., M.Sc. (Rands Afrikaans), Ph.D. (Qu.); **A. Rust**, B.Sc. (Tor), M.Sc. (Br.Col.), Ph.D. (Oregon); **S. Spiessl**, M.Sc. (Conn.), Ph.D. (Goettingen); **W. Williams**, B.A. (Camb.), M.S. (M.I.T./W.H.O.I.), Ph.D. (Alaska).

DEPARTMENT OF MATHEMATICS

B. Marcus, Head

Honorary Professors

F. Brauer, B.S. (Tor), M.S., Ph.D. (M.I.T.); **C. Graham**, B.A. (Harv.), Ph.D. (M.I.T.).

Professors

A. Adem, B.S.(N.Mex.), Ph.D.(Prin.); **R. Anstee**, B.Math. (Wat.), Ph.D. (Cal.Tech.); **N. J. Balmforth**, B.Sc. (King's Coll., Lond.), Mathematics Tripos Part III, Churchill Coll. U. of Camb., Ph.D. (Camb.); **M.T. Barlow**, B.A., M.A. (Cantab.), Ph.D. (Wales), F.R.S.C.; **K. Behrend**, Dipl. Math. (Bonn), M.A. (Oregon), Ph.D. (Calif., Berkeley); **G. Bluman**, B.Sc. (Br.Col.), Ph.D. (Cal.Tech.); **D. W. Boyd**, B.Sc. (Car.), M.A., Ph.D. (Tor.), F.R.S.C.; **D. C. Brydges**, B.A. (Camb.), Ph.D. (Mich.); **W. A. Casselman**, B.A. (Harv.), Ph.D. (Prin.), F.R.S.C.; **J. Chen**, B.S. (Beijing), Ph.D. (Stan.); **I. S. Ekeland**, M.Sc., Ph.D. (Paris); **J. S. Feldman**, B.Sc. (Tor.), A.M., Ph.D. (Harv.), F.R.S.C.; **J. J. F. Fournier**, B.Sc. (Tor), M.S., Ph.D. (Wis.); **J. Friedman**, B.A. (Harv.), Ph.D. (Calif., Berkeley); **R. Froese**, B.S. (Manit.), Ph.D. (Virginia); **N. Ghossoub**, Lic. Math. (Beirut), Doctorat d'état (Paris), F.R.S.C.; **U. G. Haussmann**, B.Sc. (Tor), Ph.D. (Brown); **R. Kenyon**, B.A. (Rice U.), Ph.D. (Prin.), Habil. (U. Paris-Sud); **L. Keshet**, B.Sc., M.Sc. (Dal.), Ph.D. (Weizmann Inst.); **I. Laba**, M.Sc. (Wroclaw), Ph.D. (Tor.); **P. Loewen**, B.Sc. (Alta.), M.Sc., Ph.D. (Br.Col.); **B. H. Marcus**, B.A. (Pomona Coll.), M.A., Ph.D. (Calif., Berkeley); **A. P. Peirce**, B.Sc. (O.E.S.), M.Sc. (Witw.), Ph.D. (Prin.); **E. A. Perkins**, B.Sc. (Tor), Ph.D. (Ill.), F.R.S.C.; **Z. Reichstein**, B.S. (Cal.Tech.), Ph.D. (Harv.); **D. P. Rolfen**, B.Sc. (Ill. Inst. of Tech.), M.S., Ph.D. (Wis.); **B. R. Seymour**, B.Sc. (Manc.), Ph.D. (Nott.); **D. K. Sjerpe**, B.A. (Br.Col.), Ph.D. (Calif., Berkeley); **G. Slade**, B.A.Sc., M.Sc. (Tor), Ph.D. (Br.Col.); **F.R.S.C.**; **J. Smith**, B.A. (New Coll., Sarasota, Flor.), Ph.D. (M.I.T.); **M. Ward**, B.Sc. (Br.Col.), Ph.D. (Cal.Tech.); **B. T. R. Wetton**, B.Sc., M.Sc. (Vic.B.C.), Ph.D. (Courant).

Associate Professors

M. A. Bennett, B.Sc. (Dal.), M.Sc., Ph.D. (Br.Col.); **J. Bryan**, B.S. (Stan.), M.A., Ph.D. (Harv.); **M. Doebeli**, D.M., Ph.D. (Basel); **J. J. Feng**, B.S., M.S. (Peking), Ph.D. (Minn.); **I. Frigaard**, B.Sc. (Wales) M.Sc., Ph.D. (Oxf.); **R. Gupta**, B.Math. (Wat.), Ph.D. (M.I.T.); **R. Israel**, S.B. (Chic.), Ph.D. (Prin.); **R. A. Kuske**, B.Sc. (WI, Green Bay), Ph.D. (Northwestern); **Y. -X. Li**, B.S. (H.K.), M.S. (Chinese Acad. Sci.), Ph.D. (Brussels); **G.**

Martin, B.S. (Stan.), M.S., Ph.D. (Mich.); W. Nagata, B.Sc., M.Sc. (Br.Col.), Ph.D. (Colorado State); D. H. Peterson, B.A., M.S. (Yale), Ph.D. (Harv.); T. -P. Tsai, B.Sc. (National Taiwan), Ph.D. (Minn.); V. Vatsal, B.S. (Stan.), M.A., Ph.D. (Prin.).

Assistant Professors

P. Brosnan, A.B. (Prin.), M.S., Ph.D. (Chic.); D. Coombs, B.Sc. (Sheff.), M.S., Ph.D. (Arizona); E. N. Cyttrynbaum, B.Sc. (McG.), M.S., Ph.D. (Utah); A. Fraser, B.S. (Tor.), Ph.D. (Stan.); S. J. Gustafson, B.Sc. (Br.Col.), M.Sc. (Tor.), Ph.D. (Courant); A. Holroyd, B.A. (Queen's College), Ph.D. (Camb.); U. Horst, Dipl. Math Economics (Bielefeld), Ph.D. (Berlin); K. Karu, Diploma (Tartu), M.S. (Mich. State), Ph.D. (Boston); C. W. Lamb, B.A. (Swarthmore), M.A., Ph.D. (Ill.); V. Limic, B.S. (Zagreb, Croatia), Ph.D. (Calif., Berkeley); D. Schoetzau, M.S., Ph.D. (ETH, Zurich); L. Scull, B.Sc.H. (Qu.), M.S., Ph.D. (Chic.); J. Smith, B.A. (New Coll., Sarasota, Flor.), Ph.D. (M.I.T.); J. Solymosi, M.Sc. (Eötvös), Ph.D. (Swiss Fed. Inst. of Tech., Zurich); S. Van Willigenburg, B.Sc., Ph.D. (Str. And.); O. Yilmaz, B.S. Elec. Eng., B.S. Math (Bogazici U. Istanbul), Ph.D. (Prin.).

Instructor

K. Liu, B.A. (Huazhong), M.S. (Wuhan), Ph.D. (Alta.).

Associate Member

U. Ascher, Computer Science.

DEPARTMENT OF MICROBIOLOGY AND IMMUNOLOGY

C. J. Thompson, Head

Professors Emeriti

J. J. R. Campbell, B.S.A. (Br.Col.), Ph.D. (C'nell.); J. E. Davies, B.Sc., Ph.D. (Nott.), FRS; D. G. Kilburn, B.A.Sc. (Br.Col.), Ph.D. (Lond.); J. Levy, B.A. (Br.Col.), Ph.D. (Lond.), F.R.S.C.; B. C. McBride, M.Sc. (Br.Col.), Ph.D. (Ill.); R. A. J. Warren, B.Sc. (Birm.), M.Sc. (Br.Col.), Ph.D. (Calif.).

Professors

J. T. Beatty, B.Sc. (Wash.), M.A., Ph.D. (Indiana); L. D. Eltis, B.Sc. (Tor.), Ph.D. (Br.Col.); B. B. Finlay, Ph.D. (Alta.); M. Gold, B.Sc. (Mich.), Ph.D. (Calif., Berkeley); R. E. W. Hancock, B.Sc., Ph.D. (Adel.), F.R.S.C.; W. A. Jefferies, B.Sc. (Vic.B.C.), Ph.D. (Oxon.); P. Johnson, B.Sc. (Liv.), Ph.D. (Dund.); J. W. Kronstad, B.S. (Oregon State), Ph.D. (Wash.); W. W. Mohn, B.A. (Hamilton, N.Y.), Ph.D. (Mich. State); J. K. Smit, B.A. (Calif. State Coll.), Ph.D. (Calif., Berkeley); G. B. Spiegelman, B.Sc. (Ill.), Ph.D. (Wis.); C. Suttle, B.Sc., Ph.D. (Br.Col.); H. S. Teh, B.Sc., Ph.D. (Alta.); C. J. Thompson, B.S. (Wash.; Lee U.), M.S., Ph.D. (Penn. State); G. Weeks, B.Sc., Ph.D., D.Sc. (Birm.).

Associate Professors

R. Fernandez, B.Sc. (Tor.), M.Sc., Ph.D. (Dal.); M. E. P. Murphy, B.Sc. (Alta.), Ph.D. (Br.Col.).

Assistant Professors

N. Abraham, B.Sc., (Dal.), M.Sc. (McG.), Ph.D. (Ott.); E. Gaynor, B.A., Ph.D. (Calif., San Diego); M. Horwitz, B.S., M.S. (Calif., Davis), Ph.D. (Minn.); F. Jean, B.Sc., M.Sc., Ph.D. (Montr.).

Senior Instructors

J. Benbasat, B.A.Sc. (Robert Coll., Istanbul), Ph.D. (Minn.); W. D. Ramey, B.Sc., Ph.D. (Br.Col.); W. Bingle, Ph.D. (Alta.); T. Kion, Ph.D. (Br.Col.).

Lecturers

E. Hinz, B.Sc., M.Sc. (Br.Col.); K. Smith, B.Sc. (Br.Col.); G. Sweet, B.Sc. (Alta.), Ph.D. (Vic.B.C.).

Sessional Lecturer

J. Gordon, B.Sc. (Ill.), M.Sc., Ph.D. (Wis.); J. Sibley, B.Sc., M.Sc. (Sask.).

Adjunct Professor

T. Galitski, B.Sc. (Penn.), Ph.D. (Utah); J. B. Hobbs, M.A. (Cantab.), Ph.D. (Warw.); L. Hood, B.Sc., Ph.D. (Calif. Inst. Tech.), M.D. (Johns H.).

Associate Members

Y. Av-Gay, Medicine; A. Chow, Medicine; M. Grigg, Medicine; C. Helgason, BC Cancer Agency; M. Levings, Surgery; R. McMaster, Medical Genetics; R. J. Redfield, Zoology; N. Reiner, Medicine; J. N. Saddler, Wood Science; J. Schrader, Medicine; D. P. Speert, Pediatrics; R. Stokes, Pediatrics; D. Waterfield, Oral Biological and Medical Sciences.

Research Associates

E. Bekker, Ph.D. (Moscow State); E. Dullaghan, Ph.D. (U. Coll. of Lond.); S. Farmer, Ph.D. (Br.Col.); P. Joshi, Ph.D. (Br.Col.), (Hon.) Research Assoc; N. Mookherjee, B.Sc., M.Sc., (Bom.), Ph.D. (Vic.B.C.); L. Nguyen, Ph.D. (Academy of Science, Czech Rep.); J. Nomellini, Ph.D. (Arizona State); M. Patrauchan, Ph.D. (Nat'l Academy of Science, Ukraine); J. Priatel, Ph.D. (Br.Col.); A. Rozek, Ph.D. (S.Fraser).

Postdoctoral Fellows

S. Braatsch, Ph.D. (Giessen U.); K. Brown, B.Sc. (S.Fraser), Ph.D. (Br.Col.); C. Cosseau, M.S., Ph.D. (Paul Sabatier); D. Frigon, Ph.D. (Ill.); E. Gonclaves, Ph.D. (State U. of Campinas, Sao Paulo); P. Hamill, Ph.D. (Glas.); H. Heuser, Ph.D. (Cologne); K. Hilpert, M.Sc., Ph.D. (Humboldt); H. Hirofumi, Ph.D. (Nagaoka U. of Tech., Japan); H. Jensen, Ph.D. (U. Hospital, N. Norway); S. Lewenza, Ph.D. (Calg.); A. Marr, Ph.D. (Wuerzburg, Germany); M. McLeod, B.S. (Abilene Christian), M.S., Ph.D. (Texas Hlth. Sc. Cntr. at Houston); L. Mesak, Ph.D. (Erlangen-Nuremberg U., Germany); D. Miyazawa, B.Sc. (Tokyo U. of Sc., Biol Sc. & Tech.), Ph.D. (Tokyo Inst. of Tech.); J. Overhage, Ph.D. (Westfälische Wilhelms U., Munster); K. -H. Rhee, Ph.D. (Konkuk, Seoul); D. Ringoir, Ph.D. (Aust., Griffith U. Gold Coast); M. Scott, Ph.D. (Br.Col.); S. Seredick, Ph.D. (Br.Col.); S. Veatch, Ph.D. (Wash.); H. Xu, Ph.D. (Shangdong U., P.R. China); L. Zhao, (Fudon, Shanghai), M.Sc., Ph.D. (Tokyo).

DEPARTMENT OF PHYSICS AND ASTRONOMY

J. Young, Head

Honorary Professors

G. Atkinson, B.A.Sc., M.Sc., Ph.D. (Br.Col.); W. Israel, B.Sc., M.Sc. (Cape T.), Ph.D. (Dub.); H. Lam, B.Sc. (McG.), Ph.D. (MIT); A. Ng, B.Sc. (H.K.), Ph.D. (W.Ont.); L. D. Skarsgard, B.E., M.Sc. (Sask.), Ph.D. (Tor.); E. W. Vogt, O.C., B.Sc., M.Sc. (Man.), Ph.D. (Prin.), D.Sc. (Regina), F.R.S.C.

Professors

I. Affleck, B.Sc. (Trent), A.M., Ph.D. (Harv.), F.R.S.C.; D. A. Bonn, B.Sc., Ph.D. (McM.), F.R.S.C.; J. H. Brewer, B.Sc. (Trin.Coll.Tor.), M.A., Ph.D. (Calif., Berkeley); D. Bryman, B.Sc. (Syr.), M.Sc. (Rutgers), Ph.D. (Virginia Polytech.); M. Choptuik, B.Sc. (Bran.), M.Sc., Ph.D. (Br.Col.); J. E. Eldridge, B.Sc., Ph.D. (Birm.); E. Evans, B.Sc., M.Sc. (N.Y.), Ph.D. (Calif.); G. G. Fahlan, B.Sc. (Br.Col.), M.Sc., Ph.D. (Tor.); M. Halpern, B.Sc., Ph.D. (M.I.T.); M. D. Hasinoff, B.Sc. (Man.), M.S., Ph.D. (Stan.); P. Hickson, B.Sc. (Alta.),

Ph.D. (Cal.Tech.); W. W. Hsieh, B.Sc., M.Sc., Ph.D. (Br.Col.); R. Kiefl, B.Sc. (Car.), M.Sc., Ph.D. (Br.Col.); A. MacKay, B.Sc. (Dal.), M.Sc. (Br.Col.), Ph.D. (Oxon.); W. McCutcheon, B.Sc., M.Sc. (Qu.), Ph.D. (Manc.); J. McKenna, B.Sc., (Wat.), Ph.D. (Tor.); R. Parsons, B.A.Sc., Ph.D. (Br.Col.) P.Eng; H. B. Richer, B.Sc. (McG.), M.Sc., Ph.D. (Roch.); G. Sawatzky, B.Sc., Ph.D. (Manit.); G. W. Semenov, B.Sc., Ph.D. (Alta.), F.R.S.C.; P. C. E. Stamp, B.Sc. (Sus.), M.Sc. (Lanc.), Ph.D. (Sus.); T. Tiedje, B.A.Sc. (Tor.), M.Sc., Ph.D. (Br.Col.), P.Eng, F.R.S.C.; W. G. Unruh, B.Sc. (Manit.), M.A., Ph.D. (Prin.), F.R.S.C., F.R.S.; C. E. Waltham, M.A. (Cantab.), Ph.D. (Birm.), P.Eng; L. Whitehead, B.Sc., M.Sc., Ph.D. (Br.Col.), P.Eng; J. Young, B.A.Sc. (Br.Col.), M.Sc., Ph.D. (Tor.), P.Eng; A. Zhiitnitsky, B.Sc., Ph.D. (Novosibirsk).

Associate Professors

J. Barth, Dipl. Physics (Munich), J. Barth, Dr. Rer. Nat. (Freie Universitat, Berlin); M. Franz, B.Sc. (Comenius U., Czech.), M.A., Ph.D. (Roch.); B. Gladman, B.Sc. (Alta.), M.Sc. (Qu.), M.Sc. Ph.D. (C'nell.); G. W. Hearty, B.Sc. (S.Fraser), Ph.D. (Wash.), I.P.P.; G. W. Hoffmann, B.Sc., M.Sc. (Melb.), Ph.D. (Gött.); A. Marziani, B.A.Sc. (Br.Col.), Ph.D. (Stan.), P.Eng; J. M. Matthews, B.Sc. (Tor.), M.Sc., Ph.D. (W.Ont.); T. Mattison, B.Sc., Ph.D. (M.I.T.); C. Michal, B.Sc. (Br.Col.), Ph.D. (C'nell); K. Schleich, B.A., Ph.D. (Chic.); D. Scott, B.Sc. (Edin.), Ph.D. (Cantab.); V. Sossi, Laurea (Trieste), Ph.D. (Br.Col.).

Assistant Professors

M. Berciu, B.Sc. (Bucharest), M.Sc., Ph.D. (Tor.); A. Damascelli, B.Sc. (Milan), Ph.D. (Gron.); J. Folk, B.Sc., Ph.D. (Stan.); C. Hansen, B.A.Sc. (Br.Col.), Ph.D. (Caltech); J. S. Heyl, A.B. (Prin.), M.Sc. (Camb.), Ph.D. (Calif., Santa Cruz); D. J. Jones, B.A., B.S. (Swarthmore Coll.), M.Phil. (Camb.), Ph.D. (M.I.T.); K. W. Madison, B.S.E. (Tulane), Ph.D. (Texas, Austin); S. M. Oser, B.A. (Wash., St. Louis), M.A., Ph.D. (Chic.); S. Plotkin, B.Sc. (Reinseleer Polytech.), M.Sc., Ph.D. (Ill. at Urbana); S. Rensberg, B.Sc. (Leipzig), M.Sc. (Durham), Ph.D. (Max Planck); J. Rottler, B.Sc., M.Sc. (Konstanz), Ph.D. (Johns H.); M. Rozali, B.Sc. (Tel Aviv), Ph.D. (Texas); I. Stairs, B.Sc. (McG.), M.A., Ph.D. (Prin.); M. Van Raamsdonk, B.Sc. (Br.Col.), M.A., Ph.D. (Prin.); L. Van Waerbeke, B.Sc., M.Sc., Ph.D. (Orsay University); F. Zhou, B.S. (U. of Science & Tech of China), Ph.D. (Wash.).

Senior Instructor

F. E. Bates, B.Sc. (W.Ont.), Ph.D. (Alta.); D. Witt, B.Sc., M.Sc., Ph.D. (Wis., Milwaukee).

Adjunct Professors

J. Behr, B.Sc. (Cal.Tech.), M.A., Ph.D. (Wash.); B. Clark, B.Sc. (S'ton), Ph.D. (U.K. Council Nat. Acad. Awards); P. Corkum, B.Sc. (Acad.), M.A., Ph.D. (Lehigh); J. Dilling, B.Sc., Ph.D. (Heidel.); C. Duzenli, B.Sc. (Qu.), M.A. (McG.), Ph.D. (Alta.); S. Flibotte, B.Sc., Ph.D. (Montr.); J. Iqbal, B.Sc. (Punj.), M.Sc., Ph.D. (Indiana); J. Ng, B.Sc. (Sing.), M.Sc. (Case Western), Ph.D. (Wash.); P. Olive, B.Sc. (Bishop's), M.Sc. (W.Ont.), Ph.D. (McM.); J. Wall, B.Sc. (Qu.), M.A. (Tor.), Ph.D. (A.N.U.); S. Yen, B.Sc., M.Sc., Ph.D. (Tor.); A. Zagoskin, M.Sc. (Kharkov), Ph.D. (Ukrainian Acad. of Sci.).

Associate Members

J. Aldrich, Radiology; A. Celler, Radiology; R. Durand, Pathology and Laboratory Medicine; P. Kozlowski, Radiology; C. MacAulay, Pathology and Laboratory Medicine; A. MacFarlane, Chemistry; M. Shapiro, Chemistry; A. Shotter, TRIUMF; Q. S. Xiang, Radiology; H. Zeng, Pathology.

Sessional Lecturers

E. Koster, B.Sc., M.Sc., Ph.D. (Br.Col.); A. Kotlicki, M.Sc., Ph.D. (Warsaw); P. Newbury, B.Sc. (Manit.), M.Sc., Ph.D. (Br.Col.).

Research Associates

T. Cuhadar Donszelmann, B.Sc., M.Sc., Ph.D. (Bogazici, Turkey); T. D. (Vrije, Holland); B. Klappauf, B.Sc. (Wisconsin), Ph.D. (Texas); R. Liang, B.Sc. (Tsinghua), M.Sc., Ph.D. (Tokyo Inst. of Tech.); M. Lyutikov, M.Sc. (Moscow Eng. Phys. Inst.), Ph.D. (Cal.Tech.); B. Mädlar, Diplom, Ph.D. (Dresden); M. Milner-Bolotin, M.A. (Kharkov), Ph.D. (Texas); M. Mossman, B.Sc. (Acadia), M.Sc., Ph.D. (Br.Col.); K. Okuyama, B.Sc., M.A., Ph.D. (Tokyo); G. Rieger, Diplom, Dr.rer.nat (Ruhr, Bochum); I. Tupitsyn, M.Sc. (Moscow Eng. Phys. Inst) Ph.D. (Russian Research Centre); J. Wendland, Vordiplom (TU Braunschweig), Ph.D., (S. Fraser).

Postdoctoral Fellows

Y. Abdelaziz, B.Sc. (Ain Shan), M.Sc. (New Jersey), Ph.D. (Dayton); I. Adagideli, B.Sc., M.A. (Middle East Techn. Univ.), Ph.D. (Ill. Urbana); W. Auwaerter, B.Sc., Ph.D. (Zür.); C. Blake, M.A., Ph.D. (Oxf.); E. Chapin, B.Sc. (Vic.B.C.), Ph.D. (Inst. Astrophysik, Mexico); M. Cuk, B.Sc. (Belgrade), M.Sc. (Cornell); S. Frolov, B.Sc. (Moscow), Ph.D. (Ill.); D. Hawthorn, B.Sc. (McM.), M.Sc. Ph.D. (Tor.); C. Heymans, M.Sc. (Edin.), Ph.D. (Oxf.); B. Kelleher, B.Sc., M.Sc., Ph.D. (Coll. Cork); N. Knecht, B.Sc., Ph.D. (Regina); P. Koerber, B.Sc. (Leuven), M.Sc. (Ghent), Ph.D. (Brussels); N. Laflourencie, B.Sc., M.Sc., Ph.D. (Paul Sabatier, Toulouse); A. Morello, M.A. (Politecnico of Torino), Ph.D. (Leiden); G. Patanchon, B.Sc. (Bordeaux), M.Sc., Ph.D. (Paris); A. Pattantyus-Abraham, B.Sc. (Qu.), Ph.D. (Br.Col.); A. Rosemann, B.Sc., Ph.D. (Tech. U. Berlin); M. Schechter, B.Sc. (Hebrew), M.Sc., Ph.D. (Weizmann Inst.); J. Sirker, B.Sc. (Cologne), Ph.D. (Dortmund); B. Smith, B.Sc., M.Sc., Ph.D. (McG.); M. Snajdr, B.Sc. (Comenius, Slovakia), M.Sc. (Brock), Ph.D. (Alta.); E. Sorokin, B.Sc., M.Sc., Ph.D. (Hebrew U, Jerusalem); J. Van Leeuwen, M. Sc., Ph.D. (Utrecht); A. Vankatesan, B.Sc. (Madras), M.S. (Arkansas), Ph.D. (Northeastern); G. Warner, B.Sc. (M.I.T.), Ph.D. (Ill.); N. Zangenberg, M.Sc., Ph.D. (Aarhus); J. Zibin, B.Sc. (Vic.B.C.), M.Sc. (S.Fraser), Ph.D. (Br.Col.).

Professors Emeriti

J. F. Carolan, A.B. (Prin.), Ph.D. (Maryland); W. N. Hardy, B.Sc., Ph.D. (Br.Col.), F.R.S.C.

DEPARTMENT OF STATISTICS

W. J. Welch, Head

Honorary Professor

C. van Eeden, B.Sc., M.Sc., Ph.D. (Amst.).

Professors

R. Brant, B.Math., M.Math. (Wat.), Ph.D. (Tor.); P. A. Gustafson, B.Sc., M.Sc. (Br.Col.), Ph.D. (Carnegie Mellon); N. E. Heckman, B.Sc. (Tufts), M.A., Ph.D. (Mich.); H. Joe, B.Sc. (Vic.B.C.), M.Sc. (Br.Col.), Ph.D. (Flor. State); A. J. Petkau, B.Sc. (Manit.), Ph.D. (Stan.); W. J. Welch, B.Sc., M.Sc., Ph.D. (Imperial Coll. Lond.); R. Zamar, B.Sc. (Cordoba), M.Sc. (Pernambuco), Ph.D. (Wash.).

Professor Emeritus

N. Glick, A.B. (Oberlin), M.S., Ph.D. (Stan.); A. W. Marshall, B.C. (Oregon U.), Ph.D. (Wash.); M. Schulzer, B.A., M.A., M.D. (Br.Col.), Ph.D. (Wash.); J. V. Zidek, B.Sc., M.Sc. (Alta.), Ph.D. (Stan.).

Associate Professors

B. Clarke, B.Sc. (Tor.), Ph.D. (Ill.); A. Doucet, M.Eng. (Telecom I.N.T.), Ph.D. (Paris-Sud XI Orsay); L. Wu, B.Sc. (E. China Normal), M.Sc. (Tulane), Ph.D. (Wash.).

Assistant Professors

J. Bryan, B.Sc. (Yale), Ph.D. (Calif., Berkeley); R. Gottardo, M.Sc. (Portland), French Eng. Dipl. (Sciences et Techniques de l'Ingenieur de Lyon), Ph.D. (Wash.); K. Murphy, B.A. (Camb.), M.Sc. (Penn.), Ph.D. (Calif., Berkeley); M. Salibian-Barrera, B.Sc. (Licenciado en Matematica), (Buenos Aires), Ph.D.(Br.Col.).

Associate Members

R. Altman, B.A.Sc. (Waterloo), M.S. (Cornell), Ph.D. (Br.Col.); Y. MacNab, Health Care and Epidemiology; E. Perkins, Mathematics; M. L. Puterman, Commerce; J. J. Spinelli, B.C. Cancer Agency; B. Zumbo, Education.

Adjunct Professors

H. A. Chipman, B.Sc. (Acad.), M.Math., Ph.D. (Wat.); A. J. Coldman, B.Sc. (Sus.), M.A. (W.Ont.), Ph.D. (Br.Col.); N. Le, B.Sc., M.Sc. (Br.Col.), Ph.D. (Wash.); J. Ramsay, B.Ed. (Alta.), Ph.D. (Prin.); S. S. Young, B.S., M.E.S., Ph.D. (N.C. State Univ.).

DEPARTMENT OF ZOOLOGY

W. K. Milsom, Head

Honorary Professors

D. H. Chitty, B.A. (Tor.), M.A., D.Phil. (Oxon.), F.R.S.C.; I. McT. Cowan, O.C., B.A. (Br.Col.), Ph.D. (Calif.); D.Sc. (Br.Col.); LL.D. (Alta.); S.Fraser, D.Env.Sc. (Wat.), F.R.S.C.; C. V. Finnegan, B.A. (Bates), M.S., Ph.D. (Notre D.); C. L. Gass, A.B., B.Sc. (Chico State Coll.), M.Sc., Ph.D. (Oregon); W. S. Hoar, O.C., B.A. (New Br.), M.A. (W.Ont.), Ph.D. (Boston), D.Sc. (New Br.; Nfld.; St.F.X.; W.Ont.), LL.D. (S.Fraser; Tor.), LL.D. (Mt.All.), F.R.S.C.; D. G. Holm, B.Sc. (Br.Col.), Ph.D. (Conn.); A. G. Lewis, B.Sc., M.Sc. (Miami), Ph.D. (Hawaii); N. R. Liley, M.A., D.Phil. (Oxon.); C. C. Lindsey, B.A. (Tor.), M.A. (Br.Col.), Ph.D. (Cantab.), F.R.S.C.; D. Ludwig, Ph.D. (Calif.); J. D. McPhail, M.Sc. (Br.Col.), Ph.D. (McG.); H. C. Nordan, B.S.A., M.A. (Br.Col.), Ph.D. (Oregon State); T. G. Northcote, M.A., Ph.D. (Br.Col.); T. R. Parsons, M.Sc., Ph.D. (McG.), F.R.S.C.; A. M. Perks, M.A. (Cantab.; Oxon.), Ph.D., D.Sc. (St.And.), F.R.S. (Med.) (Lond.); J. E. Phillips, M.Sc. (Dal.), Ph.D. (Cantab.), F.R.S.C.; G. G. E. Scudder, B.Sc. (Wales), D.Phil. (Oxon.), F.R.E.S., F.E.S.C., F.R.S.C.; D. Suzuki, O.C., B.A. (Amherst), Ph.D. (Chic.), LL.D. (P.E.I.), D.Sc. (Acadia), F.R.S.C.; C. F. Wehrhahn, M.Sc. (Alta.), Ph.D. (Calif.).

Professors

M. L. Adamson, B.Sc., Ph.D. (Guelph); J. D. Berger, A.B., A.M., Ph.D. (Indiana); R. W. Blake, B.Sc. (Brist.), Ph.D. (Cantab.); H. W. Brock, B.Sc. (Br.Col.), D.Phil. (Oxon.); A. P. Farrell, B.Sc. (Bath), Ph.D. (Br. Col.); J. M. Gosline, B.A. (Calif.), Ph.D. (Duke), F.R.S.C.; T. A. Grigliatti, B.S. (Calif., Santa Clara), M.A. (San Fran. State), Ph.D. (Br.Col.); D. R. Jones, B.Sc. (Ston.), Ph.D. (E. Anglia), F.R.S.C., C.M.; W. Maddison, B.Sc. (Tor.), Ph.D. (Harv.), Curator of the Spencer Entomological Museum; W. K. Milsom, B.Sc. (Alta.), M.Sc. (Wash.), Ph.D. (Br.Col.); D. G. Moerman, B.Sc., Ph.D. (S.Fraser); J. H. Myers, B.Sc. (Chatham Coll.), M.Sc. (Tufts), Ph.D. (Indiana); S. Otto, B.Sc., Ph.D. (Stan.); D. Pauly, M.Sc., Ph.D. (Kiel), F.R.S.C.; T. J. Pitcher, B.A., M.A., D.Phil. (Oxon.); D. Schluter, B.Sc. (Guelph), Ph.D. (Mich.), F.R.S., F.R.S.C.; A. R. E. Sinclair, B.Sc., Ph.D. (Oxon.), F.R.S.C.; T. P. Snutch, B.Sc., Ph.D. (S.Fraser), F.R.S.C.; J. D. Steeves, B.Sc.,

Ph.D. (Manit.); E. B. Taylor, B.Sc. (Qu.), M.Sc., Ph.D. (Br. Col.), Curator of the Ichthyological Museum; W. Tetzlaff, M.D., Ph.D. (Calg.), Man-in-Motion Spinal Cord Chair; C. J. Walters, B.S. (Humboldt State), M.S., Ph.D. (Colorado State), F.R.S.C.; M. Whitlock, B.Sc. (Baylor), Ph.D. (Vanderbilt).

Associate Professors

V. J. Auld, B.Sc. (Br. Col.), Ph.D. (Tor.); L. Aviles, Lic. Biol. Sci. (P.U.C. Equador), M.Sc., Ph.D. (Harv.); M. Doebeli, Ph.D. (Basel); L. Matsuuchi, A.B. (Barnard Coll.), M.A., M.Phil., Ph.D. (Col.); R. Redfield, B.Sc. (Monash), M.Sc. (McM.), Ph.D. (Stan.); J. Roskams, B.Sc. (Swansea), M.Dip. (Idaho), Ph.D. (Penn State); P. Schulte, B.Sc., M.Sc. (Br. Col.), Ph.D. (Stanford).

Assistant Professors

N. Abraham, B.Sc. (Dal.), M.Sc. (McG.), Ph.D. (Ott.); C. Brauner, B.Sc., M.Sc., Ph.D. (Br. Col.); C. D. G. Harley, B.S. (Brown), Ph.D. (Wash.); D. E. Irwin, B.S. (Stan.), Ph.D. (Calif., San Diego), Curator of Cowan Vertebrate Museum; B. S. Leander, B.S. (Calif. Polytec. State U.), B.S., M.A. (Humboldt), Ph.D. (Georgia); N. Panté, B.A. (Simon Bolivar), M.Sc. (Venezuelan Inst. for Scientific Research), Ph.D. (Brandeis); M. Ramer, B.Sc., Ph.D. (Qu.); J. G. Richards, B.Sc. (W.Laur.), M.Sc. (Wat.), Ph.D. (McM.); J. B. Shurin, B.A. (Macalester Coll.), M.S. (Wisc.), Ph.D. (Chic.); D. Srivastava, B.Sc. (Dal.), M.Sc. (Tor.), Ph.D. (Imperial Coll., London).

Senior Instructors

T. Crawford, B.Sc. (Vic.B.C.), M.Sc., Ph.D. (Wash.); A. M. A. Lacombe, B.Sc., M.Sc. (Bretagne Occidentale), D.E.A. (C.R.S.), Ph.D. (Br.Col.); S. Millen, B.Sc. (Vic.B.C.), M.Sc. (S.Fraser); C. Pollock, B.Sc., M.Sc. (Manit.), Ph.D. (Br.Col.); E. Rosenberg, B.Sc., M.Sc. (S.Fraser).

Instructors

C. Berezowsky, B.Sc., M.Sc. (Sask.), Ph.D. (Guelph); K. M. Nomme, B.Sc., M.Sc. (Br.Col.).

Lecturers

G. Bole, B.S. (William & Mary Coll.), Ph.D. (S.U.N.Y.); A. Cassidy, B.Sc. (Vic.B.C.), M.Sc. (McG.), Ph.D. (Br.Col.); W. Goodey, B.Sc., M.Sc. (Br.Col.), Ph.D. (Monash); R. Harris, B.Sc., M.Sc. (Alta.), Ph.D. (Br.Col.); J. Klenz, B.S.A. (Sask), Ph.D. (Univ. of Mass., Amherst); A. Mattenley, B.Sc. (Br.Col.); K. Needham, B.Sc., M.Sc. (Br.Col.); L. F. Norman, B.Sc., M.Sc. (Vic.B.C.); M. Pineda-Krch, M.Sc., Ph.D. (Lund); C. Sun., B.S. (Nat'l. Taiwan), M.S. (Minn.), Ph.D. (Wisc.).

Adjunct Professors

L. Barrett-Lennard, B.Sc. (Guelph), M.Sc., Ph.D. (Br.Col.); R. Devlin, B.Sc., Ph.D. (Br.Col.); D. Theilmann, B.Sc., M.Sc. (Qu.), Ph.D. (Texas A and M); C. Wood, B.Sc., MSc (Br.Col.), Ph.D. (E. Anglia).

Research Associates

P. E. Axelrood, B.Sc., M.Sc. (Oregon), Ph.D. (Calif.); M. Evelyn, B.Sc. (Br.Col.), Ph.D. (Stan.); H. N. Feldman, B.Sc. (Br.Col.), Ph.D. (Oxon.); L. Fidler, B.Sc. (Penn State), M.Sc. Ph.D. (Br.Col.); M. M. Gilbert, B.A. (Scripps), M.Sc. (Oregon), Ph.D. (Br.Col.); P. A. Guerette, B.Sc. (St.F.X.), Ph.D. (Br.Col.); R. E. Gullison, B.Sc. (Br.Col.), Ph.D. (Prin.); D. G. Harper, B.Sc. (Br.Col.), M.Sc. (Alta.), Ph.D. (Br.Col.); J. W. N. Hodgson, B.Sc. (Sci. and Tech., Kumasi), Ph.D. (N.I.M.R., Lond.); E. C. Humphrey, B.Sc. (Bangor), M.Sc., Ph.D. (Ston); C. Levings, B.Sc. (Hon.), M.Sc. (Br.Col.), Ph.D. (Dal.); M. A. Lillie, B.Sc., M.Sc. (Qu.), Ph.D. (W.Ont.); M. E. MacKay, B.Sc., M.Sc. (Br.Col.), Ph.D. (Dal.); A. Martin, B.Sc., M.Sc. (Queensland); S. Mdma, B.Sc., M.Sc. (Dar-es-Salaam), Ph.D. (Br.Col.); P. Midford, B.S. (Harvey Mudd), M.S. (Yale), Ph.D. (Wis.); R. Mottus, B.Sc.,

M.Sc., LL.B., Ph.D. (Br.Col.); S. Ner, B.Sc., Ph.D. (S'ton); T. A. Pfeifer, B.Sc. (Br.Col.), M.Sc., Ph.D. (Sask.); T. Rogalski, B.Sc., Ph.D. (S.Fraser); M. P. Rosin, B.Sc. (Sask.), Ph.D. (Tor.); R. Suarez, M.Sc. (Philippines), Ph.D. (Br.Col.); M. Taitt, B.Sc. (Lond.), M.Sc. (Durh.), Ph.D. (Br.Col.); A. Tautz, M.Sc., Ph.D. (Br.Col.); I. R. Walker, B.Sc. (Mt.All.), M.Sc. (Wat.), Ph.D. (S.Fraser).

Postdoctoral Fellows

D. Andrade, B.Sc., M.Sc., Ph.D. (U.N.E.S.P. Sao Paulo); H. J. Blok, B.Sc., M.Sc., Ph.D. (Br.Col.); C. Darveau, B.Sc. (Que. Rimouski), Ph.D. (Br.Col.); T. Elmhirst, B.Sc. (Hon.), (Keele), M.Sc., Ph.D. (Warw.); A. Fahlman, B.Sc. (Hawaii Pacific), Ph.D. (Carleton); J. Fletcher, B.S. (Oregon), M.S., Ph.D. (Portland); M. Gardner, B.Sc., M.Sc. (Arlington), Ph.D. (Br.Col.); E. R. Guillaume, Diploma, Ph.D. (Lausanne); L. Harmon, B.S. (Iowa State), Ph.D. (Wash.); L. Kuchel, B.Sc. (Hon.) (W.Aust.), Ph.D. (Q'ld.); H. Marks, M.Sc., Ph.D. (Wageningen); J. E. McLean, B.Sc., M.Sc., (Br.Col.), Ph.D. (Wash.); W. M. Megill, B.Sc. (McG.), Ph.D. (Br.Col.); B. Meisner, B.S. (Oregon), M.S., Ph.D. (Portland); K. Metzger, B.S. (Oregon), M.S., Ph.D. (Colorado); J. Pan, B.Sc., Ph.D. (Ocean Univ, China); L. Prugh, B.A. (Earlham Coll.), Ph.D. (Br.Col.); A. Somasiri, B.Sc., M.Sc., Ph.D. (Br.Col.); C. Spencer, B.A. (Earlham Col.), M.S. (Louisiana), Ph.D. (Georgia); R. Svanback, M.Sc., Ph.D. (Umea); T. H. Vines, B.Sc., Ph.D. (Edin.); J. Witt, B.Sc., M.Sc., Ph.D. (Guelph); W. Wu, B.Sc., Ph.D. (Br.Col.).

Associate Members

V. Christensen, Fisheries Centre, Graduate Studies; M. Healey, Earth and Ocean Sciences; S. Hinch, Forestry, Fisheries Centre, Forestry; W. Jefferies, Biotechnology and Microbiology; B. Kwon, Orthopaedics, Medicine; S. Martell, Fisheries Centre, Graduate Studies; T. O'Connor, Anatomy; J. Richardson, Forestry; K. Soma, Psychology; A. W. Trites, Fisheries, Graduate Studies; A. Vincent, Fisheries Centre, Graduate Studies; T. Zwimpfer, Surgery.

DEAN'S OFFICE

Senior Faculty Advisor: Nanci Martin; Janet Beddoes, Student Development Coordinator; Susan Peters, International Student Coordinator; Cooperative Education Program: M. Javed Iqbal, Director; Sharon Chan, Gwen Litchfield, Cynthia Wickstrom, Lisa Wolfe, Milah Woo, Coordinators; Audrey Davison, Office Administrator; Haydee Iglesias, Office Assistant; Shelley Hall, Program Assistant; Shosha Ji, Marketing Program Assistant; Industry Liaison: Chrissy English, Development Coordinator.

Fax: 604-822-8656

Social Work and Family Studies Website
(www.swfs.ubc.ca)

The School of Social Work and Family Studies offers undergraduate programs leading to the Bachelor of Social Work, the first professional degree in Social Work and the Bachelor of Arts in Family Studies. The School also offers graduate programs leading to a Master of Social Work for persons with a Bachelor of Social Work or equivalent or a Master of Arts in Family Studies; see *Social Work*, p. 280, or *Family Studies*, p. 249, in the Graduate programs section of the website. Refer to the School of Social Work and Family Studies website (www.swfs.ubc.ca) for detailed information regarding admissions, degree requirements, etc.

The School also offers a Ph.D. in Social Work and Family Studies, as well as participating in a doctoral program of individual Interdisciplinary Studies which is offered by the Faculty of Graduate Studies. Applicants to the program must hold a master's degree (or equivalent) from a recognized graduate program in social work or family studies (or a closely related field). Information on graduate programs, requirements, and application procedures is available from the School's admissions office or its website. The School is a member of the Canadian Association of Schools of Social Work (CASSW), the policy and standard-setting body for social work education in Canada. The School's Social Work degree programs are accredited by the CASSW.

BACHELOR OF SOCIAL WORK

The School of Social Work and Family Studies offers a Bachelor of Social Work degree that is accredited by the Canadian Association of Schools of Social Work (CASSW). The educational objective of the B.S.W. curriculum is to provide students with the knowledge, values, and skills necessary for an initial level of professional practice focusing on the interface

between personal problems and public issues. It addresses issues of power and issues of discrimination based on age, race, gender, sexual orientation, class, and culture. The program trains students in generalist social work practice and aims to provide competency in a wide variety of areas, including preparation to work in systems of any size. Critical thinking and structural analysis are, therefore, central to the learning experience offered by the School and to the promotion of social justice and human well-being.

The Bachelor of Social Work degree is a single, integrated program that can be completed in two years on a full-time basis or in three years on a part-time basis. The curriculum includes courses on theory, policy, research, and practice.

ACADEMIC ADVISING

Degree, program, and course advising is provided through the School of Social Work and Family Studies. For further information, call 604-822-2255.

ADMISSION

Admission to the Bachelor of Social Work program is open to:

- persons with a minimum of 60 credits of course work in the Bachelor of Arts program; or,
- persons holding a Bachelor of Arts (or equivalent).

An overall average of at least 68% on the last 60 credits preceding admission is required. Pre-admission studies must include:

- SOWK 200 (a prerequisite to SOWK 201) and SOWK 201 with a minimum average grade of 76% in both courses;
- 6 credits of first-year English;
- 18 credits of course work in the social sciences and humanities. Courses dealing with the Canadian political system, the history of Canada, and First Nations issues are recommended.

Letters of reference and an account of all relevant volunteer and/or paid work experience are required. Assessment of professional suitability is determined by members of the School's faculty through an interview process, which will include a written component. The quality of the applicant's writing skills will be considered in the overall assessment.

Admission is based on the applicant's academic standing and suitability for a career in social work. Special consideration is given to qualified applicants of First Nations ancestry, members of a visible minority, or persons with disabilities.

Interviews are conducted in Stage II following the initial evaluation. Successful applicants completing Stage II will be required to submit a criminal record check.

The program has a limited enrolment, and admission is competitive. Fulfilment of the minimum requirements for admission is not a guarantee of acceptance.

Persons considering application to the program must visit the School's website (www.swfs.ubc.ca). Required application forms with instructions and detailed program information are available to download from the website.

The deadline for application to the program is January 31.

ACADEMIC REGULATIONS

Advancement

Although satisfactory academic performance is prerequisite to advancement, it is not the sole criterion in the consideration of the suitability of a student for promotion or graduation. The School reserves the right to require a student to withdraw from Social Work programs if the student is considered unsuited to proceed with the study or practice of social work.

DEGREE REQUIREMENTS

The Bachelor of Social Work program is comprised of 60 credits of course work for students entering with a bachelor's degree, and 66 credits for those entering the program after completing 60 credits (or more) in the Faculty of Arts. The program integrates academic work with supervised social work practice in a social agency. Academic work includes study of social work practice methods; social policies; human behaviour in individuals, families, groups, and communities; research methods in social work. (The following program curriculum is currently under review and therefore subject to change.)

BACHELOR OF SOCIAL WORK

First or Second Year Prerequisites

SOWK 200	3
SOWK 201	3

Third Year¹

SOWK 305	6
SOWK 310	3
SOWK 315	6
SOWK 316	3
SOWK 320	3
SOWK 335	6
SOWK 337	3
Total Credits	30

Fourth Year

SOWK 400	3
SOWK 405	3
SOWK 415	6
SOWK 416	3
SOWK 425	3
SOWK 440	3

Electives: SOWK440 courses or courses offered in the Faculty of Arts, preferably in the Social Sciences and Humanities² 9/15

Total Credits 30/36

- 1 Third and fourth year SOWK courses are open to B.S.W. students only.
- 2 IHHS 400 level courses are also recommended as electives for B.S.W. students.

Interprofessional Electives

Under the auspices of the Council, the *College of Health Disciplines*, p. 291, is responsible for the administration of interprofessional courses (IHHS), which are recommended as electives to students in Social Work. For more information see Courses (www.students.ubc.ca/calendar/courses.cfm) (IHHS), or visit the website (www.health-disciplines.ubc.ca).

BACHELOR OF ARTS FAMILY STUDIES MAJOR/MINOR

The School of Social Work and Family Studies offers students in the Faculty of Arts the Family Studies Major, an academic program in social science leading to the Bachelor of Arts. See the the School of Social Work and Family Studies website (www.swfs.ubc.ca). The School also offers a Master of Arts program in Family Studies, a Bachelor of Social Work, a Master of Social Work and a Ph.D. in Social Work and Family Studies. For information on graduate programs in Family Studies, see *Family Studies*, p. 249, in the Graduate Studies section.

Family Studies is a multidisciplinary area of study and incorporates three sub-areas: family development and interaction, human development in the family context, and family resource management. Graduates of the Family Studies program may pursue advanced degrees or be employed in government or the private sector in positions related to family research or programs.

ACADEMIC ADVISING

Degree, program, and course advising is provided through the Faculty of Arts Academic Advising Office and the School of Social Work and Family Studies. For further information, see *Academic Advising*, p. 117, as listed under the Bachelor of Arts in the Faculty of Arts chapter of this Calendar, or call 604-822-2255.

ADMISSION

Students interested in the area of Family Studies must first apply for admission to the Faculty of Arts. After completing at least 54 credits of undergraduate course work (but before completing 75), a major in Family Studies can be declared.

ACADEMIC REGULATIONS

The University regulations concerning examination and advancement as listed in the chapter *Academic Regulations*, p. 45, in this Calendar apply. Students registered in the Bachelor of Arts Family Studies Major/Minor must satisfy the requirements of the Faculty of Arts.

DEGREE REQUIREMENTS

Students must satisfy the Faculty of Arts requirements: *English Requirement*, p. 120, *Language Requirement*, p. 121, *Science Requirement*, p. 121, and *Literature Requirement*, p. 122 as listed in Degree Requirements under the Bachelor of Arts in the Faculty of Arts section.

Satisfactory completion of the Language Proficiency Index (LPI) Examination is prerequisite to all first-year English courses at UBC. For further information regarding this Examination, see *Language Proficiency Index Requirement for First-Year English*, p. 120. Students in the Family Studies Major must satisfy the continuation requirements of the Faculty of Arts. See *Continuation Requirements*, p. 119, in Academic Regulations under the Bachelor of Arts in the Faculty of Arts section.

Requirements for the Major

The Family Studies Program (Bachelor of Arts) offers a life-course perspective to understanding families and other intimate relationships as they develop over time. This incorporates both the study of family dynamics in diverse contexts and the predictable ways families change. The program takes a research-based multidisciplinary approach that extends from the individual to interactional processes to cultural influences. Rooted in the curiosity driven inquiry of the liberal arts, the program provides theoretical foundations and research skills for understanding relationships and families, while valuing the application of social science knowledge gained from the study of families.

FIRST AND SECOND YEARS

During the first two years of study, students should complete the general requirements of the Faculty of Arts including English composition, Science, Literature and Language, as well as introductory courses in Family Studies. Students must take:

- FMST 200, FMST 210, FMST 238, and STAT 203.

THIRD AND FOURTH YEARS

Third and fourth years of the program require that students complete:

- FMST 323 and FMST 420.

The remaining 24 credits required to complete a Major in Family Studies may be selected from any Family Studies (FMST) courses.

Students must earn a mark of 55% or better in all of their Family Studies courses.

Minor in Family Studies

Students take at least 30 credits from Family Studies courses which must include 18 credits numbered 300 or above. The credits must include FMST 200, 210, 238, and 420. The remaining 21 credits required for the Minor may be selected from any Family Studies course.

Preparation for Certification in Family Life Education

The Family Studies program is an approved program for providing training for the Certificate in Family Life Education (CFLE) from the National Council on Family Relations. Students interested in this program should contact the Family Studies Undergraduate Coordinator for details on the appropriate choice of courses and the practicum (FMST 415).

GRADUATE PROGRAMS

Information on Social Work and Family Studies master's degree programs and Ph.D. program(s) are described in the "Faculty of Graduate Studies" section under *Family Studies*, p. 249, *Social Work*, p. 280, and *Social Work and Family Studies*, p. 280.

ACADEMIC STAFF

Professors

Anne Martin-Matthews, B.A. (Nfld.), M.A., Ph.D. (McM.); Daniel Perlman, A.B. (Bard Coll.), M.A., Ph.D. (Claremont Grad. School); Graham Riches, M.A. (Cantab.); Mary Russell, B.A., B.S.W., M.S.W. (Br.Col.), M.A., Ph.D. (S.Fraser); James White, B.A. (Colorado Coll.), M.A. (Calg.), Ph.D. (Alta.).

Associate Professors

Phyllis J. Johnson, B.S., M.S. (Kansas State), Ph.D. (Ohio State); Edward A. Kruk, B.A., M.S.W. (Tor.), Ph.D. (Edin.); Sheila Marshall, B.A.Sc., M.A., Ph.D. (Guelph); Paule McNicoll, B.A., B.S.W. (Laval), M.S.W., Ph.D. (Wash.); Deborah O'Connor, B.S.W. (Windsor), M.S.W. (Tor.), D.S.W. (W.Laur.); Brian O'Neill, M.S.W. (Car.), D.S.W. (W.Laur.); James Ponzetti, B.S. (Calif., San Francisco), M.S., Ph.D. (Oregon State); Tim Stainton, B.Sc. (W.Ont.), M.S.W. (Tor.), Ph.D. (Lond.); T. Richard Sullivan, B.A. (Windsor), M.A. (Calg.), Ph.D. (Calif., Berkeley); Frank Tester, B.Sc. (W.Ont.), M.E.Des., M.S.W. (Calg.), D.Phil. (Waikato); Richard Vedan, B.A. (W.Ont.), M.S.W. (Br.Col.), Ph.D. (S.Fraser).

Assistant Professors

Susan Cadell, B.A. (Wat.), M.S.W., Ph.D. (W.Laur.);
Grant Charles, B.S.W. (W.Ont.), M.S.W. (Calg.), Ph.D. (Vic.B.C.); **Nathanael Lauster**, B.A. (Purdue), M.A. (Wash.State), Ph.D. (Brown); **Pilar Riaño-Alcalá**, B.A. (National U. of Colombia, Bogota, Colombia), M.A. (S.Fraser), Ph.D. (Br.Col.); **Margaret Wright**, B.A., M.S.W., Ph.D. (Tor.); **Miu Chung Yan**, Dipl.S.W., B.S.W. (H.K. Polytechnic) M.Sc. (Lond.), (M.S.W. (York), Ph.D. (Tor.); **Carrie Yodanis**, B.S. (Penn.), M.A., Ph.D. (New Hampshire).

Instructor

Elizabeth Robinson (P/T), H.Dept. SSWFS; B.A., B.S.W., M.S.W. (Br.Col.), Dip. Foundation Program in Management for Women (S.Fraser).

X Alternative Study Options

ALTERNATIVE DEGREE CREDIT

CO-OPERATIVE EDUCATION PROGRAMS

Co-operative Education integrates academic study with relevant, supervised, paid work experience. It is based on the principle that relevant work experience, combined with academic programs, plays an important part in the effective professional and personal development of students. Students alternate periods of academic study with periods of applicable work experience. Please contact the appropriate faculty for details. Further information is available at the Co-op Programs website (www.coop.ubc.ca).

Co-operative Education programs are available currently in Applied Science, Arts, Forestry, Commerce and Business Administration, and Science. The Co-operative Education offices in these faculties help in securing potential employers, arranging interviews, supervising work terms, and generally managing the work placement process.

Admission

Admission to a Co-op program is based on academic performance and employment suitability which is usually determined by an application and interview process. Students wishing to enrol must meet all the requirements of their department and faculty. Enrolment is subject to the availability of appropriate work placements.

Courses and Fees

Students admitted to a program must register in, and pay Co-op fees for, a Co-operative Education course for each work term. Co-op courses marked "Pass/Fail" are recorded on student transcripts. All students accepted to a Co-op program must also pay a Co-op workshop fee.

Employment

Although every effort is made to find work-term positions for students enrolled in Co-op programs, no guarantee of employment can be made. The employment process is competitive and a student's academic performance, skill set, attitude, motivation, maturity, and potential all influence employment offers.

Graduation from Co-op Programs

To graduate with a "Co-operative Education" designation noted on the transcript, a student must successfully complete the minimum number of work terms required for the respec-

tive program and obtain a grade of Pass ("P") for each work term.

International Students

Co-operative Education programs are available to international students. Admission criteria for international students are the same as for Canadian students. International students are responsible for ensuring that their student work visas are in good standing during their Co-op work terms.

Transfer Students

Students transferring from another institution may receive credit for Co-op placements at their former institutions. This decision is made through the appropriate Co-operative Education office at UBC. Students must do at least one-half of their Co-op placement courses at UBC.

DISTANCE EDUCATION AND TECHNOLOGY COURSES

For more than fifty years, Distance Education and Technology (DE&T) has collaborated with UBC faculties to develop and provide innovative distance education courses. In 2004, DE&T merged with the Office of Learning Technologies. This has enhanced our ability to integrate new approaches in our course design and online resource development in support of distance learners.

Online and print-based courses are designed for students who are unable to attend scheduled classes on campus, or who want to experience distance learning as part of their program. These courses carry full credit toward degree or certificate programs, in accordance with the requirements of the UBC Faculty concerned.

DE&T offers flexible learning through print-based materials, audio tapes, video and teleconferencing, CD-ROM, and the Internet.

Standards in the final examinations are the same as those for on-campus students.

To learn more about DE&T, course information, course schedules and registration information, visit the Distance Education and Technology website (det.ubc.ca).

GO GLOBAL: STUDENT MOBILITY PROGRAMS

Going Global means getting out there. Being adaptable, learning another language, or living another academic perspective. Connecting with cultures and making friends. Immerse yourself in another world as you study, work, or volunteer. Going Global gives you a unique and meaningful opportunity to help you discover your potential.

Go Global: Student Mobility Programs offer hundreds of opportunities to study, work, and volunteer at partner universities and organizations around the world. UBC students can remain registered at UBC while they attend one of 135 partner universities in 35 countries, complete an international co-op placement, or volunteer at one of 300 charities in 14 countries for up to two consecutive terms.

Exchange Programs

Go Global's student exchange programs offer UBC students from both campuses the opportunity to study at one of 135 partner universities, in over 35 countries abroad and in Canada. Student exchange also makes it possible for students from the partner universities to study at UBC as part of their degree program. Student exchange programs are Senate-approved, reciprocal exchange programs based on institution-to-institution agreements with partner universities, both international and Canadian. UBC students selected to participate remain registered at UBC, pay tuition or program fees and student fees to UBC, and remain eligible for UBC awards, scholarships, and financial aid. Students pursue academic programs that are planned in consultation with their faculties.

To be eligible to apply for a student exchange program, applicants must be registered full-time in a degree program at UBC, and have at least a 70% average for all courses completed during the year in which they are applying. Undergraduate students are eligible to go on exchange in second, third, and fourth year, although some restrictions may apply for students in certain programs. Students must return to UBC for at least one term after their exchange.

Students transferring from a college to a full-time degree program at UBC are also eligible for the program after completing one year at UBC. Students should contact Go Global about applying in the Fall of their first term at UBC.

Graduate students are eligible for exchange and should consult Go Global Graduate Students website (www.students.ubc.ca/global/ubc.cfm?page=grad) for specific information. Commerce graduate exchange is managed through the Master's Program Office of the Faculty of Commerce and Business Administration (Sauder School of Business).

Information sessions are held throughout the first term at both campuses. Partner information (including academic calendars) is available online at the Go Global website (www.students.ubc.ca/global). The website also links to partner universities and explains the selection and application process. Paper copies of partner university materials are located at International

House. Applications are due in December and/or January each year. Please check the Go Global website for the exact dates.

Other Opportunities

STUDY ABROAD

In addition to exchange programs, UBC students can participate in packaged study abroad programs to Latin America, Europe, and Asia through Go Global. These programs are often group-based and include field trips and accommodation in their program fees. In some programs, UBC professors teach UBC courses. A study abroad program can be discipline-based (the Latin American program in Chiapas Mexico, The European Union Study Tour, or the Shanghai Summer Business Program) or may offer a broad course selection of courses (DIS in Copenhagen or the U21 Summer School). To find out more about these options, please visit the Go Global website.

CO-OP ABROAD

Explore your career options in an international co-op placement and gain international experience highly valued by many employers. You must be registered in UBC's co-op program to be eligible. If you are interested in a co-op opportunity abroad you first need to contact your Faculty's co-op office (www.coop.ubc.ca).

VOLUNTEER ABROAD

Volunteering overseas gives you a unique and meaningful opportunity to help you discover your potential. Volunteering for a charity in another country combines the adventure of travelling and making a difference in the global community with gaining experience invaluable to your educational and career goals back in Canada. YouLead will individually match you, your skill set, and your career goals with a charity and provide you with the training you need to make a positive impact on the world. Volunteer opportunities in 14 countries are available in education, medical, caring, environmental, and community fields. Placements can last from two weeks to 12 months. To learn more about international service, or starting your own international project, please visit the YouLead website (www.youlead.org).

INTERNATIONAL STUDY CENTRE AT HERSTMONCEUX CASTLE, ENGLAND
As members of the Canadian University Study Abroad Program (CUSAP), UBC students are eligible for participation at Queen's University International Study Centre at Herstmonceux Castle in East Sussex, England. The program at the International Study Centre includes a First-Year Abroad Option in the Social Sciences and Humanities, and one-term programs in European Studies and International Business

and Law for upper-year students. First-year students must have a minimum 80% average or equivalent; upper-year students must meet UBC's requirement for Student Exchange. Students interested in the First-Year program should consult the Office of the Associate Dean of Arts. Students interested in the Upper-Year program must apply through the UBC Go Global website (www.students.ubc.ca/global). More information on both programs can be found at the Queen's University International Study Centre website (www.queensu.ca/isc).

Programs Not Sponsored by UBC

Students can also choose to study, work, or volunteer in programs sponsored by institutions and organizations other than UBC. These students must make all necessary arrangements on their own. There is an International Opportunities Area at International House, where students can research these options. Before enrolling in any program, students should consult departmental advisors concerning the transferability of course work, degree requirements, and procedures for readmission. Students planning to obtain transfer credit must obtain a *Letter of Permission* from the Faculty in which they are enrolled before leaving UBC (see *Letter of Permission to Study at Another Institution*, p. 50, in the chapter "Academic Regulations").

KOREA-UBC JOINT ACADEMIC PROGRAM

The Korea University-UBC Joint Academic Program started in 2001 with the goal of facilitating cultural exchanges and enhancing academic cooperation between the two institutions. It enriches the educational experience of students by providing an environment that enables participants to take regular credit courses offered by the Faculties of UBC, while enjoying the cultural diversity on campus.

Korea University uses a strict selection process, based on the applicants' English ability and academic performance, to choose 100 student participants every year. The participants can take any regular credit courses (minimum 24 credits per year) offered by the UBC Faculties of Arts, Commerce, Agricultural Sciences, and Science.

The participants arrive at the end of August for UBC's International Students Orientation and stay until the end of school year. Some remain and take summer session courses, while others return to Korea after completion of the program. On completion, students receive the program certificate, and course credits are transferred to the home university.

While at UBC, the students live in campus residences, and actively participate in inter-cultural activities and events offered at each residence. As a part of the program, the KU-UBC House officially opened in October 2002, housing 200 international and domestic students. This is a jointly-financed venture between the two universities. It is located in the Place Vanier residence complex, and includes a traditional Korean garden.

A Korea University professor resides on campus to liaise between the two universities and can be reached via email: kudirector@mail.arts.ubc.ca

For program options please visit the KU-UBC website (www.ku.ubc.ca) or contact:

email: eunsook.park@ubc.ca

TEC DE MONTERREY-UBC JOINT ACADEMIC PROGRAM

UBC is one of Canada's leading institutions for global learning and international growth. Our goal of strengthening connections with Latin America has led to a special partnership with Mexico's Instituto Tecnológico y de Estudios Superiores de Monterrey (ITESM), or Tec de Monterrey (Tec).

Through the Joint Academic Program, Tec students can spend up to one year at UBC and take undergraduate courses in the Faculties of Arts, Commerce, or Agricultural Sciences. Certificates are also available for students who want to specialize in a field of study. Likewise, UBC students can participate in the Study in Mexico program available through Go Global: Student Mobility Programs.

These programs encourage students to engage in cross-cultural learning and develop a greater understanding of the world outside their own country. The Tec de Monterrey-UBC House residence opened September 2003, with the mission of furthering interaction among domestic and international students. All UBC students, and Tec students who intend to study at UBC, are encouraged to apply for residence in Tec de Monterrey-UBC House.

For program options, including a complete list of certificates offered, visit the Tec de Monterrey-UBC website (www.tec.ubc.ca) or contact:

Ms. Silvia Martinez
Director, Tec de Monterrey-UBC Joint Academic Program
Buchanan C373, 1866 Main Mall
Tel: 604-822-0266
Fax: 604-822-2268
Email: silviam@interchange.ubc.ca

To be eligible for the Study in Mexico program, UBC students must first apply to become an exchange student. Access the Go Global website (www.students.ubc.ca/global) for more information.

UBC-RITSUMEIKAN ACADEMIC EXCHANGE PROGRAM

UBC is involved in a unique and exciting academic and cultural initiative with Ritsumeikan University in Kyoto, Japan. The program brings 100 Japanese students to UBC every year to live and study in an integrated academic and social environment. It also provides UBC students with an opportunity to gain international and intercultural experience and insight

by living at “Rits House” or taking specially-designed, integrated courses.

Ritsumeikan-UBC House

Ritsumeikan-UBC House opened in March 1992. The residence provides more than 150 UBC students every year with a unique international living experience. Two or three UBC students are assigned to each four-bedroom unit with one or two students from Ritsumeikan. Each apartment has four private bedrooms, two bathrooms, and shared kitchen, dining, and living areas. Each bedroom has a ResNet connection, Ethernet connection to UBC’s computer network and the entire building is set up for wireless access. The residence provides recreation and support facilities, such as a Japanese-style tatami room, TV lounge and recreation room, laundry, and storage. Rits House is equipped with seminar rooms and RitsLab, a multi-media lab with 22 workstations, each containing a Macintosh computer. The lab is available to all House residents, enabling those who do not have their own computers to access the Internet or their campus Interchange or Netinfo accounts.

Residence programs are offered to encourage residents’ personal and social growth and to facilitate the exchange of ideas and values between cultures. UBC students studying Japanese language and culture, planning to work in or visit Japan, or any student interested in international business, international relations, or cross-cultural communication should consider this one-of-a-kind residential experience.

Academic Program

The UBC-Ritsumeikan Academic Exchange Program offers a number of 3-credit courses in the first and second term that are also open to UBC students. LLED 206A is an introduction to research in the social sciences. LLED 206B is an introduction to sociolinguistics. LLED 226A explores intercultural communication in a variety of settings. LLED 226B is an introduction to new media across the curriculum. The courses are of particular relevance to students who are interested in exploring issues related to language and society.

The program offers two credit courses in the second term, in conjunction with the Faculty of Arts. Arts Studies (ASTU) 201 and 202 are available to both UBC and Ritsumeikan students. Both ASTU 201 (Intercultural Communication) and ASTU 202 (Pacific Rim Studies) were jointly developed by faculty members from both universities and are team-taught. ASTU 202 is cross-listed with Geography (GEOG) 281. The goal of the Arts Studies program is to provide students from both schools with an opportunity to interact in the classroom, to their mutual academic enrichment and benefit.

For further information please contact:

UBC-Ritsumeikan Academic Exchange Program
The University of British Columbia
333-6460 Agronomy Road
Vancouver, BC, Canada, V6T 1W9
Tel: 604-822-8604 (Executive Director)
Tel: 604-822-9511 (Administrative Coordinator)
Fax: 604-822-9515

Information can also be obtained from the Ritslab website (www.ritslab.ubc.ca).

ACCESS STUDIES

Access Studies is a program that offers flexible post-secondary learning options to people of all ages and backgrounds. Through Access Studies, professionals, distance learners, and people with varied academic curiosities have a new opportunity to pursue knowledge. Access Studies students can enrol in university-level courses without registering in a degree program or undergoing the standard admissions process. Students take up to 24 credits in courses in areas of interest. These credits may be later applied to other programs of study. For further information please visit the Access Studies website (www.students.ubc.ca/accessstudies).

OTHER STUDY OPTIONS

CONTINUING STUDIES

Introduction

With approximately 16,000 registrations annually, UBC Continuing Studies offers a wide range of courses and certificate programs for daytime, evening, weekend, or online learning. Programs provide flexible and innovative educational opportunities for individuals who wish to upgrade their skills for career reasons, or explore topics out of general interest. For more information, visit the Continuing Studies website (www.cstudies.ubc.ca) or call 604-822-1444.

Arts, Humanities and Public Affairs

With daytime and evening courses to choose from, these non-credit offerings are your gateway to exploring new interests or investigating favourite topics in more depth. Most of our courses take place in downtown Vancouver at UBC Robson Square and include subject areas such as:

- Art and Architecture;
- Critical Thinking;
- History and Culture;
- Literature;
- Music and Performing Arts ;
- Philosophy and Sociology; and
- World Events, Politics and Health.

For more information, visit the Arts, Humanities and Public Affairs website (www.cstudies.ubc.ca/ahp) or call 604-822-1444.

Centre for Intercultural Communication

UBC Continuing Studies’ Centre for Intercultural Communication provides unique solutions to the cross-cultural challenges that organizations face in today’s global economy. Providing international relocation programs, customized international education programs, and professional development courses, among other services, the Centre collaborates with clients to enhance the performance of individuals, teams, and organizations. For further information on the programs available, call 604-822-1444, email (intercultural.studies@cstudies.ubc.ca), or visit our website (cic.cstudies.ubc.ca).

Computers, Media and Technology Studies

UBC Continuing Studies’ Division of Applied Technology offers daytime, evening, and weekend classes at UBC Robson Square and UBC Point Grey, and are available in part-time, full-time, or online formats. A wide range of courses and certificate programs focus on the Internet, business systems analysis, web analytics, project management, integrated marketing, multimedia, entertainment administration, IT, industry certification, information systems, and software development. For more information, visit our website (www.tech.ubc.ca) or call 604-822-1420.

English Language Institute

The UBC English Language Institute offers courses in English as a second language for adult students who wish to build their competence and confidence in using English. A 12 week (10 weeks in summer) Intensive English Program (IEP) is available year-round at elementary to advanced levels. Successful completion of the IEP Level 600 UBC Certificate in English Language is accepted as proof of English language proficiency for UBC undergraduate admission. Short programs of three or four weeks are also available throughout the year.

For further information, write or telephone the English Language Institute: Continuing Studies, 2121 West Mall, Vancouver, BC, V6T 1Z4; Tel: 604-822-1555; Fax: 604-822-1579; Email (esl@eli.ubc.ca) us; or visit our Website (www.eli.ubc.ca).

French Centre

The French Centre of the Academic Performance Division of UBC Continuing Studies includes programs funded by Heritage Canada and administered by the French Programs Unit of the BC Ministry of Education.

Institut de Français, UBC à Québec: A residential program in a private college situated in the historic setting of Les Plaines d’Abraham gives participants the opportunity to walk to *la vieille ville* while enjoying the magnificent view of the St. Lawrence River from a park setting. This program is specifically designed for FSL and French Immersion teachers, but non-teachers are also welcome.

Explore, Programme de bourses d'été de langues à UBC:

Explore is a five-week program offered in May and June. This unique program offers international students a chance to learn about Canada while studying English or French alongside French- or English-speaking Canadians. It offers Canadians the opportunity to study and speak English or French with students from around the world. This program is part of the Canadian government-sponsored Explore Program (formerly known as Summer Language Bursary Program or SLBP/PBEL).

For information on these and other programs, email (french.centre@ubc.ca) or visit the French Centre website (www.frenchcentre.ubc.ca). If you are looking for non-credit, day, evening, and weekend French classes, please see *Languages, Cultures and Travel*, p. 446, for more information.

Languages, Cultures and Travel

Language Programs and Services offers non-credit courses in 15 languages (French, Spanish, Italian, Japanese, Mandarin, Arabic, Danish, Dutch, German, Punjabi, Russian, Swedish, Thai, Ukrainian, Latin) as part-time weekday, evening, or Saturday morning programs, or as Spring or Summer intensive programs. Courses emphasize oral conversation and cultural acquisition.

Travel programs featuring language immersion are offered throughout the year to destinations such as France, Italy, Mexico, and other Latin American countries. Special programs include immersion weekends at UBC, the Summer Language Bursary Program for university students, the French Institute in Quebec City for BC, and Alberta Teachers and Certificates in French, Spanish, and Italian.

For more information, telephone 604-822-0800 or visit our website (www.languages.ubc.ca).

Life and Career Centre

The UBC Life and Career Centre (LCC), located at UBC's Robson Square Campus, offers programs and services to support the career and life development needs of men and women. Open to the public, LCC services include drop-in counselling for personal and career issues, personality and career testing, and referrals to community resources and agencies. Short courses in areas of life skills, interpersonal communications, and career development help individuals cultivate knowledge and skills for their personal and professional lives.

Certificate programs in Peer Counselling, Diversity in the Helping Relationship, and Working with an Aging Population are offered in flexible formats. Many certificate courses can be taken independently for personal interest. Telephone 604-822-8585 or visit our website (www.lifeandcareer.ubc.ca) for more details.

Opened in August 2005, the LCC builds on the experience, knowledge, and innovation of the UBC Women's Resources Centre (1973–2005), and UBC Career Connections, a collaborative

initiative of UBC Continuing Studies and UBC Career Services.

MATH 098/099 and CALC 001/002

In consultation with the Mathematics Department at UBC, Continuing Studies offers two non-credit pre-calculus courses (MATH 098 and 099) and two non-credit calculus courses (CALC 001 and 002) designed to help students refresh their basic math skills or prepare for first-year calculus credit courses at UBC. Classes are "user-friendly," offer individual attention, and are taught by Continuing Studies instructors.

MATH 099 (Pre-Calculus): Topics include composite, inverse, polynomial, rational, trigonometric, exponential, and logarithmic functions; sequences and series; and analytic geometry. MATH 099 is intended primarily for regular UBC students who need to refresh their basic math skills or who need MATH 099 as a prerequisite for a UBC calculus course (a grade of C+ in Principles of Mathematics 12 is required for MATH 180 and 184). Non-UBC students who have completed high school Math 11 are also welcome. Prerequisite: MATH 098 or a minimum of a "B" in Principles of Math 11.

CALC 001 (Differential Calculus Part 1): Topics include review of piecewise and composite functions; evaluating limits analytically, graphically, and numerically; and using a variety of techniques to determine the derivatives of elementary functions.

CALC 002 (Differential Calculus Part 2): Topics include applications of the derivative, including graphing, optimization problems, and related rates; Newton's method; and recognizing antidifferentiation as the reverse of the differentiation process.

CALC 001 and CALC 002 are intended for students who have passed Principles of Math 12 or MATH 099 with a C+ or B and who would like to be introduced to calculus in a non-threatening environment in which classes are small and individual attention is available. A moderate pace allows students to monitor their progress and gain confidence in the subject. Although CALC 001 and CALC 002 are non-credit courses, students who wish to use the courses as prerequisites to other courses are required to pass several tests and a final exam. Prerequisite: Math 12 or MATH 099.

UBC students enrol in MATH 098, MATH 099, CALC 001, and CALC 002 using the Student Service Centre (www.students.ubc.ca/ssc). The course schedule is listed under the Mathematics Department section. Non-UBC students can register online through the Student Service Centre as Access Studies (www.students.ubc.ca/accesstudies) students. Please note that course fees and withdrawal procedures for MATH 098, MATH 099, CALC 001, and CALC 002 may differ from those of regular credit courses. For more information, phone Continuing Studies at 604-822-9564 or visit our website (www.cstudies.ubc.ca/math).

Non-Credit Programs

Continuing Studies offers over 1,000 non-credit courses each year to increase knowledge of the arts, humanities, and sciences, to improve communication and language skills, and to enhance personal and career development. Certificate programs are offered in a wide variety of topics. Customized training programs for organizations are also available.

Most courses have no prerequisites and many courses take place at UBC Point Grey or in downtown Vancouver at UBC Robson Square. Seasonal course calendars are published in April, September, and January. Please call to receive a free calendar, or view our website (www.cstudies.ubc.ca) for more information. Continuing Studies is located at 410–5950 University Boulevard, 4th Floor, Vancouver, BC, V6T 1Z3; Tel: 604-822-1444; Fax: 604-822-1599; email (information@cstudies.ubc.ca).

Third Age Partners in Learning

The Third Age Partners in Learning program provides a unique learning experience for retired or soon-to-retire people who enjoy reading, learning, and engaging with kindred minds about new ideas and the issues of the day. Study/discussion groups meet weekly at UBC Point Grey and UBC Robson Square (800 Robson St., Vancouver, BC, V6Z 3B7) from September to April. Telephone 604-822-1462 or view the Third Age Partners in Learning website (www.cstudies.ubc.ca/tas).

AGELESS PURSUITS SPRING LECTURE SERIES

For close to three decades, Continuing Studies has been offering the Ageless Pursuits Spring Lecture Series, an intellectually stimulating program featuring morning lectures on topics such as art, archaeology, literature, political science, and history. Participants can join for one, two, three, or all four weeks. Special rates apply for those who are 55 or over. Telephone 604-822-1444 or view the Ageless Pursuits website (www.cstudies.ubc.ca/ageless).

Writing Centre

The Writing Centre offers Writing 098 (WRIT 098), a one-term non-credit course for students who wish to enrol in first-year English courses, but who have yet to achieve a level 5 or 6 on the *Language Proficiency Index (LPI)*, p. 120. The purpose of this course is twofold: to assist students in developing the language and composition skills needed to improve their score on the LPI, and to enable them to prepare for the writing tasks they will face in first-year English and in many other credit courses that require students to write essays and reports. Writing Centre students receive an extended LPI deadline and have priority on waiting lists for first-year English courses.

The Writing Centre offers Writing 099, a one-term non-credit course for students who wish to generate, structure, and expand thought-provoking academic arguments while improving their syntax, grammar, and word selection. Through class discussions, selected

readings, and writing assignments, students learn how to shape personal experiences and opinions into compelling essays, develop awareness of what constitutes effective academic writing, and evaluate their own work critically and systematically.

UBC students enrol in Writing 098 and 099 using the Student Service Centre (www.students.ubc.ca/ssc). Non-UBC students should register through UBC Access Studies (www.writingcentre.ubc.ca/academic/w098_access_studies_reg.html) to receive (at no additional cost) benefits that are not available to students who register through Continuing Studies. The course schedule is listed under WRIT, “University Writing Centre Courses”. Online registration is also available through UBC Continuing Studies (reg.cstudies.ubc.ca/courses.cfm?groupid=AW&description=Writing%20Centre) for those who want to register for the course only. An online section of Writing 098 is available for students who cannot attend courses on campus. Telephone 604-822-9564 for information.

Specialized non-credit courses in intermediate and advanced composition for undergraduate and graduate students, grammar, report and business writing, scientific writing, and English tutor training are also offered by the Writing Centre. Services offered include free tutoring for UBC students, as well as a free online writers’ workshop with an email text submission tool.

Please note that course fees and withdrawal procedures for WRIT 098 and 099 and *MATH 098 and 099*, p. 446, courses may differ from those of regular credit courses.

For more information on Writing Centre courses and services, including writing workshops and tutorial services, telephone 604-822-9564 or visit the Writing Centre website (www.writingcentre.ubc.ca).

HUMANITIES 101

Humanities 101, the cornerstone in UBC’s educational outreach in Vancouver’s Downtown Eastside, is a barrier-free non-credit course provided through the Faculty of Arts to students who have been unable to pursue post-secondary education for financial reasons. With the help of UBC faculty and students, who volunteer their time as lecturers and tutors, Humanities 101 offers an intensive survey of a variety of subjects in the liberal arts and social sciences, including Literature, Film, Philosophy, Social Theory, Gender Studies, Film, and Architecture. Each year we accept 25–30 students, providing them with course materials, bus transportation to and from Point Grey campus, meal tickets, and child care if required. Our students receive full access to all university facilities, including the UBC Libraries. Humanities 101 also operates an adjunct program, Writing 101, organizes Community Reading and Writing Groups in the Downtown Eastside, and holds regular Free Public Lectures at the Carnegie Community Centre in the Downtown Eastside. Admission information is available from the Director. See contact details below:

Peter Babiak, Director
1866 Main Mall, Buchanan C378
University of British Columbia
Vancouver, BC, V6T 1Z1
Tel: 604-822-0028
Email: hum101@interchange.ubc.ca
Web: humanities101.arts.ubc.ca

SCIENCE 101

Science 101 is a four month, non-credit, barrier-free course offered to residents of Vancouver’s Downtown Eastside and other inner-city communities. This course provides an introductory science education in physics, astronomy, chemistry, earth and ocean science, and biology and is taught by University of British Columbia professors and graduate students. Science 101 is available to individuals that have historically had difficulty accessing a university education. There is no fee for the course and no pre-requisite knowledge is required. For more information contact the Science 101 Coordinator, Kim MacDonald (science101@canada.com); telephone 604-649-4565; or visit “Outreach” under the Faculty of Science website (www.science.ubc.ca).

UBC LEARNING EXCHANGE

UBC’s Learning Exchange is a community engagement initiative based in the Downtown Eastside area of Vancouver. The Learning Exchange is an expression of the commitment to community made in Trek 2010 (www.trek2000.ubc.ca), UBC’s strategic plan for the future.

Through its Trek Program, the Learning Exchange brings volunteers from the UBC community – students, staff, faculty, and alumni – to inner-city schools and non-profit organizations where they contribute to community programs while learning about inner-city issues. As much as possible, the volunteer work of students is integrated into academic course work, an approach called Community Service Learning that is new to Canada.

Through its Storefront Programs, the Learning Exchange offers free learning opportunities and resources to people who live and work in the Downtown Eastside and other inner-city neighbourhoods. The storefront programs include opportunities to learn how to use computers and the Internet, an innovative ESL program, and other programs and events designed to inspire people to become life-long learners.

The UBC Learning Exchange (www.learningexchange.ubc.ca) may be reached by telephone at 604-408-5164, or by fax at 604-408-5192.

Other Courses and Educational Events

Check the UBC Learning Exchange website (www.learningexchange.ubc.ca) for up-to-date news of other courses and events.

See *Writing Centre*, p. 446, in this chapter.

2006-07

XI Course Descriptions

Note: This section contains descriptions of all regular courses offered by the University. Some common notations found on course descriptions are illustrated below. Please refer to headings on this page for details.

CHEM 415 (3/6) D CHEMISTRY LABORATORY I. Integrated laboratory course designed to illustrate principles of modern analytical, inorganic, organic and physical chemistry. Prerequisite: All of CHEM 304, CHEM 310, CHEM 311, CHEM 312 and 1 of CHEM 313, CHEM 330. [0-8*-0; 0-8*-0]

HOURS:

First Digit	Lectures
Second Digit	Lab
Third Digit	Discussion or Tutorial or Assigned Problem
*	Alternate weeks
;	Separates terms

COURSE NUMBERING

In most faculties the courses numbered 100 to 199 are primarily for first-year students, those numbered 200 to 299 are primarily for second-year students; similarly 300 to 399 for third-year students and 400 to 499 for fourth-year students. Courses numbered 500 and above are considered graduate-level, and are only available to undergraduates by permission of the department. Where faculties have a different style of classification of courses the level of study is indicated in the description of their study programs.

CREDIT

In the course descriptions the credit value of a course, where given, is shown in parentheses following the course number. In general one credit represents one hour of instruction or two to three hours of laboratory work per week throughout one term of a Winter Session (September to December or January to May). A credit is approximately one semester hour.

COURSES WITH VARIABLE CREDITS

Some courses are listed with a choice of credit value; the form: (2-6) implies that the course may be given for any number of credits from 2 to 6 inclusive; the form: (2/6) implies that the course will be given either for 2 credits or 6 credits.

Where the parentheses are followed immediately by “C”, the credit value of the course will be determined by the student in consultation with the department. Where the parentheses are followed immediately by “D”, the credit value of the course in any particular session will be determined by the department.

In all cases, the maximum credit value is that which may be obtained by a student during the complete program of study (i.e., it is not the maximum for a given year).

PREREQUISITES & COREQUISITES

If specific studies are required as background to a certain course they are notated as such in the course description. A prerequisite is a course that the student must have completed prior to registering for the selected course. A corequisite is a course that the student must take prior to or concurrently with the selected course. In some instances prerequisites and corequisites may be waived at the discretion of the instructor. General prerequisites that apply to all courses in a list are frequently given just before the list. In a dispute over the adequacy of prerequisites, the course instructor will make the decision. In all cases where prerequisites are indicated, the implication is “or the equivalent” and “or the consent of the instructor”.

EQUIVALENTS

An equivalent course indicates that it is a duplicate of the course selected.

HOURS

The number of hours assigned each week to lectures (first digit) and to laboratories (second digit) are shown in square brackets at the end of a course description. Where a third digit appears it refers to periods where discussions, tutorials or assigned problems are done. An asterisk (*) indicates alternate weeks. The first set of digits refers to the first term (September to December) and the second set to the second term (January to May); when only one set is given it means either term. Graduate courses and courses in some faculties are not so designated.

COURSES OFFERED

Not all courses listed are offered each year. Most courses offered in a Winter Session, as well as places and times of class meeting and names of instructors, appear in the online Course Schedule (www.students.ubc.ca/courses). For those

courses not so listed, contact the department concerned.

COURSES LISTED BY SUBJECT CODE

ADHE	Adult & Higher Education
AGEC	Agricultural Economics
AGRO	Agroecology
AGSC	Agricultural Sciences
ANAE	Anesthesia
ANAT	Anatomy
ANSC	Animal Science
ANTH	Anthropology
APSC	Applied Science
ARBC	Arabic Studies
ARCH	Architecture
ARST	Archival Studies

ADHE — ADULT & HIGHER EDUCATION FACULTY OF EDUCATION

ADHE 313 (6) ORGANIZATION OF ADULT BASIC EDUCATION PROGRAMS. Rationale, structures, and functions of basic education completion. Equivalency: ADED 313. [3-0-0; 3-0-0]

ADHE 314 (6) ADULT CORRECTIONAL EDUCATION. Planning prison education; methods and techniques as they are affected by historical, philosophical, structural, and organizational contexts of penal institutions. Equivalency: ADED 314. [3-0-0; 3-0-0]

ADHE 327 (3) TEACHING ADULTS. Planning, conducting and evaluating instruction for adults. Consideration is given to different beliefs and ways of thinking about teaching. Equivalency: ADED 327. [3-0-0]

ADHE 328 (3) INSTITUTIONS OF ADULT EDUCATION. The history, roles, and activities of institutions in the field of adult education. Institutions in Canada, Great Britain, and the United States are emphasized, and some experiences in other countries are examined. Equivalency: ADED 328. [3-0-0]

ADHE 329 (3) DEVELOPING SHORT COURSES, WORKSHOPS AND SEMINARS. Organization and administration of adult education events such as short courses, seminars, workshops, conferences and institutes. Equivalency: ADED 329. [3-0-0]

ADHE 330 (3) THE COMMUNITY PRACTICE OF ADULT EDUCATION. Community based adult education with particular emphasis on the application of knowledge of the social, economic, cultural and political environment in developing and conducting adult education programs with an for individuals and groups. Equivalency: ADED 330. [2-3-0]

ADHE 375 (6) DIPLOMA SEMINAR AND INTERNSHIP IN ADULT EDUCATION. Equivalency: ADED 375. [2-3-0]

ADHE 412 (3) AN OVERVIEW OF ADULT EDUCATION. Survey of adult education theory and practice in Canada and the world. The focus is on the purpose and participation in, adult education, characteristics of learners, and the training of adult educators. Equivalency: ADED 412. [3-0-0; 3-0-0]

ADHE 493 (3) POST SECONDARY EDUCATION: CANADA AND BRITISH COLUMBIA. An overview of post-secondary education in Canada and British Columbia, emphasizing current issues such as diversity of offerings, enrolment, accessibility, and the role that secondary and post-secondary personnel play in facilitating access and retention of students. Equivalency: ADED 493. [3-0-0]

ADHE 500 (3) FOUNDATIONS OF ADULT EDUCATION. Equivalency: ADED 500.

ADHE 501 (3) ADULT EDUCATION AND COMMUNITY. Equivalency: ADED 501.

ADHE 502 (3) HISTORY OF CANADIAN ADULT EDUCATION. Equivalency: ADED 502.

ADHE 505 (3) PERSPECTIVES ON ADULT EDUCATION PRACTICE. Equivalency: ADED 505.

ADHE 508 (3-12) C REVIEW OF RESEARCH IN ADULT AND HIGHER EDUCATION. Equivalency: ADED 508.

ADHE 509 (3) FOUNDATIONS OF HIGHER EDUCATION. Equivalency: HIED 510.

ADHE 510 (3) ADULT EDUCATION RESEARCH TRADITIONS. Equivalency: ADED 510.

ADHE 511 (3) ORGANIZATION AND ADMINISTRATION OF POST-SECONDARY EDUCATION AND TRAINING. Equivalency: HIED 511.

ADHE 513 (3) CURRENT ISSUES IN POST-SECONDARY EDUCATION AND TRAINING. Equivalency: HIED 513.

ADHE 514 (3) ADULT EDUCATION PROGRAM PLANNING THEORY. Equivalency: ADED 514.

ADHE 515 (3) ADULT EDUCATION PROGRAM PLANNING AND EVALUATION PRACTICE. Equivalency: ADED 515.

ADHE 516 (3) ADMINISTRATION OF ADULT EDUCATION AGENCIES. Equivalency: ADED 516.

ADHE 517 (3) PROGRAM EVALUATION IN ADULT AND COMMUNITY EDUCATION. Equivalency: ADED 517.

ADHE 518 (3) THEORY AND RESEARCH ON ADULT LEARNING. Equivalency: ADED 518.

ADHE 519 (3) THEORY AND RESEARCH ON ADULT INSTRUCTION. Equivalency: ADED 519.

ADHE 525 (3/6) D EDUCATIONAL GERONTOLOGY. Equivalency: ADED 525.

ADHE 535 (3) COMPARATIVE AND INTERNATIONAL ADULT AND HIGHER EDUCATION. Equivalency: HIED 535.

ADHE 536 (3) THE COMMUNITY COLLEGE CONCEPT. Equivalency: HIED 540.

ADHE 540 (3/6) D LOCATING ONESELF IN GLOBAL LEARNING. Equivalency: ADED 540.

ADHE 541 (3) ADULT LEARNING: CONTEXTS AND PERSPECTIVES. Equivalency: ADED 541.

ADHE 542 (3) FOSTERING LEARNING IN PRACTICE. Equivalency: ADED 542.

ADHE 543 (3) UNDERSTANDING RESEARCH. Equivalency: ADED 543.

ADHE 544 (3) GLOBAL/LOCAL LEARNING. Equivalency: ADED 544.

ADHE 560 (3) INSTITUTIONAL ANALYSIS AND PLANNING IN POST-SECONDARY INSTITUTIONS. Equivalency: HIED 560.

ADHE 561 (3-12) D PRACTICUM IN ADULT AND HIGHER EDUCATION. Equivalency: ADED 561.

ADHE 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD. Equivalency: ADED 565.

ADHE 580 (3-12) C DIRECTED STUDY. Equivalency: ADED 580.

ADHE 583 (3/6) D ADVANCED SEMINAR IN ADULT EDUCATION. Equivalency: ADED 583.

ADHE 590 (3) GRADUATING PROJECT. Equivalency: ADED 590.

ADHE 598 (3-12) D FIELD EXPERIENCES. Equivalency: ADED 598.

ADHE 599 (6/12) C MASTER'S THESIS. Equivalency: ADED 599.

ADHE 699 (0) DOCTORAL THESIS. Pass/Fail. Equivalency: ADED 699.

AGEC — AGRICULTURAL ECONOMICS FACULTY OF LAND AND FOOD SYSTEMS

Undergraduate courses have been re-named as Food and Resource Economics (FRE). Please see that section.

AGEC 500 (2-6) C GRADUATE SEMINAR.

AGEC 501 (3) APPLIED DEMAND ANALYSIS. Prerequisite: Permission of instructor is required.

AGEC 502 (3) TOPICS IN FOOD MARKET ANALYSIS. Prerequisite: Permission of instructor is required.

AGEC 503 (3) POLICY ANALYSIS FOR FOOD, ENVIRONMENT AND RESOURCES.

AGEC 508 (3) ADVANCED PRODUCTION ANALYSIS.

AGEC 520 (3) TOPICS IN LAND AND FOREST RESOURCE ECONOMICS. Equivalency: FRST 520.

AGEC 521 (3) TOPICS IN AGRICULTURAL ECONOMICS.

AGEC 530 (2-6) C DIRECTED STUDIES.

AGEC 540 (3) INTERNATIONAL AGRICULTURAL DEVELOPMENT.

AGEC 548 (0) MAJOR ESSAY.

AGEC 549 (12) MASTER'S THESIS.

AGRO — AGROECOLOGY FACULTY OF LAND AND FOOD SYSTEMS

BIOL 121 and 140 are prerequisites for AGRO 326, 327, and 328.

AGRO 215 (3) ANIMALS AND SOCIETY. The place of animals in human culture; contemporary use of animals for food production, biomedical research, entertainment and companionship; social and ethical issues raised by human use of animals; protection of animals by society and the law. Prerequisite: At least second-year standing.

AGRO 244 (4) FOREST AND AGRICULTURAL CLIMATOLOGY. An introduction to the basic principles and processes of climatology. Energy and water balance concepts. Atmospheric motion. Microclimate modification and air pollution. Climate classification and land capability. Equivalency: GEOG 204. [3-2-0]

AGRO 260 (6) AGROECOLOGY I. Introduction to the biophysical and socioeconomic factors affecting systems management and production in selected agroecosystems. A fee will be assessed each student to cover field trip costs. Prerequisite: AGSC 250. [1-3-6]

AGRO 311 (3) ANIMAL PHYSIOLOGY I. Physiological principles in animals, including vital life support systems, cellular communication, growth and development. Prerequisite: BIOL 201. [1-0-3]

AGRO 312 (3) ANIMAL PHYSIOLOGY II. Physiological systems of importance to animal production and wildlife management. digestion, reproduction, lactation and environmental adaptation. Prerequisite: AGRO 311. [1-0-3]

AGRO 315 (3) ANIMAL WELFARE AND THE ETHICS OF ANIMAL USE. Scientific assessment of animal well-being, ethical concepts applied to animal use, and animal welfare issues arising in agriculture, biomedical research and other areas. Prerequisite: A minimum of third-year standing in any faculty. [1-0-3]

AGRO 316 (3) EQUINE BIOLOGY, HEALTH AND NUTRITION. Physiology, growth and reproduction of the horse; nutrition, diet formulation and feeding practices; common diseases, their prevention and treatment. Prerequisite: Permission of instructor [3-0]

AGRO 322 (3) HORTICULTURAL TECHNIQUES. An introduction to horticultural practice in an experiential learning format. Plant identification, seeding, propagation, pruning, cultivation media, pesticide application and safety are examined in the context of integrated crop management. An additional fee may be required for the pesticide certification examination. [0-3-3]

AGRO 324 (4) PLANT PHYSIOLOGY. Mechanisms and regulation of functional processes contributing to the assimilation, transport and utilization of water, mineral nutrients and carbon by plants. Prerequisite: BIOL 121 and either (a) CHEM 123 or (b) all of CHEM 111, CHEM 113. CHEM 233 is recommended. Equivalency: BIOL 351, FRST 311. [3-3-0]

AGRO 326 (4) INTRODUCTORY PLANT PATHOLOGY. Study of the ecology of plant pathogenic organisms; principles of disease

development and control. Equivalency: BIOL 316. [3-2-0]

AGRO 327 (3) INTRODUCTION TO ENTOMOLOGY. A survey of the structure, classification and biology of insects; ecology and life-histories of insects; insect-plant relations. Prerequisite: BIOL 121. Equivalency: BIOL 327. [2-3-0]

AGRO 328 (4) WEED SCIENCE. Importance, identification, dissemination and biology of weeds; preventive, cultural, biological and chemical methods of control. Equivalency: BIOL 317. [3-2-0]

AGRO 342 (3) SOIL BIOLOGY. The diversity of soil organisms (bacteria, protozoa, fungi, animals, plants) in natural and managed ecosystems; roles in primary production, nutrient cycling, decomposition and reclamation; interactions between soil organisms; responses to environmental change. Prerequisite: BIOL 121. Equivalency: FRST 310. [2-3-0]

AGRO 360 (3) AGROECOLOGY II. Animals and Plants as Components of Agricultural Ecosystems. This second course in the agroecology core uses a systems approach to investigate the functions and interactions of plants and animals in agricultural systems. A fee will be assessed each student to cover field trip costs. Prerequisite: AGRO 260. [1-0-3]

AGRO 361 (3) KEY INDICATORS OF AGROECOSYSTEM SUSTAINABILITY. This course builds on the foundation of agroecosystems in AGRO 260 and AGRO 360, and the key indicators of sustainability in the faculty core (AGSC 350) with a detailed exploration of biophysical, economic and social ecosystem sustainability indicators for primary production subsystems. [1-0-3]

AGRO 401 (3) SOIL PROCESSES. Integration of soil physics, chemistry and biology in understanding essential soil processes. [3-0-0]

AGRO 402 (3) SUSTAINABLE SOIL MANAGEMENT. Application of fundamental, unifying, soil science principles in sustainable ecosystem management. [1-0-3]

AGRO 403 (3) FIELD AND LABORATORY METHODS IN SOIL SCIENCE. [1-3-0]

AGRO 411 (3) REPRODUCTIVE PHYSIOLOGY AND TECHNOLOGY. A comparative overview of reproductive physiology and reproductive technologies in domesticated and laboratory animals. Prerequisite: AGRO 312. [1-0-3]

AGRO 414 (3) PRINCIPLES OF ANIMAL BREEDING. The basic principles and tools used in animal breeding and genetics in birds, fish, and mammals. Prerequisite: AGSC 350. BIOL 334 or FRST 302 are recommended. [1-0-3]

AGRO 418 (3) INTENSIVE FISH PRODUCTION. Management of fin fish throughout the life cycle; broodstock, egg, larvae and juvenile. Control of environmental factors, including pathogens, for maximum productivity at all life stages. Prerequisite: AGRO 312. [3-2]

AGRO 419 (3) FISH DISEASES. Common diseases of fish. Epidemiology, zoonotic

potential, prevention and treatment of diseases. Prerequisite: Either (a) all of AGRO 311, AGRO 312 or (b) BIOL 353. AGRO 418 is strongly recommended.

AGRO 420 (3) GREENHOUSE HORTICULTURE SYSTEMS. Integrated crop management in controlled environment systems. The primary focus of the course will be on greenhouse vegetable and floriculture production systems. [0-3-3]

AGRO 421 (3) INTEGRATED CROP MANAGEMENT. Development and implementation of an integrated crop management program in horticulture. The course focuses on the linkages between crop production and protection in the management of a horticultural ecosystem. Prerequisite: All of AGRO 260, AGRO 360. [0-3-3]

AGRO 423 (3) ECOPHYSIOLOGY AND HORTICULTURE. Ecophysiological processes in horticultural production systems. Transformations of energy and matter by horticultural crops. Regulation of crop development and performance by biotic and abiotic environmental factors. [1-0-3]

AGRO 424 (4) PLANT BREEDING AND BIOTECHNOLOGY. Genetic Basis and methodology of breeding for improved crop and ornamental plants. Application of tissue culture and molecular biology to plan improvement. Prerequisite: BIOL 201 and one of BIOL 334, FRST 302. Equivalency: BIOL 443. [3-0-2]

AGRO 426 (3) PLANT-MICROBE INTERACTIONS. Biology and physiology of selected plant-microbe relationships. Impacts of plant-microbe relationships on society. Prerequisite: BIOL 201. Equivalency: BIOL 421. [3-2-0]

AGRO 427 (3) INSECT ECOLOGY. Behavioural, population and community ecology of insects. Interaction between insects and plants and the application of the principals of insect ecology to biological control of insects and weeds. Prerequisite: Either (a) BIOL 205 or (b) all of BIOL 327, AGRO 327. Equivalency: BIOL 411. [3-0]

AGRO 428 (3) INTEGRATED PEST MANAGEMENT. Development and implementation of multi-disciplinary pest management programs in agricultural crops. Prerequisite: BIOL 121. [3-2]

AGRO 444 (3) AGROFORESTRY. An introduction to the application of knowledge and principles of agroecology and forest ecology to global agroforestry systems. The course includes a one-weekend field trip that requires a supplemental fee. Prerequisite: An undergraduate course in ecology or equivalent. Equivalency: FRST 444. [1-0-3]

AGRO 460 (3) ADVANCED AGROECOLOGY. Focuses on the relationship between biological diversity and sustainability for the management of agroecosystems. It builds on the core agroecology courses and emphasises ecological interactions between natural ecosystems and agroecosystems, including connections between agroecology and conservation biology. A fee

will be assessed each student to cover field trip costs. Prerequisite: AGRO 360 or equivalent. [1-0-3]

AGRO 461 (3) APPLIED AGROECOLOGY.

Analysis and solution of problems in agricultural production systems through the integration and application of agroecological knowledge and principles. [1-0-3]

AGRO 490 (3) TOPICS IN AGROECOLOGY.

Analysis and interpretation of current issues in agroecology. Prior to registration, students should consult with Student Services in the Faculty of Land and Food Systems. [0-0-3]

AGRO 497 (2-6) D DIRECTED STUDIES.

AGRO 498 (3) UNDERGRADUATE ESSAY. Preparation of a comprehensive and analytical review of an approved topic under the supervision of a faculty member. Consultation with a program adviser is required.

AGRO 499 (6) UNDERGRADUATE THESIS.

Design and execution of an experimental/analytical research project leading to the preparation of a thesis. Prerequisite: Approval of a program adviser; consult before the end of classes in third year.

**AGSC — AGRICULTURAL SCIENCES
FACULTY OF LAND AND FOOD SYSTEMS**

AGSC 100 (1) INTRODUCTION TO LAND, FOOD AND COMMUNITY. Orientation to the programs, learning environment and core values of the Faculty of Land and Food Systems; career programs; survey of professional opportunities and requirements. [1-0-0]

AGSC 250 (6) LAND, FOOD AND COMMUNITY I. Introduction to managed systems and concepts of sustainability; economic, ecological and social components; managed landscapes, agri-food systems, and communities; urban and rural systems; the land, food, nutrition and human health continuum. [4-0-4]

AGSC 301 (3) AQUACULTURE FIELD STUDIES. An orientation to the aquaculture system in BC. Given jointly with Malaspina University-College. Participating students are assessed a fee.

AGSC 302 (3/6) D INTERNATIONAL FIELD STUDIES. Field studies carried out abroad under staff direction. Participating students are assessed a fee.

AGSC 350 (6) LAND, FOOD, AND COMMUNITY II. Introduction to tools and skills required to assess the economic, ecological, social, and technological components of managed landscapes, agrifood systems and communities comprising the land, food, nutrition and health continuum. Prerequisite: AGSC 250. [1-0-6]

AGSC 450 (3) LAND, FOOD, AND COMMUNITY III. Capstone course. Problem-based analysis of complex case studies selected from the land, food and community continuum. Cases are specifically designed to require development of integrated disciplinary and inter-disciplinary analysis. Prerequisite: AGSC 350 and fourth year standing [1-0-3]

AGSC 490 (3) TOPICS IN AGRICULTURAL SCIENCES. Analysis and interpretation of current issues in agricultural sciences. Prior to registration students should consult with Student Services in the Faculty of Land and Food Systems.

AGSC 496 (3) CAREER DEVELOPMENT INTERNSHIP. Supervised technical work experience appropriate to students career goals. Critical thinking, self-analysis of performance in the work environment, and evaluation with mentor and course coordinator. Prerequisites: AGSC 250 and at least third year standing. Enrolment subject to competition and availability of work placements. Prerequisite: AGSC 250 and at least 3rd year standing and permission.

AGSC 500 (3) TUTORING IN PROBLEM-BASED LEARNING. Pass/fail. [0-0-3]

AGSC 501 (3) PARTICIPATORY RESEARCH METHODOLOGIES IN AGRICULTURAL SCIENCES.

AGSC 504 (3) RESEARCH METHODOLOGY IN AGRICULTURAL SCIENCES.

ANAE — ANESTHESIA FACULTY OF MEDICINE

ANAE 430 (2) INTRODUCTION TO ANESTHESIA. Patient assessment and preparation for surgery, conduct of general and regional anesthesia and airway management.

ANAT — ANATOMY FACULTY OF MEDICINE

ANAT 390 (3) INTRODUCTION TO MICROSCOPIC HUMAN ANATOMY. Organ system development, structure and function at the microscopic level. Prerequisite: One of BIOL 120, BIOL 121. BIOL 200 is recommended. [3-0-0]

ANAT 391 (3) INTRODUCTION TO GROSS HUMAN ANATOMY. Structure and function of body regions at the macroscopic level. Prerequisite: ANAT 390. Permission of the instructor is also acceptable. [3-0-0]

ANAT 392 (4) GROSS ANATOMY OF THE LIMBS AND TRUNK. Lectures and laboratory sessions on the human gross and functional anatomy of the limbs and trunk. The course includes the study of pre-dissected specimens. For credit only in the School of Rehabilitation Sciences.

ANAT 393 (4) HUMAN ANATOMY FOR PHYSICAL THERAPY STUDENTS. Microscopic systems anatomy and regional anatomy of the nervous system. Prerequisite: Registration in Rehabilitation Sciences (RSPT) is required. [3-0-0]

ANAT 400 (16) HUMAN ANATOMY. A correlated course of study for medical and dental students of the structure of the human body including gross and radiological anatomy and embryology. Clinics are held in cooperation with the Departments of Medicine, Orthopaedics, Surgery and Family Practice. Both terms.

ANAT 401 (8) MICROSCOPIC HUMAN ANATOMY. A survey course for medical and dental students of the microscopic structure of the human body as studied by light and electron microscopy. Lectures and laboratory sessions. Both terms.

ANAT 425 (4) ELEMENTS OF NEUROANATOMY. An introduction to the structure of the human nervous system. Given only in conjunction with PHYL 425. (Open to Medical and Dental students only.)

ANAT 448 (1-6) D DIRECTED STUDIES IN ANATOMY. Permission of the Head and supervisor required.

ANAT 500 (12) GROSS HUMAN ANATOMY. An advanced laboratory course in the structure of the human body.

ANAT 501 (6) MICROSCOPIC HUMAN ANATOMY. An advanced lecture and laboratory course in the microscopic structure of the human body.

ANAT 502 (8) MICROSCOPIC ANATOMY. The microscopic anatomy of tissues and organs in man. Prerequisite: ANAT 401.

ANAT 504 (3) CELL STRUCTURE AND FUNCTION. Seminar discussions of current topics in vertebrate cell biology.

ANAT 505 (6) GENERAL CYTOLOGICAL BIOPHYSICS. An examination of selected properties of the cell and underlying mechanisms based on the ultrastructure of the cell and on the physical chemistry of open systems.

ANAT 510 (4) NEUROANATOMY. The gross and microscopic study of the nervous system in man.

ANAT 511 (3) FUNDAMENTALS OF BODY DESIGN: BASIC PRINCIPLES IN HUMAN ANATOMY AS ILLUSTRATED BY THE ORGANIZATION OF THE BACK AND UPPER LIMB.

ANAT 512 (3) FUNCTIONAL HUMAN ANATOMY OF HEAD AND NECK SYSTEMS.

ANAT 513 (3) FUNCTIONAL HUMAN ANATOMY OF THE RESPIRATORY, CARDIOVASCULAR AND GASTROINTESTINAL SYSTEMS OF THE THORAX AND ABDOMEN.

ANAT 514 (3) FUNCTIONAL HUMAN ANATOMY OF THE UROGENITAL SYSTEMS: PELVIS AND PERINEUM.

ANAT 515 (3) FUNCTIONAL HUMAN ANATOMY OF THE MUSCULOSKELETAL SYSTEMS: BACK, LIMBS AND JOINTS.

ANAT 516 (3) FUNCTIONAL HUMAN NEUROANATOMY: CENTRAL NERVOUS SYSTEM.

ANAT 517 (3) FUNCTIONAL HUMAN MICROSCOPIC ANATOMY: BASIC TISSUES, ORGANS AND SYSTEMS.

ANAT 527 (3) MUSCLE BIOPHYSICS. Selected topics in muscle contraction at an advanced level. Permission of Head required. Equivalency: PHYL 530.

ANAT 548 (2-6) C DIRECTED STUDIES IN ANATOMY & CELL BIOLOGY.

ANAT 549 (12) M.Sc. THESIS.

ANAT 550 (3) CURRENT TOPICS IN THE MORPHOLOGICAL SCIENCES. Lectures, demonstrations, discussions and student seminars on selected and current topics in cell biology and the anatomical sciences. Attendance is required of all M.Sc. and Ph.D. students in Anatomy & Cell Biology. Prerequisite: Students must be registered in graduate-level studies in Anatomy & Cell Biology. [1-0-0]

ANAT 590 (6) INTRODUCTION TO FUNCTIONAL HUMAN ANATOMY: SURVEY OF MICROSCOPIC ANATOMY, NEUROANATOMY AND GROSS ANATOMY.

ANAT 649 (0) PH.D. THESIS.

ANSC — ANIMAL SCIENCE FACULTY OF LAND AND FOOD SYSTEMS

Most of the undergraduate courses have been re-named as Agroecology (AGRO). Please see this section. The following ANSC courses have credit in the Faculty of Science: 425, 480, 481, 482.

ANSC 500 (3) GRADUATE SEMINAR. Participation in this course is compulsory for all graduate students in Animal Science. [2-0]

ANSC 514 (3-6) D CURRENT TOPICS IN ANIMAL GENETICS. [3-0; 3-0]

ANSC 515 (3) ANIMAL WELFARE AND ANIMAL ETHICS. Prerequisite: Standing as a graduate student. Credit will be added for only one of AGRO 315, ANSC 515.

ANSC 520 (3) NUTRITIONAL PHYSIOLOGY OF DOMESTIC ANIMALS. Current topics in the study of nutrient metabolism in domestic animals; metabolic disorders. Not offered every year.

ANSC 522 (3) PROTEIN METABOLISM AND NUTRITION IN DOMESTIC ANIMALS. Recent advances in the metabolism, utilization and requirements of proteins and amino acids in animals. Credit will not be given for both ANSC 522 and HUNU 511. Not offered every year.

ANSC 524 (2-6) D ADVANCED TOPICS IN ANIMAL NUTRITION. [0-0-3]

ANSC 530 (2-6) C DIRECTED STUDIES.

ANSC 549 (12) MASTER'S THESIS.

ANSC 550 (3) TOPICS IN ANIMAL WELFARE. Prerequisite: AGRO 315. (May be taken as a co-requisite).

ANSC 551 (3) TUTORIALS IN ANIMAL WELFARE RESEARCH.

ANSC 580 (3) ADVANCED TOPICS IN FISH CULTURE. An interdisciplinary seminar course, involving disciplines of importance to fish culturists.

ANSC 649 (0) PH.D. THESIS.

ANTH — ANTHROPOLOGY FACULTY OF ARTS

ANTH 100, 103, 140, 201, 202, 204, 205, 206, 213, 214, 215, 217, 218, 220, 221, 222, 225, 231, 232 and 329 are general courses open to all students. ANTH 100 is a prerequisite to all other third- and fourth-year courses, unless permission of the instructor is obtained. Some courses have additional prerequisites, as listed in the descriptions. For details of current listings, consult the departmental website at www.anso.ubc.ca.

ANTH 100 (3) INTRODUCTION TO CULTURAL ANTHROPOLOGY. Basic concepts and methods of anthropology; culture and race; comparative study of social systems, religion, symbolism, art, and other institutions. Examples are drawn from a variety of cultures.

ANTH 103 (3) INTRODUCTION TO ANTHROPOLOGICAL ARCHAEOLOGY.

Survey of world prehistory, from the emergence of humankind to the beginning of civilizations, set in a framework of the principles of anthropological archaeology and cultural-historical research.

ANTH 140 (3) INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY. A survey of the sub-discipline with discussions of major issues in each area.

ANTH 200 (3) INTRODUCTION TO PROBLEMS IN METHOD AND THEORY IN ANTHROPOLOGY. A survey of basic concepts and procedures in the cross-cultural study of human societies. Prerequisite: ANTH 100.

ANTH 201 (3/6) D ETHNIC RELATIONS. An introduction to the study of the relations between ethnic groups and of the interplay between ethnicity and other social factors. The course examines such concepts as: ethnicity, racism, prejudice, discrimination, assimilation, and multiculturalism. Ordinarily the course deals with ethnic groups in British Columbia, and students are expected to carry out elementary research projects. Equivalency: SOCI 201.

ANTH 202 (3/6) D CONTEMPORARY SOCIAL PROBLEMS. Cultural background to contemporary events; problems of nationalism and regional conflicts, economic and social development, gender, religion and social change. Course may stress a different region of the world in different years.

ANTH 213 (3/6) D WOMEN IN COMPARATIVE PERSPECTIVE. An exploration of topics from Anthropology and/or Sociology focusing on explanations, in current and historical perspective, for variations in the situation of women. Equivalency: SOCI 213.

ANTH 214 (3/6) D THE FAMILY IN CROSS-CULTURAL PERSPECTIVE. A cross-cultural comparison of family and kinship to provide an understanding of variations in the structure and meaning of marriage relations; forms of domestic organization; and the sexual division of labour, property, and inheritance. Equivalency: SOCI 214.

ANTH 215 (3/6) D INTRODUCTION TO JAPANESE SOCIETY. Survey of contemporary Japanese life, with a focus on social organization and cultural patterns. Topics may include family, kinship, rural and urban conditions, economic organization, class and other inequalities, ethnic relations, and introduction of Western culture and value systems. Equivalency: SOCI 215.

ANTH 217 (3) CULTURE AND COMMUNICATION. The study of communication; the relation between communication and its cultural context with emphasis on verbal and non-verbal communication, cross-cultural communication, and cultural differences in the use of oral, literate, and electronic media.

ANTH 220 (3) FIRST NATIONS OF BRITISH COLUMBIA. The cultures, languages, and resources of First Nations, with anthropological perspectives on colonization and development. Prerequisite: ANTH 100.

ANTH 221 (3) CONTEMPORARY FIRST NATIONS CULTURAL EXPRESSIONS. Forms and styles of indigenous expressive arts, and their current place in the lives of British Columbia First Nations. Prerequisite: ANTH 220 is recommended.

ANTH 222 (3) CURRENT FIRST NATIONS ISSUES IN BRITISH COLUMBIA. Anthropological perspectives on current issues of public policy, law, and political activity, as they affect the place of First Nations people in British Columbia. Prerequisite: ANTH 220 is recommended.

ANTH 225 (3) HUMAN ORIGINS. The origin and evolution of the human lineage.

ANTH 227 (3) CULTURE, HEALTH & ILLNESS. Health, illness, sickness and disease in their social and cultural contexts; a cross-cultural examination.

ANTH 231 (3) ANCIENT NORTH AMERICA. Introductory survey of North American archaeology comparing the ancient cultures from all major regions of Canada and the US.

ANTH 232 (3) ANCIENT LATIN AMERICA. The archaeology of ancient Mexico, Central and South America, highlighting recent discoveries about the emergence and growth of civilizations such as the Aztecs, Maya, Zapotec, Inca, Chimor and their ancestors.

ANTH 300 (3/6) D ANTHROPOLOGICAL THEORY. Models of society and culture in anthropology. Prerequisite: ANTH 200.

ANTH 302 (3/6) D ETHNOGRAPHY OF SOUTH ASIA. A specialized study of ethnographic and theoretical problems relating to South Asia.

ANTH 303 (3/6) D ETHNOGRAPHY OF SPECIAL AREAS. A specialized study of ethnographic and theoretical problems in one area. Different culture areas or regions may be selected each term. Consult the Department for this year's offerings.

ANTH 304 (3/6) D ETHNOGRAPHY OF THE NORTHWEST COAST. Specialized study of ethnographic and theoretical problems of the region.

ANTH 305 (6) THEORY IN ARCHAEOLOGY. Explores models of culture change and culture used by prehistorians, with emphasis on formulation of research designs in order to work on specific problems in culture history, settlement, ecology, evolution, and technological change. The course views archaeological theory in relation to anthropological theory in general. Prerequisite: ANTH 103.

ANTH 306 (6) SUMMER FIELD TRAINING IN ARCHAEOLOGY. Intensive training in excavation techniques and interpretation, including mapping procedures, recording, preliminary analysis, and reporting. Students will participate in an excavation for the Summer Session and will use this excavation as a basis for lectures, discussions and reports. Additional Field Trip Fees are charged for this course.

ANTH 312 (3/6) D GENDER RELATIONS. The nature of gender relations, their social and cultural expression, and theories of gender inequality drawn from anthropological or sociological research. Equivalency: SOCI 312.

ANTH 315 (3/6) D JAPANESE CULTURE AND SOCIETY. An intensive examination of modern industrial Japan, including such topics as: demographic characteristics, class structure and inequality, industrial organization, political structure and conflict, ethnic relations, value systems, urban and rural traditions and cultural background of current events. Major theories of Japanese culture and economic development will be studied. Equivalency: SOCI 315.

ANTH 316 (3/6) D POLITICAL ANTHROPOLOGY. Comparative study of political organization; leadership and non-centralized and centralized political systems.

ANTH 317 (3/6) D LINGUISTIC ANTHROPOLOGY. A survey of the ethnographic uses of language data and the techniques of linguistic analysis.

ANTH 318 (3) OLD WORLD PALAEOLITHIC ARCHAEOLOGY. The archaeology of early human evolution, spanning the period from the emergence of the first tool-using hominids to the end of the Upper Palaeolithic and Mesolithic periods. Topics to be covered include: Lower and Middle Palaeolithic archaeology, adaptations of early hominids, emergence and spread of modern humans, Upper Palaeolithic technology and symbolism.

ANTH 319 (3) THE EMERGENCE OF OLD WORLD CIVILIZATIONS. A survey of the archaeological evidence and theories for the origins and spread of settled village life, food production systems, and complex social and political organization Begins with the Early Neolithic period and continues through to the appearance of the old world civilizations.

ANTH 321 (3) THE CANADIAN FAR WEST IN PREHISTORY. A survey of prehistoric archaeology west of the Rocky Mountains. Reconstruction of prehistoric cultural developments from the earliest migrations up to histor-

ical contact. Prerequisite: ANTH 103. Permission of the instructor is also acceptable.

ANTH 322 (3) ARCHAEOLOGICAL FOUNDATIONS OF EAST AND SOUTHEAST ASIA. Survey of the archaeology of East and Southeast Asia, with an emphasis on the beginnings of the economic, social, political, and artistic traditions and systems of the great civilizations, and the conditions in which they arose. Theories of cultural development emphasizing Neolithic and state-level societies will be discussed. Prerequisite: ANTH 103. Permission of the instructor is also acceptable.

ANTH 323 (3) ARCHAEOLOGICAL FOUNDATIONS OF MesoAMERICAN CIVILIZATIONS. A survey of the archaeology of Mesoamerica, concentrating on the origins and development of complex society. Theories on the evolution of civilization will be compared with the archaeological evidence. Prerequisite: ANTH 103. Permission of the instructor is also acceptable.

ANTH 324 (3) PRIMATE EVOLUTION. Primate evolution over the past 65 million years. Compares fossil with modern primates, and considers key issues and theories in primate evolution. Prerequisite: One of ANTH 140, ANTH 225.

ANTH 325 (3/6) D PALEOANTHROPOLOGY. Origin and development of the hominids. The hominid fossil record, and theories relating to hominid evolution. Prerequisite: One of ANTH 140, ANTH 225.

ANTH 326 (3) PRIMATE BEHAVIOUR AND ECOLOGY. A comprehensive survey of the living primates, with emphasis on ecology, social organization, social behaviour and field studies.

ANTH 329 (3/6) D ANTHROPOLOGY AND FIRST NATIONS OF CANADA. Anthropological perspectives on current First Nations issues in Canada. Specific topics will be selected each year. Consult Department for current description. Not for credit in the Major in Anthropology.

ANTH 330 (3) ANTHROPOLOGY OF RURAL PEOPLES AND THE GLOBAL ECONOMY. A comparative study of rural peoples (such as small-scale horticulturists, artisans and craft workers, peasants, fisherfolk, or industrial/manufacturing workers) in the global economy.

ANTH 331 (3/6) D ANTHROPOLOGY OF ART. Anthropological perspectives on artifacts and symbolic forms: their production, use, and function in relation to technology, ecology, social organization, and cognitive structures.

ANTH 332 (3/6) D ORAL TRADITION. An ethnographic perspective on the dynamics of oral tradition in various oral and literate cultures; the characteristics and roles of oral genres including folktales, genealogy, oral history, autobiography, and myth in these societies; and the relationship between orality and literacy.

ANTH 341 (3/6) D AN INTRODUCTION TO MUSEUM ANTHROPOLOGY. The development of anthropology in museums from the late

19th century to the present day; material culture research; the study of museums as social institutions. The course is a prerequisite for ANTH 431 and 432.

ANTH 350 (3/6) D ETHNOGRAPHY OF THE PACIFIC ISLANDS: POLYNESIA AND MICRONESIA. Major cultural groupings in Polynesia and Micronesia, emphasizing both traditional cultures and the incorporation of the region into modern international institutions.

ANTH 351 (3/6) D ETHNOGRAPHY OF THE PACIFIC ISLANDS: MELANESIA. Major cultural groupings in Melanesia, emphasizing both traditional cultures and the incorporation of the region into modern international institutions.

ANTH 353 (3) ETHNOGRAPHY OF LATIN AMERICA. Indigenous peoples of Latin America, emphasizing both pre-Columbian cultural traditions and socioeconomic and cultural changes from the Colonial period to the present.

ANTH 360 (3) INTRODUCTION TO ECOLOGICAL ANTHROPOLOGY. Analysis of the relations between human societies and the ecological aspects of their environment (including technology, society, and ideology). Previously ANTH 460.

ANTH 400 (3/6) D HISTORY OF ANTHROPOLOGY. The development of anthropological theory and practice in institutional contexts. Prerequisite: ANTH 300.

ANTH 401 (3/6) D FIRST PEOPLES OF NORTH AMERICA. A survey of indigenous cultures and ethnographic literature of North America. Consult Department for current description.

ANTH 402 (3/6) D ETHNOGRAPHY OF CHINA. Advanced studies in the ethnography of China, premodern and contemporary. Topics may include kinship, rural and urban social structure, stratification and mobility, religion, national power structures, and social change in Chinese society.

ANTH 403 (3/6) D ETHNOGRAPHY OF SPECIAL AREAS. An advanced study of ethnographic and theoretical problems. A different region may be studied each term.

ANTH 404 (3/6) D ETHNOGRAPHY IN CIRCUMPOLAR NORTH: COMPARATIVE PERSPECTIVES. An examination of relationships between indigenous people and nation states in Greenland, Canada, Alaska and Siberia, using ethnographic methods.

ANTH 406 (3/6) D ANALYTICAL TECHNIQUES IN ARCHAEOLOGY. A survey of methods and techniques in the interpretation of archaeological data; practical experience in processing and analyzing archaeological materials by means of a research project. Students will prepare manuscripts, drawings and photographs for publication and will learn the basics of lithic and faunal analyses. Prerequisite: ANTH 305. Permission of the instructor is also acceptable.

ANTH 407 (3) PRINCIPLES OF FIELD WORK. An examination of field work as the basic setting for ethnographic research. Research

design; relationships with study participants, field techniques, and data analysis and presentation.

ANTH 408 (3) FIELD METHODS. Intensive examination and application of selected methods of ethnographic data-collection, e.g., visual anthropology, anthropological interviewing, genealogies, ethnographic semantics, life histories, oral traditions. Consult department for current description.

ANTH 409 (3/6) D TOPICS IN APPLIED ANTHROPOLOGY. Advanced study of the theory and practice of applied, action, and consultancy anthropology. Topics may include the application of anthropology to questions of aboriginal rights and title, education, medicine, development, women and development, tourism, and other social issues.

ANTH 410 (3/6) D PREHISTORY OF A SPECIAL AREA IN ASIA OR OCEANIA. Analysis of the prehistory of a selected area, including a summary of the literature and the discussion of relevant problems. The course will provide background for students in area studies such as Oceania and the Far East. Prerequisite: One of ANTH 305, ANTH 321. Permission of the instructor is also acceptable.

ANTH 411 (3/6) D PREHISTORY OF A SPECIAL AREA IN THE NEW WORLD. Analysis of the prehistory of a selected New World area, including a summary of the literature and discussion of relevant problems. The course will provide background for students in North, Central, and South American area studies. Typical offerings include the prehistory of Mesoamerica, the Southwest, North America and the Mayan areas. Prerequisite: One of ANTH 305, ANTH 321. Permission of the instructor is also acceptable.

ANTH 413 (3/6) D FAMILY AND KINSHIP. A cross-cultural survey of ways of defining family relationships and kinship organizations, including theoretical analysis as well as case studies. Equivalency: SOCI 413.

ANTH 415 (3/6) D RELIGION AND SOCIETY. Comparative study of religious beliefs, practices, and movements; relations between religious, social, and political institutions; religion as a force for stability and change; anthropological/sociological theories of religion.

ANTH 416 (3/6) D THE ETHNOGRAPHY OF JAPAN. Through an analysis of contemporary ethnographic accounts of Japan, this course addresses the interplay of cultural predispositions with modern organizational structure, differences in rural/urban lifestyles, family relationships, gender roles, health, aging and Japan's international role. Same as SOCI 416. Prerequisite: One of ANTH 215, SOCI 215, ANTH 315, SOCI 315. Permission of the instructor is also acceptable. Equivalency: SOCI 416.

ANTH 417 (3/6) D LANGUAGE, CULTURE, AND COGNITION. The relationships between linguistic and cultural phenomena; how language affects normative and cognitive systems of thought and behaviour. Prerequisite:

One of ANTH 100, LING 200. May be taken as co-requisites.

ANTH 418 (3/6) D SOCIAL STATISTICS. Primary emphasis on applications of statistical techniques to quantitative and qualitative data in both Anthropology and Sociology. Prerequisite: STAT 203. Permission of the instructor is also acceptable. Equivalency: SOCI 418.

ANTH 420 (3/6) D ARCHAEOLOGY OF BRITISH COLUMBIA. An advanced study of the prehistoric archaeology of coastal and interior Native Peoples. A critical analysis of the archaeological evidence and interpretations of prehistoric cultural developments from the earliest migrations up to historical contact. Prerequisite: One of ANTH 305, ANTH 321. Permission of the instructor is also acceptable.

ANTH 422 (3) MODES OF SUBSISTENCE. The nature of subsistence systems antedating or alternative to modern commercial systems. Introductory survey with basic readings; focus on problems such as the development of complex cultures without agriculture, the ambiguity of hunting and gathering, agricultural and other "intensification", "orchestration" of the use of adjacent microenvironments. Of interest to students of archaeology, anthropology and cultural geography.

ANTH 424 (3/6) D APPLIED ARCHAEOLOGY. A review of the history and current practices of cultural heritage resource management. Includes legislative background and governmental organization as well as current practices in resource assessment and in salvage archaeology. The relationships between governments, consultants, sponsors and Native Peoples bands are explored with emphasis on recent developments. Prerequisite: ANTH 305. Permission of the instructor is also acceptable.

ANTH 427 (3) TOPICS IN MEDICAL ANTHROPOLOGY. Anthropological perspectives on health, illness, and disability as represented by classic and contemporary research in selected topics in medical anthropology including disease and human evolution, illness and human ecology, culture and epidemiology, ethnomedical systems, the relationship between folk and biomedicine and the cultural construction and social organization of health care, illness and disability. Specific content will vary from year to year. Consult the Department brochure. Prerequisite: One of ANTH 100, SOCI 100.

ANTH 431 (3/6) D STUDIES IN MUSEUM ANTHROPOLOGY. Issues concerning management of museum collections and their public presentation, addressing questions of access, collaboration and appropriate use of cultural property. Museum of Anthropology facilities are used. Prerequisite: ANTH 341.

ANTH 432 (3/6) D THE ANTHROPOLOGY OF PUBLIC REPRESENTATION. The public presentation and interpretation of anthropological concepts and materials utilizing the programs and facilities of the Museum of Anthropology. Prerequisite: ANTH 341. Permission of the department is also acceptable.

ANTH 433 (3/6) D DIRECTED STUDIES. General reading and/or a research undertaking, with the agreement, and under the supervision, of a Department faculty member selected by the student. No more than 6 credits of Directed Studies may be taken for credit toward the Major or Honours program.

ANTH 449 (6/12) D HONOURS TUTORIAL. Will usually require the presentation of at least one research paper.

ANTH 451 (3/6) D CONSERVATION OF ORGANIC MATERIALS. Principles and elementary techniques for conserving organic ethnological and archaeological materials. Recommended for students intending to work with cultural materials. Open to Major and Honours students; other students by permission of the instructor.

ANTH 452 (3) CONSERVATION OF INORGANIC MATERIALS. Principles and elementary techniques for conserving inorganic ethnological and archaeological materials. Recommended for students intending to work with cultural materials. Open to Major and Honours students; other students by permission of the instructor.

ANTH 461 (3) ANTHROPOLOGICAL STUDY OF LOCAL ECOLOGICAL KNOWLEDGE. Analysis of the concepts of ecological anthropology via the medium of local ecological knowledge. ANTH 360 is recommended as background.

ANTH 462 (3) SPECIAL TOPICS IN ECOLOGICAL ANTHROPOLOGY. May include environmental discourse and social movements, anthropological contributions to ecological management systems, or examination of emerging issues in the field. ANTH 360 is recommended as background.

ANTH 470 (3/6) D TOPICS IN CONTEMPORARY THEORY. Selected topics in contemporary social and cultural theory which contribute to anthropological analyses. Topics may include Marxist anthropology, critical theory, theories of culture, phenomenology, behavioural ecology, structuralism, hermeneutics, formal theory and examination of specific social theorists.

ANTH 471 (3) ANTHROPOLOGY OF LAW. Cross-cultural study of the operation of law within contested systems of meaning, the social organization of law, and forms of consciousness of the participants in legal/justice practices.

ANTH 495 (3/6) D ADVANCED STUDIES IN ANTHROPOLOGY. An intensive examination of selected topics in Anthropology. Consult the Department for this year's offerings.

ANTH 500 (6) HISTORY OF ANTHROPOLOGICAL THOUGHT. This course will consider various approaches to anthropology, from classical to contemporary.

ANTH 501 (2-6) D SOCIAL STRUCTURE AND KINSHIP.

ANTH 502 (2-18) D ADVANCED ETHNOGRAPHY OF A SPECIAL AREA.

ANTH 505 (2-6) D RELIGION AND SOCIETY.

ANTH 506 (3/6) D CURRENT RESEARCH IN ANTHROPOLOGY. The relationship between current theoretical issues and research methods.

ANTH 510 (3-6) C COMPARATIVE AND DEVELOPMENTAL STUDIES IN ARCHAEOLOGY.

ANTH 512 (2-6) D LANGUAGE AND CULTURE.

ANTH 513 (3-6) D ADVANCED STUDIES IN FEMINIST ANTHROPOLOGY. Feminist approaches to ethnography, theory, methodology; current issues in feminist anthropology; gender relations; feminist anthropology and postmodernism.

ANTH 515 (2-6) D CULTURAL EVOLUTION AND CULTURAL ECOLOGY.

ANTH 516 (3) QUALITATIVE METHODS IN ANTHROPOLOGY. A discussion of selected methods used to observe, describe, and interpret cultural phenomena and social organization. The course will consider such techniques as participant observation, interviewing, ethnographic semantics, life histories, componential analysis and photography. Attention will also be given to ethics in anthropological research and writing and to such analytic matters as the nature of description, conceptualization, generalization and content analysis.

ANTH 517 (3) ARCHAEOLOGICAL METHODS. A discussion of selected basic data-gathering methods in their relation to the development of ideas about the archaeological record.

ANTH 518 (3) MUSEUM METHODS. Analytical approaches to the study of museums and collections. Methods of field collecting, collections research, laboratory procedures, visitor studies, social organization of museum and related cultural industries, exhibit and program evaluation techniques and the ethics of museum research and practice. Prerequisite: ANTH 431. Permission of the instructor is also acceptable.

ANTH 519 (3/6) D SEMINAR IN MEDICAL ANTHROPOLOGY.

ANTH 520 (2-6) C ADVANCED PREHISTORY OF A SPECIAL AREA.

ANTH 527 (3) ADVANCED ARCHAEOLOGICAL METHODS. An intensive review of analytical approaches to the study of archaeological data and their applications. Includes research design; sampling strategies; analytical lab procedures; classification and typology; and multivariate analysis and other statistical procedures. Prerequisite: ANTH 517.

ANTH 528 (3) ADVANCED QUANTITATIVE METHODS. The purpose of this course is to introduce students to the anthropological application of a variety of quantitative techniques. Specifically there will be sections on sampling designs, analysis of variance and regression, multi-way contingency tables, and multivariate analysis. Topics will be presented initially in a series of lectures which will outline the logic and exhibit applications which have been made. Students will then be expected to

generate their own application and presentation. Access to data files specific to the substantive field—cultural anthropology, archaeology, physical anthropology—will be provided. Prerequisite: ANTH 418.

ANTH 530 (2-6) D SOCIAL CHANGE.

ANTH 532 (2-6) D FIELD METHODS.

ANTH 534 (2-6) D SPECIAL ADVANCED COURSES.

ANTH 540 (2-6) D ADVANCED SEMINAR.

ANTH 541 (2-6) D ADVANCED SEMINAR AND WORKSHOP ON MUSEUM STUDIES. Prerequisite: ANTH 431.

ANTH 545 (2-6) D GRADUATE RESEARCH SEMINAR.

ANTH 548 (0) MAJOR ESSAY.

ANTH 549 (6/12) C MASTER'S THESIS.

ANTH 551 (3/6) D CULTURAL STUDIES IN COMMUNICATION AND INTERPRETATION. History, theories, principles and techniques of communication and interpretation of cultural materials. Topics include examination of how various media (script, objects, film, video) are used to interpret histories, society, and culture in museums, art galleries, historic sites and related areas; and how communication programs are planned, implemented and assessed. Prerequisite: ANTH 431. Permission of the instructor is also acceptable.

ANTH 649 (0) PH.D. THESIS.

APSC — APPLIED SCIENCE FACULTY OF APPLIED SCIENCE

APSC 110 (3) CO-OPERATIVE WORK PLACEMENT. Supervised, technical work experience in an established company or organization for a minimum of three months. Technical report. Restricted to students meeting the requirements of the Faculty of Applied Science and the Co-operative Education Program.

APSC 121 (1) SOCIETY AND THE ENGINEER. The course deals with the social and cultural context within which engineering is practiced. Specific topics may vary from year to year but typically include engineering ethics, professionalism, employment equity, multi-culturalism, gender, First Nations and environmental issues. [1-0-0]

APSC 122 (0) INTRODUCTION TO ENGINEERING. Non-credit course designed to introduce students to Engineering. Information on the Faculty, the profession and the particular skills and type of work done by practising engineers in different disciplines. [1-0-0]

APSC 150 (5) ENGINEERING CASE STUDIES. Application of scientific principles and technical knowledge to practical problems. Introduction to the engineering design process and to engineering graphics. [3-4-0]

APSC 151 (3) COMPUTER-AIDED ENGINEERING GRAPHICS. Orthographic projection, technical sketching, development of the ability to visualize in three dimensions.

Standards and conventions of engineering drawing, graphical presentation of engineering data. Micro-computer based graphics aids. Engineering geometry and the solution of space problems. [1-0-4]

APSC 160 (3) INTRODUCTION TO COMPUTATION IN ENGINEERING DESIGN. Analysis and simulation, laboratory data acquisition and processing, measurement interfaces, engineering tools, computer systems organization, programming languages. [2-2-1]

APSC 201 (3) TECHNICAL COMMUNICATION. Written and oral communication in engineering. Report preparation, business correspondence and oral presentation of technical material. Prerequisite: One of ENGL 110, ENGL 111, ENGL 112, ENGL 120, ENGL 121. [3-0-0]

APSC 210 (3) CO-OPERATIVE WORK PLACEMENT. Supervised, technical work experience in an established company or organization for a minimum of three months. Technical report. Restricted to students meeting the requirements of the Faculty of Applied Science and the Co-operative Education Program.

APSC 211 (3) CO-OPERATIVE WORK PLACEMENT. Supervised, technical work experience in an approved company or organization for a minimum of three months. Technical report. Restricted to students meeting the requirements of the Faculty of Applied Science and Co-operative Education Program.

APSC 212 (3) CO-OPERATIVE WORK PLACEMENT. Supervised, technical work experience in an approved company or organization for a minimum of three months. Technical report. Restricted to students meeting the requirements of the Faculty of Applied Science and Co-operative Education Program.

APSC 230 (6) INTRODUCTION TO ENGINEERING DESIGN. Introduction to engineering design methods, problem solving, working individually and in teams, and methods of communication of results. Engineering design projects will be assigned. Restricted to students in the second year of the Integrated Engineering program. [1-4-0;1-4-0]

APSC 261 (3) TECHNOLOGY AND SOCIETY I. The course deals with the influence of technology on the social, political, economic, and environmental aspects of society. The specific subject matter varies from year to year. Examples of subjects considered include, resources, energy, nuclear power, technology, the effects of technology on the family, education, agriculture, international policy and others. [2-0-1]

APSC 262 (3) TECHNOLOGY AND SOCIETY II. The course deals with the influence of technology on the social, political, economic and environmental aspects of society. The subject matter varies from year to year and differs from APSC 261. It may be taken as a continuation of APSC 261 or taken independently. Examples of subjects considered include pollution, work place health hazards, social impact of computers, problem solving, green

revolution, technology and the third world, engineering ethics and others. [2-0-1]

APSC 278 (3) ENGINEERING MATERIALS.

Atomic bonding; crystal structures and imperfections; properties of metals, ceramics, polymers, wood, concrete and fibre composite materials; selection of materials; corrosion; mechanical testing and heat treatment. [3-0-0]

APSC 279 (1) ENGINEERING MATERIALS LABORATORY.

Atomic bonding; crystal structures and imperfections; properties of metals, ceramics, polymers, wood, concrete and fibre composite materials; selection of materials; corrosion; mechanical testing and heat treatment. Prerequisite: APSC 278. Corequisite: APSC 278 may be taken. [0-2*-0]

APSC 310 (3) CO-OPERATIVE WORK PLACEMENT.

Supervised, technical work experience in an established company or organization for a minimum of three months. Technical report. Restricted to students meeting the requirements of the Faculty of Applied Science and the Co-operative Education Program.

APSC 311 (3) CO-OPERATIVE WORK PLACEMENT.

Supervised, technical work experience in an approved company or organization for a minimum of three months. Technical report. Restricted to students meeting the requirements of the Faculty of Applied Science and Co-operative Education Program.

APSC 312 (3) CO-OPERATIVE WORK PLACEMENT.

Supervised, technical work experience in an approved company or organization for a minimum of three months. Technical report. Restricted to students meeting the requirements of the Faculty of Applied Science and Co-operative Education Program.

APSC 330 (6) INTERMEDIATE ENGINEERING DESIGN.

Intermediate level engineering design projects involving material in the curriculum of the Integrated Engineering program. Prerequisite: Third-year standing in the Integrated Engineering program. [1-4; 1-4]

APSC 331 (3) INTERMEDIATE ENGINEERING DESIGN I.

Intermediate level engineering design project involving material in the curriculum of the Integrated Engineering program. For students in the Co-operative Education Program. [1-4-0]

APSC 332 (3) INTERMEDIATE ENGINEERING DESIGN II.

Intermediate level engineering design project involving material in the curriculum of the Integrated Engineering program. For students in the Co-operative Education Program. [1-4-0]

APSC 380 (3) INTRODUCTION TO MICROCOMPUTERS.

An introductory course intended for potential users of microcomputers in real time or non-computational engineering applications. Topics include: perspective on applications and costs; basic microcomputer hardware; principles of microcomputer operation; introduction to microcomputer programming and software design tools; input-output devices including transducers, analog-to-digital converters, digital-to-analog converters; input-output methods and interface charac-

teristics; selected case studies such as direct digital controllers and sensor-based systems. Limited enrolment. Restricted to engineering students not taking Electrical or Computer Engineering. [2-3*-2*]

APSC 410 (3) CO-OPERATIVE WORK PLACEMENT.

Supervised, technical work experience in an established company or organization for a minimum of three months. Technical report. Restricted to students meeting the requirements of the Faculty of Applied Science and the Co-operative Education Program.

APSC 411 (3) CO-OPERATIVE WORK PLACEMENT.

Supervised, technical work experience in an approved company or organization for a minimum of three months. Technical report. Restricted to students meeting the requirements of the Faculty of Applied Science and Co-operative Education.

APSC 412 (3) CO-OPERATIVE WORK PLACEMENT.

Supervised, technical work experience in an approved company or organization for a minimum of three months. Technical report. Restricted to students meeting the requirements of the Faculty of Applied Science and Co-operative Education Programs.

APSC 430 (6) ADVANCED ENGINEERING DESIGN PROJECTS.

Projects involving all material in the curriculum of the Integrated Engineering Program. Students will be expected to propose a project and complete the design and construction of a prototype. Restricted to students in the fourth year of the Integrated Engineering program. [1-4-0; 1-4-0]

APSC 440 (3) MANAGEMENT FUNDAMENTALS FOR TECHNOLOGY-BASED PRODUCT MARKETING AND DEVELOPMENT.

Management topics are presented from the perspective of technology-based industrial practice; project management, marketing and marketing planning, product development and commercialization, introduction to quality management, teamwork and effective individual participation. Prerequisite: Fourth-year standing in Engineering. [3-0-0]

APSC 450 (2) PROFESSIONAL ENGINEERING PRACTICE.

Legislation affecting the practice of engineering; ethical principles and responsibilities. Management of engineering enterprises; labour relations, safety and environmental legislation. Restricted to engineering undergraduate students in the final year of their program. [2-0-0]

APSC 459 (5) ENGINEERING PHYSICS PROJECT I.

Project planning, management and reporting. This course involves writing a project proposal, carrying out an open-ended Engineering project, and reporting the results both orally and in writing. Prerequisite: PHYS 352. [1-3-0; 0-6-1]

APSC 479 (4) ENGINEERING PHYSICS PROJECT II.

Projects designed to give students research development and design experience. Projects are provided by research faculty in Science and Engineering and from local industry. Prerequisite: APSC 459. [0-5-1; 0-2-1*]

APSC 480 (3) ENGINEERING PHYSICS PROJECTS III.

An optional course for those students wishing to continue their project work beyond the development in APSC 479. Prerequisite: APSC 479. [0-5-1]

APSC 486 (6) NEW VENTURE DESIGN.

Teams comprising students in APSC 486 and COMM 486 create a business plan and a prototype or engineering solution of a novel product, process, or process component. [1-4-0; 1-4-0]

APSC 496 (1-9) D INTERDISCIPLINARY ENGINEERING DESIGN PROJECT.

Projects involving students from several departments.

APSC 498 (1-6) D DIRECTED STUDIES.

Requires approval of a Department Head or Program Director.

APSC 510 (4) ADVANCED TECHNOLOGY INTERNSHIP.

Work in a technological setting on commercial and managerial aspects of an industrial project. A required internship to be taken at the end of the first year of the M.Eng. (Advanced Technology Management) program.

APSC 511 (2) ADVANCED TECHNOLOGY MANAGEMENT COLLOQUIUM.

Student reports on internship, guest speakers from industry, preparation of group projects, joint study of industrial reports. Required of students enrolled in the M.Eng. (Advanced Technology Management) program.

APSC 512 (3) INTELLECTUAL PROPERTY MANAGEMENT AND TECHNOLOGY COMMERCIALIZATION.

Nature of knowledge and intellectual property. Value creation through knowledge and competitive advantage of knowledge. Copyrights, patents, trademarks, and licenses. Negotiation of deals and contracts involving knowledge and technology transfer or commercialization. Market assessments and valuations.

APSC 530 (6) PRINCIPLES OF DESIGN OF BIOMEDICAL DEVICES.

Concepts, design, and manufacturing methods applied to biomedical devices. A supervised long-term project involving the design of a medical device for specific diagnostic or therapeutic function, and an engineering report, are required.

APSC 536 (3) FUNDAMENTALS OF INJURY BIOMECHANICS.

Introduction to injury mechanics. Anatomy. Impact experiments. Multi-body dynamic simulation and finite element analysis. Skull, face, brain, spine, eye, pelvis, abdomen, and extremity injury. Anthropomorphic test devices, seat belts, airbags, child restraints, and helmets. Credit cannot be obtained for both MECH436 and MECH536. [3-0-1]

APSC 540 (3) BUSINESS DECISIONS FOR ENGINEERING VENTURES.

Issues and case studies in creating and running engineering ventures and projects, with a particular emphasis on strategic planning, engineering economics, finance and risk.

APSC 541 (3) TECHNOLOGY ENTREPRENEURSHIP FOR ENGINEERS.

A broad introduction to the entrepreneurial process, for engineers who would like to form or grow a technology company, and those with

a general interest in the field. Key factors of new venture creation are identified and evaluated.

APSC 550 (3) BIOMEDICAL MEASUREMENTS AND BIOMATERIALS. Biocompatible materials for measurement and therapeutic purposes. Principles and technology of measuring temperature, displacement, motion, force, pressure, flow, ions, dissolved gases and bio-electric potentials in living organisms. [3-3*-0]

APSC 552 (1) BIOMEDICAL ENGINEERING SEMINAR. Presentation and discussion of current topics in biomedical engineering research and development. A required course for all graduate students in Biomedical Engineering. [0-0-1; 0-0-1]

APSC 554 (6) DIRECTED STUDIES IN BIOMEDICAL ENGINEERING. Project report on a research or design topic of specialization.

APSC 556 (3) CLINICAL AND INDUSTRIAL BIOMEDICAL ENGINEERING. Principles of professional engineering practice, the Canadian healthcare system, medical approach to diagnosis, principles and management of common medical devices, ethics and regulations for clinical trials, codes and regulations of medical devices, applications of biomedical engineering.

APSC 574 (3) MATERIALS FOR CLEAN ENERGY TECHNOLOGIES. Introduction to operation of gas turbines and fuel cells. Diffusion and migration of solids. Fundamental basis of ionic, electronic, and mixed conductivity in fuel cell materials. Thermal barrier coatings for gas turbines. Material constraints in wind turbines. Credit cannot be obtained for both MECH474 and MECH574.

APSC 598 (1-6) D TOPICS IN ENGINEERING.

APSC 599 (12) M.A. SC. THESIS.

APSC 699 (0) PH.D. THESIS.

ARBC — ARABIC STUDIES FACULTY OF ARTS

Not all courses are offered every year. For current listings, consult the departmental website at: www.cnrs.ubc.ca.

ARBC 300 (6) INTRODUCTION TO THE GRAMMAR AND VOCABULARY OF CLASSIC ARABIC. Open to first- and second-year students with the permission of the instructor.

ARBC 400 (6) INTERMEDIATE CLASSICAL ARABIC. Second year of Classical Arabic with extensive reading of poetry and prose drawn from religious and historical texts. Prerequisite: ARBC 300.

ARBC 420 (3-12) D SUPERVISED STUDY IN CLASSICAL ARABIC. Religious and literary Arabic texts pertaining to the early and medieval Islamic world. Prerequisite: ARBC 400.

ARCH — ARCHITECTURE SCHOOL OF ARCHITECTURE AND LANDSCAPE ARCHITECTURE

ARCH 403 (3) THEMES IN ARCHITECTURE AND DESIGN. Introduction to a broad range of significant themes which inform our understanding of architecture and design. Open only to B.EnD. students. Credit will be given for only one of ARCH 403, or ARCH 503.

ARCH 404 (3) ARCHITECTURAL HISTORY 1A. Origins of contemporary architectural thought. A survey of theories, technological and social changes which have influenced architecture and related fields since the 18th century. Open only to B.EnD. students. Credit will be given for only one of ARCH 404, or ARCH 504.

ARCH 405 (3) ARCHITECTURAL HISTORY 1B. Developments in modern and contemporary architectural thought. Critical analysis of the contribution of the 20th century producers of architecture, engineering, and industrial design. Open only to B.EnD. students. Credit will be given for only one of ARCH 405 or ARCH 505.

ARCH 407 (3) RESEARCH METHODS. Motivations and techniques which underpin environmental design research.

ARCH 410 (3) DESIGN METHODS. Techniques for environmental design, including architecture.

ARCH 411 (3) BUILDING TECHNOLOGY 1. An investigation of building materials and systems considering design objectives, environmental conditions, historical context, regulatory controls, and economic constraints. Emphasis on materials as used in light wood-frame Construction and building science for enclosure design. Open only to B.EnD. students. Credit will be given for only one of ARCH 411, or ARCH 511.

ARCH 437 (3) GEOMETRIC MODELING. Advanced modeling, rendering and image processing applications; the construction of geometric models, their viewing transformations, light and material attributes, mapping, rendering and animation are introduced. Open only to B.EnD. students. Credit will be given for only one of ARCH 437, ARCH 537.

ARCH 500 (9) ARCHITECTURAL DESIGN 1A. Elements of architectural design. A series of projects studied at different scales focusing on conceptual development, design synthesis, principles of typology, organization and representation. Prerequisite: ARCH 502.

ARCH 501 (9) ARCHITECTURAL DESIGN 1B. Vertical design studio. Prerequisite: ARCH 500.

ARCH 502 (2) INTRODUCTORY WORKSHOP. The engagement of environmental and architectural concerns of the West Coast through field trips, design exercises and seminars. Conducted the week prior to Labour Day. Enrolment mandatory for all incoming students. A non-refundable fee will be charged to cover expenses.

ARCH 503 (3) THEMES IN ARCHITECTURE AND DESIGN. Introduction to a broad range of significant themes which inform our

understanding of architecture and design. Corequisite: ARCH 500.

ARCH 504 (3) ARCHITECTURAL HISTORY 1A. Origins of contemporary architectural thought. A survey of the theories, technological and social changes which have influenced architecture and related fields since the 18th century.

ARCH 505 (3) ARCHITECTURAL HISTORY 1B. Debates in modern and contemporary architectural thought, including critical analysis of the contribution of the 20th century producers of architecture, engineering, and industrial design.

ARCH 511 (3) ARCHITECTURAL TECHNOLOGY 1. An investigation of building materials and systems considering design objectives, environmental conditions, historical context, regulatory controls, and economic constraints. Emphasis on materials as used in light wood-frame construction and building science for enclosure design.

ARCH 512 (3) ARCHITECTURE STRUCTURES I. Introduction to the “structural problem” through investigation of the inter-relationships between force, geometry and material and their effects on structural elements.

ARCH 513 (3) ENVIRONMENTAL SYSTEMS AND CONTROLS 1. Building form and fabric considerations to assure appropriate thermal, luminous, sonic, and atmospheric conditions within buildings.

ARCH 515 (3) DESIGN MEDIA 1. Instruction in the foundations of digital and manual design media and representation techniques including sketching, diagramming, architectural drawing and modeling. [2-1-1]

ARCH 517 (3) DESIGN MEDIA 2. Instruction in intermediate skills of digital and manual representation techniques including sketching, diagramming, architectural drawing and modeling. Prerequisite: ARCH 515.

ARCH 520 (9) ARCHITECTURAL DESIGN 2A. Vertical design studio. Prerequisite: ARCH 501.

ARCH 521 (9) ARCHITECTURAL DESIGN 2B. Comprehensive building studio. A term-long building design project that uses an integrated design process to relate conceptual exploration to detailed design and technical development. Prerequisite: ARCH 520.

ARCH 522 (3) CURRENT ISSUES IN ARCHITECTURE. A seminar examining current issues in Architecture, based on reading assignments, papers and presentations. Enrolment is limited to facilitate discussion.

ARCH 523 (3) CONTEMPORARY THEORIES IN ARCHITECTURE. An advanced lecture and discussion course exploring a range of current theoretical investigations as manifest in specific built work and relating to historical developments and intellectual elaboration. Prerequisite: All of ARCH 504, ARCH 505.

ARCH 524 (3) HISTORY OF URBAN FORM. A survey of the physical forms of cities and their relationship to the cultures with which they are

associated. Open to students outside the School.

ARCH 525 (3) WORKSHOP: HISTORY OF URBAN PLANNING. Exploration of 19th and 20th century theories of planning and urban form. The workshop format will allow students to experiment with these ideas in model form. The relevance of these theories and ideas to the form of modern cities will be evaluated. Open to students outside the School. See also School of Community and Regional Planning courses.

ARCH 526 (3) HISTORY OF THEORIES OF ARCHITECTURE. An advanced seminar in architectural history concentrating on detailed study of the literature on selected architectural theories which have had an effect on twentieth century architectural form.

ARCH 529 (3) INTRODUCTION TO FACILITIES PROGRAMMING. Examination of the pre-design process employed to clarify project objectives, define client/user requirements, test alternative organizations, generate space-planning schemata, involve users in the development of design parameters and critical environmental and technical performance criteria. Prerequisite: ARCH 541.

ARCH 530 (3) URBAN DESIGN WORKSHOP. A survey of the techniques involved in the process of architectural analysis and design at the urban scale.

ARCH 531 (3) ARCHITECTURAL TECHNOLOGY 2. An investigation of more complex building technologies in a variety of climatic conditions; selection of appropriate materials and systems in the context of realistic performance requirements. Emphasis given to design considerations and experience in detailing the building envelope. Prerequisite: ARCH 511.

ARCH 532 (3) ARCHITECTURAL STRUCTURES 2. The development of competence in the design of wood frame structures for general loading such as are found in residential construction. Quantitative investigation and comparison of wood, steel and concrete elements and structural systems with emphasis on horizontally spanning elements. Qualitative study of other structural elements such as walls, columns, foundations, etc. Introduction to earthquakes and lateral force for resisting systems. Prerequisite: ARCH 512.

ARCH 533 (3) ENVIRONMENTAL SYSTEMS AND CONTROLS 2. Mechanical and electrical services of buildings and their integration with architectural form and fabric. Prerequisite: ARCH 513.

ARCH 537 (3) COMPUTER APPLICATIONS 2. Individual investigation and development of computer applications to selected topics in architectural practice. Prerequisite: ARCH 517. Permission of the instructor is also acceptable.

ARCH 538 (3-9) D STUDY OF ARCHITECTURE ABROAD. More than one section may be taken concurrently.

ARCH 539 (9) ARCHITECTURAL DESIGN ABROAD. This program is offered alternate years. Prerequisite: All of ARCH 500, ARCH 501. Corequisite: ARCH 538.

ARCH 540 (9) ARCHITECTURAL DESIGN 3A. Vertical design studio. Prerequisite: ARCH 521 and successful completion of fourth term review.

ARCH 541 (3) PROCESS AND PRACTICE OF ARCHITECTURE I. An overview of the complex processes by which architecture is realized and the professional role of the architect within them. Prerequisite: ARCH 521.

ARCH 543 (3) CONTEMPORARY PRACTICE. Individual case studies of a range of current professional topics based on students' prior design work. Successful completion of fourth term review prerequisite. Prerequisite: ARCH 521. [0-3-0]

ARCH 544 (3/6) D ARCHITECTURAL SEMINAR. An explanation of selected topics in architecture. Enrolment is limited to facilitate discussion.

ARCH 545 (3/6) D DIRECTED STUDIES. An exploration of selected topics in Architecture. Available to individual students with the agreement of a member of the faculty available to supervise the work.

ARCH 548 (3) GRADUATION DESIGN PROJECT – PART 1: PROJECT REPORT. An in-depth exploration of a social, urban or environmental problem leading to the definition of parameters for an architectural design solution brought to resolution in the form of a major report as preparation for ARCH 549. Prerequisite: Completion of all second-year courses.

ARCH 549 (9) GRADUATION DESIGN PROJECT – PART 2. The development and resolution of the design project set out in Part 1. Prerequisite: ARCH 548 and no more than 18 credits outstanding beyond ARCH529.

ARCH 555 (3) CO-OP WORK PLACEMENT 1. Approved and supervised work experience for a minimum of 4 months. Technical report required. Restricted to students admitted to the Architecture Co-op Education Program.

ARCH 556 (3) CO-OP WORK PLACEMENT 2. Approved and supervised work experience for a minimum of 4 months. Technical report required. Restricted to students admitted to the Architecture Co-op Education Program. Prerequisite: ARCH 555.

ARCH 561 (3) TOPICS IN ARCHITECTURAL HISTORY AND THEORY. Prerequisite: All of ARCH 504, ARCH 505. [0-3-0]

ARCH 562 (3) ADVANCED THEORY. Relationship between environmental issues and issues of 'place'. How environmental issues are seen as both a responsibility, and as a powerful vehicle for redefining a sense of place. Prerequisite: ARCH 513.

ARCH 568 (3) RESEARCH METHODOLOGY IN ARCHITECTURE. Contemporary concerns and issues associated with research in architecture. Required of all MASA students. [0-3-0]

ARCH 571 (3) ADVANCED SEMINAR ON BUILDING TECHNOLOGY. Historical development of building enclosure, new materials and construction methods, design-construction process, failure evaluation, and current research issues. Prerequisite: All of ARCH 511, ARCH 531.

ARCH 572 (3) ADVANCED STRUCTURES. Explorations of historical structures, structure in current architectural theory, advanced structural technologies, and behaviour of specific structural materials and systems. Prerequisite: ARCH 512.

ARCH 573 (3-12) D ADVANCED TOPICS IN ENVIRONMENTAL STUDIES. Lectures, seminars and laboratories as appropriate in investigation of specialized environmental topics concerning theory and practice of architecture. Prerequisite: ARCH 513.

ARCH 577 (3) SEMINAR IN ADVANCED COMPUTER APPLICATIONS.

ARCH 580 (0) ARCHITECTURE SEMINAR. A forum for the exchange of ideas and presentation of papers by faculty, students and visitors.

ARCH 597 (3/6) D SPECIAL TOPICS. Individual or small group study of special topics.

ARCH 598 (12) THESIS FOR THE M.A.S.A.

ARST — ARCHIVAL STUDIES SCHOOL OF LIBRARY, ARCHIVAL & INFORMATION STUDIES

ARST 510 (3) ARCHIVAL DIPLOMATICS.

ARST 515 (3) ARRANGEMENT AND DESCRIPTION OF ARCHIVES.

ARST 516 (3) MANAGEMENT OF CURRENT RECORDS.

ARST 517 (3) RECORD KEEPING.

ARST 520 (3) SELECTION AND ACQUISITION OF ARCHIVAL DOCUMENTS.

ARST 530 (3) THE JURIDICAL CONTEXT OF CANADIAN ARCHIVES.

ARST 540 (3) ARCHIVAL PUBLIC SERVICES.

ARST 554 (3) DATABASE DESIGN.

ARST 556 (3-12) D TOPICS IN ARCHIVAL AUTOMATION.

ARST 570 (3) MANAGEMENT OF LIBRARIES AND ARCHIVES. Equivalency: LIBR 570.

ARST 573 (3) ARCHIVAL SYSTEMS AND THE PROFESSION.

ARST 575 (3-12) D TOPICS IN THE MANAGEMENT OF RECORDS.

ARST 587 (3) PRESERVATION. Equivalency: LIBR 587.

ARST 591 (3) ARCHIVAL RESEARCH AND SCHOLARSHIP.

ARST 592 (3-6) C DIRECTED RESEARCH PROJECT. Prerequisite: ARST 590.

ARST 593 (3/12) D SEMINAR.

ARST 594 (3-6) C DIRECTED STUDY.

ARST 595 (3) INTERNSHIP.

ARST 596 (3) PROFESSIONAL EXPERIENCE. Project based experience undertaken with a faculty associate occupying a minimum of ten hours a week for 12 consecutive weeks or the equivalent time. Evaluation: Pass/Fail. Prerequisite: 24 credits in the program are required.

ARST 599 (6/12) D THESIS.

ARST 600 (6) ADVANCED SEMINAR IN RESEARCH METHODS.

ARST 610 (6) THEORETICAL AND RESEARCH FOUNDATIONS OF ARCHIVAL STUDIES.

ARST 620 (6) ADVANCED STUDY IN MINOR AREA.

ARST 621 (6) ADVANCED STUDY IN MINOR AREA.

ARST 699 (0) THESIS.

ARTE — ART EDUCATION FACULTY OF EDUCATION

ARTE 300 (3) TEACHING AND LEARNING ART ACROSS THE CURRICULUM: ELEMENTARY. [3-0-0]

ARTE 303 (6) CERAMICS IN ART EDUCATION. Exploration of ceramic techniques, including hand building and basic throwing. Prerequisite: 6 credits of Introductory Art Studio or Art History courses. [1-3-0; 1-3-0]

ARTE 305 (6) DESIGN IN ART EDUCATION. Exploration of design, particularly in relation to textiles. Prerequisite: 6 credits of Introductory Art Studio or Art History courses. [1-3-0; 1-3-0]

ARTE 314 (4/5) D CURRICULUM AND INSTRUCTION IN ART: SECONDARY. Pass/Fail. Prerequisite: A concentration in Art or permission of the head.

ARTE 320 (2) CURRICULUM AND INSTRUCTION IN ART: ELEMENTARY. Curriculum organization in art; principles and methods of instruction applied to teaching art. Pass/Fail. [1-2]

ARTE 400 (2-6) D STUDIES IN AN ART EDUCATION STUDIO AREA. Directed studies in an area relevant to teaching in an elementary or secondary school. Pass/Fail.

ARTE 401 (3) TWO-DIMENSIONAL CONTENT FOR THE ART CLASSROOM. Study of two dimensional materials and processes for the art classroom with emphasis on drawing and painting. Pass/Fail.

ARTE 402 (3) GRAPHICS FOR THE ART CLASSROOM. Study of printmaking processes for the art classroom. Pass/Fail.

ARTE 403 (3) THREE-DIMENSIONAL CONTENT FOR THE ART CLASSROOM. Study of three dimensional materials and processes for the art classroom with emphasis on ceramics and sculpture. Pass/Fail.

ARTE 404 (3) DESIGN CONTENT FOR THE ART CLASSROOM. Study of design considerations in various art media for the art classroom with an emphasis on textiles. Pass/Fail.

ARTE 405 (3) COMPUTER STUDIES FOR ART EDUCATION. Use of computer technology in teaching and learning of digital imagery and technology in the art classroom. Pass/Fail.

ARTE 406 (3) PHOTOGRAPHIC PRACTICES FOR THE CLASSROOM. Photographic and related image making techniques for the art classroom. Pass/Fail. [1-2-0]

ARTE 425 (3) EXPLORATIONS IN THE TEACHING OF ART TO CHILDREN: ELEMENTARY. Laboratory-based course involving work with children. Pass/Fail. [1-3-0]

ARTE 426 (3) ART, EDUCATION AND CULTURAL DIVERSITY. Implications of cultural diversity for teaching of art in elementary and secondary schools. Pass/Fail. [3-0]

ARTE 441 (3) ART EDUCATION THEORY AND RESEARCH. Art Education theory and research is studied relative to school practice. Pass/Fail. Prerequisite: Art Education as a major or minor and completion of a practicum in Art Education. [3-0]

ARTE 508 (3-12) C REVIEW OF RESEARCH IN ART EDUCATION METHODS. Studies of recent research bearing on art education practice.

ARTE 541 (3) PERSPECTIVES, PRACTICE, AND CURRICULUM ISSUES IN CONTEMPORARY ART EDUCATION. Emphasis is placed upon the foundations and conflicting conceptions of curriculum in art education. Theory/practice issues in the development, implementation, and evaluation of art programs are explored.

ARTE 542 (3) HISTORICAL AND SOCIAL FOUNDATIONS OF ART EDUCATION. Histories of art education are examined. Social and cultural implications for art education (past and present) are explored.

ARTE 543 (3) PSYCHOLOGICAL FOUNDATIONS OF ART EDUCATION. Psychological considerations specifically related to cognitive development in art, are explored. Implications for art education theory and practice are drawn.

ARTE 561 (3-12) C C STUDIO PRACTICUM.

ARTE 565 (3/6) D SPECIAL TOPICS IN ART EDUCATION.

ARTE 580 (3-12) C PROBLEMS IN EDUCATION. Investigation and reporting of a problem.

ARTE 590 (3) GRADUATING PAPER. Pass/Fail.

ARTE 598 (3-12) C FIELD EXPERIENCES. For those in master's, doctoral and diploma programs.

ARTE 599 (6/12) C MASTER'S THESIS.

ARTE 601 (3-12) D DOCTORAL SEMINAR. Pass/Fail.

ARTH — ART HISTORY FACULTY OF ARTS

Not every course is given every year. For details of current offerings, consult the departmental website at www.finearts.ubc.ca. Students wishing to take fourth-year seminars should

normally have had a closely related third-year course and are advised to check with the instructor in this regard. Credit will be given to either the current ARTH listing or its former FINA equivalent.

ARTH 100 (6) INTRODUCTION TO ART HISTORY. The forms, concepts, issues, and language of analysis for the understanding of art in context.

ARTH 225 (3) ART IN EUROPE TO THE SIXTEENTH CENTURY. A selective survey of painting, sculpture, and architecture. Credit will not be granted for both ARTH 125 and ARTH 225 and/or 226.

ARTH 226 (3) ART IN EUROPE AND NORTH AMERICA FROM THE SIXTEENTH CENTURY TO THE PRESENT. A selective survey of painting, sculpture, and architecture. Credit will not be granted for both ARTH 125 and ARTH 225 and/or 226.

ARTH 251 (3) ASPECTS OF ASIAN ART. The arts, excluding architecture, of the civilizations of India, China, and Japan.

ARTH 253 (3) ASPECTS OF ASIAN ARCHITECTURE. Select built forms in Asia, such as temples, tombs, palaces, cities and gardens, and their relations to cultural, social and political systems.

ARTH 261 (3) PRE-HISPANIC ARTS OF CENTRAL AND SOUTH AMERICA. The relevance of various arts to social institutions in ancient societies of Peru and Mesoamerica.

ARTH 262 (3) NATIVE ARTS OF NORTH AMERICA. Men's and women's arts produced by Aboriginal Peoples of North America from pre-contact times to the present.

ARTH 300 (3) SEMINAR ON METHODS AND APPROACHES IN ART HISTORY. Theories, problems, and literature in the study of art history. Required of all Major and Honours students in art history.

ARTH 325 (3) THE ART AND ARCHAEOLOGY OF ANCIENT EGYPT. Equivalency: NEST 304.

ARTH 327 (6) ARCHAEOLOGY OF THE ANCIENT NEAR EAST. Equivalency: NEST 302, FINA 327.

ARTH 329 (6) GREEK AND ROMAN ART. Emphasis on the architecture, sculpture, painting, and decorative arts of Greece and Rome. Equivalency: CLST 330.

ARTH 330 (3) ART AND THE CHRISTIAN TRANSFORMATION OF THE ROMAN EMPIRE. Visual culture and the rise of Christianity; social, political and religious contexts of art, including diverse viewing practices and cultural frameworks.

ARTH 331 (3) ART IN THE EARLY MEDIEVAL WEST. From pagan adornment to Christian devotion to service of Christian or Islamic rule (AD 500-1000).

ARTH 332 (3) MEDIEVAL ART IN THE AGE OF MONASTICISM. Art in Western Europe between 1000 and 1200; the role of monasteries as leading institutions and patrons of art and large scale architecture.

ARTH 333 (3) ART, CHURCH, SOCIETY AND THEIR MARGINS IN THE LATER MIDDLE AGES. Diversification of the arts and architecture with the expansion of patronage in late medieval society.

ARTH 334 (3) ITALIAN RENAISSANCE ART AND CULTURE (1400–1500). Changing roles of visual art and culture within commune, court, religious practices and private life.

ARTH 335 (3) ITALIAN RENAISSANCE ART AND CULTURE (1500–1600). Visual Art and culture within social, political and religious upheaval and fragmentation.

ARTH 336 (3) ITALIAN ART AND CULTURE (1600–1700). Rome as centre of Counter Reformation art, architecture, urban culture and new sites for visual images.

ARTH 337 (3) EUROPEAN ART AND CULTURE (1600–1700). Visual art and culture within court and official life, commerce-oriented urban centres and emergent nation states.

ARTH 338 (3) VISUAL CULTURE IN THE AGE OF ENLIGHTENMENT AND REVOLUTION (1715–1830). Art, architecture, and social space in Europe and America redefining gender, identity and nation in the era of industrialization and political change.

ARTH 339 (3) 19TH-CENTURY ART AND SOCIAL SPACE. Ideologies of gender, class, race, ethnicity, and economics in 19th-century European and American visual culture.

ARTH 340 (3) 20TH CENTURY ART AND CULTURE: THE TRIUMPH AND DEMISE OF MODERNISM. A critical survey of western art and cultural production from the turn of the century to the development of Pop Art.

ARTH 341 (3) 20TH CENTURY ART AND CULTURE: THE POSTMODERN. A critical examination of international visual art and culture from the 1950s to the present; the role of art in consumerist society and the emergence of postmodernism.

ARTH 342 (3) LATIN AMERICAN ARTMODERN AND CONTEMPORARY. Analyses of specific works and texts will emphasize visual inventions and meaning in the light of recent theoretical debates

ARTH 343 (3) ART AND PHOTOGRAPHY IN CANADA TO 1920. Art, artists, and art institutions from the establishment of the French and English colonies to the founding of the Group of Seven: issues of race, wilderness, and colonial expansion.

ARTH 344 (3) ART AND PHOTOGRAPHY IN CANADA, 1920 TO THE PRESENT. Art movements and art institutions from the landscape paintings of the Group of Seven to the photo-conceptualist practices of the Vancouver school.

ARTH 346 (3) ARCHITECTURE IN EUROPE: BUILDING THE FABRIC OF THE MODERN STATE (1715–1837). The role of architecture within the development of the modern state, A survey of broad cultural dynamics, particular building projects and design careers.

ARTH 347 (3) ARCHITECTURE IN EUROPE: MODERN PARADIGMS OF DESIGN (1837–PRESENT). An examination of new requirements imposed on architecture by the consolidation of a capitalist economy, industrialization, new technologies and scientific methods.

ARTH 348 (3) ARCHITECTURE IN NORTH AMERICA: COLONIAL PROJECTS AND DISRUPTIONS (1605–1867). The role of architecture in the imposition of European governance within North America; the modification of received conventions in relation to topographical, ethnic-religious and political factors.

ARTH 349 (3) ARCHITECTURE IN NORTH AMERICA: INDEPENDENT DESIGN IDIOMS (1867–PRESENT). The emergence of a distinctive architecture that superceded British and European agendas; the growth of private and public patronage and the establishment of modern design and practice.

ARTH 351 (3/6) D ISLAMIC ART AND ARCHAEOLOGY. A study of the artifacts of Islam as an expression of Islamic beliefs. Corequisite: RELG 341

ARTH 352 (3) HISTORIC INDIA: IMAGES, TEMPLES AND THE CONSTRUCTION OF INDIAN ART HISTORY. North and South Indian art and architecture with an emphasis on Buddhism and Hinduism.

ARTH 353 (3) NEPAL AND TIBET: ART, RITUAL AND PERFORMANCE. Art of the Himalayan region situated within social and religious practices, festivals, and performances.

ARTH 354 (3) MUGHAL INDIA: ART, ARCHITECTURE AND THE SPECTACLE OF EMPIRE. The complex relationship of Mughal imperial architecture and painting with those of the Hindu Rajput courts.

ARTH 355 (3) ARTISTIC AND CULTURAL PRACTICES IN COLONIAL AND INDEPENDENT INDIA. The development of a new Indian art during the colonial period and nationalist movement; the construction of India's contemporary visual culture.

ARTH 358 (3) THE MAKING OF EARLY CHINA: FROM ARCHAEOLOGY TO HISTORY. Close reading of visual and textual materials will elucidate chinese are and culture prior to 300 CE, as well as question the objectivity of historical reconstructions.

ARTH 359 (3) THE PURSUIT OF REALISM: FIGURATIVE PAINTING BEFORE 1400 IN CHINA. Examines the making of realistic representations that describe society, cultural practice and family relationships in China between 3000 BCE and 1400 CE.

ARTH 360 (3) THE RISE OF LITERATI PAINTING IN CHINA: 1100–1700. Chinese literati art and theory will be analyzed through careful study of relationships between visual and textual productions.

ARTH 361 (3) MODERN AND POST-MODERN ART IN CHINA. An investigation of China's varied resistance to and pursuits of modernity and post-modernity through examination of Chinese art from the 18th to 21st centuries.

ARTH 364 (3) BUDDHIST ART OF JAPAN: 6TH–12TH CENTURIES. Exoteric and esoteric Buddhist art traditions in the ancient capitals of Japan and East Asia.

ARTH 365 (3) BUDDHIST ART OF JAPAN: 13TH–16TH CENTURIES. Pure Land and Zen Buddhist art traditions in the ancient capitals of Japan and East Asia.

ARTH 366 (3) JAPANESE PAINTING TRADITIONS: 7TH–15TH CENTURIES. The development of earlier Japanese painting with a focus on landscape and narrative handscroll paintings.

ARTH 367 (3) JAPANESE PAINTING TRADITIONS: 16TH–19TH CENTURIES. Genre painting of the Momoyama and Edo periods including screens, woodblock prints and other media.

ARTH 370 (3) ARTS OF MEXICO'S EARLY PEOPLES. Pre-Aztec monumental and portable arts of the Olmec, Zapotec, Teotihuacan and Classic Veracruz peoples.

ARTH 371 (3) ARTS OF THE AZTEC PERIOD IN MEXICO. Symbolic meanings and political agendas of Aztec architecture, sculpture and manuscript illustration investigated using Spanish accounts.

ARTH 372 (3) MAYA PUBLIC RITUAL ARTS. Architecture, sculpture, costume, and visual productions associated with Maya public ritual, including the ancient ball game and modern cofradia dances.

ARTH 373 (3) MAYA OBJECTS OF IDENTITY, WEALTH AND STATUS. Elaborate visual productions, including architecture, sculpture, murals, jewelry, painted ceramics, figurines, and textiles, encompassed by Maya residences, ancient to modern.

ARTH 376 (3) ARTS OF THE NORTHWEST COAST PEOPLES: THE NORTH. The histories, historiography and cultural diversity of the Northern Northwest Coast region; persistence and innovation in the arts in communities, and in cross-cultural and market spheres.

ARTH 377 (3) ARTS OF THE NORTHWEST COAST PEOPLES: THE SOUTH. The histories, historiography and cultural diversity of the Southern Northwest Coast region; persistence and innovation in the arts in communities, and in cross-cultural and market spheres.

ARTH 397 (3/6) D DIRECTED STUDY ABROAD (SUMMER SCHOOL).

ARTH 429 (3/6) D STUDIES IN THE ART AND ARCHEOLOGY OF GREECE AND ROME. Equivalency: CLST 429.

ARTH 432 (3) SEMINAR IN THE ART OF THE MIDDLE AGES. Equivalency: ARTH 431, ARTH 433.

ARTH 436 (3) SEMINAR IN EARLY MODERN ART. Equivalency: ARTH 435, ARTH 437.

ARTH 439 (3) SEMINAR IN 18TH & 19TH-CENTURY VISUAL CULTURE. Equivalency: ARTH 438.

ARTH 440 (3/6) D SEMINAR IN MODERN AND CONTEMPORARY ART.

ARTH 442 (3) SEMINAR IN CONTEMPORARY LATIN AMERICAN ART.

ARTH 443 (3) SEMINAR IN CANADIAN ART.

ARTH 445 (3) FILM AND THE CITY. The complex interrelations between film and the city; dominant urban theories, film technologies and viewing practices and the intersections between them.

ARTH 448 (3) SEMINAR IN NORTH AMERICAN ARCHITECTURE.

ARTH 455 (3) SEMINAR IN THE ART OF INDIA AND SOUTHEAST ASIA. Equivalency: ARTH 457, ARTH 458.

ARTH 458 (3) SEMINAR IN CHINESE ART. Equivalency: ARTH 451, ARTH 452.

ARTH 459 (3) SEMINAR IN CHINESE ART. Equivalency: ARTH 451, ARTH 452.

ARTH 464 (3) SEMINAR IN JAPANESE ART. Equivalency: ARTH 453, ARTH 454.

ARTH 471 (3) SEMINAR IN PRE-HISPANIC ART. Equivalency: ARTH 463, ARTH 465.

ARTH 476 (3) SEMINAR IN NORTH AMERICAN ABORIGINAL ART. Equivalency: ARTH 469.

ARTH 499 (6) HONOURS ESSAY.

ARTH 531 (3/6) D STUDIES IN EARLY MEDIEVAL ART.

ARTH 533 (3/6) D STUDIES IN MEDIEVAL ART.

ARTH 535 (3/6) D STUDIES IN THE ART OF THE RENAISSANCE.

ARTH 537 (3/6) D STUDIES IN 17TH- AND 18TH-CENTURY ART.

ARTH 539 (3/6) D STUDIES IN 19TH-CENTURY ART.

ARTH 540 (3/6) D STUDIES IN 20TH CENTURY ART.

ARTH 543 (3/6) D STUDIES IN CANADIAN ART.

ARTH 548 (3/6) D STUDIES IN ARCHITECTURE.

ARTH 551 (3/6) D STUDIES IN CHINESE ART.

ARTH 553 (3/6) D STUDIES IN JAPANESE ART.

ARTH 555 (3/6) D STUDIES IN SOUTH AND SOUTHEAST ASIAN ART.

ARTH 561 (3/6) D STUDIES IN THE INDIGENOUS ARTS OF THE AMERICAS.

ARTH 571 (6) THE METHODOLOGY OF ART HISTORY. Required of all art history graduate students.

ARTH 577 (3/6) C DIRECTED READING.

ARTH 599 (6) MASTER'S THESIS.

ARTH 649 (0) PH.D. THESIS.

ARTS — ARTS ONE PROGRAM FACULTY OF ARTS

ARTS 1 (18) ARTS ONE.

ASIA — ASIAN STUDIES FACULTY OF ARTS

ASIA 100 (3) INTRODUCTION TO TRADITIONAL ASIA. A survey of the histories and cultures of Asia before 1600 and the coming of the Europeans. Emphasis will be given to parallel themes in the development of the civilizations of South, Southeast and East Asia.

ASIA 101 (3) INTRODUCTION TO MODERN ASIA. A survey of the emergence of modern Asia. Aims at an understanding of how the various peoples of Asia have maintained distinctive cultural identities despite centuries of political, economic, social and cultural change.

ASIA 200 (3) CULTURAL FOUNDATIONS OF EAST ASIA. A comparative survey of the beliefs, assumptions and values which have shaped the civilizations of East Asia in both traditional and modern times. Prerequisite: All of ASIA 100, ASIA 101.

ASIA 208 (3) CULTURAL FOUNDATIONS OF SOUTH ASIA. A survey of South Asian cultures, including language and literature, art, religion, polity and society, as they developed in the past and have been transformed in the modern period. Prerequisite: All of ASIA 100, ASIA 101.

ASIA 209 (3) CULTURAL FOUNDATIONS OF SOUTHEAST ASIA. A comparative survey of the different cultures found in the communities of Southeast Asia. Focus will be on language and literature, arts, religion, society and polity, ideologies and belief systems in the past as well as in modern times. Prerequisite: All of ASIA 100, ASIA 101.

ASIA 270 (6) MODERN CHINA AND THE WEST. Equivalency: HIST 270.

ASIA 300 (3) WRITING AND CULTURE IN EAST ASIA. Practical, aesthetic, historical, technological and political issues pertaining to the use of Chinese characters – hanzi (Chinese), kanji (Japanese), or hancha (Korean) – throughout the region. Prerequisite: One of first-year Chinese, Japanese, or Korean.

ASIA 308 (3) MYTHOLOGICAL LITERATURE OF ANCIENT INDIA IN TRANSLATION. Myths of creation Gods and goddesses of the Vedic pantheon. Connections with myths in other parts of the world, particularly in the Indo-European tradition. Literary representations of the myths.

ASIA 309 (3) SOUTH ASIAN BEYOND SOUTH ASIA. A history of South Asian peoples and communities that emigrated overseas, including Indo-Canadians.

ASIA 310 (3/6) D STUDIES IN THE HISTORY OF A MAJOR ASIAN CIVILIZATION. Study of an Asian culture area different from those covered in existing courses. Not given every year. Consult Department for details.

ASIA 314 (3) PREMODERN JAPAN. Japanese history (political, economic, social and cultural) to 1600.

ASIA 315 (3) JAPAN FROM FEUDAL TO MODERN STATE. Japanese history from 1600 to the Meiji Restoration. Political, economic, social and cultural forces which were involved in transforming Japan.

ASIA 317 (3) THE RISE OF KOREAN CIVILIZATION. The evolution of a distinctive Korean civilization within the East Asian cultural sphere. Primary focus on cultural, social and political development from the earliest times to the sixteenth century.

ASIA 318 (3) PREMODERN INDIA. A survey of the history and culture of India from the earliest historic period to 1200 and the coming of Islam, with emphasis on the evolution of classical Hindu civilization.

ASIA 319 (3) HISTORY OF INDONESIAN CIVILIZATION. Survey of the archipelago from the 10th century to the present. Social organization, major religions, economic and political developments from the pre-modern period, through Dutch colonial rule to independence.

ASIA 320 (3) HISTORY OF EARLY CHINA. History of China from the earliest times to the disintegration of the Tang empire. Students will acquire the analytical skills and tools to understand the origins and foundations of Chinese society. Equivalency: HIST 382 Equivalency: HIST 382.

ASIA 328 (3) MEDIEVAL INDIA. The history, culture, and social and economic organization of South Asia from the decline of the classical Hindu empires through the Sultanate period.

ASIA 329 (3) GENDER IN SOUTHEAST ASIA. A critical examination of what it means to be a woman or a man within the social and cultural context of Southeast Asia. What “masculinity” and “femininity” signify in Indonesia’s society; how these concepts are reaffirmed or challenged.

ASIA 337 (3) THE KOREAN PEOPLE IN MODERN TIMES (1600 TO THE PRESENT). The transformation of Korea from a Confucian state into an industrial nation. The rise of nationalism and modern ideologies in Korea. Cultural, social and economic changes Korea has undergone as it has entered the modern world.

ASIA 338 (3) MODERN INDIA. The history of India from the coming of the Europeans to the rise of the nationalist movement with emphasis on the social and economic impact of British imperialism.

ASIA 339 (3) THE CONSTRUCTION OF SOUTH ASIAN COMMUNITIES IN THE DIASPORA. An examination of contemporary South Asian communities in the diaspora. Topics of particular importance are family life, religious life, notions of space, communal memory, literary and visual representation. Prerequisite: ASIA 309.

ASIA 340 (3) HISTORY OF LATER IMPERIAL CHINA. History of China from the end of Tang to the eve of its modern transformation. Students will acquire the analytical skills and tools to understand the political, socio-economic, and cultural changes in imperial

China. Equivalency: HIST 381. Equivalency: HIST 381.

ASIA 341 (3) CLASSICAL CHINESE LITERATURE IN TRANSLATION. Poetry, historical and philosophic prose writings and the earliest genres of fiction in classical Chinese (ca 1100 BC–ca 750 AD).

ASIA 342 (3) CHINESE LITERATURE IN TRANSLATION: THE VERNACULAR TRADITION. Readings in drama and fiction, 800 to 1800 AD. The emergence of vernacular genres as distinct from and sometimes opposed to the existing classical genres.

ASIA 344 (3) TOPICS IN JAPANESE CULTURAL HISTORY I: ARISTOCRATS AND WARRIORS. Focuses each year on a specific topic related to the courtly or warrior culture of Japan.

ASIA 346 (3) TOPICS IN JAPANESE CULTURAL HISTORY II: THE EARLY MODERN AGE. Focuses each year on a specific topic related to the culture of early modern Japan.

ASIA 347 (3) TRADITIONAL KOREAN LITERATURE IN TRANSLATION. An introduction to Korean literature from ancient times to 1900.

ASIA 348 (3) GREAT LITERARY WORKS OF CLASSICAL INDIA IN TRANSLATION. Major Sanskrit and Prakrit literary genres as developed in the Brahmanical, Buddhist and Jaina traditions, including folktales of riddle, intrigue, etc. Ramayana, Mahabharata. Polished poems of the urbane. Plays. Learned novels and long poems.

ASIA 349 (3) SOUTHEAST ASIAN LITERATURE IN TRANSLATION. Literary works from the Malay/Indonesian-speaking world (Indonesia, Malaysia, Singapore) and some from other regions (mainland Southeast Asia, the Philippines). All readings in English translation.

ASIA 350 (3) ASIAN LITERATURE IN TRANSLATION: A COMPARATIVE APPROACH. A comparative approach to the literatures of East, South and Southeast Asia focusing on a specific theme. Required for majors in Chinese, Japanese and South Asian languages.

ASIA 351 (3) MODERN CHINESE FICTION IN TRANSLATION. Reading of selected novels and stories written between 1750 and the present.

ASIA 352 (3) TOPICS IN TRADITIONAL CHINESE VERNACULAR LITERATURE. Traditional Chinese culture as seen through reading and discussion of exemplary literary works in the vernacular language.

ASIA 354 (3) INTRODUCTION TO JAPANESE CINEMA. Students will be introduced to the work of the major directors (e.g., Ozu, Mizoguchi, Kurosawa, Itami, Oshima, Shinoda). Ideological uses of literary texts and period pieces (e.g., Ugetsu, Life of Oharu, Double Suicide). Impact of depiction of Japanese in American film.

ASIA 355 (3) CHINESE CINEMA. Introduction to the work of major directors.

ASIA 357 (3) MODERN KOREAN FICTION IN TRANSLATION. Selected novels and stories written between 1906 and the present.

ASIA 358 (3) LITERATURE OF MEDIEVAL INDIA IN TRANSLATION. Devotional, mystic, and erotic poetry of medieval Hinduism, Islam, and Sikhism.

ASIA 359 (3) GENDER RELATIONS IN SOUTHEAST ASIAN LITERATURE. Gender relations as portrayed in writings in English translation by women and men from the Malay/Indonesian-speaking world, mainland Southeast Asia, and the Philippines.

ASIA 360 (3) A SPECIFIC ASIAN LITERATURE IN TRANSLATION. Introduction to the literature of a linguistic area of Asia not covered in existing courses. Not given every year. Consult the Department for details.

ASIA 364 (3) MODERN JAPANESE LITERATURE IN TRANSLATION. An introduction to the literature and cultural history of modern Japan, with readings drawn from various literary genres, from 1868 to the present.

ASIA 367 (3) CONTEMPORARY KOREAN CULTURE. An introduction to the literature, drama, music, and art of Korea today. Particular attention will be paid to the continuing influence of traditional themes and forms.

ASIA 368 (3) MODERN LITERATURES OF SOUTH ASIA IN TRANSLATION. Fiction, drama, and poetry of modern India, Pakistan, Bangladesh, and Sri Lanka, including works in English translation and originally written in English.

ASIA 371 (3) FOUNDATIONS OF CHINESE THOUGHT. Chinese thought from its beginnings until the Han dynasty (206 BCE to 220 CE) in its historical and cultural contexts. Includes, among others: Confucius; Mo Zi; the Legalists/Authoritarians; Zhuang Zi; the Lao Zi book.

ASIA 372 (3) DEVELOPMENT OF TRADITIONAL CHINESE THOUGHT. Chinese thought from the Han dynasty (206 BCE to 220 CE) to Wang Yangming (1472–1529) in its historical and cultural contexts. Prerequisite: ASIA 371.

ASIA 377 (3) HISTORY OF KOREAN THOUGHT. An examination of Korean religious, philosophical, and scientific thought from the earliest written records to the present day, with particular focus on the interaction of Shamanism, Buddhism, Confucianism, and, in the present century, Christianity.

ASIA 378 (3) PHILOSOPHICAL WISDOM OF EARLY INDIA. Epistemological and ontological thought from the Vedic period to the period of the rise of philosophical schools or systems. Philosophy in the Mahabharata, Gita; early Buddhist and Jain views on knowledge and reality; views on language. Equivalency: PHIL 378.

ASIA 379 (6) THE SIKHS: HISTORY, RELIGION AND SOCIETY. A historical study of the social and cultural forces that helped shape Sikh religious beliefs and ritual practices over the past four centuries. In dealing with the evolution of Sikh identity, due attention will be given to Sikh ideals, social organization, religious institutions and sacred literature. Equivalency: HIST 389.

ASIA 380 (6) MODERN CHINESE HISTORY SINCE 1840. Equivalency: HIST 380.

ASIA 381 (3) DAOIST (TAOIST) RELIGION AND ITS PHILOSOPHICAL BACKGROUND. A study of the Daoist religious traditions from their beginnings in the second century CE in their cultural, intellectual and social contexts. Equivalency: RELG 365.

ASIA 382 (3) BUDDHISM IN CHINA. Buddhism in China History, thought and practices of Chinese Buddhism from its beginnings until the twentieth century. Equivalency: RELG 366.

ASIA 383 (3) COMMON RELIGIOUS TRADITIONS IN CHINA. A study of the religious practices and beliefs shared by the great majority of people in traditional Chinese culture, including ancestor worship, seasonal festivals, offerings to deities, exorcism of harmful forces.

ASIA 387 (3) JAPANESE RELIGIONS. An introduction to traditional Japanese religions including Shinto, Buddhism, Shugendo, Confucianism, new religions and folklore, and their roles in Japanese history, culture and society.

ASIA 388 (3) BUDDHIST, BRAHMANICAL AND JAIN PHILOSOPHERS IN INTERACTION. Debates on issues of epistemology, language and ontology among the philosophical schools or systems of classical India Nagarjuna, Bhartrhari, Uma-svati, Sankara and others. Equivalency: PHIL 388.

ASIA 398 (3) CLASSICAL HINDU, BUDDHIST AND JAIN MYTHS AND LEGENDS IN TRANSLATION. Stories of gods, goddesses and religious heroes from the Ramayana, Mahabharata, Puranas, Avadanas and in classical poetry and drama.

ASIA 400 (3) CHINESE CHARACTERS: SCRIPT, LANGUAGES, AND CIVILIZATIONS. Advanced study of the structure of the Chinese characters in their graphic, phonetic, and semantic aspects. Prerequisite: ASIA 300 and one of CHIN 200, JAPN 200, KORN 300.

ASIA 410 (3) INTERNATIONAL RELATIONS IN PREMODERN EAST ASIA. International relations, particularly between Korea and Japan in the premodern East Asian context, focusing on migration, trade, diplomacy, war, collective memory, mutual perceptions, and the context of the Sinocentric international order.

ASIA 411 (3) CHINESE POLITICAL THOUGHT AND INSTITUTIONS. Chinese theories and practices of government and administration from earliest times to 1949.

ASIA 418 (3) SOCIAL HISTORY OF INDIA. Fundamental institutions including family, caste and religious organizations, with emphasis on the early modern and British periods.

ASIA 422 (6) MODERN JAPANESE HISTORY SINCE 1800. Equivalency: HIST 422.

ASIA 428 (3) MUGHAL INDIA. History of the politics, economy, society, and culture of South Asia from the Great Mughals to the British conquest.

ASIA 430 (3) INTERNATIONAL RELATIONS IN MODERN EAST ASIA: KOREA AND JAPAN. Trade, diplomacy, war, imperialism, militarism, colonialism, collective memory, mutual perceptions Korean-Japanese relations are examined as an exemplary case for exploring the dimensions of international conflict and partnership.

ASIA 434 (6) HISTORY OF SOUTHEAST ASIA SINCE 1800. Equivalency: HIST 434.

ASIA 438 (3) TWENTIETH CENTURY SOUTH ASIA.

ASIA 440 (6) CULTURE AND SOCIETY IN LATE IMPERIAL CHINA. An in-depth examination of how beliefs and practices were created and transmitted in imperial China from 1500 to 1800. Equivalency: HIST 465.

ASIA 444 (3) TOPICS IN MODERN JAPANESE FICTION AND CULTURAL HISTORY. Focuses on a limited time period or particular aspect of modern Japanese literature. Prerequisite: ASIA 364. Graduate level standing is also acceptable.

ASIA 447 (3) KOREAN WOMEN'S LITERATURE. Women's voices and issues in the Korean literary tradition, from earliest times to the new millennium, in translation. Prerequisite: One of ASIA 347, ASIA 357. Permission of instructor is also acceptable.

ASIA 457 (3) THE MODERN KOREAN NOVEL. Survey of major single-volume novels, ranging from Yi Kwang-su's *Heartlessness* to Ch'oe Yun's *There a Petal Silently Falls*, in translation. Prerequisite: ASIA 357. Permission of instructor is also acceptable.

ASIA 460 (3) MODERN ASIAN WOMEN IN NARRATIVE. Experience of women in the context of a particular Asian culture, as seen through literature, popular culture, film and folklore. Narrative as a medium for the representation and constitution of gender.

ASIA 464 (3) JAPANESE WOMEN'S SELF-WRITING. Selected aspects of the more than 1000 years of self-writing (diary, autobiography, personal fiction). Theory and criticism about the use of writing as a medium of self-expression.

ASIA 480 (6) ECONOMIC AND SOCIAL HISTORY OF MODERN CHINA TO 1940. Equivalency: HIST 480.

ASIA 488 (3) RELIGION, SOCIETY AND STATE IN MODERN INDIA. History of secular and religious discourse in post-independent India. Partition, state policy of secularism, religious mobilization among Hindus and Muslims, communal violence and religious radicalism.

ASIA 501 (3/6) D RESEARCH METHODS AND SOURCE MATERIALS IN CLASSICAL CHINESE STUDIES.

ASIA 502 (3/6) D MODERN CHINESE FICTION AND WESTERN CRITICISM. Same as Comparative Literature 506A.

ASIA 503 (3/6) D PROBLEMS IN THE HISTORY OF THE CHINESE LANGUAGE.

ASIA 504 (3-18) D TEXTS IN ANCIENT CHINESE SCRIPTS.

ASIA 508 (3-18) D TOPICS IN PRE-MODERN CHINESE HISTORY AND INSTITUTIONS.

ASIA 509 (3-18) D ASPECTS OF CHINESE POPULAR THOUGHT AND RELIGION.

ASIA 511 (3-18) D READINGS IN CHINESE RELIGIOUS TEXTS. Selected readings from primary texts in Confucianism, Taoism and Buddhism, and popular religion. Prerequisite: CHIN 301. Equivalency: RELG 511.

ASIA 512 (3-18) D ADVANCED READINGS IN CLASSICAL CHINESE. Prerequisite: CHIN 400.

ASIA 513 (3/6) D TOPICS IN CLASSICAL CHINESE LITERATURE.

ASIA 514 (3-18) D TOPICS IN MODERN CHINESE LITERATURE.

ASIA 515 (3-18) D TOPICS IN EARLY VERNACULAR MODERN CHINESE LITERATURE.

ASIA 521 (3/6) D RESEARCH METHODS AND SOURCE MATERIALS IN JAPANESE STUDIES.

ASIA 522 (3/6) D READINGS IN KAMBUN KUNDOKU. Prerequisite: JAPN 312.

ASIA 523 (3-18) D TOPICS IN THE HISTORY AND STRUCTURE OF THE JAPANESE LANGUAGE.

ASIA 525 (3-18) D TOPICS IN THE SOCIAL HISTORY OF JAPANESE RELIGIONS.

ASIA 528 (3-18) D PROBLEMS OF JAPANESE INTELLECTUAL HISTORY.

ASIA 532 (3-18) D TOPICS IN TRADITIONAL JAPANESE LITERATURE.

ASIA 533 (3-18) D TOPICS IN MODERN JAPANESE LITERATURE.

ASIA 541 (3-18) D RESEARCH METHODS AND SOURCE MATERIALS IN SOUTH ASIAN STUDIES.

ASIA 543 (3-18) D TOPICS IN THE HISTORY AND STRUCTURE OF INDIAN LANGUAGES.

ASIA 546 (3-18) D TOPICS IN SOUTH ASIAN LITERATURE.

ASIA 550 (3-18) D TOPICS IN EARLY SOUTH ASIAN CIVILIZATIONS.

ASIA 561 (3-18) D PROBLEMS OF MODERNIZATION IN EASTERN AND SOUTHERN ASIA.

ASIA 570 (3/6) D APPROACHES TO ASIAN LITERATURE.

ASIA 580 (3/6) C DIRECTED READINGS.

ASIA 581 (3-18) D RESEARCH METHODS AND SOURCE MATERIALS IN KOREAN STUDIES.

ASIA 582 (3/6) D HISTORY AND STRUCTURE OF THE KOREAN LANGUAGE. Prerequisite: LING 300.

ASIA 583 (3-12) D TOPICS IN MODERN KOREAN LITERATURE.

ASIA 584 (3-12) D TOPICS IN TRADITIONAL KOREAN LITERATURE.

ASIA 599 (6/12) C MASTER'S THESIS.

ASIA 699 (0) PH.D. THESIS. In Chinese, Japanese, or South Asian Studies only.

ASLA — ASIAN LANGUAGES FACULTY OF ARTS

ASLA 300 (6) STUDIES IN AN ASIAN LANGUAGE (BASIC COURSE). Introduction to the fundamentals of an Asian language not normally taught in the Department. Not given every year. Consult the Department for details.

ASLA 400 (6) STUDIES IN AN ASIAN LANGUAGE (INTERMEDIATE COURSE). Prerequisite: ASLA 300. Permission of the instructor is also acceptable.

ASTR — ASTRONOMY FACULTY OF SCIENCE

See also Physics.

ASTR 101 (3) INTRODUCTION TO THE SOLAR SYSTEM. General principles of the celestial sphere, laws of motion and light, optics, and telescopes; current knowledge of the Sun and Solar System. Astronomy 201/202 rather than ASTR 101/102 are recommended for students who intend to pursue studies in Astronomy. Prerequisite: All of PHYS 11, MATH 12. [3-2*-0]

ASTR 102 (3) INTRODUCTION TO STARS AND GALAXIES. Modern stellar and extragalactic astronomy. Stars and stellar evolution from protostars to black holes; galaxies and quasars; cosmology. Astronomy 201/202 rather than 101/102 are recommended for students who intend to pursue studies in Astronomy. Prerequisite: All of PHYS 11, MATH 12. [3-2*-0]

ASTR 201 (3) STELLAR ASTROPHYSICS. Observed characteristics of stars, radiation and stellar spectra, the interior structure of stars, nuclear reactions and stellar evolution, white dwarfs, neutron stars and black holes. Prerequisite: One of PHYS 101, PHYS 107, PHYS 153, SCIE 001. [3-0-0]

ASTR 202 (3) GALACTIC ASTRONOMY. Basic properties of the Milky Way Galaxy, kinematics of stars, star clusters and stellar evolution, stellar populations and the formation of the Galaxy, rotation and mass of the Galaxy, the Local Group of Galaxies. Prerequisite: One of PHYS 101, PHYS 107, PHYS 153, SCIE 001. ASTR 201 is recommended. [3-0-0]

ASTR 303 (3) EXTRAGALACTIC

ASTRONOMY. Properties of normal galaxies, elements of stellar dynamics; galactic evolution, active galaxies and quasars. Prerequisite: One of PHYS 206, PHYS 216. ASTR 102 or ASTR 202 is recommended. [3-0-0]

ASTR 304 (3) RESEARCH TOPICS IN

ASTRONOMY. This course will develop the background and present the current status of a selected topic in modern astronomy. The topic will reflect the research interests of the instructor(s) and the students will be presented with problems related to this research. Prerequisite: Permission of the department head is required. [3-0-0]

ASTR 310 (3) EXPLORING THE UNIVERSE I: THE SOLAR SYSTEM.

A survey of recent discoveries about the planets and other objects in the solar system, without the use of advanced mathematics. The Sun, the existence of planetary systems around other stars, and the search for life. Not open to first year students and not for credit in the Faculties of Science and Applied Science. [3-0-1*]

ASTR 311 (3) EXPLORING THE UNIVERSE II: STARS AND GALAXIES.

A survey of recent discoveries in modern astronomy without the use of advanced mathematics. Stars, pulsars, black holes, galaxies, quasars and the origin and evolution of the Universe. Not open to first year students and not for credit in the Faculties of Science and Applied Science. [3-0-1*]

ASTR 402 (3) FUNDAMENTALS OF

ASTROPHYSICS. The interaction of radiation with matter (radiative transfer, bremsstrahlung, synchrotron radiation, Compton scattering), atomic/molecular physics, astrophysical hydrodynamics; supernova remnants, masers, pulsars, gamma-ray bursts and accretion flows. Prerequisite: All of PHYS 203, PHYS 301. [3-0-0]

ASTR 403 (3) COSMOLOGY. Introduction to the study of the Universe as a whole. Foundations of the Hot Big Bang model, the early Universe, nucleosynthesis, the cosmic microwave background, large-scale structure, galaxy formation and quasars. Prerequisite: PHYS 200. ASTR 303 is recommended. [3-0-0]

ASTR 404 (3) ASTRONOMICAL AND ASTROPHYSICAL MEASUREMENTS.

Astronomical instrumentation and techniques for ground and space-based observations. Theory of measurement, imaging, interferometry and spectroscopy of electromagnetic radiation at optical, radio, infrared, and X-ray wavelengths. Astronomical data analysis. Prerequisite: PHYS 308 and one of PHYS 312, MATH 316. [3-0-0]

ASTR 405 (3) ASTRONOMICAL

LABORATORY. Experiments in the use of astronomical instrumentation and data analysis. Use of the 40-cm reflector, spectrograph and electronic detectors. Photometric and spectroscopic analysis of digital data. Prerequisite: ASTR 404. [0-0-3]

ASTR 449 (2-6) C DIRECTED RESEARCH IN

ASTRONOMY. The student will investigate a research problem under the direction of a staff

member. If elected for 6 credits, a thesis will be required.

ASTR 500 (3) PRINCIPLES OF MODERN

ASTRONOMY. An introduction to the physical processes occurring in the stars, the interstellar medium, and in our own and other galaxies (fourth-year Honours students in the Physics and Astronomy Department may elect this course with special permission of the Department Head).

ASTR 502 (3) ASTRONOMICAL DYNAMICS.

ASTR 503 (2-6) C OBSERVATIONAL ASTRONOMY. Critical discussion of modern ground-based and satellite borne instrumentation for astronomical observations in all spectral regions. Description of measuring engines and reduction techniques.

ASTR 504 (2-6) C STELLAR ASTRONOMY.

The study of the structure of stellar interiors and stellar atmospheres and the physical processes occurring in them; the interpretation of stellar spectra: nucleosynthesis, and related problems.

ASTR 505 (2-6) C GALACTIC ASTRONOMY.

The study of the structure, content and evolution of our own and other galaxies, including the study of the physical processes occurring in the interstellar medium and galactic nuclei.

ASTR 506 (2/3) D HIGH-ENERGY

ASTROPHYSICS.

ASTR 507 (2/3) D PLANETARY SCIENCES.**ASTR 520 (3) ASTRONOMY/ASTROPHYSICS RESEARCH SEMINAR.****ASTR 530 (2-6) C DIRECTED STUDIES IN ASTRONOMY.****ASTR 534 (2-6) C STUDIES IN STELLAR STRUCTURE.****ASTR 535 (2-6) C STUDIES IN STELLAR ATMOSPHERES.****ASTR 536 (2-6) C STUDIES OF THE INTERSTELLAR MEDIUM.****ASTR 537 (2-6) C STUDIES IN EXTRA GALACTIC ASTRONOMY.****ASTR 538 (2-6) C STUDIES IN COSMOLOGY.****ASTR 549 (12) M.SC. ASTU 201 (3) CANADA, JAPAN AND THE PACIFIC: CULTURAL STUDIES. An interdisciplinary introduction to the cultures of Canada and Japan, and the interrelations between them. Specific topics vary from year to year but will include themes such as constructing the past; nationalism; self-perceptions; cross-cultural perceptions; multiculturalism in Canada and Japan; images in architecture, film and literature; mythologies.

ASTU 202 (3) CANADA, JAPAN AND THE PACIFIC: POLITICAL, ECONOMIC AND GEOGRAPHICAL PERSPECTIVES. An interdisciplinary introduction to political, economic and geographical interactions between Japan and Canada, the links between these countries and other Pacific Rim nations, and the historical origins of these connections. Specific topics will vary from year to year, but will include themes such as economic integration in the Pacific region; the role of resource economies such as Canada's; security relations in the Pacific; the role of Japanese investment in the Asia-Pacific region. Equivalency: GEOG 281.

ASTU 310 (3) CO-OPERATIVE WORK PLACEMENT I. Approved and supervised work experience with a public or private organization for a minimum of 13 weeks full-time. Orientation workshops. Final work term report required. Restricted to students in the Arts Co-operative Education Program. Prerequisite: 6 credits first-year English or Arts I; 6 credits of science; 6 credits of literature; satisfaction of Faculty language requirement.

ASTU 311 (3) CO-OPERATIVE WORK PLACEMENT II. Approved and supervised work experience with a public or private organization for a minimum of 13 weeks full-time. Final work term report required. Prerequisite: ASTU 310.

ASTU 400 (3-6) D INTERDISCIPLINARY STUDIES IN ARTS. For upper-division students in the Faculty of Arts. Topics announced annually.

ASTU 401 (3-6) D SPECIAL TOPICS IN ARTS STUDIES. For upper-division students in the Faculty of Arts offered by a distinguished visitor to the campus for one or two terms.

ASTU 410 (3) CO-OPERATIVE WORK PLACEMENT III. Approved and supervised work experience with a public or private organization for a minimum of 13 weeks full-time. Final work term report. Prerequisite: ASTU 311.

ASTU 411 (3) CO-OPERATIVE WORK PLACEMENT IV. Approved and supervised work experience with a public or private organization for a minimum of 13 weeks full-time. Final work term report. Prerequisite: ASTU 410.

ASTU 412 (3) CO-OPERATIVE WORK PLACEMENT V. Optional extra work placement. Approved and supervised work experience with a public or private organization for a minimum of 13 weeks full-time. Final work term report. Prerequisite: ASTU 411.

ASTU 501 (3) CO-OPERATIVE WORK PLACEMENT 1. Approved and supervised paid work experience with a public or private organization for a minimum of 13 weeks full-time. Final written report required. Restricted to Master's degree students in departments with approved co-op programs.

ASTU 502 (3) CO-OPERATIVE WORK PLACEMENT 2. Prerequisite: ASTU 501.

ASTU 503 (3) CO-OPERATIVE WORK PLACEMENT 3. Prerequisite: ASTU 502.

ATSC — ATMOSPHERIC SCIENCE
FACULTY OF SCIENCE

ATSC 201 (3) METEOROLOGY OF STORMS. Characteristics and physical processes of thunderstorms, tornadoes, lightning, hail, hurricanes, blizzards, cyclones and other storms. Prerequisite: Completion of first-year science. [3-0-0]

ATSC 301 (3) ATMOSPHERIC RADIATION AND REMOTE SENSING. Energy transfer at infrared, visible, and microwave wavelengths, measurements of atmosphere and surface from satellite. Application of techniques from linear algebra and physics to atmospheric problems. Prerequisite: One of PHYS 102, PHYS 108, PHYS 122 and one of MATH 221, MATH 223 and familiarity with a programming language. [3-0-0]

ATSC 303 (3) METHODS IN ATMOSPHERIC SCIENCE. An introduction to instrumentation used in monitoring the state of the atmosphere; a brief survey of methods of analysis of meteorological data. Prerequisite: One of EOSC 211, CPSC 111 and one of ATSC 201, GEOG 200. [2-2-0]

ATSC 398 (3) CO-OPERATIVE WORK PLACEMENT I. Approved and supervised technical work experience in an industrial, university or government setting for a minimum of 14 weeks. Normally taken in the Winter Session (Term 2) in third year. Technical report required. Restricted to students admitted to Co-operative Education Program in Atmospheric Science. Prerequisite: All of ATSC 201, GEOG 300.

ATSC 399 (3) CO-OPERATIVE WORK PLACEMENT II. Approved and supervised technical work experience in an industrial, university or government setting for a minimum of 14 weeks. Normally taken in the Summer Session (Terms 1 and 2) following third year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Atmospheric Science. Prerequisite: ATSC 398.

ATSC 404 (3) DYNAMIC METEOROLOGY. Dynamic principles governing atmospheric motions on a rotating planet. Simplified mathematical models of atmospheric flow based on scale analysis. Application to synoptic-scale and general circulation of the troposphere. Prerequisite: One of PHYS 312, MATH 316 and one of EOSC 250, MATH 217, MATH 317. [3-0-0]

ATSC 405 (3) CLOUD PHYSICS AND CHEMISTRY. Cloud thermodynamics, chemistry and microphysics. Computer modelling of droplet growth, convection, and mixing. Application of differential equations to atmospheric problems. Prerequisite: All of PHYS 313, MATH 215. Familiarity with a programming language is required. [3-0-0]

ATSC 406 (3) OPERATIONAL METEOROLOGY. Introduction to meteorological prediction, meteorological data analysis, prognosis of weather systems, motion and development, satellite imagery, Doppler radar, numerical weather prediction, extended range

forecasting, applied laboratory exercises. Prerequisite: ATSC 201. Corequisite: GEOG 304. [2-2-0]

ATSC 409 (3) NUMERICAL TECHNIQUES FOR OCEAN, ATMOSPHERE AND EARTH SCIENTISTS. Web-based introduction to the practical numerical solution of ordinary and partial differential equations including considerations of stability and accuracy. Credit will not be granted for both ATSC 409 and ATSC 506/EOSC 511. Prerequisite: One of MATH 316, PHYS 312. Familiarity with a programming language is required [0-0-3]

ATSC 414 (3) GEOPHYSICAL FLUID DYNAMICS. The fundamental principles governing the flow of a density-stratified fluid on a rotating planet, with applications to the motions of the ocean and the atmosphere. Prerequisite: One of PHYS 312, MATH 316. [3-0-0]

ATSC 448 (3/6) D DIRECTED STUDIES. Investigation of a topic to be agreed upon by a member of the faculty and the student. Permission of the undergraduate advisor and of the supervising faculty member is required before registration.

ATSC 449 (6) HONOURS PROJECT. Honours students must submit a graduating report based on a project undertaken with the approval of the Associate Chair of the Atmospheric Science Program.

ATSC 498 (3) CO-OPERATIVE WORK PLACEMENT III. Approved and supervised technical work experience in an industrial, university or government setting for a minimum of 14 weeks. Normally taken in the Summer Session (Terms 1 and 2) after fourth year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Atmospheric Science. Prerequisite: ATSC 399 and one of ATSC 303, GEOG 304.

ATSC 499 (3) CO-OPERATIVE WORK PLACEMENT IV. Approved and supervised technical work experience in an industrial, university or government setting for a minimum of 14 weeks. Normally taken in Winter Session (Term 1) of the fifth year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Atmospheric Science. Prerequisite: ATSC 498.

ATSC 500 (3) BOUNDARY-LAYER METEOROLOGY. Theoretical and empirical analysis of the atmospheric boundary layer with particular emphasis on energy and mass exchanges near the Earth's surface.

ATSC 506 (3) NUMERICAL TECHNIQUES FOR OCEAN, ATMOSPHERE AND EARTH SCIENTISTS. Credit will not be granted for both ATSC 409 and ATSC 506/EOSC 511. Equivalency: EOSC 511.

ATSC 548 (3) MASTER'S GRADUATION ESSAY.

ATSC 595 (2-6) D DIRECTED STUDIES.

ATSC 599 (12-15) D MASTER'S THESIS.

ATSC 699 (0) THESIS FOR PH.D.

AUDI — AUDIOLOGY AND SPEECH SCIENCES SCHOOL OF AUDIOLOGY AND SPEECH SCIENCES

All 600-level seminars are Ph.D. level courses and may not be offered on a regular basis. All may be taken more than once for credit.

AUDI 400 (3) INTRODUCTION TO SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY. Frameworks from linguistics, psychology, and speech and hearing sciences as applied to communication disorders, clinical populations and practices. Prerequisite: LING 200. [3-0; 0-0]

AUDI 402 (1.5) NEUROANATOMY FOR AUDIOLOGY AND SPEECH-LANGUAGE PATHOLOGY. Prerequisite: As indicated on website www.audiospeech.bc.ca or by permission of the instructor. [0-0; 3-0]

AUDI 403 (1.5) INTRODUCTION TO NEUROLINGUISTICS. Prerequisite: All of LING 200, LING 201, AUDI 402.

AUDI 513 (1/2) ACOUSTIC AND ARTICULATORY PHONETICS.

AUDI 514 (2/3) C HEARING SCIENCE I.

AUDI 516 (1-3) D DISCOURSE ANALYSIS. May be taken more than once for credit.

AUDI 518 (3) FUNDAMENTALS OF AUDIOLOGY. Corequisite: All of AUDI 513, AUDI 514, AUDI 522. [2-2; 0-0]

AUDI 520 (3) PHONOLOGICAL DEVELOPMENT, ASSESSMENT AND INTERVENTION.

AUDI 522 (2) INTRODUCTION TO COMMUNICATION DISORDERS, ASSESSMENT AND INTERVENTION.

AUDI 523 (3) EXPERIMENTAL PHONETICS. Acoustic phonetic and acoustic prosodic features observed in speech analysis, particularly in spectrographic displays, and their relation to production and perception; experimental findings and theories pertaining to the most important of these features. Prerequisite: AUDI 513. [0-0; 3-0]

AUDI 526 (3) ACQUIRED LANGUAGE DISORDERS. Language impairment resulting from acquired brain damage; aphasia and head injury; assessment, interpretation of results, intervention planning and procedures, family/client counselling. Lab. Prerequisite: All of AUDI 402, AUDI 522. [0-0; 2-2]

AUDI 527 (1) INTRODUCTION TO DYSPHAGIA.

AUDI 528 (2) AURAL REHABILITATION I. Prerequisite: AUDI 518. [2-2; 0-0]

AUDI 529 (3) AURAL REHABILITATION II.

AUDI 530 (1-3) D RESEARCH METHODS. May be taken more than once for credit.

AUDI 545 (0) ISSUES IN CLINICAL PRACTICE. Ethics, service delivery systems, practice considerations specific to the work place.

AUDI 546 (3-9) D ADVANCED COMMUNICATION SCIENCES AND DISORDERS. May be taken for credit more than once.

AUDI 547 (1-9) C DIRECTED READING IN AUDIOLOGY AND SPEECH SCIENCES. May be taken more than once.

AUDI 548 (3) GRADUATING PAPER.

AUDI 549 (6) M.Sc. THESIS.

AUDI 550 (0.5-6) D ADVANCED TOPICS IN AUDIOLOGY. May be taken more than once for credit.

AUDI 552 (3) DIAGNOSTIC AUDIOLOGY I. Principles and procedures of audiometric testing and calibration; emphasis on basic audiologic and pediatric test procedures. Lab. Prerequisite: All of AUDI 518, AUDI 522. [2-2; 0-0]

AUDI 553 (3) DIAGNOSTIC AUDIOLOGY II.

AUDI 554 (3) C HEARING SCIENCE II.

AUDI 556 (3) AMPLIFICATION I. Prerequisite: All of AUDI 518, AUDI 522. [0-0; 2-2]

AUDI 557 (3) AMPLIFICATION II.

AUDI 558 (3) PHYSIOLOGICAL MEASUREMENT OF AUDITORY FUNCTION. Principles and procedures of physiological measures of auditory function, including evoked potentials and acoustic immittance. Lab. Prerequisite: AUDI 552. [2-2; 0-0]

AUDI 559 (2) PRACTICUM IN SPEECH-LANGUAGE PATHOLOGY FOR AUDIOLOGY MAJORS. Open only to students enrolled in the School. Prerequisite: AUDI 522.

AUDI 561 (3) AURAL REHABILITATION II.

AUDI 562 (3) PEDIATRIC AUDIOLOGY.

AUDI 563 (2) COCHLEAR IMPLANTS: AUDIOLOGICAL ASSESSMENT AND MANAGEMENT ISSUES.

AUDI 564 (2) ADVANCED HEARING SCIENCE. Consideration of critical bodies of data, current theories, and recent advances in auditory physiology and psychoacoustics. Prerequisite: AUDI 554.

AUDI 565 (1-3) D AUDIOLOGY BASIC PRACTICUM I. Prerequisite: All of AUDI 518, AUDI 552, AUDI 554, AUDI 556.

AUDI 566 (1-3) D AUDIOLOGY BASIC PRACTICUM II. Prerequisite: AUDI 565.

AUDI 567 (1.5) AUDIOLOGY ADVANCED PRACTICUM I. Prerequisite: All of AUDI 566, AUDI 528, AUDI 558, AUDI 560, AUDI 562, AUDI 564.

AUDI 568 (1.5) AUDIOLOGY ADVANCED PRACTICUM II. Prerequisite: AUDI 567.

AUDI 569 (1.5) HEARING AND AGING.

AUDI 570 (1) CASE STUDIES IN PHONOLOGICAL INTERVENTION. Prerequisite: All of AUDI 520, AUDI 522. [0-0; 2-2]

AUDI 571 (3) DEVELOPMENTAL LANGUAGE DISORDERS. Prerequisite: All of LING 451, LING 452, PSYC 302. PSYC 309 and PSYC 336 and PSYC 337 are recommended. [2-2; 0-0]

AUDI 572 (3) COGNITIVE PROCESSING AND ACQUIRED LANGUAGE DISORDERS.

History of linguistic aphasiology; analysis of current research in disturbances of the sound system, sentence production and sentence comprehension; relationships between the various levels of language disturbance in aphasia. Prerequisite: All of LING 310, LING 300, LING 311, AUDI 402. LING 301 and LING 312 are recommended. [3-0; 0-0]

AUDI 575 (3) LANGUAGE DEVELOPMENT AND DISORDERS IN THE SCHOOL YEARS. Prerequisite: All of LING 451, LING 452, AUDI 516. [3-0; 0-0]

AUDI 576 (2) TOPICS IN FLUENCY DISORDERS.

AUDI 576 (3) DISORDERS OF SPEECH PRODUCTION.

AUDI 577 (2) ADVANCED STUDIES IN ACQUIRED SPEECH AND SWALLOWING DISORDERS.

AUDI 579 (2) PRACTICUM IN AUDIOLOGY FOR SPEECH-LANGUAGE PATHOLOGY MAJORS. Open only to students enrolled in the School. Prerequisite: All of AUDI 518, AUDI 522.

AUDI 580 (1.5) SPEECH PERCEPTION AND HEARING ABILITY.

AUDI 581 (3) PERCEPTUAL, COGNITIVE, AND SOCIAL-AFFECTIVE ISSUES IN COMMUNICATION DEVELOPMENT, ASSESSMENT AND INTERVENTION.

AUDI 583 (3) ADVANCED SPEECH SCIENCE. Prerequisite: AUDI 523. [3-0; 0-0]

AUDI 585 (2) LANGUAGE DEVELOPMENT ACROSS THE LIFESPAN. Prerequisite: All of LING 451, LING 452. [0-0; 2-0]

AUDI 586 (2) ACQUIRED LANGUAGE DISORDERS II. Prerequisite: All of AUDI 526, AUDI 576. Corequisite: AUDI 572. [3-0; 0-0]

AUDI 590 (1-3) D SPEECH-LANGUAGE PATHOLOGY BASIC PRACTICUM I. Prerequisite: All of AUDI 520, AUDI 522, AUDI 571. Corequisite: AUDI 570.

AUDI 591 (1-3) D SPEECH-LANGUAGE PATHOLOGY BASIC PRACTICUM II. Prerequisite: All of AUDI 526, AUDI 527, AUDI 576, AUDI 590.

AUDI 593 (1.5) SPEECH-LANGUAGE PATHOLOGY ADVANCED PRACTICUM I. Prerequisite: AUDI 591. Corequisite: All of AUDI 577, AUDI 586.

AUDI 594 (1.5) SPEECH-LANGUAGE PATHOLOGY ADVANCED PRACTICUM II. Prerequisite: All of AUDI 593, AUDI 575, AUDI 581.

AUDI 598 (2) FUNDAMENTALS OF AUDIOLOGY FOR HEALTH AND EDUCATION. Same as AUDI 518, except does not include lab or observations. Cannot be taken for credit by students enrolled in the Audiology and Speech Sciences M.Sc. program. [2-0; 0-0]

AUDI 649 (6) PH.D. THESIS.

AUDI 660 (1-9) D SEMINAR IN HEARING SCIENCE.

AUDI 670 (1-9) D SEMINAR IN DEVELOPMENTAL PHONETICS AND PHONOLOGY. Examination of current research, roles of theories in understanding the relationship between speech sound production and comprehension/perception. Prerequisite: AUDI 580.

AUDI 672 (1-9) D SEMINAR IN LINGUISTIC APHASIOLOGY. Examination of current research, roles of linguistic theories in understanding language disturbance in aphasia; development of single-case studies. Prerequisite: AUDI 572.

AUDI 675 (1-9) D SEMINAR IN DEVELOPMENTAL LANGUAGE DISORDERS.

AUDI 685 (1-9) D SEMINAR IN LANGUAGE DEVELOPMENT.

AUDI 690 (1-9) D SEMINAR IN SPEECH SCIENCE.

BA — BUSINESS ADMINISTRATION – CORE FACULTY OF COMM (SAUDER)
BA 500 (6-20) D MBA CORE.

BA 510 (1.5) BA 520 (1.5) CAREER DEVELOPMENT.

BA 530 (6-18) D

BAAC — BUSINESS ADMINISTRATION: ACCOUNTING FACULTY OF COMM (SAUDER)

BAAC 500 (1.5) FINANCIAL REPORTING.

BAAC 501 (1.5) FINANCIAL STATEMENT ANALYSIS I. Prerequisite: BAAC 500.

BAAC 502 (1.5) FINANCIAL STATEMENT ANALYSIS II. Prerequisite: BAAC 501.

BAAC 510 (1.5) COST ANALYSIS FOR DECISION MAKING.

BAAC 511 (1.5) ACCOUNTING FOR PERFORMANCE EVALUATION.

BAAC 512 (1.5) ACCOUNTING FOR OPERATIONS MANAGEMENT.

BAAC 520 (1.5) TAXATION AND DECISION MAKING I. Prerequisite: BAFI 500.

BAAC 521 (1.5) TAXATION AND DECISION MAKING II. Prerequisite: BAFI 500.

BAAC 550 (1.5) MANAGERIAL ACCOUNTING. Not available to MBA students. Equivalency: HCEC 502.

BAAC 580 (1.5) TOPICS IN ACCOUNTING.

BAAC 590 (1.5/3) D DIRECTED STUDIES IN ACCOUNTING.

**BABS — BUSINESS ADMINISTRATION:
BUSINESS STATISTICS** FACULTY OF
COMM (SAUDER)

BABS 500 (1.5) APPLIED BUSINESS
STATISTICS I.

BABS 501 (1.5) APPLIED BUSINESS
STATISTICS II.

BABS 502 (1.5) FORECASTING FOR
MANAGEMENT. Prerequisite: BABS 500.

BABS 503 (1.5) ANALYZING MULTIVARIATE
BUSINESS DATA.

BABS 504 (1.5) SURVEY DESIGN AND
ANALYSIS.

BABS 510 (1.5) CASE STUDIES IN BUSINESS
STATISTICS.

BABS 520 (1.5) EMPIRICAL INVESTIGATIONS
IN FINANCE. Prerequisite: All of BABS 500,
BAFI 500, BAFI 511.

BABS 550 (1.5) APPLICATION OF STATISTICS
IN MANAGEMENT. Not available to MBA
students. Equivalency: HCEC 554.

BABS 580 (1.5) TOPICS IN BUSINESS
STATISTICS.

BABS 590 (1.5/3) D DIRECTED STUDIES IN
BUSINESS STATISTICS.

**BAEN — BUSINESS ADMINISTRATION:
ENTREPRENEURSHIP** FACULTY OF
COMM (SAUDER)

BAEN 500 (1.5) ENTREPRENEURSHIP AND
NEW VENTURE CREATION. Corequisite: All
of BAFI 500, BAPA 500.

BAEN 501 (1.5) CORPORATE
ENTREPRENEURSHIP.

BAEN 502 (1.5) MANAGING NEW VENTURE
GROWTH.

BAEN 503 (1.5) MANAGING RISK AND
UNCERTAINTY.

BAEN 504 (1.5) PREPARING THE BUSINESS
DEVELOPMENT PLAN. Prerequisite: BAEN
500.

BAEN 505 (1.5) VENTURE CAPITAL FINANCE
OF ENTREPRENEURSHIP.

BAEN 506 (1.5) TECHNOLOGY
ENTREPRENEURSHIP I.

BAEN 507 (1.5) TECHNOLOGY
ENTREPRENEURSHIP II. Prerequisite: BAEN
506.

BAEN 580 (1.5) TOPICS IN
ENTREPRENEURSHIP.

BAEN 590 (1.5/3) D DIRECTED STUDIES IN
ENTREPRENEURSHIP.

**BAFI — BUSINESS ADMINISTRATION:
FINANCE** FACULTY OF COMM (SAUDER)

BAFI 500 (1.5) BASIC FINANCE.

BAFI 501 (1.5) BANKING AND CAPITAL
MARKETS. Prerequisite: BAFI 500.

BAFI 502 (1.5) CAPITAL BUDGETING –
VALUATION. Prerequisite: BAFI 500.

BAFI 503 (1.5) CAPITAL BUDGETING –
ESTIMATION. Prerequisite: BAFI 502.

BAFI 504 (1.5) CAPITAL STRUCTURE AND
DIVIDEND POLICY.

BAFI 505 (1.5) FINANCIAL PLANNING.

BAFI 506 (1.5) FINANCIAL STRATEGIES.
Prerequisite: BAFI 500.

BAFI 507 (1.5) CORPORATE CONTROL.

BAFI 508 (1.5) CASES IN FINANCIAL
STRATEGY.

BAFI 509 (1.5) DEBT, FINANCIAL DISTRESS,
AND REORGANIZATION. Prerequisite: BAFI
500.

BAFI 510 (1.5) SECURITY ANALYSIS.

BAFI 511 (1.5) SECURITY PRICING.

BAFI 512 (1.5) OPTIONS AND FUTURES.
Prerequisite: BAFI 511.

BAFI 513 (1.5) RISK MANAGEMENT. Prere-
quisite: All of BAFI 511, BAFI 512.

BAFI 514 (1.5) INSTITUTIONAL
INVESTMENT. Prerequisite: All of BAFI 500,
BAFI 511, BABS 520.

BAFI 515 (1.5) DYNAMIC PORTFOLIO
STRATEGIES. Prerequisite: All of BAFI 511,
BABS 520.

BAFI 516 (1.5) FINANCIAL ENGINEERING.
Prerequisite: All of BAFI 511, BAFI 512.

BAFI 517 (1.5) OPTIONS ON REAL ASSETS.

BAFI 518 (1.5) FIXED INCOME SECURITIES.
Prerequisite: BAFI 511.

BAFI 519 (1.5) SECURITY MARKET
IMPERFECTIONS.

BAFI 521 (1.5) FOREIGN EXCHANGE RISK
MANAGEMENT.

BAFI 522 (1.5) MARKET MICROSTRUCTURE.

BAFI 580 (1.5) SPECIAL TOPICS IN FINANCE.

BAFI 590 (1.5/3) D DIRECTED STUDIES IN
FINANCE.

BASC 580 (1.5) CURRENT ISSUES IN LOGISTICS AND OPERATIONS MANAGEMENT.

BASC 590 (1.5/3) D DIRECTED STUDY IN SUPPLY CHAIN MANAGEMENT.

BASM — BUSINESS ADMINISTRATION: STRATEGIC MANAGEMENT FACULTY OF COMM (SAUDER)

BASM 500 (1.5) STRATEGIC DECISION MAKING.

BASM 501 (1.5) BUSINESS STRATEGY. Prerequisite: All of BAPA 500, BAFI 500.

BASM 502 (1.5) CORPORATE STRATEGY. Prerequisite: BASM 501.

BASM 503 (1.5) STRATEGIC PLANNING MODELS.

BASM 504 (1.5) INTELLECTUAL PROPERTY AND BUSINESS STRATEGY.

BASM 505 (1.5) INDUSTRY AND COMPETITIVE ANALYSIS.

BASM 506 (1.5) STRATEGY IMPLEMENTATION.

BASM 507 (1.5) CREATIVE THINKING AND PROBLEM SOLVING.

BASM 508 (1.5) INCENTIVES AND BUSINESS ARRANGEMENTS.

BASM 510 (1.5) NOT-FOR-PROFIT ORGANIZATIONAL STRATEGY.

BASM 511 (1.5) STRATEGIC MANAGEMENT OF SERVICES.

BASM 512 (1.5) STRATEGIC PARTNERING.

BASM 513 (1.5) E-BUSINESS STRATEGY.

BASM 550 (1.5) STRATEGIC MANAGEMENT. Not available to MBA students. Equivalency: HCEC 561.

BASM 580 (1.5) TOPICS IN STRATEGIC MANAGEMENT.

BASM 590 (1.5/3) D DIRECTED STUDIES IN STRATEGIC MANAGEMENT.

BATL — BUSINESS ADMINISTRATION: TRANSPORTATION AND LOGIST FACULTY OF COMM (SAUDER)

BATL 500 (1.5) TRANSPORTATION SERVICES MANAGEMENT.

BATL 501 (1.5) TRANSPORTATION POLICY.

BATL 502 (1.5) APPLIED DEMAND ANALYSIS.

BATL 503 (1.5) COST AND PRODUCTIVITY ANALYSIS.

BATL 510 (1.5) INTRODUCTION TO LOGISTICS AND OPERATIONS MANAGEMENT.

BATL 520 (1.5) PROJECT MANAGEMENT.

BATL 521 (1.5) MANAGEMENT OF INFRASTRUCTURE.

BATL 580 (1.5) TOPICS IN LOGISTICS AND OPERATIONS MANAGEMENT.

BATL 590 (1.5/3) D DIRECTED STUDIES IN TRANSPORTATION AND LOGISTICS.

BATM — BUSINESS ADMINISTRATION: TECHNOLOGY MANAGEMENT FACULTY OF COMM (SAUDER)

BATM 500 (1.5) MANAGEMENT OF TECHNOLOGICAL ENTERPRISES.

BATM 501 (1.5) MARKETING HIGH TECHNOLOGY AND INDUSTRIAL PRODUCTS.

BATM 502 (1.5) COMPETING IN HIGH TECHNOLOGY INDUSTRIES.

BATM 503 (1.5) TELECOMMUNICATIONS MANAGEMENT AND POLICY.

BATM 580 (1.5) TOPICS IN TECHNOLOGY MANAGEMENT.

BATM 590 (1.5/3) D DIRECTED STUDIES IN TECHNOLOGY MANAGEMENT.

BAUL — BUSINESS ADMINISTRATION: URBAN LAND ECONOMICS FACULTY OF COMM (SAUDER)

BAUL 500 (1.5) REAL ESTATE MARKETS.

BAUL 501 (1.5) REAL ESTATE INVESTMENT ANALYSIS.

BAUL 502 (1.5) ECONOMICS OF LOCATION.

BAUL 503 (1.5) LAND DEVELOPMENT AND REAL OPTIONS.

BAUL 504 (1.5) HOUSING.

BAUL 505 (1.5) LOCAL GOVERNMENT.

BAUL 506 (1.5) LAND USE REGULATION.

BAUL 507 (1.5) MORTGAGE MARKETS. Prerequisite: All of BAFI 500, BABS 500, BAPA 500.

BAUL 508 (1.5) REAL ESTATE SECURITIZATION. Prerequisite: All of BAFI 500, BABS 500, BAPA 500.

BAUL 509 (1.5) REAL ESTATE DEVELOPMENT.

BAUL 510 (1.5) REAL ESTATE AND PORTFOLIO ANALYSIS. Prerequisite: All of BAFI 500, BABS 500, BAPA 500.

BAUL 580 (1.5) TOPICS IN URBAN LAND ECONOMICS.

BAUL 590 (1.5/3) D DIRECTED STUDIES IN URBAN LAND ECONOMICS.

BIOC — BIOCHEMISTRY FACULTY OF MEDICINE

BIOC 300 (6) PRINCIPLES OF BIOCHEMISTRY. Introduction to proteins and enzymes, the major metabolic pathways, control mechanisms and the biochemistry of gene function, with an emphasis on human biochemistry. At least 60% standing in prerequisites is recommended. Credit is given for only one of BIOL 201, or BIOC 300, and only one of BIOC 300, 302 or 303. Prerequisite: Either (a) CHEM 204 or (b) all of CHEM 233, CHEM 205 or (c) all of CHEM 233, PHAR 220. [3-0-0; 3-0-0]

BIOC 301 (3) BIOCHEMISTRY LABORATORY. Techniques by which the chemical and physical properties of fundamental components of the cell are studied. Corequisite: One of BIOC 300, BIOC 302, BIOC 303. [0-3-1; 0-3-1]

BIOC 302 (3) GENERAL BIOCHEMISTRY.

Metabolic reactions of lipids, steroids, amino acids and nucleotides; the biochemistry of replication, transcription and translation. Credit is given for only one of BIOC 300 or 302 or 303. Prerequisite: BIOL 201 and either (a) one of CHEM 204, CHEM 232 or (b) all of CHEM 233, CHEM 205. [3-0; 1]

BIOC 303 (6) MOLECULAR BIOCHEMISTRY.

Structure, function and metabolism of lipids, steroids, amino acids and nucleotides; the biochemistry and molecular biology of replication, transcription, translation and gene regulation. For students in Biochemistry and Honours programs in other life sciences. Credit is given for only one of BIOC 300 or 302 or 303. Prerequisite: BIOL 201 and either (a) one of CHEM 204, CHEM 232 or (b) all of CHEM 233, CHEM 205. [3-0; 3-0]

BIOC 398 (3) INTERNSHIP WORK

PLACEMENT I. Approved and supervised technical work experience in an industrial or academic laboratory for three or four months. Technical report required. Restricted to students admitted to the Internship Program in Biochemistry and Molecular Biology. Prerequisite: Completion of academic third year in Biochemistry major or honours program is required.

BIOC 399 (3) INTERNSHIP WORK

PLACEMENT II. Approved and supervised technical work experience in an industrial or academic research setting for four months. Technical report required. Restricted to students admitted to the Internship Program in Biochemistry and Molecular Biology. Prerequisite: BIOC 398.

BIOC 402 (3) PROTEINS: STRUCTURE AND FUNCTION.

Structural components of proteins, classification by primary, secondary and tertiary structure, protein chemistry and purification, peptide and protein synthesis by chemical means and three-dimensional structure determination using X-ray diffraction and NMR. Prerequisite: One of BIOC 300, BIOC 302, BIOC 303. A minimum standing of 65% is recommended in these courses. [3-0; 0-0]

BIOC 403 (3) ENZYMOLOGY. Kinetic analysis, catalytic mechanisms, transition state stabilization and regulation of activity, strategies for active site characterization and case studies of well-documented enzyme systems. Credit given for only 1 of BIOC 403, CHEM 413 or CHEM 569. Prerequisite: BIOC 402. A minimum standing of 65% is recommended. [0-0; 3-0]

BIOC 404 (3) BIOCHEMICAL METHODS. The theory and application of techniques used to address biochemical problems. Restricted to Honours students in biochemistry or others with permission of the instructor. [1-0; 2-0]

BIOC 410 (3) NUCLEIC ACIDS-STRUCTURE AND FUNCTION. Chemical, physical and biological properties of nucleic acids and their role in replication, transcription, translation and regulation of expression of genetic material. Credit will not be given for both

BIOC 410 and 510. Prerequisite: All of BIOC 303, BIOL 335. A minimum standing of 65% is recommended in these courses. [3-0; 0-0]

BIOC 420 (3) ADVANCED BIOCHEMICAL

TECHNIQUES. Practical experience in experiments involving cell fractionation, protein purification, spectrophotometry, electrophoresis, chromatography, and ultracentrifugation. Restricted to Honours students in Biochemistry and others with permission of the instructor. Corequisite: BIOC 404. [0-6; 0-0]

BIOC 421 (3) RECOMBINANT DNA

TECHNIQUES. Practical experience in experiments involving transposon mutagenesis, restriction enzyme mapping, DNA sequencing and use of monoclonal antibodies. Restricted to Honours students in Biochemistry and others with permission of the instructor. Prerequisite: All of BIOC 410, BIOC 420. [0-0; 0-6]

BIOC 435 (3) MOLECULAR BIOLOGY AND

SACCHAROMYCES. Molecular and genetic analysis of transcriptional regulation, cell cycle regulation, signal transduction, and developmental mechanisms using yeast (*Saccharomyces*) as a model eukaryote. Credit will not be given for both BIOC 435 and BIOC 535. Prerequisite: BIOL 335 and one of BIOC 300, BIOC 302, BIOC 303. BIOC 303 and BIOC 410 are recommended. Equivalency: BIOL 435. [0-0; 3-0]

BIOC 448 (3/6) C DIRECTED STUDIES IN

BIOCHEMISTRY. A library (3 credits) or a laboratory project with written report (three or 6 credits) allowing a student to undertake an investigation on a specific topic as agreed upon by the faculty and student. Prerequisite: Permission of the Department Head is required.

BIOC 449 (3/6) C HONOURS THESIS.

A research problem under the direction of a faculty member. Restricted to Honours students.

BIOC 490 (3) STUDENT DIRECTED

SEMINARS. Self-directed, collaborative studies, in a group-learning environment, initiated and coordinated by senior undergraduate students with the supervision of a faculty advisor. Course structure, enrolment, and delivery methods will comply with the "Handbook for Student Directed Seminars". Not given every year. Prerequisite: Third-year standing. Corequisite: One of BIOC 300, BIOC 302, BIOC 303. [3-0-0]

BIOC 498 (3) INTERNSHIP WORK

PLACEMENT III. Approved and supervised technical work experience in an industrial or academic research setting for four months. Technical report required. Restricted to students admitted to the Internship Program in Biochemistry and Molecular Biology. Prerequisite: BIOC 399.

BIOC 499 (3) INTERNSHIP WORK

PLACEMENT IV. Approved and supervised technical work experience in an industrial or academic research setting for four months. Technical report required. Restricted to students admitted to the Internship Program in

Biochemistry and Molecular Biology. Prerequisite: BIOC 498.

BIOC 501 (2-6) C ADVANCED

BIOCHEMISTRY LABORATORY. Practical applications of advanced biochemical techniques. Admission is limited and is by permission of the department head. Corequisite: BIOC 404.

BIOC 503 (2) MOLECULAR BIOCHEMISTRY.

A lecture course in molecular biology: replication, transcription, translation, gene organization, gene expression. Credit will not be given for both BIOC 303 and 503. [0-0; 3-0]

BIOC 509 (3) MEMBRANE STRUCTURE AND

FUNCTION. The physical properties and functional roles of lipids in membranes, liposomes, membrane permeability; membrane function; structure, biosynthesis and cell sorting of membrane proteins; and the structure-function relationships of channels, transporters and receptors. Given in alternate years. [3-0; 0-0]

BIOC 510 (3) NUCLEIC ACIDS: STRUCTURE

AND FUNCTION. Structure and function of nucleic acids and their role in replication, transcription, translation and expression of genetic information. Credit will not be given for both BIOC 410 and 510. [3-0; 0-0]

BIOC 511 (3) BIOCHEMICAL ASPECTS OF

CELLULAR REGULATION. A lecture and discussion course on the molecular basis of cellular regulation with special emphasis on mammalian cells. Mechanisms involved in the responses of cells to adrenergic, steroid and peptide hormones and growth factors. Regulation of the concentration and specific activity of key enzymes, transport systems and structural proteins. Given in alternate years. [3-0; 0-0]

BIOC 514 (3) ADVANCED TOPICS IN

PROTEIN CHEMISTRY. Topics will include contemporary theoretical and experimental investigation of protein structure-function relationships. Topics will vary. Given in alternate years. [0-0; 3-0]

BIOC 521 (3) ADVANCED TOPICS IN

MOLECULAR BIOLOGY. Discussions based on topics in the current literature. Prerequisite: One of BIOC 410, BIOC 510. [0-0; 3-0]

BIOC 530 (3) SEMINAR IN BIOCHEMISTRY.

Attendance is required of all graduate students in Biochemistry. Normally students will make a presentation once per year on a topic approved by their research advisor or committee or on the results of their research.

BIOC 535 (3) ADVANCED TOPICS IN

EUKARYOTIC REGULATORY SYSTEMS. Molecular regulatory mechanisms using yeast (*Saccharomyces*) as a model. Credit will not be given for both BIOC 435 and 535. Prerequisite: BIOL 335 and one of BIOC 300, BIOC 302, BIOC 303. BIOC 303 and BIOC 410 are recommended. [0-0; 3-0]

BIOC 548 (2-6) C DIRECTED STUDIES. In special cases, with approval of the department head, advanced courses may be arranged for graduate students in attendance.

BIOC 549 (12) M.S.C. THESIS.

BIOC 649 (0) PH.D. THESIS.

**BIOE — BIO-RESOURCE ENGINEERING
FACULTY OF APPLIED SCIENCE**

The Departments of Bio-Resource Engineering and Chemical Engineering have merged into a single department, the Department of Chemical and Biological Engineering. During the transition period some courses listed under Bio-Resource Engineering (BIOE) will remain open while others have been subsumed under Chemical and Biological Engineering (CHBE).

BIOE 255 (2) BIO-RESOURCE ENGINEERING LABORATORY I. Experiments, computer modelling sessions and field studies chosen to illustrate basic principles and processes underlying bio-resource engineering systems, including growth and enzyme kinetics, use of indicator organism, basic principles of fermentation, environmental assessment and toxicity testing. [0-3-1]

BIOE 285 (2) INTRODUCTION TO BIO-RESOURCE ENGINEERING SYSTEMS ANALYSIS. The tools of systems analysis with selected applications to the primary renewable resource production enterprises. Emphasis on presentation of written and oral reports. [2-0-2*]

BIOE 361 (3) SOIL AND WATER ENGINEERING. Application of engineering principles to soil and water management system planning and design. Examination of interrelations of soil-water-plant systems, and the effects of human intervention in these processes on the production environment. [2-2*-2*]

BIOE 376 (3) APPLICATIONS OF HEAT, MASS AND MOMENTUM TRANSFER. Applications in controlled environments, food processing and waste treatment. Thermal design for biological systems. Mathematical modelling and computer simulation techniques. Prerequisite: CHML 351. [2-2*-2*]

BIOE 390 (3) BIOLOGICAL WASTE SYSTEMS DESIGN AND MANAGEMENT. Analysis and design of treatment systems with emphasis on wastes from the food production and processing industries. Waste characterization, biological kinetics, attached and suspended growth systems, land application. [3-0-0]

BIOE 455 (3) PROPERTIES OF BIOMATERIALS AND ENGINEERING APPLICATIONS. Principles and techniques for measurement and evaluation of physical, biochemical and physiological properties of biomaterials. Applications of these characteristics to the design and analysis of bioprocessing and biomaterial systems. Prerequisite: CHML 251. [2-2-0]

BIOE 456 (3) BIOENVIRONMENTAL ENGINEERING. Environmental interactions of biological systems and their physical surroundings; biological responses of plants and animals; design of controlled environments to enhance health and productivity; protection of natural resources for sustainable production. Prerequisite: Fourth-year standing. [2-0-2]

BIOE 471 (3) BIOSYSTEMS ANALYSIS AND DESIGN. Applications of linear programming and optimization techniques. Analysis of dynamic systems and numerical simulation Stochastic systems, reliability, error analysis. Feedback systems and control systems. Design of hydraulic, waste treatment, food processing and biotechnology systems. Prerequisite: Fourth-year standing. [2-0-2]

BIOE 482 (3) BIOPROCESSING APPLICATION. Instrumentation and bioprocess control, product recovery, and advanced analysis of mixed microbial populations. Prerequisite: BIOE 382. [2-0-2]

BIOE 489 (2) SEMINAR. Papers, and discussions on recent bio-resource engineering developments. [0-0-2*; 0-0-2*]

BIOE 495 (3) RESEARCH PROJECT. Development of a proposal, experimentation and analysis. Prerequisite: Third- or fourth-year standing and a 75% average or better in BIOE courses. [0-2-0; 0-4-0]

BIOE 498 (2-6) C DIRECTED STUDIES. Requires approval of the Department Head.

BIOE 499 (6) THESIS. Research or design problem under the direction of a staff member. [0-2-0; 0-4-0]

BIOE 549 (12) MASTER'S THESIS. For M.Sc.

BIOL — BIOLOGY FACULTY OF SCIENCE

BIOL 121 is pre-requisite to all Biology courses, except BIOL 153, 343, 344, 345, 346, 442, 445 and 446. From 2002 on, BIOL 112 is the normal pre-requisite to BIOL 200. BIOL 121 is a pre-requisite for admission to Major or Honours options in Biology and other life science programs. In addition, BIOL 140 is a pre-requisite for admission to Biochemistry programs and both BIOL 140 and 112 are pre-requisite for admission to Biology, Microbiology, Pharmacology, and Physiology programs. Students interested in meeting the entrance requirements of the Faculties/Schools of Agricultural Sciences, Dentistry, Forestry, Medicine, Pharmaceutical Sciences, Human Kinetics, and Rehabilitation Sciences should consult the appropriate office to determine the first-year Biology requirement. Additional fees are charged for some courses.

BIOL 111 (3) CELL AND ORGANISMAL BIOLOGY. Structure and functioning of cells and multicellular organisms. Not open to students who have credit for Biology 12. Credit may be obtained for only one of BIOL 111 (110) and BIOL 115. [3-0-0]

BIOL 112 (3) BIOLOGY OF THE CELL. Introduction to biological principles using the bacterial cell and bacterial populations as paradigms. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar.) Prerequisite: One of CHEM 12, CHEM 111 and one of BIOL 11, BIOL 12, BIOL 111. [3-0-1]

BIOL 121 (3) ECOLOGY, GENETICS, AND EVOLUTION. Ecological relationships in populations, mechanisms of inheritance, evidence for and mechanisms of evolution.

Recommended for science students. Prerequisite: One of BIOL 12, BIOL 111, BIOL 112, BIOL 115, BIOL 110. [3-0-0]

BIOL 140 (2) LABORATORY INVESTIGATIONS IN LIFE SCIENCE. Guided experimental investigations of biological questions. Prerequisite: One of BIOL 12, BIOL 111, BIOL 112. [1-2-0]

BIOL 141 (1) LABORATORY INVESTIGATION IN BIOLOGY. Guided experimental investigations of biological questions. Not intended for credit in the Biology program. Prerequisite: One of BIOL 12, BIOL 111, BIOL 112. [0-2-0]

BIOL 153 (7) HUMAN BIOLOGY. The principles of biology with particular reference to the human body (anatomy and physiology). Laboratories include selected experiments on organ physiology. Open only to students in the School of Nursing, Dental Hygiene and the Midwifery programs. [3-3*-0; 3-3*-0]

BIOL 155 (6) HUMAN BIOLOGY. The principles of biology with particular reference to the human body (anatomy and physiology). [3-0-0; 3-0-0]

BIOL 200 (3) CELL BIOLOGY I: STRUCTURAL BASIS. Structure and function of plant and animal cells; membrane models, cytoplasmic organelles, biological information from gene to protein, the endomembrane system, secretion, intracellular digestion, endocytosis, transport processes, cytoskeleton and cell motility. Prerequisite: Either (a) BIOL 112 and one of CHEM 123, CHEM 113; or (b) SCIE 001 or (c) 7 credits of first-year BIOL and 6 credits of first-year CHEM or (d) BIOL 121 and a CHEM 203 corequisite. [3-0-1]

BIOL 201 (3) CELL BIOLOGY II: INTRODUCTION TO BIOCHEMISTRY. Biological micro- and macromolecules, protein structure and enzyme action, energy transfer, selected metabolic sequences and their regulation. Credit given for only one of BIOL 201 or BIOC 300. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar.) Prerequisite: BIOL 200 and one of CHEM 203, CHEM 233, CHEM 260. [3-0-1]

BIOL 204 (3) VERTEBRATE STRUCTURE AND FUNCTION. Introduction to the vertebrate phyla and their evolution; a comparative study of vertebrate structure and function, with dissection of representative forms. Prerequisite: All of BIOL 121, BIOL 140. [2-3-1]

BIOL 205 (3) COMPARATIVE INVERTEBRATE ZOOLOGY. An introduction to the invertebrate phyla. Prerequisite: All of BIOL 121, BIOL 140. [2-3-1]

BIOL 209 (3) NON-VASCULAR PLANTS. A study of fungi, algae, lichens and bryophytes, integrating form and function as they are related to adaptation to environment. Prerequisite: All of BIOL 121, BIOL 140. [2-3-1]

BIOL 210 (4) VASCULAR PLANTS. A comparative study of pteridophytes, gymnosperms and angiosperms, integrating form, function and ecology. Prerequisite: All of BIOL 121, BIOL 140. [3-3-0]

BIOL 240 (1) EXPERIMENTAL DESIGN IN THE LIFE SCIENCES. Students will work in groups to design their own experiments utilizing unicellular eukaryotes or prokaryotes. Techniques in microscopy and other methods used to study cells will be stressed. Prerequisite: All of BIOL 121, BIOL 140. [0-3-0]

BIOL 300 (3) BIOMETRICS. Statistical procedures for biological research; estimation, hypothesis testing, goodness of fit, analysis of variance and regression; use of computers for statistical analysis. Credit given for only one of BIOL 300, FRST 231, STAT 200, PSYC 218 or 366. Prerequisite: BIOL 121 and one of MATH 101, MATH 103, MATH 105. Third-year standing is required. [3-2-0]

BIOL 301 (3) BIOMATHEMATICS. Introduction to uses of mathematics in the biological sciences; experimental design and modelling of biological processes. Credit given for only one of BIOL 301, FRST 430, or STAT 305. Prerequisite: BIOL 300. [3-0-2]

BIOL 302 (3) COMMUNITY AND ECOSYSTEM BIOLOGY. Introduction to the principles of ecology at the community and ecosystem levels of integration. Topics include community structure and dynamics, productivity, decomposition, and mineral cycling. Prerequisite: BIOL 121. BIOL 303 is recommended. [3-0-1*]

BIOL 303 (3) POPULATION BIOLOGY. Introduction to the study of plant and animal populations and their physical and biological environments. Topics include natural selection and microevolution, demography, population dynamics, competition and predation. Prerequisite: BIOL 121. [3-0-1*]

BIOL 305 (3) INTRODUCTION TO BIOLOGICAL AND GEOLOGICAL OCEANOGRAPHY. Organisms in the sea and their relation to the physical and chemical environment; marine sediments and their relationships to biological and physical processes. Prerequisite: EOSC 370 is recommended. Equivalency: EOSC 371.

BIOL 310 (3) INTRODUCTION TO ANIMAL BEHAVIOUR. The ethological approach to the study of animal behaviour: social behaviour, physiological mechanisms underlying behaviour. Students are expected to carry out a short project in the laboratory or field (see also BIOL 410). Prerequisite: BIOL 121. Third-year standing is required. [3-0-2]

BIOL 316 (4) INTRODUCTORY PLANT PATHOLOGY. Study of the ecology of plant pathogenic organisms; principles of disease development and control. Equivalency: AGRO 326. [3-2-0]

BIOL 317 (4) WEED SCIENCE. Importance, identification, dissemination and biology of weeds; preventative, cultural, biological and chemical methods of control. Equivalency: AGRO 328. [3-2-0]

BIOL 320 (4) D SURVEY OF ALGAE. A survey of the algae, considering their morphology, life history, classification, and ecology. Prerequisite: BIOL 121. [3-3-0]

BIOL 321 (3) STRUCTURE AND EVOLUTION OF THE BRYOPHYTES. A study of evolution, taxonomy and morphology of mosses, liverworts and hornworts with emphasis on living plants in their environment. Prerequisite: BIOL 121. [2-4-0]

BIOL 322 (3) STRUCTURE AND EVOLUTION OF FERNS AND FERN-ALLIES. Anatomy, morphology and relationships of the ferns and fern-allies, with assessment of both fossil and extant taxa. Prerequisite: BIOL 121. [2-4-0]

BIOL 323 (3) STRUCTURE AND REPRODUCTION OF FUNGI. The evolutionary diversity of the fungi as shown by their morphology and reproductive biology. Prerequisite: BIOL 121. [2-3-0]

BIOL 324 (3) INTRODUCTION TO SEED PLANT TAXONOMY. Introduction to seed plant taxonomy emphasizing descriptive morphology and identification. Each student will be required to submit a plant collection. Prerequisite: BIOL 121. [2-3-0]

BIOL 325 (3) INTRODUCTION TO ANIMAL MECHANICS AND LOCOMOTION. Comparative aspects of the functional design of skeletal systems and the mechanics of swimming, flying and terrestrial locomotion, with particular reference to the vertebrates. Prerequisite: BIOL 121. [3-0-0]

BIOL 326 (3) BIOLOGY OF INVERTEBRATES. A comparative study of invertebrates, with emphasis on marine forms; structure and function, life histories, evolution, and ecology. Prerequisite: BIOL 205. Corequisite: BIOL 300 is recommended. [1-4-0]

BIOL 327 (3) INTRODUCTION TO ENTOMOLOGY. A survey of the structure, classification and biology of insects; ecology, life-histories and insect-plant relations. Prerequisite: BIOL 121. Equivalency: AGRO 327.

BIOL 328 (3) INTRODUCTORY PARASITOLOGY. Classification, morphology and life histories of animal parasites affecting humans and other animals. Prerequisite: BIOL 121. [2-3-0]

BIOL 331 (4) DEVELOPMENTAL BIOLOGY. Animal development and its underlying causal principles; introductory embryology. Prerequisite: All of BIOL 200, BIOL 201. BIOC 300 or BIOC 302 or BIOC 303 is recommended. [3-3-0]

BIOL 332 (6) PROTISTOLOGY. Origin of eukaryotes; diversity and evolution of unicellular eukaryotes irrespective of plant or animal affinities; environmental adaptations, symbiosis and their significance to ecosystems. Prerequisite: BIOL 200. [2-3-0; 2-3-0]

BIOL 334 (3) BASIC GENETICS. Mendelian genetics, chromosome theory of heredity, linkage, mutation, mapping, gene structure and function, gene interaction, quantitative genetics, population genetics. Credit will be granted for only one of BIOL 334 or FRST 302. Prerequisite: BIOL 200. Corequisite: BIOL 201. [3-0-2]

BIOL 335 (3) MOLECULAR GENETICS.

Isolation and identification of genes, analysis of gene structure; gene expression and its regulation in prokaryotes and in eukaryotes; developmental genetics. Prerequisite: One of BIOL 334, MICB 322, FRST 302. [3-0-2]

BIOL 336 (3) EVOLUTIONARY GENETICS. Natural selection; population genetics, quantitative genetics and systematics; classical and molecular approaches to the study of evolution. Prerequisite: BIOL 334. [3-0-2]

BIOL 337 (3) INTRODUCTORY GENETICS LABORATORY. A laboratory course demonstrating the fundamental principles of inheritance: Mendel's Laws, sex-linkage, mapping, mutagenesis, chromosome structure, developmental biology, biochemical and population genetics. Corequisite: BIOL 334. [1-4-0]

BIOL 343 (3) PLANTS AND PEOPLES. The interactions of plants and human societies: the role of people in the origin, evolution and dispersal of food, drug and economic plants, and the influences of plants on human societies. Suitable for upper-level Arts students. [2-2-1]

BIOL 344 (3) HUMAN HEREDITY AND EVOLUTION. Relates genetic and evolutionary concepts to humans. Primarily for upper-level students in the Faculty of Arts. Credit will be given for only one of BIOL 121 or BIOL 344. Not open to students in the Life Sciences. [3-0-2]

BIOL 345 (3) HUMAN ECOLOGY. Basics of ecology are introduced, focussing on observations of the natural world. Assignments, including a group project, consider connections between research, awareness and practical uses of ecology. Not for credit in the Life Sciences. [3-0-2]

BIOL 346 (3) MICROBES AND SOCIETY. An elementary course in molecular biology primarily for Arts students. The historical development of recent discoveries in molecular biology with emphasis on bacteria and viruses and their interaction with humans. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar.) Not for credit in Life Sciences. [3-0-0]

BIOL 347 (3) PRINCIPLES AND METHODOLOGY IN BIOLOGICAL RESEARCH. Contemporary research in the Botany and Zoology Departments; history and methodology of scientific discovery; seminars on current problems. Restricted to Honours students in Biology. Not to be taken concurrently with BIOL 449. [2-3-0]

BIOL 350 (7) CELL PHYSIOLOGY. The physico-chemical basis of cellular activity: energy relationships, membrane processes, integration and internal control of cellular activities, and cellular signal transduction. The laboratory emphasizes techniques used to study cell function. Restricted to Majors and Honours students in Biology. Prerequisite: BIOL 201. Corequisite: Either (a) BIOC 302 or (b) BIOC 303. [2-4-0; 2-4-0]

BIOL 351 (4) PLANT PHYSIOLOGY I.

Mechanisms and regulation of functional processes contributing to the assimilation, transport and utilization of water, mineral nutrients and carbon by plants. Restricted to Majors and Honours students in Biology. Prerequisite: BIOL 121 and either (a) CHEM 123 or (b) all of CHEM 111, CHEM 113. CHEM 233 is recommended. Equivalency: AGRO 324, FRST 311. [3-3-0]

BIOL 352 (3) PLANT PHYSIOLOGY II: PLANT DEVELOPMENT. Introduction to the processes involved in growth and development: cell division, tissue culture, meristems, differentiation, and the action of major growth regulators, and photomorphogenesis. Emphasis on experimental approaches. Prerequisite: One of BIOL 334, FRST 302. CHEM 233 is recommended. [2-3-1]

BIOL 360 (3) CELL PHYSIOLOGY

LABORATORY. Laboratory studies of cellular function. Restricted to Majors and Honours students in Biology and Honours Biophysics. Prerequisite: BIOL 201. Corequisite: BIOL 361. [0-4-0.5; 0-4-0.5]

BIOL 361 (2) INTRODUCTION TO PHYSIOLOGY. Energetics and excitable membranes of nerve and muscle. Preference will be given to Majors or Honours students in Biology, Majors in Nutritional Sciences, and Honours in Biophysics. Prerequisite: BIOL 201. [2-0-1]

BIOL 362 (2) CELLULAR PHYSIOLOGY. The cytoskeleton, cell dynamics, and regulation of cellular activities. Preference will be given to Majors or Honours students in Biology and Honours Biophysics. Prerequisite: Either (a) BIOL 361 or (b) all of BIOL 201, BIOL 351. [2-0-1]

BIOL 363 (3) LABORATORY IN ANIMAL PHYSIOLOGY. Experimental studies in animal physiology. Restricted to Majors and Honours students in Biology, Nutritional Sciences and Biophysics. Prerequisite: BIOL 204. Corequisite: BIOL 361. [2*-3*-0; 2*-3*-0]

BIOL 364 (2) ANIMAL PHYSIOLOGY. Cardiovascular, respiratory, and osmoregulatory physiology. Preference will be given to Majors or Honours students in Biology, Majors in Nutritional Sciences, and Honours in Biophysics. Prerequisite: All of BIOL 204, BIOL 361. [2-0-1]

BIOL 398 (3) CO-OPERATIVE WORK PLACEMENT I. Work experience in an industrial setting, taken during Winter Session (Term 2) of third year. Restricted to students admitted to the Co-operative Education Program in Biology.

BIOL 399 (3) CO-OPERATIVE WORK PLACEMENT II. Work experience in an industrial research setting, taken during Summer Session (Terms 1 and 2) following third year. Restricted to students admitted to the Co-operative Education Program in Biology. Prerequisite: BIOL 398.

BIOL 402 (3) AQUATIC ECOLOGY. Theoretical and applied limnology; ecology of inland water organisms in relation to physical,

chemical and biological factors. One weekend field trip required. Prerequisite: All of BIOL 300, BIOL 302, BIOL 303. [2-4-0]

BIOL 404 (3) ECOLOGICAL METHODOLOGY. Quantitative methods for estimating population density, sampling problems of field populations, and experimental design in ecological analysis. Application of computer techniques for the statistical analysis of ecological data. Prerequisite: All of BIOL 300, BIOL 302, BIOL 303. [2-4-0]

BIOL 405 (3) MARINE ECOLOGY. A study of the relationship of marine biotic communities to the environment, with emphasis on the intertidal area. Limited to students in fourth year. Prerequisite: All of BIOL 205, BIOL 302, BIOL 320. Corequisite: BIOL 300. [2-3-0]

BIOL 406 (4) PLANT ECOLOGY I. Plant community ecology including a consideration of the major approaches to sampling, analyzing and interpreting vegetation patterns. Instruction given in field work and computer analysis of field data. Prerequisite: BIOL 302. BIOL 324 is recommended. [3-3-0]

BIOL 407 (3) PLANT ECOLOGY II. Relationships between plants and their physical and biotic environment, including plant population dynamics, genecology, ecology of reproduction and vegetation change. Students will carry out a short term project in the laboratory or field. Prerequisite: All of BIOL 302, BIOL 303. [3-3-0]

BIOL 408 (6) PRINCIPLES OF APPLIED ECOLOGY. Principles of animal and community ecology applicable to the management of animal resources; application of statistical and computer techniques for measuring, analyzing, modelling, and simulating resource systems; problems of multiple resource use. Prerequisite: BIOL 300. [2-2-0; 2-2-0]

BIOL 409 (3) FIELD COURSE IN ANIMAL ECOLOGY. A two-week intensive course in field methods used in animal ecology. The course is given in the two weeks before first term. A fee will be assessed for living expenses. Pre-registration required. Prerequisite: All of BIOL 300, BIOL 302, BIOL 303. BIOL 310 is recommended.

BIOL 410 (3) CURRENT TOPICS IN ANIMAL BEHAVIOUR. Lectures and seminar discussions on selected topics in animal behaviour. Prerequisite: BIOL 310. Permission of the head of Zoology is also acceptable. [2-0-2]

BIOL 411 (3) INSECT ECOLOGY. Behavioural, population and community ecology of insects. Interactions between insects and plants and the application of the principles of insect ecology to biological control of insects and weeds. Prerequisite: Either (a) BIOL 205 or (b) all of AGRO 327, BIOL 327. [3-0-0]

BIOL 412 (3) PHYTOGEOGRAPHY. Description and interpretation of present and past floristic vegetational patterns; integration of evolutionary, ecological, and phytogeographical concepts. Terrestrial and aquatic plants are considered. Restricted to students of third and fourth years. Prerequisite: BIOL 121. [3-0-0]

BIOL 413 (3) ZOOGEOGRAPHY. Distribution of terrestrial and aquatic animals in space and time; restricted to students in Third and Fourth year. Prerequisite: BIOL 121. [3-0-0]

BIOL 415 (3) EVOLUTIONARY PROCESSES IN PLANTS. Experimental and comparative analysis of evolutionary processes, speciation, and phylogenetic patterns in plants. Prerequisite: BIOL 334. [3-0-0]

BIOL 416 (3) PRINCIPLES OF CONSERVATION BIOLOGY. Genetics and demography of small and fragmented populations; global and local conservation problems; case histories of endangered animals and plants. Three compulsory weekend field trips. Credit will be given for only one of BIOL 416 and CONS 330. Prerequisite: BIOL 303. [2-0-2]

BIOL 418 (3) EVOLUTIONARY ECOLOGY. Ecological adaptation and evolutionary processes in contemporary populations; natural selection, variation, optimization, foraging theory, coevolution, arms races; life history theory, evolution of sex, sexual selection, evolution in managed populations. Prerequisite: All of BIOL 303, BIOL 336. [2-2-0]

BIOL 419 (3) ECOLOGICAL PARASITOLOGY. A survey of ecological concepts as they pertain to parasitic eukaryotic animals including life history, population dynamics, community structure, disease transmission and evolution. Prerequisite: One of BIOL 303, BIOL 328. [2-3-0]

BIOL 421 (3) PLANT-MICROBE INTERACTIONS. Biology and physiology of selected plant-microbe relationships. Impacts of plant-microbe relationships on society. Prerequisite: BIOL 201. Equivalency: AGRO 426. [3-0-2]

BIOL 425 (3) BIOMECHANICS. An analytical approach to the study of skeletal mechanics and animal locomotion. Selected topics in the structure and properties of biological materials, the functional design of skeletons for locomotion, and the fluid mechanics of swimming and flight. Prerequisite: BIOL 325. [2-3-0]

BIOL 427 (3) TERRESTRIAL VERTEBRATE ZOOLOGY. The natural history, behavioural ecology and conservation of terrestrial vertebrates (and marine mammals). The laboratory includes classification, life histories, and ecology, with particular attention to species from British Columbia. Prerequisite: BIOL 204. [2-3-0]

BIOL 428 (3) INVERTEBRATE AQUACULTURE. The theory and practice of culturing selected commercially important invertebrates. Restricted to students in fourth year. Prerequisite: BIOL 205. [2-3-0]

BIOL 429 (3) ALGAL AQUACULTURE. The theory and practice of growing micro- and macroalgae for commercial purposes. Includes historical aspects of algal aquaculture, cultivation principles, practical problems, end products, economics and current status of the industry. Prerequisite: BIOL 121. [3-0-0]

BIOL 430 (3) GENOME EVOLUTION. Application of genetics and molecular biology to

evolutionary problems. Emphasis on using macromolecular sequence information to answer questions about phylogeny and population structure, and on the evolutionary implications of recent discoveries in molecular genetics. Prerequisite: One of BIOL 335, BIOL 336. [3-0-0]

BIOL 431 (3) ADVANCED CELL BIOLOGY. Ultrastructure, biogenesis and evolution of bacterial and eukaryotic cells and cell organelles, including their macromolecular basis. Prerequisite: BIOL 200. BIOL 335 recommended. [3-3-0]

BIOL 433 (4) PLANT GENETICS. Emphasis on molecular aspects. Systems and techniques for genetic analysis in plants; isolation and regulation of plant genes; genetic dissection of plant-specific processes; transposable elements; gene transfer in plants; cytoplasmic inheritance; genetic engineering. Prerequisite: BIOL 335. [3-0-2]

BIOL 434 (3) POPULATION GENETICS. Theoretical and experimental aspects of population and quantitative genetics. Prerequisite: BIOL 336 and one of BIOL 334, FRST 302. [3-0-2]

BIOL 435 (3) MOLECULAR BIOLOGY AND BIOCHEMISTRY OF THE YEAST SACCHAROMYCES. Molecular and genetic analysis of transcriptional regulation, cell cycle regulation, signal transduction, and developmental mechanisms using yeast (*Saccharomyces*) as a model eukaryote. Prerequisite: BIOL 335 and one of BIOC 300, BIOC 302, BIOC 303. BIOC 303 and BIOC 410 are recommended. Equivalency: BIOC 435. [3-0-0]

BIOL 437 (3) LABORATORY IN ANIMAL CELL MOLECULAR BIOLOGY. The use of recombinant DNA techniques to explore problems in animal developmental biology. Prerequisite: All of BIOL 331, BIOL 335 and one of BIOL 201, BIOC 300, BIOC 302, BIOC 303. Permission of the department head is also required. [2-4-0]

BIOL 438 (3) ZOOLOGICAL PHYSICS. Animal systems viewed from a physicist's perspective. Topics include sensory systems, energy budgets, locomotion, internal flows, physical advantages of grouping. Prerequisite: One of PHYS 101, PHYS 107. BIOL 325 is recommended. Equivalency: PHYS 438. [3-0-0]

BIOL 441 (3) ANIMAL CELL BIOLOGY. Analysis of cellular organelles and the intracellular traffic between them, concentrating on mammalian cell systems. Prerequisite: All of BIOL 335, BIOL 360, BIOL 361 and one of BIOC 300, BIOC 302, BIOC 303. Corequisite: BIOL 350. BIOL 331 is recommended. [3-0-0]

BIOL 442 (3) ETHICAL ISSUES IN SCIENCE. Theoretical and practical consideration of ethics in the practice, reporting, public impact and accountability of science. Prerequisite: Fourth-year standing in any Faculty is required. [3-0-0]

BIOL 443 (4) PLANT BREEDING AND BIOTECHNOLOGY. Genetic basis and methodology of breeding for improved crop and ornamental plants. Application of tissue

culture and molecular biology to plant improvement. Prerequisite: BIOL 201 and one of BIOL 334, FRST 302. Equivalency: AGRO 424. [3-0-2]

BIOL 444 (3) TECHNIQUES IN PLANT MOLECULAR BIOLOGY. Purification and analysis of nucleic acids, electrophoresis and immunodetection of proteins. Restricted to Honours students with permission of the Head of Botany and the Biotechnology Teaching Laboratory. Prerequisite: BIOL 335. Corequisite: BIOL 433 is recommended. [0-7-0]

BIOL 445 (3) DARWIN'S FISHES. A series of computer-assisted lectures using ichthyology and the work of Charles Darwin to illustrate basic principles of biology, and their practical implementation, i.e., how biologists select research programs, generate and test hypotheses, and present their case to peers and the public. Prerequisite: Third-year standing in Science is required. [2-0-2]

BIOL 446 (3) HISTORY AND PHILOSOPHY OF BIOLOGY. The nature of science, this history of evolutionary and molecular biology, philosophical questions about scientific methods and fundamental conclusions of biology. Prerequisite: Fourth-year standing in any degree program is required. [3-0-0]

BIOL 447 (3) PRINCIPLES AND METHODOLOGY IN BIOLOGICAL RESEARCH. Seminars, debates, workshops and tutorials designed to produce competence in specific areas of Biology. Restricted to Honours students in Biology. Corequisite: BIOL 449. [2-3-0]

BIOL 448 (3-12) C DIRECTED STUDIES IN BIOLOGY. A course designed to allow students to undertake an investigation on a specific topic as agreed upon by the faculty member and the student. Permission of the supervisor required. No more than 6 credits of BIOL 448 may be taken with the same supervisor.

BIOL 449 (6) DIRECTED BIOLOGICAL RESEARCH. A course designed to allow students to undertake a research project in selected fields. Open only to Honours students in Biology, with permission of the supervisor. Presentation of a thesis and an oral examination are required. Corequisite: BIOL 447.

BIOL 450 (3) MOLECULAR ADAPTATION OF ANIMALS TO THE ENVIRONMENT. Physiological, biochemical and molecular strategies of adaptation of animals to environmental challenges. The evolution of genetic and biochemical systems, and their impact on animal structure and function. Prerequisite: One of BIOL 353, BIOL 355 and one of BIOC 300, BIOC 302, BIOC 303. BIOL 454 is recommended. [3-0-0]

BIOL 454 (3) COMPARATIVE ANIMAL PHYSIOLOGY. Selected topics in physiology emphasizing comparisons between diverse phylogenetic groups of animals. Prerequisite: One of BIOL 350, BIOL 353, PSYC 360. [3-0-0]

BIOL 455 (3) COMPARATIVE NEUROBIOLOGY. Current approaches in neurobiology, from the cellular to the

behavioural level, are examined using representatives of vertebrate and invertebrate nervous systems. Prerequisite: BIOL 361 and one of BIOL 360, BIOL 363. [3-0-2*]

BIOL 456 (3) COMPARATIVE AND MOLECULAR ENDOCRINOLOGY. A comparative study of vertebrate and invertebrate endocrinology. Prerequisite: BIOL 353. [3-0-0]

BIOL 457 (3) COMPARATIVE ENVIRONMENTAL PHYSIOLOGY. A survey of physiological adaptations of animals to different environments. Prerequisite: One of BIOL 353, BIOL 355. [3-0-0]

BIOL 458 (3) DEVELOPMENTAL NEUROBIOLOGY. Cellular, molecular and physiological aspects of nervous system development with applications to understanding adult nervous system function and neurological disorders. [3-0-0]

BIOL 462 (3) ECOLOGICAL PLANT BIOCHEMISTRY. The structure, biosynthesis, distribution and biological function of secondary plant metabolites. Prerequisite: All of BIOL 200, BIOL 201. BIOL 209 or BIOL 210 is recommended. Equivalency: FRST 413. [3-0-0]

BIOL 463 (3) GENE REGULATION IN DEVELOPMENT. Control of gene expression in development; the genetic and physiological basis of epigenetic determination; inductive interactions. Prerequisite: BIOL 335 and one of BIOC 300, BIOC 302, BIOC 303. BIOL 331 is recommended. [3-0-0]

BIOL 464 (3) ANIMAL DEVELOPMENTAL GENETICS. Role of genes in embryonic development. Emphasis on tissue specific expression patterns and the role of genetic networks in establishing cell types. Prerequisite: BIOL 463. [3-0-0]

BIOL 465 (3) DIVERSITY AND EVOLUTION OF FISHES. Introduction of fish diversity, with a focus on their phylogenetic interrelationships and the evolutionary, ecological, and biogeographic processes involved in generating patterns of fish biodiversity. Prerequisite: BIOL 204. [2-3-0]

BIOL 466 (3) APPLIED BIOLOGY OF FISHES. Physiological ecology and exploitation biology of teleost fishes; computer-based analysis and modeling of fish populations. Prerequisite: BIOL 465.

BIOL 498 (3) CO-OPERATIVE WORK PLACEMENT III. Work experience in an industrial research setting, taken during the Summer Session (Terms 1 and 2) following fourth year. Restricted to students admitted to the Co-operative Education Program in Biology.

BIOL 499 (3) CO-OPERATIVE WORK PLACEMENT IV. Work experience in an industrial research setting, taken during the Winter Session (Terms 1 and 2) following fourth year. Restricted to students admitted to the Co-operative Education Program in Biology. Prerequisite: One of BIOL 399, BIOL 498.

BIOL 508 (6) GENETICS SEMINAR.

BIOL 509 (3) POPULATION AND QUANTITATIVE GENETICS.

BIOL 510 (3) APPLIED POPULATION GENETICS. Equivalency: FRST 535.

BIOL 522 (3/6) D TOPICS IN MARINE BENTHIC ECOLOGY.

BIOL 525 (2-6) D TOPICS IN SYSTEMATICS AND EVOLUTION.

BIOL 530 (3) THE BIOLOGY OF THE CELL.

BIOL 535 (3) TEACHING AND LEARNING IN THE LIFE SCIENCES.

BIOL 537 (3) TOPICS IN BIOTECHNOLOGY. Research reviews, class discussions, and presentations about current research in the diverse areas of biotechnology. Topics include the research interests of members of the UBC Biotechnology Laboratory. [1.5-0-0; 1.5-0-0]

BIOL 548 (2-6) C ADVANCED TOPICS IN BIOLOGY.

BIOL 549 (12-18) C MASTER'S THESIS.

BIOL 649 (0) PH.D. THESIS.

BIOT — BIOTECHNOLOGY Joint Degree in Biotechnology (BIOT) courses are only available on the BCIT campus.

BIOT 201 (0) LAB SAFETY. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 203 (2) INTRODUCTION TO BIOTECHNOLOGY. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 205 (3) MICROBIOLOGY I. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 206 (3) MICROBIOLOGY II. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 207 (3) PRINCIPLES OF PHYSIOLOGY. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 208 (2) PLANT ANATOMY AND PHYSIOLOGY. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 210 (3) PROCESS SYSTEMS. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 221 (3) ORGANIC CHEMISTRY I. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 222 (3) ORGANIC CHEMISTRY II. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 231 (2) COMMUNICATIONS FOR BIOTECHNOLOGY I. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 232 (3) COMMUNICATIONS FOR BIOTECHNOLOGY II. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 241 (0) INFORMATION TECHNOLOGY FOR BIOTECHNOLOGY. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 242 (3) STATISTICS. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 280 (0) INTRODUCTORY BIOTECHNOLOGY.

BIOT 306 (2) MICROBIOLOGY III. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 307 (3) MOLECULAR GENETICS I. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 308 (3) MOLECULAR GENETICS II. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 309 (2) ADVANCED PLANT CELL BIOTECHNOLOGY. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 310 (2) ADVANCED CELL ANIMAL BIOTECHNOLOGY. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 311 (3) BIOCHEMISTRY I. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 312 (3) BIOCHEMISTRY II. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 313 (3) INTRODUCTION TO PHARMACEUTICAL DEVELOPMENT. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 323 (2) ANALYTICAL CHEMISTRY I. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 324 (2) ANALYTICAL CHEMISTRY II. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 331 (3) CRITICAL READING & WRITING. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 351 (0) MANAGEMENT SKILLS AND APPLICATIONS. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 352 (2) MANAGEMENT AND REGULATORY AFFAIRS. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 361 (3) APPLIED ETHICS. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 380 (0) ADVANCED BIOTECHNOLOGY.

BIOT 398 (3) CO-OPERATIVE WORK PLACEMENT I. Credit limited to students in the Joint Degree Program in Biotechnology.

BIOT 399 (3) CO-OPERATIVE WORK PLACEMENT II. Credit limited to students in the Joint Degree Program in Biotechnology.

BOTA — BOTANY FACULTY OF SCIENCE
All undergraduate courses in Botany are listed under Biology.

BOTA 500 (2) FIELD BOTANY.

BOTA 501 (3) SEMINAR IN BOTANY.

BOTA 502 (0) THESIS SEMINAR.

BOTA 505 (2/3) C FIELD COURSE IN PLANT DIVERSITY.

BOTA 512 (2/3) C PRACTICAL MARINE PHYTOPLANKTON. Prerequisite: EOSC 574.

BOTA 520 (6) ADVANCED PHYTOGEOGRAPHY.

BOTA 526 (3) ADVANCED PLANT COMMUNITY ANALYSIS.

BOTA 527 (3) DYNAMICS OF PLANT POPULATIONS. Prerequisite: BIOL 407.

BOTA 528 (3) CURRENT TOPICS IN PLANT BIOCHEMISTRY.

BOTA 530 (3) PLANT METABOLIC PHYSIOLOGY.

BOTA 532 (3) REGULATION OF PLANT GROWTH AND DEVELOPMENT.

BOTA 544 (3) PLANT MOLECULAR BIOLOGY LABORATORY. Admission to the course is limited and requires recommendation from the Head of Botany or the Director of the Biotechnology Laboratory. Prerequisite: BIOL 335 is recommended as either a prerequisite or corequisite. Equivalency: PLNT 540, FRST 503.

BOTA 545 (3) PLANT GENETIC ENGINEERING LABORATORY. Limited enrolment; requires consent of instructors. Equivalency: PLNT 514, FRST 509.

BOTA 546 (2-12) C TOPICS IN BOTANY.

BOTA 548 (3) M.SC. MAJOR ESSAY.

BOTA 549 (6/12) C MASTER'S THESIS.

BOTA 649 (0) PH.D. THESIS.

BRDG — BRIDGE PROGRAM FACULTY OF GRADUATE STUDIES

Restricted to BRDG students only.

BRDG 500 (1.5) THESIS AND JOURNAL SEMINAR.

BRDG 501 (3) RESEARCH DEVELOPMENT.

BRDG 590 (0) INTERNSHIP. 4 months for MSc.

BRDG 600 (3) THESIS AND JOURNAL SEMINAR.

BRDG 601 (6) RESEARCH GRANT DEVELOPMENT.

BRDG 690 (0) INTERNSHIP. 8 months for PhD students.

BUED — BUSINESS EDUCATION FACULTY OF EDUCATION

BUED 301 (3) CURRICULUM AND INSTRUCTION: COMPUTER APPLICATIONS FOR BUSINESS EDUCATION. Introduction to teaching keyboarding and computer skills, and the use of software programs for a variety of business applications. Pass/Fail.

BUED 314 (4/5) D CURRICULUM AND INSTRUCTION IN BUSINESS EDUCATION: SECONDARY. Pass/Fail. Prerequisite: A completed concentration in business education or permission of the head.

BUED 375 (3) ADVANCED SOFTWARE APPLICATIONS IN BUSINESS EDUCATION. Pass/Fail. [3-0-0]

BUED 376 (3) TEACHING OFFICE ORGANIZATION AND INFORMATION COMMUNICATION TECHNOLOGIES IN BUSINESS EDUCATION. Pass/Fail. [3-0-0]

BUED 377 (3) SYSTEMS OF DATA PROCESSING. Types and organization of business systems; electronic methods of data processing; criteria and procedures for software evaluation. Teaching methods and projects for secondary schools. Prerequisite: Either (a) BUED 301 or (b) BUED 401. [3-0-0]

BUED 402 (3) CURRICULUM AND INSTRUCTION IN KEYBOARDING. Principles and problems of instruction on business documents. Prerequisite: BUED 401. [4-0]

BUED 508 (3-6) D REVIEW OF RESEARCH IN BUSINESS EDUCATION. Studies are made of recent research bearing on educational practice. Prerequisite: Appropriate senior undergraduate introductory or methods course.

BUED 561 (3-12) C LABORATORY PRACTICUM.

BUED 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD. Courses in various subject matter fields designed to bring teachers up to date in recent findings in each field.

BUED 580 (3-12) C PROBLEMS IN EDUCATION. Investigation and report of a problem.

BUED 590 (3) GRADUATING PAPER. Pass/Fail.

BUED 598 (3-12) C FIELD EXPERIENCES. For those in master's, doctoral and diploma programs.

BUED 599 (6/12) C MASTER'S THESIS.

BUSI — BUSINESS FACULTY OF COMM (SAUDER)

BUSI 100 (3) MICRO FOUNDATIONS OF REAL ESTATE ECONOMICS. Basic principles of microeconomics and application to current economic problems.

BUSI 101 (3) CAPITAL MARKETS AND REAL ESTATE. Basic principles of macroeconomics and application to current economic problems. Prerequisite: BUSI 100.

BUSI 111 (3) REAL PROPERTY LAW. Canadian legal system and contract law and detailed aspects of real estate law as it applies in British Columbia.

BUSI 121 (3) FOUNDATIONS OF REAL ESTATE MATHEMATICS. Introduction to mathematics of real estate finance and statistical measures and methods and their application to practical real estate concepts. Prerequisite: Algebra 12 strongly recommended.

BUSI 221 (3) REAL ESTATE FINANCE IN A CANADIAN CONTEXT. History, function and mechanics of Canadian mortgage markets. Prerequisite: BUSI 121.

BUSI 290 (4) INTRODUCTION TO QUANTITATIVE DECISION ANALYSIS. Introduction to decision models in business, including basic optimization, linear programming, probability, decision analysis, random variables, simulation, and solving decision problems using spreadsheet tools. Prerequisite: All of MATH 104, MATH 105 or equivalents. Equivalency: COMM 290.

BUSI 291 (4) APPLICATION OF STATISTICS IN BUSINESS. Methods and applications of statistics in business; data analysis, descriptive regression; data generation; sampling distributions; hypothesis testing; confidence intervals; two sample problems; inference in regression. Prerequisite: BUSI 290 or equivalent. Equivalency: COMM 291.

BUSI 293 (3) INTRODUCTORY FINANCIAL ACCOUNTING. Introduction to the construction and interpretation of financial reports prepared primarily for external use.

BUSI 294 (3) INTRODUCTORY MANAGEMENT ACCOUNTING. Introduction to the development and use of accounting information for management planning and control, and the development of cost information for financial reports. Prerequisite: BUSI 293 or equivalent. Corequisite: BUSI 293 or equivalent.

BUSI 295 (3) MANAGERIAL ECONOMICS. Economic foundations of managerial decision making.

BUSI 299 (1) BUSINESS COMMUNICATIONS. Basic communication theory, communications in organizations. Includes written and oral practice in lab sessions. Equivalency: COMM 299.

BUSI 300 (3) URBAN AND REAL ESTATE ECONOMICS. Comprehensive treatment of urban and real estate economics; introduction to study of cities and real estate market; analytical microeconomic principles. Prerequisite: All of BUSI 100, BUSI 101.

BUSI 329 (3) PRINCIPLES OF ORGANIZATIONAL BEHAVIOUR. An introductory examination of work organizations and the behaviour of individuals within them. Phenomena to be studied include organizational structure, environments, group processes, motivation and leadership. Equivalency: BUSI 292, COMM 292.

BUSI 330 (3) FOUNDATIONS OF REAL ESTATE APPRAISAL. Introduction to concepts and techniques for appraising the value of real estate. Prerequisite: Recommend BUSI 121.

BUSI 331 (3) REAL ESTATE INVESTMENT ANALYSIS AND ADVANCED INCOME APPRAISAL. Valuation techniques for income real estate, including income method of appraisal, tax consequences of real property ownership, and portfolio analysis methodology. Prerequisite: All of BUSI 121, BUSI 330.

BUSI 335 (3) INFORMATION SYSTEMS.

Introduction to information technology related to business use: design, implementation, and application of information systems.

BUSI 353 (3) INTERMEDIATE FINANCIAL ACCOUNTING I. An examination of accounting as a means of measurement and as an information system for external reporting purposes. Prerequisite: BUSI 293 or equivalent.

BUSI 354 (3) COST ACCOUNTING. The provision and analysis of cost accounting information that will assist management in making operating decisions and in evaluating operational performance. Prerequisite: BUSI 294 or equivalent.

BUSI 355 (3) INTRODUCTION TO INCOME TAX. A study of income tax from the standpoint of the individual and business enterprise. Prerequisite: BUSI 293 or equivalent.

BUSI 370 (3) BUSINESS FINANCE. An introduction to the basic principles of financial valuation and an examination of corporate enterprise decisions including working capital management; capital budgeting; capital structures and dividend policy. Prerequisite: BUSI 293 or equivalent.

BUSI 391 (3) INTRODUCTION TO MANAGEMENT INFORMATION SYSTEMS. Overview of computer technology and terminology; use of computers as managerial and administrative tools; the management of computer resources and the influence of information technology within the organization. Equivalency: COMM 391.

BUSI 393 (3) INTRODUCTION TO BUSINESS LAW. Introduction to the law of contracts, with particular reference to contracts for sale of goods and related law of personal property, principles of agency, partnership, and company law.

BUSI 399 (3) LOGISTICS AND OPERATIONS MANAGEMENT. The design and management of systems to make products, provide services and deliver them to the end user. Prerequisite: All of BUSI 290, BUSI 291 or equivalents. Equivalency: COMM 299.

BUSI 400 (3) RESIDENTIAL PROPERTY ANALYSIS. Underlying theory and techniques used in design, construction, and inspection of residential properties.

BUSI 401 (3) COMMERCIAL PROPERTY ANALYSIS. Underlying theory and techniques used in the design and construction of commercial properties.

BUSI 441 (3) REAL ESTATE MANAGEMENT I. Examines the day-to-day issues which affect the practice of property management. Prerequisite: BUSI 330. BUSI 331 recommended.

BUSI 442 (3) CASE STUDIES IN APPRAISAL I. Examines the day-to-day issues that affect the practice of real estate appraisal. Prerequisite: All of BUSI 121, BUSI 330, BUSI 331.

BUSI 443 (6) ASSESSMENT ADMINISTRATION. Introduces the practice of real property assessment, including the nature of the techniques used, the required duties of

assessors, and how an assessment office is administrated. Prerequisite: BUSI 330 recommended.

BUSI 444 (6) COMPUTER AIDED MASS PROPERTY ASSESSMENT. This course develops and applies the major techniques for valuing real property. Prerequisite: Recommend all of BUSI 121, BUSI 330, BUSI 443.

BUSI 445 (3) REAL ESTATE DEVELOPMENT I. Real estate development process from the project idea to the cursory feasibility stage. Steps in development planning, including analysis, design and evaluation. Evaluating development potential, land acquisition, and site planning. Prerequisite: All of BUSI 330, BUSI 331.

BUSI 446 (3) REAL ESTATE DEVELOPMENT II. Analysis of real estate development process with an examination of economic feasibility studies, approval processes, project financing, construction, project management, and marketing phases. Prerequisite: BUSI 445.

BUSI 450 (3) INTERMEDIATE FINANCIAL ACCOUNTING II. A continuation of the examination of accounting as a means of measurement and as an information system for external reporting purposes. Prerequisite: BUSI 353. Corequisite: BUSI 353.

BUSI 451 (3) REAL ESTATE MANAGEMENT II. Continuation of BUSI 441.

BUSI 452 (3) CASE STUDIES IN APPRAISAL II. Continuation of BUSI 442

BUSI 453 (3) ADVANCED FINANCIAL ACCOUNTING. An examination of advanced financial accounting topics. Prerequisite: BUSI 450. Corequisite: BUSI 450.

BUSI 454 (3) ACCOUNTING FOR MANAGEMENT CONTROL AND INCENTIVES. Design of accounting systems for facilitating and influencing management decisions, with emphasis on performance evaluation in organizations. Prerequisite: BUSI 294. Equivalency: COMM 454.

BUSI 455 (3) PRINCIPLES OF AUDITING. Principles of internal control; audit evidence; sampling and testing; audit reports; standards and responsibilities of the external audit. Prerequisite: BUSI 353. Recommended prerequisite or corequisite: BUSI 450.

BUSI 465 (3) MARKETING MANAGEMENT. Basic considerations affecting the domestic and international marketing of goods and services. Prerequisite: All of ECON 101, ECON 102, BUSI 293. Equivalency: COMM 465, COMM 396.

BUSI 470 (3) FINANCIAL MANAGEMENT. Prerequisite: One of BUSI 370, COMM 473.

BUSI 486 (3-9) D SPECIAL TOPICS IN BUSINESS.

BUSI 493 (3) STRATEGIC MANAGEMENT IN BUSINESS. A conceptual and practical introduction to the major areas of business strategy with an integrative perspective on managing a business. Includes the analysis of a business and its environment, the development

and evaluation of strategic alternatives, and implementation of change. Prerequisite: BUSI 293 and either (a) all of ECON 101, ECON 102 or (b) ECON 309. Corequisite: Two of BUSI 294, BUSI 329, BUSI 370, BUSI 465. Equivalency: COMM 493.

BUSI 498 (3) INTERNATIONAL BUSINESS MANAGEMENT. Development of general environmental framework for international business studies by drawing on international and development economics, research into government-business relations and studies in comparative socio-cultural systems and political systems. Prerequisite: BUSI 293 and either (a) all of ECON 101, ECON 102 or (b) ECON 309. Corequisite: Two of BUSI 294, BUSI 329, BUSI 370, BUSI 465. Equivalency: COMM 498.

BUSI 499 (3-6) D DIRECTED STUDIES IN REAL ESTATE. An investigation and report on a topic to be agreed upon by a member of the faculty and a senior student.

CCFI — CENTRE FOR CROSS-FACULTY INQUIRY FACULTY OF EDUCATION

CCFI 501 (3) LIVING INQUIRY IN LEARNING COMMUNITIES.

CCFI 502 (3) THEORIZING KNOWING IN EDUCATION.

CCFI 508 (3-12) C REVIEW OF RESEARCH IN EDUCATIONAL METHODS. Studies are made of recent research bearing on educational practice. Prerequisite: Appropriate senior undergraduate introductory or methods course is required.

CCFI 561 (3-12) C LABORATORY PRACTICUM.

CCFI 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD. Courses in various subject matter fields designed to bring teachers up to date in recent findings in each field.

CCFI 567 (3/6) C PROBLEMS AND ISSUES IN ELEMENTARY EDUCATION. Recent developments, current issues, analysis, and evaluation of research in elementary education.

CCFI 572 (3/6) D ADVANCED SEMINAR IN CROSS-FACULTY INQUIRY IN EDUCATION. Examination of current theories and practices in education emphasizing factors affecting decision-making. The emphasis of the seminar will vary according to faculty and student interests and students will be encouraged to investigate an area of personal concern and present their findings.

CCFI 580 (3-12) C PROBLEMS IN EDUCATION. Investigation and report of a problem.

CCFI 590 (3) GRADUATING PAPER. Pass/Fail.

CCFI 598 (3-12) C FIELD EXPERIENCES. For those on master's, doctoral, and diploma programs.

CCFI 599 (6-12) C MASTER'S THESIS.

CCFI 601 (3-12) C DOCTORAL SEMINAR.

CCFI 699 (0) DOCTORAL THESIS.

CCST — CRITICAL AND CURATORIAL STUDIES FACULTY OF ARTS

CCST 500 (3) SEMINAR IN INTERDISCIPLINARY FRAMEWORKS IN MUSEUM AND CURATORIAL STUDIES. Theoretical and historical foundations of visual representations and expressive culture. It explores the history of museums and galleries, and changes in the meaning of art and material culture as debates about cultural property intensify.

CCST 501 (3) SEMINAR IN CONTEMPORARY CONTEXTUAL ISSUES FOR MUSEUMS AND CURATORIAL PRACTICE. An examination of broad social and political issues that confront curators and museum professionals who construct representations in museums, art galleries and other sites of public display.

CCST 502 (3) CASE STUDIES IN MUSEUM AND GALLERY EXHIBITIONS. A case study approach to analyzing museum and gallery exhibitions that are historically significant either because they raised issues and stimulated public debate, or because of radical features that proved influential on subsequent exhibitions. Course not offered every year.

CCST 503 (6) GRADUATE PRACTICUM IN CURATORIAL STUDIES. Practical on-site teamwork to produce exhibitions or other public displays in a museum, gallery, or alternative situation, offering opportunities for comparison, collaboration, and interdisciplinarity.

CCST 504 (3) MAJOR ESSAY IN CRITICAL CURATORIAL STUDIES. To graduate, students must produce a major essay with a weight of 3 credits.

CDST — CANADIAN STUDIES FACULTY OF ARTS

CDST 350 (3/6) D CANADIAN CULTURAL STUDIES. An interdisciplinary introduction to Canadian cultural studies. Required of all majors.

CDST 450 (3/6) D SENIOR SEMINAR IN CANADIAN STUDIES. The Canadian experience from a variety of disciplinary perspectives. Offered by the McLean Chair in Canadian Studies. Required of all majors. Prerequisite: CDST 350.

CENS — CENTRAL, EASTERN AND NORTHERN EUROPEAN STUDIES FACULTY OF ARTS

CENS 201 (3) CONTRASTS AND CONFLICTS: THE CULTURES OF CENTRAL, EASTERN AND NORTHERN EUROPE (IN ENGLISH). An introduction to the cultural history of the peoples of Central, Eastern and Northern Europe as reflected in their literature, art and music.

CENS 202 (3) GREAT WORKS OF LITERATURE FROM CENTRAL, EASTERN AND NORTHERN EUROPE (IN ENGLISH). Major works of Central, Eastern and Northern European literature from the eighteenth century to the present in their European context.

CENS 303 (3/6) D GERMAN

REPRESENTATIONS OF THE HOLOCAUST (IN ENGLISH). The Nazi Holocaust and related aspects of the Third Reich in film and literature. Texts will include first-hand accounts, fictionalizations, and perceived literary anticipations of the Holocaust by authors from the German-speaking countries.

CENS 404 (3) GENDER AND NATION: WOMEN'S STATE IN MODERN CENTRAL, EASTERN AND NORTHERN EUROPEAN LITERATURES AND CULTURES. Cultural and social discourses of gender in literary works written in Central, Eastern and Northern Europe roughly between 1850–1930.

CHBE — CHEMICAL AND BIOLOGICAL ENGINEERING FACULTY OF APPLIED SCIENCE

The Departments of Chemical Engineering and Bio-Resource Engineering have merged into a single department, the Department of Chemical and Biological Engineering. All courses listed under Chemical Engineering (CHML) are now listed under Chemical and Biological Engineering (CHBE). In some cases CHBE course numbers may not correspond to the former CHML course numbers. During the transition period some courses listed under Bio-Resource Engineering (BIOE) will remain open while others have been subsumed under Chemical and Biological Engineering (CHBE).

CHBE 230 (3) COMPUTATIONAL METHODS. Mathematical formulation of chemical and biological engineering problems; standard techniques of numerical analysis and their application to chemical, environmental and biotechnological systems; program development; use of commercial numerical analysis software. Prerequisite: CPSC 152. Corequisite: MATH 256. [3-0-2*]

CHBE 241 (3) MATERIAL AND ENERGY BALANCES. Introduction to Chemical and Biological Engineering; units; stoichiometry; phase equilibria; material balances; energy balances. [3-0-2*]

CHBE 242 (3) CHEMICAL AND BIOLOGICAL PROCESS TECHNOLOGY. Introduction to processes used in the chemical and biological industries. Problems and lectures emphasize underlying physical, chemical and biological principles. Prerequisite: CHBE 241. [3-0-2*]

CHBE 251 (3) TRANSPORT PHENOMENA I. Fluid Mechanics. Momentum-transfer in fluids in laminar and turbulent flow; microscopic and macroscopic material; momentum and energy balances; rheology; dimensional analysis; flow in conduits; pumps; fluid metering. Prerequisite: PHYS 170. Corequisite: MATH 256. [3-0-2*]

CHBE 262 (3) CHEMICAL ENGINEERING AND APPLIED CHEMISTRY LABORATORY. Experiments chosen to illustrate and use material presented in 200-level CHBE and CHEM courses. Corequisite: Second-year CHBE program. [0-4*-0; 0-4*-0]

CHBE 344 (2) UNIT OPERATIONS I. Characterization of particles; comminution, screening and classification; filtration, sedimentation,

centrifugal separations and fluidization; thermal operations including evaporation and crystallization. Prerequisite: Either (a) CHBE 242 or (b) all of CHBE 241, MECH 270; and one of CHBE 251, CIVL 215, MECH 280. [2-0-2*]

CHBE 345 (4) UNIT OPERATIONS II. Stage-wise mass transfer operations; extraction and absorption; single and stage-wise binary and multi-component distillation; principles and equipment design for continuous contact mass transfer operations including absorption, binary distillation and others such as extraction, drying, humidification, membrane separations. [4-0-2*]

CHBE 346 (3) CHEMICAL AND BIOLOGICAL ENGINEERING THERMODYNAMICS. Volumetric and thermodynamic properties of fluids; equations of state; heat effects; ideal and non-ideal mixtures; fugacities and activity coefficients; vapor-liquid and liquid-liquid phase equilibrium; solubility of gases and solids in liquids; chemical reaction equilibrium; equilibrium partitioning of pollutants. Prerequisite: All of CHBE 241, CHBE 242, CHEM 251. [3-0-2*]

CHBE 351 (3) TRANSPORT PHENOMENA II. Heat and mass transfer; conduction and molecular diffusion; convective transfer; thermal radiation; analogies among heat, mass and momentum transfer; heat exchanger design. Prerequisite: CHBE 251. [3-0-2*]

CHBE 356 (3) PROCESS DYNAMICS AND CONTROL. Introduction to modeling of chemical processes; transient response analysis; design of feedback control systems; stability analysis; frequency response analysis; process control applications; instrumentation; advanced control techniques; distributed control systems. Prerequisite: One of MATH 255, MATH 256. [3-1*-0]

CHBE 357 (3) INTERFACIAL PHENOMENA. Outline of the physics and chemistry of interfaces; discussion of the part played by surface effects in technical processes. [3-0-0]

CHBE 362 (2) CHEMICAL ENGINEERING LABORATORY. Experiments to illustrate and use material presented in 200 and 300-level CHBE courses. Field trips may be required. Prerequisite: All of CHBE 241, CHBE 251. [0-4-0]

CHBE 363 (2) PROCESS ENGINEERING LABORATORY. Experiments to illustrate and use material presented in 300-level CHBE process option courses. Field trips may be required. Prerequisite: All of CHBE 241, CHBE 251. [0-4-0]

CHBE 364 (2) ENVIRONMENTAL ENGINEERING LABORATORY. Laboratory experiments to illustrate key concepts and measurement techniques in environmental engineering as used by engineers. [0-4-0]

CHBE 365 (2) BIOTECHNOLOGY LABORATORY. Laboratory experiments to illustrate key concepts and measurement techniques in biotechnology as used by

engineers. Prerequisite: BIOL 112. Corequisite: CHBE 381. [0-4-0]

CHBE 373 (3) WATER POLLUTION CONTROL. Legal, environmental and physico-chemical aspects of industrial water pollution and its abatement will be surveyed; techniques for design of wastewater treatment processes currently used in industry; case studies from chemical and process industries will be considered in detail. [3-0-0]

CHBE 376 (3) COMPUTER FLOWSHEETING AND FLUID PROPERTIES ESTIMATION. Theory and practice of computer flowsheeting in chemical plant design; hands-on use of modern process simulators, prediction of thermodynamic properties of fluids; behaviour of single and multiphase systems. Prerequisite: CHBE 241. [3-0-2*]

CHBE 381 (3) BIOPROCESS ENGINEERING I. Design of industrial bioreactor systems: organism selection; kinetics of microbial processes and enzyme reactions; design and modeling of single and multi-stage bioreactors. Prerequisite: BIOL 112 and one of MATH 101, MATH 103, MATH 105, CHBE 241, CHBE 251. Third or fourth year standing. [3-0-2*]

CHBE 401 (3) MECHANICAL PULPING AND PAPERMAKING. Process and unit operations in mechanical pulping and papermaking, emphasizing principles and practice of refining, screening, cleaning, papermaking and properties of paper products, key economic and environmental issues. [3-0-0]

CHBE 402 (3) CHEMICAL PULPING TECHNOLOGY. Process and unit operations in the conversion of wood chips to pulp, principles and practice of kraft pulping, oxygen delignification, pulp bleaching, chemical recovery and related unit operations. Economic and environmental issues are considered. [3-0-0]

CHBE 444 (3) UNIT OPERATIONS II. Single and stage-wise binary and multicomponent distillation; principles and equipment design for continuous contact mass transfer operations including absorption, binary distillation and others such as extraction, drying, humidification, membrane separations, etc. Prerequisite: All of CHBE 344, CHBE 351. [3-0-2*]

CHBE 452 (6) ENVIRONMENTAL PROCESS DESIGN PROJECT. Design and economic assessment of an environmental engineering process. Prerequisite: All of CHBE 254, CHBE 344, CHBE 346, CHBE 351, CHBE 356, CHBE 373. Corequisite: CHBE 459. [0-0-3; 0-0-3]

CHBE 453 (6) BIOTECHNOLOGY PROCESS DESIGN PROJECT. Design and economic assessment of a chemical engineering process in the biotechnology field. Prerequisite: All of BIOL 112, CHBE 346, CHBE 356, CHBE 381. Corequisite: CHBE 459. [0-0-3; 0-0-3]

CHBE 454 (6) PROCESS DESIGN PROJECT. Design and economic assessment of a major chemical engineering process. A directed-study type course in which the students use previous course material in the synthesis of a detailed

design of a practical process. Contact hours are used for the presentation of progress reports and consultation with faculty and industrial advisors. Prerequisite: All of CHBE 341, CHBE 346, CHBE 351, CHBE 356. Corequisite: CHBE 459. [0-0-3; 0-0-3]

CHBE 455 (3) KINETICS AND REACTOR DESIGN. Kinetics of homogeneous chemical and biological reactions, isothermal ideal reactor design, analysis of non-ideal reactors using residence time distribution and mixing models. Prerequisite: CHEM 251. [3-0-2*]

CHBE 456 (3) HETEROGENOUS CATALYSIS AND ADVANCED REACTOR DESIGN. Definition of heterogeneous catalysis; properties of catalysts; kinetics of catalytic reactions; ideal heterogeneous reactors; non-isothermal reactor design; mass and heat transfer effects in heterogeneous reactors; examples of industrial reactors. Prerequisite: All of CHBE 351, CHBE 455. [3-0-2*]

CHBE 457 (3) PROCESS SYNTHESIS. Strategy for the conception and preliminary design of industrial chemical and biological processes; development and evaluation of process options, conceptual flowsheets, reaction pathways, separation sequences, material and energy recovery systems; computer aided design and optimization. Prerequisite: All of CHBE 241, CHBE 346, CHBE 376, CHBE 344. [3-0-3*]

CHBE 459 (3) CHEMICAL AND BIOLOGICAL ENGINEERING ECONOMICS. Estimation of capital and operating costs; interest calculations; taxes; economic comparison of alternatives; economic optimization. [3-0-0]

CHBE 464 (3) CHEMICAL AND BIOLOGICAL ENGINEERING LABORATORY. Experiments in unit operations relating to process, environmental and biological engineering. Experiments are designed to provide experience in instrumentation and control. Field trips may be required. Prerequisite: One of CHBE 362, CHBE 363, CHBE 364, CHBE 365. [0-6*-0; 0-6*-0]

CHBE 465 (3) REHABILITATION AND DESIGN OF AQUATIC HABITAT. Modeling the effects of the environment and nutrient availability on growth and waste production; designing closed and open environments for aquatic organisms; developing prescriptions for habitat rehabilitation. Prerequisite: BIOL 112 and third-year standing also required. [2-2*-2*]

CHBE 473 (3) DESIGN OF SOLID WASTE BIOCONVERSION SYSTEMS. Classification of waste-to-resource conversion processes; composting materials handling, equipment selection and sizing, system performance evaluation and product quality analysis; gaseous and liquid fuels production via combustion, anaerobic digestion, and other processes; planning and implementation of an integrated waste diversion program. Prerequisite: Third year standing. [2-2*-2*]

CHBE 474 (3) PROCESS CONTROL ENGINEERING. Frequency response analysis; advanced control techniques; multivariable control systems; mathematical tools for computer control systems; design of computer

control systems; engineering design of industrial control applications; plant wide control concepts; distributed control systems concepts. Prerequisite: All of CHBE 356, CHBE 376. [3-2*-0]

CHBE 476 (3) MODELLING AND OPTIMIZATION IN CHEMICAL ENGINEERING. Mathematical modelling of chemical plants and processes; computer simulation; introduction to numerical optimization techniques. Prerequisite: All of CHBE 344, CHBE 376. [3-2*-0]

CHBE 477 (3) FUEL CELL AND ELECTROCHEMICAL ENGINEERING. Stoichiometry, thermodynamics and kinetics of electrode reactions; conductivity and mass transport in electrolytes; material, energy and voltage balances; design of electrosynthesis, electrorecovery of metals, and energy generation of batteries and fuel cells. Prerequisite: All of CHEM 252, CHBE 241. [3-0-0]

CHBE 479 (3) CHEMICAL ENGINEERING ASPECTS OF OCCUPATIONAL HEALTH AND SAFETY. Relationship between current engineering practice and worker health and safety. Engineering analysis of industrial health and safety problems. Prerequisite: Third-year Chemical and Biological Engineering. [2-2-0]

CHBE 480 (3) HAZARDOUS WASTE PROCESSING TECHNOLOGY. Characterization, treatment and final disposal of hazardous waste with emphasis upon chemical engineering principles. Topics to include relevant legislation, in-plant minimization, treatment options and clean-up of contaminated sites. Case studies to be used for illustration. Prerequisite: Third year Chemical and Biological Engineering. [3-0-0]

CHBE 481 (3) BIOPROCESS ENGINEERING II. Bioprocess flowsheeting; production-scale fermenter design; product recovery and purification; bioseparations; chromatography; viral inactivation and removal; process validation. Prerequisite: CHBE 381. [3-0-2*]

CHBE 483 (3) ENERGY ENGINEERING. Supply and use of conventional and alternative fuels and energy. Design and operation of unit operations for processing of fossil fuels, biomass and other energy sources. Environmental considerations of energy use. Prerequisite: Third-year Chemical and Biological Engineering. [3-0-0]

CHBE 484 (3) GREEN ENGINEERING PRINCIPLES AND APPLICATIONS FOR PROCESS INDUSTRIES. Pollution prevention, cleaner production, green chemistry and engineering, industrial ecology, eco-industrial parks, and sustainable development; environmental impact assessment including life-cycle assessment, total cost analysis and environmental systems analysis; reduce/recycling/reuse of wastes and by-products. Prerequisite: All of CHBE 241, CHBE 242. [3-0-0]

CHBE 485 (3) AIR POLLUTION CONTROL. Characteristics of various air pollutants and their behaviour in the atmosphere; monitoring problems; technology of particulate collection and control of pollutant gases. [3-0-0]

CHBE 489 (3) POLLUTION CONTROL IN THE PULP AND PAPER INDUSTRY. Pollutants of concern in the pulp and paper industry; environmental impact of the industry; technologies used for the control of solid, liquid and gaseous wastes. [3-0-0]

CHBE 490 (3) ADVANCED BIOLOGICAL WASTE SYSTEMS DESIGN AND MANAGEMENT. Biological (aerobic and anaerobic) treatment systems; advanced wastewater treatment; nutrients removal; natural treatment systems; membrane technology. Prerequisite: CHBE 373. [2-0-2]

CHBE 491 (1) THESIS PROPOSAL. Literature searching, planning, equipment design, experimental design for an individual research project leading to a written proposal and oral presentation. Prerequisite: All of CHBE 362, CHBE 363. [0-2-0]

CHBE 492 (5) THESIS. Research project under the direction of a staff member. Prerequisite: CHBE 491. [0-8-0]

CHBE 493 (1) THESIS PROPOSAL-ENVIRONMENTAL TOPIC. Literature search, planning, equipment design for an individual research project leading to a written proposal and oral presentation. Topic to be chosen from a selection of environmental topics offered by the department. Prerequisite: All of CHBE 362, CHBE 364. [0-2-0]

CHBE 494 (5) THESIS-ENVIRONMENTAL TOPIC. Environmental engineering research topic. Prerequisite: CHBE 493. [0-8-0]

CHBE 495 (1) THESIS PROPOSAL-BIOTECHNOLOGY TOPIC. Literature search, planning, equipment design for an individual research project leading to a written proposal and oral presentation. Topic to be chosen from a selection of biotechnology topics offered by the department. Prerequisite: All of CHBE 362, CHBE 365. [0-2-0]

CHBE 496 (5) THESIS BIOTECHNOLOGY TOPIC. Biotechnological engineering research topic. Prerequisite: CHBE 495. [0-8-0]

CHBE 498 (1) ENGINEERING REPORT. This should be written on some subject of scientific interest or technical interest, based preferably on personal experience. Specifications are issued by the Department. Prerequisite: Third-year Chemical and Biological Engineering.

CHBE 506 (3) INDUSTRIAL PROCESS ENGINEERING. Mass and energy balances. Stoichiometry. Flow diagrams. Key unit operations for selected process industries in Western Canada with special attention to emission controls and hazards. May require field trips. Not open to Chemical and Biological Engineering students.

CHBE 510 (3) OPTIMIZATION OF BIOPROCESSES. Experimental design, data analysis, model building, reactor dynamics and computer control for optimization.

CHBE 540 (3) ADVANCED DESIGN OF BIO-AQUATIC SYSTEMS. Technical and economic feasibility studies, design of waste treatment, feeding and rehabilitation systems for aquatic organisms in natural and artificial settings.

CHBE 549 (12) MASTER'S THESIS FOR M.SC.

CHBE 550 (2-4) D ADVANCED REACTOR DESIGN. Topics vary from year to year, and may include kinetics of fluid-solid reactions of single particles, packed, moving, fluidized and transported bed reactors; rotary kilns; gas-liquid reaction kinetics and reactor design; reactor design for gas-liquid-solid and non-catalytic processes.

CHBE 551 (2-4) D CHEMICAL ENGINEERING THERMODYNAMICS. Pressure-volume-temperature relations; chemical equilibria by Gibbs' method; vapor-liquid equilibria; thermodynamic calculations by third law and quantum-statistical methods; irreversible thermodynamics and information theory.

CHBE 552 (2-4) D OPTIMIZATION METHODS. Mathematical and experimental techniques for optimizing processes. Course content will vary from year to year, but will be chosen from: direct search techniques, unconstrained optimization, Jacobian and Lagrangian optimization, mathematical programming, and variational calculus techniques.

CHBE 553 (2-4) D MATHEMATICAL OPERATIONS IN CHEMICAL ENGINEERING. Topics vary from year to year. Amongst these will be dimensional analysis and model theory; treatment and interpretation of chemical engineering data; formulation and solution of differential and finite difference equations; graphical, numerical and statistical methods.

CHBE 554 (2-4) D MOMENTUM, HEAT AND MASS TRANSFER. Prediction of velocity, temperature, and concentration profiles for flowing fluids; unifying concepts and analogies in momentum, heat, and mass transport; streamline flow and turbulence, molecular and eddy conduction and diffusion, boundary layers, smooth and rough conduits and other boundaries.

CHBE 557 (2-4) D FLUID DYNAMICS. Topics include tensor analysis; governing equations for Newtonian fluids, exact and numerical solutions to Navier-Stokes equations; creeping flow; flow through porous media; incompressible boundary layers; stability analysis; turbulence.

CHBE 559 (2-6) D TOPICS IN CHEMICAL ENGINEERING. A discussion of some aspects of modern Chemical Engineering. Subject matter varies each year.

CHBE 560 (3) BIOCHEMICAL ENGINEERING. Introduction to the biochemistry and biology of bioprocesses; kinetics of enzymatic and cellular processes; principles of cell culture, process development and product recovery; optimization of bioreactor design and operation.

CHBE 561 (2-4) D PARTICULATE AND MULTIPHASE SYSTEMS. Topics vary from year to year and include electrokinetic colloidal phenomena; packed beds; filtration; sedimentation; two- and three-phase fluidized beds; spouted beds; hydraulic and pneumatic transport; gas, liquid and solid particle mechanics; multiphase flows.

CHBE 563 (3) APPLIED HETEROGENEOUS CATALYSIS. Techniques for characterizing catalysts and their surfaces. Commercial methods of preparing catalysts. Chemistry of catalytic reactions and the impact of catalyst properties, mechanisms and kinetics on reactor engineering. Applications of catalytic oxidations, hydrogenations, C-C bond formation and cracking. [2-0-0]

CHBE 564 (3) INDUSTRIAL BIOTECHNOLOGY LABORATORY. Modern bioreactor technology, upstream and downstream processing of biotechnology products. Credit will not be given for both CHBE 564 and MICB 419. [1-4-0]

CHBE 565 (2-4) D ADVANCED PROCESS CONTROL. Discrete-time chemical system modeling; model-based predictive control; predictive controller design; analysis of design parameters; controller stability; robustness and performance analysis; selected topics from current developments in the literature.

CHBE 566 (3) TOPICS IN BIOCHEMICAL ENGINEERING. Analysis of recent engineering and biotechnology research articles. Topics chosen from: bioprocess, biosensor and biomedical literature. Prerequisite: BIOL 112.

CHBE 567 (2-4) D SYSTEM IDENTIFICATION AND ADAPTIVE CONTROL. Input/Output modeling; frequency analysis; regression analysis; model parametrizations; recursive estimation methods; model validation; adaptive controller design; implementation issues; chemical process control applications; selected topics from current developments in the literature.

CHBE 571 (2-6) D NON-NEWTONIAN FLUID BEHAVIOUR. Selections from the following topics: kinematics of deformation and flow, dynamics of continuous media, constitutive equations, physical chemical and molecular aspects of viscosity, engineering applications to pipe flow, mixing, heat transfer. Handling of suspensions and polymers.

CHBE 572 (2-6) D WATER POLLUTION CONTROL. Water pollution control; methods of problem assessment from chemical operations, technology of control with special attention to regional problems. Topics vary from year to year with emphasis on industrial problems.

CHBE 574 (2-4) D EQUILIBRIUM PROPERTIES OF NON-IDEAL MIXTURES. Discussion of various methods of calculating vapor-liquid, liquid-liquid equilibrium and thermal properties, including molecular thermodynamics. Excess free-energy of mixing. Thermodynamic consistency tests. Emphasis on engineering applications and newer approaches.

CHBE 575 (2-4) D AIR POLLUTION CONTROL. Characteristics of various air pollutants, their behaviour in the atmosphere, monitoring problems, technology of particle collection and control of pollutant gases. Particular problems of regional interest are discussed.

CHBE 577 (2-4) D ELECTROCHEMICAL SCIENCE, ENGINEERING AND TECHNOLOGY. Electrochemical interfaces; electrode reactions; thermodynamics; kinetics and transport processes in electrochemical systems; experimental techniques. Electrochemical reactors and processes; modelling, design and economics. Electrochemical technologies; electrosynthesis, batteries and fuel cells. Electro-metallurgy; electrowinning and refining of metals, corrosion, leaching and cementation.

CHBE 579 (2-4) D ENVIRONMENTAL PROTECTION CONTROL IN THE PULP AND PAPER INDUSTRY. Environmental regulations; measurement of pollutants; environmental impacts; environmental audits; air pollution control technology; water pollution control technology; sludge management and disposal.

CHBE 580 (3) ADVANCED TOPICS IN PULP AND PAPER ENGINEERING. Advanced material in selected topics in pulp and paper in science and engineering. Subject matter varies each year. [3-0-0]

CHBE 590 (3) SMALL WATERSHED SYSTEMS DESIGN. Hydrologic design of water management systems for the production of agricultural and other biological materials. Analysis and design of composite systems for watersheds.

CHBE 596 (0) ENGINEERING REPORT. Engineering report of at least 3000 words on a research or design topic under the supervision of a faculty member.

CHBE 598 (0) SEMINAR. Presentation and discussion of current topics in chemical and biological engineering research. A required course for all graduate students in Chemical and Biological Engineering which carries no academic credit.

CHBE 599 (12) THESIS. For M.A.Sc.

CHBE 699 (0) THESIS. For Ph.D.

CHEM — CHEMISTRY FACULTY OF SCIENCE

Science students with BC Secondary School Chemistry 11, but not Chemistry 12, are required to take CHEM 111. Many Science programs require CHEM 121 and 123, or 111 and 113. CHEM 111 is not open to students with credit for Chemistry 12. CHEM 111, 113 are open to students who have obtained credit for Chemistry 11 only whereas CHEM 121, 123 are open to students with credit for Chemistry 12. The following courses are for students in the Faculty of Applied Science: CHEM 154, CHEM 250, CHEM 251, CHEM 260. Additional fees are charged for some courses.

CHEM 111 (4) PRINCIPLES OF CHEMISTRY I. Stoichiometry, atomic and molecular structure, chemical periodicity, descriptive inorganic chemistry. Not open to students with credit for CHEM 12. Prerequisite: Not open to students with credit for CHEM 12. [3-3-1]

CHEM 113 (4) PRINCIPLES OF CHEMISTRY II. General and ionic equilibrium, solubility, thermodynamics. Introductory organic chemistry: stereochemistry; substitution, elimination

and oxidation-reduction reactions. Not open to students with credit for CHEM 12 or CHEM 121. Can be used as prerequisite to subsequent CHEM courses. Prerequisite: CHEM 111. [3-3-1]

CHEM 121 (4) STRUCTURAL CHEMISTRY, WITH APPLICATION TO CHEMISTRY OF THE ELEMENTS. Fundamentals of structural chemistry; descriptive chemistry of main-group elements, with industrial and environmental applications. This is a required course for all students needing a first-year Chemistry course who have CHEM 12. [3-3-0]

CHEM 123 (4) PHYSICAL AND ORGANIC CHEMISTRY. Principles of equilibrium and chemical thermodynamics. Introductory organic chemistry: stereochemistry; substitution, elimination and oxidation-reduction reactions. This course or CHEM 113 is prerequisite to all subsequent courses in chemistry. Prerequisite: CHEM 121. [3-3-0]

CHEM 154 (3) CHEMISTRY FOR ENGINEERING. Chemical bonding, properties of matter. Chemical thermodynamics with applications to phase equilibria, aqueous equilibria and electrochemistry. Processes at surfaces. Prerequisite: CHEM 12. [3-3*-0]

CHEM 201 (3) INTRODUCTION TO PHYSICAL CHEMISTRY. Principles of chemical kinetics, reaction mechanisms and chemical thermodynamics. Credit will be given for only one of CHEM 201 and 205. Prerequisite: Either (a) SCIE 001 or (b) one of MATH 101, MATH 103, MATH 105, MATH 121 and either (a) all of CHEM 111, CHEM 113 or (b) all of CHEM 121, CHEM 123 or (c) CHEM 154. MATH 200 or MATH 217 or MATH 226 or MATH 253 or MATH 263 is recommended. [2-3*-1]

CHEM 202 (3) COORDINATION CHEMISTRY. Coordination chemistry of the transition elements. Prerequisite: Either (a) all of CHEM 111, CHEM 113 or (b) all of CHEM 121, CHEM 123 or (c) one of SCIE 001, CHEM 154. [2-3*1]

CHEM 203 (4) INTRODUCTION TO ORGANIC CHEMISTRY. Structure, bonding and physical properties of aliphatic and aromatic compounds; conformational analysis, stereochemistry and NMR spectroscopy; substitution and elimination reactions of alkyl halides; ethers, epoxides, aldehydes, ketones. Only open to students in Chemistry and Biochemistry programs. Credit will be given for only one pair of CHEM 203, 204, or CHEM 231, 232, or CHEM 233, 235. Prerequisite: Either (a) all of CHEM 111, CHEM 113 or (b) all of CHEM 121, CHEM 123 or (c) SCIE 001. [3-3-0]

CHEM 204 (4) ORGANIC CHEMISTRY. Mechanistic analysis of chemical reactivity of common functional groups with focus on carbonyl chemistry; aromaticity and aromatic substitution; functional group transformations in organic synthesis; carbohydrates, amino acids, proteins, heterocycles. Only open to students in Chemistry and Biochemistry programs. Prerequisite: CHEM 203. [3-3-0]

CHEM 205 (3) PHYSICAL CHEMISTRY. Chemical kinetics and thermodynamics and spectroscopy useful in biological, medical, agricultural, earth, and related sciences. Not for credit in Chemistry and Biochemistry programs. Credit will be given for only one of CHEM 201 and 205. Prerequisite: Either (a) SCIE 001 or (b) one of MATH 100, MATH 102, MATH 104, MATH 120, MATH 180, MATH 184 and either (a) all of CHEM 111, CHEM 113 or (b) all of CHEM 121, CHEM 123. MATH 101 or MATH 103 or MATH 105 or MATH 121 is recommended. [3-0-0]

CHEM 211 (4) ANALYTICAL CHEMISTRY. Chemical equilibrium applied to analysis; volumetric analysis; analytical electrochemistry. Prerequisite: Either (a) all of CHEM 111, CHEM 113 or (b) all of CHEM 121, CHEM 123 or (c) SCIE 001. [3-3-0]

CHEM 233 (3) ORGANIC CHEMISTRY FOR THE BIOLOGICAL SCIENCES. Reactions and properties of carbonyl compounds, carbohydrates, amino acids, nucleic acids. Not for credit in Chemistry and Biochemistry programs. Prerequisite: Either (a) all of CHEM 111, CHEM 113 or (b) all of CHEM 121, CHEM 123 or (c) SCIE 001. [3-0-0]

CHEM 235 (1) ORGANIC CHEMISTRY LABORATORY. Techniques of organic chemistry. To be taken in conjunction with, or in the term following, CHEM 233. Prerequisite: Either (a) all of CHEM 111, CHEM 113 or (b) all of CHEM 121, CHEM 123 or (c) SCIE 001. Corequisite: CHEM 233. [0-3-0]

CHEM 250 (2) INORGANIC CHEMISTRY. Chemistry of selected groups of inorganic compounds, considered in relation to industrial processes. Prerequisite: Either (a) all of CHEM 111, CHEM 113 or (b) all of CHEM 121, CHEM 123 or (c) SCIE 001 or (d) CHEM 154. [2-0-0]

CHEM 251 (3) PHYSICAL CHEMISTRY FOR ENGINEERS. States of matter, properties of gases, phase diagrams. Elementary chemical thermodynamics and kinetics. Reaction equilibria. Prerequisite: Either (a) all of CHEM 111, CHEM 113 or (b) all of CHEM 121, CHEM 123 or (c) SCIE 001 or (d) CHEM 154. [3-0-1]

CHEM 260 (3) ORGANIC CHEMISTRY FOR ENGINEERS. A description of the properties and reactions of organic compounds. Prerequisite: Either (a) all of CHEM 111, CHEM 113 or (b) all of CHEM 121, CHEM 123 or (c) SCIE 001 or (d) CHEM 154. [3-0-0]

CHEM 301 (3) AQUEOUS ENVIRONMENTAL CHEMISTRY. Properties of natural waters, including gas and solid equilibria, pH, redox, complexation analysis, corrosion treatment, ion exchange, colloids and microbial transformations. Prerequisite: One of CHEM 201, CHEM 205, CHEM 251. Recommended: (a) One of CHEM 202, and (b) one of CHEM 204, CHEM 232, CHEM 233, or (c) CHEM 260. [3-0-0]

CHEM 302 (3) ATMOSPHERIC ENVIRONMENTAL CHEMISTRY. Introduction to structure, composition and chemical processes occurring in Earth's atmosphere,

including interactions with solar radiation, stratospheric ozone layer, photochemical smog and acid rain. Prerequisite: One of CHEM 201, CHEM 205, CHEM 251. [3-0-0]

CHEM 304 (3) FUNDAMENTALS OF PHYSICAL CHEMISTRY. Review of thermodynamics concepts; introduction to statistical mechanics; solution thermodynamics; phase equilibria; electrochemistry. Prerequisite: CHEM 201 and one of MATH 200, MATH 217, MATH 226, MATH 253, MATH 263. [2-4*-1]

CHEM 305 (3) BIOPHYSICAL CHEMISTRY. Diffusion and transport phenomena; interaction of radiation and matter. Methods for determining molecular weight, size, and shape of molecules in solution. Prerequisite: CHEM 304 and one of MATH 200, MATH 217, MATH 226, MATH 253, MATH 263. [2-4*-1]

CHEM 307 (3) ADVANCED PHYSICAL CHEMISTRY. Introduction to phenomena at surfaces and interfaces: colloids; adsorption, thermodynamic treatments, technological applications. Modern methods to characterize surfaces in materials science. Chemical dynamics at electrode interfaces. Prerequisite: CHEM 304 and one of MATH 200, MATH 217, MATH 226, MATH 253, MATH 263. [2-4*-1]

CHEM 309 (3) FOUNDATIONS OF INORGANIC CHEMISTRY. Molecular structure and bonding in compounds of main-group and transition elements. Solid state chemistry. Acid-base chemistry; inorganic chemistry in non-aqueous media. Prerequisite: CHEM 202. [2-4*-1]

CHEM 310 (3) CHEMISTRY OF THE ELEMENTS. Representative chemistry of *s*-, *p*-, *d*-, and *f*-block elements interpreted in terms of structure, mechanisms, and theoretical principles. Prerequisite: CHEM 309. [2-4*-1]

CHEM 311 (4) INSTRUMENTAL ANALYTICAL CHEMISTRY. Instrumental methods of chemical analysis including spectroscopic methods, mass spectrometry, radiochemical methods, surface analysis, chromatography. Prerequisite: CHEM 211. [2-4-1]

CHEM 312 (3) INTRODUCTION TO QUANTUM MECHANICS AND SPECTROSCOPY. Principles of quantum mechanics; atomic wavefunctions; angular momentum; spin; atomic term symbols. Prerequisite: Either (a) SCIE 001 or (b) either (a) all of CHEM 121, CHEM 123 or (b) all of CHEM 111, CHEM 113; and one of MATH 200, MATH 217, MATH 226, MATH 253, MATH 263. [3-0-0]

CHEM 313 (4) ADVANCED ORGANIC CHEMISTRY FOR THE LIFE SCIENCES. Chemistry of organic substances that have particular relevance to the life sciences. Credit will be given for only one of CHEM 313 and 330. Prerequisite: All of CHEM 203, CHEM 204. [3-4-0]

CHEM 320 (3) STRUCTURE OF ATOMS AND MOLECULES. Introduction to variational methods; many-electron systems; semi-empirical methods; perturbation theory;

computational methods. Prerequisite: One of CHEM 312, PHYS 304 and one of MATH 152, MATH 221, MATH 223. [3-0-0]

CHEM 330 (4) ADVANCED ORGANIC CHEMISTRY. Application of carbonyl group chemistry, cyclisation reactions, conformational analysis and rearrangement reactions in organic synthesis. Credit will be given for only one of CHEM 313 and 330. Prerequisite: All of CHEM 203, CHEM 204. [3-4-0]

CHEM 333 (3) SPECTROSCOPIC TECHNIQUES IN ORGANIC CHEMISTRY. Application of mass spectrometry, and NMR, UV/visible, and IR spectroscopies to organic chemical problems. Prerequisite: Either (a) all of CHEM 203, CHEM 204 or (b) all of CHEM 233, CHEM 205. [3-0-0]

CHEM 398 (3) CO-OPERATIVE WORK PLACEMENT I. Approved and supervised technical work experience in an industrial research setting for a minimum of 3.5 months. Taken during the winter term of the third year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Chemistry.

CHEM 399 (3) CO-OPERATIVE WORK PLACEMENT II. Approved and supervised technical work experience in an industrial research setting for a minimum of 3.5 months. Taken during the summer following the third year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Chemistry. Prerequisite: CHEM 398.

CHEM 401 (3) PRINCIPLES OF SPECTROSCOPY. Rotational, vibrational, electronic and magnetic resonance spectroscopy and associated techniques; group theory. Prerequisite: Either (a) CHEM 320 or (b) PHYS 304. [3-0-0]

CHEM 402 (3) DIFFRACTION METHODS. Crystal structures; point and space groups; X-ray diffraction, neutron diffraction, electron diffraction of gases and surfaces. Credit will be given for only one of CHEM 402 and 514. Prerequisite: All of CHEM 202, CHEM 312. [3-0-0]

CHEM 404 (3) ADVANCED INORGANIC CHEMISTRY. Structure, reactivity and bonding of compounds containing homonuclear bonds; cluster chemistry of both main group and transition elements. Chemistry of non-aqueous solvents. Prerequisite: All of CHEM 309, CHEM 310. [3-0-0]

CHEM 405 (3) BIOPHYSICAL CHEMISTRY. Interactions of macromolecules in solution: ligand, antibody and ion binding to macromolecules; thermodynamics of polymer solutions; excluded volume effects; phase separation; partition in two phase polymer solutions. Prerequisite: All of CHEM 203, CHEM 204. Corequisite: One of CHEM 305, CHEM 307. [3-0-0]

CHEM 406 (3) POLYMER CHEMISTRY. Structure and availability of monomers; Propagation mechanisms; synthesis of polymers with predetermined properties; measurement

and interpretation of physical properties of polymers. Prerequisite: All of CHEM 203, CHEM 204 and one of CHEM 304, CHEM 251. [3-0-0]

CHEM 407 (3) STATISTICAL MECHANICS IN CHEMISTRY. Introductory concepts of statistical mechanics and statistical thermodynamics. Applications to chemistry with emphasis on understanding chemical reactivity. Credit will not be given for CHEM 503/CHEM 407 and PHYS 455. Prerequisite: CHEM 304. [3-0-0]

CHEM 408 (3) CHEMICAL DYNAMICS. Macroscopic and microscopic kinetics; photochemistry; theory of reaction rates; reaction cross sections, energy distributions, experimental methods. Credit will not be given for both CHEM 408 and CHEM 508. Prerequisite: All of CHEM 304, CHEM 312. [3-0-0]

CHEM 410 (3) PHYSICAL CHEMISTRY OF THE SOLID STATE. Introduction to the theory of electrons in solids; bands and zones. Absorption of light and excitons. Vacancies, interstitials, electronic defects and dislocations and their roles in chemical reactivity. Credit will not be given for CHEM 410/CHEM 502 and PHYS 474. Prerequisite: CHEM 202 and one of CHEM 201, CHEM 205. [3-0-0]

CHEM 411 (3) SYNTHESIS AND CHEMISTRY OF NATURAL PRODUCTS. A discussion of synthetic methods and their application to natural products, particularly in the areas of alkaloids, steroids and terpenes. Credit will not be given for both CHEM 411 and CHEM 566. Prerequisite: One of CHEM 330, CHEM 313. [3-0-0]

CHEM 412 (3) INDUSTRIAL ORGANIC CHEMISTRY. The production and use of primary petrochemicals; plastics and synthetic fibres; pharmaceutical agents; insecticides, herbicides and insect pheromones, dyes, detergents, perfumes and flavours; commercially important microbial transformations. Prerequisite: Either (a) all of CHEM 233, CHEM 235 or (b) all of CHEM 231, CHEM 232 or (c) all of CHEM 203, CHEM 204 or (d) CHEM 260. [3-0-0]

CHEM 413 (3) MECHANISTIC ENZYMOLOGY. Chemistry of cofactors; biosynthetic transformations; molecular synthesis; transformation and degradation; natural product biosynthesis. Credit will be given for only one of CHEM 413, CHEM 569, or BIOC 403. Prerequisite: One of CHEM 313, CHEM 330. [3-0-0]

CHEM 414 (3) COORDINATION CHEMISTRY OF THE TRANSITION ELEMENTS. Molecular and electronic structures and reactivities of coordination compounds of the transition elements. Credit will not be given for both CHEM 414 and CHEM 525. Prerequisite: All of CHEM 309, CHEM 310. [3-0-0]

CHEM 415 (3) ADVANCED CHEMISTRY LABORATORY. Integrated laboratory course designed to illustrate principles of modern analytical, inorganic, organic and physical chemistry. Prerequisite: All of CHEM 304, CHEM 310, CHEM 311, CHEM 312.

Corequisite: One of CHEM 313, CHEM 330. [0-8*-0; 0-8*-0]

CHEM 416 (3) PHYSICAL AND THEORETICAL ORGANIC CHEMISTRY. Energetics and catalysis in organic reactions. Pericyclic reactions. Substituent effects. Linear free energy relationships. Credit will not be given for both CHEM 416 and CHEM 563. Prerequisite: One of CHEM 313, CHEM 330. [3-0-0]

CHEM 417 (3) NUCLEAR CHEMISTRY AND RADIOCHEMISTRY. Basic treatment of the nucleus, with analogy to concepts in chemistry. Nuclear stabilities and associated radioactive decay processes. Nuclear structure. Applications of radioisotopes in chemistry. The interaction of radiation with matter. Prerequisite: CHEM 201 or with permission CHEM 205. CHEM 312 is recommended. [3-0-0]

CHEM 418 (3) ORGANOMETALLIC CHEMISTRY. The chemistry of compounds containing organic groups directly bonded to metals and metalloids. Emphasis will be placed on the structure and bonding of the compounds and their use in synthetic chemistry. Credit will not be given for both CHEM 418 and CHEM 524. Prerequisite: All of CHEM 309, CHEM 310. [3-0-0]

CHEM 425 (6) CHEMISTRY INTEGRATED LABORATORY. Integrated course designed to illustrate principles of modern laboratory chemistry. Prerequisite: All of CHEM 304, CHEM 310, CHEM 311, CHEM 312. Corequisite: One of CHEM 313, CHEM 330. [0-8-0; 0-8-0]

CHEM 427 (3) CHEMISTRY OF MATERIALS. Introduction to the chemistry, theory and applications of contemporary materials. Credit will not be given for both CHEM 427 and CHEM 527. Prerequisite: One of CHEM 201, CHEM 251 and one of CHEM 202, CHEM 250 and either (a) CHEM 260 or (b) all of CHEM 203, CHEM 204 or (c) all of CHEM 231, CHEM 232 or (d) all of CHEM 233, CHEM 235. [3-0-0]

CHEM 430 (3/6) D DEVELOPMENTS IN CONTEMPORARY CHEMISTRY. A review of modern developments in general chemistry for teachers of Secondary School chemistry (Not for credit in the Faculty of Science). Course is offered periodically in extra-session sessions.

CHEM 435 (3) BIO-INORGANIC CHEMISTRY. A discussion of the involvement of inorganic chemistry in biological systems. Chemistry of cations, metalloenzymes, and simpler model systems. Reactions of coordinated ligands, chemistry of sulphur and phosphorus. Credit will not be given for both CHEM 435 and CHEM 526. Prerequisite: All of CHEM 304, CHEM 309. [3-0-0]

CHEM 448 (3/6) D DIRECTED STUDIES IN CHEMISTRY. Students will undertake an investigation of a specific topic as agreed upon by the student and the faculty supervisor. Open to third- and fourth-year chemistry students.

CHEM 449 (6) SEMINAR AND THESIS. Original research work under the direction of a faculty member. Weekly seminar. Required of

all Honours students. Open to Majors students with a satisfactory standing and permission of the department head.

CHEM 498 (3) CO-OPERATIVE WORK PLACEMENT III. Approved and supervised technical work experience in an industrial research setting for a minimum of 3.5 months. Taken during the summer following fourth year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Chemistry. Prerequisite: CHEM 399.

CHEM 499 (3) CO-OPERATIVE WORK PLACEMENT IV. Approved and supervised technical work experience in an industrial research setting for a minimum of 3.5 months. Taken during the fall term of the fifth year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Chemistry. Prerequisite: CHEM 498.

CHEM 501 (3) APPLICATIONS OF QUANTUM MECHANICS IN CHEMISTRY.

CHEM 502 (3) ADVANCED PHYSICAL CHEMISTRY OF THE SOLID STATE. Credit will not be given for both CHEM 502 and CHEM 410.

CHEM 503 (3) EQUILIBRIUM STATISTICAL MECHANICS IN CHEMISTRY. Introductory principles of Statistical Mechanics with illustrations of chemical importance. Applications to molecular gases, liquids, solids, independent particle statistics, electric and magnetic moments, radiation, chemical equilibrium and reaction rates. Credit will not be given for CHEM 407/CHEM 503 and PHYS 455.

CHEM 504 (3) RELAXATION PHENOMENA IN CHEMISTRY. Microscopic description of relaxation processes. Introduction to stochastic processes, quantum time dependence and linear response theory, with application to chemical kinetics, NMR, lasers and line shapes.

CHEM 507 (3/6) D TOPICS IN PHYSICAL AND THEORETICAL CHEMISTRY.

CHEM 508 (3) CHEMICAL KINETICS AND REACTION DYNAMICS. Macroscopic and microscopic kinetics; transition state theory; collision theory and reaction cross section, energy distributions, molecular beams and experimental techniques. Credit will not be given for both CHEM 408 and CHEM 508.

CHEM 509 (3) ELECTRON AND PHOTON IMPACT PHENOMENA. Basic aspects of collision phenomena. Mass spectroscopy, UV and X-ray photoelectron spectroscopy, Auger spectroscopy, electron scattering, electron impact spectroscopy, breakdown of molecules under particle and photon impact, Penning ionization.

CHEM 510 (3) ADVANCED ELECTRONIC STRUCTURE THEORY.

CHEM 511 (3) NUCLEAR DECAY PROBES IN CHEMISTRY.

CHEM 512 (3) RADIATION CHEMISTRY. The study of the interactions of ionizing radiations (and high energy particles) with matter to

produce physical, chemical and biological changes, including a discussion of solvated electrons.

CHEM 513 (3) SURFACE CHEMISTRY. Chemistry of the solid-gas interface: Modern methods for investigation of the structure of solid surfaces and interactions between solid surfaces and gases. Theory of adsorption, surface reactivity and heterogeneous catalysis.

CHEM 514 (3) CRYSTAL STRUCTURES. Crystal structures and structural analysis by the methods of X-ray diffraction and neutron diffraction. Credit will not be given for both CHEM 402 and CHEM 514.

CHEM 516 (3/6) D TOPICS IN BIOPHYSICAL CHEMISTRY.

CHEM 517 (3) ELECTROCHEMISTRY.

CHEM 518 (3/6) D TOPICS IN MAGNETIC RESONANCE.

CHEM 519 (3/6) D TOPICS IN MOLECULAR SPECTROSCOPY.

CHEM 521 (3/6) D TOPICS IN INORGANIC CHEMISTRY.

CHEM 522 (3) INORGANIC REACTION MECHANISMS. Substitution reactions and electron transfer processes in inorganic and organometallic chemistry. Catalytic processes involving metal hydrides, carbonyls, and organometallics. Proton transfer reactions. Photochemical reactions of metal complexes.

CHEM 523 (3) APPLIED INORGANIC CHEMISTRY. Topics chosen from: superconductors, batteries, fuel cells, metal organic chemical vapour deposition, inorganic polymers, laser isotope separation, nuclear fuels, environmental concerns.

CHEM 524 (3) CHEMISTRY OF ORGANOMETALLIC COMPOUNDS. Credit will not be given for both CHEM 418 and CHEM 524

CHEM 525 (3) ADVANCED COORDINATION CHEMISTRY. Credit will not be given for both CHEM 525 and CHEM 414.

CHEM 526 (3) BIOINORGANIC CHEMISTRY. Inorganic aspects of biological chemistry; emphasis on the role of metal ions and metalloenzymes. Credit will not be given for both CHEM 526 and CHEM 435.

CHEM 527 (3) MATERIALS CHEMISTRY. Credit will not be given for both CHEM 527 and CHEM 427.

CHEM 528 (3) SYMMETRY AND MOLECULAR SPECTROSCOPY IN INORGANIC CHEMISTRY. Group theory, and vibrational and electronic spectroscopy (including optical rotatory dispersion and circular dichroism).

CHEM 529 (3) STRUCTURAL METHODS IN INORGANIC CHEMISTRY. NMR, ESR, mass spectrometry, photoelectron spectroscopy (Auger, UV, X-Ray), Mossbauer spectroscopy, electrochemistry.

CHEM 531 (3) ANALYTICAL SPECTROSCOPY. Fundamental and practical aspects of optical methods for atomic and

molecular analysis: frequency and intensity measurements; absorption, fluorescence, and emission techniques and instrumentation.

CHEM 533 (3) BIOANALYTICAL CHEMISTRY.

CHEM 534 (3) CHROMATOGRAPHY AND MASS SPECTROMETRY. Gas, liquid and supercritical fluid chromatography. Mass spectrometry: ionization processes, mass analyses, ion molecule reactions, fragmentation processes.

CHEM 535 (3/6) D TOPICS IN ANALYTICAL CHEMISTRY.

CHEM 540 (3) SEMINAR IN CHEMISTRY.

This course is compulsory for all graduate students in Chemistry.

CHEM 548 (0) RESEARCH CONFERENCE.

Attendance is compulsory for all graduate students in each year of registration for the M.Sc. or Ph.D. in chemistry. No credit value.

CHEM 549 (18) M.SC. THESIS.

CHEM 561 (3) ORGANIC CHEMISTRY.

Fundamentals of reactivity and stereoselectivity, including stereoelectronic theory.

CHEM 562 (3) ADVANCED ORGANIC CHEMISTRY. Organic photochemistry, conformational analysis, stereochemistry of chiral substances.

CHEM 563 (3) ADVANCED PHYSICAL ORGANIC CHEMISTRY. Discussion of acidity functions, photochemistry and reactive intermediates in organic chemistry. Applications of molecular orbital theory to organic systems. Credit will not be given for both CHEM 563 and CHEM 416.

CHEM 566 (3) ADVANCED ORGANIC SYNTHESIS. Discussion of modern synthetic methods and applications to the synthesis of complex organic molecules. Credit will not be given for both CHEM 566 and CHEM 411.

CHEM 567 (3) HETEROCYCLIC CHEMISTRY. The synthesis, reactions and properties of the principal families of heterocyclic compounds.

CHEM 568 (3/6) D TOPICS IN ORGANIC CHEMISTRY.

CHEM 569 (3) ADVANCED MECHANISTIC ENZYMOLOGY. Credit will be given for only one of CHEM 569, CHEM 413, or BIOC 403.

CHEM 570 (3) CARBOHYDRATES. Synthesis, reactions and chemical properties of mono- and oligosaccharides; applications of these concepts to the study of polysaccharide structures.

CHEM 573 (3) APPLICATION OF SPECTROSCOPY TO ORGANIC STRUCTURAL DETERMINATIONS. A problem solving course to illustrate the application of NMR, mass spectrometry, ORD, CD, etc. to elucidation of structures of organic and organometallic compounds.

CHEM 649 (0) PH.D. THESIS.

CHIL — CHILDREN'S LITERATURE FACULTY OF ARTS

CHIL 599 (6) THESIS FOR MASTER OF ARTS IN CHILDREN'S LITERATURE.

CHIN — CHINESE FACULTY OF ARTS

CHIN 100 (3) NON-INTENSIVE BASIC

CHINESE I. An introduction to the grammar and syntax of spoken and written Chinese.

CHIN 101 (3) NON-INTENSIVE BASIC

CHINESE I. Continuation of CHIN 100.

CHIN 102 (6) INTENSIVE BASIC CHINESE I.

An introduction to the grammar and syntax of spoken and written Chinese. Non-heritage students should enrol in an alternative section. Consult the Department. Equivalency: CHIN 100ANDCHIN 101.

CHIN 110 (3) NON-INTENSIVE BASIC

CHINESE II. Prerequisite: One of CHIN 101, CHIN 102.

CHIN 111 (3) NON-INTENSIVE BASIC

CHINESE II. Continuation of CHIN 110. Prerequisite: CHIN 110.

CHIN 112 (6) INTENSIVE BASIC CHINESE II.

Continuation of CHIN 102. Non-heritage students should enrol in an alternative section. Consult the Department. Prerequisite: One of CHIN 101, CHIN 102. Equivalency: CHIN 110 and CHIN 111.

CHIN 200 (3) INTERMEDIATE CHINESE I A.

Further development of integrated reading, writing, listening, and speaking skills in modern Chinese at the intermediate level. *Please note: Section 003 reserved for non-heritage students.* Prerequisite: One of CHIN 111, CHIN 112.

CHIN 201 (3) INTERMEDIATE CHINESE I B.

Continuation of CHIN 200. Further development of integrated reading, writing, listening, and speaking skills in modern Chinese at the intermediate level. *Please note: Section 003 reserved for non-heritage students.* Prerequisite: CHIN 200.

CHIN 202 (6) INTENSIVE INTERMEDIATE

CHINESE I. Further development of integrated reading, writing, listening, and speaking skills in modern Chinese at the intermediate level. *Please note: Section 3 reserved for non-heritage students.* Prerequisite: One of CHIN 111, CHIN 112. Equivalency: CHIN 200, CHIN 201.

CHIN 210 (3) INTERMEDIATE CHINESE I A.

Continuation of CHIN 201 or 202. Further development of integrated reading, writing, listening, and speaking skills in modern Chinese at the intermediate level. *Please note: Section 003 reserved for non-heritage students.* Prerequisite: One of CHIN 201, CHIN 202.

CHIN 211 (3) INTERMEDIATE CHINESE II B.

Continuation of CHIN 210. Further development of integrated reading, writing, listening, and speaking skills in modern Chinese at the intermediate level. *Please note: Section 003 reserved for non-heritage students.* Prerequisite: CHIN 210.

CHIN 212 (6) INTENSIVE INTERMEDIATE

CHINESE II. Further development of integrated reading, writing, listening, and speaking skills in modern Chinese at the intermediate level. *Please note: Section 003 reserved for non-heritage students.* Prerequisite:

One of CHIN 201, CHIN 202. Equivalency: CHIN 210 and CHIN 211.

CHIN 220 (3) MANDARIN FOR CANTONESE SPEAKERS I.

Placement interview required.

CHIN 221 (3) MANDARIN FOR CANTONESE

SPEAKERS II. Continuation of CHIN 220. Prerequisite: CHIN 220.

CHIN 300 (3) ADVANCED MODERN

CHINESE. An advanced study of modern Chinese writings at the literary level, with emphasis on reading comprehension, analytical discussion, oral presentation, and essay writing. Prerequisite: either (a) CHIN 201 and CHIN 211 for heritage students, or (b) CHIN 202 and CHIN 212 for non-heritage students.

CHIN 301 (3) ADVANCED MODERN

CHINESE. Continuation of CHIN 300. Prerequisite: CHIN 300.

CHIN 302 (6) INTENSIVE ADVANCED

MODERN CHINESE. An advanced study of modern Chinese writings at the literary level, with emphasis on reading comprehension, analytical discussion, oral presentation, and essay writing. Summer equivalent to CHIN 300 and 301. Prerequisite: Either (a) CHIN 201 and CHIN 211 for heritage students; or (b) CHIN 202 and CHIN 212 for non-heritage students.

CHIN 310 (3) ADVANCED CHINESE

CONVERSATION, COMPREHENSION AND COMPOSITION. A course to help students gain greater mastery over the vernacular language through discussion, debate, and written comments on selected topics in Chinese culture and modern life. Prerequisite: Either (a) all of CHIN 201, CHIN 211 or (b) all of CHIN 202, CHIN 212 or (c) one of CHIN 301, CHIN 302.

CHIN 311 (3) ADVANCED CHINESE

CONVERSATION, COMPREHENSION AND COMPOSITION. Continuation of CHIN 310. Prerequisite: CHIN 310.

CHIN 312 (6) INTENSIVE ADVANCED

CHINESE CONVERSATION, COMPREHENSION AND COMPOSITION. A course to help students gain greater mastery over the vernacular language through discussion, debate, and written comments on selected topics in Chinese culture and modern life. Summer equivalent to CHIN 310 and 311. Prerequisite: Either (a) all of CHIN 201, CHIN 211 or (b) all of CHIN 202, CHIN 212 or (c) one of CHIN 301, CHIN 302.

CHIN 320 (3) READINGS IN TWENTIETH-

CENTURY CHINESE LITERATURE. For students who have acquired a good reading knowledge of modern Chinese before entering the University, or with instructor's approval. Prerequisite: Either (a) all of CHIN 301, CHIN 311 or (b) all of CHIN 302, CHIN 312.

CHIN 321 (3) READINGS IN TWENTIETH-

CENTURY CHINESE LITERATURE. Continuation of CHIN 320. Prerequisite: CHIN 320.

CHIN 322 (6) READINGS IN 20TH CENTURY

CHINESE LITERATURE. Summer equivalent to CHIN 320 and 321.

CHIN 330 (3) CLASSICAL CHINESE I.

An introduction to the grammar and syntax of

Classical Chinese. Students may not take CHIN 330, 331 or 332 after taking CHIN 430, 431 or 432. Prerequisite: Either (a) all of CHIN 201, CHIN 211 or (b) all of CHIN 202, CHIN 212 or instructor approval.

CHIN 331 (3) CLASSICAL CHINESE I. Continuation of CHIN 330. Prerequisite: CHIN 330.

CHIN 332 (6) CLASSICAL CHINESE II.

Summer equivalent to CHIN 330 and 331.

CHIN 340 (3) INTERNATIONAL BUSINESS

CHINESE I. Practical reading, writing, discussion and presentations.

CHIN 341 (3) INTERNATIONAL BUSINESS

CHINESE II. Business law, trade negotiation, contract, investment, shipment and custom declaration, sales and payment. Prerequisite: CHIN 340.

CHIN 380 (6) READING COURSE IN CHINESE FOR HONOURS STUDENTS.

CHIN 400 (3) MEDIA CHINESE I. Audiovisual and video materials, newspapers and TV news programs in Chinese.

CHIN 401 (3) MEDIA CHINESE II. Chinese language used in newspapers, radio and television broadcasts and the Internet. Prerequisite: CHIN 400.

CHIN 410 (3) ADVANCED READINGS IN

TWENTIETH-CENTURY CHINESE. Selected prose essays from 1917 to the present. Only for students who do not have a good reading knowledge of modern Chinese before entering University. Students may not take CHIN 410, 411 or 412 after taking CHIN 320, 321 or 322. Prerequisite: One of CHIN 301, CHIN 302. Completion of 60 credits is also required.

CHIN 411 (3) ADVANCED READINGS IN

TWENTIETH CENTURY CHINESE. Continuation of CHIN 410. Prerequisite: CHIN 410.

CHIN 412 (6) ADVANCED READINGS IN

TWENTIETH-CENTURY CHINESE. Summer equivalent to CHIN 410 and 411.

CHIN 420 (3) TWENTIETH-CENTURY CHINESE

LITERATURE I. Selected short stories, novels, plays, essays, and poems from 1917 to present. For students who have a good reading knowledge of modern Chinese. Students who have taken CHIN 420, 421 or 422 may not also earn credit from CHIN 410, 411, 412. Prerequisite: CHIN 321 and completion of 60 credits.

CHIN 421 (3) TWENTIETH-CENTURY CHINESE

LITERATURE II. Continuation of CHIN 420. Prerequisite: CHIN 420.

CHIN 422 (6) TWENTIETH-CENTURY CHINESE

LITERATURE. Selected short stories, novels, plays, essays, and poems from 1917 to the present. For students who have a good reading knowledge of modern Chinese. Prerequisite: completion of 60 credits.

CHIN 430 (3) CLASSICAL CHINESE II.

Advanced readings in Classical Chinese literary, historical, and philosophical texts. Prerequisite: One of CHIN 331, CHIN 332.

CHIN 431 (3) CLASSICAL CHINESE II.

Continuation of CHIN 430. Prerequisite: CHIN 430.

CHIN 432 (6) INTENSIVE CLASSICAL CHINESE II. Summer equivalent to CHIN 430 and 431. Prerequisite: One of CHIN 331, CHIN 332.

CHIN 440 (3) READINGS IN PRE-MODERN CHINESE LITERATURE I. Selected texts from pre-twentieth-century drama and fiction. For students who have acquired a good reading knowledge of modern Chinese before entering the University. Prerequisite: One of CHIN 331, CHIN 332.

CHIN 441 (3) READINGS IN PRE-MODERN CHINESE LITERATURE II. Continuation of CHIN 440. Prerequisite: CHIN 440.

CHIN 442 (6) READINGS IN PRE-MODERN CHINESE LITERATURE. Selected texts from pre-twentieth-century drama and fiction. For students who have acquired a good reading knowledge of modern Chinese before entering the University. Prerequisite: One of CHIN 331, CHIN 332.

CHIN 450 (3) PRE-MODERN CHINESE FICTION I. Explores the origins of fictional narrative in the classical language by reading Six Dynasties zhiguai and tan chuanqi narratives. Only for students who do not have a good reading knowledge of modern Chinese before entering the University. Prerequisite: One of CHIN 331, CHIN 332 or instructor approval.

CHIN 451 (3) PRE-MODERN CHINESE FICTION II. A continuation of CHIN 450, with emphasis on the emergence fictional narratives written in vernacular Chinese in the late imperial period. Only for students who do not have a good reading knowledge of modern Chinese before entering the University. Prerequisite: One of CHIN 331, CHIN 332 or instructor approval.

CHIN 452 (6) PRE-MODERN CHINESE FICTION. Summer equivalent to CHIN 450 and 451. Prerequisite: One of CHIN 331, CHIN 332.

CHIN 460 (3) READINGS IN CLASSICAL CHINESE POETRY I. Translation and analysis of selected works, especially from the pre-Han, North-South, and early Tang periods. Prerequisite: One of CHIN 331, CHIN 332 or instructor approval.

CHIN 461 (3) READINGS IN CLASSICAL CHINESE POETRY II. Continuation of CHIN 460. Prerequisite: CHIN 460.

CHIN 462 (6) READINGS IN CLASSICAL CHINESE POETRY I. Summer equivalent to CHIN 460 and 461. Prerequisite: One of CHIN 331, CHIN 332 or instructor approval.

CHIN 470 (3) READINGS IN CLASSICAL CHINESE POETRY II. Readings in classical poetry from the time of Du Fu (712–770) to the end of the Qing dynasty. Not offered every year. Prerequisite: One of CHIN 331, CHIN 332 or instructor approval.

CHIN 471 (3) READINGS IN CLASSICAL CHINESE POETRY II. Continuation of CHIN 470. Prerequisite: CHIN 470.

CHIN 472 (6) READINGS IN CLASSICAL CHINESE POETRY II. Readings in classical poetry from the time of Du Fu (712–770) to the end of the Qing dynasty. Not offered every year. Prerequisite: One of CHIN 331, CHIN 332.

CHIN 480 (12) TUTORIAL IN CHINESE FOR HONORS STUDENTS. Will require the presentation of at least one research paper.

CHIN 481 (6) READINGS IN CHINESE PHILOSOPHICAL TEXTS. Selected readings from primary texts in the history of Chinese thought exclusive of Buddhism. Not offered every year. Prerequisite: One of CHIN 331, CHIN 332 and all of ASIA 371, ASIA 372.

CHIN 482 (3–18) C SUPERVISED STUDY IN THE CHINESE LANGUAGE. Primarily for graduate students.

CHIN 491 (3) READINGS IN CLASSICAL CHINESE: THE COMMENTARIAL TRADITION. Conceptual and linguistic aspects of the commentarial tradition from the Han to Qing dynasties, including strategies of interpretation and commentary-specific conventions and grammar. Prerequisite: CHIN 331.

CICS — COMPUTING INFORMATION AND COGNITIVE SYSTEMS FACULTY OF GRADUATE STUDIES

CICS 500 (0) SOFTWARE SYSTEMS INTERNSHIP. Technological work experience in an approved company or organization for a four-month period. A required internship to be taken as part of the M.S.S. (Master of Software Systems) program. Prerequisite: All of CICS 505, CICS 510, CICS 515, CICS 520, CICS 525.

CICS 505 (6) INTRODUCTION TO SOFTWARE SYSTEMS. Introductory overview: programming (data structures and low-level design); programming in the large (introduction to operating systems, concurrency); introduction to software engineering (system design and analysis, documentation).

CICS 510 (6) MODELS AND ANALYSIS OF SOFTWARE SYSTEMS. In depth study of selected models and analysis of software systems: software testing and its models; discrete mathematics; algorithm analysis and complexity.

CICS 515 (3) COMPUTER AND NETWORK ARCHITECTURE. The architecture of computer and network systems: hardware architectures; machine language; network architectures; communication protocols. Prerequisite: All of CICS 505, CICS 510.

CICS 520 (3) LANGUAGE TRANSLATION AND ANALYSIS. Programming language syntax, semantics and typing; database query language and functional languages; compilers interpreters and lexical analyzers; debugging and profiling. Prerequisite: All of CICS 505, CICS 510.

CICS 525 (3) REAL TIME SYSTEMS AND DESIGN. An in-depth study of real-time analysis and design; real-time systems and programming. Prerequisite: All of CICS 505, CICS 510.

CICS 526 (3) DISTRIBUTED SYSTEMS PROGRAMMING. A continuation of CICS 525. An in-depth study of distributed systems and analysis; distributed systems programming. Prerequisite: CICS 525.

CIVL — CIVIL ENGINEERING FACULTY OF APPLIED SCIENCE

CIVL 200 (3) ENGINEERING AND SUSTAINABLE DEVELOPMENT. Implications of a finite biosphere and the complexities inherent in environmental decision-making. [3-0-0]

CIVL 210 (4) SOIL MECHANICS I. Soil classification, principle of effective stress, analysis of seepage, filter criteria, introduction to shear strength and slope stability analysis. Prerequisite: One of CIVL 230, MECH 260. Corequisite: EOSC 210 and one of CIVL 215, MECH 280, EOSC 329. [3-2*-0]

CIVL 215 (4) FLUID MECHANICS I. Fluid properties, hydrostatics, kinematics, and fluid dynamics: energy and momentum methods with applications. Dimensional analysis, modelling, introduction to flow in pipes and forces on immersed objects. Prerequisite: PHYS 170 and one of MATH 101, MATH 154. [3-0-2]

CIVL 225 (3) COMPUTER APPLICATIONS IN CIVIL ENGINEERING. An introduction to spreadsheets, equation-solving software, and computer-aided graphic design tools used when solving civil engineering problems. Familiarity with micro-computers is essential. [1*-3-0]

CIVL 228 (3) MECHANICS IN CIVIL ENGINEERING DESIGN. Basic principles of engineering mechanics with reference to civil engineering problems: equilibrium of rigid elements of engineering systems, free body diagrams, analysis of trusses, shear and bending moments in beams, kinematics and kinetics of rigid bodies, single degree of freedom vibrations. Prerequisite: PHYS 170. [3-0-1]

CIVL 230 (4) SOLID MECHANICS I. Review of statics; beam forces, shear and moment diagrams; definitions of stress and strain; constitutive relations; stresses in elementary rods, shafts, beams and tanks; Mohr's circle; deformations of beams and shafts; introduction to indeterminate structures. Prerequisite: PHYS 170 and one of MATH 101, MATH 154. Corequisite: CIVL 228. [3-0-2]

CIVL 231 (3) STRUCTURAL MECHANICS AND DESIGN. Advanced beam bending; principal moments of inertia; plastic bending capacity; column buckling; beam columns; concepts of structural design, load and strength uncertainty; design of wood and steel members. Prerequisite: CIVL 230. [3-0-2*]

CIVL 235 (4) PLANE SURVEYING. Theory and application of plane surveying methods. Introduction to and use of compass, transit, tape, and level. Construction and topographic surveys. Reduction of field data and construction of drawings. Demonstration of modern instruments, remote sensing methods and geographical information systems (GIS). This course commences immediately after spring

examinations and continues full time for two weeks, including Saturdays. Information on the exact dates will be available in the Civil Engineering Office following publication of the final Examination Timetable.

CIVL 301 (3) OPTIMIZATION AND DECISION ANALYSIS IN CIVIL ENGINEERING. An introduction to the application of systems engineering, optimization, and applied probability to the design and operation of civil engineering systems. Prerequisite: CIVL 225. Corequisite: All of CIVL 200, STAT 251. [3-2*-0]

CIVL 311 (4) SOIL MECHANICS II. Consolidation and shear strength of soils, with application to settlement and stability analysis of embankments, retaining walls, shallow footing and pile foundations. Prerequisite: CIVL 210. [3-2*-0]

CIVL 315 (4) FLUID MECHANICS II. Two dimensional flow around immersed objects; velocity and pressure fields; lift and drag on cylinders and aerofoils; evaluation of wind loads on structures; pumps and turbines; analysis and design of pipeline systems; unsteady flow in pipes; frictionless waterhammer analysis. Prerequisite: CIVL 215. Corequisite: MATH 257. [3-2*-1]

CIVL 316 (4) HYDROLOGY AND OPEN CHANNEL FLOW. Introduction to engineering hydrology and open channel hydraulics; estimation of design discharge; flood statistics; nonuniform steady open channel flow; energy and momentum principles, backwater analysis; culvert and bridge hydraulics. Prerequisite: CIVL 215. [3-2*-1]

CIVL 320 (3) CIVIL ENGINEERING MATERIALS. The structure and properties of common Civil Engineering materials: aggregates, Portland cement, concrete, asphalt, timber and metals. The emphasis is on the relationship between the structure of materials and their mechanical properties. Prerequisite: All of APSC 278, APSC 279. [3-0-0]

CIVL 322 (3) PROJECT BASED LEARNING IN CIVIL ENGINEERING MATERIALS. Some topical problems will be identified and students in groups will carry out experiments to study the materials involved. Site visits, external consultations are an integral requirement. Prerequisite: CIVL 320. Corequisite: APSC 201. [1-3-0]

CIVL 331 (4) STEEL AND TIMBER DESIGN. Introduction to limit states design of steel and timber structures: material properties, design of tension and compression members, beams, columns, and connections. Prerequisite: CIVL 231. [3-0-2]

CIVL 332 (3) STRUCTURAL ANALYSIS. Introduction to indeterminate structural analysis; approximate analysis of structures; calculation of displacements using virtual work; flexibility (force) method; stiffness method for frames; moment distribution method. Prerequisite: All of CIVL 231, MATH 152. [3-0-2]

CIVL 340 (3) TRANSPORTATION ENGINEERING I. The analysis and design of the elements of transportation facilities in

development of transport technology; vehicle motion; vehicle/pavement interaction; elements of road design; principles of queuing and roadway capacity; rail transit performance and capacity analysis; economics as applied to transport. Corequisite: STAT 251. [3-0-0]

CIVL 400 (3) CONSTRUCTION ENGINEERING AND MANAGEMENT. Management of the firm: strategic planning; marketing; organizational structure and behaviour. Project delivery systems: traditional; construction management; turnkey; project management. Network planning methods. Activity planning, including construction methods selection. Estimating, bidding and bonding. Project control tools and procedures. Safety considerations and quality control. Prerequisite: Fourth-year standing. [3-0-0]

CIVL 402 (2) ENGINEERING LAW AND CONTRACTS IN CIVIL ENGINEERING. Aspects of law encountered in engineering, with emphasis on contracts and specifications. Contract documents; preparation of specifications; torts and independent contractor; companies and partnerships; mechanics liens; agency; evidence; expert witness; Engineers Act and Code of Ethics; industrial design and trade secrets; employment law; liability. Prerequisite: Fourth-year standing. [2-0-0]

CIVL 403 (3) ENGINEERING ECONOMIC ANALYSIS. The subjects of decision-making; hard and soft systems management; decision models, cost concepts and accounting, the time value of money; comparing options; depreciation and taxes; and public sector projects will be studied. Case studies will be presented. Prerequisite: CIVL 200. Fourth-year standing required. [3-0-0]

CIVL 405 (3) ENVIRONMENTAL IMPACT STUDIES. A course to familiarize the student with environmental impact assessment legislation and to discuss design and construction considerations useful in minimizing and mitigating such impacts. Prerequisite: CIVL 316. [3-0-0]

CIVL 406 (3) WATER TREATMENT AND WASTE MANAGEMENT. Processes used in water and wastewater treatment. Conditions which necessitate treatment of water or wastewater, water and wastewater treatment processes and plant design. Municipal services required and associated with solid waste management. Prerequisite: CIVL 315. [3-0-0]

CIVL 407 (3) ENVIRONMENTAL LABORATORY ANALYSIS. Testing procedures used in water quality studies and in the operation of water and wastewater treatment plants. Prerequisite: CHEM 154. [1-3-0]

CIVL 408 (3) GEO-ENVIRONMENTAL ENGINEERING. Site remediation technologies and design considerations related to mechanisms of soil-contaminant interaction, geochemistry and contamination, regulatory requirements. Design and performance case histories. Prerequisite: CIVL 210. [3-0-0]

CIVL 409 (3) DESIGN OF WATER SUPPLY AND WASTE CONVEYANCE SYSTEMS. Identification and evaluation of design solutions for providing a community with adequate water supply, collecting and disposing of stormwater and sewage, and managing excess stormwater flow. [3-0-1]

CIVL 410 (3) FOUNDATION ENGINEERING I. An introduction to the process of foundation engineering. Empirical and analytical approaches used in current professional practice. Topics include site investigation, preloading, liquefaction assessment, ground improvement, design of shallow and deep foundations, and retaining structures. The importance of geology and technical communication are emphasized. Prerequisite: CIVL 311. [3-0-0]

CIVL 411 (3) FOUNDATION ENGINEERING II. Aspects of Geotechnical Engineering. Design considerations illustrated by case histories pertinent to BC. Topics include: site investigation, terrain analyses, in situ testing, groundwater problems, deep foundations, tie back walls and bracing, tailings impoundments, Northern construction, ground ice, dikes and dams engineering. Many case histories presented in part by prominent consulting engineers in BC. Prerequisite: CIVL 311. [3-0-0]

CIVL 413 (3) DESIGN OF EARTH DAMS AND CONTAINMENT STRUCTURES. Purpose and types of dams; design criteria; construction sequence; compaction; seepage; filter design; factors influencing the design of earth dams; stability and deformation under static and earthquake loading; slope protection; field instrumentation. Prerequisite: CIVL 311. Fourth-year standing. [3-0-1]

CIVL 415 (3) WATER RESOURCE ENGINEERING. An introduction to the planning and design of water resource systems, stream systems, and municipal and hydropower engineering. Prerequisite: All of CIVL 316, STAT 251. [3-0-0]

CIVL 416 (3) ENVIRONMENTAL HYDRAULICS. Application of hydraulic engineering principles to problems of environmental concern. Pollutant transport and dispersion. Mixing in rivers and lakes. Theory of jets and plumes. Design of outfall diffusers. Prerequisite: All of CIVL 316, MATH 257. [3-0-0]

CIVL 417 (3) COASTAL ENGINEERING. General discussion of waves; linear wave theory; finite amplitude waves; standing waves; seiches; harbour design; wave shoaling, refraction and diffraction; beaches and coasts; wave statistics; wave generation; wave forces on piles, walls and breakwaters; tides; instrumentation and modelling techniques. Prerequisite: All of CIVL 315, CIVL 316, MATH 257. [3-0-0]

CIVL 418 (3) ENGINEERING HYDROLOGY.

Hydrologic processes – weather, precipitation, infiltration, evaporation, snowmelt and runoff generation. Emphasis on quantitative techniques including: hydrograph analysis, reservoir and channel routing, statistical methods and design floods, hydrologic modelling. Prerequisite: All of CIVL 315, CIVL 316. [3-0-0]

CIVL 420 (3) CONCRETE TECHNOLOGY.

Physical and chemical properties and microstructure of hydrated Portland cement; construction practices; modern use of industrial by-products such as fly ash, blast furnace slag, silica fume and metakaolin; use of chemical admixtures; environmental issues; properties of hardened concrete; issues in standardized and accelerated testing, non-destructive testing. Prerequisite: CIVL 320. [3-0-0]

CIVL 430 (3) DESIGN OF CONCRETE

STRUCTURES. Non-linear response of reinforced concrete members subjected to axial load, bending and shear; design of simple one-way members including beams, columns, slabs and footings. Prerequisite: CIVL 332. [3-0-1]

CIVL 432 (3) ADVANCED STRUCTURAL

STEEL DESIGN. Frame connections with high-strength bolts and welds, highway bridge loadings, composite beams of steel and concrete, welded steel plate girders. Prerequisite: All of CIVL 331, CIVL 332. [3-0-0]

CIVL 433 (3) ADVANCED CONCRETE

DESIGN. Design of continuous reinforced concrete building frames and structures. Prerequisite: CIVL 430. [3-0-0]

CIVL 435 (3) ADVANCED STRUCTURAL

ANALYSIS. The force method and example applications, shear walls; extension of displacement method, shear deformation, curved members; nonlinear effects, P-delta, buckling, elasto-plastic analysis. Introduction to the finite element method. Prerequisite: CIVL 436. [3-0-0]

CIVL 436 (3) MATRIX STRUCTURAL

ANALYSIS AND DYNAMICS. Further techniques in matrix structural analysis; non-rigid supports, temperature-shrinkage effects, computer implementation; matrix representation of structural dynamics; mode shapes, natural frequencies, continuous systems; lumped mass models, modal analysis, response spectra. Prerequisite: CIVL 332. [3-0-0]

CIVL 437 (3) STRUCTURAL DESIGN. Concept synthesis and evaluation for structural designs, approximate design and analysis techniques, detailed design and analysis. Prerequisite: Fourth-year standing. [3-0-1]

CIVL 439 (3) DESIGN OF TIMBER

STRUCTURES. Design of timber structural elements for light frame systems using limit states design principles with emphasis on load duration, stress grades, sawn and glued laminated members, deflection, elastic instability, combined loads, timber joints and fasteners. Credit will not be given for both CIVL 439 and WOOD 476. Prerequisite: One of CIVL 230, WOOD 376. Equivalency: WOOD 476. [2-0-2]

CIVL 440 (3) TRANSPORTATION

ENGINEERING II. Traffic operations and network analysis; traffic studies and data design; traffic stream flow and roadway analysis; weaving and interchange ramp analysis; intersection traffic control measures and control design; progressive signal system design; flows prediction; road network simulation and assignment algorithms; motor vehicle accident analysis; field exercises. Prerequisite: CIVL 340. [3-0-0]

CIVL 441 (3) TRANSPORTATION PLANNING

AND ANALYSIS. Transportation systems planning and analysis: data needs; surveys and analysis; sampling techniques; trip generation; trip distribution; modal choice; trip assignment; traffic impact studies; system evaluation. Prerequisite: CIVL 340. Fourth-year standing. [3-0-1]

CIVL 445 (3) ENGINEERING DESIGN AND

ANALYSIS. Students will be expected to either design and carry out an experimental project, or carry out a design project through the development of conceptual, preliminary and final design. Prerequisite: APSC 201 and fourth-year standing. [0-2-0; 0-4-0]

CIVL 478 (3) BUILDING SCIENCE.

Design of elements providing environmental separation in buildings to forces including heat transfer, air leakage, vapour diffusion. Prerequisite: Fourth-year standing. Equivalency: WOOD 478. [3-0-0]

CIVL 493 (3) CASE STUDIES OF

CONSTRUCTION METHODS. Identification and evaluation of solutions to construction site operation problems: the relationship between design and construction; factors affecting productivity and safety; measurement of on-site performance. Prerequisite: Fourth-year standing. [3-0-1]

CIVL 498 (1-6) D DIRECTED STUDIES.

Registration will take place on the first day of class by the Instructor.

CIVL 504 (2) SEISMICITY AND SEISMIC

DESIGN PARAMETERS. Causes of earthquakes. Fault mechanisms. Wave motions. Magnitudes and intensities. Regional seismicity and risk analysis. Attenuation of ground motion parameters with distance. Development of site specific ground motions. Selection of earthquake records and construction of design spectra.

CIVL 505 (2) SEISMIC RESPONSE OF

STRUCTURES. Response of structures to earthquakes; concept of ductility; development of seismic design codes. Hierarchy of analytical tools; quasi-static, modal, and nonlinear analyses. Modelling of structures. Soil-structure interaction.

CIVL 506 (2) SEISMIC DESIGN OF CONCRETE

STRUCTURES. Application of seismic design principles to the design of concrete structures with particular emphasis on building structures.

CIVL 507 (3) DYNAMICS OF STRUCTURES I.

Fundamental analysis of simple structures subjected to dynamic loadings; vibration problems in structures; linear and nonlinear structural response of simple systems;

numerical methods for practical vibration analysis.

CIVL 508 (3) DYNAMICS OF STRUCTURES II.

Dynamic response of discrete and continuous systems; structural property matrices and eigenvalue problem; introduction to random vibrations; wave propagation analysis; experimental techniques and computer modelling.

CIVL 510 (3) BEHAVIOUR OF STEEL

STRUCTURES. Elastic response; elastic limit; capacity design; non-elastic stability problems of members and frames; plastic design and analysis; connection design for ultimate loads.

CIVL 511 (3) ADVANCED TOPICS IN STEEL

STRUCTURES. Seismic design of steel buildings; composite design; welding of steel; corrosion protection; application of CAD in steel design.

CIVL 513 (3) CONCRETE STRUCTURES.

Response of prestressed and non-prestressed concrete elements and structures; comparison of analytical predictions and experimental results; simplified design procedures. [3-0-0]

CIVL 515 (3) BRIDGE DESIGN AND

CONSTRUCTION. Performance requirements, loads, conceptual and detailed design, approximate methods of analysis, erection methods, bridge and foundation types, case studies from recent designs.

CIVL 516 (3) BEHAVIOUR OF TIMBER

STRUCTURES. Design problems in timber structures; effects of size; environment; duration of load; connections.

CIVL 517 (3) ADVANCED TOPICS IN TIMBER

STRUCTURES. Behaviour of timber structural systems. Simulation of system response and structural reliability. Effect of quality controls.

CIVL 518 (3) RELIABILITY AND STRUCTURAL

SAFETY. Probability theory and random variables. Performance functions and probability of non-performance: simulations and FORM/SORM methods. Applications. System reliability. Time-dependent reliability and introduction to stochastic processes.

CIVL 520 (3) CONSTRUCTION PLANNING

AND CONTROL. Planning of civil engineering projects using networking techniques and time space methods. Treatment of resources and cash flow. Activity planning. Concepts of control at the project and activity levels.

CIVL 521 (3) CONSTRUCTION METHODS

AND PERFORMANCE. Case studies in construction methods and solutions to construction site operation problems. Construction productivity, performance measurement, safety, quality, and other production issues. [3-0-0]

CIVL 522 (3) PROJECT AND CONSTRUCTION

ECONOMICS. Application of the principles of engineering economics, economics and systems analysis techniques to the mathematical modeling of civil engineering projects. Topics treated: modeling of capital expenditures, revenues and operating expenditures, project financing, sensitivity analysis, risk analysis and management.

CIVL 523 (3) PROJECT MANAGEMENT FOR ENGINEERS. Perspectives of project management as it relates to civil engineering. Case studies are used to illustrate key issues.

CIVL 524 (3) LEGAL ASPECTS OF PROJECT AND CONSTRUCTION MANAGEMENT. Legal issues of construction contracts, bidding processes, negligence, insurance, bonding, liens, and labour law.

CIVL 525 (3) DEVELOPING COMPUTER APPLICATIONS FOR CIVIL ENGINEERING. Software analysis and design for civil engineers; overview of internet, databases, and programming languages.

CIVL 526 (3) 3D MODELING, COST ESTIMATING AND CONSTRUCTION PLANNING. Modeling the relationships between design, cost, and schedule information to manage and control construction. Conceptual and detailed estimating techniques; construction resources and productivity; CPM scheduling; value engineering and constructability analysis.

CIVL 527 (2) SPECIALIZED CONCRETES. Production, properties, durability and applications of various specialized concretes.

CIVL 528 (2) ADVANCED CONCRETE TECHNOLOGY. Pore structure, permeability and transport properties of concrete with and without mineral and chemical admixtures, damage modeling and application of linear and non-linear fracture mechanics, fiber reinforcement of concrete, strain-rate effects, fatigue and impact resistance, durability. Prerequisite: CIVL 420.

CIVL 529 (2) HIGH PERFORMANCE MATERIALS IN REPAIR AND REHABILITATION OF CIVIL INFRASTRUCTURE. High performance plain and fiber reinforced concrete and shotcrete, fibre reinforced polymer laminates, wraps, jackets and sprayed composites, types of repairs, analysis, case studies.

CIVL 535 (3) ELASTICITY. Kinematics of deformable bodies. Strain and stress tensors. Tensor transformations. Elastic constitutive laws. Orthotropy and isotropy. Energy theorems. Principles of virtual work. Stress waves. Introduction to plasticity and linear viscoelasticity. Credit given for only one of MECH 561 and CIVL 535.

CIVL 536 (3) PLASTICITY. Elastic-plastic strains, yield criteria, flow rules, limit theorems. Plastic collapse in frames and plates. Applications to beam bending, and axisymmetric problems. Linear viscoelasticity and viscoplasticity. Credit given for only one of MECH 568 or CIVL 536.

CIVL 537 (3) COMPUTATIONAL MECHANICS I. Numerical techniques, weighted residual methods, finite differences, finite elements. Formulations using energy principles, shape functions, conformity, stiffness and mass matrices. Consistent load vectors. Applications to linear problems. Numerical integration and equation solvers. Dynamic problems. Introduction to nonlinear problems.

CIVL 538 (3) COMPUTATIONAL MECHANICS II. Finite elements for geometrically nonlinear problems: Lagrangian and Eulerian formulations. Review of constitutive models: Finite elements for materially nonlinear problems. Incremental formulations. Iterative solution algorithms. Application to project type problems. Prerequisite: CIVL 537.

CIVL 539 (3) ADVANCED THEORY OF STRUCTURES. Topics in stiffness and flexibility analysis of frame structures; plastic behaviour; stability problems; P-Delta effects and buckling in columns and frames, lateral and torsional buckling. Introduction to plates and cylindrical shells. Buckling and plastic collapse in plates.

CIVL 540 (3) WAVES AND WAVE EFFECTS. Wave hydrodynamics: wave statistics and design wave selection; wave forces; wave effects on coastal and offshore structures.

CIVL 541 (3) ENVIRONMENTAL FLUID MECHANICS. Analysis of density stratified flows with application to water quality problems in inland and coastal waters.

CIVL 542 (3) PHYSICAL LIMNOLOGY. Physical processes that affect the behaviour of lakes, including reservoirs, water filled mine pits, mine tailings ponds and other standing water bodies. Impacts of these processes on water quality, and methods used in the rehabilitation of lakes.

CIVL 543 (3) TURBULENT FLUID DYNAMICS. Physical and mathematical models of turbulent flow suitable for engineering estimates and predictions.

CIVL 544 (3) COMPUTATIONAL OPEN CHANNEL HYDRAULICS. Overview of 1-D, 2-D, and 3-D fixed and mobile bed formulations. Application to flooding, river morphology, erosion and scour prediction. [3-0-0]

CIVL 545 (3) METHODS IN ENVIRONMENTAL FLUID MECHANICS. Data acquisition, pre- and post processing in the field, laboratory, and numerical modeling. Overview from experimental design to final presentation of results.

CIVL 546 (3) FLUVIAL HYDRAULICS. Hydraulics of flow in rivers. Sediment transport, flow resistance, river morphology, stable channel design, bank erosion and scour; effects of engineering works on river systems; river restoration.

CIVL 547 (2) ESTUARY HYDRAULICS. Estuary dynamics and estuary classification; the effect of engineering works on salinity intrusion; physics of estuary pollution and the use of computer and hydraulic models.

CIVL 548 (3) NUMERICAL MODELLING OF SURFACE WATER QUALITY. Development and application of water quality models for lakes, rivers, estuaries, and reservoirs. Derivation of differential equations of pollutant transport; kinetic relationships for physical and chemical transformation of substances; numerical and analytical solutions to transport equations; calibration and verification.

CIVL 551 (2) ADVANCED HYDROLOGY. Modelling hydrologic runoff processes. Flow forecasting models for mountain watersheds. Estimation of design rainfall and snowmelt.

CIVL 555 (3) ANALYSIS OF CIVIL ENGINEERING SYSTEMS. Concepts and techniques of operations research, decision analysis, and systems engineering applicable to water resources transportation engineering, and construction management.

CIVL 557 (2) TOXIC AND HAZARDOUS WASTE TREATMENT AND DISPOSAL. Environmental impact of disposal of toxic and hazardous wastes. Treatment technology for detoxification. Landfill disposal and self attenuation in landfills and underlying soils. Incineration of municipal wastes.

CIVL 558 (2) WATER RESOURCES INFRASTRUCTURE. Case history studies of local infrastructure used for controlling and utilizing water, including hydroelectric projects, developments on alluvial fans and floodplains and management of transportation corridors. Emphasis on engineering and environmental aspects.

CIVL 559 (2) ADVANCED WATER AND WASTEWATER TREATMENT TECHNOLOGY. Processes for removing and mitigating impurities that are not effectively removed in conventional water and waste treatment practice; investigation of disposal practices that make use of the impurities as a resource. Prerequisite: One of CIVL 565, CIVL 569 and equivalent background experience.

CIVL 560 (3) SANITARY ENGINEERING DESIGN. Design problems in water and sewage treatment, with emphasis on the hydraulic and sanitary engineering considerations.

CIVL 561 (3) INVESTIGATION, RISK ASSESSMENT AND MANAGEMENT OF CHEMICALS IN GEO-ENVIRONMENT. Sampling, investigations, fate and transport of chemicals in soil, water, sediment, biota and air; exposure pathways assessment and toxicological principles for receptors; risk-based approach to site remediation, treatment and control technologies.

CIVL 562 (3) ENVIRONMENTAL CONTAMINANT ANALYSIS LABORATORY. An advanced laboratory course to familiarize the student with environmental engineering laboratory procedures, instrumental analysis, sampling techniques and data analysis. Prerequisite: One of CIVL 407, CHBE 364.

CIVL 563 (3) UNIT OPERATIONS AND UNIT PROCESSES IN SANITARY ENGINEERING. Laboratory classroom and field assessments of sanitary engineering operations and processes. Prerequisite: CIVL 569.

CIVL 564 (2) ENGINEERING MANAGEMENT OF SOLID WASTES. Characteristics of solid wastes; introduction to solid waste collection, treatment and disposal. Evaluation of current practice and analysis of future potential of landfills, composting, combined treatment, recycle and re-use.

CIVL 565 (3) PHYSICAL-CHEMICAL TREATMENT PROCESSES. Development of the principles of selected physical and chemical treatment unit operations. Applications in both water and wastewater treatment.

CIVL 566 (2) TRANSPORT AND MIXING OF POLLUTANTS IN AQUATIC SYSTEMS. Mixing and dispersion of pollutants in inland and coastal waters. Pollutants associated with pulp mills, waste treatment plants, mining operations and other sources. Natural processes (physical, chemical and biological) affecting the ultimate fate and impact of these pollutants. Corequisite: CIVL 416.

CIVL 567 (2) WATER POLLUTION CONTROL ENGINEERING. Industrial waste survey and design problems. Appraisal and analysis of existing water quality management systems. Water quality and effluent standards.

CIVL 568 (2) WATER POLLUTION ENGINEERING AND ITS ECOLOGICAL IMPACT. The chemical and biological processes involved in the cycling, transformations and distribution of inorganic compounds (nitrogen, phosphorus, sulphur and trace metals) and organic compounds (pesticides, hydrocarbons and detergents) in polluted water environments. Prerequisite: One of ZOO 404, CIVL 567. Permission of instructor is also acceptable.

CIVL 569 (4) BIOLOGICAL WASTEWATER TREATMENT. Development of the principles of secondary, biological treatment processes, with application to both municipal and industrial wastewater treatment. Discussion of different treatment methodology, incorporating both aerobic and anaerobic microbiological processes. Prerequisite: MICB 400.

CIVL 570 (3) SOIL MECHANICS. Soil composition and geological factors affecting engineering properties, stress and strain at a point, principle of effective stress, stress-strain relations; theories of primary and secondary consolidation, settlement; shear testing equipment, stress-strain and strength behaviour of soil under static and dynamic loading. Prerequisite: CIVL 311.

CIVL 572 (3) ENVIRONMENTAL GEOTECHNIQUE. Physical-Chemical properties of clays, chemical effects on soils, site investigation for chemical sensitivity, contaminant fate and transport, environmental regulations, in-situ and laboratory tests; design of dewatering, containment, remediation systems including slurry/reactive walls, liners, covers. Case studies.

CIVL 573 (2) NUMERICAL METHODS IN SOIL MECHANICS. Application to geotechnical problems including stress, seepage, consolidation, and risk.

CIVL 574 (3) EXPERIMENTAL SOIL MECHANICS. Experimental studies of advanced aspects of soil behaviour; compressibility; shear strength; pore water pressure; dynamic tests; advanced instrumentation and measurement techniques; research reports required. Prerequisite: CIVL 570.

CIVL 575 (2) CONSTITUTIVE MODELS FOR SOIL. Non-linear elasticity; plasticity models including CamClay, UBC Sand and NorSand; applicability of models to specific engineering problems.

CIVL 577 (3) SOIL EXPLORATION FOR ENGINEERING DESIGN. Advanced methods of subsurface investigation; determination of stratigraphy and engineering properties by in-situ testing. Emphasis on field work and interpretation of results. Prerequisite: CIVL 570.

CIVL 579 (2) GEOSYNTHETICS. Material properties; standard tests data; soil-geosynthetic interaction; design of reinforced soil structures (walls, slopes, embankments); design of filtration and drainage works; design of geomembrane-lined waste containment facilities; regulatory requirements; case history applications. Prerequisite: CIVL 311.

CIVL 581 (3) SOIL DYNAMICS. Seismic loading and its effect on earth structures; dynamic response of single, and multi-degree of freedom systems and continuous systems; behaviour of soil under dynamic loading; pore pressure generation and liquefaction effects; seismicity and seismic design parameters; dynamic analysis of earth structures; seismic design of soil-structure systems. Prerequisite: CIVL 570.

CIVL 582 (3) TRANSPORTATION ENGINEERING IMPACTS. Methods to measure, predict and evaluate impacts of transportation modes. Discussion of measures to reduce impacts.

CIVL 583 (3) URBAN ENGINEERING METHODS AND MODELS. The application of urban analysis methods and models to the design of municipal and transportation engineering systems.

CIVL 584 (3) APPLICATIONS OF ADVANCED COMPUTER TECHNIQUES IN CIVIL ENGINEERING. Applications of artificial intelligence, neural networks, fuzzy logic and computer simulation to civil engineering problems involving uncertainty.

CIVL 586 (3) URBAN TRANSPORTATION SYSTEM ANALYSIS. Development and use of urban transportation models, including travel generation models, distribution models, mode choice models and system evaluation.

CIVL 589 (3) TRAFFIC FLOW THEORY. A discussion of the various traffic flow distribution models, gap acceptance, queuing processes, traffic flow simulation with applications to intersection design, signal system design and control of urban freeways. [3-0-0]

CIVL 595 (0) GRADUATING PAPER.

CIVL 596 (2-6) D PROJECT IN CIVIL ENGINEERING. For M.Eng. students only.

CIVL 597 (1) SEMINAR. Presentations and discussions of current research topics in various disciplines of Civil Engineering.

CIVL 598 (1-6) D TOPICS IN CIVIL ENGINEERING.

CIVL 599 (6-12) C M.A.SC. THESIS.

CIVL 699 (0) THESIS. For the Ph.D.

CLST — CLASSICAL STUDIES FACULTY OF ARTS

Not all courses are offered every year. For current listings, consult the departmental website at: www.cnrs.ubc.ca.

CLST 100 (6) INTRODUCTION TO CLASSICAL CIVILIZATION. The history, literature, art, and architecture of fifth-century Athens and first-century Rome. Pertinent readings in translation and modern texts.

CLST 101 (3) AN INTRODUCTION TO ANCIENT GREEK AND ROMAN LITERATURE. Selections from poetry, prose, and drama of Greek and Roman authors.

CLST 102 (3) AN INTRODUCTION TO ANCIENT GREEK AND ROMAN HISTORY AND ARCHAEOLOGY. Selections from the Greek and Roman historians and an introduction to Greek and Roman art and archaeology.

CLST 204 (3) INTRODUCTION TO CLASSICAL AND NEAR EASTERN ARCHAEOLOGY. A selective survey of the material cultures of the Near East, pre-classical and classical civilizations of the Mediterranean to illustrate archaeological history, principles, aims, and techniques.

CLST 211 (3) GREEK PHILOSOPHY I. The Presocratics; Socrates; Sophists. Recommended as preparation for CLST/PHIL 212, CLST 336, 337 and PHIL 310. Equivalency: PHIL 211.

CLST 212 (3) GREEK PHILOSOPHY II. Aristotle; selections from Hellenistic Philosophy. Recommended as preparation for CLST 336, 337 and PHIL 310. Equivalency: PHIL 212.

CLST 301 (3) THE TECHNICAL TERMS OF MEDICINE AND BIOLOGICAL SCIENCE. Acquaints the student with the Greek and Latin elements from which most specialized terms of modern medicine are constructed. Intended primarily for students planning to enter the medical, pharmaceutical, or biological sciences.

CLST 305 (6) CLASSICAL MYTH AND RELIGION. The major cycles of Greek and Roman myth; their association with religion, cult, and society.

CLST 306 (3) APPLIED SCIENCE AND TECHNOLOGY IN CLASSICAL ANTIQUITY. The origins and achievements of applied technology in the Greek and Roman world from the Bronze Age to late Antiquity, with special attention to archaeological evidence.

CLST 307 (3) GREEK LAW. The study of Greek legal theory, practice, and institutions from their origin in self-help, through the early lawgivers and their codes, to the developed system of Athens in the fifth and fourth centuries. A variety of test cases from the works of the Greek orators will be explored.

CLST 308 (3) ROMAN LAW. The development of Roman private law during the classical period with special attention to family law, contract and delict.

CLST 310 (6) GREEK AND ROMAN LITERATURE. A study, through selected readings in translation, of the range and variety of literary forms invented and developed by the Greeks and Romans from Homer to Apuleius.

CLST 311 (3) WOMEN IN THE BRONZE AGE, CLASSICAL GREEK AND HELLENISTIC CULTURES. The images projected in mythology, literature, and art are compared with realities of women's lives insofar as they can be reconstructed from historical, legal, and archaeological records.

CLST 312 (3) WOMEN IN THE ROMAN WORLD OF REPUBLICAN AND IMPERIAL TIMES. Women in the Roman world in the culture of the Republic and the Empire. Literary, artistic, and mythological sources are compared and contrasted to historical, legal, and archaeological records.

CLST 313 (3) GREEK EPIC. Homer's *Iliad* and *Odyssey*. In translation.

CLST 314 (3) LATIN EPIC. A survey of the development of the epic genre in Latin, with detailed study of Vergil's *Aeneid*, Ovid's *Metamorphoses*, and Lucan's *Civil War*.

CLST 315 (3) ANCIENT PROSE FICTION. A survey of the development of the ancient novel, in Greek and Latin, with particular study of Petronius' *Satyricon* and Apuleius' *The Golden Ass*.

CLST 317 (3) CLASSICAL TRAGEDY. The plays of the Greek and Roman tragic dramatists. In translation.

CLST 318 (3) CLASSICAL COMEDY. The plays of the Greek and Roman comic dramatists: Aristophanes, Menander, Plautus and Terence. In translation.

CLST 330 (6) GREEK AND ROMAN ART. A study of the achievements of the Greeks and Romans in art and architecture from the Bronze Age to the reign of Constantine. Credit will be granted to only one of CLST 330 or ARTH.

CLST 331 (6) ANCIENT HISTORY. The rise of the Greek city-states; special emphasis on the political, economic, and cultural achievements of the fifth and fourth centuries BC; the growth of Rome and the development of her political institutions during the Republic; the social and economic history of the Empire; the transition from the classical to the medieval world.

CLST 333 (3) GREEK RELIGION.

CLST 334 (3) ROMAN RELIGION.

CLST 335 (6) SUMMER PRACTICUM IN CLASSICAL ARCHAEOLOGY. Practical training in excavation techniques and interpretation, including survey and mapping procedures, recording, drawing and analysis of artifacts, and study of comparative material. Students will participate in the excavation of a Greek or Roman site in Europe or the Middle East for the Summer Session. The course will include lectures and field-excursions relevant to the region and period of the site.

CLST 351 (3) DARK AGE AND ARCHAIC GREECE.

CLST 352 (3) THE ROMAN REPUBLIC. Rome from the foundation to the Augustan settlement. Constitutional development; the workings and failure of the Republican political system; acquisition and growth of Empire; the political, social, and economic consequences of imperialism. Prerequisite: CLST 331. Permission of the instructor is also acceptable.

CLST 353 (3) THE EARLY ROMAN EMPIRE. Roman imperial history during the Julio-Claudian and Flavian periods (30 BC–96 AD). Prerequisite: CLST 331. Permission of the instructor is also acceptable.

CLST 354 (3) THE LATER ROMAN EMPIRE. Roman history of the high and later Empire (from AD 96 to the end of the fourth century); the development of Christianity and the problem of church and state. Prerequisite: CLST 331. Permission of the instructor is also acceptable.

CLST 355 (3) THE ATHENIANS AND THEIR EMPIRE. The sources (literary, epigraphical and other) for Athens' emergence as one of the two leading city-states in late archaic and classical Greece and the stages by which her empire grew. Prerequisite: CLST 331. Permission of the instructor is also acceptable.

CLST 356 (3) ALEXANDER THE GREAT AND HIS EMPIRE. The rise of Macedon under Philip II leading to its domination of Greece and the overthrow of the Persian Empire by his son, Alexander; the subsequent spread of Greek civilization in the East. Prerequisite: CLST 331. Permission of the instructor is also acceptable.

CLST 360 (3–12) D LIFE AND SOCIETY IN CLASSICAL ANTIQUITY. Topics in Greek and Roman life and society.

CLST 429 (3/6) D STUDIES IN THE ART AND ARCHAEOLOGY OF GREECE AND ROME. Credit will be granted to only one of CLST 429 or ARTH.

CLST 430 (3) TOPOGRAPHY AND MONUMENTS OF ANCIENT ATHENS. A study of the ancient city with special attention to the archaeological sources. Prerequisite: One of CLST 330, ARTH 329, FINA 329.

CLST 431 (3) TOPOGRAPHY AND MONUMENTS OF ANCIENT ROME. A study of the ancient city with special attention to the archaeological sources. Prerequisite: One of CLST 330, FINA 329. Permission of the instructor is also acceptable.

CLST 449 (6) HONOURS ESSAY.

CLST 501 (3) TOPOGRAPHY AND MONUMENTS OF ATHENS. A study of the topography and monuments of ancient Athens from the Bronze Age to Late Antiquity. Offered in the first term of alternate years.

CLST 502 (3) TOPOGRAPHY AND MONUMENTS OF ROME. A study of the topography and monuments of ancient Rome from the Iron Age to Late Antiquity. Offered in the second term of alternate years.

CLST 503 (3/6) D STUDIES IN GREEK ARCHITECTURE. Selected topics in Greek architecture, e.g., religious, secular, and military architecture.

CLST 504 (3/6) D STUDIES IN ROMAN ARCHITECTURE. Selected topics in Roman architecture, e.g., religious, military, domestic, and public secular architecture.

CLST 505 (3/6) D STUDIES IN GREEK TOWN PLANNING. The development of Greek town planning from the Bronze Age to the Hellenistic period.

CLST 506 (3/6) D STUDIES IN ROMAN TOWN PLANNING. The origins of town planning in Italy and the development of cities in the Roman Empire.

CLST 508 (3/6) D STUDIES IN ROMAN PAINTING AND MOSAICS. Selected topics in Roman painting and mosaics, e.g., Campanian wall painting, regional styles of mosaic decoration.

CLST 509 (3/6) D STUDIES IN GREEK SCULPTURE. Selected topics in Greek sculpture, e.g., development of kouros and kore, Hellenistic sculpture, sculpture of fifth-century Athens.

CLST 510 (3/6) D STUDIES IN ROMAN SCULPTURE. Selected topics in Roman sculpture, e.g., imperial relief sculpture, portraiture, regional styles.

CLST 511 (3/6) D STUDIES IN GREEK REGIONAL ARCHAEOLOGY. Study of a particular area, e.g., Ionia, Sicily, Southern Italy.

CLST 512 (3/6) D STUDIES IN ROMAN PROVINCIAL ARCHAEOLOGY. Study of a particular area, e.g., Gaul, Britain, Asia Minor.

CLST 513 (3/6) D THE ARCHAEOLOGY OF GREEK AND ROMAN TECHNOLOGY. Material evidence for the technological achievements of the Greek and Roman world.

CLST 514 (3/6) D GREEK AND ROMAN MINOR ARTS. Minor arts of the Greek and Roman world, e.g., coins, jewelry, terracottas.

CLST 516 (3) D STUDIES IN GREEK BLACK-FIGURE VASE-PAINTING. Selected topics in Greek painting, e.g., Athenian vase painting, regional styles of vase painting, Hellenistic painting.

CLST 517 (3) D STUDIES IN GREEK RED-FIGURE VASE-PAINTING. Selected topics in Greek painting, e.g., Athenian vase painting, regional styles of vase painting, Hellenistic painting.

CLST 518 (3/6) D TOPICS IN GREEK ARCHAEOLOGY.

CLST 519 (3/6) D TOPICS IN ROMAN ARCHAEOLOGY.

CLST 520 (3/6) D DIRECTED STUDIES IN GREEK ARCHAEOLOGY.

CLST 521 (3/6) D DIRECTED STUDIES IN ROMAN ARCHAEOLOGY.

CLST 547 (3) GUIDED RESEARCH.

CLST 548 (0) MAJOR ESSAY.

**CNPS — COUNSELLING PSYCHOLOGY
FACULTY OF EDUCATION**

CNPS 312 (3) CAREER EDUCATION FOR TEACHERS. Introduction to career education practices and standards program content, and principles for the design of career education programs. [3-0]

CNPS 362 (3) BASIC INTERVIEWING SKILLS. Development of basic interviewing skills for counselling and guidance. [3-3]

CNPS 363 (3) CAREER COUNSELLING. Critical survey of career counselling theory and practice. [3-0]

CNPS 364 (3) FAMILY EDUCATION AND CONSULTATION. Examination of current theories and practices in family education and consultation. [3-0]

CNPS 365 (3) INTRODUCTION TO THEORIES OF COUNSELLING. An overview of selected theories of counselling. [3-0]

CNPS 426 (6) THE ROLE OF THE TEACHER IN GUIDANCE. This course is designed to assist the teacher in understanding and using guidance techniques for day-to-day use in the classroom. The emphasis will be on techniques for working with people towards better self-understanding and better perspectives of alternatives. [2-1; 2-1]

CNPS 427 (3) GUIDANCE: PLANNING AND DECISION-MAKING. The work of the beginning counsellor and guidance worker in assisting students with educational, vocational, and personal planning and decision-making. [3-0]

CNPS 433 (3) THE PERSONAL AND SOCIAL DEVELOPMENT OF THE ADULT. Personal and social adjustment issues for professional counsellors; basic skills necessary for effective group counselling. [3-3]

CNPS 504 (3) ELEMENTARY SCHOOL COUNSELLING. Theory and practice of elementary school counselling.

CNPS 508 (3-12) C REVIEW OF RESEARCH IN EDUCATIONAL METHODS. Studies are made of recent research bearing on educational practice. Prerequisite: Appropriate senior undergraduate introductory or methods course.

CNPS 514 (3) COUNSELLING ADOLESCENTS. Theory, research, and practice of counselling adolescents.

CNPS 523 (3) COUNSELLING THEORY AND THE EDUCATION OF DEAF AND HARD OF HEARING STUDENTS. The impact of hearing loss considered from a developmental and family systems perspective; counselling strategies. [3-0]

CNPS 524 (3) COUNSELLING ADULTS. Major issues and problems of adult development. Selection of appropriate counselling interventions for use in education and other counselling settings.

CNPS 531 (3) INTERVIEW AND NON-STANDARDIZED MEASURES IN COUNSELLING. Theoretical assumptions in the use of non-standardized appraisal techniques.

CNPS 532 (3/6) D PSYCHOLOGICAL ASSESSMENT IN COUNSELLING. The use of standardized measures of mental ability, achievement, aptitude, interest and personality.

CNPS 534 (3) GENDER AND SEX ROLE ISSUES IN COUNSELLING. Theory, research, and practice in the area of gender and sex role issues related to counselling.

CNPS 544 (3) FAMILY COUNSELLING I. Counselling approaches as applied to the family, in educational and other counselling settings.

CNPS 545 (3) FAMILY COUNSELLING—INTERVENTIONS AND RESEARCH. Main theoretical and therapeutic approaches of contemporary family counselling with emphasis on intervention and critical research issues in educational and other counselling settings.

CNPS 551 (3-6) D SCHOOL-BASED CONSULTATION. Equivalency: EPSE 551.

CNPS 561 (3-12) C LABORATORY PRACTICUM.

CNPS 564 (3) GROUP COUNSELLING. Understanding, designing and knowledge of groups and how to conduct them for use in counselling and guidance services.

CNPS 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD. Courses in various subject matter fields designed to bring teachers up to date in recent findings in each field.

CNPS 566 (3) ADVANCED STUDY IN GROUP COUNSELLING. Prerequisite: CNPS 564.

CNPS 574 (3) CAREER PLANNING AND DECISION-MAKING COUNSELLING. Theory, research, and practice of career planning and decision counselling. Prerequisite: CNPS 363.

CNPS 578 (3/6) C INDIVIDUAL AND FAMILY COUNSELLING THEORIES AND INTERVENTIONS. Major counselling theories, interventions for change and corresponding skill development. Prerequisite: All of CNPS 362, CNPS 365.

CNPS 579 (3) RESEARCH IN COUNSELLING PSYCHOLOGY. Assumptions and methods of major research paradigms. Prerequisite: One of EDUC 500, EPSE 481 and one of EPSE 482, EPSE 483.

CNPS 580 (3-12) C PROBLEMS IN EDUCATION. Investigation and report of a problem.

CNPS 584 (3) PROGRAM DEVELOPMENT AND PROFESSIONAL PRACTICE IN COUNSELLING. Designing, implementing and assessing counselling programs in schools, colleges, universities, and other counselling settings. Prerequisite: One of EDUC 500, EPSE 481 and one of EPSE 482, EPSE 483.

CNPS 586 (3) ETHICS IN COUNSELLING PSYCHOLOGY. Ethical decision-making and legal issues in counselling psychology research and practice.

CNPS 587 (1-3) D HISTORY AND SYSTEMS OF PSYCHOLOGY.

CNPS 588 (3-12) C SUPERVISED TRAINING IN COUNSELLING. Initial counselling experience under faculty supervision in department training centres.

CNPS 594 (3) CROSS-CULTURAL COUNSELLING. Critical analysis of cross-cultural counselling theory, research and practice.

CNPS 595 (3) STRESS, COPING AND ADAPTATION. Theories, research, and applications of psychosocial stress and coping processes, with a particular focus on counselling issues and contexts.

CNPS 598 (3/12) C FIELD EXPERIENCES. For those on Master's program. Pass/Fail.

CNPS 599 (6/12) C MASTER'S THESIS.

CNPS 601 (6/12) C DOCTORAL SEMINAR.

CNPS 632 (3) ADVANCED ASSESSMENT. Counselling psychology research and practice in adult personality assessment, including ethics of testing and use with special populations. Prerequisite: One of PSYC 303, EPSE 528 and CNPS 532.

CNPS 669 (3/6) D RESEARCH APPROACHES IN COUNSELLING PSYCHOLOGY.

CNPS 677 (3) THEORIES OF VOCATIONAL DEVELOPMENT. Sociological and psychological aspects of career planning, theories of vocational development, vocational choice.

CNPS 678 (3/6) D THEORETICAL PERSPECTIVES IN COUNSELLING PSYCHOLOGY. Major theoretical traditions in Counselling Psychology and illustration of the links among theory, research and practices; perspectives on Counselling Psychology as a distinct field of specialization.

CNPS 679 (3) INFORMATION SYSTEMS IN GUIDANCE AND COUNSELLING. The application of automatic data processing to guidance and counselling in student accounting, job placement, information dissemination and in interviewing. Prerequisite: A course in Computer Science.

CNPS 688 (6) SUPERVISION OF COUNSELLING PRACTICE. Supervision requires both knowledge of supervision models and practices, and skills to implement them. This course involves a seminar and practicum to integrate the two requirements of the subject. (For those on the Doctoral program.) Pass/Fail.

CNPS 698 (6) PRE-DOCTORAL INTERNSHIP. A 1600-hour supervised internship in Counselling Psychology. Internship sites offer counselling services as detailed in the "Specialty Guidelines for the Delivery of Services by Counselling Psychologists" (APA). Pass/Fail.

CNPS 699 (0) DOCTORAL THESIS. Pass/Fail.

CNRS — CLASSICAL, NEAR EASTERN AND RELIGIOUS STUDIES FACULTY OF ARTS

Not all courses are offered every year. For current listings, consult the departmental website at: www.cnrs.ubc.ca.

CNRS 316 (3/6) D GODS, HEROES, AND DIVINE HUMANS IN GRECO-ROMAN ANTIQUITY.

CNRS 370 (3) THEORIES OF MYTH.

CNRS 500 (3) PRO-SEMINAR IN ANCIENT MEDITERRANEAN STUDIES.

CNRS 501 (3) THE CITY: ETERNAL, EPHEMERAL, AND UNREAL.

CNRS 502 (3-12) D STUDIES IN LAW AND SOCIETY.

CNRS 503 (3-12) D STUDIES IN LITERATURE, ART AND SOCIETY.

CNRS 504 (3-12) D STUDIES IN RELIGION.

CNRS 505 (3-12) D STUDIES IN ETHNICITY.

CNRS 579 (3) MAJOR ESSAY.

COGS — COGNITIVE SYSTEMS PROGRAM FACULTY OF SCIENCE

COGS 200 (3) INTRODUCTION TO COGNITIVE SYSTEMS. Interdisciplinary examination of human mental processes and how these are mediated by the brain. Will draw on cognitive psychology, linguistics, cognitive neuroscience, philosophy, artificial intelligence. Prerequisite: second-year standing in the Faculty of Arts or Science. [3-0-0]

COGS 300 (3) UNDERSTANDING AND DESIGNING COGNITIVE SYSTEMS. Theory and methods for integrating diverse disciplinary content in cognitive systems. Prerequisite: COGS 200. [2-3-0]

COGS 400 (6) SPECIAL TOPICS IN COGNITIVE SYSTEMS. Interdisciplinary seminar and research course dealing with theory, methods, and current research topics. Prerequisite: restricted to students majoring in Cognitive Systems with fourth-year standing in the Faculty of Arts or Science. [3-3-0; 0-0-3]

COGS 401 (3) SEMINAR IN COGNITIVE SYSTEMS. Interdisciplinary seminar integrating theory, methods, and current research topics. Prerequisite: COGS 300. [1-0-4]

COGS 402 (3) RESEARCH IN COGNITIVE SYSTEMS. Supervised research project in a Cognitive Systems-related laboratory. Prerequisite: COGS 300. COGS 401 is recommended. [0-9-0]

COML — COMPARATIVE LITERATURE FACULTY OF GRADUATE STUDIES

COML 500 (3/6) D INTRODUCTION TO COMPARATIVE LITERATURE.

COML 501 (3/6) D STUDIES IN GENRE.

COML 502 (3/6) D STUDIES IN LITERARY MOVEMENTS AND PERIODS.

COML 503 (3/6) D STUDIES IN MYTH, THEME AND TRADITION.

COML 504 (3/6) D TOPICS IN COMPARATIVE LITERATURE.

COML 505 (3/6) D NEW PROBLEMS IN COMPARATIVE LITERATURE.

COML 506 (3/6) D COMPARATIVE STUDIES IN ORIENTAL AND OCCIDENTAL LITERATURE.

COML 507 (3/6) D ADVANCED SEMINAR IN LITERARY CRITICISM.

COML 547 (3-12) C READING COURSE.

COML 548 (1) MAJOR PAPER.

COML 549 (6/12) C MASTER'S THESIS.

COML 649 (0) PH.D. THESIS.

COMM — COMMERCE FACULTY OF COMM (SAUDER)

In general, not all of the prerequisites for Commerce courses are listed. Students must be registered in the same year level as the course they intend to register in. For example, eligibility for Commerce 400-level courses requires a student to have completed second and third-year Commerce, and to be registered in fourth year. Students should refer to the Commerce website or contact the Undergraduate program office regarding course prerequisites and variations from standard program sequences. Additional fees are charged some courses.

COMM 100 (3) INTRODUCTION TO BUSINESS. An overview of all functional areas of business. Students will be introduced to the computer and internet tools commonly used in business. For non-Commerce students only.

COMM 184 (3) CHINOOK I. An applied overview of the functional areas of business, business practice evaluations, and Aboriginal values on business practices. Restricted to students who are currently enrolled in the Chinook Diploma Program at Chinook Partner Institutions.

COMM 201 (3-36) D STUDY ABROAD, NON-COMMERCE. A study abroad program developed in cooperation between UBC Faculty of Commerce and another institution offering a set of courses tailored to a particular field of study.

COMM 290 (3) INTRODUCTION TO QUANTITATIVE DECISION MAKING.

Introduction to decision models in business, including basic optimization, linear programming, probability, decision analysis, random variables, simulation, and solving decision problems using spreadsheet tools. Prerequisite: All of MATH 104, MATH 105.

COMM 291 (3) APPLICATION OF STATISTICS IN BUSINESS. Methods and applications of statistics in business; data analysis, descriptive regression; data generation; sampling distributions; hypothesis testing; confidence intervals; two sample problems; inference in regression. Prerequisite: COMM 290.

COMM 292 (3) MANAGEMENT AND ORGANIZATIONAL BEHAVIOUR. Behaviour in organizations as it affects people as individuals, their relationships with others, their performance in groups and their effectiveness at work.

COMM 293 (3) FINANCIAL ACCOUNTING.

Introduction to the construction and interpretation of financial reports prepared primarily for external use.

COMM 294 (3) MANAGERIAL ACCOUNTING. Introduction to the development and use of accounting information for management planning and control and the development of cost information for financial reports. Prerequisite: COMM 293.

COMM 295 (3) MANAGERIAL ECONOMICS. Economic foundations of managerial decision-making. Demand theory, cost and production, market structure, competitive strategy, organization of the firm, welfare-economic foundations of business regulation. Credit may be obtained for only one of ECON 201, ECON 206, ECON 301, ECON 304, FRE 295, COMM 295. Prerequisite: MATH 105 and either (a) all of ECON 101, ECON 102 or (b) ECON 100.

COMM 297 (3) CAPITAL MARKETS AND INSTITUTIONS. Economic environment in which business operates, including the role of the Bank of Canada, analysis of domestic and international money markets and institutions and basic principles of financial valuation. [3-0; 3-0]

COMM 298 (3) INTRODUCTION TO FINANCE. Introduces the basic principles of financial valuation, including the time-value of money and the risk/return tradeoff. Develops tools for the quantitative analysis of corporate and/or individual financing and saving decisions, and of capital budgeting decisions. Prerequisite: All of COMM 290, COMM 293, MATH 105 and one of COMM 295, ECON 201, ECON 301. [3-0; 3-0]

COMM 299 (1) BUSINESS COMMUNICATIONS. Basic communication theory, communications in organizations. Includes written and oral practice in lab sessions.

COMM 300 (3-36) D STUDY ABROAD, COMMERCE. A study abroad program developed in cooperation between UBC Faculty of Commerce and another institution offering a set of courses tailored to a particular field of study.

COMM 302 (3-36) D STUDY ABROAD, NON-COMMERCE. A study abroad program developed in cooperation between UBC Faculty of Commerce and another institution offering a set of courses tailored to a particular field of study.

COMM 306 (3) URBAN LAND ECONOMICS. Examines economic factors affecting the urban land market, with an emphasis on determinants of urban land values, the housing market, urban transportation, and land use policies. Prerequisite: One of COMM 295, ECON 201, ECON 301.

COMM 307 (3) REAL ESTATE INVESTMENT. Evaluation of investment in real estate assets; proforma analysis, property and asset management, equity securitization, appraisal, and international real estate investment. Prerequisite:

site: One of COMM 295, ECON 201, ECON 301 and one of COMM 297, COMM 298.

COMM 310 (3) SIMULATION MODELS IN BUSINESS DECISION-MAKING. Computer simulation, simulation languages. Typical business applications in financial planning, waiting line problems and other operating problems. Prerequisite: COMM 291.

COMM 320 (3) ORGANIZATIONAL ANALYSIS. An analysis of organizational structures and intraorganizational processes; effects of organizational factors on individual behaviour. Prerequisite: COMM 292.

COMM 327 (3) HUMAN RESOURCE MANAGEMENT. Introduction to activities, policies and practices required for effective human resource planning, external factors that influence human resource management. Prerequisite: COMM 292.

COMM 328 (3) ADMINISTRATION OF COLLECTIVE AGREEMENTS. Grievance handling in collective agreements; the arbitration process; arbitral jurisprudence; substantive grievance issues such as discipline and promotions. Prerequisite: COMM 392.

COMM 329 (3) PRINCIPLES OF ORGANIZATIONAL BEHAVIOUR. An introductory examination of work organizations and the behaviour of individuals within them. Phenomena to be studied include organizational structure, environments, group processes, motivation and leadership (For non-Commerce students in third and fourth year).

COMM 335 (3) INFORMATION SYSTEMS TECHNOLOGY AND DEVELOPMENT. Introduction to information technology related to business use. Design, implementation and application of Information Systems. Prerequisite: One of COMM 391, CPSC 211.

COMM 336 (3) INTRODUCTION TO E-BUSINESS. Fundamental concepts for moving into e-Business including: technology infrastructure; security; electronic payment systems; business-to-consumer and business-to-business e-commerce; business models; strategy, behavioral and interface issues; legal and privacy concerns cases. Prerequisite: COMM 391.

COMM 337 (3) INTRODUCTION TO BUSINESS PROGRAMMING. Introduction to shared and object-oriented computer programming; program design and documentation techniques; development of business related systems.

COMM 341 (3) APPLIED BUSINESS LOGISTICS. Analysis of the firm's decision in inventory planning and control, logistics system design and logistics operations; the role of logistics in corporate strategy.

COMM 349 (3) LOGISTICS SERVICES MANAGEMENT. Overview of the characteristics and commercial environment of logistics and transportation services; service operations planning and design, costing, pricing and quality management. Corequisite: One of COMM 396, COMM 399.

COMM 353 (3) FINANCIAL ACCOUNTING – INTERMEDIATE I. An examination of accounting as a means of measurement and as an information system for external reporting purposes. Prerequisite: All of COMM 293, COMM 294. Corequisite: Either (a) all of COMM 297, COMM 397 or (b) COMM 298.

COMM 354 (3) COST ACCOUNTING. The provision and analysis of cost accounting information that will assist management in making operating decisions and in evaluating operational performance. The utilization of statistical analysis and linear models is included. Prerequisite: All of COMM 290, COMM 291, COMM 293, COMM 294.

COMM 355 (3) INCOME TAXATION. A study of income tax from the standpoint of the individual and of business enterprise. Prerequisite: One of COMM 293, COMM 457.

COMM 357 (3) TAX PLANNING. A study of personal income tax and financial planning for individuals at various life stages. Credit will be given for only one of COMM 355 or COMM 357.

COMM 362 (3) BUYER BEHAVIOUR. The use of consumer research and theory in marketing and policy decisions. Psychological, sociological and economic theory and research relevant to consumer behaviour are considered. Prerequisite: COMM 396.

COMM 363 (3) MARKETING ANALYSIS. Analytical methods applicable to marketing management decision making; attention to strategic considerations linking analysis of consumer data, corporate data, environmental factors, and competitive response. The course makes extensive use of micro computers. Prerequisite: COMM 396.

COMM 365 (3) MARKET RESEARCH. The process of marketing research including topics such as problem/opportunity formulation, research objectives, data sources, research instrument design, sampling, data collection and processing and methods of data analysis. Prerequisite: All of COMM 290, COMM 291, COMM 396 and one of COMM 295, ECON 201, ECON 301. Corequisite: COMM 391.

COMM 371 (3) THEORY OF FINANCE. Basic concepts of corporate finance, including security valuation and financial decisions by the corporation. Prerequisite: One of COMM 370, COMM 397.

COMM 374 (3) SECURITY MARKETS. Introduction to theories and evidence concerning the structure of security markets and the valuation of stocks, bonds, options, and futures contracts; the role of portfolio management in informationally efficient security markets. Prerequisite: One of COMM 370, COMM 397.

COMM 376 (3) FINANCIAL INSTITUTIONS I. The financial systems in Canada; the practices of the major financial institutions; and theories of financial processes. Prerequisite: One of COMM 297, COMM 298.

COMM 377 (3) INTERNATIONAL FINANCIAL MARKETS AND INSTITUTIONS. Structure, nature and institutions of foreign exchange markets, including spot, forward, futures, options, and offshore currency markets. Factors affecting exchange rates are also discussed. Prerequisite: One of COMM 370, COMM 397.

COMM 378 (3) RISK MANAGEMENT AND FINANCIAL ENGINEERING. Principles of financial engineering and risk management. Use of derivatives in risk management. Valuation and option models for contingent claims. Prerequisite: COMM 371. Corequisite: COMM 374.

COMM 379 (3) INTRODUCTION TO PENSIONS AND INSURANCE. Financial dimensions and institutional structure of the pension and insurance industry; calculation of annuities and other aspects of actuarial science based on probability distributions and asset returns. Suitable for students in mathematics who have taken basic finance and for commerce students in finance, accounting and related areas.

COMM 380 (3) CO-OPERATIVE WORK PLACEMENT I. Approved and supervised work experience for a minimum of 3.5 months. Normally taken during the winter term of the third year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Commerce. Option-specific prerequisites apply.

COMM 381 (3) CO-OPERATIVE WORK PLACEMENT II. Approved and supervised work experience for a minimum of 3.5 months. Normally taken during the summer term of the third year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Commerce. Prerequisite: COMM 380.

COMM 383 (3) PRODUCTION/OPERATIONS MANAGEMENT. Production planning and scheduling, inventory control, control of materials, purchasing, quality assurance, capacity management and industrial location decisions.

COMM 384 (3) CHINOOK III INDUSTRY ANALYSIS & OPPORTUNITY IDENTIFICATION. Detailed analysis of an industry of the student's choice focusing on issues of key success factors, industry segmentation, and opportunity identification-evaluation.

COMM 385 (3) CHINOOK IV NEW BUSINESS PLANNING. The development of a new business plan, from new business idea through to implementation planning.

COMM 391 (3) INTRODUCTION TO MANAGEMENT INFORMATION SYSTEMS. Overview of computer technology and terminology; use of computers as managerial and administrative tools; the management of computer resources and the influence of information technology within the organization.

COMM 392 (3) MANAGING THE EMPLOYMENT RELATIONSHIP. The role of employment relations in enterprise perfor-

mance. Managing employees under statutory law, collective bargaining and progressive human resource management. Key issues in forming, developing and maintaining a work force. Prerequisite: COMM 292 and either (a) all of ECON 101, ECON 102 or (b) ECON 100.

COMM 393 (3) COMMERCIAL LAW.

Introduction to the law of contracts, with particular reference to contracts for sale of goods and related law of personal property; principles of agency, partnerships and company law.

COMM 394 (3) GOVERNMENT AND BUSINESS.

Roles of government and business in the Canadian economy including effects of public policy on the business environment. Ethical foundations of government, business and personal decision-making. Prerequisite: One of COMM 295, ECON 201, ECON 301.

COMM 396 (3) INTRODUCTION TO MARKETING.

Basic considerations affecting the domestic and international marketing of goods and services. Prerequisite: COMM 293 and one of COMM 295, ECON 201, ECON 301.

COMM 397 (3) BUSINESS FINANCE.

Examination of the corporate enterprise decisions including working capital management, capital budgeting; capital structures and dividend policy. Prerequisite: COMM 297.

COMM 399 (3) LOGISTICS AND OPERATIONS MANAGEMENT.

The design and management of systems to make products, provide services and deliver them to the end user. Prerequisite: All of COMM 290, COMM 291.

COMM 400 (3-36) D STUDY ABROAD.

Study Abroad A one or two term program of regular undergraduate studies at a foreign university under an existing formal exchange program. Pass/Fail.

COMM 405 (3) REAL ESTATE FINANCE.

The role of mortgage markets, mathematical analysis of return and valuation issue and methods of dealing with lender and borrower risk exposure. Prerequisite: COMM 297.

COMM 407 (3) URBAN PUBLIC ECONOMICS.

The economics of local government. Analysis will focus on local expenditures, taxes, and land use control including the impacts of these policies. Prerequisite: One of COMM 295, ECON 201, ECON 301.

COMM 408 (3) REAL ESTATE DEVELOPMENT.

The development process from theories of development, market analysis, site selection, project design, land use regulation and financial analysis. Prerequisite: One of COMM 297, COMM 298 and one of COMM 295, ECON 201, ECON 301.

COMM 409 (3) CITY GROWTH AND STRUCTURE.

Advanced urban and regional economics, including economic basis analysis location theory, housing policy, dynamics of land use, land use succession, and urban renewal. Prerequisite: COMM 307.

COMM 410 (3) METHODS OF MANAGEMENT SCIENCE.

Formulation of models from a variety of areas, including the analysis of models of inventory, allocation (linear and non-linear programming), competition (game theory), and scheduling. Case studies will be used.

COMM 411 (3) INTERMEDIATE BUSINESS STATISTICS.

Statistical techniques useful in business environments. Includes regression analysis, analysis of variance, forecasting, and logit and probit analysis. Credit may be obtained for only one of STAT 300, 306, and COMM 411. Prerequisite: COMM 291. Equivalency: STAT 300.

COMM 412 (3) NEGOTIATION.

Negotiation is the art and science of securing agreements between two or more interdependent parties. Through lectures and weekly negotiation simulations students will gain insight into the behaviour of individuals, groups and organizations in competitive situations.

COMM 420 (3) BUSINESS AND MANAGEMENT VALUES IN ORGANIZATIONAL LIFE.

Balancing organizational, personal, and community interests in a global economy. In addition to standard management textbooks and readings, the class will draw from the work of poets, fiction writers, essayists, and social critics. Prerequisite: COMM 292.

COMM 421 (3) COLLECTIVE BARGAINING.

Structural, behavioural, legal and substantive aspects of labour management relations and the collective bargaining process. Prerequisite: COMM 392.

COMM 422 (3) PUBLIC SECTOR INDUSTRIAL RELATIONS.

Industrial relations in the Canadian public sector and the experience of the parties in dealing with these issues. Studies of subsectors such as civil services, education and health care are undertaken. Prerequisite: COMM 392.

COMM 425 (3) RESEARCH METHODS FOR HUMAN RESOURCE MANAGEMENT.

Techniques for collection and analysis of data in organizations to support adoption and administration of human resource management. Prerequisite: All of COMM 291, COMM 292, COMM 327.

COMM 426 (3) ORGANIZATIONAL DEVELOPMENT.

The tactics and strategies for implementing constructive modifications in organizations. Interpersonal relations skill building is emphasized in classroom activities, while lectures and assignments explore applications in business and non-business organizations. Prerequisite: COMM 292.

COMM 428 (3) SELECTED TOPICS IN HUMAN RESOURCE MANAGEMENT.

Prerequisite: All of COMM 327, COMM 425.

COMM 431 (3) LAW OF BUSINESS ASSOCIATIONS.

The application of various statutes to business entities including corporations, partnerships, societies, co-operatives, credit unions, trust companies and banks; the consequences of bankruptcy on legal entities. Prerequisite: COMM 393.

COMM 432 (3) ADVANCED BUSINESS PROGRAMMING.

Advanced structured and object-oriented computer programming; principles of software engineering; development of business-related systems. Prerequisite: One of COMM 337, CPSC 122, CPSC 152.

COMM 433 (3) EMPLOYMENT LAW.

Legal aspects of the employment relationship. Topics include: employment contracts, human rights legislation, standards of work legislation, the labour codes, Workers' Compensation Act and statutes dealing with related areas, e.g., unemployment and pension benefits. Prerequisite: COMM 393.

COMM 434 (3) LAND LAW.

Legal principles and concepts relating to real estate and land development. Prerequisite: COMM 393.

COMM 435 (3) DEVELOPING E-BUSINESS APPLICATIONS.

Applications of e-Business and e-Commerce; technological infrastructure; software tools, development process, development techniques, security, business implications, and other related issues for implementing e-business applications. Prerequisite: One of COMM 437, CPSC 304.

COMM 436 (3) INFORMATION SYSTEMS ANALYSIS AND DESIGN.

The process of information systems development; modern techniques and tools for systems analysis and design. Prerequisite: COMM 335.

COMM 437 (3) DATABASE TECHNOLOGY.

Theory and technology of database management from an applications perspective; database design; database administration. Credit will not be granted for both COMM 437 and CPSC 304. Corequisite: COMM 335.

COMM 438 (3) MANAGEMENT OF INFORMATION SYSTEMS.

Managerial issues in the administration of computerized information systems. Prerequisite: COMM 335.

COMM 439 (3) BUSINESS TELECOMMUNICATIONS.

Basic data communications concepts and technology; local area, wide area, and enterprise networks; the Internet; wireless networking; network development life cycle; network security and management. Prerequisite: COMM 335.

COMM 441 (3) ADVANCED BUSINESS LOGISTICS.

Analysis of logistics systems within firms and across supply chains. The formulation of corporate logistics strategies. Corequisite: COMM 399.

COMM 442 (3) E-BUSINESS AND SUPPLY CHAIN MANAGEMENT.

Methods/strategies for supply chain management using e-business technology; applications of electronic technologies to procurement, fulfillment, transportation and logistics; freight and logistics exchanges; and virtual supply chains. Prerequisite: One of COMM 341, COMM 399.

COMM 444 (3) AIR TRANSPORTATION.

An integrative treatment of air transport management including: demand analysis, sales and marketing, globalization trends, aircraft selection and fleet planning; airport economics and management. Prerequisite: One of COMM 295, ECON 201, ECON 301.

COMM 445 (3) SHIPPING AND INTERNATIONAL LOGISTICS. The characteristics of shipping services and the role of shipping services in the design and management of international logistics systems.

COMM 446 (3) TRANSPORTATION ECONOMICS. Economic characteristics of passenger and freight transportation services; market structure of the transportation industry; economic impact of public regulation and promotion and the role of economic analysis in resolving problems of Canadian policy. Credit may be obtained for only one of COMM 446, ECON 480. Prerequisite: One of COMM 295, ECON 201, ECON 301, ECON 206. Equivalency: ECON 480.

COMM 447 (3) PROJECT APPRAISAL AND MANAGEMENT. Evaluation of transport projects in the private and public sector; cost benefit analysis and related framework; project management, financing transport infrastructure. Prerequisite: One of COMM 295, ECON 201, ECON 301.

COMM 450 (3) FINANCIAL ACCOUNTING – INTERMEDIATE II. Intermediate II. Continuation of the examination of accounting as a means of measurement and as an information system for external reporting purposes. Prerequisite: COMM 353.

COMM 451 (3) ADVANCED ACCOUNTING TOPICS. Selected areas in accounting.

COMM 452 (3) TAXES AND DECISION MAKING. Analysis of business and financial decisions in the presence of taxes.

COMM 453 (3) FINANCIAL ACCOUNTING – ADVANCED. An examination of advanced financial accounting. Prerequisite: All of COMM 353, COMM 450.

COMM 454 (3) ACCOUNTING FOR MANAGEMENT CONTROL AND INCENTIVES. Design of accounting systems for facilitating and influencing management decisions, with emphasis on performance evaluation in organizations. Prerequisite: COMM 294.

COMM 455 (3) PRINCIPLES OF AUDITING. Principles of internal control, audit evidence, sampling and testing; audit reports; standards; responsibilities of the external auditor. Prerequisite: All of COMM 353, COMM 450.

COMM 456 (3) INFORMATION TECHNOLOGY RISKS, PROTECTION AND AUDIT. Business risks associated with the use of information technology. Controls for integrity, security safety, and privacy of hardware, software, data and communications. Methods for auditing information systems and their controls. Prerequisite: COMM 335.

COMM 457 (3) FUNDAMENTALS OF FINANCIAL ACCOUNTING. Financial accounting for business organizations; principles and problems of accounting measurements; forms of business organizations; financing of businesses. For non-Commerce students in third or fourth year only.

COMM 458 (3) FUNDAMENTALS OF MANAGERIAL ACCOUNTING. Use of accounting data in decision making by businesses; financial statement analysis; cash flows; cost behaviour patterns; methods of accounting for costs. For non-Commerce students in third and fourth year only. Prerequisite: One of COMM 293, COMM 457.

COMM 459 (3) FINANCIAL STATEMENT ANALYSIS. An examination of financial statement information from the perspective of decision makers external to the firm, e.g. investors and financial institutions. Prerequisite: COMM 293 and one of COMM 297, COMM 298 and one of COMM 370, COMM 397.

COMM 460 (3) PUBLIC AND NONPROFIT MARKETING MANAGEMENT. Examines the role, use, and application of marketing in government agencies and nonprofit institutions. Prerequisite: COMM 362.

COMM 461 (3) SALES MANAGEMENT. Theory and management of personal selling. Strategy, tactics, and implementation of sales programs. Prerequisite: COMM 362.

COMM 462 (3) PROMOTION STRATEGY. Campaign strategy; planning, organizing, and controlling an advertising program; advertising research and analysis. Prerequisite: COMM 362.

COMM 463 (3) SPECIAL TOPICS IN MARKETING. An investigation of current developments in both retailing and wholesaling fields and their application to marketing institutions.

COMM 464 (3) E-MARKETING. Investigation of Internet-based marketing, emphasizing customer-focused perspectives, competitive situations and analysis of the effectiveness of business websites using marketing principles and practices. Prerequisite: COMM 396.

COMM 465 (3) MARKETING MANAGEMENT. Basic considerations affecting the domestic and international marketing of goods and services. For non-Commerce students in third and fourth year only. Prerequisite: One of COMM 293, COMM 457 and either (a) all of ECON 101, ECON 102 or (b) ECON 100. Or (c) all of ECON 310, ECON 311 or (d) all of ECON 101, ECON 311 or (e) all of ECON 102, ECON 310.

COMM 468 (3) MARKETING APPLICATIONS. Applied marketing planning with emphasis on a major industrial analysis and the subsequent development of a detailed marketing plan for an operating organization. Prerequisite: All of COMM 362, COMM 363. Corequisite: COMM 365.

COMM 469 (3) INTERNATIONAL MARKETING. An analysis of the scope and significance of contemporary international business operations with particular reference to the marketing management problems encountered by firms with multinational branches and subsidiaries. Prerequisite: COMM 396.

COMM 471 (3) FINANCIAL MANAGEMENT. Advanced problems of financial management. Debt policy and capital structure planning; capital costs, capital budgeting, dividend policy, valuation, mergers and acquisitions. Prerequisite: COMM 371 and one of COMM 370, COMM 397.

COMM 472 (3) QUANTITATIVE ANALYSIS OF FINANCIAL DECISIONS. Application of modern quantitative techniques to the formulation of financial decisions under conditions of both certainty and uncertainty. Prerequisite: COMM 371.

COMM 473 (3) BUSINESS FINANCE. Introduction to managerial finance, including the role and functioning of financial markets, procurement of funds and financing strategies, dividend policy, capital budgeting and financial analysis and planning. For non-Commerce students only in third and fourth year. Prerequisite: Either (a) all of ECON 101, ECON 102 or (b) ECON 100 or (c) all of ECON 310, ECON 311 or (d) all of ECON 101, ECON 311 or (e) all of ECON 102, ECON 310 and one of MATH 100, MATH 102, MATH 104, MATH 120, MATH 180, MATH 184. Corequisite: One of COMM 293, COMM 457.

COMM 474 (3) FIXED INCOME MARKETS AND MANAGEMENT. Fixed income instruments and derivatives. Risk profiles and their use in establishing fixed income investment portfolios. Performance attribution techniques. Prerequisite: COMM 374.

COMM 475 (3) INVESTMENT POLICY. The management of security portfolios for individual and institutional investors; relation of investment policy to money markets and business fluctuations. Prerequisite: COMM 374.

COMM 478 (3) INTERNATIONAL FINANCIAL MANAGEMENT. International financing, hedging and investment activities. Sources of funds, asset pricing, bond markets, equity markets and capital budgeting. Topics include transfer prices and taxation of multinationals. Prerequisite: COMM 377.

COMM 480 (3) CO-OPERATIVE WORK PLACEMENT III. Approved and supervised work experience for a minimum of 35 months. Normally taken during the summer term of the fourth year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Commerce. Prerequisite: COMM 381.

COMM 481 (3) CO-OPERATIVE WORK PLACEMENT IV. Approved and supervised work experience for a minimum of 35 months. Normally taken during the fall term of the fourth year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Commerce. Prerequisite: COMM 480.

COMM 483 (6) PLANNING AND CONTROL PROBLEMS. Advanced problems in planning and controlling work operations with special emphasis on quantitative analysis. Case and field work problems.

COMM 486 (3-36) D SPECIAL TOPICS IN BUSINESS.

COMM 488 (3) PUBLIC SECTOR MANAGEMENT. This course focuses on some of the distinctive aspects of managing in the public sector.

COMM 489 (3) TOPICS IN POLICY ANALYSIS AND PUBLIC POLICY. Current developments in the theory and practice of policy analysis applied to specific issues in the public and private sectors.

COMM 490 (3/6) D DIRECTED STUDIES IN COMMERCE. An investigation and report on a topic to be agreed upon by a member of the faculty and a senior student.

COMM 491 (3) STRATEGIC MANAGEMENT. Concepts and processes for the strategic management of private sector, single and multi-business unit enterprises are analysed using the case method. Methodologies which draw on economic and organizational theory are integrated to form the foundations for strategic analyses.

COMM 492 (3) MANAGEMENT SIMULATION. Student teams manage hypothetical firms in a complex simulation, coordinating production, finance, marketing and strategic planning in competition with other teams.

COMM 493 (3) STRATEGIC MANAGEMENT IN BUSINESS. A conceptual and practical introduction to the major areas of business strategy with an integrative perspective on managing a business. Includes the analysis of a business and its environment, the development and evaluation of strategic alternatives, and implementation of change (For non-Commerce students only in fourth year). Prerequisite: One of COMM 293, COMM 457 and all of COMM 329, COMM 465, COMM 473; and either (a) all of ECON 101, ECON 102 or (b) all of ECON 310, ECON 311 or (c) ECON 100 or (d) all of ECON 101, ECON 311 or (e) all of ECON 102, ECON 310.

COMM 494 (3) CORPORATE AND INDUSTRY ANALYSIS. A general framework for the analysis of industries for the purpose of shaping corporate strategy and public policy. Focuses on market structure, the conduct of firms and industry performance.

COMM 495 (3) BUSINESS AND SUSTAINABLE DEVELOPMENT. An overview of environmental issues, focusing on corporate strategy, government policy and interactions between these two sectors of the economy.

COMM 496 (3) E-BUSINESS STRATEGY. Knowledge and conceptual frameworks for formulating a strategy in e-business. Market behaviour in the information and digital products industries; contract law, jurisdictional issues and intellectual property. Prerequisite: Fourth year standing

COMM 497 (3) NEW ENTERPRISE DEVELOPMENT. The particular problems and experiences encountered in starting, developing and managing new enterprises. The course

includes lectures, guest speakers, and case studies.

COMM 498 (3) INTERNATIONAL BUSINESS MANAGEMENT. Development of general environmental framework for international business studies by drawing on international and development economics, research into government-business relations and studies in comparative socio-cultural systems and political systems.

COMM 499 (3/6) D INTERNSHIP.

COMM 504 (3) SEMINAR IN PROPERTY TAXATION.

COMM 505 (3) SEMINAR IN URBAN LAND ECONOMICS.

COMM 511 (3) SEMINAR IN BUSINESS APPLICATIONS OF MANAGEMENT SCIENCE I.

COMM 520 (3) ADVANCED TOPICS IN ORGANIZATIONAL BEHAVIOUR.

COMM 525 (3) INTRODUCTION TO BEHAVIOURAL RESEARCH METHODS FOR BUSINESS.

COMM 528 (3) ADVANCED TOPICS IN HUMAN RESOURCE MANAGEMENT.

COMM 536 (3) ANALYSIS AND DESIGN OF INFORMATION SYSTEMS.

COMM 537 (3) DATABASE DESIGN AND ADMINISTRATION.

COMM 539 (3) TECHNOLOGY STRATEGY AND POLICY.

COMM 544 (3) SEMINAR IN TRANSPORTATION ECONOMICS.

COMM 546 (3-6) D SELECTED TOPICS IN INTERNATIONAL BUSINESS.

COMM 547 (3-6) D MAJOR ESSAY/ INDUSTRY PROJECT.

COMM 548 (3) DIRECTED STUDY IN BUSINESS ADMINISTRATION.

COMM 549 (6/12) C MASTER'S THESIS.

COMM 551 (3) ADVANCED ACCOUNTING SEMINAR.

COMM 552 (3) SEMINAR IN INCOME DETERMINATION.

COMM 553 (3) SEMINAR IN ACCOUNTING STANDARDS.

COMM 561 (3) LAW AND THE ARTS.

COMM 562 (3) MARKETING STRATEGY.

COMM 568 (3) SEMINAR IN INTERNATIONAL BUSINESS.

COMM 571 (3) SEMINAR IN FINANCIAL MANAGEMENT.

COMM 572 (3) ADVANCED THEORY AND QUANTITATIVE TECHNIQUES IN CORPORATE FINANCE.

COMM 574 (3) SEMINAR IN SECURITY ANALYSIS.

COMM 575 (3) SEMINAR IN INVESTMENT MANAGEMENT.

COMM 577 (3) SEMINAR IN INTERNATIONAL FINANCE.

COMM 580 (3) BUSINESS STATISTICS.

COMM 581 (3) STATISTICAL METHODOLOGY I.

COMM 582 (3) STATISTICAL METHODOLOGY II.

COMM 583 (3) FORECASTING AND TIME SERIES ANALYSIS IN BUSINESS ENVIRONMENTS.

COMM 588 (3) CONSULTING PRACTICES: METHODS.

COMM 589 (3) CONSULTING PRACTICES: APPLICATIONS.

COMM 590 (3-9) D TOPICS IN BUSINESS ADMINISTRATION.

COMM 591 (3) MANAGEMENT STRATEGY AND POLICY.

COMM 592 (3) MANAGEMENT SIMULATION.

COMM 593 (3) CORPORATE PLANNING MODELS.

COMM 596 (3) MANAGERIAL DECISION-MAKING.

COMM 598 (3) ANALYSIS OF THE INTERNATIONAL BUSINESS ENVIRONMENT. Equivalency: BAIM 500, BAIM 501.

COMM 599 (3/6) D SELECTED TOPICS IN POLICY ANALYSIS.

COMM 604 (3) ADVANCED TOPICS IN URBAN LAND ECONOMICS I.

COMM 605 (3) ADVANCED TOPICS IN URBAN LAND ECONOMICS II.

COMM 609 (3) SEMINAR IN URBAN LAND ECONOMICS.

COMM 611 (3) SEMINAR ON THEORETICAL DEVELOPMENTS IN MANAGEMENT.

COMM 612 (3) ADVANCED TOPICS IN OPTIMIZATION.

COMM 616 (3) OPTIMIZATION THEORY AND APPLICATIONS.

COMM 618 (3) DISCRETE OPTIMIZATION II.

COMM 621 (3) SEMINAR IN HUMAN RESOURCE MANAGEMENT.

COMM 625 (3) ADVANCED TOPICS IN ORGANIZATIONAL BEHAVIOUR.

COMM 626 (3) ADVANCED TOPICS IN ORGANIZATIONAL THEORY.

COMM 627 (3) ADVANCED BEHAVIOURAL RESEARCH METHODS.

COMM 628 (3) ORGANIZATIONAL STUDIES RESEARCH SEMINAR.

COMM 633 (3) MODELLING METHODS IN THE RESEARCH AND PRACTICE OF INFORMATION SYSTEMS. Prerequisite: At least 9 graduate course credits in information system topics.

COMM 634 (3) EMPIRICAL RESEARCH METHODS IN INFORMATION SYSTEMS.

COMM 635 (3) ADVANCED TOPICS IN MANAGEMENT INFORMATION SYSTEMS.

COMM 636 (3) WORKSHOP IN MANAGEMENT INFORMATION SYSTEMS.

COMM 643 (3) WORKSHOP IN TRANSPORTATION AND UTILITIES.

COMM 644 (3) ADVANCED TOPICS IN TRANSPORTATION.

COMM 649 (0) PH.D. THESIS.

COMM 651 (3) ANALYSIS OF ACCOUNTING INFORMATION IN MARKETS.

COMM 654 (3) ANALYSIS OF ACCOUNTING INFORMATION IN ORGANIZATIONS.

COMM 657 (3) EMPIRICAL METHODS IN ACCOUNTING RESEARCH.

COMM 658 (3) RESEARCH SEMINAR IN ACCOUNTING.

COMM 659 (3) ADVANCED TOPICS IN EMPIRICAL ACCOUNTING RESEARCH.

COMM 660 (3) RESEARCH SEMINAR IN MARKETING.

COMM 661 (3) ANALYTICAL METHODS AND MODELS IN MARKETING.

COMM 662 (3) BUYER BEHAVIOUR.

COMM 671 (3) THEORY OF FINANCE.

COMM 672 (3) ADVANCED TOPICS IN THEORETICAL CORPORATE FINANCE.

COMM 673 (3) ADVANCED TOPICS IN THEORETICAL ASSET PRICING.

COMM 674 (3) ADVANCED TOPICS IN EMPIRICAL ASSET PRICING.

COMM 675 (3) RESEARCH SEMINAR IN FINANCE WORKSHOP.

COMM 682 (3) ADVANCED TOPICS IN STOCHASTIC MODELS.

COMM 684 (3) TOPICS IN ADVANCED BUSINESS STATISTICS.

COMM 691 (3) ADVANCED TOPICS IN POLICY ANALYSIS.

COMM 692 (3) RESEARCH SEMINAR IN POLICY ANALYSIS.

COMM 693 (3) SEMINAR IN RESEARCH METHODOLOGY I.

COMM 695 (3) ADVANCED TOPICS IN EMPIRICAL CORPORATE FINANCE.

COMM 696 (3) APPLIED RESEARCH IN POLICY ANALYSIS AND STRATEGY.

COMM 697 (3) ORGANIZATIONAL DECISION-MAKING.

CONS — NATURAL RESOURCES CONSERVATION FACULTY OF FORESTRY

CONS 101 (1) INTRODUCTION TO CONSERVATION. Seminars on current natural resources conservation and forest sciences topics. [1-0-0]

CONS 200 (3) FOUNDATIONS OF CONSERVATION. Conceptual foundations of conservation; means of conserving nature and natural resources. Prerequisite: All of BIOL 121, BIOL 140. [3-0-0]

CONS 320 (3) NATURAL RESOURCE COMMUNICATIONS. Concepts and techniques for communication with various constituencies in the natural resources arena. Principles of public relations, conflict resolution and public participation in resource planning and decision making. Business and professional speaking. [2-3]

CONS 330 (3) CONSERVATION BIOLOGY. Fundamental concepts in conservation biology. Different philosophies and perspectives on setting priorities for managing biodiversity. Prerequisite: CONS 200. [2-3-0]

CONS 340 (3) INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS FOR FORESTRY AND CONSERVATION. Introduction to principles, practice and context of Geographic Information Systems (GIS) applied to forest management and natural resource conservation issues. Priority enrolment to students in the Faculty of Forestry. Prerequisite: FRST 232. [2-0-0]

CONS 370 (3) PERSPECTIVES ON FIRST NATIONS AND FOREST LANDS. History of contact in North America, contemporary relations, Aboriginal Rights, contemporary treaty processes including interim measures, co-management/joint ventures, traditional uses, and self government. Some full day field trips. Fees will be assessed to meet expenses. [3-0-0]

CONS 440 (3) CONSERVATION POLICY. Contemporary issues are used to examine conservation policies designed to achieve conservation objectives. Prerequisite: CONS 200. [3-0]

CONS 449 (1-6) C DIRECTED STUDIES IN NATURAL RESOURCES CONSERVATION. In special cases and with the approval of the instructor concerned, a student may carry out directed studies of specific problems in natural resources conservation.

CONS 451 (15) INTEGRATED FIELD SCHOOL. Field methods, research and analysis, community oriented projects, and the interactions between biological and social aspects of conservation research. Students may not take any other courses in conjunction with CONS 451. Restricted to students registered in fourth year of the B.Sc. (NRC). [10-10-10]

CONS 481 (3) CONSERVATION PLANNING AND WILDLAND RECREATION. Theory and tools needed for the selection and design of protected areas, the designation of land use types, and the management and conservation of wildland recreation resources. [2-2-0]

CONS 486 (3) FISH CONSERVATION AND MANAGEMENT. Principles of fish biology, population and community ecology necessary to understand conservation and management; overview of current issues, tactics and institutions involved with fisheries conservation and management. Prerequisite: FRST 386. [2-3-0]

CONS 491 (2) ISSUES IN RECREATION, NATURAL AREAS MANAGEMENT AND RESOURCE CONSERVATION. A seminar on issues in resource-based recreation and related tourism, wildlife and natural heritage conservation in the governance of lands and coastal resources; analysis of recreation and related tourism, wildlife and natural heritage policies; the application of research findings to natural heritage including wildlife conservation and recreational land management. Prerequisite: One of FRST 290, CONS 200. [2-0]

CONS 498 (3) THESIS OR SPECIAL PROJECT. An independent study or research project of a subject of special interest to the student under the supervision of a staff member.

CONS 500 (3) SEMINAR IN BIOLOGICAL CONSERVATION. Topics in conservation biology with application to current issues and particular reference to (but not limited to) forested ecosystems. 2-0-1

CONS 501 (3) TOPICS IN CONSERVATION GENETICS. The genetics of small populations, inbreeding, extinction risks due to genetic versus demography factors, adaptation and climate change, and methods for assessing genetic diversity for conservation planning. Equivalency: ZOO 524.

CONS 502 (3) CONSERVATION POLICY. Examination of international and Canadian conservation agreements and policies as instruments of distributive justice. Application of contemporary theories of justice to conservation policy issues.

CONS 503 (1-6) D TOPICS IN CONSERVATION.

CONS 504 (1-6) C DIRECTED STUDIES IN CONSERVATION.

CONS 520 (3) CONSERVATION POLICY. Examination of international and Canadian conservation agreements and policies as instruments of distributive justice. Application of contemporary theories of justice to conservation policy issues.

CPSC — COMPUTER SCIENCE FACULTY OF SCIENCE

Students with no previous exposure to computers may consider a more general introduction to computers and computer science provided by CPSC 100 or CPSC 101. Students who have credit for, or are currently registered in any of CPSC 111, 122, 124, 152, or have Computer Science credit from another institution, may not take CPSC 100 or CPSC 101 or APSC 160 for credit in Science Programs. Students with sufficient background in the concepts presented in CPSC 111 and an advisor's approval are encouraged to challenge the CPSC 111 course for credit by taking an

examination. Enrolment restrictions apply to certain CPSC courses. In order to register into CPSC 211, 213, 216, 218, 219, 220, 221, 310, 313, and 320, students should have an overall average greater than or equal to a threshold set by the Department of Computer Science.

Students who are currently in a CPSC program but are prevented from registering in any of these courses may not be able to continue in a CPSC program. Those students should consider transferring to another program. Additional fees are charged for some courses. For more information students are advised to contact the Department of Computer Science or visit the Computer Science undergraduate program website: (<http://www.cs.ubc.ca/ugrad/program/index.html>). Faculty of Science Credit Exclusion List: For information on credit exclusion between CPSC and other courses, please consult the Faculty of Science Credit Exclusion List.

CPSC 100 (4) ELEMENTS OF COMPUTER SCIENCE. An introduction to elementary concepts in Computer Science. Topics include: history, hardware, software, user applications, networks, and programming. [3-3-1]

CPSC 101 (4) CONNECTING WITH COMPUTER SCIENCE. Fundamentals of computer science and their connections with the arts, psychology, and biology. Historical, cultural, and gender perspectives of important contributions to the field will be discussed. No prior computing background required. Equivalency: WMST 201. [3-3-0]

CPSC 111 (4) INTRODUCTION TO COMPUTATION. Basic programming constructs, data types, classes, interfaces, protocols and the design of programs as interacting software components. Prerequisite: MATH 12. [3-2-1]

CPSC 121 (4) MODELS OF COMPUTATION. Physical and mathematical structures of computation. Boolean algebra and combinations logic circuits; proof techniques; functions and sequential circuits; sets and relations; finite state machines; sequential instruction execution. Prerequisite: MATH 12. [3-2-1]

CPSC 211 (4) INTRODUCTION TO SOFTWARE DEVELOPMENT. Software design and the development of robust abstractions; design practices, data abstractions, inheritance, testing, concurrency and distributed computing. Prerequisite: One of CPSC 111, CPSC 260. [3-2-0]

CPSC 213 (4) INTRODUCTION TO COMPUTER SYSTEMS. Software architecture, operating systems, and I/O architectures. Relationships between application software, operating systems, and computing hardware; critical sections, deadlock avoidance, and performance; principles and operation of disks and networks. Prerequisite: Either (a) all of CPSC 121, CPSC 211 or (b) all of CPSC 260, EECE 256, CPSC 211. CPSC 211 may be taken concurrently with case (b) only. [3-3-0]

CPSC 221 (4) BASIC ALGORITHMS AND DATA STRUCTURES. Design and analysis of basic algorithms and data structures; algorithm

analysis methods, searching and sorting algorithms, basic data structures, graphs and concurrency. Prerequisite: CPSC 211 and one of CPSC 121, MATH 220. Corequisite: One of MATH 101, MATH 103, MATH 105, MATH 121. [3-2-0]

CPSC 260 (4) OBJECT-ORIENTED PROGRAM DESIGN. Design and analysis of object-oriented programs, emphasizing data structures. Topics include: classes, interfaces, fundamental data structures, algorithmic complexity, basic debugging and testing techniques. Prerequisite: APSC 160. [3-2-0]

CPSC 298 (3) CO-OPERATIVE WORK PLACEMENT I. Approved and supervised technical work experience in the computing industry for a minimum of 3.5 months. Normally taken during Winter Session of second year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Computer Science.

CPSC 299 (3) CO-OPERATIVE WORK PLACEMENT II. Approved and supervised technical work experience in the computing industry for a minimum of 3.5 months. Normally taken during the summer following the second year. Technical report required. Restricted to students admitted to the Co-operative Education. Prerequisite: CPSC 298.

CPSC 302 (3) NUMERICAL COMPUTATION FOR ALGEBRAIC PROBLEMS. Numerical techniques for basic mathematical processes involving no discretization, and their analysis. Solution of linear systems, including analysis of round-off errors; norms and condition number; introduction to iterative techniques in linear algebra, including eigenvalue problems; solution to nonlinear equations. Prerequisite: One of CPSC 111, CPSC 122, CPSC 126, CPSC 260 and all of MATH 200, MATH 221. [3-0-0]

CPSC 303 (3) NUMERICAL APPROXIMATION AND DISCRETIZATION. Numerical techniques for basic mathematical processes involving discretization, and their analysis. Interpolation and approximation, including splines and least squares data fitting; numerical differentiation and integration; introduction to numerical initial value ordinary differential equations. Prerequisite: One of CPSC 111, CPSC 122, CPSC 126, CPSC 260 and all of MATH 200, MATH 221. [3-0-0]

CPSC 304 (3) INTRODUCTION TO RELATIONAL DATABASES. Overview of database systems, ER models, logical database design and normalization, formal relational query languages, SQL and other commercial languages, transaction processing, concurrency control and recovery. Prerequisite: Either (a) one of CPSC 216, CPSC 252 and one of CPSC 220, EECE 320; or (b) CPSC 221 or (c) all of CPSC 260, EECE 320 and one of CPSC 211, EECE 310. [3-0-1]

CPSC 310 (4) INTRODUCTION TO SOFTWARE ENGINEERING. Specification, design, implementation and maintenance of large, multi-module software systems. Principles,

techniques, methodologies and tools for computer aided software engineering (CASE); human-computer interfaces, reactive systems, hardware-software interfaces and distributed applications. Prerequisite: Either (a) all of CPSC 213, CPSC 221 or (b) all of CPSC 216, CPSC 219, CPSC 220 or (c) all of CPSC 211, CPSC 213, CPSC 260, EECE 320. [3-2-0]

CPSC 311 (3) DEFINITION OF PROGRAMMING LANGUAGES. Comparative study of advanced programming language features. Statement types, data types, variable binding, parameter passing mechanisms. Methods for syntactic and semantic description of programming languages. Prerequisite: Either (a) CPSC 221 or (b) all of CPSC 216, CPSC 220 or (c) all of CPSC 211, CPSC 260, EECE 320. [3-0-1]

CPSC 312 (3) FUNCTIONAL AND LOGIC PROGRAMMING. Principles of symbolic computing, using languages based upon first-order logic and the lambda calculus. Algorithms for implementing such languages. Applications to artificial intelligence and knowledge representation. Prerequisite: Either (a) CPSC 221 or (b) all of CPSC 216, CPSC 220 or (c) all of CPSC 260, EECE 320. [3-0-0]

CPSC 313 (3) COMPUTER HARDWARE AND OPERATING SYSTEMS. Instruction sets, pipelining, code optimization, caching, virtual memory management, dynamically linked libraries, exception processing, execution time of programs. Prerequisite: Either (a) all of CPSC 213, CPSC 221 or (b) all of CPSC 211, CPSC 213, CPSC 260, EECE 320. [3-0-1]

CPSC 314 (3) COMPUTER GRAPHICS. Human vision and colour; geometric transformations; algorithms for 2-D and 3-D graphics; hardware and system architectures; shading and lighting; animation. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar.) Prerequisite: All of MATH 200, MATH 221 and either (a) one of CPSC 216, CPSC 221 or (b) all of CPSC 260, EECE 320. [3-1-0]

CPSC 317 (3) INTERNET COMPUTING. Computer networking, basic communication protocols, network infrastructure and routing. Common application-level protocols and principles associated with developing distributed applications. Prerequisite: CPSC 213 and either (a) CPSC 221 or (b) all of CPSC 211, CPSC 260, EECE 320. [3-0-1]

CPSC 319 (4) SOFTWARE ENGINEERING PROJECT. The design, implementation, and test of a large software system, using a team approach. Prerequisite: CPSC 310. [3-0-2]

CPSC 320 (3) INTERMEDIATE ALGORITHM DESIGN AND ANALYSIS. Systematic study of basic concepts and techniques in the design and analysis of algorithms, illustrated from various problem areas. Topics include: models of computation; choice of data structures; graph-theoretic, algebraic, and text processing algorithms. Prerequisite: Either (a) CPSC 221 or (b) one of CPSC 216, CPSC 260 and one of CPSC 220, EECE 320. In addition to above pre-requisites: either (a) 6 credits of 2nd Yr.

MATH or STAT or (b) 3 credits of 2nd Yr. MATH or STAT with a grade of 72% or better. [3-0-1]

CPSC 322 (3) INTRODUCTION TO ARTIFICIAL INTELLIGENCE. Problem-solving and planning; state/action models and graph searching. Natural language understanding Computational vision. Applications of artificial intelligence. Prerequisite: Either (a) CPSC 221 or (b) all of CPSC 216, CPSC 220 or (c) all of CPSC 211, CPSC 260, EECE 320. [3-0-0]

CPSC 340 (3) MACHINE LEARNING AND DATA MINING. Models of algorithms for dimensionality reduction, nonlinear regression, classification, clustering and unsupervised learning; applications to computer graphics, computer games, bio-informatics, information retrieval, e-commerce, databases, computer vision and artificial intelligence. Prerequisite: One of MATH 221, MATH 223 and one of STAT 241, MATH 302, STAT 302 and either (a) CPSC 216 or (b) CPSC 221 or (c) all of CPSC 211, CPSC 260, EECE 320. [3-0-0]

CPSC 344 (3) INTRODUCTION TO HUMAN COMPUTER INTERACTION METHODS. Basic tools and techniques, teaching a systematic approach to interface design, task analysis, analytic and empirical evaluation methods. Corequisite: CPSC 310 and one of STAT 200, STAT 241. [2-2-2]

CPSC 349 (0) HONOURS RESEARCH SEMINAR. Students will attend a series of research seminars presented by faculty members, produce a thesis proposal, and choose their honours thesis supervisor. Available to Honours students. Majors students with satisfactory standing may also be permitted to enrol. [1-0-0]

CPSC 352 (4) INTRODUCTION TO SOFTWARE ENGINEERING. Specification, design, implementation and maintenance of large, multi-module software systems. Principles, techniques, methodologies and tools for software development. Prerequisite: CPSC 252. Corequisite: EECE 320. Equivalency: CPSC 310. [3-2-0]

CPSC 398 (3) CO-OPERATIVE WORK PLACEMENT III. Approved and supervised technical work experience in the computing industry for a minimum of 3.5 months. Normally taken during the summer following the third year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Computer Science.

CPSC 399 (3) CO-OPERATIVE WORK PLACEMENT IV. Approved and supervised technical work experience in the computing industry for a minimum of 3.5 months. Normally taken during the fall term of the fourth year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Computer Science.

CPSC 402 (3) NUMERICAL LINEAR ALGEBRA. Investigation of the practical techniques of computational linear algebra. Orthogonal transformations and their applica-

tion to the solution of linear equations, the eigenproblem, and linear least squares. Complete solution of the symmetric eigenproblem, including bisection and the QR method. Refinements of these techniques for sparse matrices. Prerequisite: CPSC 302 and one of MATH 307, MATH 223. [3-0-0]

CPSC 403 (3) NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS. Investigation of practical computational methods for ordinary differential equations. Multistep and Runge-Kutta methods for initial value problems. Control of error and stepsize. Special methods for stiff equations. Shooting, finite difference, and variational methods for linear and nonlinear boundary value problems. Prerequisite: All of CPSC 303, MATH 316. [3-0-0]

CPSC 404 (3) ADVANCED RELATIONAL DATABASES. Physical database design, file organization, indexing and hashing, multimedia issues, relational query processing and optimization. Prerequisite: CPSC 304 and one of CPSC 213, CPSC 218, EECE 259. [3-0-0]

CPSC 405 (3) MODELLING AND SIMULATION. Numeric models of dynamic systems with emphasis on discrete stochastic systems. State description of models, common model components and entities. A thorough description of a common simulation language. Simulation using algebraic languages. Methodology of simulation: data collection, model design, analysis of output, optimization, validation. Elements of queuing theory and its relationship to simulation. Applications to models of computer systems. Prerequisite: Either (a) one of CPSC 216, CPSC 221, CPSC 252 or (b) CPSC 260; and either (a) STAT 241 or (b) STAT 200 and one of MATH 302, STAT 302. [3-0-0]

CPSC 410 (3) ADVANCED SOFTWARE ENGINEERING. Specification, design, construction and validation of multi-version software systems. Prerequisite: Either (a) CPSC 310 or (b) all of EECE 310, EECE 315. [3-0-0]

CPSC 411 (3) INTRODUCTION TO COMPILER CONSTRUCTION. A practical introduction to lexical analysis, syntactic analysis, type-checking, code generation and optimization. This will be used to design and implement a compiler for a small Pascal-like language. Prerequisite: CPSC 311 and one of CPSC 213, CPSC 218. [3-0-0]

CPSC 415 (3) ADVANCED OPERATING SYSTEMS. Process synchronization and communication schemes, including message-passing and concepts of monitor and serializer. Virtual memory systems management and the problem of information sharing in such systems. The working set principle. Traps and interrupt handling. Elementary queuing theory and its application such as process scheduling, system balancing and load control. File systems and operating system design methodologies. Prerequisite: Either (a) one of CPSC 313, CPSC 315 or (b) EECE 315. [0-0; 3-0]

CPSC 416 (3) DISTRIBUTED SYSTEMS. Introduction to distributed operating systems. Communication architecture and models for interprocess communication. Process migration, naming, distributed file systems, fault tolerance, and concurrency control. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar.) Prerequisite: Either (a) CPSC 313 or (b) CPSC 315. with CPSC 318 recommended. [3-0-0]

CPSC 417 (3) COMPUTER COMMUNICATIONS. Layered protocols, packet switching, data communications, and queuing analysis. Data link controls. Virtual circuits, datagrams, network design, routing, flow and congestion control. Satellite and packet radio links. Local area networks. Prerequisite: One of CPSC 313, CPSC 315 and one of STAT 200, STAT 241. [3-0-0]

CPSC 418 (3) ADVANCED COMPUTER ARCHITECTURES. Introduction to advanced processor architectures and taxonomical views; performance considerations. Introduction to parallel machine designs. Examination of pipeline organizations; pipelined ALU and control units; representative architectures. Exploratory non-Von Neumann architectural models including: object-oriented, tagged, capability, dataflow and RISC designs. Prerequisite: Either (a) CPSC 313 or (b) all of CPSC 315, CPSC 318. [3-0-1]

CPSC 420 (3) ADVANCED ALGORITHMS DESIGN AND ANALYSIS. The study of advanced topics in the design and analysis of algorithms and associated data structures. Topics include algorithms for graph-theoretic; algebraic and geometric problems; algorithms on nonsequential models; complexity issues; approximation algorithms. Prerequisite: CPSC 320. [3-0-0]

CPSC 421 (3) INTRODUCTION TO THEORY OF COMPUTING. Characterizations of computability (using machines, languages and functions). Universality, equivalence and Church's thesis. Unsolvable problems. Restricted models of computation. Finite automata, grammars and formal languages. Prerequisite: Either (a) CPSC 221 or (b) all of CPSC 216, CPSC 220 or (c) all of CPSC 260, EECE 320. CPSC 320 is recommended. [3-0-0]

CPSC 422 (3) INTELLIGENT SYSTEMS. Principles and techniques underlying the design, implementation and evaluation of intelligent computational systems. Applications of artificial intelligence to natural language understanding, image understanding and computer-based expert and advisor systems. Advanced symbolic programming methodology. Prerequisite: All of CPSC 312, CPSC 322. [3-0-0]

CPSC 424 (3) GEOMETRIC MODELING. Introduction to curves and surfaces, in particular splines, subdivision surfaces, polygonal meshes. Principles and mathematical foundations for representing complex geometry for computer graphics and numerical simulations. Practical applications of different modeling techniques. Prerequisite: MATH 221 and one

of MATH 227, MATH 317 and either (a) CPSC 216 or (b) CPSC 221 or (c) all of CPSC 211, CPSC 260, EECE 320. Corequisite: One of CPSC 314, EECE 478. [3-0-1]

CPSC 425 (3) COMPUTER VISION. Introduction to the processing and interpretation of images. Image sensing, sampling, and filtering. Algorithms for colour analysis, texture description, stereo imaging, motion interpretation, 3D shape recovery, and recognition. Prerequisite: All of MATH 200, MATH 221 and either (a) CPSC 216 or (b) CPSC 221 or (c) all of CPSC 260, EECE 320. [3-0-0]

CPSC 426 (3) COMPUTER ANIMATION. Motion in computer graphics for characters and their environments. Keyframing, inverse kinematics, particle systems, rigid body dynamics, contact and collision, controller-based active motion, motion capture. Prerequisite: One of CPSC 314, CPSC 414, EECE 478. [3-0-0]

CPSC 430 (3) COMPUTERS AND SOCIETY. Impact of computer technology on society; historical perspectives; social and economic consequences of large-scale information processing systems and automatic control; legal and ethical problems in computer applications. Computers and the individual: machine versus human capabilities, fact and fancy; problematic interface between man and machine. Prerequisite: 3 credits of Computer Science and at least third-year standing. [3-0-0]

CPSC 444 (3) USER INTERFACE DESIGN. User-centered design, analysis, prototyping, and evaluation of interactive systems based on formal models of human behaviour and software development methodology. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar.) Prerequisite: CPSC 310 and CPSC 398 or CPSC 310 and corequisite of CPSC 319. [3-1-0]

CPSC 445 (3) ALGORITHMS IN BIOINFORMATICS. Sequence alignment, phylogenetic tree reconstruction, prediction of RNA and protein structure, gene finding and sequence annotation, gene expression, and biomolecular computing. Prerequisite: CPSC 320 and 6 credits of BIOL beyond BIOL 111. [3-0-0]

CPSC 448 (3/6) C DIRECTED STUDIES IN COMPUTER SCIENCE. Open ordinarily to Honours students in Computer Science, with the permission of the department head. The course may consist of supervised reading, participation in a seminar, and one or more programming projects.

CPSC 449 (6) HONOURS THESIS. Under supervision of a faculty member, students investigate a research topic and prepare a thesis. Prerequisite: CPSC 349.

CPSC 490 (3) STUDENT DIRECTED SEMINARS. Self-directed, collaborative studies, in a group-learning environment, initiated and coordinated by senior undergraduate students with the supervision of a faculty advisor. Course structure, enrollment and delivery methods will comply with the

“Handbook for Student Directed Seminars”. [3-0-0]

CPSC 499 (3) CO-OPERATIVE WORK PLACEMENT V. Approved and supervised technical work experience in the computing industry for a minimum of 3.5 months. Normally taken during the summer following the fourth year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Computer Science.

CPSC 500 (3) FUNDAMENTALS OF ALGORITHM DESIGN AND ANALYSIS. [3-0-0]

CPSC 501 (3) THEORY OF AUTOMATA, FORMAL LANGUAGES AND COMPUTABILITY. The scope and limitations of effective computation. General and restricted models of computation formal languages and grammars. Relations between automata and formal languages. Resource bounded computation. Applications in parsing, pattern matching, and the design of efficient algorithms. Prerequisite: CPSC 421.

CPSC 502 (3) ARTIFICIAL INTELLIGENCE I. An introduction to AI emphasizing various approaches to the representation of domain-specific knowledge and methods of reasoning using these representations. Typical applications to be discussed include natural language understanding systems, problem solving, deductive question-answering, production-based expert systems and machine vision. Prerequisite: Sufficient programming background (e.g., CPSC 310) and consent of instructor.

CPSC 503 (3) COMPUTATIONAL LINGUISTICS I. Formal models for natural language: phrase-structure grammars, context-free grammars, context-sensitive grammars, transformational grammars; syntactic analysis by computer. Prerequisite: Sufficient programming background (e.g., CPSC 310) and consent of instructor.

CPSC 504 (3) DATA MANAGEMENT.

CPSC 505 (3) IMAGE UNDERSTANDING I: IMAGE ANALYSIS. Image formation constraints and the processing of digital images in order to extract information about the world being imaged. Computational models for analysis. Prerequisite: Sufficient programming background (e.g., CPSC 310) and consent of instructor.

CPSC 506 (3) COMPLEXITY OF COMPUTATION. Abstract complexity theory, time and space hierarchies, properties of complexity measures. Provably intractable problems, reducibilities and complete problems $P = NP$ question. Concrete complexity and algorithms design. Resource trade-offs. Prerequisite: CPSC 320.

CPSC 507 (3) SOFTWARE ENGINEERING.

CPSC 508 (3) OPERATING SYSTEMS. Principles and techniques for the design and implementation of operating systems, especially distributed operating systems and operating systems for parallel computer systems. The

concept of object model applied to operating system design. Prerequisite: CPSC 416.

CPSC 509 (3) PROGRAMMING LANGUAGE PRINCIPLES. Comparative study of language constructs; effects on implementation.

CPSC 510 (3) MULTIGRID AND MULTILEVEL METHODS. Numerical methods based on multi-level resolution for solving large sparse systems with an appropriate local structure. Practical and theoretical aspects investigated. Prerequisite: CPSC 302.

CPSC 511 (3) IMPLEMENTATION OF PROGRAMMING LANGUAGES. Advanced techniques for the implementation of programming languages. Translator writing systems. Special classes of grammars of interest to compiler writers. Code optimization. Prerequisite: CPSC 411.

CPSC 512 (3) ARCHITECTURE AND CONTROL IN ARTIFICIAL INTELLIGENCE. The interaction of computational architecture, control schemes and representational formalism in solving artificial intelligence problems. The concept of a virtual machine. Language constructs for representation and control, logic programming, concurrent systems, object-oriented methods. Serial machines, parallel and distributed machines, coarse-grain to fine-grain parallelism, SIMD/MIMD control. Applications to computational vision, robotics, reasoning and diagnosis. Prerequisite: CPSC 312.

CPSC 513 (3) INTEGRATED SYSTEMS DESIGN.

CPSC 514 (3) COMPUTER GRAPHICS: RENDERING.

CPSC 515 (3) COMPUTATIONAL ROBOTICS.

CPSC 516 (3) COMPUTATIONAL GEOMETRY. The design and analysis of algorithms for geometric problems including convexity, intersection, search, proximity and optimization. Lower bound arguments, NP-completeness results, parallel algorithms, probabilistic algorithms, approximation algorithms, dynamization techniques, effects of preprocessing and other issues applicable to geometric problems Applications of geometric algorithms. Prerequisite: CPSC 320.

CPSC 517 (3) SPARSE MATRIX COMPUTATION. Algorithms for computational solution of basic numerical linear algebra problems applied to large sparse matrices. Solution of large sparse linear systems by direct and iterative methods; application to linear least squares problems; computation of eigenvalues and singular values of large sparse matrices.

CPSC 519 (3) LOGIC PROGRAMMING AND FUNCTIONAL PROGRAMMING. An introduction to the theory, applications and implementation of logic programming languages and functional programming languages. Dataflow architecture to support logic and functional programming languages. Prerequisite: All of CPSC 311, CPSC 312.

CPSC 520 (3) NUMERICAL SOLUTION OF DIFFERENTIAL EQUATIONS. Finite difference and finite element methods for time-dependent partial differential equations. Explicit and implicit schemes, stability and accuracy considerations, choice of boundary conditions, efficiency of computation, special schemes for particular linear and nonlinear equations. Prerequisite: CPSC 403.

CPSC 521 (3) PARALLEL ALGORITHMS AND ARCHITECTURES.

CPSC 522 (3) ARTIFICIAL INTELLIGENCE II. Heuristic search and game-playing. Problem solving and planning. Problem reduction, and/or trees, goal-directed behaviour. Expert, diagnosis, and advising systems. Knowledge-based systems. Prerequisite: Sufficient programming background e.g., CPSC 310 and CPSC 503, or consent of instructor. CPSC 502 would be helpful, but is not essential.

CPSC 523 (3) COMPUTATIONAL LINGUISTICS II. Natural language processing by computer. Modelling of dialogue and discourse. Applications in question-answering interfaces for large databases. Prerequisite: CPSC 503.

CPSC 524 (3) COMPUTER GRAPHICS: MODELING.

CPSC 525 (3) IMAGE UNDERSTANDING II: SCENE ANALYSIS. Computer-based techniques for image understanding. The development of paradigms for knowledge representation and use in image understanding. Descriptive languages and picture grammars. Block world scene analysis. Control regimes. Programming languages and systems for perception. Representing scene domain knowledge. Applications to various scene domains including remote sensing. Prerequisite: CPSC 505.

CPSC 526 (3) COMPUTER ANIMATION.

CPSC 527 (3) COMPUTER COMMUNICATION PROTOCOLS. Fundamentals of computer communications and OSI lower level protocols. Higher-level protocols: transport, session, presentation and application layers. Introduction to formal techniques for protocol specification, verification and testing. Prerequisite: CPSC 417.

CPSC 528 (3) FORMAL TECHNIQUES FOR COMMUNICATION PROTOCOLS. Current development in higher-level protocol standards. Formal description techniques (FDTs). Methods and tools for protocol implementation, testing, and verification/validation. Prerequisite: CPSC 527.

CPSC 529 (3) DEFINITION OF PROGRAMMING LANGUAGES. Approaches to defining the syntax and semantics of programming languages.

CPSC 530 (2-6) C TOPICS IN INFORMATION PROCESSING.

CPSC 531 (3-6) D TOPICS IN THEORY OF COMPUTATION. Possible topics: algebraic structure of automata, program schemata,

recursive function theory, computability and logic, language theory.

CPSC 532 (2-6) D TOPICS IN ARTIFICIAL INTELLIGENCE. Possible topics: current issues in representation and control, induction and learning, program synthesis, and robotics.

CPSC 533 (2-6) D TOPICS IN COMPUTER GRAPHICS. Possible topics: curve and surface modeling, including splines; computer animation; rendering techniques, including local and global illumination models, algorithms; modeling natural phenomena; user interface design; colour and human perception; high performance architectures; multimedia and hypermedia.

CPSC 534 (2-6) D TOPICS IN DATA MANAGEMENT.

CPSC 535 (2-6) D TOPICS IN SIMULATION AND OPTIMIZATION. Possible topics: simulation languages, Monte Carlo methods, construction of models of various natural and artificial systems, implementation of optimization algorithms.

CPSC 536 (2-6) D TOPICS IN ALGORITHMS AND COMPLEXITY. Possible topics: graph theory—algorithms and applications, geometric complexity, combinatorial algorithms, advanced data structures, arithmetic complexity, circuit complexity, approximation and probabilistic algorithms.

CPSC 537 (2-6) D TOPICS IN CODING AND INFORMATION THEORY. Possible topics: Properties of Shannon's information measure, source encoding discrete memoryless channels, the fundamental theorem of information theory, linear and cyclic error correcting codes; selected topics from the analysis of channels with memory and from algebraic coding theory.

CPSC 538 (2-6) D TOPICS IN COMPUTER SYSTEMS. Possible topics: advanced architectures; distributed systems; performance analysis; protocol and software engineering.

CPSC 539 (2-6) D TOPICS IN PROGRAMMING LANGUAGES. Possible topics: formal aspects of translation; formal definition methods; extensible languages; correctness of programs. Applications of semantic methods to the design of language.

CPSC 540 (3) MACHINE LEARNING.

CPSC 541 (3) COMPUTATIONAL METHODS FOR ORDINARY DIFFERENTIAL EQUATIONS & DYNAMICAL SYSTEMS.

CPSC 542 (2-6) D TOPICS IN NUMERICAL COMPUTATION. Various topics not covered in specific graduate courses in numerical computation.

CPSC 543 (3) PHYSICAL USER INTERFACE DESIGN AND EVALUATION.

CPSC 544 (3) HUMAN COMPUTER INTERACTION.

CPSC 545 (3) ALGORITHMS FOR BIOINFORMATICS.

CPSC 548 (3) DIRECTED STUDY.

CPSC 549 (6/12) C MASTER'S THESIS.

CPSC 554 (2-6) D TOPICS IN HUMAN-COMPUTER INTERACTION. Possible topics: Multimodal user interface design, research and testing methodologies, perception user modeling, computation and adaptation.

CPSC 564 (3) DATA MINING.

CPSC 589 (3) M.SC. MAJOR ESSAY.

CPSC 590 (3) RESEARCH METHODS IN COMPUTER SCIENCE.

CPSC 649 (0) PH.D. THESIS.

CRWR — CREATIVE WRITING FACULTY OF ARTS

For admission requirements for all courses see Creative Writing entry under Arts.

CRWR 202 (6) CREATIVE FORMS. Designed for beginning writers, including first-year students by special permission. Short story, shorter play forms, and verse. Instructors may also give assignments in other forms such as plays for screen, television or radio, or imaginative non-fictional prose.

CRWR 301 (6) WRITING TECHNIQUES. Designed for beginning writers and other students who have a particular interest in the uses of literary techniques and ways of transferring these from one genre to another. The course is very suitable for prospective teachers and writers from the Diploma in Applied Creative Non-fiction. Major emphasis is given to the students' own writing. Performance in workshop (i.e., opportunity to respond and evaluate others' work) and an understanding of technique and basic principles in writing make up a minor portion of the final evaluation.

CRWR 306 (3) INTRODUCTION TO SCREENPLAY I. Techniques of creating, developing and writing a screenplay. Screen forms include the feature film, the short film, the documentary, and writing for television. No prerequisites or manuscript submission required.

CRWR 307 (3) INTRODUCTION TO SCREENPLAY II. Workshop in which students write their own screenplays, critique the work of other students, and work on the outline and the screenplay form. Admission upon acceptance of portfolio.

CRWR 403 (6) WRITING OF CHILDREN'S LITERATURE. Techniques of writing for children in various genres. Limitations as to the children's age group and genres to be set by the instructor. Instruction given through workshop and individual tuition.

CRWR 404 (6) WRITING OF DRAMA AND FEATURES FOR RADIO.

CRWR 405 (6) CREATIVE FORMS AND TECHNIQUES OF NON-FICTION. The use of literary techniques in the writing of non-fictional forms such as personal essay, memoir, biography, autobiography, travelogue, popular history, and miscellany.

CRWR 406 (6) WRITING OF DRAMA FOR SCREEN AND TELEVISION. Some studio work may be required. Focus is on writing. Students

whose chief interest is film and TV production should refer to the Theatre listings.

CRWR 407 (6) WRITING OF DRAMA FOR THE STAGE. Studio work is required, and some plays may be given workshop production.

CRWR 408 (6) WRITING OF THE NOVELLA OR NOVEL.

CRWR 409 (6) WRITING OF THE SHORT STORY.

CRWR 410 (6) WRITING OF POETRY.

CRWR 415 (6) THEORY AND PRACTICE OF TRANSLATION. Where a language department is regularly consulted on a project, the language adviser may assign marks equal to 3 credits of the course. Prerequisite: Evidence of promise as a translator and proficiency in at least one language other than English.

CRWR 416 (6) RESEARCH AND WRITING. Feature and investigative articles, essays and studies in any subject area for a general audience. Involves instruction in the use of literary as well as research techniques such as the interview.

CRWR 417 (3/6) D PLAY DEVELOPMENT WORKSHOP. An interdisciplinary course, in cooperation with the Theatre program, emphasizing script development through scene work, character development and stagecraft. Prerequisite: Manuscript submission or equivalent theatre experience.

CRWR 439 (3/6) C SPECIAL PROJECTS IN CREATIVE WRITING.

CRWR 447 (6) DIRECTED READING. The course will emphasize current trends and techniques rather than critical evaluation. Not offered every year.

CRWR 491 (6) TUTORIAL IN WRITING OF CHILDREN'S LITERATURE. For students who receive departmental permission to do advanced work in this genre.

CRWR 492 (6) TUTORIAL IN WRITING OF NON-FICTIONAL PROSE. For students who receive departmental permission to do advanced work in this genre.

CRWR 493 (6) TUTORIAL IN WRITING OF DRAMA AND FEATURES FOR RADIO. For students who receive departmental permission to do advanced work in this genre.

CRWR 494 (6) TUTORIAL IN WRITING OF DRAMA FOR SCREEN AND TELEVISION. For students who receive departmental permission to do advanced work in this genre.

CRWR 495 (6) TUTORIAL IN TRANSLATION. For students who receive departmental permission to do advanced work in translation.

CRWR 496 (6) POETRY TUTORIAL.

CRWR 497 (6) TUTORIAL IN FICTION. For students who receive departmental permission to do advanced work in this genre.

CRWR 498 (6) TUTORIAL IN DRAMA. For students who receive departmental permission to do advanced work in this genre.

CRWR 503 (6) ADVANCED WRITING OF CHILDREN'S LITERATURE.

CRWR 504 (6) ADVANCED WRITING OF DRAMA AND FEATURES FOR RADIO.

CRWR 505 (6) CREATIVE FORMS AND TECHNIQUES OF NON-FICTION (ADVANCED).

CRWR 506 (6) ADVANCED WRITING OF DRAMA FOR SCREEN AND TELEVISION.

CRWR 507 (6) ADVANCED WRITING OF DRAMA FOR THE STAGE.

CRWR 508 (6) ADVANCED WRITING OF THE NOVELLA OR NOVEL.

CRWR 509 (6) ADVANCED WRITING OF SHORT FICTION.

CRWR 510 (6) ADVANCED WRITING OF POETRY.

CRWR 515 (6) ADVANCED WORKSHOP IN TRANSLATION. Where a language department is regularly consulted on a project, the language adviser may assign marks equal to 3 credits of the course work.

CRWR 516 (6) RESEARCH AND WRITING OF FEATURE AND INVESTIGATIVE ARTICLES, ESSAYS AND STUDIES (ADVANCED).

CRWR 517 (3/6) D ADVANCED PLAY DEVELOPMENT WORKSHOP. An interdisciplinary course, in co-operation with the Acting and the M.F.A. Directing programs in Theatre, emphasizing script development through scenework, character development, and stagecraft. Prerequisite: Manuscript submission or equivalent theatre experience.

CRWR 521 (6) EDITING AND MANAGING A LITERARY MAGAZINE. Operation of a literary magazine; editing and evaluating creative writing submissions. Prerequisite: Permission of the instructor is required.

CRWR 539 (3/6) D ADVANCED PROJECTS IN CREATIVE WRITING.

CRWR 547 (6) DIRECTED READING. May not be offered every year.

CRWR 549 (6) THESIS.

CSED — COMPUTING STUDIES EDUCATION FACULTY OF EDUCATION

CSED 314 (4/5) D CURRICULUM AND INSTRUCTION IN COMPUTER STUDIES: SECONDARY. Pass/Fail. Prerequisite: A completed concentration in Computer Science or permission of the head.

CSED 400 (3) COMPUTERS IN EDUCATION. Current research and practice concerning uses of computers in education, including computer-assisted instruction and computer-augmented instruction. [3-0]

CSED 402 (3) PROFESSIONAL USE OF MICROCOMPUTERS FOR TEACHERS. Principles and techniques of using microcomputers to improve teaching performance and classroom administration. Students will use word processors, spreadsheets, graphics utilities, database programs, and other software useful to teachers. [3-1]

CSED 420 (3) COMPUTERS FOR INSTRUCTION. Instructional applications of microcomputer programs in a variety of subject areas; basic design and sequencing of educational software. Introduction to a programming language. [3-2]

CSED 422 (3) COMPUTERS IN THE ELEMENTARY SCHOOL. Theory and practice concerning the use of microcomputers in the elementary school. [3-2]

CSED 424 (3) COMPUTERS IN THE SECONDARY SCHOOL. Theory and practice concerning the use of microcomputers in the secondary school, including software design and programming. [3-2]

CSED 450 (3) DEVELOPMENT OF EDUCATIONAL SOFTWARE. The software development process; principles and techniques for effective communication with a microcomputer; formative software evaluation. Students will design and develop an instructional package. Prerequisite: CSED 420. [3-2]

CSED 508 (3-6) D REVIEW OF RESEARCH IN COMPUTING STUDIES. Studies are made of recent research bearing on the applications of computers in education.

CSED 546 (3) SEMINAR IN THE TEACHING OF COMPUTING STUDIES. Curriculum, instruction and organization of computing studies courses in the secondary school. Prerequisite: CSED 314 or extensive experience with teaching computing studies in the schools.

CSED 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD. Courses in various subject matter fields designed to bring teachers up to date in recent findings in each field.

CSED 580 (3-12) C PROBLEMS IN COMPUTING IN EDUCATION. Investigation and report of a problem from the area of Computing Studies Education.

CSED 590 (3) GRADUATING PAPER. Pass/Fail.

CSIS — CRITICAL STUDIES IN SEXUALITY FACULTY OF ARTS

CSIS 300 (3/6) D INTRODUCTION TO CRITICAL STUDIES IN SEXUALITY. A multidisciplinary, team-taught course which provides an introduction to the study of sexuality, including lesbian, gay, bisexual, heterosexual, and transgender issues and related topics.

CSIS 450 (3-6) D TOPICS IN CRITICAL STUDIES IN SEXUALITY. A thematic course, which explores current questions and issues in relation to the study of sexuality. Topics may vary from year to year.

CSIS 490 (3/6) D DIRECTED TOPICS. Designed to allow a student to develop an individual course of study in a specific area as approved by a faculty member affiliated with the CSIS program.

CSIS 500 (3/6) D CRITICAL STUDIES IN SEXUALITY: MULTIDISCIPLINARY APPROACHES.

CSPW — COORDINATED SCIENCE PROGRAM WORKSHOP FACULTY OF SCIENCE

CSPW 100 (1) COORDINATED SCIENCE PROGRAM WORKSHOP. Students participate in activities related to their CSP courses, including hands-on work, discussion and analysis of scientific topics. Graded Pass/Fail. Prerequisite: Registration in Coordinated Science Program [0-0-2; 0-0-2]

CUST — CURRICULUM STUDIES FACULTY OF EDUCATION

CUST 300 (1) TEACHING AND LEARNING ACROSS THE CURRICULUM: ELEMENTARY. Pass/Fail. [1-0-0]

CUST 306 (3) CURRICULUM AND INSTRUCTION IN HEALTH EDUCATION. School health promotion programs and policies; child and adolescent health knowledge, attitudes, and behaviours; curriculum planning; teaching methods and strategies for grades K–12.

CUST 307 (3) HEALTH EDUCATION AND PROMOTION.

CUST 308 (3/6) D ISSUES IN HEALTH EDUCATION.

CUST 314 (4/5) D CURRICULUM AND INSTRUCTION IN APPLIED STUDIES IN MATHEMATICS, SCIENCE AND TECHNOLOGY I: SECONDARY. Pass/Fail.

CUST 321 (3) COMPUTER STUDIES IN ART AND MUSIC. [1-4]

CUST 322 (3) COMPUTER STUDIES IN ART AND MUSIC EDUCATION USING MULTIMEDIA. Prerequisite: CUST 321. [1-4-0]

CUST 363 (3) INTERDISCIPLINARY/INTEGRATED CURRICULUM AND INSTRUCTION. Theory and practice of interdisciplinary and integrated studies; instructional methods, materials, and plans; evaluation strategies. The specific curricular focus may vary. [3-0]

CUST 396 (3–12) D CURRICULUM DEVELOPMENT AND EVALUATION. Practical and conceptual issues of developing and evaluating elementary and/or secondary school curricula will be discussed in relation to concurrent classroom pre-service or in-service experience.

CUST 412 (3) CURRICULUM FOR CAREER PROGRAMS.

CUST 414 (3) CURRICULUM AND INSTRUCTION IN APPLIED STUDIES IN MATHEMATICS, SCIENCE, AND TECHNOLOGY II: SECONDARY. Prerequisite: CUST 314. [3-0-0]

CUST 416 (3/6) D SPECIAL TOPICS IN CURRICULUM STUDIES. Advanced study designed to bring teachers up to date with current research and developments. [3-0-0]

CUST 424 (3) CURRICULUM FOR GLOBAL EDUCATION. Key concepts, teaching strategies, and curriculum planning for grades K–12. [3-0-0]

CUST 431 (3) VISUAL LITERACY ACROSS THE CURRICULUM. Prerequisite: One of EDUC 310, EDUC 311 or teaching experience.

CUST 432 (3) MEDIA EDUCATION ACROSS THE CURRICULUM. Prerequisite: One of EDUC 310, EDUC 311 or teaching experience.

CUST 440 (3–9) D SPECIAL STUDY IN A SUBJECT-MATTER FIELD. Topics in a subject field relevant to teaching and not covered in previous undergraduate work. Pass/Fail.

CUST 487 (6) RECENT DEVELOPMENTS IN ELEMENTARY CURRICULUM AND INSTRUCTION. An examination of recent changes in the organization and curriculum of elementary schools. [3-0; 3-0]

CUST 488 (3) KEY CURRICULAR ORIENTATIONS: PROGRESSIVISM. Key concepts and practical implications of progressive curricular orientations. [3-0]

CUST 510 (3) VIDEO ETHNOGRAPHY IN EDUCATION RESEARCH: CULTURE, TECHNOLOGY AND INTERPRETATION. Prerequisite: An introductory course in research methods or permission of the instructor is required

CUST 512 (3/6) D EDUCATION ACTION RESEARCH.

CUST 558 (3) MASTER'S SEMINAR. Pass/Fail.

CUST 562 (3) INTRODUCTION TO CURRICULUM ISSUES AND THEORIES.

CUST 563 (3) CURRICULUM EVALUATION. An examination of various concepts and methods pertinent to the evaluation of curricula. Prerequisite: EDCI 562.

CUST 564 (3) TEXTS, POLITICS, AND IDEOLOGIES OF CURRICULUM DEVELOPMENT.

CUST 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD.

CUST 566 (3) CURRICULUM CHANGE AND IMPLEMENTATION. Theories of educational change, current research literature, and principles for planning and evaluating curriculum implementation.

CUST 568 (3) CURRICULA IN THEIR HISTORICAL CONTEXT.

CUST 580 (3/12) C PROBLEMS IN EDUCATION.

CUST 590 (3) GRADUATING PAPER.

CUST 598 (3/12) C FIELD EXPERIENCES.

CUST 599 (6–12) C MASTER'S THESIS.

CUST 601 (3/6) D DOCTORAL SEMINAR.

CUST 602 (3/6) D DOCTORAL SEMINAR. Pass/Fail

CUST 699 (0) DOCTORAL THESIS. Pass/Fail.

DENT — DENTISTRY FACULTY OF DENTISTRY

DENT 407 (6) ORAL HEALTH CARE IN RESIDENTIAL CARE SETTINGS.

DENT 410 (15) DENTISTRY I. Introduction to dentistry and supporting science in classroom, laboratory and clinical settings, usually in small groups. Patient-centred communication skills, standards of professional behavior, dental and medical clinical skills, dental anatomy, and fundamentals of oral systems and diseases as related to body systems.

DENT 420 (15) DENTISTRY II. Integration of supporting science, preclinical medicine, and dentistry in classroom, small group, and clinical settings. Adult and pediatric patient assessment, dental charting and record keeping, oral and maxillofacial radiology, assessment of temporomandibular joints and occlusion, dental and medical clinical skills, oral mucosal disease, diagnostic casts and biomaterials, and occlusal records and articulation. Prerequisite: DENT 410. [0-3-0]

DENT 430 (58) DENTISTRY III. An integrated clinical, affective and cognitive course utilizing hybrid problem-based didactic learning with concurrent simulation and clinical learning. Students function as team members in clinical group practices with individual progression through the Clinical Clerkships. Prerequisite: DENT 420. [10-12-36]

DENT 440 (50) DENTISTRY IV. A continuing integrated clinical, affective and cognitive experience with ongoing participation in clinical group practices and individual progression through the Clinical Clerkships. Prerequisite: DENT 430. [5-6-20]

DENT 523 (6) ORAL MEDICINE II. [0-6-3; 0-6-3]

DENT 540 (6) RESEARCH METHODS AND SEMINARS IN ORAL BIOLOGY. [3-0-0; 3-0-0]

DENT 541 (6) CRANIOFACIAL BIOLOGY. [3-0-0; 3-0-0]

DENT 542 (6) BIOLOGY OF ORAL TISSUES. [3-0-0; 3-0-0]

DENT 543 (3) ADVANCED OCCLUSION AND ARTICULATION. [3-0-0; 3-0-0]

DENT 544 (3) D ADVANCED TOPICS IN ORAL MICROBIOLOGY.

DENT 553 (3) ORAL MEDICINE I. [0-6-3]

DENT 555 (2) ORAL RADIOLOGY.

DENT 556 (2) ORAL RADIOLOGY.

DENT 557 (6) ADVANCED ORAL RADIOLOGY. [0-6-3; 0-6-3]

DENT 561 (2–6) D DIRECTED STUDIES IN DENTAL SCIENCES.

DENT 570 (2) PERIODONTAL CASE MANAGEMENT.

DENT 571 (3) CELL BIOLOGY OF DISEASED AND HEALING PERIODONTIUM.

DENT 572 (3/6) D LITERATURE REVIEW IN PERIODONTICS.

DENT 573 (3/6) D LITERATURE REVIEW IN PERIODONTICS II.

DENT 574 (1) PERIODONTIC TREATMENT PLANNING SEMINARS.

DENT 575 (3) IMPLANT THERAPY.

DENT 576 (2) GUIDED TISSUE REGENERATION.

DENT 577 (3-6) D ADVANCED TOPICS IN RESTORATIVE THERAPY.

DENT 599 (12) MASTER'S THESIS. Enrolment restricted to Graduate Students in Dental Science.

DENT 649 (0) PH.D. THESIS.

DENT 700 (0) DIRECTED STUDIES IN ORTHODONTICS.

DENT 703 (0) INTER-RELATIONSHIP OF DENTAL AND MEDICAL SPECIALTIES WITH IMAGING PROCEDURES.

DENT 706 (0) FORENSIC ODONTOLOGY.

DENT 711 (0) CLINICAL PERIODONTICS.

DENT 715 (0) PERIODONTAL THERAPY SEMINARS.

DENT 720 (0) REVIEW OF ORAL RADIOLOGY LITERATURE.

DENT 723 (0) PRESCRIPTION PERIODONTAL SURGERY.

DENT 729 (0) HOSPITAL DENTISTRY AND ANAESTHESIOLOGY.

DENT 734 (0) CLINICO-PATHOLOGICAL CONFERENCES.

DENT 740 (0) CLINICAL DENTISTRY.

DENT 741 (0) SPECIALTY ROTATIONS.

DENT 742 (0) EMERGENCY PATIENT MANAGEMENT.

DENT 743 (0) SEMINARS ON HOSPITAL DENTISTRY.

DENT 744 (0) DIRECTED STUDIES IN HOSPITAL DENTISTRY.

DENT 750 (0) HEAD AND NECK ONCOLOGY.

DENT 752 (0) ORAL SURGICAL PATHOLOGY.

DENT 753 (0) CLINICAL ORAL MEDICINE.

DENT 755 (0) ORAL RADIOGRAPHIC TECHNIQUES.

DENT 756 (0) ORAL RADIOLOGY.

DENT 757 (0) ORAL RADIOLOGICAL INTERPRETATION.

DENT 760 (0) ORAL CYTOLOGY.

DENT 770 (0) ADVANCED CLINICAL ORTHODONTICS.

DERM — CLINICAL DERMATOLOGY FACULTY OF MEDICINE

DERM 430 (1) CLINICAL DERMATOLOGY. Exposure to a number of aspects pertaining to the clinical practice of dermatology. Prerequisite:

Completion of first- and second-year medicine program.

DHYG — DENTAL HYGIENE FACULTY OF DENTISTRY

DHYG 400 (6) CURRENT ISSUES IN ORAL HEALTH SERVICES. Critical reviews of oral health care delivery, oral disease processes and dental hygiene. [3-0-0; 3-0-0]

DHYG 401 (2/5) C ORAL EPIDEMIOLOGY. The 5-credit version includes statistical content comparable to HCEP 400 or EPSE 482 and is available in on-line distance education format only. [0-0-0;0-2-0] or [online hours TBA] [0-0-0; 2-0-0]

DHYG 402 (6) DENTAL HYGIENE PRACTICE I. Dental hygiene concepts, processes, and skills for individuals and communities. [3-0-0; 3-0-0]

DHYG 404 (6) DENTAL HYGIENE PRACTICE II. Advanced dental hygiene concepts, processes and skills in community health, educational or institutional settings.

DHYG 405 (3) ORAL MICROBIOLOGY AND IMMUNOLOGY. Microbiology and immunological concepts for dental hygiene students.

DHYG 406 (3) D GUIDED STUDY IN DENTAL HYGIENE. Elective offered only in final year.

DHYG 433 (3) ASSESSMENT AND TREATMENT PLANNING FOR ADVANCED PERIODONTAL DISEASES. Available in online distance education format only.

DHYG 435 (3) ORAL MEDICINE AND PATHOLOGY. Pathobiology of oral diseases. Available in online distance education format only.

DHYG 461 (4) LITERATURE REVIEW I. [2-0-0; 2-0-0]

DHYG 462 (4) LITERATURE REVIEW II. A continuation of DHYG 461. [2-0-0; 2-0-0]

DPAS — DOCTOR/DENTIST, PATIENT & SOCIETY FACULTY OF MEDICINE

DPAS 410 (6) DOCTOR/DENTIST, PATIENT AND SOCIETY. This multidisciplinary course will examine critical issues in health care. Problem-based tutorials will address the patient-doctor relationship, health care systems, research, epidemiology, prevention, ethics, behavioural and social sciences, resource allocation, multiculturalism, and marginalized populations. [0-0-2]

DPAS 420 (6) DOCTOR/DENTIST, PATIENT AND SOCIETY. This multidisciplinary course will examine critical issues in health care. Problem-based tutorials will address the patient-doctor relationship, health care systems, research, epidemiology, prevention, ethics, behavioural and social sciences, resource allocation, multiculturalism and marginalized populations. [0-0-2]

DRAM — DRAMA FACULTY OF ARTS

DRAM 200 (3) DRAMA: FORMS AND IDEAS I. The Anatomy of Drama: Its history, aesthetic principles, performative potential.

DRAM 201 (3) DRAMA: FORMS AND IDEAS II. Topics in comparative drama; drama and the other performing arts; dramaturgy.

DRAM 300 (3) THEORY OF DRAMA PERFORMANCE. The basic principles of dramaturgy and theory of performance. Historical and contemporary writing on dramatic theory and criticism and their relation to theatrical practice.

DRAM 301 (3) STUDIES IN DRAMA. Topics will vary from year to year.

DRAM 400 (3) DRAMATURGY. Advanced problems in dramaturgy, both in a historical and a contemporary context.

EADM — EDUCATIONAL ADMINISTRATION FACULTY OF EDUCATION

EADM 501 (3) RESEARCH TRADITIONS IN EDUCATIONAL ADMINISTRATION.

EADM 502 (3) PROBLEM REFORMULATION SKILLS FOR ADMINISTRATION.

EADM 505 (3) THE ROLE OF THE SCHOOL PRINCIPAL.

EADM 507 (3) PERSONNEL ADMINISTRATION IN EDUCATION.

EADM 508 (3-12) D REVIEW OF RESEARCH METHODS IN EDUCATIONAL ADMINISTRATION.

EADM 517 (3) IMPROVEMENT OF INSTRUCTION THROUGH SUPERVISION.

EADM 520 (3) ADVANCED STUDY OF EDUCATIONAL ORGANIZATIONS.

EADM 522 (3) ADVANCED PROBLEM ANALYSIS AND REFORMULATION.

EADM 531 (3) POLITICS OF EDUCATIONAL GOVERNANCE. Equivalency: EDST 531.

EADM 532 (3) LEADERSHIP IN EDUCATIONAL ORGANIZATIONS. Equivalency: EDST 532.

EADM 548 (3) TEACHER UNIONS IN EDUCATION.

EADM 553 (3-6) D GROUP INQUIRY IN EDUCATIONAL ADMINISTRATION.

EADM 554 (3) ADMINISTRATION AND EDUCATIONAL POLICY.

EADM 555 (3) EDUCATIONAL FINANCE.

EADM 556 (3) LEADERSHIP AND ADMINISTRATION OF EDUCATIONAL PROGRAMS.

EADM 560 (3) SCHOOL LAW.

EADM 561 (3-12) D PRACTICUM SIMULATION IN SCHOOL LEADERSHIP AND ADMINISTRATION. Prerequisite: EADM 502.

EADM 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD.

EADM 579 (3) SCHOOL-COMMUNITY RELATIONS.

EADM 580 (3–12) C PROBLEMS IN EDUCATION.

EADM 581 (3) LEADERSHIP, ADMINISTRATION, AND THE AIMS OF EDUCATION.

EADM 582 (3) THE STUDY OF ORGANIZATIONS IN THE EDUCATIONAL CONTEXT.

EADM 590 (3) GRADUATING PAPER. Pass/Fail.

EADM 598 (3–12) C FIELD EXPERIENCES.

EADM 599 (6/12) C MASTER'S THESIS.

EADM 699 (0) DOCTORAL THESIS. Pass/Fail.

ECED — EARLY CHILDHOOD EDUCATION FACULTY OF EDUCATION

ECED 333 (3) PRE-KINDERGARTEN CURRICULUM. The development of prekindergarten programs with reference to recent research, theories of early learning, and curriculum trends and practices. [3-0]

ECED 334 (3) HOME, SCHOOL, AND COMMUNITY RELATIONS. Philosophy, history, and problems of the parent-teacher partnership; development of effective cooperation through individual parent-teacher conferences and parent-group discussions; examination of community services and inter-professional relationships on behalf of children. [3-0]

ECED 336 (3) HISTORY OF EARLY CHILDHOOD EDUCATION. Political and social factors which influenced movements and trends in early childhood education in North America, pre-kindergarten through primary. [3-0]

ECED 343 (3) PRE-KINDERGARTEN INSTRUCTION. Planning and implementing prekindergarten learning experiences; resources, materials, guidance, curriculum integration, evaluation, scheduling, and classroom design. [3-0]

ECED 380 (3–12) C SELECTED TOPICS IN EARLY CHILDHOOD EDUCATION.

ECED 405 (3) FOUNDATIONS OF CURRICULUM AND INSTRUCTION IN EARLY CHILDHOOD EDUCATION.

ECED 415 (3) SUPPORTING LEARNING IN THE PRIMARY YEARS. Prerequisite: ECED 405 or teaching experience or successful completion of the extended practicum. Corequisite: ECED 405 or teaching experience or successful completion of the extended practicum.

ECED 425 (3) ADVANCED STUDIES IN EARLY CHILDHOOD EDUCATION. Prerequisite: ECED 405.

ECED 433 (3) KINDERGARTEN CURRICULUM. The development of kindergarten programs with reference to recent research, theories of early learning, curriculum trends and practices, and the place of kindergarten in contemporary education. [3-0]

ECED 438 (3) OBSERVATION AND RECORDING. Methods of observing and recording children's behaviour in early childhood settings. [3-0]

ECED 443 (3) SUPPORTING LEARNING IN THE KINDERGARTEN YEAR. Prerequisite: One of ECED 405, ECED 433 or teaching experience, or successful completion of extended practicum. Corequisite: One of ECED 405, ECED 433 or teaching experience, or successful completion of extended practicum.

ECED 508 (3–12) C REVIEW OF RESEARCH IN EDUCATIONAL METHODS. Studies are made of recent research bearing on educational practice. Prerequisite: Appropriate senior undergraduate introductory or methods course.

ECED 561 (3–12) C LABORATORY PRACTICUM.

ECED 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD. Courses in various subject matter fields designed to bring teachers up to date in recent findings in each field.

ECED 580 (3–12) C PROBLEMS IN EDUCATION. Investigation and report of a problem.

ECED 585 (3–6) D ADVANCED SEMINAR ON RESEARCH IN EARLY CHILDHOOD EDUCATION.

ECED 590 (3) GRADUATING PAPER. Pass/Fail.

ECED 598 (3–12) C FIELD EXPERIENCES. For those on master's, doctoral and Diploma programs.

ECED 599 (6–12) D MASTER'S THESIS.

ECON — ECONOMICS FACULTY OF ARTS

For course prerequisites purposes, all of ECON 101, ECON 102 is equivalent to all of ECON 310, ECON 311, or to ECON 100 or to ECON 309. Many courses in Economics have a Mathematics prerequisite of MATH 104 (or equivalent) and/or MATH 105 (or equivalent). Courses equivalent to MATH 104 as a prerequisite are MATH 100, 111, 120, 140, 153, 180 and 184. For MATH 105 the equivalents are MATH 101, 103, 121, 141, and 154. Note ECON 490 and ECON 495 have been changed from 6 to 3 credits. For details of current listings and a menu of new courses (not yet in the printed calendar) see the departmental website at www.econ.ubc.ca.

ECON 101 (3) PRINCIPLES OF MICROECONOMICS. Elements of theory and of Canadian policy and institutions concerning the economics of markets and market behaviour, prices and costs, exchange and trade, competition and monopoly, distribution of income.

ECON 102 (3) PRINCIPLES OF MACROECONOMICS. Elements of theory and of Canadian policy and institutions concerning the economics growth and business cycles, national income accounting, interest and exchange rates, money and banking, the balance of trade.

ECON 201 (3) INTERMEDIATE MICROECONOMICS I. Consumer behaviour, exchange, production and cost, equilibrium of the firm under different market structures, industry equilibrium. Credit may be obtained for only one of ECON 201, ECON 206, ECON 301, ECON 304. Prerequisite: Either (a) all of ECON 101, ECON 102 or (b) all of ECON 100, MATH 104.

ECON 202 (3) INTERMEDIATE MACROECONOMIC ANALYSIS. Income and employment theory, monetary theory, the open economy, economic fluctuations and growth. Credit may be obtained for only one of ECON 202 and ECON 207, ECON 302, and ECON 305. Prerequisite: Either (a) all of ECON 101, ECON 102 or (b) ECON 100; and one of MATH 100, MATH 102, MATH 104, MATH 120, MATH 140, MATH 180, MATH 184.

ECON 207 (3) MACROECONOMIC ANALYSIS I. Income and employment theory, monetary theory, the open economy, economic fluctuations and growth. Intended primarily for prospective honours and other qualified students. Credit may be obtained for only one of ECON 202, ECON 207, ECON 302 and ECON 305. Prerequisite: All of ECON 101, ECON 102, MATH 104, MATH 105. Permission of the department is also acceptable.

ECON 210 (3) MICROECONOMIC POLICY. A survey of policy issues, such as regulation, taxation, environmental and resource policy, health care, education and income distribution. Prerequisite: All of ECON 101, ECON 102.

ECON 211 (3) MACROECONOMIC POLICY. A survey of policy issues, such as the costs of inflation and unemployment, monetary and fiscal policy, the effects of government debt and exchange rate policy. Prerequisite: All of ECON 101, ECON 102.

ECON 221 (3) INTRODUCTION TO STRATEGIC THINKING. An introduction to how people interact in strategic situations drawn from political science, history, psychology, law, biology, military history, economics, business, and anthropology. The focus will be on developing intuition.

ECON 226 (3) MAKING SENSE OF ECONOMIC DATA. Formulation of a testable hypothesis, identification of relevant data, use of appropriate statistical tools. Prerequisite: All of ECON 101, ECON 102.

ECON 234 (3) WEALTH AND POVERTY OF NATIONS. Historical approaches to long-run economic growth; international comparisons of income growth and inequality; colonialism; evolution of world capital markets; human migrations; rise of world trading empires; instability in the international economy. Credit will be granted for only one of ECON 234 and former ECON 334 (6). Prerequisite: All of ECON 101, ECON 102.

ECON 255 (3) UNDERSTANDING GLOBALIZATION. Social and economic implications for both rich and poor countries of lowered barriers to the international flows of information, capital, labour and goods. Prerequisite: All of ECON 101, ECON 102.

ECON 301 (3) INTERMEDIATE

MICROECONOMIC ANALYSIS I. Consumer behaviour, producer theory, exchange, monopoly, oligopoly, externalities, public goods, general equilibrium and welfare economics. Credit may be obtained for only one of ECON 201, ECON 206, ECON 301, ECON 304. Prerequisite: All of ECON 101, MATH 104, MATH 105.

ECON 302 (3) INTERMEDIATE

MACROECONOMIC ANALYSIS I. Income and employment theory, monetary theory, the open economy, economic fluctuations and growth. Credit may be obtained for only one of ECON 202, ECON 207, ECON 302, ECON 305. Prerequisite: All of ECON 101, ECON 102, MATH 105.

ECON 303 (3) INTERMEDIATE

MICROECONOMICS II. Risk and uncertainty, some concepts in game theory, adverse selection, moral hazard, bargaining, auctions. Credit may be obtained for only one of ECON 303 and 306. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304.

ECON 304 (3) HONOURS INTERMEDIATE

MICROECONOMIC ANALYSIS I. Consumer behaviour, producer theory, exchange, monopoly, oligopoly, externalities, public goods, general equilibrium and welfare economics. Credit may be obtained for only one of ECON 201 or 206 or 301 or 304. Prerequisite: A score of 68% or higher in all of ECON 101, MATH 104, MATH 105.

ECON 305 (3) HONOURS INTERMEDIATE

MACROECONOMIC ANALYSIS I. Income and employment theory, monetary theory, the open economy, economic fluctuations and growth. Credit may be obtained for only one of ECON 202, ECON 207, ECON 302, ECON 305. Prerequisite: All of ECON 101 [with 68% or above], ECON 102, MATH 104 [with 68% or above], MATH 105 [with 68% or above].

ECON 306 (3) HONOURS INTERMEDIATE

MICROECONOMICS II. Risk and uncertainty, some concepts in game theory, adverse selection, moral hazard, bargaining, auctions. Credit may be obtained for only one of ECON 303 and 306. Prerequisite: A score of 68% or higher in one of ECON 206, ECON 304. Permission of the department is also acceptable.

ECON 307 (3) HONOURS INTERMEDIATE

MACROECONOMICS II. Theories of economic growth and the business cycle. Intended primarily for prospective honours and other qualified students. Prerequisite: Either (a) a score of 68% or higher in ECON 207 or (b) a score of 68% or higher in ECON 305. Permission of the department is also acceptable.

ECON 310 (3) PRINCIPLES OF

MICROECONOMICS. The scope of this course is approximately the same as that of ECON101. The course is intended for upper-level students only. Credit will be given for only one of ECON 310 and ECON 101, ECON 308. Prerequisite: Third-year, fourth-year, or graduate standing.

ECON 311 (3) PRINCIPLES OF

MACROECONOMICS. The scope of this course is approximately the same as that of ECON 102. The course is intended for upper-level students only. Credit will be given for only one of ECON 311 and ECON 102, ECON 309. Prerequisite: Third-year, fourth-year or graduate standing.

ECON 312 (3) POLITICAL ECONOMY OF

CAPITALISM. An intellectual history of the evolution of the capitalist system and its institutions; a selection of defences and criticisms of capitalism and its alternatives in the writings of leading social and political philosophers from the 18th to the 20th centuries. Prerequisite: All of ECON 101, ECON 102.

ECON 313 (3) MARXIST ECONOMICS.

Marxist critiques of capitalist systems and Marxian alternatives. The origin of exploitation; feudalism and capitalism; exploitation and profits; the morality of exploitation; the emergence of class; historical materialism; Marxist theories of imperialism; and public ownership of the means of production. Prerequisite: All of ECON 101, ECON 102.

ECON 317 (3) POVERTY AND INEQUALITY.

Economic inequality in Canada and other countries; measurement and causes. Inequality in the distribution of wealth; redistribution of income and wealth; notions of distributive justice. Prerequisite: All of ECON 101, ECON 102.

ECON 318 (3) HISTORY AND PHILOSOPHY

OF ECONOMICS FROM ARISTOTLE TO ADAM SMITH. The development of economic thought from Aristotle to Adam Smith, focusing on the conceptual foundations of economics, particularly the problems of value, distribution, and economic growth. Prerequisite: All of ECON 101, ECON 102.

ECON 319 (3) HISTORY AND PHILOSOPHY

OF ECONOMICS FROM RICARDO TO KEYNES. The development of economic thought from David Ricardo up to the present including such figures as Malthus, Mill, Jevons, and Keynes, focusing on the conceptual foundations of economics, particularly the problems of value, distribution and growth. Prerequisite: All of ECON 101, ECON 102.

ECON 320 (3) INTRODUCTION TO

MATHEMATICAL ECONOMICS. Application of single and multivariable calculus to economics. Includes comparative static analysis of household and firm behaviour as well as simple dynamic models. Prerequisite: All of ECON 101, ECON 102, MATH 104, MATH 105.

ECON 325 (3) INTRODUCTION TO

EMPIRICAL ECONOMICS. Essentials of probability and statistics for applied work in economics. Topics include descriptive statistics, probability, estimation, hypothesis testing, and analysis of variance. Prerequisite: All of ECON 101, ECON 102, MATH 104, MATH 105. Corequisite: ECON 101 and ECON 102 may be taken concurrently.

ECON 326 (3) METHODS OF EMPIRICAL

RESEARCH IN ECONOMICS. Techniques of empirical economic research. Topics include

simple and multiple regression, time series analysis, and simultaneous equation estimation. Students will be required to undertake applied work. Credit may be obtained for only one of ECON 326 and STAT 306. Prerequisite: ECON 325.

ECON 334 (3) ECONOMIC HISTORY OF

MODERN EUROPE. Background, causes and effects of economic change in Europe from the 18th century to recent times. Evolution of social and economic institutions; analysis of growth, structural change, the distribution of income, and the spread of industrialization. Prerequisite: All of ECON 101, ECON 102.

ECON 335 (3) FERTILITY, FAMILIES AND

HUMAN MIGRATION. Traditional fertility and mortality patterns, demographic transition, catastrophes, well-being and nutrition, international and internal migration, epidemics and growth spurts. Prerequisite: All of ECON 101, ECON 102.

ECON 336 (3) ECONOMIC HISTORY OF

CANADA. The growth of the Canadian economy in relation to development of natural resources, changing markets, industrialism, communications, and technology. Prerequisite: All of ECON 101, ECON 102.

ECON 337 (3) ECONOMIC HISTORY OF THE

UNITED STATES. The growth of the United States from the Colonial Era to the present: British colonialism, development of slave-based agriculture, the western expansion, the 'American system' of manufacturing, cyclical instability and depression, and the distribution of income. Credit will be granted for only one of ECON 337 and former ECON 437. Prerequisite: All of ECON 101, ECON 102.

ECON 339 (3) ECONOMICS OF

TECHNOLOGICAL CHANGE. Application of economic analysis to technological change; the impact of technological change on the growth and distribution of income; economic influences on the invention and diffusion of technology; the interaction between technology, work, skills, and education; public policy toward technological change. Prerequisite: All of ECON 101, ECON 102.

ECON 341 (3) ECONOMIC DEVELOPMENT OF

ASIA. Economic development under colonialism, the colonial legacy, population, trade and development, land reform, the Green Revolution, industrialization strategies, distribution of the gains from development. Each topic is discussed in the context of an Asian country. Prerequisite: All of ECON 101, ECON 102.

ECON 342 (3) THE ECONOMY OF CHINA

SINCE 1949. The Maoist strategy of development, the commune system and rural development, the pace and pattern of industrialization, management and planning, incentive policy, economic lessons from China. Students who wish to contrast different approaches to development may find it useful to take ECON 341 and 342 as a sequence. Prerequisite: All of ECON 101, ECON 102.

ECON 343 (3) THE ECONOMIC

DEVELOPMENT OF MODERN JAPAN. An economic analysis of the growth and structural

changes of the Japanese economy from the Meiji Restoration to the Second World War. Sources of growth, the development of new economic institutions, agricultural development, international trade and early industrialization, the emergence of a dual economic structure, war preparation, and the drive towards heavy industrialization. Prerequisite: All of ECON 101, ECON 102.

ECON 345 (3) MONEY AND BANKING.

Financial markets and financial institutions in theory and practice; structure and development of the Canadian financial system; development and theory of the regulation of the financial system; process of monetary control; theory and history of central banking and monetary policy. Prerequisite: All of ECON 101, ECON 102.

ECON 350 (3) PUBLIC FINANCE POLICY

TOPICS. Examination of two or three selected policy problems from areas of taxation, income security, and public expenditures. Topics to be selected each year from areas of current or recent policy debate. Examples include public pension policy, privatization and public services, income tax or sales tax reform, federal-provincial cost sharing programs, tax incentives versus direct expenditures, welfare reform. Prerequisite: All of ECON 101, ECON 102.

ECON 351 (3) WOMEN IN THE ECONOMY.

Economic analysis of markets and policies particularly affecting women. Selected topics drawn from economic discrimination; educational, occupational, and work choices; pay and employment equity; allocation of work time and consumption within the household and in the market; economics of marriage and fertility; poverty; taxation; income security and pension policies; and historical perspectives. Prerequisite: All of ECON 101, ECON 102.

ECON 352 (3) PUBLIC SECTOR ECONOMICS.

The government plays a pervasive role in the Canadian economy. The powerful tools of government policy –taxation, spending, borrowing, regulation—affect the economic life of every Canadian. This course applies the tools of economic analysis to the study of some of the most important aspects of public policy in these areas.

ECON 355 (3) INTRODUCTION TO

INTERNATIONAL TRADE. The determinants of trade patterns, trade policy, tariff and non-tariff barriers to trade, political economy of protectionism, bilateral and multilateral trade disputes, trade liberalization, trade and development. Credit may be obtained for only one of ECON 355 and 455. Prerequisite: All of ECON 101, ECON 102.

ECON 356 (3) INTRODUCTION TO

INTERNATIONAL FINANCE. Exchange rate policy regimes; international financial organizations; the interaction between monetary policy and exchange rate regimes; financial crises. Credit will be given for only one of ECON 356 and former ECON 345 (6). Prerequisite: All of ECON 101, ECON 102.

ECON 360 (3) LABOUR ECONOMICS. A study of the Canadian labour market. Labour supply, the allocation of the time among work and non-market activity, participation in the labour force, education and training. The demand for labour. The determination of wages and employment. The effect of unions on wages and employment. The wage structure, wage differentials by occupation, industry, race and sex. Unemployment. Credit may be obtained for only one of ECON 360 and 460. Prerequisite: All of ECON 101, ECON 102.

ECON 361 (3) ECONOMICS OF INDUSTRIAL

RELATIONS. Economic aspects of industrial relations in Canada. Why workers join unions. The theory of trade union behaviour. The labour movement in Canada. Wage determination under collective bargaining. The causes of strikes and lockouts. Unions and the wage structure. Credit may be obtained for only one of ECON 361 and 461. Prerequisite: All of ECON 101, ECON 102.

ECON 365 (3) TOPICS IN CANADIAN

INDUSTRIAL ORGANIZATION AND REGULATION POLICY. Current topics in industrial organization and regulation with emphasis on Canadian federal and provincial policy. The content will differ from year to year. Possible subjects include the regulation of transportation and communications, environmental regulation, marketing boards and other forms of agricultural regulation, competition and anti-combines policy, industrial organization and trade policy, and issues in consumer protection. Prerequisite: All of ECON 101, ECON 102.

ECON 367 (3) ECONOMIC ANALYSIS OF

LAW. The economics of market failure, equity and efficiency. Property rights, the economics of accident and contract law, economic theories of law enforcement. Prerequisite: All of ECON 101, ECON 102.

ECON 370 (3) BENEFIT-COST ANALYSIS AND THE ECONOMICS OF PROJECT

EVALUATION. Techniques and problems in benefit-cost analysis of public projects. Examination of alternative approaches to public decision-making such as cost-effectiveness analysis and multiple-objective frameworks. Case studies of projects in the areas of natural resources, the environment, human resources, public services, and transportation. Prerequisite: All of ECON 101, ECON 102.

ECON 371 (3) ECONOMICS OF THE

ENVIRONMENT. Economic analysis applied to various environmental issues, including sustainable development, quality of life, and environmental impacts of specific industrial and consumption activities. The design and implementation of government policies. Global environmental effects of human economic activity. Prerequisite: All of ECON 101, ECON 102.

ECON 374 (3) LAND ECONOMICS.

Economic analysis applied to problems of land use. Rent theory. Land valuation. Land conservation. Techniques for assessing economic efficiency of land use. Effects of institutions and public

policies on land use. Prerequisite: All of ECON 101, ECON 102.

ECON 384 (3) ECONOMIC ANALYSIS OF

HEALTH SERVICES. Microeconomic theory of resource allocation with emphasis on the applications of optimizing models of health service markets. Analysis of Canadian problems in health service supply. Models of the consumer/patient, the physician/entrepreneur, the not-for-profit hospital/firm, and the third-party regulatory and payment agency. Prerequisite: All of ECON 101, ECON 102.

ECON 387 (3) ECONOMIC REFORM AND

TRANSITION. Problems and processes of economic reform and of transition between different types of economic system, with emphasis on reform and transition in Communist and post-Communist economies. Credit may be obtained for only one of ECON 387 or ECON 487. Prerequisite: All of ECON 101, ECON 102.

ECON 406 (3) TOPICS IN

MICROECONOMICS. Selected topics in advanced microeconomic analysis. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304 and one of ECON 303, ECON 306.

ECON 407 (3) TOPICS IN

MACROECONOMICS. Selected topics in advanced macroeconomic analysis. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304 and one of ECON 202, ECON 207, ECON 302, ECON 305 and one of ECON 303, ECON 306.

ECON 417 (3) WELFARE ECONOMICS.

The criteria for evaluating economic performance with special reference to the problems of justice in the distribution of income and economic efficiency. Topics include social evaluation functions, pareto-optimality, compensation criteria, and consistency of collective decision making. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304 and one of ECON 303, ECON 306.

ECON 420 (3) OPTIMIZATION AND

ECONOMIC THEORY. An introduction to static and dynamic optimization methods with economic applications. Prerequisite: MATH 200 and one of ECON 201, ECON 206, ECON 301, ECON 304 and one of ECON 303, ECON 306. Permission of the instructor is also acceptable.

ECON 421 (3) INTRODUCTION TO GAME

THEORY AND APPLICATIONS. Principles of rational behaviour in strategic situations and various notions of equilibrium useful in predicting outcomes. Applications from economics, business, politics, law and biology. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304.

ECON 422 (3) MATHEMATICS FOR

ECONOMISTS. Provides the required preparation in mathematics for the study of graduate economic theory. Solving systems of simultaneous equations; unconstrained and constrained maxima; elementary theory of difference and differential equations. Restricted

to students taking graduate economic theory courses.

ECON 425 (3) INTRODUCTION TO ECONOMETRICS. Theoretical and applied issues in statistics and econometrics. Statistical distributions, sampling theory, maximum likelihood methods of estimation and hypothesis testing, generalized least squares, measurement errors, non-normal errors, systems of equations, discrete-choice models, outliers, regression diagnostics, and model selection. Prerequisite: All of ECON 325, ECON 326.

ECON 426 (3) ECONOMETRIC ANALYSIS. Further topics in econometrics including such areas as nonlinear estimation, distributed lag models, time-series analysis, time-varying parameters, multivariate analysis, simulation and forecasting models, Monte Carlo experiments, duration models, large econometric models, Bayesian statistics, asymptotic theory, and ergodic theory. Prerequisite: ECON 425.

ECON 436 (3) HISTORICAL BACKGROUND TO CONTEMPORARY ISSUES IN CANADIAN ECONOMY. Demographic change, immigration, unemployment and labour markets, the inter-provincial transfer of resources, industrial and trade policy. Prerequisite: One of ECON 201, ECON 206, ECON 304, ECON 301 and one of ECON 202, ECON 207, ECON 302, ECON 305. Credit will be given for only one of ECON 436 and former ECON 336 (6).

ECON 441 (3) THE PROCESS OF ECONOMIC DEVELOPMENT. Industrialization of an agrarian economy; how the West grew rich; history of Japanese development; technical progress and growth; evolution of the patterns of income distribution; role of international trade in development; environment and development. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304. (Also accepted as corequisites.)

ECON 442 (3) ISSUES IN ECONOMIC DEVELOPMENT. Gender; labour markets; child labour; political economy of reforms, corruption and growth; population growth and demographic transition; agricultural productivity growth; agrarian institutions; famines; multinationals; crises in Asia and Latin America; LDC debt problem. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304.

ECON 444 (3) THE CONTEMPORARY JAPANESE ECONOMY. An economic analysis of selected issues in contemporary Japan. The postwar growth record, economic management and planning, industrial policy, labour market and industrial relations, foreign trade and investment, rapid industrialization and its consequences, external economic relations. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304.

ECON 447 (3) MONETARY THEORY. Theoretical analysis of economies that use money; the emergence of money; the roles of money in the economy; models of money demand; the optimal quantity of money seignorage and inflation; monetary policy and macroeconomic stability; monetary policy in an

open economy. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304 and one of ECON 202, ECON 207, ECON 302, ECON 305.

ECON 450 (3) ECONOMICS OF TAXATION. The economic analysis of taxation. Equity and efficiency; optimal taxation theory; partial and general equilibrium analysis of incidence; analysis of taxes such as the personal and corporate income taxes, sales and excise taxes, payroll taxes and property tax. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304.

ECON 451 (3) ECONOMICS OF PUBLIC EXPENDITURES. The role of government in the economy; efficiency and economic justice. Theory of public goods; applications to topics such as education, medical care and social services. Pricing and investment rules for public enterprises. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304 and one of ECON 303, ECON 306.

ECON 455 (3) INTERNATIONAL TRADE. International trade theory and policy in general equilibrium; relative costs, factor proportions, imperfect competition and the pattern of trade; efficiency and distribution. Credit granted for only one of ECON355 and ECON455. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304.

ECON 456 (3) INTERNATIONAL MACROECONOMICS AND FINANCE. Balance of payments; market for foreign exchange; mechanism for adjusting the balance of payments; internal vs. external stability; current problems and issues. Prerequisite: One of ECON 202, ECON 207, ECON 302, ECON 305.

ECON 457 (3) SEMINAR IN INTERNATIONAL ECONOMIC RELATIONS. Selected topics focusing upon various issues arising in international economic relations. Open only to fourth-year students in the Major program in International Relations. Prerequisite: All of ECON 101, ECON 102.

ECON 460 (3) ECONOMICS OF LABOUR MARKETS. The theory of labour supply and demand for individuals, households, and firms. Policy implications for Canadian taxation and benefit programs. Employee selection, hiring and promotion. Credit may not be obtained for both ECON 360 and 460. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304 and one of ECON 202, ECON 207, ECON 302, ECON 305 and one of ECON 303, ECON 306.

ECON 461 (3) ECONOMICS OF TRADE UNIONS. The microeconomic and macroeconomic effects of unions on wages, prices and employment. Industrial disputes and their resolution. Credit may not be obtained for both ECON 361 and 461. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304 and one of ECON 202, ECON 207, ECON 302, ECON 305 and one of ECON 303, ECON 306.

ECON 465 (3) MARKET STRUCTURE. Market structure and social welfare, theory of price

discrimination, equilibrium in oligopolistic markets, entry and exit decisions, product differentiation and spatial models, theories of hierarchical organization, agency problem in the modern corporation, vertical integration and control, market structure and technical progress. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304 and one of ECON 303, ECON 306.

ECON 466 (3) THE ECONOMICS OF GOVERNMENT REGULATION OF BUSINESS. Normative and positive theories of government regulation of business. Topics include natural monopoly, socially optimal monopoly pricing, regulation of multi-firm industries, competition policy. Selected empirical studies. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304 and one of ECON 303, ECON 306.

ECON 471 (3) ECONOMICS OF NONRENEWABLE RESOURCES. Application of economic analysis to the management of nonrenewable natural resources. Emphasis is placed on the economics of alternative energy sources. Other topics include mineral economics, criteria for the optimal use of resources, and measurement of resources. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304.

ECON 472 (3) ECONOMICS OF RENEWABLE RESOURCES. Application of economic analysis to the management of renewable resources. Special attention is given to criteria for the optimal use of depleting resources such as forests and water. Other topics include public policy with regard to environmental quality, conservation, and outdoor recreation. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304.

ECON 480 (3) TRANSPORTATION. Economic characteristics of the provision of transportation services, both passenger and freight; the market structure of the industry and the economic impact of the varying degrees of public regulation and promotion within the industry; the role of economic analysis in resolving problems of Canadian policy. Prerequisite: One of ECON 201, ECON 206, COMM 295, ECON 301, ECON 304. Equivalency: COMM 446.

ECON 487 (3) COMPARATIVE ECONOMIC SYSTEMS. Economic analysis of non-market/non-price systems of resource allocation. Economic analysis of central planning, coordination problems in hierarchical organizations, and the role of quantity restrictions, quotas, standards, etc. in regulating economic behaviour. The Soviet system of economic planning is used throughout as an example of the issues discussed. Credit may be obtained for only one of ECON 387 or ECON 487. Prerequisite: One of ECON 201, ECON 206, ECON 301, ECON 304.

ECON 490 (3) SEMINAR IN APPLIED ECONOMICS. Selected problems and issues in the theory and practice of Economics. Each section will focus on a different field. Restricted to Economics Majors, and Combined Majors in

Economics in fourth year. Prerequisite: All of ECON 325, ECON 326 and one of ECON 201, ECON 206, ECON 301, ECON 304 and one of ECON 202, ECON 207, ECON 302, ECON 305. For additional possible prerequisites see individual course descriptions on the departmental website.

ECON 492 (3/6) C DIRECTED READING.

ECON 495 (3) HONOURS SEMINAR. Reports and group discussions of selected topics for fourth-year Honours students.

ECON 499 (6) HONOURS ESSAY. Essay on some theoretical, applied, or institutional problem. Open only to fourth-year Honours students.

ECON 500 (3) MICROECONOMICS.

ECON 502 (3) MACROECONOMICS.

ECON 514 (3) INFORMATION AND INCENTIVES.

ECON 515 (3/6) D SPECIAL TOPICS IN MICROECONOMIC THEORY.

ECON 516 (3) SPECIAL TOPICS IN MACROECONOMICS.

ECON 517 (3) SOCIAL EVALUATION, SOCIAL CHOICE, AND ECONOMIC PERFORMANCE.

ECON 518 (3) HISTORY OF ECONOMIC ANALYSIS I.

ECON 519 (3) HISTORY OF ECONOMIC ANALYSIS II.

ECON 522 (3) ECONOMIC APPLICATIONS OF GAME THEORY.

ECON 526 (3) PROBABILITY AND STATISTICS FOR USE IN ECONOMICS.

ECON 527 (3) ECONOMETRIC METHODS OF ECONOMIC RESEARCH.

ECON 531 (3) ECONOMIC HISTORY OF MODERN EUROPE.

ECON 532 (3) ECONOMIC HISTORY OF NORTH AMERICA.

ECON 541 (3) ECONOMIC DEVELOPMENT I.

ECON 542 (3) ECONOMIC DEVELOPMENT II.

ECON 543 (3) ECONOMICS OF TRANSITION ECONOMIES.

ECON 546 (3) MONETARY THEORY AND POLICY I.

ECON 547 (3) MONETARY THEORY AND POLICY II.

ECON 550 (3) GOVERNMENT FINANCE: EXPENDITURES.

ECON 551 (3) GOVERNMENT FINANCE: REVENUES.

ECON 553 (3) THE ECONOMICS OF INCOME SECURITY.

ECON 555 (3) INTERNATIONAL TRADE.

ECON 556 (3) INTERNATIONAL FINANCE.

ECON 560 (3) ECONOMICS OF LABOUR.

ECON 561 (3) TOPICS IN INDUSTRIAL RELATIONS.

ECON 565 (3) MARKET STRUCTURE AND BUSINESS BEHAVIOUR.

ECON 566 (3) BUSINESS PERFORMANCE AND PUBLIC POLICY.

ECON 567 (3) ORGANIZATION THEORY AND NON-MARKET ALLOCATION.

ECON 571 (3) THE ECONOMICS OF RENEWABLE RESOURCES.

ECON 572 (3) THE ECONOMICS OF NON-RENEWABLE RESOURCES.

ECON 573 (3) ENVIRONMENTAL ECONOMICS.

ECON 574 (3) SPECIAL TOPICS IN THE ECONOMICS OF RESOURCE USE.

ECON 580 (3) SOCIAL AND ECONOMIC MEASUREMENT.

ECON 581 (3) COST-BENEFIT ANALYSIS.

ECON 590 (2-6) D SPECIAL ADVANCED COURSE.

ECON 592 (2-6) C DIRECTED READING.

ECON 594 (6) APPLIED ECONOMICS.

ECON 595 (0) MAJOR ESSAY.

ECON 599 (6/12) C MASTER'S THESIS.

ECON 627 (3) ECONOMETRIC THEORY II. Prerequisite: ECON 626.

ECON 628 (1-3) D TOPICS IN APPLIED ECONOMETRICS I. Prerequisite: Prior graduate-level work in econometrics is required.

ECON 629 (1-3) D TOPICS IN APPLIED ECONOMETRICS II. Prerequisite: Prior graduate-level work in econometrics is required.

ECON 640 (3) PH.D. RESEARCH SEMINAR.

ECON 690 (2-6) D WORKSHOPS IN ECONOMICS.

ECON 699 (0) PH.D. THESIS.

**EDST — EDUCATIONAL STUDIES
FACULTY OF EDUCATION**

EDST 314 (3) SOCIAL ISSUES IN EDUCATION. Pass/Fail.

EDST 400 (2-5) D SOCIAL AND ETHICAL CONSIDERATIONS IN EDUCATION. [5-0-0]

EDST 425 (3) EDUCATIONAL ANTHROPOLOGY. Selected concepts from educational anthropology for teachers. Comparative study of school and classroom culture, school teaching, and multicultural education. Pass/Fail.

EDST 426 (3) HISTORY OF EDUCATION. An examination of selected topics in the history of Canadian and British Columbian education and of the relationships between historical development and current educational policy. Pass/Fail.

EDST 427 (3) PHILOSOPHY OF EDUCATION. An introductory course in which consideration is given to the philosophical foundations of education and to the practical bearing of theory upon curriculum content and classroom practice in our schools. Pass/Fail.

EDST 428 (3) THE SOCIAL FOUNDATIONS OF EDUCATION. An application of the social sciences to the study of education. Pass/Fail.

EDST 429 (3) EDUCATIONAL SOCIOLOGY. Selected theories of society and schooling applied to Canadian education. Pass/Fail.

EDST 451 (3) ISSUES AND FRAMEWORKS IN ENVIRONMENTAL EDUCATION. Competing conceptions of environmental education; the social construction of nature and of science; addressing class, race, culture, and gender in developing sound teaching strategies. Pass/Fail.

EDST 452 (3) GENDER AND EDUCATION. Pass/Fail.

EDST 453 (3) MORAL EDUCATION IN ELEMENTARY AND SECONDARY SCHOOLING. Approaches to moral education; developing educationally and morally justifiable teaching strategies. Pass/Fail.

EDST 454 (3) CRITICAL THINKING: FRAMEWORKS, METHODS, AND CHALLENGES. Competing conceptions of critical thinking, including feminist and post-colonial; teaching and evaluation strategies. Pass/Fail.

EDST 455 (3) HISTORY OF CHILDHOOD AND YOUTH. Pass/Fail.

EDST 502 (3/6) C GROWING UP IN HISTORY: THE MEANINGS OF CHILDHOOD.

EDST 503 (3) CURRICULA IN THEIR HISTORICAL CONTEXT. Equivalency: EDCI 568.

EDST 504 (3/6) C READINGS IN THE HISTORY OF EDUCATIONAL POLICY.

EDST 505 (3) FIRST NATIONS AND EDUCATIONAL CHANGE.

EDST 506 (3) EDUCATING THE BODY: PHYSICALITY AND IDENTITY IN HISTORICAL PERSPECTIVE.

EDST 507 (3/12) D SEMINAR IN THE HISTORY OF EDUCATION.

EDST 508 (3/12) C REVIEW OF RESEARCH IN EDUCATIONAL METHODS.

EDST 509 (3) CONSTRUCTING "NATIONS": CANADA AND THE EDUCATIONAL PAST.

EDST 512 (3) TRANSITIONS AND ACCESS ACROSS THE LIFE COURSE. Equivalency: HIED 512.

EDST 515 (3) SURVEY RESEARCH METHODS.

EDST 523 (3/6) D COMPARATIVE EDUCATION. Prerequisite: One of EDST 426, EDST 427, EDST 429.

EDST 524 (6) ADVANCED SEMINAR IN COMPARATIVE EDUCATION.

EDST 533 (3) PLANNING IN EDUCATIONAL ORGANIZATIONS. [3-0]

EDST 561 (3/12) C LABORATORY PRACTICUM.

EDST 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD.

EDST 570 (3) SEMINAR IN SOCIOLOGY OF EDUCATION.

EDST 573 (3) SOCIOLOGY OF THE CURRICULUM.

EDST 574 (3) SCHOOLTEACHING: AN OCCUPATIONAL ANALYSIS.

EDST 575 (3) SEMINAR ON WORK AND EDUCATION.

EDST 576 (3) FEMINIST THEORY, PEDAGOGY AND CURRICULUM.

EDST 577 (3) THE SOCIAL CONTEXT OF EDUCATIONAL POLICY.

EDST 578 (3) MULTICULTURALISM, RACE RELATIONS AND EDUCATION.

EDST 580 (3/12) C PROBLEMS IN EDUCATION.

EDST 588 (3) ENVIRONMENTAL PHILOSOPHY AND ENVIRONMENTAL EDUCATION.

EDST 590 (3) GRADUATING PAPER. Pass/Fail.

EDST 591 (3/6) D EPISTEMOLOGY AND THE CURRICULUM.

EDST 592 (3/6) D CONCEPTIONS OF TEACHING AND LEARNING.

EDST 593 (3/6) D MORAL EDUCATION AND MORAL PHILOSOPHY.

EDST 594 (3) PHILOSOPHY OF EDUCATIONAL RESEARCH.

EDST 595 (3) CONCEPTUAL INQUIRY IN EDUCATIONAL RESEARCH.

EDST 596 (3/6) C PHILOSOPHY AND EDUCATIONAL POLICY.

EDST 597 (3) EDUCATIONAL THEORIES.

EDST 598 (3/6) C ADVANCED SEMINAR IN PHILOSOPHY OF EDUCATION.

EDST 599 (6/12) C MASTER'S THESIS.

EDST 601 (3/6) D DOCTORAL SEMINAR. Required of students in the first year of a doctoral program. Pass/Fail.

EDST 602 (3/6) C DOCTORAL SEMINAR. For students in the second year of a doctoral program. Pass/Fail.

EDST 690 (0) ED.D. THESIS. Pass/Fail.

EDST 699 (0) DOCTORAL THESIS. Pass/Fail.

EDUC — EDUCATION FACULTY OF EDUCATION

EDUC 140 (3) INTRODUCTION TO FIRST NATIONS STUDIES. Selected issues affecting BC First Nations; the cultural and historical antecedents to these issues; First Nations viewpoints towards these issues. The course draws from various disciplines as well as from the knowledge of First Nations resource people. [3-0]

EDUC 141 (3) CULTURAL STUDIES. The study of a First Nations cultural group with an emphasis on traditional values and practices related to education. For students in the Native Indian Teacher Education Program (NITEP) only. [3-0]

EDUC 143 (1) SEMINAR AND CLASSROOM OBSERVATION I. Pass/Fail.

EDUC 240 (3) ISSUES IN FIRST NATIONS EDUCATION. [3-0]

EDUC 244 (2) SEMINAR AND CLASSROOM OBSERVATION II. Pass/Fail

EDUC 300 (7) INTEGRATED PRACTICUM EXPERIENCE: ELEMENTARY I.

EDUC 301 (3) INTEGRATED PRACTICUM EXPERIENCE: TWO-YEAR ELEMENTARY. Program II. Prerequisite: EDUC 300 and all previous coursework in the program.

EDUC 302 (6) INTEGRATED PRACTICUM EXPERIENCE: SECONDARY I.

EDUC 303 (7) INTEGRATED PRACTICUM EXPERIENCE: MIDDLE YEARS I.

EDUC 310 (4) PRINCIPLES OF TEACHING: ELEMENTARY AND MIDDLE YEARS.

Introduction to principles and instructional procedures related to classroom management, instructional planning, and the assessment of learning as applicable across grade levels and subject matter fields. Pass/Fail. [4-0-0]

EDUC 311 (4) PRINCIPLES OF TEACHING: SECONDARY. Introduction to principles and instructional procedures related to classroom management, instructional planning, and the assessment of learning as applicable across grade levels and subject matter fields. Pass/Fail. [4-0-0]

EDUC 315 (0) PRE-PRACTICUM EXPERIENCE. Observation and instruction in educational settings. Pass/Fail. [0-4]

EDUC 316 (3) COMMUNICATION SKILLS IN TEACHING. Study and practice of communication skills in educational settings. Candidates will be required to demonstrate satisfactory oral communication abilities. Pass/Fail. [1-3]

EDUC 319 (0) ORIENTATION SCHOOL EXPERIENCE: SECONDARY. A two-week sequence of observations and instructional assignments in a selected secondary school. Corequisite: EDUC 311.

EDUC 321 (0) ORIENTATION SCHOOL EXPERIENCE: ELEMENTARY. A two-week sequence of observations and instructional assignments in a selected elementary school. Pass/Fail. Prerequisite: EDUC 310.

EDUC 323 (0) ORIENTATION SCHOOL EXPERIENCE: MIDDLE YEARS. A two-week sequence of observation and instructional assignments with students between the ages of 10 and 14 years. Pass/Fail. Prerequisite: EDUC 310. [0-4]

EDUC 329 (18) EXTENDED PRACTICUM: SECONDARY. A developmental program of teaching practice, normally in one BC secondary school. Candidates will teach the subjects for which they have been academically and pedagogically prepared. Pass/Fail. Prerequisite: All requirements set for Term 1. [0-40]

EDUC 342 (6) TEACHING FIRST NATIONS LANGUAGES IN ELEMENTARY SCHOOLS. Strategies, materials and programs for teaching First Nations Languages as first and second languages. Prerequisite: One of LLED 489, LING 200, LING 400. LLED 486 and LING 433 are recommended as pre- or corequisites. [3-0; 3-0]

EDUC 344 (0) ISSUES IN FIRST NATIONS EDUCATION. Pass/Fail. Prerequisite: All of EDUC 143, EDUC 244.

EDUC 345 (0) FIRST NATIONS CURRICULUM: FIELD EXPERIENCE. Pass/Fail.

EDUC 390 (3) TEACHING AND LEARNING IN DIGITAL ENVIRONMENTS. Development and evaluation of curriculum resources and critical perspectives on the contribution of digital media technologies to teaching and learning.

EDUC 395 (3/6) D REGIONAL FIELD STUDIES IN EDUCATION. Directed study of a particular aspect of education in other countries and other cultures. Each field study will consist of a balanced program of study, travel, and community experience. Not offered on a regular basis. Prerequisite: 12 credits of course work approved by the Associate Dean (Teacher Education) as being appropriate to the particular study.

EDUC 399 (0) FIELD EXPERIENCE AND PRACTICE. For those undertaking postgraduate study in Education. Pass/Fail.

EDUC 400 (13) INTEGRATED PRACTICUM EXPERIENCE: TWELVE-MONTH ELEMENTARY PROGRAM II. Prerequisite: EDUC 300 and all previous coursework in the program

EDUC 401 (16) INTEGRATED PRACTICUM EXPERIENCE: TWO -YEAR ELEMENTARY PROGRAM III. Prerequisite: All of EDUC 300, EDUC 301 and all previous coursework in the program.

EDUC 402 (14) INTEGRATED PRACTICUM EXPERIENCE: SECONDARY II. Prerequisite: EDUC 302 and all previous coursework in the program.

EDUC 403 (13) INTEGRATED PRACTICUM EXPERIENCE: MIDDLE YEARS II. Prerequisite: EDUC 303 and all previous coursework in the program.

EDUC 418 (6-18) D EXTENDED PRACTICUM: ELEMENTARY. A developmental program of teaching practice, normally in one BC elementary school. Candidates will teach all subjects in the elementary curriculum. All elementary students must complete 18 credits of extended practicum. Pass/Fail. Prerequisite: All requirements set to precede this practicum.

EDUC 419 (6-18) D EXTENDED PRACTICUM: MIDDLE YEARS. Candidates will teach the subjects for which they have been academically and pedagogically prepared. Pass/Fail. Prerequisite: All requirements set to precede this practicum. All Middle Years students must complete 18 credits of extended practicum.

EDUC 420 (2) SCHOOL ORGANIZATION IN ITS SOCIAL CONTEXT. The organization and administration of schools, including issues in governance, finance, and community and professional control and influence. Pass/Fail. [2-0-0]

EDUC 432 (3/6) D THE SUPERVISION OF TEACHING. Recent research on teaching effectiveness. The analysis of teaching. Clinical supervision of teaching. Enrolment limited to persons with teaching or supervisory experience. [3-0]

EDUC 441 (3) HISTORY OF FIRST NATIONS SCHOOLING. An examination of key events affecting delivery of education, including contact, colonial policies and band-controlled initiatives. [3-0-0]

EDUC 442 (3) CRITICAL ISSUES IN FIRST NATIONS EDUCATION. Post-practicum students will explore how a school program may need to be modified in order to integrate more fully First Nations history, content, and world views. [3-0-0]

EDUC 449 (3/6) C SUPERVISED STUDY. This course is available only to outstanding students approved by the Associate Dean (Teacher Education) in their senior years to undertake a research investigation into a particular problem.

EDUC 490 (3/6) D SPECIAL STUDIES IN EDUCATION. Topics in education not covered in a course. A pilot course may be offered under this name for only one year and with permission of the Associate Dean (Teacher Education).

EDUC 492 (6/12) D CRITICAL ANALYSIS OF TEACHING. A combined clinical and research-based examination of teaching which seeks to help teachers determine what kinds of teaching activities are appropriate to the context in which they are involved. Teaching practice in a public elementary or secondary school is an integral part of this course.

EDUC 495 (4-18) C TEACHING PRACTICUM (ELEMENTARY). Supervised teaching in a BC elementary school. For qualified teachers wishing to strengthen or expand areas of teaching competence and for those not enrolled in a full program of teacher education but requiring between 3 and 15 weeks of current teaching practice. Pass/Fail. Prerequisite: Completion of recent elementary teaching methods courses in the subjects to be taught.

EDUC 496 (4-18) C TEACHING PRACTICUM (SECONDARY). Supervised teaching in a BC secondary school. For qualified teachers wishing to strengthen or expand areas of teaching competence and for those not enrolled in a full program of teacher education but requiring between 3 and 15 weeks of current teaching practice. Pass/Fail. Prerequisite: Recent completion of secondary teaching methods courses in the subjects to be taught.

EDUC 500 (3) RESEARCH METHODOLOGY IN EDUCATION. Overview of methodological approaches to research in education.

EDUC 503 (3/6) C ETHNOGRAPHY AND EDUCATION. Prerequisite: EDUC 500.

EDUC 504 (3) SEMINAR IN QUALITATIVE DATA ANALYSIS. Prerequisite: One of EDUC 503, EPSE 595. (May also be taken as co-requisites.)

EDUC 566 (6) PRINCIPLES OF SECONDARY EDUCATION. Recent thought on classroom procedures, provisions for individual differences, discipline. The place of various school subjects in total education, and remedial education in Canada and other countries.

EDUC 601 (6/12) C DOCTORAL SEMINAR.

EDUC 699 (0) DOCTORAL THESIS. Pass/Fail.

EECE — ELECTRICAL & COMPUTER ENGINEERING FACULTY OF APPLIED SCIENCE

EECE 201 (11) PROJECT INTEGRATED PROGRAM I. This is a project based learning equivalent of EECE 251, EECE 254, EECE 256, EECE 280. [6-7-3]

EECE 202 (12) PROJECT INTEGRATED PROGRAM II. This is a project based learning equivalent of EECE 253, EECE 259, EECE 261, EECE 281, and EECE 285. Prerequisite: Either (a) EECE 201 or (b) all of EECE 251, EECE 256, EECE 280. Corequisite: EECE 254. [6-9-3]

EECE 251 (2) CIRCUIT ANALYSIS I. The fundamentals of analysis of lumped linear time-invariant circuits; network theorems; operational amplifiers; first and second-order circuits; impedance and admittance functions. Corequisite: One of MATH 255, MATH 256, MATH 265. [2-0-1]

EECE 253 (2) CIRCUIT ANALYSIS II. Phasor analysis and AC power; transfer functions; Bode plots; filters and resonance; Laplace transforms; transformers; two-port networks. Prerequisite: EECE 251. [2-0-1]

EECE 254 (3) ELECTRONIC CIRCUITS I. Semiconductor fundamentals; modelling of electronic devices including diodes and transistors; design and analysis of linear and non-linear electronic circuits including amplifiers, power supplies, wave shaping circuits, waveform generators and logic circuits. Prerequisite: EECE 251. [3-0-0]

EECE 256 (3) DIGITAL LOGIC DESIGN. Data representation in digital computers; Boolean algebra; the analysis, design, optimization and implementation of combinatorial and sequen-

tial circuits; modern digital circuit technologies. [3-0-0]

EECE 259 (3) INTRODUCTION TO MICROCOMPUTERS. Organization and operation of microcomputers, memory addressing modes, representation of information, instruction sets, machine and assembly language programming, systems programs, I/O structures, I/O interfacing and I/O programming, introduction to digital system design using microcomputers. Prerequisite: EECE 256. [3-0-0]

EECE 261 (3) ENGINEERING ELECTROMAGNETICS. Electrostatics, electric currents, dielectrics, capacitance, electrostatic potential, magnetostatics. [3-0-1]

EECE 263 (3) BASIC CIRCUIT ANALYSIS. Ideal passive elements and sources; Kirchhoff's Laws; DC circuits; natural, forced and complete response of RLC circuits; impedance; phasors; complex power, resonance. Not open to students in Electrical and Computer Engineering. Corequisite: One of MATH 255, MATH 256. [2-2*-1]

EECE 265 (3) CIRCUITS AND ELECTRONICS. Introduction to circuit analysis and electronic circuits; topics chosen for applicability to systems involving signal acquisition, amplification, low/high pass filtering and power control. Not open to students in the Faculty of Applied Science. [3-2-0]

EECE 280 (2) ELECTRICAL AND COMPUTER ENGINEERING LABORATORY I. Introduction to oscilloscopes, signal generators and electrical measuring instruments. Experiments in analog and digital logic circuits. [1-3-0]

EECE 281 (2) ELECTRICAL AND COMPUTER ENGINEERING LABORATORY II. Experiments involving electronic devices and circuits, electromagnetics and microcomputers. Prerequisite: EECE 280. [1-3-0]

EECE 283 (2) ELECTRO-MECHANICAL LABORATORY. Experiments in analog and digital electronics, including microcomputers. Not open to students in Electrical and Computer Engineering. [1-3-0]

EECE 285 (3) GROUP PROJECT. Project management. Working under contract. Running a professional engineering practice. Group organization and dynamics. Effective presentation of ideas. Students will work in groups on a study and oral presentation of an engineering topic. [1-4-0]

EECE 310 (3) SOFTWARE ENGINEERING. Engineering practices for the development of non-trivial software-intensive systems including requirements specification, software architecture, implementation, verification and maintenance. Iterative development. Recognized standards, guidelines and models. Credit will only be given for one of CPSC 352, CPSC 310, and EECE 310. Prerequisite: CPSC 260. [3-2-0]

EECE 314 (3) SYSTEM SOFTWARE ENGINEERING. An overview of modern languages, operating systems, real-time systems, computer communications, computer/human interfaces, information structures,

system design methodologies, sizing, documentation, testing and maintenance and project management. Prerequisite: CPSC 260 and one of EECE 202, EECE 259. [2-1-1]

EECE 315 (4) OPERATING AND FILE SYSTEMS. Introduction to operating systems, their design and their implementation. Process concurrency, synchronization, communication and scheduling. Device drivers, memory management, virtual memory, file systems, networking and security. Prerequisite: One of EECE 202, EECE 259 and either (a) CPSC 260 or (b) EECE 256. [3-2-0]

EECE 320 (3) DISCRETE STRUCTURES AND ALGORITHMS. Software, hardware, and systems applications of discrete mathematics: logic and proofs; discrete structures and their properties; algorithms for analysis of discrete structures; algorithmic complexity. Prerequisite: One of EECE 201, EECE 256, CPSC 260. [3-0-0]

EECE 321 (3) LANGUAGES AND TRANSLATION. Principles and practice of automated language translation. Language syntax and semantics, typing, binding and parameter passing. Syntactic and lexical analysis. Language automata, parsing. Compilers and compiler-compilers. Prerequisite: CPSC 260. [3-1-0]

EECE 352 (3) ELECTRICAL ENGINEERING MATERIALS AND DEVICES. Fundamental aspects of electrical engineering materials such as: semiconductors, dielectrics, piezoelectrics, ferroelectrics, ferrites, and their applications in devices such as sensors and transducers. Prerequisite: One of EECE 202, EECE 261, PHYS 251. [3-0-0]

EECE 353 (3) DIGITAL SYSTEMS DESIGN. Advanced combinational and sequential electronic system design. Hardware specification, modeling, and simulation using hardware description languages (HDLs) and CAD tools. Design with programmable logic including FPGA's. Applications include complex state machines, microcontrollers, arithmetic circuits, and interface units. Credit can be given for only one of EECE 353 or EECE 379. Prerequisite: One of EECE 201, EECE 256. [2-3*-1]

EECE 355 (3) DIGITAL SYSTEMS AND MICROCOMPUTERS. Data representation in digital computers; boolean algebra; the design and optimization and implementation of combinatorial and sequential circuits; modern digital circuit technologies; memory and programmable logic devices; organization and operation of microcomputers; data/address bus organization; input-output interfacing. Prerequisite: EECE 263. [3-2*-0]

EECE 356 (4) ELECTRONIC CIRCUITS II. Analysis and design of electronic circuits; biasing of and small-signal models for transistors; frequency response of amplifiers; feedback and stability aspects of amplifier design; OP-AMPS; active filters; oscillators; IC specification and selection. Credit will only be given for one of EECE 356 or EECE 374. Prerequisite: Either (a) EECE 254 and one of EECE 253, EECE 263; or (b) EECE 202. [3-3*-0]

EECE 359 (3) SIGNALS AND COMMUNICATIONS. Continuous and discrete time signal analysis by Fourier methods; convolution and correlation; filtering, sampling, and multiplexing; amplitude, phase and pulse modulation. Students taking this course will not be eligible for credit for EECE 369. Prerequisite: One of EECE 202, EECE 253. [3-0-0]

EECE 360 (3) SYSTEMS AND CONTROL. Continuous and discrete time system analysis by Laplace and z transforms; system modeling by transfer function and state space methods; feedback, stability and sensitivity; control design; digital filtering. Credit will be given for only one of EECE 360 or 369. Prerequisite: One of EECE 202, EECE 253. [3-0-1*]

EECE 361 (2) SIGNALS AND SYSTEMS LABORATORY. Communications and control systems laboratory; analysis and design software; spectral analysis and modulation; servo and regulator control system design. Prerequisite: One of EECE 359, EECE 360, EECE 369. [1*-3-0]

EECE 363 (3) ELECTRONIC CIRCUITS FOR ELECTROMECHANICAL DESIGN. Semiconductor fundamentals; modelling of electronic devices including diodes and transistors; design of power supplies, waveform generators and logic circuits; signals in time and frequency domains; operational amplifiers; active filters; oscillators; device specification and selection. Prerequisite: EECE 263. [3-2*-0]

EECE 364 (4) ELECTROMAGNETIC FIELDS AND WAVES. Maxwell's equations; plane waves in free space and lossy media; TEM transmission lines; polarization; reflection and refraction; waveguides; radiation; antennas. Prerequisite: One of EECE 202, EECE 261. [3-3*-0]

EECE 365 (3) APPLIED ELECTRONICS AND ELECTROMECHANICS. Characteristics of semiconductor devices; analog circuits; force and torque production; motor principles and torque-speed characteristics; principles of power electronics. Not open to students in Electrical and Computer Engineering. Prerequisite: One of EECE 251, EECE 263. [2-2*-2*]

EECE 369 (3) SIGNALS AND SYSTEMS. Continuous-time LTI systems, discrete-time LTI systems, convolution sum, discrete-time Fourier series and transforms, z-transform, sampling discrete-time filtering, modulation, multiplexing, feedback systems, stability. Prerequisite: One of EECE 202, EECE 253. [3-1-0]

EECE 370 (3) ELECTRICAL MACHINES AND POWER TRANSMISSION. Electric power, three-phase systems, transmission/distribution; transformers, motors, generators. Not open to students in Electrical and Computer Engineering. Credit will only be given for one of EECE 365, 370, 373, 374 or 376. Prerequisite: One of EECE 251, EECE 263. [2-2*-1*]

EECE 373 (4) ELECTRO-MECHANICAL ENERGY CONVERSION AND TRANSMISSION. Three-phase power, generation/transmission; transformers; DC, induction, synchronous machines; brushless DC and

single-phase motors. Credit will only be given for one of EECE 365, EECE 370, EECE 373, EECE 374, or EECE 376. Prerequisite: One of EECE 202, EECE 253, EECE 263. [3-3*-0]

EECE 374 (4) ELECTRONICS AND ELECTROMECHANICS. BJT and MOSFET amplifiers; cascade and differential amplifiers; nonideal OP amps; feedback; active filters; permanent magnet. DC motors; variable voltage control; software control of variable frequency; mechanical power, torque and speed. Credit will only be given for one of EECE 356, 365, 370, 373, 374, or 376. Prerequisite: Either (a) EECE 202 or (b) all of EECE 253, EECE 254. Corequisite: One of EECE 202, EECE 261. [3-3*-0]

EECE 375 (6) COMPUTER-BASED INSTRUMENTATION DESIGN LABORATORY. Theory and practice of electronic instrumentation for software engineers. Computer-based data acquisition and control techniques. Design project. [1-10-0]

EECE 376 (3) ELECTROMECHANICS. Electromechanical energy conversion; linear actuators; torque/speed of rotating devices; reluctance, stepper, permanent-magnet, induction, brushless-DC motors and DC motors; actuator/motor drive circuits/controllers. Credit will only be given for one of EECE 365, EECE 370, EECE 373, EECE 374, or EECE 376. Corequisite: EECE 363. [3-2*-0]

EECE 411 (3) DESIGN OF DISTRIBUTED SOFTWARE APPLICATIONS. Communications, processes, naming, synchronization, consistency and replication, fault tolerance, object-based middleware, and security technologies for distributed applications. Prerequisite: All of EECE 315, EECE 320 and one of EECE 310, EECE 314. Corequisite: One of EECE 456, CPSC 417.

EECE 412 (3) INTRODUCTION TO COMPUTER SECURITY. Security risks, threats, and vulnerabilities from technical perspectives; confidentiality, integrity, and hybrid policies; cryptography, access control, assurance, accountability, and engineering of secure systems. Prerequisite: One of CPSC 211, CPSC 260. [3-0-0]

EECE 415 (3) REQUIREMENTS ENGINEERING FOR SOFTWARE-INTENSIVE SYSTEMS. Elicitation, analysis, validation, description, management and traceability of functional and non-functional requirements. Specialized techniques. Emphasis on software-intensive systems but also applicable to other kinds of engineered systems. [3-1-0]

EECE 416 (3) VERIFICATION OF SOFTWARE-INTENSIVE SYSTEMS. Different levels of testing including unit, integration, system, performance and regression levels. Requirements flowdown. Problem tracking. Coverage criteria. Static methods. Tools support. Specialized techniques. Assessment of correctness, reliability, safety. Prerequisite: EECE 415. [3-0-0]

EECE 417 (3) SOFTWARE ARCHITECTURE. Software architecture as a bridge from requirements to implementation. Architectural description and patterns. Iterative development.

Use of commercial off-the-shelf products. Prerequisite: One of EECE 310, CPSC 352, CPSC 310 and EECE 315 and one of EECE 320, CPSC 221. [3-0-0]

EECE 418 (3) HUMAN COMPUTER INTERFACES IN ENGINEERING DESIGN.

Practical issues for interfaces for modern software. Task analysis, user modeling, usability engineering, representations, metaphors, prototyping tools. Applications: interactive multimedia systems, engineering, scientific visualization, engineering design. Prerequisite: One of EECE 320, CPSC 220, CPSC 221 and one of CPSC 310, CPSC 352, EECE 310, EECE 314. [3-0-0]

EECE 419 (5) SOFTWARE ENGINEERING PROJECT.

Team project involving the application of the software engineering concepts. Credit will only be given for one of EECE 389, EECE 419, or CPSC 319. Prerequisite: One of CPSC 310, EECE 310, CPSC 352. [0-10-0]

EECE 423 (3) SOFTWARE SYSTEMS FOR MODELING AND SIMULATION. Discrete, continuous and hybrid approaches to modeling and simulating natural and artificial systems. Credit will not be given for both EECE 423 and CPSC 405. Prerequisite: Either (a) CPSC 260 or (b) all of CPSC 211, CPSC 221; and one of STAT 251, MATH 318. [3-2-0]

EECE 440 (3) ADVANCED OBJECT-ORIENTATION. Frameworks, patterns, enterprise-level modeling, making object oriented test cases. Distributed object architectures, databases. Prerequisite: One of EECE 320, CPSC 220, CPSC 221 and one of CPSC 310, CPSC 352, EECE 310. [3-0-0]

EECE 443 (3) SOFTWARE PROJECT MANAGEMENT. Advanced project planning, cost estimation and scheduling. Project management tools. Factors influencing productivity and success. Productivity metrics. Analysis of options and risk. Tools. Case studies. Prerequisite: One of CPSC 310, CPSC 352, EECE 310, EECE 314. [3-0-0]

EECE 450 (3) ECONOMIC ANALYSIS OF ENGINEERING PROJECTS. Time-money relationships; economic analysis of alternatives including the effects of interest rates, inflation, depreciation, taxation and uncertainty; cost estimation and budgeting; financial analysis of engineering operations. [3-0-0]

EECE 451 (3) ENGINEERING PRODUCT DEVELOPMENT AND MANAGEMENT. Product development cycle: generation of ideas and market requirements for new products, economic and quality considerations, the team approach, relationships with suppliers and evaluation of proposed products. Cases involving North American and Japanese firms. [3-0-0]

EECE 452 (3) INTRODUCTION TO OPTICAL NETWORKS. Wavelength division multiplexing, framing techniques, traffic grooming, virtual topology design, routing and wavelength assignment, protection and restoration, optical packet switching. Prerequisite: EECE 359. [3-0-0]

EECE 453 (3) COMMUNICATION SYSTEMS. Review of probability theory, signals and noise, spectral analysis; detection and estimation of signals in the presence of noise; performance calculations of amplitude, angle and pulse modulation systems; introduction to digital communication techniques. Prerequisite: EECE 359 and one of STAT 251, MATH 318. [3-0-0]

EECE 454 (3) DIGITAL COMMUNICATIONS. Formulation of the digital communication problem; definition of information, source and channel coding; digital modulation techniques, signal space, design of optimum digital receivers and performance calculations; trellis coded modulation; spread spectrum techniques; issues in wireless communication techniques and new standards. Prerequisite: EECE 453. [3-0-0]

EECE 456 (3) COMPUTER COMMUNICATIONS. Analysis, design and implementation of computer networks and their protocols. Queuing analysis, data link control, network design, routing, flow and congestion control. Satellite and packet radio networks. Local area networks. Prerequisite: One of STAT 251, MATH 318 and one of EECE 359, EECE 369; and one of EECE 259, EECE 315. [3-0-0]

EECE 457 (3) RF ELECTRONICS. Introduction to radio communication systems; frequency selective networks; small- and large-signal high frequency amplifiers; oscillators; phase locked loops; modulators and demodulators; AM, FM, SSB and digital transceivers. Prerequisite: One of EECE 356, EECE 374 and one of EECE 359, EECE 369. [2-0-2]

EECE 458 (3) POWER SYSTEM ANALYSIS. Electric power transmission. Voltage regulation and power flow. Fault analysis. Transient stability. Protective relaying HVDC transmission. System design projects using a real-time power system simulator, the EMTP program, and MATLAB toolboxes. Prerequisite: One of EECE 373, EECE 374. [3-0-0]

EECE 459 (3) COMPUTER APPLICATIONS IN POWER SYSTEMS. Power system monitoring and control; hardware/software architectures for large networks; optimization. Artificial intelligence techniques. Application to problems of generation and load control, optimum power flow, power transactions, reliability and security enhancement. Prerequisite: One of EECE 373, EECE 374. [3-0-0]

EECE 460 (3) CONTROL SYSTEMS. Relationships between system parameters and system responses for linear control systems. Design specifications for dynamic and steady-state performance and realization by use of feedback control. Robust design of PID controllers and multivariable controllers. Prerequisite: EECE 360. [3-0-0]

EECE 465 (3) MICROCOMPUTER SYSTEMS DESIGN. Microprocessor and system buses; advanced I/O methods; priority interrupts; event/exception handling; serial I/O; computer networking; memory system design; interaction of hardware and software, microprocessor comparison, testability issues, safety critical

systems. Prerequisite: EECE 259 and one of EECE 353, EECE 379. [3-0-1]

EECE 466 (3) DIGITAL SIGNAL PROCESSING SYSTEMS. DSP fundamentals; digital filter FIR and IIR structures; filter design; DSP architectures; DSP applications. Prerequisite: EECE 359. [2-0-2]

EECE 467 (3) REAL-TIME IMPLEMENTATION OF DSP ALGORITHMS. Review of sampling, digital filter design, convolution, transforms; DSP systems and architecture; programming DSP boards in "C" and assembly, fixed-point vs. floating point arithmetic; testing; DSP solutions in audio and telecommunications. [2-3-0]

EECE 468 (3) DIGITAL PROCESS CONTROL. Discrete systems, z-transform; sampled data systems; process control algorithms; multivariable control; state space methods; response to stochastic inputs, Wiener and Kalman filtering; least squares parameter identification. Prerequisite: EECE 360. [2-0-2]

EECE 470 (3) MICROWAVE CIRCUITS. Transmission lines; microwave integrated circuit lines; passive microstrip devices; microwave solid state control devices and circuits, amplifiers, oscillators and frequency conversion circuits. Prerequisite: One of EECE 364, PHYS 351. [2-0-2]

EECE 474 (6) INSTRUMENTATION AND DESIGN LABORATORY. Theory and practice of electrical measurements and electronic instrumentation. [1-10-0]

EECE 476 (3) COMPUTER ARCHITECTURE. Modern computer architecture, RISC and CISC machines, methods for performance improvements, multiple buses, pipelining, memory systems, caches, associative memories, multiple views of the design space and their interrelationships, other advanced architectures. Credit will be given for only one of CPSC 313 or EECE 476. Prerequisite: One of EECE 202, EECE 259, EECE 315. [3-0-1]

EECE 478 (3) COMPUTER GRAPHICS. Physical and virtual graphics I/O devices. The GKS standard Interactive graphics. Transformations, modelling, rendering algorithms for 2-D and 3-D graphics. Curves and surfaces. Credit will not be given for both CPSC 314 and EECE 478. Prerequisite: CPSC 260. [3-0-0]

EECE 479 (3) INTRODUCTION TO VLSI SYSTEMS. The chip design process using VLSI design styles in CMOS technology. Data path, control and register file design and layout. Clocking schemes, flip-flop and latch-based design. VHDL/Verilog design project using CAD tools. Prerequisite: One of EECE 353, EECE 379. Concurrent enrolment in EECE 480 recommended. [3-0-0]

EECE 480 (3) SEMICONDUCTOR DEVICES: PHYSICS, DESIGN AND ANALYSIS. Physics of operation, and design and analysis of modern transistors (eg. MOSFETs, MESFETs, HEMTs, BJTs, HBTs), emphasizing the suitability of particular transistors to high-frequency, high-speed or high-power applications. [3-0-0]

EECE 481 (3) DIGITAL INTEGRATED CIRCUIT DESIGN. Overview of deep submicron custom ic design. Advanced MOS models. IC fabrication. Timing and power calculations. Interconnect modeling and analysis techniques. Circuit-level design issues. SPICE circuit simulation. High-speed circuit design project. Prerequisite: EECE 479. EECE 480 recommended. [3-0-0]

EECE 482 (3) OPTICAL WAVEGUIDES AND PHOTONICS. Planar dielectric waveguides; single mode optical fibers; integrated optics waveguides and devices; semiconductor lasers; optical detectors; optical communications links. [2-0-2]

EECE 483 (3) ANTENNAS AND PROPAGATION. Basic antenna concepts; antennas for low, medium and high frequencies; terrestrial and satellite propagation links; environmental effects on electromagnetic radiation. Prerequisite: One of EECE 364, PHYS 351. [2-0-2]

EECE 485 (3) DIGITAL INSTRUMENTATION FOR MECHANICAL SYSTEMS. Design of microcomputer-based controllers and instrumentation; basics of digital and analog computer interface hardware; processor structure and function; high-level and low-level languages and system design-related issues. Laboratory experiments in basic logic elements, computer interface control, and sensor-based software control of various devices. Credit will be given for only one of EECE 485 or APSC 380. Not open to students in Electrical and Computer Engineering. Prerequisite: One of EECE 365, PHYS 253 and one of CPSC 152, CPSC 122. [2-3*-2*]

EECE 487 (3) INTRODUCTION TO ROBOTICS. Common manipulator configurations, actuator and sensor technology. Efficient representations and computational methods for real-time microprocessor-based implementation of robot control algorithms. Advanced robot control methods, network equivalents and applications to impedance control and bilateral (force-reflecting) teleoperation. Implementation aspects. Prerequisite: All of PHYS 170, EECE 360. [2-0-2]

EECE 488 (3) ANALOG CMOS INTEGRATED CIRCUIT DESIGN. Design and analysis of analog integrated circuits, with emphasis on CMOS design techniques. Gain stages, opamp design, frequency compensation, oscillators, A/D, D/A converters, PLL, DLL. Prerequisite: EECE 356. [3-0-1]

EECE 490 (1-3) D TOPICS IN ELECTRICAL AND COMPUTER ENGINEERING I. Lectures or projects on subjects of current interest.

EECE 491 (1-3) D TOPICS IN ELECTRICAL AND COMPUTER ENGINEERING II. Lectures or projects on subjects of current interest.

EECE 492 (3) DISTRIBUTED ENERGY SYSTEMS MANAGEMENT. Energy systems, high voltage transmission technology, low voltage domestic distribution. Advanced energy storage systems, alternative energy sources, interfacing of distributed generation sources, harmonics and power quality, smart metering, and tariffs. [3-2*-0]

EECE 493 (4) POWER ELECTRONICS. AC-DC, DC-DC, DC-AC, AC-AC. Converters. Analysis of idealized circuits with generalized loads.

Introduction to applications of practical devices—diodes, thyristors, power transistors and FETs. Prerequisite: One of EECE 365, EECE 370, EECE 373, EECE 374. [2-3*-2*]

EECE 494 (3) REAL-TIME DIGITAL SYSTEM DESIGN. Multi-tasking; interrupt-driven systems; task scheduling; task inter-communication and synchronization; memory management for real-time systems; performance measurement; hardware/software integration; hardware/software tradeoffs. Prerequisite: One of EECE 315, CPSC 315, CPSC 313. [3-0-0]

EECE 495 (3) INDUSTRIAL DRIVES. Analysis of typical loads. Characteristics and analysis of dc and ac drives. Commercial choices of drive for various applications. Dynamic response of ac and dc drives. Microprocessor-based controllers. Prerequisite: One of EECE 365, EECE 370, EECE 373, EECE 374. [2-2-0]

EECE 496 (5) ENGINEERING PROJECT. Project in electrical engineering or computer engineering involving design, experimental and/or computer simulation work as selected from topics supplied by faculty members or proposed by a student and approved by faculty. An individual project report is to be prepared according to specifications available from the departmental office. Prerequisite: APSC 201. Fourth-year standing. [0-10-0]

EECE 500 (3) TOPICS IN COMMUNICATION.

EECE 502 (3) TOPICS IN INTEGRATED CIRCUIT AND SYSTEM DESIGN.

EECE 511 (3) TOPICS IN SOFTWARE ENGINEERING.

EECE 512 (3) TOPICS IN COMPUTER SECURITY. Safety problems in computer security, information flow and access control models, security in distributed systems, design of secure systems, trust management, intrusion detection, security and usability

EECE 513 (3) FAULT TOLERANT DIGITAL SYSTEMS. Design and analysis of high-availability and life-critical embedded and commercial systems.

EECE 514 (3) REAL-TIME DIGITAL SYSTEMS SOFTWARE. Real-time system modelling, data models; behavioural models; control models; structured methods; timing constraints; implementation constraints; implementation transformations; and process and resource control; synchronization methods; deadlock issues; storage management; application to engineering examples. MECH 563 is recommended.

EECE 515 (3) SYSTEMS ENGINEERING FOR SOFTWARE-INTENSIVE SYSTEMS. Principles and practices of systems engineering and architecture of large complex systems. Examples of military and industrial systems will be discussed; air traffic control, multi-mode radar systems, spacecraft control systems.

EECE 516 (3) SOFTWARE AND SYSTEM TESTING. Theoretical and practical aspects of software and system testing. Functional and structural testing, integration testing, regression testing, test metrics, design for testability, test management.

EECE 518 (3) HUMAN INTERFACE TECHNOLOGIES. Human sensation, perception, kinetics; input technologies, gesture, vision, speech, audio; metaphors, information appliances, ubiquitous computing, wearable computing; output technologies, video display, speech, audio, tactile, haptic; evaluation methodology; user centered design.

EECE 519 (3) COMPUTER-SUPPORTED COLLABORATIVE WORK. Technical and social perspectives on collaboration and teamwork. Communications theory and collaboration technologies including email, instant messaging, videoconferencing, hypertext, knowledge management, and digital libraries.

EECE 520 (3) ADVANCED TOPICS IN COMPUTER NETWORKING. Advanced treatment of fundamental problems in computer networking and packet switching. Internet routing and gateway protocols, traffic engineering and multi-protocol label switching techniques, quality of service mechanisms, network and application level signalling, real-time multimedia communications.

EECE 530 (3) ROBUST MULTIVARIABLE CONTROL. Classic feedback control, linear systems, SISO and MIMO performance limitations, uncertainty, robust stability and performance, wind tunnel model and paper machine two-dimensional loop shaping control, practical MIMO analysis and design.

EECE 540 (3) LINEAR AND NONLINEAR MULTIVARIABLE PREDICTIVE CONTROL. Advanced mathematics in a control-engineering framework; design and analysis of predictive multivariable controllers; hands on experience with industrial control solutions.

EECE 541 (3) MULTIMEDIA SYSTEMS. Theoretical and practical issues in designing multimedia systems. Interactive multimedia, digital video broadcasting and streaming, media asset management, video indexing and retrieval, content protection, and design of multimedia middleware.

EECE 544 (3) MEDICAL IMAGING. Physical principles of ultrasound, magnetic resonance, computed tomography and X-ray projection imaging. Methods of feature detection, segmentation, registration and visualization of 2D and 3D images. Applications in diagnostics, therapeutics and interventions.

EECE 545 (3) SIGNAL COMPRESSION. Information theory; modelling; lossless coding including Huffman, arithmetic and dictionary coding; application to text and images; rate-distortion theory; audio-visual perception; quantization; prediction; transforms, subbands and wavelets; fractal and motion models; application to speech, audio, image and video.

EECE 549 (3) DYNAMIC MODELING OF ELECTRIC MACHINES AND CONTROLS. Numerical aspects of time-domain simulation are reviewed. Dynamic modeling and analysis of power systems components including transformers, induction and synchronous machines, inverters, electric drives and associated controls.

EECE 550 (3) TOPICS IN POWER ELECTRONIC DESIGN. New devices and applications in power electronics. Prerequisite: EECE 493.

EECE 552 (3) VOLTAGE AND FREQUENCY CONTROL IN MODERN DEREGULATED POWER SYSTEMS. Coordinated control of reactive power, voltage and frequency in large interconnected deregulated power systems. Factors influencing voltage stability. Methods of analysis, devices and strategies for reactive power control.

EECE 553 (3) ADVANCED POWER SYSTEMS ANALYSIS. Computer-oriented analysis of electric power systems with regard to multiphase line constants, steady-state analysis of single and parallel circuits, lightning and switching surges; large-scale solution of power-flow problems; optimal real and reactive power flow.

EECE 554 (3) ADVANCED POWER SYSTEM CONTROL AND DYNAMICS. Synchronous machine modelling; excitation and speed governor systems; enhancing power system damping through excitation or governor control; linear optimal stabilization of power systems; load shedding, generator dropping and other emergency measures; asynchronous operation and resynchronization; nonlinear stability; power-frequency control.

EECE 556 (3) OPTIMUM FILTERING AND CONTROL. The minimum principle, calculus of variations, and dynamic programming. The minimization of algebraic and functional quadratic forms. Applications to optimum filtering for state and parameter estimation and to the optimization of dynamic systems.

EECE 558 (3) SWITCHED MODE POWER SUPPLY DESIGN. Survey of different configurations. Choice of components. Magnetic component design. Buck converter. Boost converter. Flyback converter. Cuk converter. Resonant converter. Converter modelling and analysis techniques. Stability. Electromagnetic interference problems and shielding. Includes project work. Prerequisite: EECE 493.

EECE 559 (3) ENERGY STORAGE SYSTEMS – SUPER CAPACITORS. Superconducting Magnetic Energy Storage. Pumped Storage. Other possible technologies. System modeling and control.

EECE 560 (3) NETWORK ANALYSIS AND SIMULATION. Solution of lumped and distributed networks. Time-domain solutions, discretization and integration rules. Frequency-domain solutions, FFT and windowing techniques. Systems of linear equations, reduction and sparsity techniques. Nonlinear elements. Computer-aided simulation.

EECE 561 (3) ALTERNATIVE ENERGY SOURCES. Photovoltaic, wind, small hydro and fuel cell systems for stand alone and grid connected use.

EECE 562 (3) STATISTICAL SIGNAL PROCESSING WITH APPLICATIONS IN WIRELESS COMMUNICATIONS AND DEFENCE. Stochastic dynamical models, Least Squares, Recursive Least Squares. Kalman, Hidden Markov, particle filters. Maximum likelihood estimation. Sensor management, Markov Decision Processes. Case studies: wireless communications, target tracking.

EECE 563 (3) WIRELESS COMMUNICATION SYSTEMS. Characterization of fading channels such as land-mobile, mobile-satellite, cellular and indoor; modem design and performance on fading channels, diversity techniques, carrier and bit synchronization; effects of non-linearities and interference on system performance, and remedies; software and hardware system designs; system architectures (FDMA, TDMA, CDMA); cellular systems—frequency allocation, spectrum efficiency and channel assignment strategies; spread spectrum systems.

EECE 564 (3) DETECTION AND ESTIMATION OF SIGNALS IN NOISE. Formulation of the detection problem, optimum receiver principles, signal space, maximum likelihood decisions, error performance calculations. Estimation of signals in noise, linear and nonlinear estimation, cost functions, recursive mean square estimation, Wiener and Kalman filters.

EECE 565 (3) DATA COMMUNICATIONS. Analysis and design of communications networks; network architectures; Internet protocols; routing; scheduling algorithms; medium access control; congestion control; admission control; queuing analysis; network management.

EECE 566 (3) COMMUNICATION AND INFORMATION THEORY. Coding for noisy channels, linear block codes, cyclic codes, convolutional codes, maximum likelihood decoding, trellis coded modulation, measure of information, source coding, channel capacity theorem.

EECE 567 (3) PRIVACY AND SECURITY IN DATA COMMUNICATION NETWORKS. Introduction to cryptography, standard encryption algorithms, privacy and authentication issues in data networks, public key cryptosystems, digital signatures, information-theoretic approach to secrecy, cryptographic protocols.

EECE 568 (3) CONTROL SYSTEMS. State-space analysis of continuous and discrete multivariable systems. Controllability and observability. Sensitivity considerations. Stability of linear and nonlinear systems.

EECE 569 (3) MOBILE COMMUNICATIONS NETWORKS. Network architectures: cellular networks, ad hoc networks; access protocols; radio and network resource management; quality of service; mobility and location management; routing; mobile-IP; current wireless technologies for personal, local and satellite networks.

EECE 571 (1–4) C ELECTRICAL ENGINEERING SEMINAR AND SPECIAL PROBLEMS.

EECE 572 (1–3) C ADVANCED TOPICS IN CONTROL. Studies in areas of current research interest, with written problem assignments.

EECE 574 (3) SELF-TUNING CONTROL. Adaptive control; system identification; self-tuning control; design and implementation considerations; algorithm convergence and stability; industrial applications.

EECE 575 (3) DIGITAL IMAGE AND VIDEO PROCESSING. Mathematical preliminaries; image perception and modelling; image sampling and quantization; mathematical modelling; image enhancement; image restoration; image reconstruction from projections; image analysis; digital video; spatio-temporal sampling and reconstruction; motion modelling and estimation; video filtering.

EECE 576 (3) SEMICONDUCTOR THEORY FOR DEVICE APPLICATIONS. A treatment of the structure and electronic properties of semiconducting materials and heterojunction devices; including energy bands, carrier transport mechanisms, scattering and recombination.

EECE 577 (3) SOLID STATE ELECTRONIC AND PHOTONIC DEVICES. Solid-state devices of current interest (e.g., heterostructure transistors and lasers, very high speed silicon bipolars, short-channel MOSFETs) and their application in high-speed circuits.

EECE 578 (3) INTEGRATED CIRCUIT DESIGN-FOR-TEST. Test and design-for-test methodologies. Fault modeling, test generation, test architectures, System on Chip test infrastructure and methodologies. Digital, analog, and mixed-signal circuit test and design for testability and manufacturability. EECE 479 is recommended.

EECE 579 (3) ADVANCED TOPICS IN VLSI DESIGN. A course in VLSI design with an emphasis on new methodologies in digital IC design. Top-down design and CAD tools are illustrated through a class project. EECE 479 and EECE 481 are recommended.

EECE 580 (3) EMERGING ELECTRONIC MATERIALS AND DEVICES. The physics, fabrication and characterization of organic and carbon nanotube based capacitors, transistors, batteries, electrochromic windows, active displays, chemical sensors, photo-detectors, strain gauges, actuators and single molecule devices.

EECE 581 (3) RADIO-FREQUENCY INTEGRATED CIRCUIT DESIGN.

EECE 582 (3) OPTICAL FIBERS AND DEVICES. Modeling and analysis of dielectric waveguides; loss and dispersion in optical fibers; integrated-optics and photonics devices.

EECE 583 (3) CAD ALGORITHMS FOR INTEGRATED CIRCUITS. Algorithms used in contemporary computer-aided design tools targeting custom integrated circuits and field-programmable gate arrays, including high-level synthesis, logic optimization, partitioning,

placement and routing, optimization techniques.

EECE 584 (3) PROPOGATION AND CHANNEL MODELING FOR WIRELESS COMMUNICATIONS SYSTEM DESIGN.

EECE 585 (3) APPLIED ELECTROMAGNETIC WAVE PROPAGATION. Propagation Green's functions for one, two and three dimensions; antenna types and properties; physical propagation models for wireless communications.

EECE 586 (3) WAVELETS, PRINCIPLES AND APPLICATIONS IN SIGNAL PROCESSING. Concepts, methodologies and tools of signal processing using wavelets, including multi-resolution analysis, wavelet packets, wavelet dictionaries, wavelet denoising and selected applications.

EECE 587 (3) PRINCIPLES AND APPLICATIONS OF IMAGING RADAR. Fundamentals of radar; the RADARSAT satellites; how imaging is achieved; Synthetic Aperture Radar processing; applications such as oceanography, agriculture and forestry, including the techniques of polarimetry and interferometry.

EECE 588 (3) ANALOG INTEGRATED CIRCUIT DESIGN. Analysis and design emphasizing CMOS implementations. Gain stages, biasing circuits, comparators, sample-and-hold circuits, switched-capacitor circuits, Nyquist-rate and oversampling A/Ds and D/As, oscillators, PLLs.

EECE 589 (3) SYSTEM DESIGN FOR ROBOTS AND TELEOPERATORS. Requirements and methods for computer control of manipulator systems; computer simulation of mechanical linkages and actuator systems. Computer architectures suitable for manipulator control in robots and teleoperators. Prior taking of MECH 563 is recommended.

EECE 590 (3) DIGITAL SPEECH AND AUDIO PROCESSING. DSP fundamentals; speech models; time-domain analysis methods; short-time spectrum analysis methods; homomorphic speech processing; linear prediction analysis methods; speech recognition; text-to-speech synthesis; audio modelling; digital recording, transmission and psychoacoustic broadcast distribution.

EECE 591 (3) APPLIED DIGITAL SIGNAL PROCESSING. Review of DSP fundamentals: A/D conversion, filter design, FFTs, interpolation and fast convolution. MATLAB exercises including design of a digital SAR processor. Other industrial applications taken from GPS, images, audio and communications.

EECE 592 (3) ARCHITECTURE FOR LEARNING SYSTEMS. Symbolic methods used in conventional AI; knowledge representation, search strategies, inference mechanisms in expert system shells. Neural-network methods; system identification and pattern recognition issues, basic paradigms and their promises and limitations. Unified approaches using both symbolic and neural-network methods. Implementation issues using microcomputers in specific application domains, e.g., adaptive control and man-machine communication.

EECE 593 (3) ADVANCED COMPUTER GRAPHICS. Geometric modelling, curves and surfaces (Bezier, B-splines). Solid modelling, representation schemes, CSG, B-rep Volumetric modelling, quadtrees and octrees. Prerequisite: EECE 478.

EECE 595 (3) PARALLEL PROCESSING AND ADVANCED COMPUTER ARCHITECTURE. Overview of parallel processing, modelling, identification and scheduling of parallelism, architecture and characteristics of high-performance computer systems, interconnection networks, shared-memory and distributed memory systems, superscalar and symmetric multiprocessor systems, other topics in parallel and distributed processing.

EECE 597 (6) ENGINEERING REPORT. Project report on assigned topic of specialization. For students registered in the M.Eng. program in Electrical or Computer Engineering.

EECE 598 (3) INTELLIGENT SYSTEMS APPLICATIONS TO ELECTRICAL POWER SYSTEMS. Introduction to expert systems, fuzzy logic, neural networks, and other artificial intelligence-based methods; applications to electrical power systems; system fault analysis and restorative operation support; flexible systems with uncertainties; self-organizing systems.

EECE 599 (12) THESIS. For M.A.Sc.

EECE 699 (0) THESIS. For Ph.D.

EMER — EMERGENCY MEDICINE FACULTY OF MEDICINE

EMER 430 (4) EMERGENCY MEDICINE. This course covers the principles of Emergency Medicine. The seminar series is case based and interactive. Teaching resuscitative skills is emphasized.

ENDS — ENVIRONMENTAL DESIGN SCHOOL OF ARCHITECTURE AND LANDSCAPE ARCHITECTURE

ENDS 211 (3) INTRODUCTION TO ENVIRONMENTAL DESIGN. Survey of the visual, cultural, ecological and spatial literacies in environmental design and planning.

ENDS 301 (9) ENVIRONMENTAL DESIGN STUDIO 1: TERRAIN(S). Introduction to definitions of community; the study of relationships of human beings to each other and the environment; methods of analysis and composition; physical properties of land, natural and man-made; simple spatial and functional programs deployed in the creation of landscape and "place".

ENDS 302 (9) ENVIRONMENTAL DESIGN STUDIO 2: CONSTRUCTION(S). Expands the terms of the purposeful transformation of "place" to include modifications to the environment at the scale of the individual; concepts of dwelling and habitation; the human body as an instrument of measure, dimension and design of the private realm.

ENDS 320 (3) DESIGN, MEDIA AND REPRESENTATION. Theories, histories and techniques of design representation; geometry,

design and expression are principle areas of focus.

ENDS 401 (9) ENVIRONMENTAL DESIGN STUDIO 3: SETTLEMENT(S). Expands the scale and design enquiry to emphasize the regard between communities and environment, urban infrastructure and ecological systems.

ENDS 402 (9) ARCHITECTURAL DESIGN FOUNDATION: INSTITUTION(S). The exploration of a complex physical and spatial program for building in the public realm, resulting in an integrative design project. Pre-architecture option.

ENDS 403 (9) LANDSCAPE PLANNING FOUNDATION: COMMON(S). The exploration of a complex physical and spatial program in the design and planning of the public realm, resulting in an integrative design project. Pre-Landscape Architecture Option.

ENDS 410 (3) URBAN FORM AND STRUCTURE. Introduction to the major histories and theories of urbanism as expressed in the physical form of cities throughout Eastern and Western civilizations. Methods and Techniques of mapping will be a principle focus.

ENDS 420 (3) TECHNOLOGY AND TECHNIQUE. Introduction to fundamental design principles and investigations of buildings, landscape, machines and furniture, including structure, enclosure, envelope and detailing.

ENDS 440 (3) ECOLOGY AND URBAN DESIGN. The symbiotic relationship between ecological structures and the structure and quality of urban life.

ENGL — ENGLISH FACULTY OF ARTS

Attainment of a satisfactory Language Proficiency Index (LPI) score is a prerequisite to registration in 100-level English courses. See "Language Proficiency Index" in the Degree Requirements section within the Faculty of Arts or visit www.lpi.ubc.ca.

ENGL 110 (3) APPROACHES TO LITERATURE. Study of selected examples of poetry, fiction, and drama. Essays are required.

ENGL 111 (3) APPROACHES TO NON-FICTIONAL PROSE. Study of a selection of prose texts ranging in length from the essay to the book, with emphasis on writing of the twentieth century. Essays are required.

ENGL 112 (3) STRATEGIES FOR UNIVERSITY WRITING. Study and application of the principles of university-level discourse, with emphasis on expository and persuasive writing. Essays and exercises are required.

ENGL 120 (3) LITERATURE AND CRITICISM. Enriched study of selected works of literature from a number of critical perspectives. Open to students with a mark of "A" in English 12 or "B+" in English Literature 12. Essays are required.

ENGL 121 (3) INTRODUCTION TO LITERARY THEORY. Study of various theories of literature. Open to students with a mark of A in

English 12 or B+ in English Literature 12. Essays are required.

ENGL 210 (6) AN INTRODUCTION TO ENGLISH HONOURS. For prospective Honours students accepted by the English Honours Committee on the recommendation of the instructor. Students permitted to take this course must take ENGL 211 concurrently. Prerequisite: 6 credits of first-year English or Arts One or Foundations.

ENGL 211 (6) SEMINAR FOR ENGLISH HONOURS. An introduction to practical criticism; required of and open only to students of ENGL 210. A limited number of texts from a range of genres and periods will be chosen for close critical analysis.

ENGL 220 (3) LITERATURE IN ENGLISH TO THE 18TH CENTURY. A survey of prose, poetry and drama to the 18th Century. Prerequisite: 6 credits of first-year English or Arts One or Foundations.

ENGL 221 (3) LITERATURE IN BRITAIN: THE 18TH CENTURY TO THE PRESENT. A survey of poetry, drama, fiction and non-fiction prose from the 18th century to the present. Prerequisite: 6 credits of first-year English or Arts One or Foundations.

ENGL 222 (3) LITERATURE IN CANADA. The major types of Canadian writing: fiction, poetry, non-fictional prose, and drama. Prerequisite: 6 credits of first-year English or Arts One or Foundations.

ENGL 223 (3) LITERATURE IN THE UNITED STATES. The major types of American writing: fiction, poetry, drama and non-fictional prose. Prerequisite: 6 credits of first-year English or Arts One or Foundations.

ENGL 224 (3) WORLD LITERATURE IN ENGLISH. English literature produced outside Britain and North America. Prerequisite: 6 credits of first-year English or Arts One or Foundations.

ENGL 225 (3) POETRY. Principles, methods, and resources for reading poetry. Prerequisite: 6 credits of first-year English or Arts One or Foundations.

ENGL 226 (3) DRAMA. Principles, methods and resources for reading drama. Prerequisite: 6 credits of first-year English, or Arts One, or Foundations.

ENGL 227 (3) PROSE FICTION. Principles, methods and resources for reading the novel and the short story. Prerequisite: 6 credits of first-year English, or Arts One, or Foundations.

ENGL 228 (3-6) D TOPICS IN LITERARY AND/OR CULTURAL STUDIES. Current research interests in English studies. Prerequisite: 6 credits of first-year English or Arts One or Foundations.

ENGL 229 (3-6) D TOPICS IN THE STUDY OF LANGUAGE AND/OR RHETORIC. Prerequisite: 6 credits of first year English, or Arts One, or Foundations.

ENGL 230 (3-6) D BIBLICAL AND CLASSICAL BACKGROUNDS OF ENGLISH LITERATURE. Prerequisite: 6 credits of first-year English, or Arts One, or Foundations.

ENGL 301 (3) TECHNICAL WRITING. Study of the principles of written communication in general business and professional activities, and practice in the preparation of abstracts, proposals, reports, and correspondence. This course is closed to first- and second-year students in Arts. Not for credit towards the English Major or Minor. Prerequisite: 6 credits of first-year English or Arts One or Foundations.

ENGL 302 (3) ADVANCED PRACTICAL WRITING. Library research in the student's professional field; the writing of articles and research papers; detailed preparation of term or graduating essays required in a number of departments and faculties. Attention will be given to appropriate style. Not for credit towards the English Major or Minor. Prerequisite: ENGL 301. Permission of the course chair is also acceptable.

ENGL 303 (6) INTERMEDIATE COMPOSITION. Study of the principles and extensive practice in the writing of effective prose, from arrangement and punctuation to various stylistic strategies. May be taken in the second year. Not for credit towards the English Major or Minor. Prerequisite: 6 credits of first-year English or Arts One or Foundations.

ENGL 304 (6) ADVANCED COMPOSITION. Special emphasis on rhetoric, with a focus on audience, authorial voice, and range of style.

ENGL 307 (3-12) D STUDIES IN RHETORIC. Topics in rhetorical theories and their application.

ENGL 308 (3-12) D RHETORICAL CRITICISM. A study of literary texts from a rhetorical perspective.

ENGL 309 (3-12) D RHETORIC OF SCIENCE, TECHNOLOGY, AND MEDICINE. Exploration of the persuasive dimension of discourse practices in science, technology, and medicine.

ENGL 310 (3) HISTORY AND THEORY OF RHETORIC: CLASSICAL RHETORIC. Introduction to classical rhetoric with attention to the analysis of present-day texts.

ENGL 311 (3) HISTORY AND THEORY OF RHETORIC: THE LATER THEORY. Rhetorical theory from Augustine to the 21st century, emphasizing questions of persuasion in everyday life.

ENGL 312 (3-12) D DISCOURSE AND SOCIETY. Introduction to theories of language and culture, and to techniques for analysing discourses in their social contexts.

ENGL 320 (6) HISTORY OF THE ENGLISH LANGUAGE. Development of the English language from West Germanic to the present; phonology, morphology, syntax, and vocabulary.

ENGL 321 (3-12) D ENGLISH GRAMMAR AND USAGE. Descriptive approaches to the English Language

ENGL 322 (3-12) D STYLISTICS. Application of linguistic theory and method to stylistic analysis.

ENGL 323 (3-12) D VARIETIES OF ENGLISH. Study of geographical, social, and/or urban dialects of English.

ENGL 326 (3-12) D STUDIES IN THE ENGLISH LANGUAGE. Topics in the history or structure of the English language.

ENGL 328 (3-12) D METAPHOR, LANGUAGE AND THOUGHT. Exploration of the concepts underlying figurative language (in vocabulary as well as in grammar), using data from both colloquial and literary language.

ENGL 329 (6) THE STRUCTURE OF MODERN ENGLISH. A description of English phonetics, phonology, grammar, and vocabulary.

ENGL 340 (3) INTRODUCTION TO OLD ENGLISH. Old English grammar, with readings in the prose of the period.

ENGL 343 (3) OLD ENGLISH LITERATURE.

ENGL 344 (3-12) D MEDIEVAL STUDIES.

ENGL 346 (3-6) D CHAUCER AND THE MIDDLE AGES. A detailed study of Chaucer's major works.

ENGL 347 (3-12) D RENAISSANCE STUDIES.

ENGL 348 (3/6) D SHAKESPEARE AND THE RENAISSANCE.

ENGL 349 (3-12) D SEVENTEENTH-CENTURY STUDIES.

ENGL 352 (3) MIDDLE ENGLISH. The forms and development of the language.

ENGL 354 (3/6) D MILTON AND THE SEVENTEENTH CENTURY.

ENGL 356 (3) CHAUCER. For Honours students.

ENGL 357 (3-12) D RESTORATION AND EIGHTEENTH-CENTURY STUDIES.

ENGL 358 (3-12) D STUDIES IN AN EIGHTEENTH-CENTURY GENRE.

ENGL 359 (3-12) D STUDIES IN ROMANTICISM.

ENGL 362 (3-12) D STUDIES IN A NINETEENTH-CENTURY GENRE.

ENGL 364 (3-12) D NINETEENTH-CENTURY STUDIES.

ENGL 367 (3) SHAKESPEARE. Intensive study of at least six plays. For Honours students.

ENGL 369 (3-12) D STUDIES IN AMERICAN LITERATURE TO 1900.

ENGL 376 (3) MILTON. For Honours students.

ENGL 399 (0) CO-OPERATIVE WORK PLACEMENT. Supervised work experience related to English studies, in an approved company or organization for a minimum of 455 hours. Orientation workshops and final reports.

ENGL 402 (3-12) D STUDIES IN POETRY.

ENGL 405 (3-12) D STUDIES IN DRAMA.

ENGL 406 (3-12) D STUDIES IN PROSE FICTION.

ENGL 407 (3/6) D A CRITICAL HISTORY OF ENGLISH LITERATURE. Not open to students who have taken ENGL 201 or ENGL 210 or ENGL 220.

ENGL 408 (3/6) D HISTORY OF CRITICISM AND THEORY.

ENGL 409 (3/6) D MODERN CRITICAL THEORIES.

ENGL 412 (3) STUDIES IN CRITICAL THEORY.

ENGL 417 (3/6) D THE LITERATURE OF THE BIBLE.

ENGL 418 (3-12) D STUDIES IN EUROPEAN LITERATURE.

ENGL 419 (3/6) D HISTORY OF THE BOOK.

ENGL 462 (3-12) D TWENTIETH-CENTURY BRITISH AND IRISH STUDIES.

ENGL 464 (3-12) D TWENTIETH-CENTURY STUDIES.

ENGL 466 (3-12) D STUDIES IN A TWENTIETH-CENTURY GENRE.

ENGL 468 (3/6) D CHILDREN'S LITERATURE.

ENGL 470 (3-12) D CANADIAN STUDIES.

ENGL 472 (3-12) D AMERICAN STUDIES.

ENGL 474 (3-12) D STUDIES IN CONTEMPORARY LITERATURE.

ENGL 476 (3-12) D FIRST NATIONS STUDIES.

ENGL 478 (3-12) D POST-COLONIAL STUDIES.

ENGL 490 (3) MAJORS SEMINAR. Required of all Literature Majors. See Department Website (www.english.ubc.ca) for options.

ENGL 491 (3-12) C SENIOR HONOURS SEMINAR. Offerings in literary theory.

ENGL 492 (3-12) C SENIOR HONOURS SEMINAR. Offerings in literary research.

ENGL 496 (3-6) D DIRECTED READINGS IN ENGLISH LITERATURE. For Honours students only.

ENGL 499 (3/6) C HONOURS ESSAY.

ENGL 500 (3) RESEARCH TOOLS AND METHODS. Required of all graduate students in thesis programs.

ENGL 501 (3-12) D STUDIES IN BIBLIOGRAPHY.

ENGL 502 (3-12) D STUDIES IN CRITICISM.

ENGL 503 (3-12) D STUDIES IN PROSE.

ENGL 504 (3-12) D STUDIES IN DRAMA.

ENGL 505 (3-12) D STUDIES IN FICTION.

ENGL 506 (3-12) D STUDIES IN POETRY.

ENGL 507 (3-12) D STUDIES IN THE HISTORY OF THE ENGLISH LANGUAGE.

ENGL 508 (3-12) D STUDIES IN THE STRUCTURE OF THE ENGLISH LANGUAGE.

ENGL 509 (3-12) D STUDIES IN RHETORIC AND THEORY OF COMPOSITION.

ENGL 510 (3-12) D STUDIES IN OLD ENGLISH.

ENGL 511 (3-12) D CHAUCER.

ENGL 512 (3-12) D MIDDLE ENGLISH STUDIES.

ENGL 514 (3-12) D STUDIES IN THE RENAISSANCE.

ENGL 515 (3-12) D SHAKESPEARE.

ENGL 519 (3-12) D STUDIES IN THE SIXTEENTH CENTURY.

ENGL 520 (3-12) D STUDIES IN THE SEVENTEENTH CENTURY.

ENGL 525 (3-12) D STUDIES IN THE EIGHTEENTH CENTURY.

ENGL 530 (3-12) D STUDIES IN THE ROMANTIC PERIOD.

ENGL 535 (3-12) D STUDIES IN THE VICTORIAN PERIOD.

ENGL 539 (3-12) D STUDIES IN THE TWENTIETH CENTURY.

ENGL 540 (3-12) D STUDIES IN AMERICAN LITERATURE TO 1890.

ENGL 541 (3-12) D STUDIES IN AMERICAN LITERATURE SINCE 1890.

ENGL 545 (3-12) D STUDIES IN CANADIAN LITERATURE.

ENGL 546 (3-12) D STUDIES IN COMMONWEALTH/POST-COLONIAL LITERATURES.

ENGL 547 (3/6) C DIRECTED READING.

ENGL 549 (6-12) C MASTER'S THESIS.

ENGL 551 (3-12) D STUDIES IN LITERARY MOVEMENTS.

ENGL 552 (3/6) D PRACTICAL CRITICISM. Close reading and analysis of selected literary texts.

ENGL 553 (3-12) D STUDIES IN LITERARY THEORY.

ENGL 555 (3-12) D STUDIES IN LITERATURE AND THE OTHER ARTS.

ENGL 649 (0) PH.D. THESIS.

ENVR — ENVIRONMENTAL STUDIES FACULTY OF SCIENCE

ENVR 200 (3) ENVIRONMENTAL STUDIES I. An introduction, in seminars and field trips, to the major global, regional, and local environmental issues facing human societies. Prerequisite: Open to all students with second-year, or higher, standing. [3-0-0]

ENVR 300 (3) ENVIRONMENTAL STUDIES II. An introduction to environmental research. Students investigate research methodologies and reporting in a range of scientific disciplines and fields. Prerequisite: Open to all students

with third-year, or higher, standing in the Faculty of Science. [3-0-0]

ENVR 449 (6) ENVIRONMENTAL STUDIES THESIS. Prerequisite: ENVR 300 and fourth-year standing in the B.Sc. Environmental Sciences program. [3-0-0;3-0-0]

EOSC — EARTH AND OCEAN SCIENCES FACULTY OF SCIENCE

EOSC 110 (3) THE SOLID EARTH: A DYNAMIC PLANET. Earth's origin, composition, structure, and natural resources. Plate tectonics as the driving force for volcanism, mountain building, and earthquakes. Imaging Earth's interior. Environmental geoscience and sustainability. (Consult the Credit Exclusion list for the Faculty of Science section of the Calendar.) Corequisite: EOSC 111 is recommended. [3-0-0]

EOSC 111 (1) LABORATORY EXPLORATION OF PLANET EARTH. An examination of the processes that shape and change the planet earth. This laboratory course accompanies any of EOSC 110, EOSC 112, EOSC 114, EOSC 116. Course content is customizable at the individual student level. Corequisite: One of EOSC 110, EOSC 112, EOSC 114, EOSC 116. [0-3-0]

EOSC 112 (3) THE FLUID EARTH: ATMOSPHERE AND OCEAN. Introduction to processes in ocean and atmosphere. Heat, current, winds, clouds, marine life, resources. Effects of coupling, climate change, pollution. (Consult the Credit Exclusion list, within the Faculty of Science section in the Calendar.) Corequisite: EOSC 111 is recommended. [3-0-0]

EOSC 114 (3) THE CATASTROPHIC EARTH: NATURAL DISASTERS. Introduction to causes and physical characteristics of disasters such as volcanic eruptions, earthquakes, tsunamis, hurricanes, storm surge, thunderstorms, tornadoes, landslides, wind waves, meteor impacts, mass extinctions. Corequisite: EOSC 111 is recommended. [3-0-0]

EOSC 116 (3) DINOSAURS' EARTH. Geologic time and earth habitat of dinosaurs; tectonic, climate, and ocean changes. Reading the fossil record of dinosaurs and their environment from rise through extinction. Corequisite: EOSC 111 is recommended. [3-0-0]

EOSC 210 (3) EARTH SCIENCE FOR ENGINEERS. Focus on the interaction between society and the geologic environment. Locating, assessing and developing natural resources; understanding and preparing for natural hazards, design of structures and waste disposal sites. For applied science and forestry students only. [3-2-0; 0-0-0]

EOSC 211 (3) COMPUTER METHODS IN EARTH, OCEAN AND ATMOSPHERIC SCIENCES. Mathematical computer-based problem solving in the physical, chemical, and biological sciences. Problems drawn from studies of the earth, the oceans and the atmosphere. Prerequisite: One of MATH 101, MATH 103, MATH 105, MATH 121, SCIE 001. [2-0-2]

EOSC 212 (3) IMAGING THE EARTH. Use of imaging techniques at scales that range from 10⁷m (satellite images) to 10⁻¹⁰m (atomic force microscopy) to study earth materials and processes. Prerequisite: One of MATH 101, MATH 103, MATH 105, MATH 121 and one of PHYS 101, PHYS 107 and one of CHEM 111, CHEM 121. [3-0-0]

EOSC 217 (3) THE SCIENCE AND PRACTICE OF SUSTAINABILITY. Two week interdisciplinary field school. Earth system science, ecoliteracy, ecofootprinting, sustainability indicators, geological/climatological rates compared to human timescales. Prerequisite: Second-year standing.

EOSC 220 (3) INTRODUCTORY MINERALOGY. Introduction to crystallography, physical and chemical properties of minerals. Recognition and identification of common minerals. Prerequisite: One of CHEM 121, CHEM 123, CHEM 111, CHEM 113. [2-3; 0-0]

EOSC 221 (3) INTRODUCTORY PETROLOGY. Optical mineralogy and the classification and genesis of igneous, metamorphic and sedimentary rocks. Prerequisite: EOSC 220. [2-3-0]

EOSC 222 (3) GEOLOGICAL TIME. Measuring geological time and understanding Earth history using stratigraphic principles, paleontology and radioactive decay. Prerequisite: Second-year standing in Science. One of EOSC 1** , EOSC 210, GEOG 101 or GEOG 103 is recommended. [2-2-0]

EOSC 223 (3) FIELD TECHNIQUES. Introduction to the techniques of geological mapping and the interpretation of field data. Includes three one-day field trips on weekends plus a seven-day field school after Spring examinations. A fee is to be paid by January 31. Corequisite: EOSC 221. [2-2-0]

EOSC 250 (3) FIELDS AND FLUXES. Application of classical theory of scalar and vector fields to geophysical sciences. Conductive, convective and radiative energy flux, gravitation, electrostatics, and magnetostatics. Gauss' and Stokes' theorems. Prerequisite: One of PHYS 101, PHYS 107. Corequisite: MATH 200. One of PHYS 102, 108 is recommended. [3-0; 0-0]

EOSC 252 (3) INTRODUCTION TO EXPERIMENTAL GEOPHYSICS. Physical properties of geological materials determined from laboratory measurements and application to geophysical field surveys. Prerequisite: One of PHYS 101, PHYS 121 and one of MATH 101, MATH 121. [0-0; 2-3]

EOSC 270 (3) MARINE BIODIVERSITY. Introduction to diversity of marine habitats and ecosystems; hydrothermal vent, intertidal, coral reef, estuarine, deep sea, and polar ecosystems; impacts of ecosystem change; evolution of ocean plankton; invasive species; climate change; pollution. Prerequisite: Second-year standing [3-0-0]

EOSC 310 (3) THE EARTH AND THE SOLAR SYSTEM. The Earth as a planet: its composition, internal dynamics, and surface evolution.

Rotation, magnetic field, plate tectonics, earthquakes, volcanoes. The ocean, atmosphere, and biosphere as components of a varying geo-environment. Not for credit in the Faculties of Science and Applied Science. No background in Science or Mathematics is required. Prerequisite: Second-year standing. [3-0-0]

EOSC 311 (3) THE EARTH AND ITS RESOURCES. An introduction to the Earth with emphasis on its industrial and aesthetic resources. Rocks, minerals, gold, diamonds, sediments, fossils, oil and gas, canyons, and volcanoes and the processes that create them. Not for credit in the Faculties of Science and Applied Science. No background in Science or Mathematics is required. Prerequisite: Second-year standing. [3-0-0]

EOSC 312 (3) THE EARTH SYSTEM AND ENVIRONMENTAL EVOLUTION. Earth's environmental history and aspects of contemporary global change. Plate tectonics, mass extinction, and the Gaia Hypothesis. Not for credit in the Faculties of Science or Applied Science. [3-0-0]

EOSC 314 (3) THE OCEAN ENVIRONMENT. An introduction to the oceans and the processes that have shaped them, their composition and movement, waves, tides, beaches, interactions with the atmosphere and human exploitation of the non-living resources. Not for credit in the Faculties of Science or Applied Science. No background in Science or Mathematics is required. Prerequisite: Second-year standing. [3-0-0]

EOSC 315 (3) THE OCEAN ECOSYSTEM. An introduction to life in the oceans, its variety and evolution; primary producers and their links to the environment, zooplankton, marine communities, living marine resources and their role in today's world. Not for credit in the Faculties of Science or Applied Science. Prerequisite: EOSC 314 is recommended. [3-0-0]

EOSC 320 (3) SEDIMENTOLOGY. Origin, diagenesis and geochemistry of sediments and sedimentary rocks. Prerequisite: All of EOSC 221, EOSC 222. [2-2-0]

EOSC 321 (3) PRINCIPLES OF IGNEOUS PROCESSES. Study of igneous processes with emphasis on the origins of volcanic rocks and deposits. Prerequisite: EOSC 221. [2-3-0]

EOSC 322 (3) METAMORPHIC PETROLOGY. Deciphering lithospheric processes as recorded by the mineralogy, chemistry and textures of metamorphosed rocks. Prerequisite: All of EOSC 221, CHEM 201, CHEM 202 and one of MATH 101, MATH 202. [2-3-0]

EOSC 323 (3) STRUCTURAL GEOLOGY I. Analysis and interpretation of natural deformation. Prerequisite: All of EOSC 221, EOSC 222, EOSC 223. [2-3-0]

EOSC 324 (3) INTRODUCTION TO MINERALOGY AND PETROLOGY. The common minerals and rocks, and the processes that formed them. Not for credit in any Earth & Ocean Sciences program but allowable as credit towards the Earth Science component in

the General Science program. Credit will not be given for EOSC 324 and EOSC 220. Corequisite: Either (a) GEOG 103 or (b) all of EOSC 110, EOSC 111. [2-3-0]

EOSC 326 (3) EARTH AND LIFE THROUGH TIME. The fossil record of adaptation and extinction emphasizing the interaction of biological and geological processes. Not for credit in any Earth and Ocean Sciences program but allowable as credit towards the Earth Science component in the general science program. Prerequisite: Biology 100 level and third-year standing in Science. [3-0-0]

EOSC 327 (3) GEOCHEMICAL THERMODYNAMICS. Application of chemical thermodynamics to problem solving in the earth sciences. Geochemical tools are developed for: low-T aqueous geochemistry, high-T, high-P processes in the lithosphere, ore-deposit formation, and for prediction of geochemical reaction rates in all environments. Prerequisite: EOSC 220. Corequisite: One of CHEM 201, CHEM 205. [2-2-0]

EOSC 328 (3) FIELD GEOLOGY. Recording and processing geological data in the field. Held within the three weeks following April examinations after third year. A special fee is to be paid by January 31. Prerequisite: All of EOSC 323, EOSC 330 and one of EOSC 321, EOSC 322.

EOSC 329 (3) GROUNDWATER HYDROLOGY. Introduction to theory of groundwater flow; flow nets; regional groundwater resource evaluation; well hydraulics; role of groundwater in geologic processes. [2-2*-2*; 0-0-0]

EOSC 330 (3) PRINCIPLES OF GEOMORPHOLOGY. Landform development; morphological and historical analysis of landforms; applications in engineering and resource development. Prerequisite: One of GEOG 101, GEOG 103, EOSC 110, EOSC 210. [3-2-0; 0-0-0]

EOSC 331 (3) INTRODUCTION TO MINERAL DEPOSITS AND EXPLORATION GEOLOGY. Introduction to economic geology and models related to mineral exploration. Study includes typical deposit types and their plate tectonic setting. Prerequisite: One of EOSC 220, EOSC 324. [2-2-0; 0-0-0]

EOSC 332 (3) TECTONIC EVOLUTION OF NORTH AMERICA. An overview of the geology and tectonic evolution of North America; comparisons and contrasts between Precambrian rocks of the North American craton and Phanerozoic belts of the Cordilleran, Appalachian, Ouachita and Inuitian orogens; interrelations between sedimentation, deformation, metamorphism and magmatism in a plate tectonic context. Prerequisite: EOSC 323 or permission of the instructor. [3-0-0]

EOSC 333 (3) ELEMENTAL AND ISOTOPIC GEOCHEMISTRY. Analytical methods in geochemistry, major and trace element geochemistry, radiogenic isotopes, geochemistry of seawater, the mantle, basalts, subduction zones, sedimentary rocks, continental crust. Prerequisite: EOSC 220.

EOSC 350 (3) ENVIRONMENTAL, GEOTECHNICAL, AND EXPLORATION GEOPHYSICS I. Principles of geophysical survey design, data acquisition, processing and interpretation with emphasis on near-surface problems. Magnetic, seismic reflection/refraction, electromagnetic and ground penetrating radar surveys. Case history analysis of environmental and geotechnical problems. Prerequisite: One of MATH 200, MATH 253 and third-year standing or higher in Science or Applied Science. [3-2-0]

EOSC 351 (3) ENVIRONMENTAL, GEOTECHNICAL, AND EXPLORATION GEOPHYSICS II. Geophysical techniques for near surface and deeper structure DC resistivity, induced polarization, gravity and electromagnetic surveys. Case history analysis of environmental, geotechnical and exploration problems. Prerequisite: EOSC 350. [3-2-0]

EOSC 352 (3) GEOPHYSICAL CONTINUUM DYNAMICS. Introduction to tensor calculus and continuum mechanics. Stress, strain and strain-rate tensors. Mass, momentum and energy balance. Applications to problems of geophysical heat transport, elasticity and fluid dynamics illustrated using MATLAB. Prerequisite: One of EOSC 250, EOSC 251, MATH 317. [3-0; 0-0]

EOSC 353 (3) SEISMOLOGY. Hooke's law for isotropic continua, elastic wave equation, reflection and refraction methods for imaging the Earth's internal structure, plane waves in an infinite medium and interaction with boundaries, body wave seismology, inversion of travel-time curves, generalized ray theory, crustal seismology, surface waves and earthquake source studies. Prerequisite: EOSC 352. [0-0; 3-3*]

EOSC 354 (3) ANALYSIS OF TIME SERIES AND INVERSE THEORY FOR EARTH SCIENTISTS. Continuous and discrete Fourier transforms, correlation and convolution, spectral estimates, optimum least-squares filters, deconvolution and prediction, frequency-wave number filtering. A practical course on computer techniques applied to the analysis of a wide range of geophysical phenomena. Prerequisite: Either (a) SCIE 001 or (b) one of MATH 101, MATH 103, MATH 105, MATH 121 and one of PHYS 101, PHYS 107. [3-2-0; 0-0-0]

EOSC 370 (3) INTRODUCTION TO PHYSICAL AND CHEMICAL OCEANOGRAPHY. History and development of oceanography; methods; ocean basin structure; properties of seawater; salinity, temperature and density distributions; circulation; waves and tides; acoustics, the oceans and climate. Prerequisite: Completion of first-year Science is required. [3-0-0]

EOSC 371 (3) INTRODUCTION TO BIOLOGICAL AND GEOLOGICAL OCEANOGRAPHY. Organisms in the sea and their relation to the physical and chemical environment; marine sediments and their relationships to biologic and physical processes. Prerequisite: EOSC 370 is recommended. Equivalency: BIOL 305. [3-0-0]

EOSC 398 (3) CO-OPERATIVE WORK PLACEMENT I. Approved and supervised technical work experience in an industrial, university or government setting for a minimum of 14 weeks. Normally taken in the Summer Session (Terms 1 and 2) following second year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Earth and Ocean Sciences.

EOSC 399 (3) CO-OPERATIVE WORK PLACEMENT II. Approved and supervised technical work experience in an industrial, university or government setting for a minimum of 14 weeks. Normally taken in Winter Session (Term 1) in third year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Earth and Ocean Sciences.

EOSC 420 (3) VOLCANOLOGY. Field and lab-based studies in volcanology concentrating on physical and chemical aspects of volcanic processes. Prerequisite: All of EOSC 220, EOSC 221. [2-3-0]

EOSC 421 (3) ADVANCED SEDIMENTOLOGY. Description and interpretation of ancient and modern sediments, with emphasis on the origin, composition, textures, structures, diagenesis and chemistry of biogenic sediments. Prerequisite: EOSC 320 or permission of instructor. [2-2-0]

EOSC 422 (3) STRUCTURAL GEOLOGY II. Studies of natural deformation using advanced techniques. Prerequisite: EOSC 323. [2-3-0]

EOSC 424 (3) ADVANCED MINERAL DEPOSITS AND ORE PETROLOGY. Metal solubility and transport, chemical activity diagrams, fluid inclusions, stable isotopes, radiogenic isotopes, geothermometry, geobarometry, alteration and metal zonation, and mineral exploration. Minerals of ore deposits studied using optical microscopy. Corequisite: EOSC 331. [2-3-0]

EOSC 425 (3) PALEONTOLOGY. Assessment of the geological impact of life both before and after the advent of hard skeletons. Fossilization processes; skeletal composition and structure; numerical taxonomy; bioerosion; biostratigraphy; and paleobiogeography in the context of plate tectonics. Offered in alternate years. Prerequisite: One of EOSC 222, EOSC 326. [2-3-0]

EOSC 428 (3) FIELD TECHNIQUES IN GROUNDWATER HYDROLOGY. Hydraulic head measurements, water-quality sampling, pump and slug testing, infiltration measurements, profiling techniques. Held over five days after spring term at the Richmond groundwater hydrology field-school site. Enrollment limitations. Prerequisite: EOSC 329 or permission of the instructor.

EOSC 429 (3) GROUNDWATER CONTAMINATION. Contaminant transport processes in groundwater flow systems; aqueous and multiphase transport; mathematical models describing migration and chemical evolution of contaminant plumes; case studies. Prerequisite: EOSC 329. [2-2-0]

EOSC 430 (3) AQUEOUS GEOCHEMISTRY. Quantitative approaches to practical aqueous geochemistry problems. Equilibrium thermodynamics, kinetics, complexation, oxidation reduction, cation exchange, sorption and partitioning of organics. Case Studies. Prerequisite: One of EOSC 327, CHEM 301. [2-2-0]

EOSC 431 (3) GROUNDWATER REMEDIATION. Methods for containment and remediation of subsurface contaminants; including groundwater control, groundwater extraction, and in situ treatment. Experience with common design approaches. Prerequisite: EOSC 429. [2-2-0]

EOSC 432 (3) FOSSIL FUELS. Origin, geochemistry and distribution of petroleum and coal in the stratigraphic record. Sedimentation of organic matter, organic diagenesis, migration and accumulation of hydrocarbons. Principles of exploration and development. Techniques for measurement of organic maturation and source rock analyses. Corequisite: EOSC 320. [2-2-0]

EOSC 433 (3) GEOTECHNICAL ENGINEERING PRACTICE. Application of rock/soil engineering principles and techniques used in geotechnical design. Influence of geological factors, design of ground support, and use of geotechnical instrumentation and numerical analyses for tunneling and slope stability projects. Case histories. Prerequisite: All of EOSC 329, CIVL 210, MINE 303. [2-2-0]

EOSC 434 (3) PRINCIPLES OF GEOLOGICAL ENGINEERING. Role of geology and hydrogeology in siting, design, and construction of engineering structures; synthesis of rock mechanics and soil mechanics methods in various geological environments; introduction to computer applications in geological engineering. Prerequisite: All of EOSC 329, CIVL 310, CIVL 311 or permission of the department head. [2-2-0]

EOSC 447 (6) THESIS. For B.A.Sc. Topic to be approved by the Department. [0-3-0; 0-3-0]

EOSC 448 (3/6) C DIRECTED STUDIES. Investigation of a topic to be agreed upon by a member of the faculty and the student. Permission of an undergraduate adviser and of the supervising faculty member is required before registration.

EOSC 449 (6) THESIS. All Honours students are required to submit a thesis involving original research on a subject approved by the Department. Restricted to students in the Honours program.

EOSC 450 (3) POTENTIAL FIELDS IN EARTH AND PLANETARY SCIENCES. Theory, application and quantitative interpretation of potential field methods in Earth and planetary sciences. Topics drawn from problems in geophysical exploration, geodesy, geodynamics of the planets, geomagnetism, planetary magnetic fields, heat flow and fluid flow. Prerequisite: One of PHYS 312, MATH 316, MATH 257 and one of PHYS 102, PHYS 108, SCIE 001. [3-0-0]

EOSC 453 (3) ADVANCED PHYSICS OF THE EARTH. Quantitative methods for determining the physical properties and structure of the earth. Basic inversion interpretation techniques for gravity, magnetic, seismic, paleomagnetic, radiometric methods. Thermal history and the evolution of the earth. Prerequisite: One of PHYS 312, MATH 316, MATH 257. [3-0-0]

EOSC 454 (3) APPLIED GEOPHYSICS. Using geophysics to characterize the Earth's subsurface for resource exploration, engineering, environmental, and other tasks. Data acquisition, processing, inversion, and interpretation of individual and multiple surveys, including electrical, electromagnetic, seismic, gravity, and magnetic methods. Prerequisite: All of EOSC 352, EOSC 353, EOSC 450 and one of PHYS 301, PHYS 354. [3-2-0]

EOSC 470 (3) BIOLOGICAL OCEANOGRAPHY. A quantitative examination of processes regulating the abundance, distribution and production of phytoplankton, zooplankton, microbes and fish. Controls of primary and secondary production, ecosystem dynamics and foodwebs. Prerequisite: EOSC 371. [3-0-0]

EOSC 471 (3) DYNAMIC BIOLOGICAL OCEANOGRAPHY. Examination of the links between physical processes and biological populations in the ocean environment. The influence of time and length scales, turbulence, coastal upwelling, fronts, tidal mixing and internal waves on the distribution of biological populations. Prerequisite: All of EOSC 370, EOSC 371. [3-0-0]

EOSC 472 (3) INTRODUCTION TO MARINE CHEMISTRY AND GEOCHEMISTRY. Elemental abundance in seawater and marine sediments; solution chemistry of seawater; chemical and mineralogical composition of sediments; the carbonate system; organic matter in the sea; gases; the nutrient elements; heavy metals; geochemical balance in the oceans. Prerequisite: One of EOSC 370, EOSC 371, CHEM 301. [3-0-0]

EOSC 473 (3) METHODS IN OCEANOGRAPHY. Methods of data acquisition, study and analysis required in solving oceanographic problems. Includes a field school held during the mid-term break. A fee is to be paid by January 31. Open to third- and fourth-year students in Oceanography, or with permission of the Department Head. Prerequisite: EOSC 370. [0-3-0]

EOSC 474 (3) MARINE POLLUTION. An interdisciplinary study of pollution, with examples drawn from coastal and oceanic environments, including areas of local interest. Intended for third and fourth year students with a background in the sciences. [3-0-0]

EOSC 475 (3) MARINE MICROBIOLOGY. Advanced biology, ecology and diversity of marine microbes. Emphasis on the roles of bacteria and viruses in marine foodwebs and geochemical cycles. Prerequisite: A minimum of 6 credits of third-year level life science courses. [3-0-0]

EOSC 476 (3) ESTUARIES. An interdisciplinary study of the features and the physical, chemical, biological and geological processes in estuaries. Prerequisite: All of EOSC 370, EOSC 371 and fourth-year standing or permission of the department head is required. [3-0-2*]

EOSC 477 (3) GEOPHYSICAL FLUID DYNAMICS. The fundamental principles governing the flow of a density-stratified fluid on a rotating planet, with applications to the motions of the ocean and atmosphere. Prerequisite: One of PHYS 312, MATH 316. Equivalency: ATSC 414. [3-0-0]

EOSC 478 (3) INTRODUCTION TO FISHERIES SCIENCE. An introduction to the ecology and management of freshwater and marine fisheries. Topics include: population dynamics, species interactions, communities, environmental influences, stock assessment, economics and sociology of fisheries. Laboratories will consist of numerical analyses and simulations. [2-0-3]

EOSC 498 (3) CO-OPERATIVE WORK PLACEMENT III. Approved and supervised technical work experience in an industrial, university or government setting for a minimum of 14 weeks. Normally taken in the Summer Session (Terms 1 and 2) following third year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Earth and Ocean Sciences.

EOSC 499 (3) CO-OPERATIVE WORK PLACEMENT IV. Approved and supervised technical work experience in an industrial, university or government setting for a minimum of 14 weeks. Normally taken in the Summer Session (Terms 1 and 2) following fourth year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Earth and Ocean Sciences.

EOSC 510 (3) DATA ANALYSIS IN ATMOSPHERIC, EARTH AND OCEAN SCIENCES. [3-0-0]

EOSC 511 (3) NUMERICAL TECHNIQUES FOR OCEAN, ATMOSPHERE AND EARTH SCIENTISTS. This course is Web-based. Credit will not be granted for both ATSC 409 and ATSC 506/EOSC 511. Equivalency: ATSC 506.

EOSC 512 (3) ADVANCED GEOPHYSICAL FLUID DYNAMICS.

EOSC 513 (3) IMAGING AND ESTIMATION WITH WAVELETS.

EOSC 520 (3) ADVANCED MINERALOGY. Crystal structure, chemistry, origin and paragenesis of major rock-forming and ore minerals.

EOSC 521 (3) MICROBEAM AND DIFFRACTION METHODS FOR THE CHARACTERIZATION OF MINERALS AND MATERIALS. [2-3-0]

EOSC 522 (3) METHODS AND MODELING IN PETROLOGY AND GEOCHEMISTRY. [3-0-2]

EOSC 523 (3) ISOTOPE GEOLOGY.

EOSC 524 (3) PROBLEMS IN PALEONTOLOGY. Seminar. Given in alternate years.

EOSC 525 (3) EXPLORATION GEOCHEMISTRY. Distribution of elements in relation to mineralization; application of geochemical techniques to mineral exploration.

EOSC 526 (3) MECHANICS OF NATURAL DEFORMATION. Lectures and laboratory problems.

EOSC 527 (3) BIOGENIC SEDIMENTS AND EARTH'S ENVIRONMENTAL HISTORY.

EOSC 528 (3) ADVANCED COAL GEOLOGY. The origin and character of coal and associated strata. Petrology, chemistry and physical properties of coal. Sedimentology of peat, biochemical and geochemical stages of coalification and oxidation of coal. Use of organic matter as a geothermometer and inbasinal analysis. Structural analysis and character of coal deposits. Analytical methods applied to coal.

EOSC 529 (3) ADVANCED GEOTECHNICS. Advanced topics in engineering geology. Emphasis will be on the physics of geological failures and the mathematical modelling of such failures for the purposes of analysis, prediction and design at engineering sites. Prerequisite: EOSC 433.

EOSC 530 (3) ADVANCED IGNEOUS PETROLOGY. Lectures, seminars and laboratories on the application of physical chemistry to the origin of igneous rocks; crystallization processes in silicate magmas; melt physical properties, heat transfer and fluid flow.

EOSC 531 (3) EXPLORATION METHODOLOGY.

EOSC 532 (3) FIELD LABORATORY IN GROUNDWATER HYDROLOGY. Hydraulic head measurements, water-quality sampling, pump and slug testing, infiltration measurements, profiling techniques. Computer analysis of field data. Held after spring term at the Richmond groundwater hydrology field site. Enrollment limitations. Prerequisite: EOSC 533.

EOSC 533 (3) ADVANCED GROUNDWATER HYDROLOGY. Finite-difference models of steady-state and transient groundwater flow in the saturated and unsaturated zones; applications to regional groundwater flow, groundwater recharge, subsurface contributions to streamflow, and aquifer evaluation.

EOSC 534 (3) ADVANCED METAMORPHIC PETROLOGY. The characterization of metamorphic processes using mineral assemblages, mineral compositions, thermodynamics, and mass conservation equations.

EOSC 535 (3) TRANSPORT PROCESSES IN POROUS MEDIA. Transport of mass and heat in groundwater flow systems; modelling techniques including an introduction to the finite-element method; modelling of groundwater contamination.

EOSC 536 (3) APPLIED GROUNDWATER FLOW MODELLING. Mathematical principles of groundwater flow; detailed study of the equations of flow in confined and unconfined aquifers. Offered in alternate years. Prerequisite: EOSC 533.

EOSC 537 (3) TOPICS IN GROUNDWATER HYDROLOGY. A survey of the principal literature. Prerequisite: EOSC 533.

EOSC 538 (3) DIAMOND EXPLORATION.

EOSC 539 (3) GEOCHEMISTRY OF HYDROTHERMAL ORE DEPOSITS. Prerequisite: Completion of a course in Economic Geology

EOSC 540 (3) ADVANCED GROUNDWATER GEOCHEMISTRY.

EOSC 541 (3) MULTI-COMPONENT REACTIVE TRANSPORT MODELING IN GROUNDWATER. Prerequisite: Either (a) EOSC 430 or (b) EOSC 540; and EOSC 533.

EOSC 542 (3) ADVANCED VOLCANOLOGY.

EOSC 543 (1-3) D TOPICS IN SOLID EARTH SCIENCES.

EOSC 544 (3) GEODYNAMICS.

EOSC 545 (3) ADVANCED MODELS IN MINERAL DEPOSITS.

EOSC 546 (3) ADVANCED FIELD METHODS IN EARTH SCIENCE.

EOSC 548 (3) GRADUATING PAPER FOR MASTERS CANDIDATES WITHOUT THESIS.

EOSC 549 (6-12) D MASTER'S THESIS.

EOSC 550 (3) LINEAR INVERSE THEORY. Model construction, appraisal of nonuniqueness, and inference in linear problems. Tomographic inversions.

EOSC 551 (2-4) C EARTHQUAKE SEISMOLOGY. Seismic source theory, wave propagation in layered media, anelasticity, free oscillations, instrumentation, data analysis and interpretation.

EOSC 552 (2-4) C GEOMAGNETISM AND AERONOMY. Description of the geomagnetic field, dynamo theory of the origin of the geomagnetic field, transient magnetic variations, magnetic storms and ionospheric disturbances.

EOSC 553 (2-4) C GEOPHYSICAL ANALYSIS. Lectures and seminars on applications of statistical communication theory to analysis of geophysical data, time series analysis, optimum linear systems, and decision theory.

EOSC 554 (2-4) C THEORETICAL GLACIOLOGY. Lectures and seminars on theoretical aspects of glacier mechanics; flow, stress and temperature fields, sliding theory, flow instabilities.

EOSC 555 (2-4) C NONLINEAR INVERSE THEORY. Model construction, appraisal of nonuniqueness, and inference in nonlinear problems. Stochastic inverses, constrained optimization, joint inversions and image processing.

EOSC 556 (2-6) C STUDIES IN APPLIED GEOPHYSICS.

EOSC 557 (2-6) C INFORMATION PROCESSING OF GEOPHYSICAL DATA.

EOSC 558 (2-6) C STUDIES IN GLACIOLOGY.

EOSC 559 (3) ROCK PHYSICS. Topics include the material properties of porous rocks; the visco-elastic behaviour of rocks; elastic wave propagation and attenuation, and electrical properties.

EOSC 560 (3) THEORY OF THE EARTH. A quantitative approach to understanding the earth through elasticity and anelasticity, thermodynamics, geochemistry, and geomagnetism. Specific topics include free oscillations, geodynamics, evolution of the earth, and magnetohydrodynamics with dynamo theory.

EOSC 561 (2-6) C THEORY AND METHODS IN SEISMIC INTERPRETATION. Topics to be selected from the following: forward modelling, analysis and inversion procedures as used in multichannel reflection, wide-angle reflection and refraction studies of the lithosphere. Velocity analyses, wave equation migration, dip moveout, synthetic seismograms, tomographic inversion, one-dimensional synthetic seismograms, tau-p methods, waveform inversion, two-dimensional ray tracing and synthetic seismograms, tomographic inversion.

EOSC 562 (3) MECHANICS OF EARTHQUAKES AND FAULTING.

EOSC 570 (3) PALEOCEANOGRAPHY. [3-0-0]

EOSC 571 (2-6) D SEMINAR IN PHYSICAL OCEANOGRAPHY AND ATMOSPHERIC SCIENCE.

EOSC 572 (3) MARINE GEOCHEMISTRY. Geochemistry of marine sediments and geochemical cycles in the ocean.

EOSC 573 (3) METHODS IN OCEANOGRAPHY.

EOSC 574 (3) MARINE PHYTOPLANKTON ECOLOGY. Emphasis on the biology of the organisms and the physiological ecology of primary production by phytoplankton. EOSC 370 and EOSC 371 are recommended. Offered in alternate years.

EOSC 575 (2) BIOLOGICAL OCEANOGRAPHIC MECHANISMS. A study of components in the pelagic food chain of the sea including factors affecting the production and consumption of marine organisms. Prerequisite: EOSC 370.

EOSC 576 (3) INORGANIC CHEMICAL TRACERS IN THE STUDY OF MARINE SYSTEMS. The chemical composition of seawater, cycles of gases, trace metals and radionuclides within the sea, chemical tracers in the study of water mixing, water movement and changes in ocean currents over time.

EOSC 577 (3) INORGANIC CHEMICAL PROCESSES IN THE MARINE ENVIRONMENT. The solution chemistry of seawater, chemical speciation in natural waters, thermodynamic and kinetic modelling of marine chemical systems.

EOSC 578 (3) SEMINAR IN BIOLOGICAL OCEANOGRAPHY.

EOSC 579 (1) DYNAMIC OCEANOGRAPHY. Consult the Credit Exclusion List in the Faculty of Science section of the Calendar. Prerequisite: EOSC 512.

EOSC 580 (3) DYNAMIC METEOROLOGY. Applications of the equations of motion on a rotating sphere to selected large-scale atmospheric phenomena. Topics include the general circulation, wave generation and propagation, barotropic and baroclinic instability, climate modelling and the role of the oceans. Offered in alternate years.

EOSC 581 (3) SEMINAR IN MARINE SEDIMENT GEOCHEMISTRY. A review of selected areas of recent research on the geochemistry of marine sediments. This course is intended for graduate students with qualification in chemistry or geochemistry.

EOSC 582 (3) SATELLITE REMOTE SENSING: APPLICATIONS TO OCEANOGRAPHY AND METEOROLOGY. A review of the satellite-sensed data products used in research and operational aspects of oceanography and meteorology. Equivalency: GEOG 515.

EOSC 583 (3) CIRCULATION PROCESSES AND TRANSPORT MECHANISMS IN OBSERVATIONAL OCEANOGRAPHY.

EOSC 595 (2-6) D DIRECTED STUDIES. Advanced studies under the direction of a staff member may be arranged in special cases with the approval of the department head.

EOSC 598 (3) M.ENG. GRADUATING PAPER.

EOSC 599 (6-12) D THESIS. For M.A.Sc.

EOSC 649 (0) THESIS. For Ph.D. (Science).

EOSC 699 (0) THESIS. For Ph.D.

(Engineering).

EPSE — EDUCATIONAL PSYCHOLOGY AND SPECIAL EDUCATION FACULTY OF EDUCATION

EPSE 301 (3) INTRODUCTION TO EDUCATIONAL PSYCHOLOGY. [3-0]

EPSE 303 (3) TEACHING HIGHLY ABLE LEARNERS. Identification and appraisal of developmental and educational needs of highly able learners. [3-0]

EPSE 306 (2) EDUCATION DURING THE ADOLESCENT YEARS. Developmental characteristics of persons from pre-school age through adulthood. Physical, social, cognitive, moral, and emotional growth of both normal and exceptional children in grades 8-12. The teacher's role in assisting such students to deal with major developmental issues and problems. Pass/Fail. [2-0-0]

EPSE 312 (3) INTRODUCTION TO THE STUDY OF EXCEPTIONAL CHILDREN. An examination of all groups of exceptional children in terms of definition, incidence, characteristics, diagnosis and treatment. Prerequisite to most other courses in Special Education. Can be taken concurrently with several other introductory courses in Special Education. [3-0]

EPSE 313 (3) EDUCATIONAL APPLICATION OF DEVELOPMENTAL THEORIES. Theories of human development; physical, social, cognitive, moral, and emotional developmental characteristics from infancy to adolescence; implications for educational practice with students of different age and developmental status during the elementary school years. Pass/Fail. [3-0-0]

EPSE 314 (3) INTRODUCTION TO THE EDUCATION OF THE VISUALLY IMPAIRED. An introductory course reviewing the identification and education of blind and partially sighted children. Designed to aid teachers to accommodate visually impaired children in the regular class setting. Prerequisite: EPSE 312. Corequisite: EPSE 312. [3-0]

EPSE 315 (3) LANGUAGE DISORDERS OF EXCEPTIONAL CHILDREN. The course deals with severe language disabilities in children. Emphasis is placed on theories of language acquisition as applied to assessment. Prerequisite: One of EPSE 312, EPSE 317. Corequisite: One of EPSE 312, EPSE 317. [3-0]

EPSE 316 (3) LEARNING DISABILITIES. Identification, assessment and needs of children with learning disabilities. Prerequisite: One of EPSE 312, EPSE 317. [3-0-0]

EPSE 317 (3) DEVELOPMENT AND EXCEPTIONALITY IN THE REGULAR CLASSROOM. The teacher's role in dealing with major developmental and special educational issues and problems within the regular classroom program, including working with supportive services, parents, and communities. Designated sections will focus on early childhood, middle childhood or adolescence. Pass/Fail. Prerequisite: One of EPSE 306, EPSE 313. Corequisite: One of EPSE 306, EPSE 313. [3-0-0]

EPSE 320 (3) FOUNDATIONS OF EDUCATION FOR STUDENTS WITH VISUAL IMPAIRMENTS. This course is restricted to students enrolled in a program for Education of Visually Impaired children or those who hold the Diploma or its equivalent. [3-0]

EPSE 342 (3) FIELD EXPERIENCES WITH INDIVIDUAL ATYPICAL CHILDREN. Supervised experience working with several atypical children in a community setting. Diagnosing needs, planning programs and integrating instruction and materials on an individual basis. Prerequisite: Permission of the department is required. [1-9]

EPSE 344 (3) PROGRAMMING IN SPECIAL EDUCATION: DEVELOPING PERSPECTIVE. An examination of the range of educational methodologies and teaching procedures and a discussion of their implications for the establishment of programs useful in working with exceptional children. The course comprises a practical examination and a detailed comparison of the major special educational methodologies. [3-1]

EPSE 348 (3) FAMILY-CENTRED PRACTICE FOR CHILDREN WITH SPECIAL NEEDS.

EPSE 380 (3-12) C SELECTED TOPICS IN INFANT DEVELOPMENT AND SUPPORTED CHILD CARE.

EPSE 390 (3/6) D SPECIAL TOPICS. A study of innovative practices, ideas, and theories in special education. The specific topics may change yearly to reflect changing priorities and interests in special education, and the specific interest and competencies of visiting and regular faculty. Prerequisite: One of EPSE 312, EPSE 317. Permission of the instructor is required. [3-0]

EPSE 399 (3) EDUCATION AND CULTURE IN THE DEAF COMMUNITY. Designed for students intending to work with deaf persons.

EPSE 401 (3) INSTRUCTIONAL DESIGN. Principles of instructional design and their application to the development, analysis, and evaluation of instructional plans for selected settings, instructional formats, and age groupings of learners. [3-0]

EPSE 403 (3) EDUCATION OF STUDENTS WITH DEVELOPMENTAL DISABILITIES IN INCLUSIVE SETTINGS. [3-0]

EPSE 406 (3) TYPICAL AND ATYPICAL DEVELOPMENT IN INFANTS AND CHILDREN.

EPSE 408 (3) EDUCATIONAL PROGRAMMING FOR HIGHLY ABLE LEARNERS. Planning elementary and secondary level programs for highly able learners. [3-0]

EPSE 410 (3) ASSISTIVE TECHNOLOGIES IN SPECIAL EDUCATION. The use of microcomputers, adaptive technology, and software across age levels and areas of exceptionality in special education and health care settings. [2-1]

EPSE 411 (3) AUGMENTATIVE AND ALTERNATIVE COMMUNICATION FOR INDIVIDUALS WITH SEVERE SPEECH AND/OR PHYSICAL IMPAIRMENTS. [3-0-0]

EPSE 415 (3) TECHNOLOGY FOR THE VISUALLY IMPAIRED. Preparation of teachers to work with a variety of technological devices designed for students who are blind or visually impaired, e.g., computers, electronic reading devices, and closed circuit television. This course is restricted to students enrolled in a program for Education of Visually Impaired Children. [2-2]

EPSE 420 (3) ASSESSMENT OF INFANTS AND YOUNG CHILDREN WITH SPECIAL NEEDS. Risk indicators, risk assessment, tools and instruments for informal assessment, interpreting standardized observational skills, and roles as IDP/SCC consultants. Prerequisite: All of EPSE 348, EPSE 406.

EPSE 421 (3) ASSESSMENT OF LEARNING DIFFICULTIES. Theories of learning and instruction; principles and practices of diagnosis and assessment as these relate to students with relevant special needs. Corequisite: EPSE 316. [3-0]

EPSE 423 (3) LEARNING, MEASUREMENT AND TEACHING. Theories of learning and instruction; principles and practices in the

assessment of classroom learning. Pass/Fail. Prerequisite: One of EPSE 306, EPSE 313. [3-0]

EPSE 425 (6) PROVISIONS IN THE EDUCATION OF THE VISUALLY HANDICAPPED. Provisions, procedures and methodology in the teaching of specific curriculum for the blind and visually impaired. Life skills and adjustment to blindness. This course is restricted to students in a program of Education of Visually Impaired Children. [3-0]

EPSE 426 (3) PRINCIPLES OF TEACHING THE HEARING IMPAIRED. An introductory course reviewing methods of teaching, administration, and organization of the educational program for the hearing impaired. Pre or corequisite: EPSE 312 or 317. Prerequisite: EPSE 312. May be taken as a corequisite. [3-0]

EPSE 431 (3) PROGRAMMING FOR CHILDREN WITH SPECIFIC LEARNING DISABILITIES. Methods and programs for learning disabilities are reviewed. Practical experience in the development and execution of a remedial program is required. Prerequisite: EPSE 316. [3-0]

EPSE 432 (3) CLASSROOM MANAGEMENT. [3-0-0]

EPSE 433 (3) ASSESSMENT AND POSITIVE BEHAVIOURAL SUPPORT IN SCHOOL AND COMMUNITY SETTINGS. [3-0-0]

EPSE 436 (3) SURVEY OF BEHAVIOUR DISORDERS IN CHILDREN AND ADOLESCENTS. [3-0]

EPSE 437 (3) INTERVENTIONS FOR CHILDREN AND ADOLESCENTS WITH BEHAVIOUR DISORDERS. [3-0-0]

EPSE 440 (3) SUPPORTING SOCIAL AND COMMUNICATION DEVELOPMENT IN INFANTS AND YOUNG CHILDREN WITH SPECIAL NEEDS. Intervention and program planning for communication/language development, social/emotional development, and behavioural support. Prerequisite: All of EPSE 348, EPSE 406, EPSE 420.

EPSE 441 (3) EARLY INTERVENTION FOR INFANTS AND YOUNG CHILDREN WITH SENSORY LOSS AND MOTOR IMPAIRMENTS. Prerequisite: All of EPSE 348, EPSE 406, EPSE 420.

EPSE 448 (3) EDUCATION OF STUDENTS WITH MULTIPLE DISABILITIES IN INCLUSIVE SETTINGS. Prerequisite: One of EPSE 312, EPSE 317. [3-0]

EPSE 449 (3) EDUCATION OF STUDENTS WITH AUTISM. [3-0]

EPSE 455 (3) INTRODUCTION TO ORIENTATION AND MOBILITY FOR THE BLIND. Understanding the process of teaching independent travel to blind students, including orientation and mobility skills in school. Restricted to students enrolled in a program for Education of Visually Impaired Children or those who hold the Diploma or the equivalent. Prerequisite: EPSE 425. Corequisite: EPSE 425. [2-2]

EPSE 461 (3/6) C EDUCATIONAL DIAGNOSIS AND REMEDIAL INSTRUCTION. Interpretation of informal and standardized test scores in educational diagnosis; estimates of actual and optimum levels of individual achievement; individual differences as factors affecting performance; methods of encouraging the optimum achievement of individuals; methods and practice materials for remedial teaching.

EPSE 462 (3/6) C HUMAN DEVELOPMENT IN EDUCATION. Investigates selected concepts of developmental theory in terms of their influence upon instructional practice. Particular emphasis is placed on social and intellectual development. Prerequisite: One of EPSE 306, EPSE 313.

EPSE 481 (3) INTRODUCTION TO RESEARCH IN EDUCATION. The nature of scientific study and essentials of survey, experimental and other empirical research designs. Designed for students proceeding to graduate work. Prerequisite: EPSE 482. May also be taken as a corequisite.

EPSE 482 (3) INTRODUCTION TO STATISTICS FOR RESEARCH IN EDUCATION. Basic concepts and principles of descriptive and inferential statistics. Designed for students proceeding to graduate work involving quantitative methodology. Prerequisite: Proficiency in modern high school algebra. [3-0]

EPSE 483 (3) STATISTICS IN EDUCATION. Topical survey of various statistical methods used in research in Education. Designed to prepare students to read literature of empirical research. May not be used as prerequisite to EPSE 592. [3-0]

EPSE 484 (3) NONPARAMETRIC AND RELATED STATISTICS. Distribution-free statistical techniques for analysis of ranked data, and analysis of discrete observations. Prerequisite: EPSE 482. [3-0]

EPSE 501 (3) APPLICATIONS OF EDUCATIONAL PSYCHOLOGY.

EPSE 502 (3) COGNITION, LANGUAGE AND LITERACY PROCESSES IN EDUCATION.

EPSE 503 (3) CULTURAL PERSPECTIVES ON LEARNING, DEVELOPMENT AND MEDIA.

EPSE 505 (3) HUMAN DEVELOPMENT IN EDUCATION.

EPSE 506 (3) COLLEGE AND UNIVERSITY TEACHING.

EPSE 508 (3-12) D REVIEW OF RESEARCH IN EDUCATIONAL PSYCHOLOGY AND SPECIAL EDUCATION. Studies are made of recent research bearing on educational practice. Prerequisite: EPSE 482.

EPSE 509 (3) ORGANIZATION OF SPECIAL EDUCATION SERVICES. Prerequisite: One of EPSE 312, EPSE 317.

EPSE 510 (3) D ADVANCED APPLICATION OF ASSISTIVE TECHNOLOGIES IN SPECIAL EDUCATION.

EPSE 511 (3) SPECIAL TOPICS IN HUMAN DEVELOPMENT IN EDUCATION.

EPSE 512 (3) CRITICAL ISSUES IN SPECIAL EDUCATION.

EPSE 513 (3) SEMINAR IN DEVELOPMENTAL DISABILITIES.

EPSE 514 (3) SEMINAR IN BEHAVIOURAL ASSESSMENT AND INTERVENTION. Prerequisite: EPSE 433.

EPSE 515 (3-6) D SEMINAR IN BEHAVIOUR DISORDERS.

EPSE 516 (3) SEMINAR IN THE DEVELOPMENT AND EDUCATION OF HIGHLY ABLE AND CREATIVE LEARNERS.

EPSE 517 (3) ACOUSTIC ENVIRONMENTS AND AMPLIFICATION IN THE CLASSROOM. Prerequisite: AUDI 598. Corequisite: AUDI 598.

EPSE 518 (3) SPEECH DEVELOPMENT OF DEAF AND HARD OF HEARING STUDENTS. Prerequisite: AUDI 598. Corequisite: AUDI 598.

EPSE 519 (3) DEVELOPMENT OF ENGLISH LANGUAGE SKILLS OF DEAF AND HARD OF HEARING STUDENTS. Prerequisite: EPSE 521. LING 320 is recommended. Corequisite: EPSE 521.

EPSE 520 (3) CURRICULUM DEVELOPMENT IN THE EDUCATION OF DEAF AND HARD OF HEARING STUDENTS. Prerequisite: EPSE 519.

EPSE 521 (3) PSYCHOSOCIAL ASPECTS OF HEARING LOSS.

EPSE 522 (3) DESIGNING ENGLISH LANGUAGE PROGRAMS FOR DEAF AND HARD OF HEARING STUDENTS. Prerequisite: EPSE 519.

EPSE 524 (3) PRACTICUM IN SPEECH AND ENGLISH LANGUAGE DEVELOPMENT WITH DEAF AND HARD OF HEARING STUDENTS. Pass/Fail. Prerequisite: All of EPSE 518, EPSE 522.

EPSE 525 (3) STUDIES IN SIGN LANGUAGE. Prerequisite: EPSE 399. [3-0]

EPSE 526 (3) SEMINAR IN SPECIFIC LEARNING DISABILITIES. Prerequisite: EPSE 316.

EPSE 528 (3) BASIC PRINCIPLES OF MEASUREMENT. Prerequisite: One of EPSE 482, EPSE 483 and an introductory course in measurement.

EPSE 529 (3) TEST CONSTRUCTION. Prerequisite: EPSE 528.

EPSE 530 (3) SEMINAR IN EDUCATION OF THE DEAF AND HARD OF HEARING.

EPSE 533 (3) PSYCHOSOCIAL ASPECTS OF EXCEPTIONALITY. Prerequisite: One of EPSE 312, EPSE 317.

EPSE 534 (3) ACADEMIC ASSESSMENT IN SCHOOL PSYCHOLOGY. Prerequisite: EPSE 528. Permission of the instructor is required.

EPSE 535 (3) SOCIAL AND EMOTIONAL ASSESSMENT IN SCHOOL PSYCHOLOGY. Prerequisite: EPSE 528. Permission of the instructor is required.

EPSE 536 (3/6) D INDIVIDUAL INTELLIGENCE TESTS. Prerequisite: EPSE 528. Admission to the school psychology graduate program.

EPSE 537 (3) SEMINAR IN MULTIPLE DISABILITIES. Prerequisite: EPSE 448.

EPSE 538 (3) SEMINAR IN ORIENTATION AND MOBILITY FOR THE BLIND.

EPSE 539 (3) RESEARCH ISSUES AND TRENDS IN THE EDUCATION OF STUDENTS WITH VISUAL IMPAIRMENTS.

EPSE 540 (3) SEMINAR IN LOW VISION.

EPSE 541 (3) BRAILLE READING AND WRITING.

EPSE 542 (3) WORKING WITH INFANTS AND PRESCHOOLERS WHO ARE BLIND OR VISUALLY IMPAIRED.

EPSE 543 (3) WORKING WITH STUDENTS WITH VISUAL IMPAIRMENTS: ELEMENTARY AND SECONDARY CURRICULUM.

EPSE 544 (3) LITERACY INSTRUCTION FOR STUDENTS WHO ARE VISUALLY IMPAIRED. Prerequisite: EPSE 541.

EPSE 545 (3) TEACHING INDEPENDENT LIVING SKILLS TO STUDENTS WITH VISUAL IMPAIRMENTS.

EPSE 547 (3) ADVANCED COMMUNICATION SKILLS INSTRUCTION FOR STUDENTS WITH VISUAL IMPAIRMENTS. Prerequisite: EPSE 541.

EPSE 549 (3) SEMINAR IN AUTISM. Prerequisite: EPSE 449.

EPSE 550 (3) PROFESSIONAL, ETHICAL AND LEGAL ISSUES IN SCHOOL PSYCHOLOGY.

EPSE 551 (3-6) D SCHOOL-BASED CONSULTATION. Same as CNPS 551.

EPSE 552 (3-6) D INTERVENTIONS IN SCHOOL PSYCHOLOGY.

EPSE 561 (3-12) C LABORATORY PRACTICUM.

EPSE 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD.

EPSE 568 (3) SPECIAL EDUCATION OF CHILDREN WITH NEUROPSYCHOLOGICAL DYSFUNCTIONS. Prerequisite: One of EPSE 312, EPSE 317.

EPSE 571 (3/6) C SEMINAR IN RESEARCH IN EDUCATIONAL PSYCHOLOGY AND SPECIAL EDUCATION. Prerequisite: EPSE 501 or approved graduate course work.

EPSE 573 (3) ADVANCED SEMINAR IN RESEARCH ON EXCEPTIONAL CHILDREN.

EPSE 580 (3-12) D INVESTIGATION AND REPORT OF A PROBLEM IN EDUCATION.

EPSE 581 (3-12) D SPECIAL TOPICS IN RESEARCH DESIGN AND ANALYSIS. Prerequisite: All of EPSE 481, EPSE 482.

EPSE 584 (3) MOTIVATION IN EDUCATION.

EPSE 585 (3) SOCIAL-EMOTIONAL DEVELOPMENT IN EDUCATION. Prerequisite: EPSE 505.

EPSE 590 (3) GRADUATING PAPER/ SEMINAR. Pass/Fail.

EPSE 591 (3) THEORY AND PRACTICE OF PROGRAM EVALUATION. Prerequisite: EPSE 592.

EPSE 592 (3) EXPERIMENTAL DESIGNS AND ANALYSIS IN EDUCATIONAL RESEARCH. Prerequisite: EPSE 482.

EPSE 593 (3) DESIGN AND ANALYSIS OF RESEARCH WITH SMALL SAMPLES AND SINGLE SUBJECTS. Prerequisite: EPSE 592.

EPSE 594 (3) META-ANALYSIS: QUANTITATIVE RESEARCH SYNTHESIS. Prerequisite: EPSE 592.

EPSE 595 (3) QUALITATIVE METHODOLOGIES IN EDUCATIONAL PSYCHOLOGY AND SPECIAL EDUCATION.

EPSE 596 (3) CORRELATIONAL DESIGNS AND ANALYSIS IN EDUCATIONAL RESEARCH. Prerequisite: EPSE 592.

EPSE 597 (3) FACTOR ANALYSIS AND ITS APPLICATION TO BEHAVIOURAL SCIENCES. Prerequisite: EPSE 596.

EPSE 598 (3–12) D FIELD EXPERIENCES. Pass/Fail.

EPSE 599 (6) C MASTER'S THESIS.

EPSE 601 (3/6) C DOCTORAL SEMINAR.

EPSE 604 (3/6) D SPECIAL TOPICS IN LEARNING, DEVELOPMENT AND INSTRUCTION.

EPSE 630 (3) ADVANCED HUMAN LEARNING AND INSTRUCTION.

EPSE 681 (3–12) D TOPICS IN EDUCATIONAL RESEARCH AND MEASUREMENT. Prerequisite: All of EPSE 528, EPSE 592, EPSE 596.

EPSE 682 (3) MULTIVARIATE DESIGNS AND ANALYSIS IN EDUCATIONAL RESEARCH. Prerequisite: EPSE 596.

EPSE 699 (0) DOCTORAL THESIS. Pass/Fail.

ETEC — EDUCATIONAL TECHNOLOGY FACULTY OF EDUCATION

ETEC 500 (3) RESEARCH METHODOLOGY IN EDUCATION.

ETEC 510 (3) DESIGN OF TECHNOLOGY-SUPPORTED LEARNING ENVIRONMENTS.

ETEC 511 (3) FOUNDATIONS OF EDUCATIONAL TECHNOLOGY.

ETEC 512 (3) APPLICATIONS OF LEARNING THEORIES TO THE ANALYSIS OF INSTRUCTIONAL SETTINGS.

ETEC 520 (3) PLANNING AND MANAGING LEARNING TECHNOLOGIES IN HIGHER EDUCATION.

ETEC 521 (3) INDIGENEITY, TECHNOLOGY AND EDUCATION.

ETEC 522 (3) BUSINESS OF E-LEARNING.

ETEC 530 (3) CONSTRUCTIVISM STRATEGIES FOR E-LEARNING.

ETEC 531 (3) CURRICULUM ISSUES IN CULTURAL AND NEW MEDIA STUDIES.

ETEC 532 (3) TECHNOLOGY IN THE ARTS AND THE HUMANITIES CLASSROOM.

ETEC 533 (3) TECHNOLOGY IN THE MATHEMATICS AND SCIENCE CLASSROOM.

ETEC 540 (3) TEXT TECHNOLOGIES: THE CHANGING SPACES OF READING AND WRITING.

ETEC 545 (0) TEC DE MONTERREY.

ETEC 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD.

ETEC 580 (3–12) C PROBLEMS IN EDUCATION.

ETEC 590 (3) GRADUATING PROJECT.

FDNS — FOUNDATIONS PROGRAM FACULTY OF ARTS

FDNS 101 (8) ROUTES TO THE TWENTY-FIRST CENTURY. Historical foundations of the contemporary world, examined through a variety of central themes.

FDNS 102 (8) KNOWLEDGE BASES. Means by which we seek to know the world; forms of knowledge and concepts underlying them.

FDNS 103 (8) APPROACHES TO SOCIAL UNDERSTANDING. Introduction to the questions and methods of the social sciences as applied to real-world issues and problems.

FILM — FILM FACULTY OF ARTS

FILM 100 (3) INTRODUCTION TO FILM STUDIES. Basic aesthetic, economic, sociological, and technological aspects of film.

FILM 200 (3) INTRODUCTION TO CANADIAN CINEMA. History and aesthetics of Canadian cinema.

FILM 210 (3) SILENT CINEMA. Aesthetics, economics, history, and technological characteristics of international Silent film, 1895–1929.

FILM 220 (3) HOLLYWOOD CINEMA 1930–1960. Analysis of the aesthetics, economics, history and technological characteristics of the Classical Hollywood period.

FILM 233 (3) INTRODUCTORY VIDEO PRODUCTION. Basic introduction to video cameras, lighting, sound, and editing for students without previous video production experience. Open only to second-year students during Winter Session.

FILM 331 (3) STUDIES IN FILM THEORY. A seminar introducing the many theoretical approaches to film: formalist, historical, Marxist, psychoanalytic, semiotic and structuralist.

FILM 332 (3) STUDIES IN GENRE OR PERIOD. A seminar examining one or more genres or periods, such as the Western, Film Noir, Science Fiction, Films of the 1980's. Also includes study of national cinemas.

FILM 333 (6) MOTION PICTURE PRODUCTION I. Practical film/video production with instruction in 16mm cinematography

and sound recording, lighting, and editing. Open only to Film Majors by application to the Department.

FILM 334 (3) SEMINAR IN DOCUMENTARY. An analysis of the representational strategies and ethics of the form.

FILM 335 (3) DIRECTING. Script development and analysis, scene and shot design, working with actors and crew, preparation of shooting scripts. Open only to Film Majors.

FILM 336 (3) SEMINAR IN EUROPEAN CINEMA. Topics may include a study of a European national cinema.

FILM 338 (3) ASIAN AND AUSTRALASIAN CINEMA. Topics may include an analysis of a national cinema, such as that of China, India, or Australia.

FILM 339 (3) POST-PRODUCTION TECHNIQUES I. Instruction in current motion picture and sound editing practices. Restricted to Film Majors.

FILM 430 (3) STUDIES IN AUTEURISM. A seminar examining the work of one or more directors, such as John Ford, François Truffaut, Denys Arcand, Margarethe Von Trotta; or of a screenwriter over many films.

FILM 432 (3) SEMINAR IN MOTION PICTURE FORMS. Animation, documentary, experimental, and/or multimedia.

FILM 433 (6) MOTION PICTURE PRODUCTION II. Advanced instruction in professional film production techniques. Prerequisite: FILM 333.

FILM 434 (3–12) D STUDIES IN FILM. A seminar devoted to a topic of current interest in film. Topic will change from year to year. May be repeated for credit when topics differ.

FILM 436 (3) SEMINAR IN AMERICAN CINEMA SINCE 1960. Topics may include an analysis of a specific period.

FILM 437 (3) CINEMATOGRAPHY, LIGHTING AND SOUND RECORDING. Instruction in professional film and/or electronic camera operation, advanced lighting, location sound recording and other production techniques. Open only to Film Majors.

FILM 438 (3) SEMINAR IN CANADIAN CINEMA. Topics may include an analysis of the Canadian Governmental agencies supporting Film Production.

FILM 439 (3) POST-PRODUCTION TECHNIQUES. Instruction in advanced post-production techniques including picture and sound editing, liaison with the lab and other film services, preparations for sound mixing. Open only to Film Majors.

FILM 500 (3) BIBLIOGRAPHY AND RESEARCH METHODS.

FILM 531 (3/6) D SEMINAR: STYLES IN FILM. Studies and experimentation in styles or film genres such as narrative, documentary, ethnographic, experimental, etc. Topics will vary from year to year.

FILM 532 (3/6) D SEMINAR: STUDY OF MAJOR FILM ARTISTS. Investigations into the biographical, social, and national backgrounds of two or three major artists, with attention to the specific nature of their work in its historical, psychological, and cultural contexts. Topics will vary from year to year.

FILM 533 (3/6) D ADVANCED PROBLEMS IN DIRECTING. Problems in directing narrative film. Through seminars, workshops with acting students and production exercises, problems in scripting, performance, shot design and editing are explored.

FILM 534 (3/6) D SEMINAR IN FILM STUDIES. Topics to be arranged.

FILM 547 (3/6) D DIRECTED STUDIES IN FILM.

FILM 549 (6–18) D THESIS.

FISH — FISHERIES RESEARCH FACULTY OF GRADUATE STUDIES

FISH 500 (3) ISSUES IN FISHERIES RESEARCH: SEMINARS – FISHERIES MANAGEMENT.

FISH 501 (3) ISSUES IN FISHERIES RESEARCH: ECOSYSTEM MODELLING.

FISH 502 (3) ISSUES IN FISHERIES RESEARCH: MARINE AND FRESHWATER.

FISH 503 (3) ISSUES IN FISHERIES RESEARCH: POLICY AND EVALUATION.

FISH 504 (3) QUANTITATIVE ANALYSIS OF FISHERIES I.

FISH 505 (3) QUANTITATIVE ANALYSIS OF FISHERIES II.

FISH 506 (3) CRITICAL ISSUES IN FISHERIES: RESEARCH AT THE FISHERIES CENTRE.

FMED — FOUNDATIONS OF MEDICINE FACULTY OF MEDICINE

FMED 401 (6) HOST DEFENSES AND INFECTION. An introduction to the anatomic and physiologic basis of host defense against infection. The classification and pathogenic mechanisms of micro-organisms will be taught as will the biological and pharmacological bases of treatment and prevention. [7-10-0]

FMED 402 (6) CARDIOVASCULAR. An introduction to human cardiovascular anatomy, physiology and relevant biochemistry and genetics. Disordered function of the system will be taught by integration of discussion with the normal. As appropriate, pharmacological and other therapeutic and preventative modalities will be taught. [7-10-0]

FMED 403 (6) PULMONARY. An introduction to human respiratory medicine. The relevant anatomy, physiology, biochemistry and genetics will be taught. Instruction in disordered function of the system will be taught by integration of discussion with the normal. As appropriate, pharmacological, therapeutic and other preventative modalities will be introduced. [7-10-0]

FMED 404 (6) FLUIDS, ELECTROLYTES, RENAL AND GU. An introduction to the anatomy, histology, anatomical and histopathology of the kidney and urinary system and renal physiology and the major fluid and electrolyte disorders associated with renal dysfunction. Students are also introduced to the principles of diagnosis and management of genitourinary and renal disorders. [7-10-0]

FMED 421 (2) BLOOD AND LYMPHATICS. Blood and lymphatic system; anatomy, physiology and relevant biochemistry; normal and disordered function; pharmacological and other therapeutic and preventative modalities. [7-10-0]

FMED 422 (1) INTEGUMENT. A one-week block covering the basic science and common clinical issues of skin, hair, nails, and accessible mucosae. Normal anatomy and physiology, common clinical and pathophysiological changes and dysfunction, and psychosocial relevance of integumentary diseases are the three principal areas explored. [7-10-0]

FMED 423 (4) MUSCULOSKELETAL AND LOCOMOTOR. The student is introduced to the basic science components which underlie common clinical conditions. Case-based themes involving normal and abnormal bone metabolism, rheumatoid and osteoarthritis, ligament and muscle contributions, and overall joint mechanics are highlighted. [7-10-0]

FMED 424 (6) GASTROINTESTINAL. Introduces the student to the clinically relevant basic sciences and pathophysiological events of the human gastrointestinal (GI) tract comprising the oral cavity and teeth, esophagus, stomach, bowel, exocrine pancreas, liver and biliary tree as well as the fundamental principles of human nutrition. [7-10-0]

FMED 425 (6) ENDOCRINE AND METABOLISM. This block will focus on normal and abnormal carbohydrate and lipid metabolisms as well as the physiological function and disorders of the pituitary, thyroid and adrenal. Relevant pathology, anatomy, genetics, biochemistry, pharmacology, and radiology will be included as learning issues. [7-10-0]

FMED 426 (10) BRAIN AND BEHAVIOUR. Structure and functional interrelationship within the central nervous system; normal and abnormal functions. [7-10-0]

FMED 427 (4) REPRODUCTION. Reproduction, human sexuality, pregnancy, lactation and aging. [7-10-0]

FMED 428 (5) GROWTH & DEVELOPMENT. Human growth, neurodevelopmental maturation, embryology, neonatal physiology, somatic growth, cognitive and pubertal development.

FMPR — FAMILY PRACTICE FACULTY OF MEDICINE

FMPR 401 (6) FAMILY PRACTICE CONTINUUM. Principles and skills of patient interviewing, history taking, physical examination are learned and practiced under supervision in office, home, hospital and community settings. Seminars and lectures support students

in this clinical endeavour. The role of the Family Physician in the provision of comprehensive patient care is explored. [0-3-0]

FMPR 420 (6) FAMILY PRACTICE CONTINUUM II. This clinical course is a continuation of FMPR 401. Supervised patient interviewing, history taking, and physical examinations in the Family Practice setting. A period of time will be spent in family practice settings demonstrating focused care in a particular area. [0-3-0]

FMPR 428 (6) RURAL AND UNDERSERVED COMMUNITY PRACTICE. A 4 week full time course that allows medical students in Phase III of the undergraduate program to apprentice with family physicians in rural and underserved community practices. This course is the start of year 3 clerkships and takes place at the end of second year.

FMPR 562 (3) HEALTH PROMOTION AND DISEASE PREVENTION IN FAMILY PRACTICE. Identification of preventive strategies in different age groups and their implementation in Family Practice. Examination of health belief models in caregivers and patients which inhibit or facilitate preventive measures. Admission to course at discretion of the Department of Family Practice. Prerequisite: HCEP 502.

FMST — FAMILY STUDIES FACULTY OF ARTS

FMST 200 (3) CONTEMPORARY FAMILY RELATIONSHIPS. An introduction to contemporary family relationships.

FMST 210 (3) FAMILY CONTEXT OF HUMAN DEVELOPMENT. The influence of family dynamics and social conditions on human development.

FMST 238 (3) FAMILY RESOURCE MANAGEMENT. Conceptual models of resource management as related to families.

FMST 312 (3) PARENT-CHILD RELATIONSHIPS. Parent-child interaction over the life span. Prerequisite: One of FMST 200, FMST 210.

FMST 314 (3) RELATIONSHIP DEVELOPMENT. The study of the development, course, and decline of personal relationships. Prerequisite: One of FMST 200, PSYC 100, SOCI 240.

FMST 316 (3) HUMAN SEXUALITY. An examination of human sexual development and behaviour. Prerequisite: One of FMST 200, PSYC 100, SOCI 240.

FMST 320 (3) FAMILY DIVERSITY. An examination of the ethnic, social, class, regional and other diversities of families in North America. Prerequisite: FMST 200.

FMST 322 (3) MARITAL INTERACTION. Interactional processes within marital and common-law relationships. Prerequisite: One of FMST 200, SOCI 240.

FMST 323 (3) FAMILY RESEARCH METHODS. Introduction to research methods used in family studies. Prerequisite: All of

FMST 200, STAT 203. Equivalency: FMST 422.

FMST 324 (3) FAMILY TRANSITIONS. The study of family relationships over the life course. Prerequisite: One of FMST 200, SOCI 240.

FMST 326 (3) FAMILY COMMUNICATION. Overview of communication in families. Prerequisite: FMST 200.

FMST 340 (3) FAMILY FINANCIAL DECISIONS. Major financial and consumer decisions of families over the life course. Prerequisite: FMST 238 or permission.

FMST 342 (3) FAMILY CONSUMER PATTERNS. Role and function of consumers in contemporary market economics; consumer socialization; factors affecting consumer choice as it varies at various periods of the life span for different family types. Prerequisite: One of ECON 100, ECON 309 or 6 credits in Sociology or Psychology.

FMST 350 (3) CLOTHING AND HUMAN BEHAVIOUR. Human needs and the cultural factors which influence clothing consumption and use. Application of sociological and psychological theories that help to explain clothing behaviour of an individual, as a unique being and as a member of a group. Prerequisite: 12 credits in Sociology or Psychology (may also be taken as corequisites).

FMST 364 (3) HOUSING FOR THE FAMILY. A study of the physical, social and economic aspects of housing. The course includes: housing as an economic asset; national housing needs and conditions; personal and social needs of families; housing and the family income; government's role in housing; community planning. Corequisite: One of ANTH 100, SOCI 100 or permission of the instructor.

FMST 404 (3/6) D FAMILY STUDIES SEMINAR. Current developments in selected areas of Family Studies. Open to third- and fourth-year students with permission of the instructor.

FMST 414 (3) AGING AND THE FAMILY. Examination of families in later life. Prerequisite: One of FMST 200, PSYC 100, ANTH 214, SOCI 214.

FMST 415 (3-6) D FAMILY STUDIES PRACTICUM. A supervised practicum in an assigned human service setting. Enrolment is limited to students in the FMST program pursuing certification as a Family Life Educator. Prerequisite: FMST 436 and fourth year standing

FMST 420 (3) FAMILY THEORIES. Major theoretical approaches to the study of the family relationships. Prerequisite: All of FMST 200, FMST 323.

FMST 436 (3) FAMILY LIFE EDUCATION. Examination of rationale, implementation, and evaluation of family education programs. Prerequisite: All of FMST 312, FMST 316, FMST 322.

FMST 440 (3) FAMILY ECONOMIC ISSUES. The study of the impact of economic issues on families. Prerequisite: FMST 238.

FMST 441 (3) SOCIAL CONTEXT OF CHILD DEVELOPMENT. The ways in which the familial, physical, and social environment effects the life structures, opportunities and outcomes of epigenetic developmental processes. Equivalency: SOWK 441.

FMST 442 (3) FAMILIES AND WORK. The effect of combining family and work roles. Prerequisite: FMST 200 and at least one additional course in social science.

FMST 464 (3/6) D SPECIAL PROBLEMS IN FAMILY STUDIES. Current topics in a specific area of Family Studies, based on original laboratory or field research.

FMST 474 (3) DIRECTED STUDY IN FAMILY STUDIES. Investigation of a problem, requiring a written or oral report of findings. Prerequisite: Satisfactory standing and permission of faculty members supervising the investigation. Fourth-year Family Studies students only.

FMST 504 (3-9) D CURRENT TOPICS IN FAMILY STUDIES.

FMST 520 (3) THEORIES ABOUT THE FAMILY. An examination of contemporary theories of the family.

FMST 521 (3) FORMULATING THEORIES ABOUT THE FAMILY. Fundamental issues and techniques in formulating theories about the family. Prerequisite: FMST 520 or permission of the instructor.

FMST 522 (3) RESEARCH METHODS IN FAMILY STUDIES. Designing research and collecting data for studying families. Prerequisite: Pre-req course no longer offered (FMST 422), so pre-req deleted at request of the School.

FMST 523 (3) ANALYZING DATA IN FAMILY STUDIES. Data analysis issues and computer applications in the study of families. Prerequisite: FMST 422.

FMST 524 (3) FAMILY DEVELOPMENT. An examination of research and theory on the timing and sequencing of the course of family life in North American families.

FMST 525 (3) INTERACTION IN THE FAMILY SETTING. Selected aspects of marital, parental and intergenerational interaction.

FMST 538 (3) FAMILY RESOURCES. Conceptual and empirical perspectives on family resource management.

FMST 547 (3-6) C DIRECTED STUDIES.

FMST 549 (6/12) C THESIS.

FNH — FOOD, NUTRITION AND HEALTH FACULTY OF LAND AND FOOD SYSTEMS

FNH 200 (3) EXPLORING OUR FOOD.

Chemical and physical properties of foods; issues pertaining to safety, nutritive value and consumer acceptability; government regulations pertaining to food safety, quality and additives; preservation techniques and transformation of agricultural commodities to food products; foods of the future. Prerequisite: At least second year standing required. [3-0-0]

FNH 250 (3) NUTRITION CONCEPTS AND CONTROVERSIES. Fundamental concepts and principles of human nutrition applied to current nutrition issues. Credit can only be obtained for 1 of FNH 250 or FNH 255. Prerequisite: First-year Biology. At least second-year standing required. [1-0-3] or [3-0]

FNH 255 (3) NUTRITION AND YOUR HEALTH. Fundamental concepts and principles of nutrition applied to current nutrition issues and trends. The focus is on human nutrition. At least second year standing required. Prerequisite: Not open to students in the Faculty of Science, the Faculty of Agricultural Sciences or to students who have completed a first year biology course. [3-0]

FNH 300 (3) PRINCIPLES OF FOOD ENGINEERING. Units and dimensions, mass balance, energy balance, steady state and transient heat flow, fluid handling and measurement. Prerequisite: One of PHYS 101, PHYS 121. [3-0-1]

FNH 301 (3) FOOD CHEMISTRY I. Constituents of food and related chemical physical properties including water, carbohydrates, proteins, lipids, minerals, and vitamins. Credit given for only one of FNH 301 and FNH 340. Prerequisite: Either (a) all of CHEM 203, CHEM 204 or (b) all of CHEM 231, CHEM 232 or (c) all of CHEM 205, CHEM 233. [3-0-0]

FNH 302 (3) FOOD ANALYSIS. Principles of and procedures for analysis of the chemical, physical and sensory properties of food; proximate analysis; introduction to instrumental analysis; introduction to anatomy and physiology of sensory perception, reporting and analysis of data. Prerequisite: Either (a) all of CHEM 205, CHEM 233 or (b) all of CHEM 231, CHEM 232. [3-0-1]

FNH 309 (3) FOOD PROCESS SCIENCE. Preservation of tissue and fluid food systems by selected physical and chemical treatments with emphasis on product-process interactions. [3-0-1]

FNH 313 (3) MICROORGANISMS IN FOOD SYSTEMS. Microorganisms of importance in safety, spoilage and preservation of foods; factors affecting growth, survival and inactivation of microorganisms in fermented food systems; food processing plant cleaning and sanitation. Prerequisite: BIOL 112. [3-0-0]

FNH 325 (3) FOOD SCIENCE LABORATORY I. Integrated laboratory introducing techniques used in food processing and analysis. Enrolment restricted to Food Science students. Prerequisite: All of FNH 300, FNH 301, FNH 302. These courses can be taken as corequisites. [0-3-1]

FNH 326 (3) FOOD SCIENCE LABORATORY II. Integrated laboratory encompassing the processing and analysis of foods. Enrolment restricted to Food Science students. Prerequisite: FNH 325. [0-3-1]

FNH 330 (3) INTRODUCTION TO WINE SCIENCE. Principles of viticulture, enology, and wine microbiology and chemistry; marketing, regulation and classification of wines from

selected regions of the world; social, economic and health aspects of wine consumption; wine appreciation. Prerequisite: Third-year standing. [2-1-0]

FNH 340 (3) FOOD THEORY. Principles of food preparation based on the physical and chemical properties of food. Credit given for only one of FNH 301 or FNH 340. Prerequisite: FNH 200 and either (a) all of CHEM 111, CHEM 113 or (b) all of CHEM 121, CHEM 123. [3-0-0]

FNH 341 (3) FOOD THEORY APPLICATIONS. Experimental and practical application of scientific principles and theories to problems of food preparation. Corequisite: One of FNH 301, FNH 340. [1-3-0]

FNH 342 (3) CONSUMER ASPECTS OF FOOD. Economic, physiological, social, cultural, and environmental factors influencing food choices and consumption. Legislation governing food; food markets and merchandising techniques; criteria for food selection. Prerequisite: At least third year standing required. [3-3]

FNH 350 (3) FUNDAMENTALS OF NUTRITION. Fundamentals of energy and macronutrient metabolism. Prerequisite: One of BIOL 201, BIOC 300 or Corequisite: BIOC 300. [3-0-0]

FNH 351 (3) VITAMINS, MINERALS, AND HEALTH. Vitamin and mineral nutrition and their role in maintaining and promoting health. Prerequisite: One of BIOL 201, BIOC 300 or Corequisite: BIOC 300. [3-0-0]

FNH 355 (3) WORLD PROBLEMS IN NUTRITION. Conceptualization and scientific analyses of global problems in food and nutrition; complexities of food habits and malnutrition in various cultures around the world. [3-0-0]

FNH 370 (2) NUTRITION ASSESSMENT. The use of dietary, anthropometric, biochemical and related information for the assessment of nutritional status of individuals and populations. Prerequisite: FNH 250. [1-0-2]

FNH 371 (3) HUMAN NUTRITION OVER THE LIFE SPAN. Nutritional requirements and dietary patterns of healthy individuals throughout the life span. Prerequisite: FNH 350. [3-0-0]

FNH 380 (1) PROFESSIONAL DIETETIC PRACTICE I. Restricted to students in the Dietetics Major. [1-0-0]

FNH 381 (3) PROFESSIONAL DIETETIC PRACTICE II. Themes include: nutrition communications, professional practice, and dietetic practice environments. Restricted to students in the Dietetics Major. Prerequisite: FNH 380.

FNH 401 (3) FOOD CHEMISTRY II. Chemistry and function of natural and synthetic food ingredients, including additives, colourings, flavourings and enzymes in multi-phase food systems. Prerequisite: One of CHEM 232, CHEM 233. [3-0-0]

FNH 402 (3) FUNCTIONAL FOODS AND NUTRACEUTICALS. Functional food and nutraceutical concepts related to ingredient safety and quality; examples of nutrient-disease relationships, requirements for standards of efficacy for health claims; market determinants of functional food and nutraceutical industries. Prerequisite: third-year standing [3-0-0]

FNH 403 (3) FOOD LAWS, REGULATIONS AND QUALITY ASSURANCE. Canadian and international laws governing food composition, grading, quality and safety; hazard analysis critical control points; statistical quality assurance. Prerequisite: AGSC 350 or equivalent background in statistics. [3-0-1]

FNH 425 (6) FOOD SCIENCE LABORATORY III. Integrated course designed to illustrate principles of research and product development in the food industry. Prerequisite: All of FNH 325, FNH 326. [0-3-1;0-3-1]

FNH 440 (3) FOOD SERVICE SYSTEMS MANAGEMENT. Management responsibilities in quantity food production with emphasis on menu planning, purchasing and service. Includes planning and equipping food services. Not available for credit to students in the Faculty of Science. Restricted to students in the Dietetics major. Prerequisite: One of FNH 301, FNH 340. [3-0-0]

FNH 450 (3) NUTRITION LABORATORY. Nutritional principles and concepts illustrated through a hands-on laboratory experience; skills and techniques commonly used in modern nutritional research. Prerequisite: FNH 350. [0-3-1]

FNH 451 (3) NUTRIENT METABOLISM AND IMPLICATIONS FOR HEALTH. Integration of nutrient and energy metabolism on a whole-body and individual tissue basis and the implication for health. Emphasis will be on regulation of nutrient metabolism. Prerequisite: One of BIOC 300, BIOC 302 and one of BIOL 355, PHYL 301 and FNH 350. Also acceptable as corequisites. [3-0-0]

FNH 452 (3) RUMINANT NUTRITION. Application of biological principles of nutrition to the feeding and management of ruminant animals. Prerequisite: FNH 350. [1-0-3]

FNH 453 (3) MONOGASTRIC NUTRITION. Application of biological principles of nutrition to the feeding and management of monogastric animals (e.g. horses, poultry, swine, companion animals, fish- depending on student interest). Prerequisite: FNH 350. [1-0-3]

FNH 454 (3) FISH NUTRITION. Physiology of digestion and excretion, nutrient requirements, sources of nutrients, diet formulation, feeding management. Prerequisite: FNH 350. [3-0-0]

FNH 470 (4) NUTRITION AND DISEASE. The role of nutrition and the application of therapeutic diets in the prevention, etiology, and treatment of gastrointestinal complications/disorders, cardiovascular disease, diabetes and obesity. Prerequisite: FNH 350. [4-0-0]

FNH 473 (3) NUTRITION EDUCATION IN THE COMMUNITY. Theory and methods in nutrition education; factors affecting behaviour

modification and health promotion. The practice of nutrition education through education, health care delivery or media systems. Prerequisite: FNH 250 and fourth-year standing. [3-0-0]

FNH 475 (3) ADVANCED TOPICS IN CLINICAL NUTRITION. The role of nutrition and the application of therapeutic diets in the prevention, etiology and treatment of specialized areas of clinical nutrition. Prerequisite: FNH 350. [3-0-0]

FNH 490 (3) TOPICS IN FOOD, NUTRITION, AND HEALTH. Analysis and interpretation of current issues in food, nutrition and health. Prerequisite: FNH 350 and fourth-year standing. [3-0-1]

FNH 497 (2-6) C DIRECTED STUDIES IN FOOD, NUTRITION AND HEALTH.

FNH 498 (3) UNDERGRADUATE ESSAY. Preparation of a comprehensive and analytical review of an approved topic under the supervision of a faculty member. Consultation with a program advisor is required.

FNH 499 (6) UNDERGRADUATE THESIS. Design and execution of an experimental/analytical research project leading to preparation of a thesis. Prerequisite: Approval of a program advisor; consult before the end of classes in third year.

FNLG — FIRST NATIONS LANGUAGES FACULTY OF ARTS

FNLG 100 (3/6) D FIRST NATIONS LANGUAGE. An introduction to one of the First Nations languages of British Columbia. Emphasis on accurate pronunciation and listening skills, conversational ability, basic literacy skills, an understanding of basic grammatical structures, and the study of oral traditions in their cultural context. No prior knowledge of the language is assumed.

FNLG 200 (3/6) D FIRST NATIONS LANGUAGE. An intermediate level study of one of the First Nations languages of British Columbia. Emphasis on increasing fluency in conversational ability, enhancing pronunciation and comprehension skills, expanding vocabulary, extending literacy and grammatical understanding, and further study of oral traditions in their cultural context. Prerequisite: FNLG 100. Must be in the same language.

FNLG 300 (3/6) D FIRST NATIONS LANGUAGE: ADVANCED. Emphasis on developing advanced comprehension and production skills in one of the First Nations languages of British Columbia. Extended focus on skills in oral traditions, transcription, literacy, and on deepening the understanding of grammatical structures and dialectal variation. Prerequisite: FNLG 200. Must be in the same language.

FNLG 448 (3-12) C DIRECTED STUDIES IN A FIRST NATIONS LANGUAGE. Supervised by a faculty member. Prerequisite: Agreement of Supervisor and approval of Director of FNLG program, c/o Dean of Arts.

FNSP — FIRST NATIONS STUDIES PROGRAM FACULTY OF ARTS

FNSP 200 (3–6) D FIRST NATIONS OF NORTH AMERICA. An historical and contemporary survey of First Nations issues including culture, identity, language, political issues, social structures, colonialism and resistance; an introduction to First Nations Studies as an academic discipline emphasizing First Nations perspectives.

FNSP 310 (3) THEORY SEMINAR. Current conceptual paradigms within the social sciences, humanities and performing arts with a consideration of their appropriateness and applicability for First Nations Studies. Conceptualizations from a First Nations perspective will be central to the course. Prerequisite: FNSP 200. May be taken as a corequisite.

FNSP 320 (3) METHODS SEMINAR. Training in the design and implementation of research appropriate for First Nations Studies. Possible topics include archival research, oral traditions, interviewing, textual analysis, documentary analysis, Geographical Information Systems, protocol arrangements, and computer techniques. Corequisite: FNSP 200.

FNSP 400 (6) PRACTICUM/ADVANCED RESEARCH SEMINAR. Applied research/community oriented project designed and implemented in collaboration with student, faculty and First Nations community. Emphasis on examining ethical issues and developing culturally respectful and academically rigorous forms of research. Prerequisite: All of FNSP 310, FNSP 320.

FNSP 401 (3–6) D SPECIAL TOPICS.

FNSP 433 (3/6) C DIRECTED STUDY.

FOOD — FOOD SCIENCE FACULTY OF LAND AND FOOD SYSTEMS

Undergraduate courses have been re-named as Food, Nutrition and Health (FNH). Please see this section.

FOOD 500 (3) M.SC. SEMINAR.

FOOD 520 (1–3) C ADVANCES IN FOOD ANALYSIS.

FOOD 521 (3) ADVANCES IN FOOD BIOTECHNOLOGY.

FOOD 522 (3) ADVANCES IN FOOD CHEMISTRY.

FOOD 523 (3) ADVANCES IN FOOD MICROBIOLOGY.

FOOD 524 (3) ADVANCES IN FOOD PROCESS SCIENCE.

FOOD 525 (3) ADVANCES IN FOOD TOXICOLOGY.

FOOD 526 (3) RESEARCH METHODS IN FOOD SCIENCE.

FOOD 527 (1 6) D SPECIAL TOPICS IN FOOD SCIENCE.

FOOD 528 (3) INTERNATIONAL FOOD LAWS AND REGULATIONS.

FOOD 530 (2–6) C DIRECTED STUDIES.

FOOD 531 (6) PROJECT.

FOOD 549 (12) MASTER'S THESIS.

FOOD 600 (3) PH.D. SEMINAR.

FOOD 649 (0) PH.D. THESIS.

FOPR — FOREST OPERATIONS FACULTY OF FORESTRY

FOPR 162 (2) BASIC FOREST GEOMATICS. Basic techniques of measuring and surveying with an emphasis on forest applications. [2-2-0]

FOPR 260 (3) FOREST ENGINEERING ECONOMICS. Detailed methods of planning and analysis of economic problems encountered in harvesting operations. Corequisite: All of ECON 101, ECON 102. [2-2; 0-0]

FOPR 262 (3) FOREST OPERATIONS I. Introduction to forest road design and location, harvest, and transportation systems. Prerequisite: FOPR 162. [2-3-0]

FOPR 263 (2) BASIC FOREST SURVEYING. An introduction to the basic techniques of surveying with emphasis on forest harvesting. This course should be taken in the week preceding lectures in second year.

FOPR 288 (3) ANALYTICAL METHODS IN FOREST HYDROLOGY. Analytical methods in forest hydrology and their applications in the planning of forest operations with a focus on the hydrologic and hydraulic design procedures of stream crossings. Prerequisite: All of FRST 231, FOPR 361. [3-2-0]

FOPR 352 (2) HARVESTING FIELD TRIP. A five-day field trip immediately prior to the Fall term of third year to demonstrate current harvesting practices and their implications on silviculture, management, protection and utilization in representative forest types. A substantial written report is required as part of the course. Fees will be assessed to meet expenses.

FOPR 359 (3) NONLINEAR STRUCTURES. Mechanics of cables with significant self-weight, buckling of columns, impact problems, and basic bridge stringer design. Prerequisite: PHYS 170. [2-2-0]

FOPR 362 (3) FOREST OPERATIONS II. Detailed analysis of the engineering, economic, environmental, and aesthetic factors influencing forest operations planning. Available only through Distance Education. Prerequisite: FOPR 262.

FOPR 363 (3) FOREST SOIL MECHANICS. Physical and hydraulic properties of soils for engineering design, seepage and erosion control, and strength parameters for slope stability analysis. Prerequisite: All of PHYS 170, FOPR 361. Corequisite: WOOD 376. [3-2-0]

FOPR 365 (2) FOREST OPERATIONS II. Detailed analysis of the engineering, economic, environmental, and aesthetic factors influencing forest operations planning. Prerequisite: FOPR 262. [2-1-0]

FOPR 459 (3) ECONOMICS, CONTRACTS, AND FINANCES IN FOREST OPERATIONS. A capstone project-based course with applications of engineering economics, contract preparation, and financial planning in the context of Forest Operations. Restricted to students registered in their fourth year. Prerequisite: FRST 318. [2-2]

FOPR 463 (3) FOREST ROADS AND SLOPE STABILITY. Slope stability, bearing capacity of roads, design of bridge abutments, settlement, piled foundations. Prerequisite: FOPR 363 and one of WOOD 376, CIVL 228. [3-2-0]

FOPR 464 (3) FOREST TRANSPORTATION SYSTEMS. Technical, economic and environmental aspects of forest transportation methods. Topics include vehicle performance and design, transportation network analysis, facilities location and materials handling processes. Prerequisite: All of PHYS 170, FOPR 361. [2-2-0]

FRE — FOOD AND RESOURCE ECONOMICS FACULTY OF LAND AND FOOD SYSTEMS

FRE 295 (3) MANAGERIAL ECONOMICS. Economic foundations of managerial decision-making. Organization of the firm, demand theory, cost and production, market structure, competitive strategy, welfare-economic foundations of business regulation. Credit may be obtained for only one of ECON 201, ECON 206, FRE 295, COMM 295. Prerequisite: Either (a) ECON 100 or (b) all of ECON 101, ECON 102; and MATH 105. [3-0-0]

FRE 302 (3) SMALL BUSINESS MANAGEMENT IN AGRI-FOOD INDUSTRIES. Emphasizes the building of a business plan by exploring topics such as the planning process and financing, marketing and human resource concepts, as applied to an agri-food business, domestically and internationally. Prerequisite: One of ECON 101, ECON 310. [3-0-1]

FRE 306 (3) INTRODUCTION TO GLOBAL FOOD MARKETS. An overview of global food markets including recent trends (e.g., vertical coordination, strategic alliances, multinationals and small firms in niche markets), marketing and trade institutions such as state-trading enterprises and WTO regulations, issues specific to developing nations, and case studies. Prerequisite: One of ECON 101, ECON 310. [3-0-1]

FRE 340 (3) INTERNATIONAL AGRICULTURAL DEVELOPMENT. Characteristics, processes and sources of economic growth, role of agricultural and resource sectors in economic growth, analysis of output and input markets in those sectors, policy failures, tools for empirical analysis of rural markets, growth, and the environment. Prerequisite: One of ECON 100, ECON 101. [3-0]

FRE 374 (3) LAND ECONOMICS. Economic analysis applied to problems of land use rent theory, land evaluation, and land conservation. Techniques for assessing economic efficiency of land use. Effects of institutions and public policies on land use. Prerequisite: All of ECON

101, ECON 102. Equivalency: ECON 374. [3-0]

FRE 385 (3) QUANTITATIVE METHODS FOR BUSINESS AND RESOURCE MANAGEMENT. Applied problem solving using spreadsheet and database software. Cases concern statistical analysis, data manipulation, financial statements, linear programming and simulation. Prerequisite: One of ECON 101, ECON 310 and either (a) one of FRST 231, BIOL 300 or (b) AGSC 350. [2-1-0]

FRE 420 (3) TRADE AND DOMESTIC POLICY IN GLOBAL FOOD MARKETS. Food policy-making process in Canada and other countries, application of analytical tools to domestic and trade policies, market power and domestic policy distortions, major policies and instruments in Canadian agriculture and resource sectors. Prerequisite: One of ECON 210, FRE 295, COMM 295 or 6 credits of upper-level FRE or ECON. [3-0]

FRE 475 (3) REGULATING FOOD SAFETY IN GLOBAL FOOD MARKETS. Analysis of food safety issues such as the political economy of genetically modified food, economic consequences of microbial or pesticide contamination, design and enforcement of food safety standards, and regulating the safety of imported food. Prerequisite: One of ECON 201, FRE 295, COMM 295 or 6 credits of upper-level FRE or ECON. [0-0-0; 3-0-1]

FRE 490 (3) CURRENT ISSUES IN FOOD AND RESOURCE ECONOMICS. Prerequisite: One of ECON 101, ECON 310. [3-0]

FREN — FRENCH FACULTY OF ARTS

All French courses titled “Studies in”, as well as FREN 498, may be taken twice for credit with different content, to a maximum of 6 credits.

FREN 101 (3) BEGINNERS' FRENCH I. Grammar, composition, reading and oral practice. Not available to students with the prerequisite for FREN 102.

FREN 102 (3) BEGINNERS' FRENCH II. Grammar, composition, reading and oral practice. Not available to students with prerequisite for FREN 111. Prerequisite: FREN 101 or equivalent.

FREN 111 (3) BEGINNERS' FRENCH III. Not available for credit to students with FREN 12, FREN 112 or equivalent. Prerequisite: One of FREN 11, FREN 102 or equivalent.

FREN 112 (3) BEGINNERS' FRENCH IV. Not available for credit to students with FREN 12. Prerequisite: FREN 111 or equivalent.

FREN 121 (3) CONTEMPORARY FRENCH LANGUAGE. Preparation for first-year university French, for students with French 12 who are not at the level required for FREN 122. Not available to students with credit for FREN 122 or higher.

FREN 122 (3) CONTEMPORARY FRENCH LANGUAGE AND LITERATURE I. A review of French grammar and an introduction to contemporary literature written in French, with emphasis on essay writing and textual analysis.

Prerequisite: One of FREN 12, FREN 112, FREN 121 or equivalent..

FREN 123 (3) CONTEMPORARY FRENCH LANGUAGE AND LITERATURE II. Continuation of FREN 122 with emphasis on literature, essay writing and textual analysis. Prerequisite: FREN 122 or assignment based on placement test.

FREN 215 (6) ORAL FRENCH PRACTICE. Course designed to provide opportunities for students already well-grounded in grammar to improve their oral skills. Credit will not be given for both FREN 215 and FREN 224 or FREN 225. Prerequisite: FREN 123.

FREN 220 (3) INTRODUCTION TO EARLY FRENCH LITERATURE AND TO TEXTUAL ANALYSIS. Students will familiarize themselves with techniques of literary analysis, as applied to representative works from the Middle Ages to the 17th century, including theatre, fiction, poetry and non-fiction prose. To be taken by all students intending to proceed to the Minor, Major or Honours program. Prerequisite: FREN 123 or assignment based on placement test.

FREN 221 (3) INTRODUCTION TO MODERN LITERATURE WRITTEN IN FRENCH AND TO TEXTUAL ANALYSIS. Students will familiarize themselves with techniques of literary analysis, as applied to representative works from the 18th century to the present, including theatre, fiction, poetry and non-fiction prose. To be taken by all students intending to proceed to the Minor, Major or Honours program. Prerequisite: FREN 123 or assignment based on placement test.

FREN 222 (3) STUDIES IN FRENCH LANGUAGE AND STYLE I. Grammar, vocabulary, composition, language in context. To be taken by all students intending to proceed to the Minor, Major or Honours program. Credit will not be given for both FREN 222 and FREN 224 or FREN 222 and FREN 342. Prerequisite: FREN 123 or assignment based on placement test.

FREN 223 (3) STUDIES IN FRENCH LANGUAGE AND STYLE II. Grammar, vocabulary, composition, language in context. To be taken by all students intending to proceed to the Minor, Major or Honours program. Credit will not be granted for both FREN 223 and FREN 225 or FREN 223 and FREN 343. Prerequisite: FREN 222 or assignment based on placement test.

FREN 224 (3) AN INTERDISCIPLINARY APPROACH TO FRENCH I. French language for ex-immersion students. Credit will not be granted for FREN 222, FREN 342 and FREN 224 or for FREN 215 and FREN 224. Prerequisite: FRAL 12.

FREN 225 (3) AN INTERDISCIPLINARY APPROACH TO FRENCH II. French language for ex-immersion students. Credit will not be granted for FREN 223, FREN 343 and FREN 225 or for FREN 215 and FREN 225. Prerequisite: FREN 224.

FREN 320 (3) ADVANCED STUDIES IN FRENCH LITERATURE FROM 1000 TO 1700. Representative texts will be studied to help students broaden their understanding of significant literary movements in their cultural and historical contexts and develop strategies for the careful reading of literary texts. Prerequisite: One of FREN 220, FREN 221.

FREN 321 (3) ADVANCED STUDIES IN FRENCH LITERATURE FROM 1700 TO THE PRESENT. Representative texts will be studied to help students broaden their understanding of significant literary movements in their cultural and historical contexts and develop strategies for the careful reading of literary texts. Prerequisite: One of FREN 220, FREN 221.

FREN 330 (3) QUEBECOIS LITERATURE. Prerequisite: One of FREN 220, FREN 221.

FREN 333 (3) FRENCH CIVILIZATION I. A historically based approach to French civilization and culture from their origins to the Third Republic (1875). Prerequisite: One of FREN 220, FREN 221, FREN 223 or permission of the department.

FREN 334 (3) FRENCH CIVILIZATION II. A historically based approach to French civilization and culture from the Third Republic to the present, completed by a thematic study of contemporary French culture. Prerequisite: One of FREN 220, FREN 221, FREN 223 or permission of the instructor.

FREN 335 (3) FRENCH-CANADIAN CIVILIZATION. A thematic approach to selected topics in French-Canadian culture and civilization. Prerequisite: One of FREN 220, FREN 221, FREN 223 or permission of the instructor.

FREN 341 (6) FRENCH FOR READING KNOWLEDGE. Training in the reading of French texts for study and research. Not available for credit toward a Minor, Major, or Honours Program in French. Prerequisite: For undergraduates: no less than FREN 12 nor more than FREN 123. Graduate students should consult the instructor.

FREN 342 (3) FRENCH PRACTICE FOR NON-SPECIALISTS I. The program of FREN 222, for students not specializing in French. Credit will not be granted for both FREN 222 and FREN 342, nor for FREN 224 and FREN 342. Prerequisite: FREN 123 and at least third-year standing. Equivalency: FREN 222.

FREN 343 (3) FRENCH PRACTICE FOR NON-SPECIALISTS II. The program of FREN 223 for students not specializing in French. Credit will not be granted for both FREN 223 and FREN 343 nor for FREN 225 and FREN 343. Prerequisite: One of FREN 222, FREN 342. Equivalency: FREN 223.

FREN 344 (3) TECHNIQUES OF ORAL EXPRESSION IN FRENCH I. Training in formal oral presentation in French. Emphasis on structured expression and oral delivery. Not available for credit toward a Major or Honours Program in French. Prerequisite: One of FREN 215, FREN 225. 68% or better in FREN 215 is recommended.

FREN 345 (3) TECHNIQUES OF ORAL EXPRESSION IN FRENCH II. Further training in formal oral presentation in French. Emphasis on structured expression and oral delivery. Not available for credit toward the Honours Program in French. Prerequisite: FREN 344.

FREN 348 (3) FRENCH LITERATURES IN TRANSLATION I. Literary works from the Middle Ages to the French Revolution. Not available for credit towards a Minor, Major or Honours program in French. Prerequisite: 6 credits of first-year English, ARTS 001, or Foundations, and at least second year standing.

FREN 349 (3) FRENCH LITERATURES IN TRANSLATION II. Literary works since the French Revolution. Topics may include literature from France, Quebec, Africa, the Caribbean. Not available for credit towards a Minor, Major or Honours program in French. Prerequisite: 6 credits of first year English, ARTS 001 or Foundations and at least second-year standing.

FREN 351 (3) CORRECTIVE FRENCH PHONETICS. Theory and practice of French pronunciation, corrective phonetics; foundation for the phonetic transcription of international French. Prerequisite: One of FREN 220, FREN 221, FREN 223.

FREN 353 (3) FRENCH GRAMMAR. Systematic study of the fundamental principles of French grammar. Prerequisite: FREN 223 or equivalent.

FREN 355 (3) ADVANCED COMPOSITION. Development of essay writing skills in French. Prerequisite: FREN 223 or equivalent.

FREN 357 (3) TRANSLATION I. Comparative study of French and English through translation. Prerequisite: FREN 223 or equivalent.

FREN 370 (3) INTRODUCTION TO FRENCH LINGUISTICS. A survey of basic terminology, methods, problems, and theoretical trends in French linguistics, specifically designed to provide students with a foundation for advanced language study in French. Prerequisite: FREN 223.

FREN 407 (3) STUDIES IN MEDIEVAL FRENCH LITERATURE. Literary texts from the eleventh to the fifteenth century. Topics may include the epic, Tristan texts, Arthurian texts, the short narrative, satirical texts, religious drama, secular drama, lyric poetry, didactic poetry, François Villon. Prerequisite: One of FREN 320, FREN 321, FREN 330.

FREN 408 (3) STUDIES IN FRENCH LITERATURE OF THE SIXTEENTH CENTURY. Topics may include works by Rabelais, Montaigne, Scève, Labé, Ronsard, and DuBellay. Prerequisite: One of FREN 320, FREN 321, FREN 330.

FREN 409 (3) STUDIES IN FRENCH LITERATURE OF THE SEVENTEENTH CENTURY. Topics may include works by Corneille, Racine, Molière, Descartes, Pascal, La Fontaine, and Mme de la Fayette. Prerequisite: One of FREN 320, FREN 321, FREN 330.

FREN 410 (3) STUDIES IN FRENCH LITERATURE OF THE EIGHTEENTH CENTURY. Prerequisite: One of FREN 320, FREN 321, FREN 330.

FREN 413 (3) STUDIES IN FRENCH LITERATURE OF THE NINETEENTH CENTURY. Prerequisite: One of FREN 320, FREN 321, FREN 330.

FREN 416 (3) STUDIES IN FRENCH LITERATURE SINCE 1900. Prerequisite: One of FREN 320, FREN 321, FREN 330.

FREN 418 (3) STUDIES IN AFRICAN AND/OR CARIBBEAN LITERATURES OF FRENCH EXPRESSION. An introduction to representative works. Topics include Negritude, the evolution of post-colonial literature, and the socio-historical context of each work. Prerequisite: One of FREN 320, FREN 321, FREN 330.

FREN 419 (3) STUDIES IN WOMEN'S WRITING. Prerequisite: One of FREN 320, FREN 321, FREN 330.

FREN 420 (3) C SELECTED TOPICS IN FRENCH LITERATURE AND CULTURE. Course content will vary. May be taken up to 3 times for a total of 9 credits. Prerequisite: One of FREN 320, FREN 321, FREN 330.

FREN 423 (3) STUDIES IN THEATRE. Prerequisite: One of FREN 320, FREN 321, FREN 330.

FREN 424 (3) STUDIES IN PROSE FICTION. Prerequisite: One of FREN 320, FREN 321, FREN 330.

FREN 427 (3) STUDIES IN CINEMA. Prerequisite: One of FREN 320, FREN 321, FREN 330.

FREN 429 (3) STUDIES IN NON-FICTION PROSE. Prerequisite: One of FREN 320, FREN 321, FREN 330.

FREN 430 (3) STUDIES IN QUEBECOIS LITERATURE. Prerequisite: One of FREN 320, FREN 321, FREN 330, FREN 335.

FREN 457 (3) TRANSLATION II. Advanced translation. Prerequisite: FREN 357.

FREN 460 (3) STUDIES IN HISTORICAL FRENCH LINGUISTICS. Topics may include historical phonetics and phonology, morphology and syntax, lexicology. Prerequisite: FREN 370.

FREN 465 (3) INTRODUCTION TO OLD FRENCH. An introduction to the phonetics, grammar and vocabulary of major Old French dialects; corpus of various literary texts (9th–14th c). Prerequisite: FREN 353.

FREN 468 (6) ROMANCE LINGUISTICS. The Indo-European background; Classical and Vulgar Latin; the origin development and spread of the Romance Languages, their vocabulary, phonology, morphology, syntax; vernacular Latin texts and Romance texts. Prerequisite: Two years study of each of two Romance Languages or two years of one Romance Language and one year of Latin. Equivalency: SPAN 468, RMST 468.

FREN 470 (3) STUDIES IN MODERN FRENCH LINGUISTICS. Prerequisite: FREN 370.

FREN 472 (3) MORPHOLOGY OF THE FRENCH LANGUAGE. The morphological markings of French (gender, number, tense, mode, person, etc) and their underlying semantic systems. Prerequisite: All of FREN 353, FREN 370. Corequisite: FREN 370 may be taken concurrently with the permission of the instructor.

FREN 473 (3) SYNTACTIC DESCRIPTION OF THE FRENCH LANGUAGE. The syntactic markings of French (word order, agreement, pronominalisation, etc) and their underlying semantic systems. Prerequisite: All of FREN 353, FREN 370. Corequisite: FREN 353 and 370 may be taken concurrently with the permission of the instructor.

FREN 474 (3) SYNCHRONIC LEXICOLOGY. An introduction to the study of the vocabulary of modern French, focusing on basic principles in lexical semantics, lexicology, phraseology, lexicography, terminology and new technologies, neology. Prerequisite: All of FREN 353, FREN 370.

FREN 475 (3) CANADIAN FRENCH: A DESCRIPTIVE APPROACH. The phonetics, phonology, lexicon, and syntax of spoken and written Canadian French. Prerequisite: All of FREN 351, FREN 353, FREN 370. Corequisite: FREN 351 may be taken concurrently with the permission of the instructor.

FREN 498 (3) DIRECTED READING. May be taken twice for credit, with different content, to a maximum of 6 credits.

FREN 499 (3) HONOURS ESSAY.

FREN 501 (3/6) C STUDIES IN THE LITERATURE OF MEDIEVAL FRANCE.

FREN 502 (3/6) C STUDIES IN SIXTEENTH-CENTURY LITERATURE.

FREN 503 (3/6) D STUDIES IN SEVENTEENTH-CENTURY LITERATURE.

FREN 504 (3/6) D STUDIES IN THE SEVENTEENTH-CENTURY NOVEL.

FREN 505 (3/6) D STUDIES IN SEVENTEENTH-CENTURY DRAMA.

FREN 506 (3/6) D STUDIES IN THE EIGHTEENTH-CENTURY NOVEL.

FREN 507 (3/6) C STUDIES IN THE FRENCH ENLIGHTENMENT.

FREN 508 (3/6) D STUDIES IN FRENCH ROMANTIC LITERATURE.

FREN 509 (3/6) D STUDIES IN POST-ROMANTIC NINETEENTH-CENTURY LITERATURE.

FREN 510 (3/6) D BAUDELAIRE AND THE SYMBOLISTS.

FRST — FORESTRY FACULTY OF FORESTRY

FRST 100 (2) INTRODUCTION TO FORESTRY. An overview of forestry. History of forestry and the forestry profession, present status and role of forestry, forest policy and future trends in use of forest resources. [1-2-0]

FRST 200 (7) FOREST PLANT BIOLOGY. An integrated course dealing with the structure, function and classification of forest plants. Prerequisite: All of BIOL 121, BIOL 140. [3-2-1; 3-2-1]

FRST 201 (7) FOREST ECOLOGY AND SILVICS. An integrated course dealing with the structure, function, and classification of forest ecosystems. Corequisite: All of FRST 200, SOIL 200, AGRO 244 or GEOG 204 is recommended. [3-2-1; 3-2-1]

FRST 202 (3) FOREST ECOLOGY. The Ecosystem concept; energy biomass and nutrient cycling; the physical environment; population and community ecology; succession, Biogeoclimatic classification and some coastal ecosystems. Available only through Distance Education. Corequisite: One of FRST 111,

FRST 200 and one of SOIL 200, SOIL 300. [3-2]

FRST 203 (3) SILVICS OF FOREST TREES OF WESTERN CANADA. Ecological and silvical characteristics of forest trees; assessment of ecological site quality and biogeoclimatic classification; application of silvics in silviculture. A plant herbarium of at least 50 species is required. Only available through Distance Education. Prerequisite: FRST 202. [3-2]

FRST 231 (3) INTRODUCTION TO BIOMETRICS. Basic theories of probability and statistics. Sampling distribution, methods of estimation and hypothesis testing; goodness of fit and tests for independence; analysis of variance, regression and correlation. Corequisite: One of MATH 100, MATH 102, MATH 104, MATH 180, MATH 184. [3-2-0]

FRST 232 (3) COMPUTER APPLICATIONS IN FORESTRY. Techniques involved in solving forestry problems with microcomputers using word processing, spreadsheet, procedural language, and database management tools. [3-2]

FRST 237 (3) INTRODUCTION TO FOREST MENSURATION AND PHOTOGRAMMETRY. Measuring and estimating tree volumes, form and taper. Timber scaling and grading. Computer applications. Basic photogrammetry, mapping for photography and photo-based inventory systems. Prerequisite: FRST 231. Corequisite: FRST 232. [3-2]

FRST 238 (3) FOREST MENSURATION. Forest inventory methods. Growth and yield prediction. Applications of multiple linear regressions and sampling techniques. Regeneration and residue surveys. Introduction to multiple resource inventories. Prerequisite: FRST 237 and one of MATH 101, MATH 103, MATH 105. [3-2]

FRST 239 (3) TREE AND STAND LEVEL MEASUREMENTS. An introduction to measurement of individual trees and stands; use of aerial photographs, maps, and various measurement instruments. Prerequisite: All of FRST 231, FRST 232. [3-2-0]

FRST 248 (3) CO-OPERATIVE WORK PLACEMENT. Supervised work experience in an approved organization for a minimum of 15 weeks. Restricted to students in the Co-operative Education Program in the Faculty of Forestry. Orientation workshops required. Final work term report required.

FRST 290 (3) RECREATION RESOURCE ADMINISTRATION AND MANAGEMENT. Study of the nature of management and conservation of wildland recreation resources; basic elements of recreation land use planning; recreation in forest management plans on public lands; tools of recreational land management. [2-2]

FRST 292 (3) RECREATION SITE PLANNING. Fundamentals of recreation site selection, site planning and conservation of non-timber values in wildland settings; inventory of recreational features and related habitat, visual, heritage

and subsistence resources; analysis of sensitivity of wildland recreation areas. [2-2]

FRST 300 (6) PRINCIPLES OF FOREST SCIENCES AND MANAGEMENT. Introduction to the biology underlying tree and stand growth and development, silvics and silviculture and techniques for managing the forest for a diversity of products and benefits. Not available for credit to undergraduate forestry students; no prerequisites. [3-0; 3-0]

FRST 302 (3) FOREST GENETICS. Population genetics and conservation of genetic resources; principles of genetics and their application to forestry. [2-2]

FRST 303 (3) PRINCIPLES OF FOREST SCIENCE. Introduction to growth of trees and forests with emphasis on evolutionary, ecological and environmental aspects. Not available for credit to undergraduate students in the Faculty of Forestry. [3-0-0]

FRST 304 (3) THE SCIENCE UNDERLYING FORESTRY ISSUES. Examination of current forestry issues with specific reference to their scientific basis. Not available for credit to undergraduate students in the Faculty of Forestry. [3-0-0]

FRST 305 (3) SILVICULTURE I. Silviculture concepts and principles; artificial regeneration and stand establishment; principles of forest tree improvement, seed handling, nursery practices, site preparation and vegetation management. Prerequisite: All of FRST 201, FRST 351. Third year standing in the BSF program is also acceptable. [3-4*]

FRST 306 (3) SILVICULTURE II. Stand tending practices; stand density management, pruning and fertilization; silvicultural systems; silviculture guides and development of prescriptions; elements of decision making, monitoring and control systems; connections to forest level planning. Prerequisite: All of FRST 305, FRST 351. [3-4*-0]

FRST 308 (2) FOREST ENTOMOLOGY. An introduction to insects which cause damage to forests and forest products; how insects live; life cycles and attack symptoms of representatives of major groups of insects; principles for control and management. [2-2]

FRST 309 (2) FOREST PATHOLOGY. Biology and management of forest tree diseases. Prerequisite: FRST 201. [2-4*-0]

FRST 310 (3) SOIL BIOLOGY. The diversity and interactions of soil organisms (bacteria, protozoa, fungi, animals, plants) in natural and managed ecosystems; roles in primary production, nutrient cycling, decomposition and reclamation; responses to environmental change. Prerequisite: BIOL 121. Corequisite: AGRO 342. [2-3-0]

FRST 311 (4) PLANT PHYSIOLOGY I. Mechanisms and regulation of functional processes contributing to the assimilation, transport and utilization of water, mineral nutrients and carbon by plants. CHEM 230 is recommended. Equivalency: BIOL 351, AGRO 324. [3-3-0]

FRST 312 (3) FOREST SOILS. Forest soil properties, processes, and fertility; forest soils in relation to resource management. Same as SOIL 403. Prerequisite: SOIL 200. Equivalency: SOIL 303. [3-2]

FRST 318 (3) FOREST AND CONSERVATION ECONOMICS. Practical problem solving of economic issues related to forestry and conservation, touching on investment analysis, capital budgeting, non-timber economics, ecosystem services, and forest certification. Completion of FRST 232 or intermediate knowledge of MS Excel essential. Prerequisite: ECON 101. [3-0-1]

FRST 319 (3) PRINCIPLES OF FORESTRY ECONOMICS. Introduction to the economics of production, distribution and consumption of goods and services produced by, and dependent on, the forest resource. Available only through Distance Education. Prerequisite: One of ECON 101, ECON 301.

FRST 327 (2) FOREST FIRE SCIENCE AND MANAGEMENT. Ecological effects of fire; fire behaviour; fire danger rating; principles of fire management and prescribed fire use. Prerequisite: All of SOIL 200, FRST 201. [2-4*-0]

FRST 332 (3) INTRODUCTION TO APPLIED MATHEMATICAL PROGRAMMING FOR FORESTRY. Decision analysis, linear programming, and computer simulation applied to forestry problems. Prerequisite: All of MATH 101, FRST 232. [3-1]

FRST 339 (3) FOREST LEVEL MEASUREMENT AND PRODUCTIVITY. Obtaining and forecasting information for stands and forests. Prerequisite: Third year standing in the B.S.F. program. [3-2-0]

FRST 346 (3) CO-OPERATIVE WORK PLACEMENT. Supervised work experience in an approved organization for a minimum of 15 weeks. Restricted to students in the Co-operative Education Program in the Faculty of Forestry. Final work term report required.

FRST 347 (3) CO-OPERATIVE WORK PLACEMENT. Supervised work experience in an approved organization for a minimum of 15 weeks. Restricted to students in the Co-operative Education Program in the Faculty of Forestry. Final work term report required.

FRST 348 (3) CO-OPERATIVE WORK PLACEMENT. Supervised work experience in an approved organization for a minimum of 15 weeks. Restricted to students in the Co-operative Education Program in the Faculty of Forestry. Final work term report required.

FRST 351 (2) INTERIOR FIELD SCHOOL. Field study at an interior BC location concentrating on land use, management and silviculture. Fees will be assessed to meet expenses. Prerequisite: FRST 201.

FRST 352 (2) INTEGRATED FIELD STUDIES IN FORESTRY. A series of one- to three-day field trips to forest sites in southwest British Columbia to demonstrate current practices and problems. Prerequisite: Third year standing in B.S.F. program.

FRST 385 (3) WATERSHED HYDROLOGY. Measurement and analysis of hydrological processes in response to forest management activities. Prerequisite: Third or fourth year standing in the Faculty of Forestry or Geography. [3-2-0]

FRST 386 (3) AQUATIC ECOSYSTEMS AND FISH IN FORESTED WATERSHEDS. Effects of forest management activities on fish and aquatic ecosystems. Prerequisite: Third year standing in the Faculty of Forestry. [3-2-0]

FRST 392 (3) RECREATION AND RESOURCE PLANNING. Lectures and demonstrations outlining concepts, and component elements of regional recreation planning in theory and in practice. [2-2]

FRST 395 (3) FOREST WILDLIFE ECOLOGY AND MANAGEMENT. Biology of important bird and mammal species resident in forested regions, with particular emphasis on the influences of silvicultural and logging practices. Prerequisite: One of FRST 201, BIOL 303. [3-2-0]

FRST 399 (3) INTRODUCTION TO RESEARCH METHODS. Lectures and seminars in research philosophies and the scientific method, with special emphasis on field research. [2-1]

FRST 403 (3) THE SUSTAINABILITY OF PRODUCTION IN MANAGED FOREST ECOSYSTEMS. Study of the functional and dynamic characteristics of forest ecosystems and their response to forest management using ecosystem-level microcomputer simulation models. Prerequisite: FRST 201. [3-2-0]

FRST 404 (4) ADVANCES IN SILVICULTURE. Fundamental silvicultural problems; the application of research findings to the practice of silviculture. Prerequisite: All of FRST 305, FRST 306. [4-0]

FRST 405 (3) FOREST ECOSYSTEMS. Ecosystem classification of BC forest land. The biogeoclimatic classification of BC as a basis for forest land management. [2-2]

FRST 406 (3) ADVANCED FOREST PATHOLOGY. Hereditary, physiological, anatomical, environmental, and microbiological factors influencing forest tree diseases. Given in alternate years. [2-2]

FRST 407 (1) VEGETATION MANAGEMENT. Theory of plant competition and vegetation dynamics; the biology of weedy and invasive species; assessment of vegetation problems; principles and techniques of forest vegetation control; impacts of vegetation management methods. Prerequisite: One of FRST 305, PLNT 304, FRST 338, BIOL 302, FRST 303. [1-0]

FRST 408 (3) PROBLEMS OF FOREST ENTOMOLOGY. Decision-making in the protection of forests from insects. Insect problems viewed from other disciplines of forestry. Bases of biological and economic evaluation, and choice of control methods. [2-2]

FRST 413 (3) ECOLOGICAL PLANT BIOCHEMISTRY. The structure, biosynthesis, distribution and biological function of

secondary plant metabolites. Prerequisite: All of BIOL 200, BIOL 201, BIOL 209 or BIOL 210 is recommended. Equivalency: BIOL 462. [3-0-0]

FRST 415 (3) FOREST POLICY. The development, implementation and analysis of forest policy. Prerequisite: Third or fourth year standing. [3-0-0]

FRST 418 (3) ECONOMICS OF SILVICULTURE. Economic analysis of individual silvicultural practices and silvicultural regimes; economic impact of large scale reforestation and silvicultural programs; institutional incentives and disincentives for silviculture investments. Prerequisite: One of FRST 318, FOPR 261. Corequisite: FRST 306. [3-0-0]

FRST 419 (3) ECONOMICS OF THE FOREST SECTOR. Basic economic constructs used to analyze key features of the forest sector including product prices, input prices, production levels, trade patterns and aggregate levels of product consumption. Prerequisite: ECON 101 and one of MATH 100, MATH 102, MATH 104, MATH 180, MATH 184. [3-0-0]

FRST 420 (3) FOREST ENVIRONMENTAL MANAGEMENT. Forestry impacts upon environment; man's relationship to the forest; interactions of industrial forest practice with other resource uses, their economic implications and relevance; approaches to and problems of maintaining environmental quality. [2-2]

FRST 421 (3) INTEGRATED RESOURCES MANAGEMENT I. Introduction to the quantitative tools necessary in forest management. Prerequisite: All of FRST 238, FRST 332. Corequisite: One of FRST 319, FOPR 260. [3-2; 0-0]

FRST 422 (3) LAND INFORMATION SYSTEMS. Philosophy and methods of data collection, analysis and classification of land for multiple uses. Laboratories emphasize Geographic Information Systems. Same as SOIL 417. Equivalency: SOIL 417. [2-4]

FRST 423 (3) INTEGRATED RESOURCES MANAGEMENT II. The design of forests with respect to the availability of an array of values across time and across the geographic area of the forest. Prerequisite: FRST 421. [2-4]

FRST 424 (10) SUSTAINABLE FOREST MANAGEMENT. Integration of biophysical and socio-economic components of forest management. Prerequisite: Fourth year standing in the B.S.F. program. [0-0-20]

FRST 427 (3) ADVANCES IN FOREST FIRE SCIENCE AND MANAGEMENT. Fire in ecosystems; forest fire management policies; advanced fire management and use of prescribed fire; the application of research findings to fire management. Prerequisite: FRST 327. [2-4]

FRST 430 (3) ADVANCED BIOMETRICS. Analysis of variance, multiple regression and analysis of covariance. Design and analysis of experiments. Prerequisite: FRST 231. [3-2]

FRST 431 (3) SAMPLING METHODS. Theory and design of sampling techniques with

emphasis on application to natural resources. Prerequisite: FRST 231. [3-0-1]

FRST 436 (3) GROWTH AND YIELD.

Techniques of growth and yield projection and discussion of modelling approaches. Exploration of stand dynamics, quantitative implications of management treatments and environmental limitations to tree and stand growth. Prerequisite: FRST 339. [2-2-0]

FRST 439 (3) INTERNATIONAL FORESTRY.

The socio-economic, biological and technological aspects of forestry within the international frame, in both the developed and developing world. Regional studies and the role of national and international agencies. [2-2-0]

FRST 442 (3) PHOTO-INTERPRETATION OF FOREST LANDS.

Landform identification and terrain analysis from air photographs, application to forest and agricultural land mapping. [2-2-0]

FRST 443 (3) REMOTE SENSING IN FORESTRY AND AGRICULTURE.

Basic biological concepts related to interpretation of remote sensing data for land management, including the use of films and filters, and interpretation of air photographs, and other imagery. [2-2-0]

FRST 444 (3) AGROFORESTRY.

Integration of farms and forests, including tropical agroforestry systems, non-timber forest products, forest farming, woodlot management, silvopastoralism, riparian buffers, windbreaks, soil fertility improvement and nutrient cycling. Prerequisite: One of FRST 201, AGSC 260, BIOL 302. Equivalency: AGRO 444. [3-2-0]

FRST 445 (1) SEMINAR.

Oral presentation techniques and discussion of current forestry topics; reviews of important papers in forest periodicals. [0-1; 0-1]

FRST 446 (3) CO-OPERATIVE WORK PLACEMENT.

Supervised work experience in an approved organization for a minimum of 15 weeks. Restricted to students in the Co-operative Education Program in the Faculty of Forestry. Final work term report required.

FRST 447 (3) CO-OPERATIVE WORK PLACEMENT.

Supervised work experience in an approved organization for a minimum of 15 weeks. Restricted to students in the Co-operative Education Program in the Faculty of Forestry. Final work term report required.

FRST 448 (3) CO-OPERATIVE WORK PLACEMENT.

Supervised work experience in an approved organization for a minimum of 15 weeks. Restricted to students in the Co-operative Education Program in the Faculty of Forestry. Final work term report required.

FRST 449 (1-6) C DIRECTED STUDIES IN FORESTRY.

In special cases and with the approval of the instructor concerned, a student may carry on directed studies of specific problems in forestry.

FRST 451 (3) FIELD WORK IN HARVESTING, SILVICULTURE AND MENSURATION.

To be taken immediately prior to the commencement of fourth year. Fees will be assessed to meet the

expenses. Prerequisite: All of FRST 238, FRST 305, FRST 351.

FRST 452 (2) COASTAL FIELD SCHOOL.

Site diagnosis and preparation of management options in coastal forests. Extrasectional course; fees will be assessed to meet expenses. Prerequisite: Third or fourth year-standing in the B.S.F. program.

FRST 462 (3) INDUSTRIAL FOREST MANAGEMENT.

The relationships, interactions, functions, and objectives of the companies, governments, unions, and associations which make up the forest industry. [2-2]

FRST 465 (2) BUSINESS FUNDAMENTALS IN THE FORESTRY SECTOR.

Financial and marketing aspects of the forest industry. Prerequisite: Fourth year standing in the B.S.F. program. [2-1-0]

FRST 470 (3) FORESTS AND SOCIETY.

Social aspects of forestry and forest communities. Prerequisite: Third- or fourth-year standing. [3-0-1]

FRST 485 (3) FOREST WATERSHED MANAGEMENT.

Effects of land management on quality, quantity and timing of water flow. Prerequisite: FRST 385. [3-2-0]

FRST 490 (3) VISUAL RESOURCE MANAGEMENT.

Methodologies for analysis, design and management of the visual guidelines; operational policies of resource extraction industries and the implication on multiple land use management. Equivalency: LARC 340, LARC 542. [2-2]

FRST 491 (3) VISUALIZATION AND FOREST DESIGN.

GIS-based spatial planning and 3D landscape visualization for forest management. Prerequisite: Fourth year standing in the B.S.F. program. [3-0-1]

FRST 495 (3) BIOLOGICAL DIVERSITY AND FOREST MANAGEMENT.

Principles, problems, and practices of managing forests and nature reserves for biological diversity; integration of forestry and wildlife with particular emphasis on diversity of all life forms. Prerequisite: All of FRST 201, FRST 395. [2-2-0]

FRST 497 (2) GRADUATING ESSAY OR TECHNICAL REPORT.

A technical description of a study or a detailed literature review of at least 4,000 words, developed under the guidance of a Faculty member. Available only to students in their graduating year.

FRST 498 (6) B.S.C. THESIS IN FORESTRY.

An independent study or research project of a subject of special interest to the student under the direction of a staff member. The subject must be appropriate to the student's area of concentration.

FRST 499 (6) B.S.F. THESIS.

An independent study or research project on an approved topic, developed under the guidance of a Faculty member. Available only to students in their graduating year.

FRST 503 (3) PLANT MOLECULAR BIOLOGY LABORATORY.

Techniques of purification, cloning, sequencing, restriction-hybridization analysis of plant nucleic acids, in-vitro labeling

of plant nucleic acids and proteins, and electrophoresis and immunodetection of plant proteins. Offered by the Biotechnology Teaching Laboratory in cooperation with the Department of Forest Sciences. Admission to the course is limited and requires recommendation from the department head.

FRST 504 (3) LANDSCAPE ECOLOGY.

FRST 505 (1-6) C DIRECTED STUDIES IN FOREST SCIENCE.

FRST 506 (3) ADVANCED FOREST PATHOLOGY.

Hereditary, physiological, anatomical, environmental, and microbiological factors influencing forest tree diseases.

FRST 507 (1-6) D TOPICS IN FOREST SCIENCE.

FRST 508 (3) FOREST INSECT ECOLOGY.

Interactions between insects and forests; evaluation of current approaches to research in forest entomology; examination of theories and axioms; application of ecological principles in pest management.

FRST 509 (3) PLANT GENETIC ENGINEERING LABORATORY.

Techniques of vector preparation, electroporation, microprojectile bombardment, and Agrobacterium-mediated plant transformation; selection of transformants, plant regeneration and confirmation of gene transfer at the DNA, RNA and enzyme levels. Limited enrolment; consent of instructors. Equivalency: PLNT 514, BOTA 545. [0-0; 1-6]

FRST 510 (3) APPLIED POPULATION GENETICS.

Equivalency: BIOL 510.

FRST 512 (3) BELOWGROUND FOREST ECOSYSTEMS.

Review of current literature on specific topics in forest soil ecology, including bacterial endophytes, microbial diversity, nutrient cycling, and mycorrhizae.

FRST 513 (3) BIOTECHNOLOGY IN TREE IMPROVEMENT.

Advanced research topics and their application to forest genetics.

Emphasis on molecular genetics and experimental protocols. Prerequisite: BIOL 335 or permission of the instructor.

FRST 516 (3) TREE PHYSIOLOGY.

Growth and development of woody plants; physiological responses to abiotic and biotic environmental factors; consequences of silvicultural practices on physiological processes. Prerequisite: One of FRST 311, BIOL 351, PLNT 324. [3-2]

FRST 518 (3) ECOLOGICAL ECONOMICS.

Emphasis on forested ecosystems. Prerequisite: ECON 301.

FRST 518 (3) ECOLOGICAL ECONOMICS.

Emphasis on forested ecosystems. Prerequisite: ECON 301 or equivalent.

FRST 520 (3) LAND AND FOREST RESOURCE ECONOMICS.

Applications of advanced theory and quantitative analysis to problems in forest resource and land economics; multiple land use; institutions for sustainable land use; optimal management and policy. Equivalency: AGECE 520. [3-0]

FRST 521 (1–6) C TOPICS IN FORESTS AND SOCIETY.

FRST 522 (3) INDIGENOUS PEOPLES AND FOREST LAND MANAGEMENT. A survey of the conceptual and practical issues when indigenous peoples use forested lands and participate in the management of those lands.

FRST 523 (3) FOREST AND ENVIRONMENTAL POLICY.

FRST 524 (3) ENVIRONMENTAL PERCEPTION. Perceptual processes mediating behaviour in humans, with special attention given to the emotional processing of visual stimuli.

FRST 525 (3) VISUALISATION THEORY AND APPLICATIONS.

FRST 525 (1–6) D TOPICS IN FOREST MANAGEMENT.

FRST 526 (1–6) C DIRECTED STUDIES IN FORESTS AND SOCIETY.

FRST 530 (3) MULTIPLE REGRESSION METHODS. Matrix algebra; algebra and inference of multiple linear and multiple curvilinear regressions for solution of problems in forestry and related fields. Non-linear regression. Methods of least squares for analysis of variance and covariance.

FRST 531 (3) MULTIVARIATE STATISTICAL METHODS. Multivariate analysis of variance, cluster, principal components, factor, canonical and discriminant analysis. Theory and conceptual background are presented but emphasis is on selection of appropriate analysis and interpretation of results. Examples from forestry and related fields are analysed by computer programs at UBC.

FRST 532 (1–6) C DIRECTED STUDIES IN FOREST MANAGEMENT.

FRST 533 (1–6) C PROBLEMS IN STATISTICAL METHODS. Directed studies in problems of advanced statistical techniques as a tool in forest research.

FRST 536 (1–6) C ADVANCED STUDIES IN FOREST MENSURATION. Development and analysis of forest inventory systems; sequence and patterns of tree growth; analysis of crown development; improvement of stand growth and yield; methods of biomass analysis.

FRST 538 (2) TOPICS IN REMOTE SENSING.

FRST 539 (1–6) C PROBLEMS IN FOREST SAMPLING.

FRST 544 (2) TECHNICAL COMMUNICATION SKILLS I. Principles and practice of oral presentations.

FRST 545 (2) TECHNICAL COMMUNICATION SKILLS II. Theory and practice of technical communication necessary for preparation of effective scientific reports, reviews, grant proposals, journal articles and theses.

FRST 546 (6) RESEARCH METHODS AND PHILOSOPHIES IN SCIENCE. Lectures and seminars in research philosophies and methods with special emphasis on field and applied research. [3-0; 3-0]

FRST 547 (3) FORESTRY IN BRITISH COLUMBIA.

FRST 548 (3) MAJOR ESSAY. For non-thesis master's Degree Programs.

FRST 549 (6–18) C MASTER'S THESIS.

FRST 550 (6–18) D M.A.SC. THESIS.

FRST 553 (3) INTERNATIONAL TRADE IN FOREST PRODUCTS. Theory and practices of international trade and its application in timber and non-timber forest products, as well as environmental services.

FRST 556 (3) SOCIAL SCIENCE RESEARCH METHODS FOR STUDYING FORESTS AND SOCIETY.

FRST 560 (3) APPLICATION OF OPERATIONAL RESEARCH METHODS IN FOREST MANAGEMENT. Use of operational research methods in forest planning models; emphasis on algorithms, problem formulation and interpretation of results.

FRST 561 (3) SIMULATION MODELLING OF FOREST OPERATIONS AND PROCESSING FACILITIES. Principles and methodology for performing simulation experiments; emphasis on building, running, and analyzing simulation-based models applicable to forest operations and wood products processing.

FRST 570 (1–6) C DIRECTED STUDIES IN WOOD SCIENCE AND FOREST PRODUCTS.

FRST 572 (1–6) D TOPICS IN WOOD SCIENCE AND FOREST PRODUCTS.

FRST 573 (3) WOOD-FLUIDS RELATIONSHIPS. Wood sorption theories and thermodynamics, hygroexpansion; Darcian and non-Darcian flow of fluids in wood; coupled heat and moisture transfer; electrical and acoustical properties of wood.

FRST 575 (3) WOOD STRUCTURE. An investigation of the macroscopic, microscopic and ultrastructural characteristics of wood as a material and its resultant properties.

FRST 576 (3) ADVANCED WOOD MECHANICS. Analysis and design of structural wood products, influences of material inhomogeneity and variability; creep and time dependent fracture phenomena; structural performance of wood products such as panel products, lumber, glued laminated timber and I-Beams. Impact of codes on marketing of structural wood products.

FRST 578 (1–6) C DIRECTED STUDIES IN FOREST BUSINESS AND MANAGEMENT.

FRST 579 (3) FOREST PRODUCTS BIOTECHNOLOGY. Uses of genomic tools, microbiology and enzymology to enhance the processing and value of forest products. [3-3]

FRST 580 (1–6) D TOPICS IN FOREST BUSINESS AND MANAGEMENT.

FRST 581 (3) GLOBALIZATION AND THE MARKETING OF WOOD PRODUCTS. This course explores globalization, its impact on developing and developed countries, what this means to world trade in forest products and

emerging trends in globalization and the environment.

FRST 582 (4) CHEMICAL AND BIOLOGICAL ASPECTS OF WOOD. The chemical nature of wood; the chemical aspects of protective treatments and the fundamental interactions between bacteria/fungi and wood. The application of micro-organisms and enzymes to wood processing.

FRST 583 (3) WOOD PHYSICS AND MECHANICS. Wood-water interactions: thermal and electrical properties and heat transfer in wood; stress-strain relationships; fracture mechanisms (static and dynamic); the influence of material variability, changing resource characteristics, temperature, time and moisture content on mechanical properties and structural use of wood. [3-0]

FRST 588 (3) HEADWATER SYSTEMS. Hydrology, geomorphology and ecology of headwater streams and their catchments; significance of headwater streams to downstream reaches; management issues, particularly in the context of forest harvesting.

FRST 589 (4) RESEARCH METHODS IN FOREST HYDROLOGY.

FRST 590 (3) STATISTICAL METHODS IN HYDROLOGY.

FRST 592 (3) HYDROLOGICAL MODELLING APPLICATIONS IN FORESTRY.

FRST 593 (1–6) C PROBLEMS IN FOREST AND WILDLAND RECREATION. Analysis of and solutions to problems in administration and management of recreation resources in forests, wildlands and non-urban parks.

FRST 597 (1–6) C PROBLEMS IN FOREST WILDLIFE MANAGEMENT.

FRST 598 (3) TRACER METHODS IN HYDROLOGY. Application and modeling of natural and artificial tracers in hydrological systems to study transport behavior and watershed processes.

FRST 649 (0) PH.D. THESIS.

GENE — GENETICS FACULTY OF GRADUATE STUDIES

GENE 501 (3) GENETICS. A lecture series intended to acquaint graduate genetics students and those in related areas with advances in genetics and an overview of genetics in a variety of systems. The emphasis is on molecular genetics. Optional for students in the graduate genetics program. Prerequisite: All of BIOL 334, BIOL 335 or equivalent, and a third-year course in Biochemistry.

GENE 502 (3) GENETICS. A lecture series intended to acquaint graduate genetics students and those in related areas with advances in genetics and an overview of genetics in a variety of systems. The emphasis is on eukaryotic genetics. Required of students in the graduate genetic program. Prerequisite: All of BIOC 334, BIOC 335 or equivalent, and a third year course in Biochemistry.

GENE 549 (6/12) C M.SC. THESIS.

GENE 649 (0) PH.D. THESIS.

GEOG — GEOGRAPHY FACULTY OF ARTS

Students registered in the B.Sc. program in Geography may receive Arts credit for no more than two of the following courses: GEOG 290, 321, 327, 328, 329, 350, 360, 361, 362 and 363. These are the only Geography courses that will be considered as Arts electives for the B.Sc. in Geography. The following Geography courses may not be used for either Arts or Science designated credit but may be used as free electives: GEOG 210, 310, 311, 312, 315, 316, 317, 318, 319, 371, 374, 375, 410, 412, 475. The following GEOG courses have Science credit: 101, 102, 103, 200, 204, 205, 207, 270, 300, 304, 306, 307, 308, 309, 370, 372, 373, 376, 401, 402, 403, 404, 405, 406, 407, 408, 409, 444, 449, 471, 472, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509. Additional fees are charged for some courses.

GEOG 101 (6) INTRODUCTION TO PHYSICAL GEOGRAPHY. Physical principles of climate, hydrology, geomorphology and biogeography, including human-induced changes. (Consult Credit Exclusion list within the Faculty of Science section of the Calendar).

GEOG 102 (3) INTRODUCTION TO PHYSICAL GEOGRAPHY: CLIMATE AND VEGETATION. Circulations and characteristics of the atmosphere including weather and global climates; biophysical processes governing vegetation on Earth; and human impacts. (Consult Credit Exclusion list with the Faculty of Science section in the Calendar.)

GEOG 103 (3) INTRODUCTION TO PHYSICAL GEOGRAPHY: WATER AND LANDSCAPES. The rock cycle, water cycle and hydrology; landforms and geomorphology; physical processes acting on the Earth's surface; and human impacts. (Consult Credit Exclusion list with the Faculty of Science section in the Calendar.)

GEOG 121 (3) GEOGRAPHY, MODERNITY AND GLOBALIZATION I. Human geography of the modern world, c. 1750–1945, including: pre-industrial societies, global encounters and conflicts, urbanization and regional growth; global migrations, trade and communications; imperialism and anti-imperialism; environment and war.

GEOG 122 (3) GEOGRAPHY, MODERNITY AND GLOBALIZATION II. The human geography of the modern world since 1945: global interdependence in economic geography, geopolitics, and cultural geography; consequences of modernization, including demography, urbanization and environmental effects; regional case studies; reactions to modernization. May be taken separately from GEOG 121.

GEOG 200 (3) ATMOSPHERIC ENVIRONMENTS. Physical principles underlying weather and climates. Thermal, moisture and wind climates at scales from valleys to the globe. Daily weather, air pollution, global change. Credit will be given for one only of

GEOG 200 or 204 or AGRO 244. Prerequisite: One of GEOG 101, GEOG 102 or first-year science.

GEOG 204 (3) FOREST AND AGRICULTURAL CLIMATOLOGY. Basic principles and processes of climatology. Energy and water balance concepts. Weather systems and climate change, microclimate of soils, crops, forests and animals. Credit will be given for only one of GEOG 200, 204, 300, or AGRO 244. Equivalency: AGRO 244.

GEOG 205 (3) INTRODUCTION TO HYDROLOGY. Principles of hydrology at site, watershed, and larger regional scales. Introduction to techniques of measurement and analysis. Emphasizes surface water hydrology of western North America. Prerequisite: One of GEOG 101, GEOG 102. GEOG 200 is recommended.

GEOG 207 (3) INTRODUCTION TO BIOGEOGRAPHY. Geographical ecology emphasizing plant distributions, abiotic-biotic interactions, effects of disturbance, succession, and human impacts across scales. Labs and field trips examine a local site. Prerequisite: Either (a) GEOG 101 or (b) all of GEOG 102, GEOG 103.

GEOG 210 (3) VANCOUVER AND ITS REGION. An integrated approach to the physical and human geography of the Lower Mainland of British Columbia. Field trips.

GEOG 250 (3) CITIES. An interdisciplinary introduction to the city in the context of contemporary globalization. Analysis of urban patterns and processes from the theoretical perspectives of various disciplines and methodologies. Equivalency: URST 200.

GEOG 270 (3) INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS. Computer-based graphical methods of data input and analysis. Emphasis on data visualization techniques such as cartographic modelling and exploratory data analysis. Prerequisite: Not available to those who completed GEOG 370 before September 2005.

GEOG 281 (3) GEOGRAPHY OF THE PACIFIC RIM. An introduction to changing geographies (social, economic, and political) of the Pacific Rim, with special emphasis on the relationships between Canada and Japan. Equivalency: ASTU 202.

GEOG 290 (3) INTRODUCTION TO THE GEOGRAPHY OF CANADA. Selected topics in human geography focusing on the regional distribution of natural resources, population, urban systems, and economic activities.

GEOG 300 (3) MICROSCALE WEATHER AND CLIMATE. Meteorology and climatology at the micro-, local, and meso-scales. Transfers and balances of heat, mass and momentum. Microclimates on scales of a leaf to those of a large valley. Credit will only be given for one of GEOG 204 or 300 or AGRO 244. Prerequisite: One of GEOG 200, ATSC 201.

GEOG 304 (3) SYNOPTIC METEOROLOGY AND CLIMATOLOGY. Analysis of meteorological fields, diagnostic analysis of synoptic

weather systems, applications of synoptic meteorology. Requires participation in weekly weather map discussion. Prerequisite: One of GEOG 200, ATSC 201.

GEOG 306 (3) PRINCIPLES OF GEOMORPHOLOGY. Processes and principles of landform development; morphological and historical analysis of landforms at various space and time scales; applications in engineering and resource development. Credit will be given for only one of GEOG 306, GEOL 351 and its predecessor GEOL 251. Prerequisite: One of GEOG 101, GEOG 103, EOSC 110. Equivalency: EOSC 330.

GEOG 307 (3) BIOGEOGRAPHY AND GLOBAL CHANGE. Biogeographic concepts in understanding responses in ecosystems to environmental change at global, regional and local scales. Conservation issues such as the loss of biodiversity and endangered species. Prerequisite: Either (a) one of GEOG 207, BIOL 302, BIOL 303 or (b) FRST 202.

GEOG 308 (3) QUATERNARY AND APPLIED GEOMORPHOLOGY. Quaternary landscape development emphasizing the history of glaciation with special reference to western North America; applications of geomorphology in resource development and land management; interpretation of quaternary materials. Weekend field trips required. Prerequisite: One of GEOG 306, EOSC 330.

GEOG 309 (3) PHYSICAL GEOGRAPHY FIELD COURSE. Field sampling, instrumentation, surveying and mapping techniques; data analysis and report writing; 1 lecture per week during term and 2 weeks at field camp in late April; special fees required; enrolment limited. Students will be responsible for transportation to and from the field camp and for liability insurance. Prerequisite: One of GEOG 200, GEOG 204 and GEOG 205.

GEOG 310 (3) ENVIRONMENT AND RESOURCES. Concepts of environment and resource; the role of physical geography in understanding the interaction of humans and the environment; introduction to the management of environment-resource systems. Prerequisite: GEOG 101 or 6 credits from GEOG 102, 103, 210.

GEOG 311 (3) PHYSICAL ENVIRONMENT OF THE CITY. The impact of urban development on the natural environment and vice versa. Urban ecology including hydrology, landforms, soils, vegetation, and wildlife. Urban pollution. Ecology and urban design. Prerequisite: 6 credits of first and second year physical geography (may also be taken as co-requisites).

GEOG 312 (3) THE GLOBAL CLIMATE SYSTEM. Climates over the geological, historical and instrument periods. Theories of climatic change. Monitoring and modelling the climate system. Impacts of change on environmental and socio-economic systems. Prerequisite: GEOG 101.

GEOG 315 (3) ENVIRONMENTAL INVENTORY AND CLASSIFICATION. Classification and inventory of those biophysical elements which influence people's use of air,

land, and water. Prerequisite: 6 credits from GEOG 101, GEOG 102, GEOG 103, GEOG 200 or 204, GEOG 205, GEOG 207.

GEOG 316 (3) GEOGRAPHY OF NATURAL HAZARDS. The role of geophysical events, human ecology, environmental perception, world social and political order in explaining the risk of natural disasters. Assessment of acceptable risk, disaster relief and reconstruction and contrasts between developed and developing nations. Prerequisite: Either (a) GEOG 101 or (b) all of GEOG 102, GEOG 103.

GEOG 317 (3) THE PHYSICAL ENVIRONMENT OF BRITISH COLUMBIA. The biophysical processes which are shaping and have shaped British Columbia; characteristic associations between landforms, climate, soil, and vegetation; biophysical constraints on air, land and water use. Prerequisite: 6 credits from GEOG 102 (or GEOG 200 or GEOG 204), GEOG 101, GEOG 103, GEOG 205, GEOG 207.

GEOG 318 (3) ENVIRONMENTAL CHANGE AND QUALITY. The physical and human causes of environmental change at various temporal and spatial scales. The impact of such change on the interpretation and measurement of environment quality. Will alternate with GEOG 319. Prerequisite: GEOG 310.

GEOG 319 (3) ENVIRONMENTAL IMPACT ASSESSMENT. The role of environmental impact assessment within the context of environmental management. Institutional arrangements for EIA in Canada and BC will be examined through the use of evaluative criteria and critical case studies. Will alternate with GEOG 318. Prerequisite: GEOG 310.

GEOG 321 (3) HISTORICAL GEOGRAPHY OF URBANIZATION. Geographic perspectives on the growth of urban regions; pre-industrial cities, urban growth during industrialization, anti-urban reaction. Prerequisite: GEOG 121 or the former GEOG 260.

GEOG 327 (3) HISTORICAL GEOGRAPHY OF CANADA, I: CANADA BEFORE 1850. Canada from the beginning of European contact to the mid-19th century, stressing the changing geographical patterns of settlement, economy, and culture.

GEOG 328 (3) HISTORICAL GEOGRAPHY OF CANADA, II: CANADA AFTER 1850. The spread of settlement, the growth of towns, and the development of economic and cultural regions in a Canada increasingly influenced by industrialization.

GEOG 329 (3) INTRODUCTION TO POLITICAL GEOGRAPHY. The heritage of political geography; the spatial structure of political organization including regional and global structures. Prerequisite: One of GEOG 121, GEOG 122 or the former GEOG 260; also open without this prerequisite to Major and Honours students in History, International Relations or Political Science.

GEOG 331 (3) GEOGRAPHY OF HEALTH AND HEALTH CARE. Explores the geographical dimensions of contemporary population health and health services research and policy.

GEOG 345 (3) GEOGRAPHIC THOUGHT AND PRACTICE. Major intellectual traditions of human and physical geography. Geographers and geography in society.

GEOG 350 (3) INTRODUCTION TO URBAN GEOGRAPHY. City systems and theories of urban location; internal spatial structure of the city; commercial and industrial location; social areas; neighbourhood and land use change; urban trends and public policy. Prerequisite: One of GEOG 121, GEOG 122, URST 200 or the former GEOG 260.

GEOG 352 (3) URBANIZATION IN THE GLOBAL SOUTH. Urbanization in the developing countries of Latin America, Africa, and Asia; the role of cities in the development process and the features and problems of rapid urbanization.

GEOG 353 (3) GEOGRAPHIES OF MIGRATION AND SETTLEMENT. International regimes regulating migration, changes in global demographics, immigration policies of nation states, international migration patterns, settlement policies and outcomes.

GEOG 357 (3) INTRODUCTION TO SOCIAL AND BEHAVIOURAL GEOGRAPHY. The development of social and behavioural geography; focus on such topics as environmental perception and microgeography, approached from institutional and interactionist perspectives. Prerequisite: One of GEOG 121, GEOG 122.

GEOG 360 (3) GEOGRAPHY OF RETAIL, WHOLESALE, AND SERVICE ACTIVITIES. Contemporary patterns of economic activity. The geographical and policy factors which shape them. Introduction to spatial analysis of consumer demand and industrial organization and policy. Focus on such topics as the location of shopping centres and office complexes. Prerequisite: GEOG 122 or the former GEOG 260.

GEOG 361 (3) INTRODUCTION TO ECONOMIC GEOGRAPHY. History and methods of economic geography. Location of resource industries, manufacturing, and service activities with emphasis on British Columbia in its North American and world setting. Recommended for students with no previous exposure to Economic Geography, before taking other courses in the 36x and 46x series. Prerequisite: GEOG 122.

GEOG 362 (3) GEOGRAPHY OF ECONOMIC DEVELOPMENT. Geographical approaches to economic development; models of economic development and spatial change; influences on spatial economic change; case studies from the developed, third, and socialist worlds. Prerequisite: Either (a) GEOG 122 or (b) GEOG 260.

GEOG 363 (3) THE GEOGRAPHY OF RESOURCE INDUSTRIES. Geographical analysis of selected resource industries of importance to Canada. Each year a selection will be made from the agriculture, forestry, fishing, mining, energy, and recreation sectors which will be dealt with in international and national contexts. Prerequisite: Either (a) GEOG 122 or (b) GEOG 260.

GEOG 371 (3) RESEARCH STRATEGIES IN HUMAN GEOGRAPHY. Formulating a research problem and selecting an appropriate research strategy. Research strategies range from social scientific survey methods to ethnography. Priority enrollment for Honours and Major students in Geography.

GEOG 372 (3) CARTOGRAPHY. Cartographic methods: development of cartography; projections; data ordering, compilation and symbolization; cartographic design, map reproduction. Prerequisite: 6 credits from GEOG 101, GEOG 102, GEOG 103, GEOG 200 or GEOG 204, GEOG 205, GEOG 207.

GEOG 373 (3) INTRODUCTORY REMOTE SENSING. Aerial photography; measurement from aerial photographs; photo-interpretation in geographic analysis; remote sensing of the earth's surface and atmosphere. Prerequisite: GEOG 270. Or third year standing in a Geography B.Sc. degree program.

GEOG 374 (3) STATISTICS IN GEOGRAPHY I. Introduction to statistical techniques and their application to geographical problems. Priority enrollment for Honours and Major students in Geography.

GEOG 376 (3) ADVANCED GEOGRAPHIC INFORMATION SYSTEMS. Theoretical and practical aspects of Geographic Information Systems, including cartographic modelling, digital terrain models, management issues and spatial interpolation. Prerequisite: Not available to those who completed GEOG 470 before September 2005. Prerequisite: GEOG 270 or completed second year of Geography B.Sc. with some introductory knowledge of GIS.

GEOG 379 (3/6) D FIELD COURSE IN HUMAN GEOGRAPHY. As announced by the department a year in advance. Prerequisite: The relevant core course(s).

GEOG 380 (3) INTRODUCTION TO THE GEOGRAPHY OF ASIA. A comparative regional analysis stressing the historical development and changing cultural, economic, and political patterns of the area. Special reference to India, Indonesia, China, and Japan.

GEOG 390 (3/6) D GEOGRAPHY OF SELECTED REGIONS. A geographical analysis of selected regions not regularly included in the Department's offerings in regional geography (e.g., tropical Africa, Oceania). Students should consult the Department regarding regions to be covered.

GEOG 391 (3) GEOGRAPHY OF EUROPE. An introductory survey, focusing on the origins of the present-day human geography of the area between the Atlantic and the Ural Mountains.

GEOG 395 (3) INTRODUCTION TO THE GEOGRAPHY OF THE AMERICAS. Physical environment, demographic and cultural patterns, trends in settlement and resource use. Frequent interamerican comparisons, especially along critical contact zones and regarding implications of liberalized relations.

GEOG 401 (3) URBAN METEOROLOGY. The impact of urbanization upon atmospheric processes and climates. The energy and water

balances of cities. Meteorological effects (urban heat island, precipitation modification, etc) and their significance. Models of the urban atmosphere. Prerequisite: One of GEOG 204, GEOG 300, AGRO 244.

GEOG 402 (3) AIR POLLUTION

METEOROLOGY. The nature of atmospheric pollutants. The ability of the atmosphere to disperse, transform and remove pollutants. Air pollution dispersion models. Air quality monitoring, criteria and standards. Prerequisite: GEOG 300.

GEOG 403 (3) CATCHMENT HYDROLOGY.

Hydrometeorology ; runoff processes; stream-water chemistry in relation to runoff processes; effects of climate variations and land cover change on streamflow regimes; models of catchment hydrology. Prerequisite: One of GEOG 200, GEOG 204 and one of GEOG 205, FRST 385 and one of STAT 200, FRST 231, BIOL 300.

GEOG 404 (3) NATURAL HAZARDS

ANALYSIS. Description, analytical methods, case histories and environmental aspects of natural hazard mitigation. Extreme event statistics, mountain slope hazards, flooding, earthquake, risk mapping and decisions, zoning, vulnerability analysis. Field trip required. Open to fourth-year students only.

GEOG 405 (3) FLUVIAL GEOMORPHOLOGY.

Introduction to open channel flow and sediment transport. River morphology and channel types. Palaeohydrology. The development of channel networks. Prerequisite: GEOG 306.

GEOG 406 (3) HILLSLOPE GEOMORPH.

Hillslope processes and their rates of operation. Spectrum of geomorphic events on slopes and phenomena resulting from instability on soil and snow slopes. Slope evolution over long periods. Prerequisite: GEOG 306.

GEOG 407 (3) VEGETATION DYNAMICS: DISTURBANCE, CLIMATE AND HUMAN IMPACTS.

Investigation of vegetation dynamics integrating theory and research to address contemporary issues of global environmental change. Students will conduct fieldwork and learn to analyze data and interpret results. Prerequisite: Either (a) one of GEOG 207, BIOL 302 or (b) one of BIOL 303, FRST 201.

GEOG 408 (3) SNOW AND ICE PROCESSES.

Formation of snow and ice masses and their evolution including snowpacks, glaciers and sea ice. Relationships between snow, ice and climate including avalanche forecasting. Weekend field trips. Prerequisite: All of GEOG 205, PHYS 101.

GEOG 410 (3) ENVIRONMENT AND SOCIETY.

Geographical analysis of society-environment relations. Relates resource management to environmental politics, political economy, and sustainable development. Perspectives drawn from social and natural sciences. Prerequisite: GEOG 310.

GEOG 411 (3) ENVIRONMENT AND EMPIRE.

Environmental changes since 1500, as a consequence of cultural contact, 'ecological

revolutions,' colonial settlement, resource development and biophysical processes. Perspectives drawn from geography, environmental history and ecological sciences. Prerequisite: Third or fourth year standing and 6 credits of first and second year physical geography (may be taken as corequisites).

GEOG 412 (3) WATER MANAGEMENT: THEORY, POLICY, AND PRACTICE.

Prerequisite: GEOG 310.

GEOG 422 (3) MODES OF SUBSISTENCE. The nature of subsistence systems antedating or alternative to modern commercial systems.

Introductory survey with basic readings; focus on problems such as the development of complex cultures without agriculture, the ambiguity of hunting and gathering, agricultural and other "intensification," "orchestration" of the use of adjacent microenvironments. Of interest to students of archaeology, anthropology and cultural geography. Same as ANTH 422. Equivalency: ANTH 422.

GEOG 423 (3) DEVELOPMENT OF ENVIRONMENTAL THOUGHT. An examination of attitudes that have influenced land use and environmental change in the past and present. Prerequisite: GEOG 310.

GEOG 424 (3) FEMINIST GEOGRAPHIES. An introductory survey of contemporary feminist approaches to human geography.

GEOG 425 (3) HISTORICAL GEOGRAPHY OF CHINA. China from the Neolithic, stressing the beginnings and changing geographical patterns of various technologies and economies, institutions, and cultures. Normally alternates with GEOG 485.

GEOG 426 (3) HISTORICAL GEOGRAPHY OF BRITISH COLUMBIA, I. Colonialism, resistance, and land use in early British Columbia. Prerequisite: GEOG 327 and GEOG 328 are recommended.

GEOG 428 (3) HISTORICAL GEOGRAPHY OF BRITISH COLUMBIA, II: RESEARCH SEMINAR. Approaches to research in historical geography. Field trip: participation recommended but not required. This course is not open to students who have taken GEOG 427. Limited enrolment for non-Geography majors. Prerequisite: GEOG 426 and one of GEOG 321, GEOG 327, GEOG 328, GEOG 445, HIST 404, ANTH 304, ANTH 332, HIST 400.

GEOG 440 (3) POWER, KNOWLEDGE AND HUMAN GEOGRAPHY. Geography as discourse; power, modernity and the production of space; imaginative geographies and the representation of space. Prerequisite: GEOG 345.

GEOG 444 (3/4) C DIRECTED STUDIES IN PHYSICAL GEOGRAPHY. For fourth-year students in Geography to permit investigation of a topic to be agreed upon by a member of the faculty and the student. Permission of the department head and of a supervisory faculty member is required. Credit will be given for only one of GEOG 444 and 448.

GEOG 446 (3) TOPICS IN GEOGRAPHY. See the departmental undergraduate adviser for details.

GEOG 447 (3) DIRECTED STUDIES: OFF CAMPUS RESEARCH. Based on project work outside the university. Not available to co-op students. See the departmental undergraduate adviser for details. Prerequisite: Permission of the department head and at least 15 credits of relevant 300- or 400- level Geography courses.

GEOG 448 (3) DIRECTED STUDIES IN GEOGRAPHY. For fourth-year students in Geography to permit investigation of a topic to be agreed upon by a member of the faculty and the student. Prerequisite: Permission of the department head and supervising faculty member is required. Equivalency: GEOG 444.

GEOG 449 (3/6) D HONOURS ESSAY. Carries 6 Science credits for students in the Faculty of Science, except for Honours Climatology students, who will receive only three Science credits.

GEOG 450 (3) URBAN ANALYSIS.

Geographic analysis of selected problems of the internal structure of cities and urban systems. Prerequisite: GEOG 350 or permission of the instructor.

GEOG 453 (3) POLITICAL GEOGRAPHIC ANALYSIS. Analysis of the political organization of space at selected geographic scales (international to urban); development of political policy, organization, and behaviour, and their locational consequences; decision making and conflict resolution. Prerequisite: One of GEOG 329, GEOG 350.

GEOG 456 (3) FILM AND THE CITY. The complex interrelations between film and the city; dominant urban theories, film technologies and viewing practices and the intersections between them. Equivalency: FINA 445, ARTH 445.

GEOG 457 (3) SOCIAL AND BEHAVIOURAL GEOGRAPHY. Traditions in social geography; the French school; the concept of place; social space; class, caste, and spatial behaviour; urban perception; controlling urban space; territorial groups; urban behaviour settings; decision-making worlds in the city; urban microstudies in North America and Europe; the meaning of the city. Prerequisite: One of GEOG 350, GEOG 357.

GEOG 460 (3) GEOGRAPHY OF MANUFACTURING. Industrial location theory; factors in the location of the firm; manufacturing and regional development. Case studies. Field trip. Prerequisite: GEOG 361 or the former GEOG 260.

GEOG 464 (3) SPATIAL INTERACTION. The concepts of distance and accessibility; theories relating to diffusion, commodity flow, and human travel behaviour, and their application to economic activity analysis. Prerequisite: One of GEOG 350, GEOG 361.

GEOG 468 (3) GEOGRAPHY OF INTERNATIONAL ECONOMIC SYSTEMS: CANADA AND THE PACIFIC BASIN. An introduction to the study of international economic systems illustrated by the study of Canada's relations with the countries located in the Pacific Basin. Normally alternates with GEOG 481.

GEOG 471 (3) APPLIED CONCEPTS IN GEOGRAPHIC INFORMATION SYSTEMS. Applications in conservation biology, crime analysis, and health geography; theoretical and practical aspects considered in a hands-on environment. Prerequisite: GEOG 376.

GEOG 472 (3) ADVANCED CARTOGRAPHY. Seminar course to discuss a wide range of contemporary topics in cognitive, social and technical cartography and data visualization. Includes reading assignments, discussions and computer mapping projects. Prerequisite: One of GEOG 270, GEOG 372 or permission of instructor.

GEOG 475 (3) SPATIAL DATA ANALYSIS. Introduction to computer programming and techniques for managing, analyzing, and mapping spatial data; complemented by assignments using package computer programs and GIS. Prerequisite: GEOG 270 or completed second year of a Geography B.Sc. with some introductory knowledge of GIS.

GEOG 481 (3) GEOGRAPHY OF JAPAN. A critical analysis of significant human adaptations to changing ecological conditions in the Japanese archipelago. Normally alternates with GEOG 468. Prerequisite: GEOG 380 is recommended.

GEOG 484 (3) GEOGRAPHY OF SOUTHEAST ASIA. A critical analysis of significant features of political, economic, and cultural development in the region from pre-colonial times to the present. Prerequisite: GEOG 380 is recommended.

GEOG 485 (3) GEOGRAPHY OF CHINA. An introduction to the changing cultural, social and economic geography of China. Normally alternates with GEOG 425. Prerequisite: GEOG 380 is recommended.

GEOG 493 (3) GEOGRAPHIES OF POST COLD WAR EUROPE. Political, economic, and social geographies of post Cold War Europe with a special emphasis on east-central Europe: societal transformations in the formerly socialist states; European Union and NATO enlargement; the external relations of these two organizations. Prerequisite: GEOG 391 is recommended.

GEOG 494 (3) GEOGRAPHY OF THE EX-SOVIET STATES. Soviet policies for economic and social development: their regional impact and their legacy for the ex-Soviet states. Current regional development problems in the ex-Soviet realm. Topics and regions examined vary from year to year. Normally alternates with GEOG 493. Prerequisite: GEOG 391.

GEOG 495 (3) CHANGING LATIN AMERICAN LANDSCAPES. Contemporary environmental issues in Latin America, including differing forms of environmental degradation and

proposed solutions such as protected area conservation. Prerequisite: GEOG 395 is recommended.

GEOG 496 (3) GEOGRAPHY OF AFRICA. A critical introduction to social, political and economic geographies of Africa from pre-colonial times to the present, with a focus on contemporary environmental and development issues. Prerequisite: One of GEOG 329, GEOG 350. GEOG 362 recommended.

GEOG 497 (3) ARCTIC GEOGRAPHY. Physical and biological characteristics of the circumpolar Arctic, emphasizing terrestrial environments and the impacts on and by humans, including: glacial history; climatology; biogeography/ecology of arctic tundra; human-environment interactions, settlement and exploration; and current environmental, social and economic problems.

GEOG 499 (3) ECONOMIC AND SOCIAL GEOGRAPHY OF CANADA. An examination of the political economy of regionalism in Canada. Geographical attributes of selected contemporary issues. Open to fourth-year students only. Prerequisite: GEOG 290 and one of GEOG 327, GEOG 328.

GEOG 500 (3) CONTEMPORARY RESEARCH TRENDS IN PHYSICAL GEOGRAPHY. Contemporary research trends in physical geography. Description and identification of environmental systems. Appropriate measurement and sampling designs in physical geography. Students from outside Geography and Atmospheric Science require the permission of the Head of the department.

GEOG 501 (3) PROCESSES IN GEOMORPHOLOGY. Theoretical and empirical analyses of the major processes of landscape evolution with particular emphasis on fluvial and glacial processes and mass movement.

GEOG 503 (3) TOPICS IN GEOMORPHOLOGY AND HYDROLOGY. Experimental methods and scale problems in geomorphology and hydrology; runoff and sediment and solute source analysis; watershed mass balance and management. Topics chosen to fit student needs in any given year.

GEOG 504 (3) TOPICS IN CLIMATOLOGY. An introduction to the historical context, theory, and methods associated with current research topics in climatology. Topics chosen to fit the needs of the students in any given year.

GEOG 505 (3) PERMAFROST. Occurrence and characteristics of frozen ground, with particular reference to ground ice. Climatic and other environmental determinants of geocryological phenomena. Theory of ground ice formation. Patterned ground.

GEOG 506 (3) TREE-RING RESEARCH: THEORY AND APPLICATION.

GEOG 507 (3-6) C DIRECTED STUDIES IN PHYSICAL GEOGRAPHY.

GEOG 508 (3/6) D ADVANCED SEMINAR IN GEOMORPHOLOGY.

GEOG 509 (3/6) D ADVANCED SEMINAR IN CLIMATOLOGY.

GEOG 512 (3) CLIMATE CHANGE IN THE 21ST CENTURY. Historical, methodological, and policy dimensions of climate change in the 21st century. Application of natural and social science literature to climate science, impacts on ecosystems and societies, and response options. Equivalency: RMES 520.

GEOG 514 (3) TOPICS IN ENVIRONMENTAL GEOGRAPHY. Prerequisite: GEOG 520.

GEOG 515 (3) SATELLITE REMOTE SENSING APPLICATIONS TO OCEANOGRAPHY AND METEOROLOGY. A review of the many satellite-sensed data products used in both research and operational aspects of oceanography and meteorology. Equivalency: EOSC 582.

GEOG 517 (3) ENVIRONMENTAL SUSTAINABILITY. Environmental sustainability is examined through conceptual literature and empirical examples. Emphasis on resources and livelihoods in the South and North. Case studies are used to discuss sustainable development, and the distribution of costs and benefits associated with resources allocation, with perspectives drawn from political ecology and economy, environmental history and philosophy.

GEOG 519 (3) ENVIRONMENT, DEVELOPMENT AND SECURITY. Analysis of environment-development-security linkages in relation to livelihoods and conflicts in poor countries, with a focus on Africa.

GEOG 520 (3) THEMES AND INTERPRETIVE ISSUES IN MODERN HUMAN GEOGRAPHY. Themes and interpretive issues in modern human geography. Students from outside Geography require the permission of the Head of the department.

GEOG 521 (3) PHILOSOPHY, SOCIAL THEORY, AND HUMAN GEOGRAPHY.

GEOG 522 (3) FEMINISM AND GEOGRAPHY. Feminist critiques of the discipline of geography and feminist reconstructions of geography.

GEOG 523 (3/6) ADVANCED SEMINAR IN HUMAN GEOGRAPHY.

GEOG 524 (3/6) D CULTURAL GEOGRAPHY.

GEOG 525 (3) CULTURES OF NATURE IN CONTEMPORARY POLITICAL ECOLOGIES.

GEOG 527 (3) REMAKING NORTH AMERICA: HISTORICAL GEOGRAPHIES OF CHANGING ENVIRONMENTS.

GEOG 528 (3) SOCIETY AND ENVIRONMENT IN BRITISH COLUMBIA.

GEOG 533 (3) POLITICAL GEOGRAPHY.

Investigate how politics is bound with territorial definition. Examine how the management of political issues is intertwined with the ways in which these issues are understood in geographical and territorial terms.

GEOG 545 (3/6) D TOPICS IN HUMAN GEOGRAPHY.

GEOG 547 (3/6) D DIRECTED READING IN HUMAN GEOGRAPHY.

GEOG 548 (0) MAJOR ESSAY.

GEOG 551 (3) URBAN SOCIAL GEOGRAPHY.

GEOG 552 (3) URBAN SYSTEMS IN DEVELOPED COUNTRIES.

GEOG 553 (3) URBANIZATION IN DEVELOPING COUNTRIES.

GEOG 554 (3) HISTORICAL URBAN GEOGRAPHY.

GEOG 560 (3/6) D ECONOMIC GEOGRAPHY.

GEOG 570 (3) ADVANCED GEOGRAPHIC INFORMATION SYSTEMS.

GEOG 572 (3/6) D SPATIAL AND CARTOGRAPHIC TECHNIQUES.

GEOG 599 (15) MASTER'S THESIS.

GEOG 699 (0) PH.D. THESIS.

GERM — GERMAN FACULTY OF ARTS

GERM 100 (3) BEGINNERS' GERMAN I.

Introduction to the language. Ability to communicate accurately in a variety of everyday situations. See also GERM 433.

GERM 110 (3) BEGINNERS' GERMAN II.

Introduction to the language. Ability to communicate accurately in a variety of everyday situations, speak about past events and express ideas and hypotheses in German. See also GERM 433. Prerequisite: GERM 100.

GERM 200 (3) INTERMEDIATE GERMAN I.

Competence and fluency in everyday situations; ability to report and narrate past events fluently and to express opinions; familiarity with contemporary issues in the German-speaking societies. Prerequisite: Either (a) GERM 110 or (b) GERM 12.

GERM 210 (3) INTERMEDIATE GERMAN II.

Competence and fluency in everyday situations; ability to report and narrate past events fluently and to express opinions; familiarity with contemporary issues in the German-speaking societies; introduction to German for professional purposes. Prerequisite: GERM 200.

GERM 213 (3) REFRESHER I. Grammar-based course for students with previous untutored exposure to German and students with a first-year knowledge in need of grammar review.

GERM 300 (3) INTERMEDIATE GERMAN III.

Fluency in many relevant situations; competence in the most important areas of cultural life; familiarity with study resources and study skills. Review and expansion of grammar; fostering of speaking and writing skills. Prerequisite: GERM 210.

GERM 301 (3) TWENTIETH-CENTURY GERMAN LITERATURE (IN ENGLISH).

Reading and discussion of selected works against the background of literary, social, and political developments in twentieth-century Germany with special emphasis on plays and novels dealing with the First World War and Nazism.

GERM 302 (3) CONTEMPORARY GERMAN LITERATURE (IN ENGLISH). Reading and discussion of selected literary works from West, East, and the United Germany, as well as from Austria and Switzerland.

GERM 310 (3) INTERMEDIATE GERMAN IV. Fostering of the ability to discuss controversial issues, express ideas clearly in writing and write essays on selected topics in German. Ongoing grammar review and expansion. Prerequisite: GERM 300.

GERM 313 (3) CONVERSATIONAL

GERMAN II. Emphasis on the study of oral communication skills and strategies. Fluency in many situations, communicative competence in important areas of cultural life, ability to participate in discussions of current as well as controversial issues to express ideas clearly in spoken word. Prerequisite: GERM 210 or equivalent.

GERM 314 (3) BUSINESS GERMAN. Review of the most important grammatical patterns in application to business geography, import-export trade, marketing, finance, accounting, taxation, workplace conditions and requirements; oral and written forms of presentation for work with German business. Prerequisite: GERM 210.

GERM 319 (3) CANADIAN GERMAN CULTURAL DIALOGUES. Analysis of intercultural theory; examination of Canadian and German print and video materials. Includes direct audio/visual intercultural online discussion with German-speaking students at the University of Kiel. Prerequisite: GERM 210.

GERM 339 (3/6) D THIRD-YEAR HONOURS TUTORIAL.

GERM 360 (3) HEAVEN AND EARTH: STUDIES IN GERMAN CULTURE AND LITERATURE BEFORE 1700. Masterpieces and major trends of the German literature of the Middle Ages, Renaissance and Baroque against the larger background of the political and social developments of the period.

GERM 370 (3) REASON AND REVOLUTION: STUDIES IN THE 18TH CENTURY. Masterpieces and major trends of eighteenth-century German literature against the larger background of the political and social developments of the period.

GERM 380 (3) TRADITION AND CHANGE: STUDIES IN THE 19TH CENTURY. Masterpieces and major trends of nineteenth-century German literature against the larger background of the political and social developments of the period.

GERM 390 (3) PROGRESS AND DISASTER: STUDIES IN THE 20TH AND 21ST CENTURIES. Masterpieces and major trends of 20th and 21st-century German literature against the larger background of the political and social developments of the period.

GERM 400 (3) ADVANCED GERMAN I. Near-native competence and thorough understanding of critical contemporary topics in a limited number of areas fostering study skills. All skills will be fostered but the course focuses on

accurate writing and conversation in particular. Prerequisite: GERM 310.

GERM 401 (3) THE CULT OF THE HERO AND ITS PARODY IN GERMAN LITERATURE. The glorification and satirization of heroes and heroism in a variety of genres and periods. Works and authors to be studied might include Nibelungenlied, Faust, Gryphius, Kleist, Fontane, Brecht, Remarque.

GERM 402 (3) WORDS AND MUSIC IN GERMAN LITERATURE. Study of individual works and of genres in which words and music have achieved symbiosis. Emphasis will be on the words, but the works as a whole will also be studied. Possible works and authors or composers: Lutheran hymn, Volkslied, Bach cantata, Romantic Lied, Zauberflöte, Richard Strauss, Brecht songs. The scope may be expanded to include music and the musician as a subject in literature.

GERM 403 (3/6) D STUDIES IN MODERN GERMAN CULTURE (IN ENGLISH). Topics of special interest, varying from year to year.

GERM 405 (3) THE LITERATURE OF GROWING SOCIAL CONSCIOUSNESS. Concentrates on the late 18th to the early 20th century. This course traces the reflections in German literature of changes in social, political, cultural and gender concepts. Readings are drawn from a variety of genres.

GERM 406 (3/6) D SELECTED TOPICS IN GERMAN LITERATURE. A study in depth of one topic of special interest, varying from year to year depending on interests of faculty and students. Possible topics: literature and film, the image of the outside world in German literature, individualism and conformism.

GERM 407 (3) THE GERMAN LYRIC FROM GOETHE TO THE PRESENT. Reading and discussion of selected texts against their cultural, social and political background.

GERM 408 (3) SELECTED ISSUES IN GERMAN CULTURE. In depth study of one topic from German cultural history, varying from year to year. Possible topics: Germany of the New Europe; Gender and nation in German culture; topics from theory, such as the Frankfurt School.

GERM 410 (3) ADVANCED GERMAN II. Development of capabilities to deal with a variety of authentic texts from and about Germany, Austria and Switzerland; fostering of communicative skills, cross-cultural analysis and critical thinking; effective and accurate communication in both spoken and written German. Prerequisite: GERM 400.

GERM 414 (3) BUSINESS GERMAN. Review of the most important grammatical patterns in application to business geography, import-export trade, marketing, finance, accounting, taxation, workplace conditions and requirements; oral and written forms of presentation for work with German business. Formerly GERM 314. Prerequisite: GERM 300 or equivalent.

GERM 420 (3) ADVANCED GERMAN III. Near-native competence and an advanced and transferable understanding of contemporary issues. Prerequisite: GERM 420.

GERM 430 (3) ADVANCED GERMAN IV. Near-native competence and an advanced and transferable understanding of contemporary issues, intercultural comparisons and analyses in a variety of fields using German as the focus and means of communication. Prerequisite: GERM 400.

GERM 433 (3) GERMAN FOR READING KNOWLEDGE I. A multimedia introduction to reading skills in German leading to a second year reading knowledge in just one term. Students are expected to work largely independently. Course restricted to beginners or to students with no more than one term of beginner's German (or equivalent).

GERM 434 (3) GERMAN FOR READING KNOWLEDGE II (LANGUAGES FOR SPECIAL PURPOSES). Multimedia teaching of reading skills in German for special purposes. Students are expected to work largely independently. Focuses on specific topics of the student's choice in the humanities, the natural sciences, economics/business and music and enhances skills in technical reading. Prerequisite: GERM 433 or no more than one year of beginner's German.

GERM 439 (3/6) D FOURTH-YEAR HONOURS SEMINAR.

GERM 449 (6) HONOURS ESSAY.

GERM 500 (3/6) D RESEARCH METHODS.

GERM 501 (3/6) C CRITICAL APPROACHES TO LITERATURE.

GERM 502 (3/6) D HISTORY OF THE GERMAN LANGUAGE.

GERM 503 (3/6) D INTRODUCTION TO MIDDLE HIGH GERMAN.

GERM 505 (3) THE ACQUISITION OF GERMAN AS A FOREIGN LANGUAGE. Foundations, methods, and findings of second-language acquisition research in the field of German as a foreign language Taught in German. An introductory 6-credit course in linguistics is recommended as preparation for this course.

GERM 506 (3/6) D INTERCULTURAL COMPETENCE AND SECOND LANGUAGE ACQUISITION.

GERM 511 (3/6) D STUDIES IN MEDIEVAL LITERATURE.

GERM 512 (3/6) D STUDIES IN RENAISSANCE LITERATURE.

GERM 513 (3/6) D STUDIES IN BAROQUE LITERATURE.

GERM 514 (3/6) D STUDIES IN THE LITERATURE OF THE 18TH CENTURY.

GERM 515 (3/6) D STUDIES IN THE CLASSICAL PERIOD.

GERM 516 (3/6) D STUDIES IN ROMANTICISM.

GERM 517 (3/6) D STUDIES IN THE LITERATURE OF THE 19TH CENTURY.

GERM 518 (3/6) D STUDIES IN EXPRESSIONISM.

GERM 519 (3/6) D STUDIES IN THE LITERATURE OF THE EARLY 20TH CENTURY.

GERM 520 (3/6) D STUDIES IN LITERATURE AFTER 1945.

GERM 531 (3/6) D SPECIAL TOPICS.

GERM 532 (3/6) D GENRE STUDIES.

GERM 533 (3/6) D STUDIES IN INDIVIDUAL AUTHORS.

GERM 534 (3/6) D STUDIES IN AUSTRIAN LITERATURE.

GERM 547 (3/6) C GUIDED RESEARCH.

GERM 548 (3) MAJOR ESSAY.

GERM 549 (9) MASTER'S THESIS.

GERM 649 (0) PH.D. THESIS.

GREK — GREEK FACULTY OF ARTS

Not all courses are offered every year. For current listings, consult the departmental website at: www.cnrs.ubc.ca.

GREK 100 (6) FIRST-YEAR CLASSICAL AND HELLENISTIC GREEK.

GREK 200 (6) SECOND-YEAR CLASSICAL GREEK. Prerequisite: GREK 100.

GREK 301 (6) GREEK LITERATURE OF THE CLASSICAL PERIOD. Readings in the major authors in prose and verse. Prerequisite: GREK 200.

GREK 325 (6) HELLENISTIC GREEK. Prerequisite: GREK 100.

GREK 401 (3–12) C GREEK PROSE. Studies in history, philosophy and/or oratory. Corequisite: GREK 301.

GREK 402 (3–12) C GREEK VERSE. Studies in epic, tragedy and/or comedy. Corequisite: GREK 301.

GREK 501 (3/6) C GREEK PROSE. History, philosophy and/or oratory. Credit will not be given for both GREK 401 and GREK 501.

GREK 502 (3/6) C GREEK VERSE. Epic, tragedy and/or comedy. Credit will not be given for both GREK 402 and GREK 502.

GREK 521 (3/6) C STUDIES IN GREEK LITERATURE.

GREK 525 (3/6) D SEMINAR IN GREEK LITERATURE.

GREK 530 (3/6) D SEMINAR IN GREEK ARCHAEOLOGY.

GREK 535 (3/6) D SEMINAR IN GREEK HISTORY.

GREK 540 (3/6) D SEMINAR IN GREEK PALAEOGRAPHY.

GREK 545 (3/6) D SEMINAR IN GREEK EPIGRAPHY.

GREK 548 (0) MAJOR ESSAY.

GREK 549 (6/12) C MASTER'S THESIS.

GREK 550 (3/6) C DIRECTED STUDIES.

GREK 649 (0) PH.D. THESIS.

GRS — GLOBAL RESOURCE SYSTEMS FACULTY OF LAND AND FOOD SYSTEMS

GRS 290 (2) GLOBAL ISSUES IN CULTURAL CONTEXT. Students interact face-to-face and on-line as a community of learners to discuss global issues in agriculture, food, and natural resources in cultural context. Typically taken prior to studying abroad. Prerequisite: Open only to students in the B.Sc. (GRS) program. [0-0-2; 0-0-2]

GRS 390 (2) GLOBAL ISSUES IN CULTURAL CONTEXT. Students interact face-to-face and on-line as a community of learners to discuss global issues in agriculture, food, and natural resources in cultural context. Typically taken while studying abroad. Prerequisite: GRS 290. [0-0-2; 0-0-2]

GRS 397 (2–6) C REGIONAL DIRECTED FIELD STUDIES. Participating students may be assessed a fee.

GRS 490 (2) GLOBAL ISSUES IN CULTURAL CONTEXT. Students interact face-to-face and on-line as a community of learners to discuss global issues in agriculture, food, and natural resources in cultural context. Typically taken after studying abroad. Prerequisite: GRS 390. [0-0-2; 0-0-2]

GRS 497 (2–6) C REGIONAL DIRECTED FIELD STUDIES. Participating students may be assessed a fee. Prerequisite: GRS 397.

HCEC — HEALTH CARE AND EPIDEMIOLOGY AND COMMERCE FACULTY OF MEDICINE

HCEC 501 (1.5) BASIC FINANCE. Fundamental concepts of asset pricing and corporate finance.

HCEC 502 (1.5) MANAGERIAL ACCOUNTING. Development and use of accounting information for management planning and control, and the development of cost information for financial reports.

HCEC 503 (1.5) FINANCIAL REPORTING. Preparation of external financial reports.

HCEC 510 (1.5) CANADIAN HEALTH POLICY AND THE HEALTHCARE SYSTEM. Analysis of topical Canadian health policy issues including an historical overview of the health care system, health care funding, public / private financing, health care personnel and pharmaceutical policy challenges.

HCEC 511 (1.5) GOVERNMENT, BUSINESS AND HEALTH CARE POLICY.

HCEC 521 (1.5) ORGANIZATIONAL BEHAVIOR. The effects of individual and group behaviour on organizational processes and outcomes. The organization as an actor

and how it behaves in different types of environments.

HCEC 521 (1.5) ORGANIZATIONAL BEHAVIOUR. The effects of individual and group behaviour on organizational processes and outcomes. The organization as an actor and how it behaves in different types of environments.

HCEC 522 (1.5) STRATEGIC HUMAN RESOURCES MANAGEMENT. Aligning the management of human resources with organizational strategy.

HCEC 530 (1.5) MANAGERIAL ECONOMICS. Analysis of an organization's economic environment, the constraints this environment places on the organization's pursuit of its goals and how these constraints may change with time. Application of economic reasoning to internal decision making.

HCEC 531 (1.5) ECONOMIC EVALUATION. Maximizing health benefits from health care budgets.

HCEC 532 (1.5) HEALTH ECONOMICS. Economic strengths and weaknesses of current arrangements, and the prospects and objectives of various proposals for reform.

HCEC 542 (1.5) OPERATIONS AND LOGISTICS. The application of management tools and principles to production and allocation problems.

HCEC 543 (1.5) INFORMATION TECHNOLOGY FOR MANAGEMENT. A general introduction to the role of IT in management, how IT has changed the nature of the modern business world, how IT can be used to achieve strategic advantages, how IT can improve one's own effectiveness as a manager.

HCEC 544 (1.5) HEALTH INFORMATION SYSTEMS. Information systems in planning and management of health care services provided through single-purpose units, comprehensive clinics and hospitals. Emphasis on computerized systems.

HCEC 551 (1.5) DESIGN AND MEASUREMENT 1. Basic concepts and methods in Epidemiology.

HCEC 552 (1.5) DESIGN AND MEASUREMENT 2. Clinical Epidemiology, trials and the evaluation of diagnostic tools and therapeutic interventions.

HCEC 553 (1.5) PROGRAM PLANNING AND EVALUATION. Basic concepts and principles underlying program planning and evaluation in health services.

HCEC 554 (1.5) APPLICATION OF STATISTICS IN MANAGEMENT. Data analysis and statistical inference. Applications in assessment of the legitimacy and significance of reports.

HCEC 555 (1.5) BIOSTATISTICS. Data collection, numeric and graphic summarization, and elementary statistical analysis. Examples primarily from health sciences.

HCEC 556 (1.5) SOCIAL DETERMINANTS OF HEALTH. Health planning and delivery models based on population health frameworks.

HCEC 557 (1.5) QUALITY OF HEALTH CARE. Current concepts, methods, and applications in health care quality assessment and improvement.

HCEC 561 (1.5) STRATEGIC MANAGEMENT. An integrative perspective on managing an organization.

HCEC 562 (1.5) HEALTH CARE LAW.

HCEC 563 (1.5) ETHICS AND ETHICAL DECISION MAKING IN HEALTH CARE.

HCEC 564 (1.5) LEADERSHIP AND MANAGEMENT SKILLS. Personal assessment, team building, interpersonal skills and leadership development. Same as BAHR 505, credit will not be given for both.

HCEC 580 (1.5) SELECTED TOPICS. Current and emerging trends and issues.

HCEC 581 (1.5-3) D DIRECTED STUDIES. Opportunity to focus on a selected topic under faculty supervision.

HCEC 590 (1.5-6) D RESEARCH PROJECT. Completion of a bounded project within a health agency and under individual faculty supervision.

HCEP — HEALTH CARE AND EPIDEMIOLOGY FACULTY OF MEDICINE

HCEP 400 (3) STATISTICS FOR HEALTH RESEARCH. Planned collection, numeric and graphic summarization, and elementary statistical analysis of data. Examples primarily from health sciences illustrate standard techniques for parametric and non-parametric hypothesis testing; regression and correlation; contingency tables. Also randomization, "blindfolding" and other specifically biomedical topics in statistics. Class size may be limited. Prerequisite: Ability to use high school Algebra and simple graphs. [3-0; 0-0]

HCEP 401 (3) BASIC EPIDEMIOLOGY FOR INFECTION CONTROL. Epidemiology, study, design and analysis, and outbreak investigation as it applies to institutional infection control. Equivalency: PATH 477.

HCEP 500 (3) ANALYTICAL METHODS IN EPIDEMIOLOGICAL RESEARCH. Basic epidemiological designs as a framework for commonly used biostatistical techniques such as the Mantel-Haenszel, chi-squared, linear and logistic regression, and survival analysis. Computer packages will be available for computation of assignments. Prerequisite: All of HCEP 400, HCEP 502 or their equivalents.

HCEP 501 (3) ANALYSIS OF LONGITUDINAL DATA FROM EPIDEMIOLOGICAL STUDIES. To explore and compare methods of analyzing continuous and categorical longitudinal data. The issues of missing data and errors in measurement/misclassification will be covered in depth. The material will be taught by reading and discussing a selection of papers and by analyzing data sets using different techniques and comparing the results. Prerequisite: All of HCEP 400, HCEP 500, HCEP 502, HCEP 503.

HCEP 502 (3) EPIDEMIOLOGICAL METHODS I. Sources and uses of epidemiologic data for health services planning and administration including methods of data collection and study design. Prerequisite: Enrolment in a Health Care and Epidemiology graduate program, or permission of instructor. Corequisite: Designed to be taken in series with HCEP 503.

HCEP 503 (3) EPIDEMIOLOGICAL METHODS II. Critical thinking in epidemiology; principles and methods of study design; context for epidemiological investigations of human health. Prerequisite: All of HCEP 400, HCEP 502.

HCEP 504 (3) APPLICATION OF EPIDEMIOLOGICAL METHODS. This second level course will teach research trainees to apply methods taught in prior courses towards the development of a fundable research protocol and the analysis and interpretation of real epidemiologic data. Prerequisite: All of HCEP 400, HCEP 500, HCEP 502, HCEP 503, HCEP 505.

HCEP 505 (1.5) SCIENTIFIC BASIS FOR EPIDEMIOLOGICAL THINKING. The course will provide a framework for students to use epidemiological and other scientific evidence to make decisions about causation and to recommend policy actions. Prerequisite: Restricted to students enrolled in a Health Care and Epidemiology graduate program.

HCEP 506 (1.5) INTRODUCTION TO PROGRAM AND ECONOMIC EVALUATION. The course will provide an overview of the basic concepts and principles of program evaluation and economic evaluation in clinical and community health settings. Prerequisite: All of HCEP 400, HCEP 502.

HCEP 507 (1.5) M.SC. RESEARCH SEMINAR. HCEP 507 in conjunction with HCEP 607 is a required course for students in the M.Sc. program. Students present and discuss their research and other topics of interest.

HCEP 510 (3) MEASUREMENT OF HEALTH CARE. Concepts and techniques of measurement in epidemiological research. Topics covered include validity, reliability and misclassification, scale design and the construction of questionnaires and indices for both health outcomes and exposures. Prerequisite: One of HCEP 400, HCEP 502, HCEP 513 or permission of instructor.

HCEP 511 (3) CANCER EPIDEMIOLOGY. Collection and analysis of epidemiological data on cancer; occupational and other risk factors; analytic techniques and mathematical modelling relevant to oncology. Prerequisite: All of HCEP 400, HCEP 502 or equivalent.

HCEP 512 (3) THE DESIGN AND ANALYSIS OF CLINICAL TRIALS. Ethical considerations, intention-to-treat versus efficacy trials, principles of sampling and exclusion, methods of allocation and techniques of randomization, parallel versus cross over design, monitoring treatment outcomes, adverse effects, stopping rules, analytic techniques and data interpretation, and logistical issues in the management of

clinical trials. Prerequisite: One of HCEP 502, HCEP 513.

HCEP 513 (3) CLINICAL EPIDEMIOLOGY. Principles and methods of epidemiology are applied to clinical problems. Evaluation and design of laboratory and clinical tests and of therapeutic interventions. Prerequisite: One of HCEP 400, HCEP 502.

HCEP 514 (3) CLINICAL DECISION ANALYSIS. Methodology in and applicability of clinical decision analysis. Applications in problem solving (screening or prevention program assessment, test of treatment trade-offs, interpreting uncertain clinical data etc). Techniques include decision tree design, sub-trees, marker models, sensitivity analysis, Monte Carlo simulation, threshold analysis, utility assessment including the DEALE. Prerequisite: One of HCEP 502, HCEP 513.

HCEP 515 (3) DEMOGRAPHIC PRINCIPLES AND METHODS IN HEALTH. Designed to introduce graduate students in the health field to demographic techniques and principles through the discussion of the applications of various measures, case studies, and theoretical papers. The emphasis is on applying techniques and principles in class to undertake a demographic evaluation.

HCEP 516 (3) SYSTEMATIC OVERVIEWS. Systematic reviews of literature. Combining data to estimate risk for end points.

HCEP 517 (3) CLINICAL RESEARCH METHODS FOR SURGICAL PROCEDURES.

HCEP 520 (3) CONTROL OF COMMUNICABLE DISEASE. Epidemiology of viral, bacterial and parasitic infections with emphasis on the control of these infections in human populations. Immunization programs will be stressed.

HCEP 521 (3) SOCIO-ECONOMIC FACTORS AND INTERNATIONAL HEALTH DEVELOPMENTS. Defining poverty and health (including mental health). Measurements absolute and relative. World distribution of resources. Special problems of developing and developed countries. Canadian problems of poverty and health. Methods of financing health services, problems of distribution. Health professionals and semi-professionals. Communication problems.

HCEP 522 (3) TOPICS IN ENVIRONMENTAL HEALTH. Role of air, water, food and solid waste as sources of human health risks; global environmental health issues; sustainability.

HCEP 523 (3) GLOBAL HEALTH AND HUMAN SECURITY. Global threats to human health stemming from conflict, poverty and environmental degradation.

HCEP 529 (0) MAJOR ESSAY. Required for all MHSc students.

HCEP 530 (1.5) EPIDEMIOLOGY OF OCCUPATIONAL AND ENVIRONMENTAL HEALTH. Design and analysis of etiologic research in occupational health. Prerequisite: One of HCEP 502, OCCH 509 or permission of instructor.

HCEP 531 (1.5) OCCUPATIONAL AND ENVIRONMENTAL EXPOSURE ASSESSMENT METHODS FOR EPIDEMIOLOGY. Additional exploration of the design and analysis of etiologic research into occupational health. Prerequisite: HCEP 502 or permission of instructor.

HCEP 532 (1.5–3) D ENVIRONMENTAL HEALTH RISK ASSESSMENT AND COMMUNICATION.

HCEP 533 (3) OCCUPATIONAL AND ENVIRONMENTAL TOXICOLOGY. Mechanism of action of commonly encountered occupational toxic agents; relevance of laboratory and epidemiological evidence. Prerequisite: Permission of instructor.

HCEP 534 (3) CURRENT TOPICS IN TOXICOLOGY. Effects of individual toxic agents on complete organ system, problems of specific industries. Prerequisite: HCEP 533.

HCEP 535 (3) PRINCIPLES OF OCCUPATIONAL AND ENVIRONMENTAL HYGIENE. Introduction to Occupational Hygiene and Safety. Equivalency: OCCH 501.

HCEP 540 (3) HEALTH SERVICES RESEARCH I: EVALUATIVE RESEARCH. Examines the concept of evaluation in health services and how various methodological approaches can be used in evaluative studies.

HCEP 541 (3) HEALTH SERVICES RESEARCH II: ECONOMIC EVALUATION. Economic evaluation of health service interventions and programs, with emphasis on methods and components of program costing. Prerequisite: One of HCEP 506, HCEP 540 or permission of instructor.

HCEP 542 (3) SEMINAR: ISSUES IN CANADIAN HEALTH POLICY. Analysis of topical Canadian health policy issues in international context. Topics variable but include public/private financing, health care personnel, and pharmaceutical policy challenges.

HCEP 543 (3) OUTCOME EVALUATION: HEALTH TECHNOLOGY ASSESSMENT FOR POPULATION HEALTH POLICY. This course is an advanced program evaluation course. Prerequisite: All of HCEP 502, HCEP 506.

HCEP 544 (3) SOCIAL DETERMINANTS OF POPULATION HEALTH IN INDUSTRIALIZED SOCIETIES. Population health has emerged as an important framework for thinking about factors affecting health in Canada and other developed nations. This course will build upon the tradition of “social medicine” within public health and epidemiology.

HCEP 545 (1.5) COMMUNITY HEALTH PROMOTION: THEORETICAL BASIS. Seminar applying social and behavioural theories to research on planning, implementation and health care, and health promotion

HCEP 546 (1.5) COMMUNITY HEALTH PROMOTION: PRACTICE. Seminar that critically examines the practice of community health promotion, including its historical and philosophical roots.

HCEP 548 (3) HEALTH SERVICES RESEARCH METHODS. Assessing health services and systems, research design, measurement reliability and validity, common data sources used, measurement of quality of care and effectiveness and outcomes.

HCEP 550 (3) ANALYSIS OF HEALTH CARE ORGANIZATIONS. Analysis of models of organizational structures and processes in health care. Using open and closed systems theories of organizations (contingency, rational-bureaucratic, human relations, resource dependency and population ecology) as a framework, relevant organizational factors and intra-organizational processes will be examined.

HCEP 551 (3) ADVANCED HEALTH INFORMATION SYSTEMS. Information systems in planning and management of health care services provided through single-purpose units, comprehensive clinics and hospitals. Emphasis on computerized systems.

HCEP 552 (3) PLANNING FOR HEALTH SERVICES. A critical analysis of planning activities in health service institutions. The course is organized around case studies of program planning.

HCEP 553 (3) SEMINAR IN HEALTH CARE MANAGEMENT. Assessment of approaches and development of sound strategies for addressing current problems and issues.

HCEP 558 (3) HEALTH MANAGEMENT PROJECT. Implementation of planning theory through the completion of a bounded project within a health agency, and under individual faculty supervision. Prerequisite: HCEP 553.

HCEP 559 (3) MAJOR ESSAY. Required for Master of Health Administration (MHA) non-thesis program.

HCEP 560 (3) SEMINARS IN THE PHILOSOPHY OF SCIENCE AND RESEARCH. Topics of current interest will be presented and discussed by students and instructor.

HCEP 580 (3/6) D DIRECTED STUDIES.

HCEP 581 (1.5/3) D SELECTED TOPICS. By seminar and directed readings, certain topics of current interest are explored in depth.

HCEP 599 (12) M.SC. THESIS.

HCEP 607 (1.5) PH.D. RESEARCH SEMINAR. Required course in PhD program. Topics of current interest will be presented and discussed by students and various faculty.

HCEP 699 (0) PH.D. THESIS.

HCEP 710 (0) INTRODUCTION TO COMMUNITY MEDICINE PRACTICE. An introductory survey to Community Medicine.

HCEP 711 (0) FIELD EXPERIENCE. A series of visits to facilities and organizations related to Community Medicine Practice. Directed by Faculty. At least four hours per month.

HCEP 712 (0) SUPERVISED WORK. A weekly review by Faculty of the work carried out by the resident with discussion on the objectives, planning, method of operation and outcome. Two hours per week.

HCEP 713 (0) COMMUNITY HEALTH TUTORIALS. Topics of Public Health interest presented throughout the year by Faculty and guest lecturers. Two hours per month.

HCEP 714 (0) COMMUNITY MEDICINE SEMINARS. Selected topics of current interest in Community Medicine Practice or in its basic sciences. Presented by residents and discussed with Faculty and invited guests. Three hours per month.

HCEP 715 (0) JOURNAL SEMINARS. A monthly two-hour seminar on selected journal articles of Community Medicine interest are presented by the residents and discussed with Faculty and invited guests.

HCEP 716 (0) RESEARCH IN COMMUNITY MEDICINE OR ITS BASIC SCIENCES BY A RESIDENT. Up to two days per week. Supervised by Faculty.

HCEP 717 (0) INTRODUCTION TO OCCUPATIONAL MEDICINE PRACTICE. An introductory survey to Occupational Medicine practice.

HCEP 718 (0) FUNDAMENTALS OF CLINICAL EPIDEMIOLOGY. Seminar series covering critical appraisal of the medical literature and basic research methods for residents in any post-graduate training program.

HEBR — HEBREW FACULTY OF ARTS

Not all courses are offered every year. For current listings, consult the departmental website at: www.cnrs.ubc.ca.

HEBR 305 (6) ELEMENTARY HEBREW (BIBLICAL). Elements of grammar and translation of prose and poetry. Open to first- and second-year students with permission of the instructor.

HEBR 405 (6) INTERMEDIATE HEBREW (BIBLICAL). Second year of Biblical Hebrew with emphasis on rapid reading of poetry and prose. Prerequisite: HEBR 305.

HEBR 479 (3/12) C SUPERVISED STUDY IN CLASSICAL HEBREW. Prerequisite: HEBR 405.

HEBR 509 (3/12) C ADVANCED READINGS IN CLASSICAL HEBREW. Credit will not be given for both HEBR 479 and HEBR 509.

HECO — HUMAN ECOLOGY FACULTY OF LAND AND FOOD SYSTEMS

HECO 200 (3) INTRODUCTION TO HUMAN ECOLOGY. History, profession, theory and practice of Human Ecology. For students who plan to enter Home Economics Education, those in Agricultural Sciences, Human Ecology and Family Studies. [3-0-0]

HECO 476 (3) DIRECTED STUDY IN HUMAN ECOLOGY. Directed investigation of a problem, requiring a written or oral report of findings. Fourth year Human Ecology and Home Economics Students only. Prerequisite: Satisfactory standing and permission of faculty member supervising the investigation.

HESO — HEALTH & SOCIETY FACULTY OF ARTS

HESO 400 (3/6) D SOCIOCULTURAL DETERMINANTS OF HEALTH. Methods for analyzing population health data and medical research reporting.

HESO 449 (3/6) D TOPICS IN HEALTH AND SOCIETY.

HINU — HINDI-URDU FACULTY OF ARTS

HINU 102 (6) INTRODUCTORY HINDI-URDU. Spoken Hindi and Urdu, and written Hindi.

HINU 200 (6) INTERMEDIATE HINDI-URDU. Conversation and grammar; an introduction to Hindi literature; an introduction to the Urdu script. Prerequisite: HINU 102. Background in Hindi or Punjabi.

HINU 205 (1) INTRODUCTION TO THE DEVANAGARI SCRIPT. The writing system of Hindi for those with some background in the spoken language. May be taken at the same time as HINU 200.

HINU 300 (6) ADVANCED HINDI-URDU. Further study of the grammar of Hindi and Urdu; advanced conversation; literary readings in Hindi and Urdu; Hindi film. Prerequisite: HINU 200.

HINU 305 (2) INTRODUCTION TO THE PERSO-ARABIC (URDU) SCRIPT. The writing system of Urdu for those with some background in the spoken language. Corequisite: One of HINU 300, HINU 400.

HINU 400 (6) INTRODUCTION TO HINDI AND URDU LITERATURE. Readings of various literary genres in Hindi, Urdu and their medieval equivalents. Modern fiction from India and Pakistan; the Urdu ghazal; medieval Hindi bhakti poetry; readings from the Adi Granth of the Sikhs Hindi film. Discussion in Hindi-Urdu of all materials. Prerequisite: HINU 300.

HIST — HISTORY FACULTY OF ARTS

HIST 101 (6) WORLD HISTORY TO OCEANIC CONTACT. Origins and diffusion of the world's great religions; cultural contact along overland trade routes; emergence of civilizations such as the Inca, Chinese, and Christian European; ordering of societies and their political development.

HIST 102 (6) WORLD HISTORY FROM 1500 TO THE TWENTIETH CENTURY. The civilizations of, and the demographic, ecological, economic, and intellectual links between Africa, America, Asia, Europe, and the Pacific.

HIST 103 (6) WORLD HISTORY SINCE 1900. International relations; changes in the nation-state system; the emergence and impact of major political ideologies; genocide; decolonization; the globalization of trade; and the dynamics of economic, social, cultural, and environmental change in a global context.

HIST 104 (3) TOPICS IN WORLD HISTORY. Thematically-organized topics will explore global aspects of human experience across time. Each section will examine a single theme.

Check with the department for course offerings.

HIST 105 (3) CONTEMPORARY GLOBAL ISSUES IN HISTORICAL PERSPECTIVE. Places issues and problems of current relevance such as disease, terrorism, drugs, or ethnic conflict in historical perspective. Each section will explore a single theme. Check with department for course offerings.

HIST 120 (6) EUROPEAN HISTORY FROM THE RENAISSANCE TO THE PRESENT. A survey of continuity and change in the economic and social foundations, and in the political, administrative, and military spheres, as well as some of the accompanying scientific, philosophical, literary, artistic, architectural and other cultural achievements of European civilization.

HIST 170 (6) INTRODUCTION TO SOUTH ASIA. Geographical, cultural, and historical backgrounds to India, Pakistan, and Bangladesh. Problems of political, economic, and social development since 1947.

HIST 171 (6) INTRODUCTION TO EAST ASIA. Geographical, ethnic and historical backgrounds of China, Japan, and Korea. Survey of twentieth-century East Asian history.

HIST 200 (6) ASIA AND THE WORLD. The political, economic, social, cultural, and human interactions between Asia and the world, inter-Asian relations, Asian diaspora, colonialism, war and the social consequences of conflict, decolonization, industrial growth, and developing world issues.

HIST 201 (6) THE COLONIAL EXPERIENCE IN THE AMERICAS. A comparative study of selected colonial societies from their foundation into the 19th century.

HIST 202 (6) MODERNIZATION IN HISTORICAL PERSPECTIVE. Explores the transition from pre-industrial to modern society in western Europe from 1700 to the present, with some examination of the impact of this process on Asia, Africa, and Latin America in the nineteenth and twentieth centuries.

HIST 205 (3) INTRODUCTION TO HISTORICAL ARCHAEOLOGY. An introduction to the study of medieval and modern material culture, with special emphasis on Canada, using archaeological evidence to illustrate the principles, aims, and techniques of historical archaeology and related disciplines.

HIST 215 (6) TECHNOLOGY IN HISTORY. An introduction to the history of technology and society from antiquity to the present.

HIST 220 (6) HISTORY OF EUROPE. European politics, society, and economy in their intellectual and cultural contexts.

HIST 235 (6) HISTORY OF CANADA. Canadian politics, society, and economy in their intellectual and cultural contexts.

HIST 237 (6) MAJOR ISSUES IN AMERICAN HISTORY. A general course, from the colonial period to the modern, examining the political system, slavery and the Civil War, Manifest Destiny and the frontier, urban and industrial

America, and American foreign policy in the twentieth century.

HIST 250 (3/6) D LATIN AMERICAN HISTORY. A general course designed to show by discussion of the major issues how the modern society and culture of Latin America came into being.

HIST 252 (3) MODERN CARIBBEAN HISTORY. A survey of social, cultural and political history of Anglophone, Francophone and Spanish Caribbean from the Haitian Revolution to the present.

HIST 260 (3) SCIENCE AND SOCIETY. An introduction to the historical development, conceptual foundations, and cultural significance of contemporary science. Themes will vary from year to year. Equivalency: PHIL 260.

HIST 270 (6) MODERN CHINA AND THE WEST. The invasion of China since the 1600s by western civilization; the impact of Chinese culture and of the modern Chinese revolution on the West, Canadian relations with China included. Open to students with no previous knowledge of China. Equivalency: ASIA 270.

HIST 271 (3) JAPAN AND THE WORLD, 1550–1900. Thematic study of comparisons and relations between Japan and the world outside (primarily Europe and China). Commercial expansion, systems of world order, social institutions, religious and ideological expression, and state organization.

HIST 302 (6) HISTORY OF THE NATIVE PEOPLES OF CANADA. The native people (status and non-status) of Canada from contact to the present. Topics include native involvement in the fur trade and later economic developments, the emergence of the Metis, the treaty-making process, and the evolution of government policies for native peoples.

HIST 303 (6) HISTORY OF THE CANADIAN WEST. Selected topics in the history of the Canadian West with an emphasis on the prairie west: the Indian and the fur trade, Louis Riel, prairie settlement, and western social and political protest.

HIST 304 (3) RESEARCHING LOCAL HISTORY FROM THE GROUND UP. Sources and methods for reconstructing local history that can be used by Social Studies teachers in B.C. The aim is to develop an appreciation of the formative processes and past experiences that created one's familiar community.

HIST 306 (6) HISTORY OF FRANCE, 1461–1715. The development of absolute monarchy in France, with emphasis on change and conflict in French society; spiritual and intellectual "crisis"; the place of France in the emerging European state system; and opposition to the monarchy.

HIST 307 (6) FRENCH NORTH AMERICA TO 1803. A historical background for understanding the French-speaking peoples of North America: Acadians, Franco-Quebecois, French-Canadians and Cajuns. It deals extensively with French-Amerindian relations and introduces the student to the historiography of French North America.

HIST 310 (3) THE BRITISH EMPIRE. Rise of the British imperial system within a global context from its beginnings to 1850. Focuses on economic and social themes with emphasis on settlements in the southern hemisphere as well as the West Indies.

HIST 311 (3) THE BRITISH EMPIRE AFTER 1850. Transformation of the British imperial system from the mid-nineteenth century to decolonization and neo-colonialism after the second World War.

HIST 313 (6) THE RENAISSANCE. The interplay between new and traditional ideas, styles and institutions from the fourteenth to the mid-sixteenth century, primarily in Italy, with emphasis upon the relationship of social, economic, and political factors to intellectual and cultural change.

HIST 316 (6) EUROPEAN SOCIAL HISTORY. A study of the changes in economic activity, social structure, family life, religious attitudes, and popular behaviour which accompanied the transformation of Europe from a pre-industrial to an industrial society.

HIST 317 (3) HISTORY OF SOUTHERN AFRICA. Pre-colonial, colonial, and contemporary, emphasizing South Africa.

HIST 321 (6–12) D HONOURS TUTORIAL.

HIST 322 (6–12) D HONOURS TUTORIAL.

HIST 324 (6) HISTORY OF EAST CENTRAL EUROPE IN THE 19TH AND 20TH CENTURIES. Covers the region between Germany and Russia as well as Southeast Europe. Emphasis on comparisons with Western Europe and features that make the area significant to Europe as a whole.

HIST 326 (6) THE BRITISH NORTH AMERICAN COLONIES, 1749–1873. A comparative study of the British North American colonies that became provinces of the Dominion of Canada. Regional distinctions as well as shared characteristics are examined in the light of literature, folklore, social structure, art, architecture, and politics.

HIST 327 (3) AMERICAN COLONIAL HISTORY, 1607–1763. A comparative study of the social, economic and political characteristics of the thirteen colonies as they changed from small European outposts to more mature societies.

HIST 328 (3) THE AMERICAN REVOLUTION AND THE FORMATION OF THE UNITED STATES. A study of the revolutionary origins of the United States of America and of the establishment of the American republic.

HIST 329 (6) CANADIAN SOCIAL HISTORY. A study of selected topics in the history of Canadian society, including frontier settlement, rural life, religion, social and institutional structures, immigration and ethnicity, social movements, ideology, family life and life cycles, demographic change, labour, industrialization and urbanization.

HIST 330 (3) THE UNITED STATES, 1812–1865. Political development in the new American nation, with special emphasis on

expansion, regionalism, Jacksonian democracy, social reform, and the Civil War.

HIST 331 (3) THE UNITED STATES, 1865–1896. Political and social development in Post-Civil War America, with special emphasis on Reconstruction, industrialization, and the Gilded Age.

HIST 332 (6) AFRICAN-AMERICAN HISTORY. The experience of African-Americans from the time of their enslavement through the late 20th Century from an interdisciplinary perspective.

HIST 333 (6) THIRD-YEAR HONOURS SEMINAR.

HIST 334 (6) EUROPE IN THE 19TH CENTURY. An investigation of main themes in European history from the French Revolution to the beginning of the 20th century. Topics of particular importance are: domestic politics; the interaction of states; the formation of new states; social and economic transformations affecting the whole civilization; major cultural expressions of the century.

HIST 335 (6) GENDER, POLITICS, AND CULTURE IN MODERN EUROPE. Relationships between changing gender roles and other historical processes from the French and industrial revolutions to imperialism, nationalism, and the rise of consumer cultures in Europe from the eighteenth century to the present.

HIST 338 (6) THE UNITED STATES IN THE 20TH CENTURY. American history from the First World War to the 1970s. While foreign affairs are treated in some depth, the course focuses primarily on the domestic scene. Economic developments, the current of ideas, social and political change receive special attention.

HIST 341 (3) MEDIEVAL JEWISH HISTORY. A survey of the political, social, economic, and cultural history of the Jews from the time of the Christianization of the Roman Empire to the expulsion of professing Jews from Spain and Portugal at the end of the fifteenth century.

HIST 342 (3) MODERN JEWISH HISTORY. A survey of the political, social, economic, and cultural history of the Jews from the beginning of the sixteenth century to the present with special emphasis on changing attitudes to Jews and Judaism, social and cultural transformations.

HIST 351 (3) FAMILY AND COMMUNITY IN LATIN AMERICA. The role of family and community from the colonial period to the present. Emergence of the nation state as it affected community and family structures.

HIST 352 (3) CLASS AND CULTURE IN LATIN AMERICA. The relationship between culture and class formation from the late colonial period to the present.

HIST 355 (3) GENDER AND SEXUALITY IN LATIN AMERICA. Examines the construction of gender ideologies and gendered and sexual identities, including masculine, feminine and transgendered, in modern Latin America.

HIST 356 (3) RACE AND NATION IN MODERN LATIN AMERICA. Racial formation and nationalism in comparative perspective from the 19th century to the present.

HIST 360 (3) INTRODUCTION TO HISTORY AND PHILOSOPHY OF SCIENCE. An examination of historical, conceptual, and methodological conditions of scientific knowledge through detailed consideration of important episodes in the history of science.

HIST 370 (6) SOCIAL AND CULTURAL HISTORY OF MEDIEVAL EUROPE. A general survey of developments in social structures, of patterns of public and private behaviour, and of major cultural changes.

HIST 371 (3) EUROPE IN THE EARLY MIDDLE AGES. A survey of the development of institutions, ideas and the economy in Europe from about 400 through about 1000 CE.

HIST 372 (3) EUROPE IN THE CENTRAL MIDDLE AGES. A survey of the development of institutions, ideas and the economy in Europe from about 1000 CE through the fourteenth century.

HIST 373 (3) WOMEN IN THE MIDDLE AGES. A study of women's roles in the family, society, law, religion, the economy, and literature from about 500 to 1500 CE.

HIST 374 (3) IDEAS AND RELIGIONS OF THE MIDDLE AGES. A survey and exploration of the development, interpenetration, conflict, and transformation of various intellectual and religious traditions during the Middle Ages.

HIST 375 (3) ECONOMIC HISTORY OF PRE MODERN EUROPE. Background, causes and effects of economic change in Europe before the 18th century. Evolution of social and economic institutions, relationship to the environment, changes in the distribution of income, and the origins of modern economic growth.

HIST 376 (3) MEDIEVAL LEGAL HISTORY. The development of the western legal tradition including English common law, civil (Roman) law, and canon law.

HIST 377 (3) CONSTITUTIONAL HISTORY OF MEDIEVAL EUROPE. The evolution of political institutions, the emergence of royal governments as well as representative assemblies and urban republic and conflicts within and among them leading to the emergence of modern structures.

HIST 378 (3) MEDIEVAL PORTRAITS AND PERSONALITIES. The lives of leading and controversial figures in the Middle Ages and the means by which they have portrayed themselves and been portrayed by others.

HIST 380 (6) MODERN CHINESE HISTORY SINCE 1840. An analysis of changes in institutions and ideas in China from the late Imperial Period to the most recent developments of the Chinese Revolution. Approaches are thematic, by periods, and by problems. Equivalency: ASIA 380.

HIST 381 (6) HISTORY OF LATER IMPERIAL CHINA. History of China from the end of Tang to the eve of its modern transformation. Students will acquire the analytical skills and

tools to understand the political, socio-economic, and cultural changes in imperial China. Equivalency: ASIA 321.

HIST 382 (3) HISTORY OF EARLY CHINA. History of China from the earliest times to the disintegration of the Tang empire. Students will acquire the analytical skills and tools to understand the origins and foundations of Chinese society. Equivalency: ASIA 311.

HIST 383 (6) HISTORY OF JAPANESE CIVILIZATION. Japanese political, social, and cultural history from earliest times to 1868.

HIST 384 (6) HISTORY OF INDIAN CIVILIZATION. Political and cultural history from the earliest times to the medieval period.

HIST 385 (6) HISTORY OF INDIA SINCE 1800. Developments in Indian society and culture under the British Raj, the origins and growth of the freedom struggle, the emergence of independent states on the sub-continent, and problems of nation-building and modernization since 1947.

HIST 386 (6) HISTORY OF KOREAN CIVILIZATION.

HIST 387 (3) MEDIEVAL INDIA. The history, culture, and social and economic organization of South Asia from the decline of the classical Hindu empires through the Sultanate period.

HIST 388 (3) MUGHAL INDIA. History of the politics, economy, society, and culture of South Asia from the Great Mughals to the British conquest. Equivalency: ASIA 428.

HIST 389 (6) THE SIKHS: HISTORY, RELIGION AND SOCIETY. A historical study of the social and cultural forces that helped shape Sikh religious beliefs and ritual practices over the past four centuries. In dealing with the evolution of Sikh identity, attention will be given to Sikh ideals, social organization, religious institutions and sacred literature. Equivalency: ASIA 379.

HIST 400 (6) SELF AND SOCIETY FROM THE RENAISSANCE TO THE ENLIGHTENMENT. Examines ideas of individual life and social experience in early modern Europe. Emphasizes careful reading of primary texts, drawn from history, biography, travel, philosophy, and fiction.

HIST 401 (6) FRENCH CANADA FROM THE END OF THE 18TH CENTURY TO THE PRESENT. Examines the relations between the English and the Canadians prior to the Rebellions of 1837–38, the emergence of the “state of siege” mentality after 1840, the impact of industrialization in Quebec, the Quiet Revolution, and independence movement.

HIST 402 (3) PROBLEMS IN INTERNATIONAL RELATIONS: DIPLOMACY AND THE ORIGINS OF WARS. Study of the relationship of the diplomatic factor to other factors in the origins of the First and Second World Wars. This seminar is open only to fourth-year students in the Major program in International Relations.

HIST 403 (3) SEMINAR IN THE HISTORY OF INTERNATIONAL RELATIONS. Selected topics, such as the role of diplomacy and its relation to other factors in international affairs, Canadian external relations, third-world international politics, Cold-War historiography, and area studies. Open only to fourth-year students in the Major program in International Relations.

HIST 404 (6) BRITISH COLUMBIA. Selected themes in the history of the region, primarily during the post-confederation years. Topics will emphasize changes in the economic, social, and institutional structures of the province.

HIST 405 (6) RUSSIA BEFORE 1917. Beginning with the medieval period, the course will concentrate on the era from Peter the Great to the 1917 Revolution, emphasizing domestic developments, particularly the tensions between continuity and change in this epoch of transformation, crisis, and revolutionary movements.

HIST 406 (3) FRANCE, 1715–1900. Explores the political, social, and cultural history of France from 1715 to 1900. Topics include the French Revolution, 1848, the arts, the Dreyfus Affair, and French nationalism.

HIST 407 (6) HISTORY OF MODERN GERMANY. The political, social and intellectual history of modern Germany from 1789 to the present, with some emphasis on the preceding centuries.

HIST 408 (3) HISTORY OF THE HABSBURG MONARCHY. An examination of the growth and development of the monarchy with emphasis on the eighteenth and nineteenth centuries. Some discussion of the successor states after 1918.

HIST 409 (3) FRANCE, 1900 TO THE PRESENT. Explores the history of twentieth-century France. Topics include the two world wars; cultural movements; colonialism; decolonization; and France in a new Europe.

HIST 413 (6) REFORMATION EUROPE. An examination of European history, 1450–1650, which places both the Protestant Reformation and the Catholic Reformation in the broader context of the political, social, cultural, and economic changes during the early modern era.

HIST 415 (6) EARLY MODERN BRITAIN. A study of the social, economic, political, religious, cultural and intellectual history of Britain between the Reformation and the Industrial Revolution with special reference to the rise of modern industrial society.

HIST 416 (3) BRITAIN, 1750–1850. Emergence of the world's first industrial society, and the political, economic, and cultural struggles accompanying this transformation.

HIST 417 (3) BRITAIN, 1850–1918. Britain from the Great Exhibition to the Great War: the creation of a mass electorate, the “New Imperialism,” the “New Woman,” and the ways that class, race, gender, and sexuality shaped modern Britain.

HIST 418 (3) EARLY TWENTIETH-CENTURY BRITAIN. British society and politics in the era of the two world wars: the liberal reforms before the Great War, war experiences, the Great Depression, and the impact of new political movements.

HIST 419 (3) CONTEMPORARY BRITAIN, 1945 TO THE PRESENT. Survey of recent British history, with emphasis on de-colonization, emergence of the welfare state, new social movements and patterns of immigration, and Britain's changing relationship with Europe.

HIST 421 (6–12) D HONOURS TUTORIAL.

HIST 422 (6) MODERN JAPANESE HISTORY SINCE 1800. The building of a modern state, its crisis in the 1930s, and its postwar recovery; topics include business institutions, politics, imperialism, intellectual syncretism, social change, and Japan's growing influence in the world. Equivalency: ASIA 422.

HIST 423 (6) ECONOMIC AND BUSINESS HISTORY OF MODERN JAPAN. From 1800 to the present; emphasis on the business strategies of Japan's largest companies; attention also to broader economic topics such as international trade, government policy, social impact of industry, business and politics, labour, and post-1971 multi-nationalism.

HIST 425 (6) WAR AND SOCIETY. Continuity and change in the relations of war and society, the connections between the economy, society, the military, and government in peacetime as well as war; not a course in military history.

HIST 426 (6) TWENTIETH-CENTURY CANADA. A survey of the political, social, and economic developments which have shaped contemporary Canada.

HIST 427 (3) SEMINAR IN NATIVE HISTORY OF CANADA. Major interdisciplinary themes in the history of Canada's Aboriginal Peoples after European contact, including historical demography, economic interdependency, missionary encounters, and relations with the Canadian state.

HIST 428 (6) INTELLECTUAL HISTORY OF THE UNITED STATES OF AMERICA FROM THE COLONIAL PERIOD TO THE PRESENT DAY. Examines the evolution of the American mind from the colonial period to the present, with emphasis on patterns of thought that have developed in response to American conditions.

HIST 429 (3–6) D TOPICS IN CANADIAN HISTORY. Topics might include immigration, French-English relations, the growth of the state, health and welfare, or the family.

HIST 430 (6) DEVELOPMENT OF CANADIAN EXTERNAL POLICY SINCE CONFEDERATION. Examines the history of Canada's external relations since Confederation with particular emphasis on Canada's changing international status and role in the twentieth century.

HIST 431 (6) POPULATION IN HISTORY. Examines selected demographic themes in world-wide historical perspective, the history of the family, urbanization, overpopulation,

population growth and industrialization, Malthusian theory, and related problems of Third World countries.

HIST 432 (6) INTERNATIONAL RELATIONS OF THE GREAT POWERS IN THE TWENTIETH CENTURY. The international relations of the great powers from the end of the First World War to the end of the Cold War.

HIST 433 (6) FOURTH-YEAR HONOURS SEMINAR.

HIST 434 (6) HISTORY OF SOUTHEAST ASIA SINCE 1800. The modern history of Vietnam, Laos, Cambodia, Thailand, Malaysia, Indonesia, and the Philippines. Special attention to the revolutions in Vietnam and Indonesia. Equivalency: ASIA 434.

HIST 435 (6) COMMUNIST MOVEMENTS IN EASTERN EUROPE SINCE 1900. Emphasis on the smaller countries of the Communist orbit. Deals with the Soviet Union for background and for comparative perspectives. Equivalency: POLI 425.

HIST 437 (6) THE AMERICAN IMPACT ON CANADA. An examination of the influence of the United States' rise to continental, hemispheric, and world power upon Canada in the areas of economics, culture, defence, and foreign policy.

HIST 438 (6) HISTORY OF THE SOVIET UNION. The role of the Communist party, the evolution of Soviet society, the transformation of the Soviet economy, and the techniques of government under Lenin, Stalin, and Khrushchev.

HIST 441 (3) HISTORY OF THE HOLOCAUST. A study of the systematic attempt to destroy European Jewry during the Nazi regime, 1933–1945. Topics of special importance include: the motivations and behaviour of the perpetrators; the reactions of the victims; the roles of bystanders.

HIST 442 (3) GENDER, TECHNOLOGY AND SOCIETY IN HISTORY. The historical dimensions of current debates about technology, focusing on the interdisciplinary theme of gender.

HIST 444 (3) SLAVE SOCIETIES IN THE AMERICAS. A comparative analysis of the institution of chattel slavery, its growth, its effects on slaves and masters, its relation to the larger society, and the causes of its decline, in the various cultures of the Americas.

HIST 445 (3) AMERICAN FOREIGN POLICY, 1870–1945. Selected topics in political and economic aspects of American foreign policy, from 1870 to 1945.

HIST 446 (3) AMERICAN FOREIGN POLICY, 1945 TO PRESENT. Selected topics in the history of American foreign policy, 1945 to the present.

HIST 447 (3) SELECTED TOPICS IN UNITED STATES HISTORY. Examines in depth a significant period, theme, or topic in the history of the United States. Possible subjects include The West, the Great Depression, the Sixties, and Class, Race, and Gender.

HIST 448 (3) DIPLOMACY AND CONFLICT IN THE MIDDLE EAST, 1914 TO THE PRESENT. International relations in the Middle East in the aftermath of the Ottoman Empire, with special attention to the conflicts between the Jews of Palestine/Israel and their Arab neighbours.

HIST 449 (12) HONOURS ESSAY.

HIST 450 (3/6) D SELECTED TOPICS IN LATIN AMERICAN HISTORY. A study in depth of one major topic (such as the Cuban Revolution or Peronismo) in the recent history of Latin America.

HIST 451 (3) SELECTED TOPICS IN THE HISTORY OF BRAZIL. Examines the formation of the largest, most populous nation in Latin America, the establishment and rapid growth of its industrial economy.

HIST 452 (3) SELECTED TOPICS IN THE HISTORY OF MEXICO. Examines a major theme in Mexican history such as Spanish-Indian contact, church-state relations, Mexico's integration into the world economy, struggles for land and social justice, state formation, and the role of ritual, myth and cultural values in Mexican history.

HIST 454 (3) STATE AND SOCIETY IN 20TH CENTURY CUBA. The history and historiography of 20th century Cuba, with particular attention to changing state structures and their impact on everyday life.

HIST 455 (3) THE ORIGINS OF MODERN SCIENCE. Science and Society in the 17th and 18 Centuries. [3-0-0]

HIST 456 (3) HISTORY AND SOCIAL RELATIONS OF MODERN SCIENCES. Science and society in the 19th to 21st Centuries. [3-0-0]

HIST 461 (3) POLITICS AND CULTURE IN FIN-DE-SIECLE EUROPE (1890–1914). Explores relationship between politics, culture and social change in Europe. Topics include the changing role of intellectuals: literary aestheticism; painting; design and the city; origins of psychoanalysis.

HIST 462 (3) EUROPE, 1900–1945. A study of the political, social and cultural history of Europe from 1900 to 1945, dealing with such themes as the imperialist system, the First World War, the new political and social movements of the interwar years, the impact of the Depression, the crisis of liberal democracy, and the Second World War.

HIST 463 (3) EUROPE SINCE 1945. A study of the political, social and cultural history of Europe from 1900 to 2000, dealing with such themes as the origins of the Cold War, the development of separate social and political systems in Western and Eastern Europe, the emergence of the welfare state, the end of the Cold War, the problems of European integration and the nationalist conflicts of the 1990s.

HIST 465 (6) CULTURE AND SOCIETY IN LATE IMPERIAL CHINA. An in-depth examination of how beliefs and practices were created and transmitted in imperial China from 1500 to 1800. Equivalency: ASIA 465.

- HIST 470 (6) SEMINAR IN MEDIEVAL HISTORY.** Annually changing topics of medieval studies with special attention to research methods on primary sources.
- HIST 475 (3) FIRST CONTACTS IN THE PACIFIC.** An interdisciplinary history of early European contact with the Aboriginal Peoples of the northwest coast of North America and the Pacific Islands.
- HIST 480 (6) SOCIAL HISTORY OF MODERN CHINA.** Changes and continuities in Chinese society and culture from the late Imperial Period to the present; rural and urban life, social stratification, social movements and ideology, family and community, popular beliefs and cultural values. Equivalency: ASIA 480.
- HIST 481 (3) EDUCATION AND SOCIETY IN MODERN CHINA.** The relationship between education and society in China since 1600; classical learning and the civil service examination system; popular literacy; sino-foreign interactions in education; education and gender; nationalism and education; the education revolution in China after 1949.
- HIST 482 (3) CHINESE MIGRATION.** This history of Chinese migrations from the founding of the state to the present day. Migration is used as a focus through which to examine some key themes of Chinese history; ethnicity, boundary creation, economic growth and international relations.
- HIST 483 (3) ASIAN MIGRATIONS TO THE AMERICAS.** Examines both the historical and contemporary contexts for migration from Asia to Canada and the Americas.
- HIST 484 (3) EAST ASIAN MILITARY SYSTEMS AND WARFARE CHINA.** Confucian societies are often thought of as ones in which the brush is mightier than the sword. In fact the military has been a crucial factor in East Asia, and warfare has been the engine which has driven many of the most significant changes in East Asian history. This course will look at the evolution of East Asian military systems, and at the impact of recurrent warfare on East Asia societies.
- HIST 485 (3) ASIAN MIGRANT COMMUNITIES IN VANCOUVER.** This course will examine the history of Asian migration to Vancouver and British Columbia, focusing on the development of local communities and provide a background in historical research methods that will enable the students to conduct research on the history of these communities.
- HIST 486 (3) KOREA IN THE 20TH CENTURY.** History of the Korean people in the 20th century; the traditional cultural history; Japanese colonial rule; the Korean war; the two Korean states; economic, social, and cultural change.
- HIST 487 (3) HISTORY OF HEALTH IN THE MODERN WEST.** Changing conditions of health in Europe and North America from the beginning of the modern mortality decline to the recent past.
- HIST 490 (3) SEMINAR FOR MAJORS IN HISTORY.** Selected problems in the theory and practice of historical work. Check with the department for course offerings. Restricted to fourth year students majoring in History. Also open to History Honours students.
- HIST 495 (3/6) D THEORY AND PRACTICE OF HISTORY.** Approaches to the history of historical enquiry in its social, cultural, intellectual, methodological, economic and political contexts. Not open to Dept of History honours students.
- HIST 500 (3) READINGS IN CANADIAN HISTORY.**
- HIST 501 (3-12) D TOPICS IN CANADIAN HISTORY.**
- HIST 502 (3) SEMINAR IN CANADIAN HISTORY.**
- HIST 505 (3) READINGS IN AMERICAN HISTORY.**
- HIST 506 (3-12) D TOPICS IN AMERICAN HISTORY.**
- HIST 507 (3) SEMINAR IN AMERICAN HISTORY.**
- HIST 510 (3) READINGS IN BRITISH HISTORY.**
- HIST 511 (3-12) D TOPICS IN BRITISH HISTORY.**
- HIST 512 (3) SEMINAR IN BRITISH HISTORY.**
- HIST 515 (3) READINGS IN IMPERIAL-COMMONWEALTH HISTORY.**
- HIST 516 (3-12) D TOPICS IN IMPERIAL-COMMONWEALTH HISTORY.**
- HIST 517 (3) SEMINAR IN IMPERIAL-COMMONWEALTH HISTORY.**
- HIST 520 (3) READINGS IN MEDIEVAL HISTORY.**
- HIST 521 (3-12) D TOPICS IN MEDIEVAL HISTORY.**
- HIST 522 (3) SEMINAR IN MEDIEVAL HISTORY.**
- HIST 525 (3) READINGS IN RENAISSANCE-REFORMATION HISTORY.**
- HIST 526 (3-12) D TOPICS IN RENAISSANCE-REFORMATION HISTORY.**
- HIST 527 (3) SEMINAR IN RENAISSANCE-REFORMATION HISTORY.**
- HIST 530 (3) READINGS IN FRENCH HISTORY.**
- HIST 531 (3-12) D TOPICS IN FRENCH HISTORY.**
- HIST 532 (3) SEMINAR IN FRENCH HISTORY.**
- HIST 535 (3) READINGS IN GERMAN HISTORY.**
- HIST 536 (3-12) D TOPICS IN GERMAN HISTORY.**
- HIST 537 (3) SEMINAR IN GERMAN HISTORY.**
- HIST 540 (3) READINGS IN RUSSIAN AND EAST EUROPEAN HISTORY.**
- HIST 541 (3-12) D TOPICS IN RUSSIAN AND EAST EUROPEAN HISTORY.**
- HIST 542 (3) SEMINAR IN RUSSIAN AND EAST EUROPEAN HISTORY.**
- HIST 545 (3) PHILOSOPHY OF HISTORY AND CANADIAN HISTORIOGRAPHY.**
- HIST 546 (3) CONTEMPORARY CANADIAN HISTORIOGRAPHY.**
- HIST 547 (3-12) D READINGS: SPECIAL TOPICS IN HISTORY.**
- HIST 548 (3-12) D HISTORIOGRAPHY.**
- HIST 549 (12) MASTER'S THESIS.**
- HIST 550 (3) READINGS IN EARLY MODERN EUROPEAN HISTORY.**
- HIST 551 (3-12) D TOPICS IN EARLY MODERN EUROPEAN HISTORY.**
- HIST 552 (3) SEMINAR IN EARLY MODERN EUROPEAN HISTORY.**
- HIST 554 (3) READINGS IN MODERN EUROPEAN HISTORY.**
- HIST 555 (3-12) D TOPICS IN MODERN EUROPEAN HISTORY.**
- HIST 556 (3) SEMINAR IN MODERN EUROPEAN HISTORY.**
- HIST 558 (3) READINGS IN COMPARATIVE ASIAN HISTORY.**
- HIST 559 (3) SEMINAR IN COMPARATIVE ASIAN HISTORY.**
- HIST 560 (3) READINGS IN CHINESE HISTORY (TO 1911).**
- HIST 561 (3) READINGS IN CHINESE HISTORY (POST-1911).**
- HIST 562 (3-12) D TOPICS IN CHINESE HISTORY.**
- HIST 563 (3) METHODOLOGY AND SOURCES IN CHINESE HISTORY.**
- HIST 564 (3) SEMINAR IN CHINESE HISTORY.**
- HIST 565 (3) READINGS IN JAPANESE HISTORY TO 1914.**
- HIST 566 (3) READINGS IN 20TH-CENTURY JAPANESE HISTORY.**
- HIST 567 (3-12) D TOPICS IN JAPANESE HISTORY.**
- HIST 568 (3) READINGS IN EARLY MODERN JAPANESE AND WORLD HISTORY.**
- HIST 569 (3) METHODOLOGY AND SOURCES IN JAPANESE HISTORY.**
- HIST 570 (3) SEMINAR IN JAPANESE HISTORY.**
- HIST 573 (3) READINGS IN SOUTHEAST ASIAN HISTORY.**
- HIST 574 (3-12) D TOPICS IN SOUTHEAST ASIAN HISTORY.**

HIST 575 (3) SEMINAR IN SOUTHEAST ASIAN HISTORY.

HIST 577 (3) READINGS IN SOUTH ASIAN HISTORY.

HIST 578 (3-12) D TOPICS IN SOUTH ASIAN HISTORY.

HIST 579 (3) SEMINAR IN SOUTH ASIAN HISTORY.

HIST 580 (3) READINGS IN LATIN AMERICAN HISTORY.

HIST 581 (3-12) D TOPICS IN LATIN AMERICAN HISTORY.

HIST 582 (3) SEMINAR IN LATIN AMERICAN HISTORY.

HIST 585 (3-12) D TOPICS IN CULTURAL HISTORY.

HIST 586 (3-12) D TOPICS IN INTELLECTUAL HISTORY.

HIST 587 (3-12) D TOPICS IN ECONOMIC HISTORY.

HIST 588 (3-12) D TOPICS IN SOCIAL HISTORY.

HIST 590 (3-12) D TOPICS IN DIPLOMATIC HISTORY.

HIST 591 (3) SEMINAR IN DIPLOMATIC HISTORY.

HIST 592 (3-12) D TOPICS IN RELIGIOUS HISTORY.

HIST 593 (3-12) D TOPICS IN MILITARY HISTORY.

HIST 596 (3) ORAL HISTORY.

HIST 597 (3-12) D TOPICS IN COMPARATIVE HISTORY.

HIST 649 (0) PH.D. THESIS.

HKIN — HUMAN KINETICS SCHOOL OF HUMAN KINETICS

HKIN 103 (3) ACTIVE HEALTH. Role of physical activity in the maintenance of a healthy life. Application of basic physical fitness and exercise methods, exercise techniques and fitness appraisal. [2-2]

HKIN 115 (3/6) D PERFORMANCE ANALYSIS OF SELECTED INDIVIDUAL SPORTS AND ACTIVITIES. Specific topics to be announced each year. HKIN 115 and 215 can be taken in any order. Equivalency: HKIN 210. [2-2]

HKIN 161 (3) LEISURE AND SPORT IN SOCIETY. Introduction to the political, economic and social basis of leisure and sport; concepts, theories and problems. [3-0]

HKIN 190 (3) ANATOMY & PHYSIOLOGY I. Structure and function of the neuromuscular and skeletal systems of the human body. Special emphasis on movement analysis and the physiological effects of exercise. Equivalency: HKIN 290. [2-2]

HKIN 191 (3) ANATOMY & PHYSIOLOGY II. Structure and function of the digestive, endocrine, urinary, circulatory and respiratory systems. Special emphasis on effects of exercise. Equivalency: HKIN 291. [2-2]

HKIN 215 (3/6) D PERFORMANCE ANALYSIS OF SELECTED TEAM SPORTS AND ACTIVITIES. Specific topics to be announced each year. HKIN 115 and 215 can be taken in any order. Equivalency: HKIN 220. [2-2]

HKIN 230 (3) HUMAN MOTOR BEHAVIOUR I. Processes underlying human movement and learning motor skills and factors influencing acquisition, performance and movement control. Prerequisite: Second-year standing. Equivalency: HKIN 368. [3-0-0]

HKIN 231 (3) SPORT AND EXERCISE PSYCHOLOGY. Psychological theories and research related to sport and exercise behavior. Prerequisite: Second-year standing. Equivalency: HKIN 364. [3-0-0]

HKIN 252 (3) CONTEMPORARY HEALTH ISSUES. Examination of health issues, relevant to contemporary lifestyle, physical activity, and careers in the health and fitness field. The development of skills in critical thinking and consumerism as they relate to health and fitness. Prerequisite: Second-year standing. [3-0]

HKIN 261 (3) HEALTH POLICY AND SOCIETY. The Canadian leisure and sport delivery system and related policies. Prerequisite: HKIN 161 and second-year standing. [3-0]

HKIN 275 (3) EXERCISE PHYSIOLOGY I. Acute and chronic effects of exercise on body systems; basic concepts of cardiovascular, respiratory and muscular responses to physical activity. Prerequisite: All of HKIN 190, HKIN 191 and second-year standing. [2-0-2]

HKIN 280 (3) THE RISE OF MODERN SPORT. Selected topics in the growth of modern sport from 1800 to the present, with an examination of developments in Britain, the United States, and Canada. Prerequisite: HKIN 161 and second-year standing. [3-0]

HKIN 284 (3) PHYSICAL GROWTH AND MOTOR DEVELOPMENT. Characteristics of physical growth and motor development related to physical activity; factors affecting, and measurement of, physical growth and motor development. Prerequisite: Second-year standing required. [3-0]

HKIN 292 (3) LEISURE AND SPORT EVENT MANAGEMENT. Issues and strategies of leisure and sport event management are examined. Prerequisite: HKIN 161 and second-year standing. [3-0]

HKIN 293 (3) PLANNING, PROVISION AND MANAGEMENT OF FACILITIES. Planning, provision and management of leisure and sport facilities including policies, funding, design and technological development. Prerequisite: Second-year standing. [3-0]

HKIN 300 (3) AN INTRODUCTION TO PROFESSIONAL STUDIES IN PHYSICAL EDUCATION. An introduction to the profession of physical education, including its evolution, the responsibilities of professionals

in physical education, and the relationship between theory and practice. Prerequisite: Third-year standing. [3-0]

HKIN 303 (3) HIGH PERFORMANCE CONDITIONING IN PHYSICAL ACTIVITY AND SPORT. Conditioning methods, exercise techniques and appraisal methods for fitness in high performance physical activity and sport. Prerequisite: HKIN 103 and either (a) all of HKIN 190, HKIN 191 or (b) all of HKIN 290, HKIN 291 and third-year standing. [2-2]

HKIN 330 (3) HUMAN MOTOR BEHAVIOUR II. Acquisition, performance, and control of skilled movements. Processes and underlying mechanisms involved in learning and performing motor skills. Students can receive credit for only one of HKIN 330 or HKIN 468. Prerequisite: Third-year HKIN standing. Equivalency: HKIN 368, HKIN 468. [2-2]

HKIN 340 (3) POPULAR DANCE AND CULTURE. A thematic approach to dance in varied socio-cultural contexts which focuses on style, celebration, identity, and gender. Prerequisite: Third-year standing. [3-0]

HKIN 343 (3) DANCE FOR CHILDREN. The development of dance from ages 3 to 12. Play, imagery and dance from representational to symbolic interpretation, assimilation of rhythm and movement patterns; the folk tradition; the growth of technical skill; fundamental elements of dance composition. Prerequisite: Third-year standing. [2-2]

HKIN 351 (3) BIOMECHANICS II MECHANICAL PROPERTIES OF TISSUES. Mechanics of muscular contraction and how the mechanical properties of the muscle, ligaments, tendons, and bone work synergistically. Students can receive credit for only one of HKIN 351 or HKIN 473. Prerequisite: Third-year standing. Equivalency: HKIN 473. [2-0-2]

HKIN 353 (3) HUMAN BODY COMPOSITION. Examination of techniques for measuring the amounts of adipose tissue, muscle and bone in the body, and factors affecting body composition, with particular emphasis on physical activity. Prerequisite: Third-year standing. [3-0]

HKIN 355 (3/6) D FIELD EXPERIENCE. Analytical observations and supervised professional practice in physical activity and leisure settings as required for each specific program of study. See Undergraduate Advising Centre for specific prerequisites for each section. Students must take the section relevant to their programs of study. Prerequisite: Third-year standing and specific section prerequisites. [1-0-2]

HKIN 360 (3) INTERNATIONAL PERSPECTIVES ON LEISURE AND SPORT. Leisure and sport systems, policies and programs in selected countries. Prerequisite: HKIN 261 and third-year standing. [3-0]

HKIN 361 (3) INTRODUCTION TO ATHLETIC TRAINING. Recognition, prevention, and first aid treatment of common sports injuries. Laboratory sessions emphasize principles and techniques of basic protective taping and

strapping. Prerequisite: Either (a) all of HKIN 190, HKIN 191 or (b) all of HKIN 290, HKIN 291 and third-year standing. [2-2]

HKIN 362 (3) ADAPTED PHYSICAL ACTIVITY. For persons with disabilities; a developmental, lifelong approach to programming. Includes field work. Prerequisite: Third-year standing. [2-0-2]

HKIN 364 (3) HUMAN BEHAVIOUR IN SPORT AND PHYSICAL ACTIVITY. Current issues, research and practical considerations in the study of human behaviour associated with performance management and participant satisfaction in sport and physical activity. Prerequisite: Third-year standing. [3-0]

HKIN 365 (3) FOUNDATIONS OF COACHING. Methods of athletic conditioning, planning the program, psychology of training and coaching, athletic evaluation. Prerequisite: Third-year standing. [3-0]

HKIN 366 (3) MOVEMENT EXPERIENCES FOR YOUNG CHILDREN. The design and implementation of movement experiences for children in early childhood years. Prerequisite: Third-year standing. [3-0]

HKIN 367 (3) LEISURE AND DISABLED PERSONS. Policy issues relating to leisure opportunities for persons with disabilities. Prerequisite: Third-year standing. [3-0]

HKIN 369 (3) INSTRUCTIONAL ANALYSIS AND DESIGN IN SPORT AND PHYSICAL ACTIVITY PROGRAMS. Instructional design and technologies applied to sport and physical activity programs. Prerequisite: Third-year standing. [2-2]

HKIN 371 (3) INTRODUCTION TO STATISTICS IN HUMAN KINETICS. Basic concepts and principles of descriptive and inferential statistics, and distribution-free statistical techniques. Prerequisite: Third-year standing. [3-0-0]

HKIN 372 (3) RESEARCH APPLICATIONS IN LEISURE AND SPORT MANAGEMENT. Research methodologies commonly used in social and managerial studies in leisure and sport. An emphasis will be placed on qualitative methods. Prerequisite: Third-year standing. [3-0]

HKIN 373 (3) RESEARCH METHODS IN HUMAN KINETICS. Critical evaluation of research studies and methods with emphasis on the physical activity context. Prerequisite: Third-year standing. Equivalency: HKIN 370, HKIN 372. [3-0]

HKIN 374 (3) PERSPECTIVES ON PLAY. Play theories and behaviour. Prerequisite: HKIN 161 and third-year standing. [3-0]

HKIN 381 (3) LEISURE, SPORT AND POPULAR CULTURE. Selected aspects of leisure and sport examined in relation to modern social structures and cultures. Students can receive credit for only one of HKIN 281 or HKIN 381. Prerequisite: HKIN 161. And third-year standing. [3-0-0]

HKIN 382 (3) MEANING AND VALUES IN SPORT. An analysis of the experience of sports activities. Prerequisite: HKIN 261 and third-year standing. [3-0]

HKIN 383 (3) THE OLYMPIC GAMES: ANCIENT AND MODERN. Prerequisite: Third-year standing. [3-0]

HKIN 389 (3) NEUROMUSCULAR INTEGRATION OF HUMAN MOVEMENT. The neurophysiological and functional neuroanatomical processes involved in the sensory and motor control of movement, posture and balance in the human. Peripheral and central sensorimotor structures, and neurological diseases that effect human movement and balance control will be discussed. Prerequisite: One of HKIN 191, HKIN 291 and third-year standing. [3-0]

HKIN 392 (3) THE LEISURE AND SPORT INDUSTRY. Economic and financial issues in the leisure and sport industry. Topics include entrepreneurship, economic impact, commercialization, patterns of ownership and control, and selected financial practices. Prerequisite: COMM 457 and third-year standing. [3-0]

HKIN 400 (3) PLANNING PHYSICAL EDUCATION, SPORT AND EXERCISE PROGRAMS. Processes, techniques and considerations in the planning, implementation and evaluation of physical education, sport and exercise programs in both public and private agencies. Prerequisite: Third-year standing. [3-0]

HKIN 420 (3/9) D COACHING EFFECTIVENESS IN SELECTED SPORTS AND ACTIVITIES. Specific topics to be announced each year. Prerequisite: Appropriate 200-level Performance Analysis course and third-year standing. [3-0]

HKIN 448 (3/6) D DANCE CHOREOGRAPHY. Term 1: foundations of choreography; Term 2: (optional) advanced concepts in choreography for stage and film production. Prerequisite: HKIN 115B (Dance) and third-year standing. [2-2; 2-2]

HKIN 455 (15) FIELD WORK AND FIELD RESEARCH PRACTICUM. Field work and a field research project will be undertaken concurrently in a cooperating leisure, sport or other agency over one term in fourth year (30 hours per week). Students will also attend weekly seminars to discuss field work and the field research projects. Limited enrolment. Prerequisite: One of HKIN 371, HKIN 372. Fourth-year standing and approval from Program Coordinator.

HKIN 456 (3) DIRECTED STUDIES ABROAD. A program of lectures, seminars, visits and directed study of selected topics on site in a foreign country. Prerequisite: Third-year standing.

HKIN 461 (3) PREVENTION OF SPORTS INJURIES I. Training and safety strategies for the prevention of injuries to the musculoskeletal system and sense organs. Credit will be given for only one of HKIN 461 and FMPR 480. Prerequisite: All of HKIN 361, HKIN 363 and either (a) all of HKIN 190, HKIN 191 or (b) all of HKIN 290, HKIN 291 and third-year standing. Corequisite: HKIN 463. [3-0]

HKIN 462 (3) SKELETAL MUSCLE ADAPTABILITY TO EXERCISE AND FATIGUE. The mechanism(s) underlying skeletal muscle adaptation to physiological overloads as with physical activity will be discussed. The etiology of muscle fatigue resulting from exercise will be discussed in light of substrate supply, end-product accumulations and protein functions. Prerequisite: HKIN 463 and either (a) all of HKIN 190, HKIN 191 or (b) all of HKIN 290, HKIN 291 and third-year standing. [3-0]

HKIN 463 (3) PHYSIOLOGY OF EXERCISE. Study of the acute and chronic effects of exercise on body systems; and relationship of the functional capacity of individual systems to maximal human performance. Students can receive credit for only one of HKIN 375 or HKIN 463. Prerequisite: Either (a) all of ANAT 390, BIOL 353 or (b) all of HKIN 190, HKIN 191 or (c) all of HKIN 290, HKIN 291 and third-year standing. [2-2]

HKIN 464 (3) HEALTH PROMOTION AND PHYSICAL ACTIVITY. Current perspectives on health promotion and health education; design and implementation of health promotion strategies in a variety of arenas, particularly health promotion/education strategies aimed at encouraging physical activity. Prerequisite: HKIN 252 and third-year standing. [3-0]

HKIN 467 (3) PHYSICAL ACTIVITY AND MENTALLY HANDICAPPED PERSONS. A developmental approach to physical activity programs for mentally handicapped people of all ages; fieldwork. Prerequisite: Third-year standing. [2-2]

HKIN 468 (3) HUMAN MOTOR PERFORMANCE. Acquisition, performance and control of skilled movements. Processes and underlying mechanisms involved in learning and performing motor skills. Students can receive credit for only one of HKIN 330 or HKIN 468. Prerequisite: Third-year standing. [2-2]

HKIN 469 (3) EXERCISE PRESCRIPTION. Theory and methods of fitness appraisal and exercise prescription for normal and special populations. Pre- or corequisites: HKIN 370 and 463. Prerequisite: Third-year standing. [3-0]

HKIN 471 (3) PREVENTION OF SPORTS INJURIES II. Training and safety strategies for the prevention of injuries or disorders of internal organs and central nervous system. Environmental and nutritional factors in conditioning and pre-event preparation. Credit will be given for only one of HKIN 471 and FMPR 481. Prerequisite: HKIN 461 and third-year standing. [3-0]

HKIN 473 (3) HUMAN BIOMECHANICAL ANALYSIS. Advanced quantitative analysis of human motion. Prerequisite: HKIN 363 or first-year Physics. And third-year standing. [3-0]

HKIN 481 (3) SPORT MARKETING AND COMMUNICATION. A seminar on the application of social science theories and methods to sport marketing and communica-

tion. Prerequisite: COMM 465 and third-year standing. [3-0]

HKIN 489 (3-9) D SEMINAR. Current topics and research in specific areas. Prerequisite: Fourth-year standing. [3-0-0; 3-0-0]

HKIN 492 (3) HUMAN RESOURCE DEVELOPMENT IN LEISURE AND SPORT AGENCY. Human resource development issues and strategies are examined in leisure and sport environments. Prerequisite: COMM 329 and third-year standing. [3-0]

HKIN 499 (3) PROJECTS IN HUMAN KINETICS. Provides opportunities to perform research pertaining to a chosen area of human kinetics. Prerequisite: Fourth year standing and permission of Associate Director, Undergraduate Affairs.

HKIN 500 (3-12) D SPECIAL TOPICS IN HUMAN KINETICS.

HKIN 530 (3/6) D DIRECTED STUDIES. Topics selected by the student, with the approval of the Graduate Advisor, can be studied under the supervision of a member of the faculty.

HKIN 551 (3) MATHEMATICAL APPLICATIONS IN THE STUDY OF SPORT AND PHYSICAL ACTIVITY. A selection of topics from: Stochastic models applied to the study of motor learning, involvement in sport, socialization through sport, etc; the assessment of change; analyses of scoring systems and playoff procedures used in various sports; game theory.

HKIN 560 (3) MODELS OF SPORT ORGANIZATION. An analysis and comparison of models of sport organization in selected countries.

HKIN 562 (3) BIOENERGETICS OF PHYSICAL ACTIVITY. Basic energy systems of the human body; primarily concentrating on the bioenergetics of the skeletal muscle cell, recovery from muscular work, substrate utilization, muscle fiber types, strength, endurance and the physiological assessment of maximal performance.

HKIN 563 (3) MEASUREMENT OF HUMAN MOTION. A critical evaluation of research tools used to measure and assess human motor performance including electromyography, anthropometry, ergometers, indirect calorimetry, cinematography, and indirect dynamics.

HKIN 564 (3) PSYCHO-SOCIAL ASPECTS OF PHYSICAL ACTIVITY. Selected psycho-social considerations in sport: initial and continuing involvement in the competitive sport environment.

HKIN 565 (3) PHYSIOLOGICAL ASPECTS OF PHYSICAL ACTIVITY. Survey of research regarding the physiological aspects of activity; the effects of altitude and environmental temperature on man's performance in exercise and sports.

HKIN 567 (3) HUMAN MOTOR PERFORMANCE. Processes underlying the ability to learn and perform motor skills.

HKIN 568 (3) SEMINAR IN HUMAN MOTOR PERFORMANCE. Reports and discussions of research literature concerning theories and

findings in human performance. Special emphasis is given to understanding the basic mechanisms underlying motor performance within the framework of man as a component system.

HKIN 570 (3) RESEARCH METHODS IN HUMAN KINETICS. Research methods applied to the study of sport and physical activity, the nature of scientific inquiry, the design of experiments, the survey as a research medium, the historical and philosophical methods of inquiry, the writing of the research report.

HKIN 571 (3) DEVELOPMENTAL AND ADAPTED PHYSICAL EDUCATION. The theory and practice of adapted physical education. Programs of general class activities, special adapted physical education and recreation for the disabled, handicapped and aged. The laboratory period affords practical experience in individual and group methods for conducting developmental conditioning and corrective exercises.

HKIN 573 (3) SEMINAR IN MECHANICAL ANALYSIS OF HUMAN MOVEMENT. An investigation of human movement using cinematographical and other research methods. The case study approach will be used to examine kinesiological concepts and principles.

HKIN 574 (3) SEMINAR IN HEALTH PROMOTION THROUGH PHYSICAL ACTIVITY. The relationship of new concepts in health to the promotion of health through physical activity; the application of research findings from a number of disciplines to the identification, selection, and targeting of health promotion/education strategies related to physical activity.

HKIN 580 (3) SEMINAR IN CURRENT PROBLEMS IN HUMAN KINETICS. Objectives; programs; leadership; history and trends; professional status; community organizations and auspices; attitudes and philosophy.

HKIN 581 (3) SPORT, LEISURE AND CONSUMER CULTURE. Sport and leisure are viewed in the context of theoretical debates about mass society and consumer culture.

HKIN 582 (3) SEMINAR IN CANADIAN SPORT HISTORY. Selected topics in Canadian sport history; emphasis on the twentieth century.

HKIN 583 (3) PHYSICAL EDUCATION, SPORT AND EXERCISE PROGRAMS. The development of curricula, implementation and evaluation techniques in physical education, sport and exercise programs; relationships of programs in schools, community centres and other institutions.

HKIN 584 (3) PHYSICAL GROWTH AND MOTOR DEVELOPMENT. The process of human physical growth and the relationship between growth/maturation and physical activity; sequential development of locomotor and manipulative skills and the application of critical period/optimal period literature to developmental skills.

HKIN 585 (3) COACHING SCIENCE I. The application of research findings from exercise physiology, human growth and motor develop-

ment, biomechanics and sport medicine, to the coaching of athletes.

HKIN 586 (3) COACHING SCIENCE II. The application of research findings from sport psychology, sport sociology and human motor learning, to the coaching of athletes.

HKIN 590 (3) SEMINAR IN RESEARCH ON TEACHING IN PHYSICAL EDUCATION. Development, methods and results of research on teaching physical education.

HKIN 591 (3) SEMINAR IN THE ORGANIZATIONAL ANALYSIS OF LEISURE. Selected topics in organizational theory as applied to the analysis of leisure and sport organizations.

HKIN 595 (3) MASTER'S GRADUATING PAPER.

HKIN 598 (3) DIRECTED FIELD STUDIES IN SPORT AND PHYSICAL ACTIVITY AGENCIES.

HKIN 599 (12) MASTER'S THESIS. Pass/Fail.

HKIN 601 (3/12) C DOCTORAL SEMINAR.

HKIN 699 (0) PH.D. THESIS. Pass/Fail.

HMEC — HOME ECONOMICS FACULTY OF LAND AND FOOD SYSTEMS

HMEC 352 (3) INTRODUCTORY TEXTILE SCIENCE. Textile performance concepts. Interrelationships of fibres, yarns, fabric construction, dyes and finishes with a focus on consumer apparel and household textile products. Textile legislation. [3-0]

HMEC 360 (3) DESIGN FUNDAMENTALS. Visual elements and principles of design, the nature of aesthetics and the influence of design on our physical environment. [2-3]

HMEC 366 (3) TEXTILE DESIGN. Design, structures, and techniques of decorative textiles; influence of historic textiles on contemporary fabrics; textile design techniques of selected cultures. Prerequisite: HMEC 360. [1-3]

HMEC 450 (3) HISTORY OF COSTUME. A survey of the aesthetic, economic, cultural, social, and political significance of costume in history from ancient Egypt to contemporary times. [3-0]

HMED — HOME ECONOMICS EDUCATION FACULTY OF EDUCATION

HMED 306 (3) TEACHING AND LEARNING HOME ECONOMICS ACROSS THE CURRICULUM: ELEMENTARY AND MIDDLE YEARS.

HMED 314 (4/5) D CURRICULUM AND INSTRUCTION IN HOME ECONOMICS: SECONDARY. Pass/Fail. Prerequisite: A completed concentration in home economics or permission of the Head.

HMED 414 (3) CURRICULUM AND INSTRUCTION IN HOME ECONOMICS. Curriculum development with an emphasis on reflection on practice and current curriculum issues. Prerequisite: HMEC 314. [3-0]

HMED 440 (3) SPECIAL STUDY IN SUBJECT-MATTER FIELD: TEXTILE STUDIES. Topics in a subject field relevant to teaching and not covered in previous undergraduate work. Pass/Fail.

HMED 441 (3) SPECIAL STUDY IN SUBJECT-MATTER FIELD: FOODS STUDIES. Topics in a subject field relevant to teaching and not covered in previous undergraduate work. Pass/Fail.

HMED 442 (3) SPECIAL STUDY IN SUBJECT-MATTER FIELD: FAMILY STUDIES. Topics in a subject field relevant to teaching and not covered in previous undergraduate work. Pass/Fail.

HMED 465 (3-12) D SPECIAL TOPICS IN HOME ECONOMICS EDUCATION. Prerequisite: HMED 314 and some teaching experience.

HMED 508 (3-6) D REVIEW OF RESEARCH IN HOME ECONOMICS EDUCATION. Studies are made of recent research bearing on educational practice. Prerequisite: Appropriate senior undergraduate introductory or methods course.

HMED 514 (3) CURRICULUM AND INSTRUCTION IN HOME ECONOMICS. Advanced studies of curriculum and instruction theories, and research. Prerequisite: HMED 414.

HMED 545 (3) FOUNDATIONS OF HOME ECONOMICS EDUCATION. A review and critical analysis of the history and philosophy of school home economics programs.

HMED 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD. Courses in various subject matter fields designed to bring teachers up to date in recent findings in each field.

HMED 580 (3-12) C PROBLEMS IN EDUCATION. Investigation and report of a problem.

HMED 590 (3) GRADUATING PAPER. Pass/Fail.

HMED 598 (3-12) C FIELD EXPERIENCES. For those on master's, doctoral and diploma programs.

HMED 599 (6/12) C MASTER'S THESIS.

HUNU — HUMAN NUTRITION FACULTY OF LAND AND FOOD SYSTEMS

Most of the undergraduate courses have been renamed as Food, Nutrition and Health (FNH). Please see this section

HUNU 500 (3) RESEARCH METHODS IN HUMAN NUTRITION. Experimental design, methods of survey research, nutritional epidemiology, clinical research, and laboratory animal research. Issues such as animal models, ethics in animal and human research, statistical methods, and preparation of written reports and manuscripts, etc, will be addressed. Required of all graduate students in Human Nutrition. [3-0]

HUNU 503 (3) CURRENT ISSUES IN NUTRITION AND METABOLISM.

HUNU 505 (3) CURRENT ISSUES IN NUTRITION AND DISEASE.

HUNU 507 (3) CURRENT ISSUES IN NUTRITION OVER THE LIFE SPAN.

HUNU 509 (3) BEHAVIOURAL ASPECTS OF HUMAN NATURE.

HUNU 531 (3) M.SC. SEMINAR.

HUNU 547 (2-6) C DIRECTED STUDIES. In special cases, directed studies on certain aspects of nutrition may be arranged for graduate students in attendance.

HUNU 549 (6/12) C M.SC. THESIS.

HUNU 631 (3) PH.D. SEMINAR.

HUNU 649 (0) PH.D. THESIS.

IAR — ASIAN RESEARCH FACULTY OF GRADUATE STUDIES

IAR 500 (6) PERSPECTIVES AND METHODS IN ASIA PACIFIC POLICY STUDIES.

IAR 505 (3) THE NEW INSTITUTIONALISM IN ASIA.

IAR 506 (3) CULTURE & GLOBALIZATION IN ASIA-PACIFIC. Interdisciplinary investigation of the idea that globalization is not limited to the economic sphere but also includes popular culture, communications, travel, food and desire of the other.

IAR 507 (3) EAST ASIAN ORGANIZATIONS IN COMPARATIVE PERSPECTIVE. Contemporary theories of organizational behavior applied to economic organizations in Japan, with some comparisons to South Korean, Taiwanese and Chinese firms. Historical and theoretical conceptualizations of business organizations with empirical applications as applied to East Asian firms.

IAR 511 (3) CROSS-NATIONAL COMPARISONS IN THE SOCIAL SCIENCES. The methodological and epistemological underpinnings of cross-national comparative research across the social sciences. Focused on but not limited to Northeast Asia. Equivalency: SOCI 511.

IAR 515 (2-6) C TOPICS IN ASIA PACIFIC POLICY STUDIES.

IAR 520 (12) MASTER'S THESIS.

IAR 525 (12) PRACTICUM IN ASIA PACIFIC POLICY STUDIES.

IEST — EUROPEAN STUDIES FACULTY OF GRADUATE STUDIES

IEST 500 (0) PRO-SEMINAR EUROPEAN STUDIES.

IEST 501 (3) INTERNSHIP/EUROPEAN EXCHANGE.

IEST 502 (3-9) D DIRECTED READING.

IEST 505 (3-6) D TOPICS IN EUROPEAN STUDIES.

IEST 511 (3) EXTENDED ESSAY.

IEST 512 (9) MASTER'S THESIS.

IEST 521 (3) THE ECONOMICS OF EUROPEAN INTEGRATION.

IEST 531 (3) EXTERNAL RELATIONS OF THE EUROPEAN UNION.

IEST 541 (3) POLITICAL AND LEGAL FOUNDATIONS OF THE EUROPEAN UNION. Credit will not be given for both IEST 541 and LAW 341.

IEST 551 (3-6) D POLITICS AND CULTURE IN EUROPE.

IEST 561 (3) CITIZENSHIP AND MIGRATION IN CONTEMPORARY EUROPE.

IEST 591 (3) GEOGRAPHY OF EUROPE. Credit will not be given for both IEST 591 and GEOG 493.

IHHS — INTERPROFESSIONAL HEALTH & HUMAN SERVICE COLLEGE OF HEALTH DISCIPLINES

IHHS 200 (3) UNDERSTANDING THE SOCIOCULTURAL DETERMINANTS OF THE HEALTH OF POPULATIONS. The idea of "population health," and the implementation and evaluation of programs or policies to improve health. Open to all students. [3-0-0]

IHHS 300 (3) WORKING IN INTERNATIONAL HEALTH. Tutored, web based course on planning/preparing for work in a developing country. Causes of ill health amongst populations living in poverty; analysis of available solutions. Health Science background not essential.

IHHS 301 (3) FIRST NATIONS HEALTH AND THE TRADITIONAL ROLE OF PLANTS. First Nations medical systems and medicinal plants. Bridging the traditional with modern sciences. Prerequisite: Enrollment in a health and human service program.

IHHS 400 (3) HEALTH CARE TEAM DEVELOPMENT. Skills, knowledge, roles and issues involved with working successfully in interprofessional health and human service teams. Intended for upper division students in any health and human service program.

IHHS 401 (3) HEALTH CARE ETHICS. An interprofessional approach using case studies to illustrate the application of bioethical principles and theories. Intended for students in health and human service programs. [3-0]

IHHS 402 (6) HIV/AIDS PREVENTION AND CARE. Preparation for senior students to respond effectively to the HIV/AIDS epidemic and its consequences. The knowledge and skills required for interprofessional and discipline-specific work are explored. Intended for students in health and human service programs.

IHHS 403 (3) INTERDISCIPLINARY PRACTICE WITH CHILDREN AND FAMILIES. Interprofessional perspectives, challenges, and strategies. Clinical experience and some knowledge of child protection issues required. [3-0-0]

IHHS 404 (3) FIRST NATIONS HEALTH: HISTORICAL AND CONTEMPORARY ISSUES. An epistemological approach that considers the determinants of health and spiritual-environmental-cultural perspectives. [3-0-0]

IHHS 405 (6) PALLIATIVE CARE. Attitudes, knowledge, skills and abilities necessary for interprofessional and discipline-specific work in palliative care. For students registered in health and human service programs only.

IHHS 406 (3) AGING FROM AN INTERDISCIPLINARY PERSPECTIVE. Issues associated with aging in our society. For students registered in health and human services programs only.

IHHS 407 (3) DISABILITY AND JUSTICE.

INDE — INTERDEPARTMENTAL MEDICINE FACULTY OF MEDICINE

INDE 410 (6) INTRODUCTORY CLINICAL SKILLS AND SYSTEMS I. Small group sessions may be supplemented by self-study resources. Students will be introduced to communication skills, components of health history, and the physical exam, and will develop basic skills of examination of the cardiovascular, respiratory and genito-urinary systems. [0-0-2]

INDE 420 (6) CLINICAL SKILLS SYSTEMS II. Small group sessions may be supplemented by self-study resources. Students will further develop general and specific communications skills, while learning a systemic approach to the remaining body systems. Experience with both pediatric and adult patients will be provided. [0-0-2]

INDE 421 (0) CLINICAL SKILLS II. Final examination in course administered by the Departments of Medicine, Surgery, Obstetrics/Gynaecology, Paediatrics and Psychiatry. Exam is an OSCE (Objective Structured Clinical Examination).

INDE 430 (1) PROFESSIONAL DIMENSIONS IN MEDICINE. Ethics, jurisprudence, medical office procedures, physician well-being in relation to professional practice of medicine. Introduction to clinical procedures. Prerequisite: Medicine II.

INDE 440 (4) ADVANCED CLINICAL ELECTIVE I. Electives/Selectives in clinical departments with increased responsibility.

INDE 441 (4) ADVANCED CLINICAL ELECTIVE II. Electives/Selectives in clinical departments with increased responsibility.

INDE 442 (4) ADVANCED CLINICAL SELECTIVE I. Electives/Selectives in clinical departments with increased responsibility. Prerequisite: Phase IV (Junior Clerkship).

INDE 443 (4) ADVANCED CLINICAL SELECTIVE II. Electives/Selectives in clinical departments with increased responsibility. Prerequisite: Phase IV (Junior Clerkship).

INDE 450 (4) SENIOR CLERKSHIP. A four-week senior clinical elective for fourth year students. Students will participate in all activities including rounds, admissions and case

presentations associated with the particular clinical rotation.

INDE 451 (0) CLINICAL SKILLS III. Final examination for third year encompassing all clinical subjects.

INDE 452 (2) CLINICAL ELECTIVE IN THIRD YEAR. Study in approved ambulatory or community setting during the 3rd year of the MD program.

INDE 453 (10) EFFECTIVE LEARNING SKILLS FOR MEDICAL PRACTICE. A 10-week full-time course that consists of 6 components: weekly themes with associated 2-hour lecture series; therapeutics; health care and epidemiology; advanced communication skills; cross-cultural healthcare ethics/law and politics.

INDO — INDONESIAN FACULTY OF ARTS

INDO 102 (6) INTRODUCTORY INDONESIAN. Spoken and written Indonesian.

INDO 200 (6) INTERMEDIATE INDONESIAN. Study of the grammar and introduction to Indonesian literature. Prerequisite: INDO 102.

INDS — INTERDISCIPLINARY STUDIES FACULTY OF GRADUATE STUDIES

INDS 501 (0) INSTRUCTIONAL SKILLS WORKSHOP. Introduction to concepts and practice in higher education instruction; emphasis on lesson planning, student participation and instructional aides; includes videotaped practice teacher/peer feedback 28 classroom hours.

INDS 502 (1-6) D INTERDISCIPLINARY STUDIES: THEMATIC SEMINARS. Seminars, lectures, and discussions of topics involving several faculties. Contact the Individual Interdisciplinary Studies Program for specific topics (www.iisgp.ubc.ca).

INDS 530 (3-6) C DIRECTED STUDIES. A series of directed readings related to student's area of interdisciplinary studies. This advanced course may be taken upon approval of the Program head.

INDS 549 (6/12) C MASTER'S THESIS.

INDS 649 (0) PH.D. THESIS.

ISCI — INTEGRATED SCIENCES FACULTY OF SCIENCE

ISCI 300 (1) INTERDISCIPLINARY SEMINAR. Critical analysis of recent scientific literature that combines disciplines that students are integrating in their Integrated Sciences Curriculum. Prerequisite: Registration in Integrated Sciences Program [0-0-1.5*; 0-0-1.5*]

ISCI 311 (3) THE SIZE OF THINGS. Scaling as a general approach to laws governing the geometry, kinematics and dynamics of systems. Dimensional analysis, isometry and allometry applied to topics from Biology, Physics, Earth Science and Economics. Priority to students in the Integrated Sciences Program. Prerequisite: Third-year standing in the Faculty of Science. [2-0-2]

ISCI 320 (3) INTERDISCIPLINARY SCIENCES FIELD COURSE. Pre-trip preparation, field research/exploration, followed by integration of key concepts and presentation of results. Course content/location will vary; fee payable six weeks prior to start of course. Prerequisite: Third-year standing in the Faculty of Science.

ISCI 322 (3) SCIENCE OF MEASUREMENT AND INSTRUMENTATION. Interactive course integrating diverse aspects of science: semi-quantitative overview of physical principles underlying modern measurement technology; philosophy of measurement; accuracy and limits to measurement, and resultant scientific, sociological and economic consequences. Priority to students in the Integrated Sciences Program. Prerequisite: Third-year standing in the Faculty of Science.

ISCI 330 (3) TOPICS IN INTEGRATED SCIENCES. Interactive examination of a theme common to all areas of science. Themes will change from year to year. Priority to students in the Integrated Sciences Program. Prerequisite: Third-year standing in the Faculty of Science [3-0-0]

ISCI 333 (3) PRINCIPLES OF BIOLOGICAL AND ARTIFICIAL CONTROL SYSTEMS. Interactive exploration of information networks. Integrated principles of neural and computational control systems encompassing scientific, social and philosophical perspectives. Priority to students in the Integrated Sciences Program. Prerequisite: Third-year standing in the Faculty of Science. [2-0-2]

ISCI 345 (3) INTEGRATIVE BIOINFORMATICS. Storage and processing of information in biological systems. Computational methods for recovering and interpreting stored genetic information. Priority to students in the Integrated Sciences Program. Prerequisite: Third-year standing in the Faculty of Science. [2-0-2]

ISCI 350 (3) DARWINIAN MEDICINE. Using the Darwinian theory of natural selection to explore explanations of infectious diseases, allergies, cancer, mental illness, and other human diseases. Priority to students in the Integrated Sciences Program. Prerequisite: Third-year standing in the Faculty of Science. [2-0-2]

ISCI 398 (3) CO-OPERATIVE WORK PLACEMENT I. Industrial or academic work experience for a minimum of 4 months. Normally taken in Winter Session of third year or Summer Session after third year. Technical report required. Restricted to students in the ISP Co-op program. Prerequisite: One term in ISP.

ISCI 399 (3) CO-OPERATIVE WORK PLACEMENT II. Industrial or academic work experience for a minimum of 4 months. Technical report required. Restricted to students admitted to the Co-op Program in ISP. Prerequisite: ISCI 398.

ISCI 411 (3) SCIENTIFIC UNCERTAINTY AND RISK. Examines theory and practice of analyzing risk in many fields and disciplines. Topics include assessing, communicating, and

managing risks. Emphasis on dealing with scientific uncertainty. Priority to ISP students. Prerequisite: Third-year standing in Faculty of Science and a statistics course. [3-0-0]

ISCI 422 (3) MODELS IN SCIENCE. Meaning, nature, use, strengths and limitations of models as investigative tools in all scientific disciplines. Detailed investigation of selected model systems from different scientific disciplines. Priority to students in the Integrated Sciences Program. Prerequisite: Third-year standing in the Faculty of Science. [2-0-2]

ISCI 448 (3-6) D DIRECTED STUDIES. Permission of the Director is required.

ISCI 451 (3) COMPLEXITY. Structure, function, evolution and manipulation of complex systems from various disciplines. Tools for analysis and synthesis of complexity. Case studies include real (e.g., weather, human brain, economics) and formal (e.g., chaos, artificial neural networks, genetic algorithms) systems. Prerequisite: Third-year standing in the Faculty of Science. [3-0-0]

ISCI 490 (3) STUDENT DIRECTED SEMINARS. Self-directed, collaborative studies, in a group-learning environment, initiated and coordinated by senior undergraduate students with the supervision of a faculty advisor. Course structure, enrolment and delivery methods will comply with the Handbook for Student Directed Seminars. Prerequisite: Third-year standing in the Faculty of Science. [3-0-0]

ISCI 498 (3) CO-OPERATIVE WORK PLACEMENT III. Industrial or academic work experience for a minimum of 4 months. Technical report required. Restricted to students admitted to the Co-op Program in ISP. Prerequisite: ISCI 399.

ISCI 499 (3) CO-OPERATIVE WORK PLACEMENT IV. Industrial or academic work experience for a minimum of 4 months. Technical report required. Restricted to students admitted to the Co-op Program in ISP. Prerequisite: ISCI 498.

ITAL — ITALIAN FACULTY OF ARTS

Students with Italian 11 or 12 or exposure to the Italian language or dialects must consult the Italian undergraduate advisor for placement in appropriate courses. Some 400-level ITAL courses may be taken as ITST courses and be conducted in English (see details below). Majors and Honours must take such courses as ITAL and will be expected to do their reading and assignments in Italian language. Supplementary tutorials in Italian will be provided as needed for such courses. Credit in ITAL will preclude credit in ITST and vice versa.

ITAL 101 (3) FIRST-YEAR ITALIAN I. Grammar, reading, writing, and oral practice for beginners without previous exposure to the Italian language or dialects.

ITAL 102 (3) FIRST-YEAR ITALIAN II. Grammar, reading, writing and oral practice for beginners. Prerequisite: ITAL 101.

ITAL 103 (6) INTENSIVE FIRST-YEAR ITALIAN. An accelerated course. Grammar, reading, writing, comprehension. This course is equivalent to ITAL 101 plus 102 offered in the same semester.

ITAL 201 (3) SECOND-YEAR ITALIAN I. Reading, writing and oral practice, with constant and systematic reference to the grammatical structure of the language. Prerequisite: ITAL 102.

ITAL 202 (3) SECOND-YEAR ITALIAN II. Reading, writing and oral practice, with constant and systematic reference to the grammatical structure of the language. Prerequisite: ITAL 201.

ITAL 203 (6) INTENSIVE SECOND-YEAR ITALIAN. An accelerated course. Grammar review, reading, composition, comprehension. This course is equivalent to ITAL 201 plus 202 offered in the same semester.

ITAL 301 (3) ADVANCED COMPOSITION: TRANSLATION AND STYLISTICS I. Prerequisite: All of ITAL 202, ITAL 203. Or permission of the department.

ITAL 302 (3) THIRD-YEAR ITALIAN II. Reading, writing, speaking, comprehension. Special emphasis on oral practice and on composition. Prerequisite: ITAL 301, or permission of the department. Prerequisite: ITAL 301.

ITAL 303 (6) ITALIAN LITERATURE AND CULTURE OF THE MEDIEVAL AND EARLY MODERN PERIOD. A thematic approach to Italian literary works from the origins to the end of the 16th century considered in a broad cultural context. Alternates with ITAL 304. Prerequisite: ITST 231 Corequisite: ITST 231

ITAL 304 (3/6) D ITALIAN LITERATURE AND CULTURE OF THE MODERN AND CONTEMPORARY AGE. The development of modern and contemporary Italian literature and culture against the background of social and historical events. Alternates with ITAL 303. Prerequisite: ITST 232 Corequisite: ITST 232

ITAL 342 (3) INTRODUCTION TO ITALIAN FOR SENIOR STUDENTS I. An intensive course in spoken and written Italian. Grammar, conversation, reading of literary texts. Prerequisite: proficiency in another Romance language or Latin. Not considered a third-year course for purposes of satisfying degree requirements. Prerequisite: Proficiency in another Romance Language or in Latin

ITAL 343 (3) INTRODUCTION OR ITALIAN FOR SENIOR STUDENTS II. An intensive course in spoken and written Italian. Grammar, conversation, progressive reading of various texts. Prerequisite: Proficiency in another Romance language or Latin. Not considered a third-year course for purposes of satisfying degree requirements.

ITAL 401 (3) ADVANCED STUDIES IN ITALIAN LANGUAGE AND STYLE I. Advanced reading, writing, speaking, comprehension. Special emphasis on oral practice.

Alternates with ITAL 402. Prerequisite: ITAL 302.

ITAL 402 (3) ADVANCED STUDIES IN ITALIAN LANGUAGE AND STYLE II. Advanced reading, writing, speaking, comprehension. Special emphasis on composition. Alternates with ITAL 401. Prerequisite: ITAL 401.

ITAL 403 (3) DANTE ALIGHIERI'S DIVINE COMEDY. A close reading of Dante's masterpiece, along with excerpts from some of his other works: *Vita Nuova*, *Convivio*, *Monarchia*, *Epistles*.

ITAL 404 (3) ITALIAN LITERATURE OF THE MIDDLE AGES. Italian literature of the Middle Ages in its intellectual, socio-political and cultural context. Dante and his contemporaries and/or immediate followers (may include Petrarch and Boccaccio). Precludes credit for ITST 414.

ITAL 405 (3) TOPICS IN THE ITALIAN LITERATURE AND CULTURE OF THE RENAISSANCE. Italian literature of the Renaissance in its intellectual, socio-political and cultural context. Authors may range from Dante, Petrarch and Boccaccio to Machiavelli, Ariosto and Tasso. Precludes credit for ITST 415.

ITAL 408 (3) TOPICS IN NINETEENTH-CENTURY ITALIAN LITERATURE AND CULTURE. Italian literature of the 19th century in its intellectual, socio-political and cultural context. Precludes credit for ITST 418.

ITAL 409 (3) TOPICS IN MODERN AND CONTEMPORARY ITALIAN LITERATURE AND CULTURE. Italian literature of the 20th century in its intellectual, socio-political and cultural context. Precludes credit for ITST 419.

ITAL 420 (3/6) D SPECIAL TOPICS IN ITALIAN LANGUAGE, LITERATURE AND CULTURE. Course content will vary. May be taken twice for a total of 6 credits.

ITAL 420 (3-12) D SPECIAL TOPICS IN ITALIAN LANGUAGE AND LITERATURE. A maximum of 6 credits is available in any one topic.

ITAL 430 (3) ITALIAN CINEMA IN ITS CULTURAL BACKGROUND. A survey of major films in their intellectual, socio-political and cultural context.

ITAL 449 (6/12) C HONOURS ESSAY.

ITAL 499 (3) HONOURS ESSAY.

ITAL 501 (3/6) D DANTE: THE MINOR WORKS.

ITAL 502 (3/6) D DANTE: THE DIVINE COMEDY.

ITAL 505 (3/6) D STUDIES IN THE LITERATURE OF THE RENAISSANCE.

ITAL 507 (3/6) D STUDIES IN ROMANTICISM.

ITAL 508 (3/6) D STUDIES IN MODERN ITALIAN LITERATURE.

ITAL 515 (3/6) D TOPICS IN ITALIAN LANGUAGE.

ITAL 520 (3/12) D ITALIAN LANGUAGE AND LITERATURE. A maximum of 6 credits is available in any one topic.

ITAL 548 (3) GRADUATING ESSAY.

ITAL 549 (6/12) C MASTER'S THESIS.

ITST — ITALIAN STUDIES FACULTY OF ARTS

All Italian Studies courses are conducted in English.

ITST 231 (3) INTRODUCTION TO ITALIAN CULTURE I: FROM THE MIDDLE AGES TO THE EARLY MODERN PERIOD.

ITST 232 (3) INTRODUCTION TO ITALIAN CIVILIZATION II: FROM THE MODERN TO THE POST-COLONIAL AGE.

ITST 310 (3/6) D THE DIVINE COMEDY IN TRANSLATION.

ITST 413 (3) DANTE ALIGHIERI'S DIVINE COMEDY IN TRANSLATION. A close reading of Dante's masterpiece, along with excerpts from some of his other works: *Vita Nuova*, *Convivio*, *Monarchia*, *Epistles*. Precludes credit for ITAL 403.

ITST 414 (3) TOPICS IN THE ITALIAN LITERATURE AND CULTURE OF THE MIDDLE AGES IN TRANSLATION. Italian literature of the Middle Ages in its intellectual, socio-political and cultural context.

ITST 415 (3) TOPICS IN THE ITALIAN LITERATURE AND CULTURE OF THE RENAISSANCE IN TRANSLATION. The Renaissance in its intellectual, socio-political and cultural context. Authors may range from Dante, Petrarch and Boccaccio to Machiavelli, Ariosto and Tasso. Precludes credit for ITAL 405.

ITST 418 (3) TOPICS IN NINETEENTH-CENTURY ITALIAN LITERATURE AND CULTURE IN TRANSLATION. Italian literature of the 19th century in its intellectual, socio-political and cultural context.

ITST 419 (3) TOPICS IN MODERN AND CONTEMPORARY ITALIAN LITERATURE AND CULTURE IN TRANSLATION. Italian literature of the 20th century in its intellectual, socio-political and cultural context.

ITST 421 (3) SPECIAL TOPICS IN ITALIAN STUDIES. Course content will vary. May be taken twice for a total of 6 credits.

ITST 431 (3/6) D LITERATURE OF THE ITALIAN RENAISSANCE IN TRANSLATION.

ITST 432 (3) ITALIAN CINEMA AND ITS CULTURAL BACKGROUND. Films with English subtitles. Precludes credit for ITAL 430.

JAPN — JAPANESE FACULTY OF ARTS

JAPN 100 (3) BEGINNING JAPANESE I. An introduction to modern spoken and written Japanese with emphasis on both form (grammar and syntax) and functions (Non-intensive).

JAPN 101 (3) BEGINNING JAPANESE I. Continuation of JAPN 100 (Non-intensive). Prerequisite: JAPN 100.

JAPN 102 (3) BEGINNING JAPANESE IIA. Continuation of JAPN 101 (Non-intensive). Prerequisite: One of JAPN 101, JAPN 150.

JAPN 103 (3) BEGINNING JAPANESE IIB. Continuation of JAPN 102 (Non-intensive). Prerequisite: JAPN 102.

JAPN 104 (6) BASIC JAPANESE GRAMMAR. Emphasis on grammar, writing and reading. Intended for students with a background in spoken Japanese.

JAPN 150 (6) INTENSIVE BEGINNING JAPANESE I. An introduction to modern spoken and written Japanese with emphasis on both form (grammar and syntax) and functions. Offered in Term 1. Corequisite: JAPN 150 and 151 are normally taken in the same year.

JAPN 151 (6) INTENSIVE BEGINNING JAPANESE II. Continuation of JAPN 150. Offered in Term 2. Prerequisite: One of JAPN 101, JAPN 150.

JAPN 180 (12) INTENSIVE SUMMER COURSE IN JAPANESE. Equivalent to JAPN 100 and 101.

JAPN 210 (3) INTERMEDIATE JAPANESE I A. Prerequisite: JAPN 210. Corequisite: JAPN 210 and 211 normally taken in the same year.

JAPN 211 (3) INTERMEDIATE JAPANESE IB. Continuation of JAPN 210. Prerequisite: JAPN 210. Corequisite: JAPN 210 and 211 are normally taken in the same year.

JAPN 212 (3) INTERMEDIATE JAPANESE II A. Prerequisite: One of JAPN 211, JAPN 250. Corequisite: JAPN 212 and JAPN213 normally taken in the same year.

JAPN 213 (3) INTERMEDIATE JAPANESE II B. Prerequisite: JAPN 212. Corequisite: JAPN212 and JAPN213 normally taken in the same year.

JAPN 250 (6) INTENSIVE INTERMEDIATE JAPANESE. Topics involving cross-cultural communication designed for students who wish to develop linguistic, socio-linguistic, and strategic competence in speaking, listening, reading, and writing modern Japanese. Offered in Term 1. Equivalent to JAPN210 and JAPN211. Prerequisite: One of JAPN 103, JAPN 151. Corequisite: JAPN251 normally taken in same year.

JAPN 251 (6) INTENSIVE INTERMEDIATE JAPANESE II. Continuation of JAPN250. Offered in Term 2. Equivalent to JAPN212 and JAPN213. Prerequisite: One of JAPN 211, JAPN 250. Corequisite: JAPN250 and JAPN251 normally taken in same year.

JAPN 280 (12) INTENSIVE SUMMER COURSE IN INTERMEDIATE JAPANESE. Prerequisite: One of JAPN 103, JAPN 151, JAPN 104 or equivalent. Equivalency: JAPN 200, JAPN 201, JAPN 202, JAPN 203.

JAPN 300 (3) ADVANCED MODERN JAPANESE: READING AND WRITING. Prerequisite: JAPN 201.

JAPN 301 (3) ADVANCED MODERN JAPANESE: READING AND WRITING. Prerequisite: JAPN 300.

JAPN 302 (3) ADVANCED MODERN JAPANESE: CONVERSATION AND COMPOSITION. Improvement of speaking and writing in modern Japanese through grammatical analysis, oral practice, conversation, and composition. Prerequisite: JAPN 203.

JAPN 303 (3) ADVANCED MODERN JAPANESE: CONVERSATION AND COMPOSITION. Prerequisite: JAPN 302.

JAPN 310 (6) JAPANESE FOR SPECIALISTS OF CHINA. Readings in Japanese material dealing with Chinese for students who have a reading knowledge of Chinese. Prerequisite: One of JAPN 103, JAPN 151 or their equivalents.

JAPN 311 (3) CLASSICAL JAPANESE I.

JAPN 312 (3) CLASSICAL JAPANESE I. Prerequisite: JAPN 311.

JAPN 315 (6) JAPANESE FOR PROFESSIONAL LIFE. Technical Japanese as it is used in business, commerce, industry, science, technology, law, etc. Emphasis on grammatical and syntactical features of these special uses of the language and on specialized, current vocabulary. Prerequisite: One of JAPN 201, JAPN 203, JAPN 280.

JAPN 342 (6) READING COURSE IN JAPANESE FOR HONOURS STUDENTS.

JAPN 401 (6) CLASSICAL JAPANESE II. Advanced reading in classical Japanese literary, historical, and philosophical texts. Prerequisite: All of JAPN 311, JAPN 312 or their equivalents.

JAPN 402 (6) READINGS IN JAPANESE POETRY. Translation and analysis of selected works from classical, medieval, and modern periods. Prerequisite: All of JAPN 300, JAPN 301.

JAPN 406 (3) READINGS IN MODERN JAPANESE ESSAYS. An advanced course in the reading and analysis of scholarly texts in modern Japanese drawn from history, sociology, economics, etc. Advanced conversation, composition, and practice in the use of standard reference tools as preparation for independent research in Japanese. Prerequisite: JAPN 301. It is recommended that students complete JAPN 303 prior to taking JAPN 406.

JAPN 408 (3) READINGS IN MODERN JAPANESE LITERATURE. An advanced course in the reading and analysis of literary texts in modern Japanese. Advanced conversation, translation into English and practice in the use of standard reference tools as preparation for advanced research in Japanese. Prerequisite: JAPN 406 and instructor's permission.

JAPN 410 (3) ADVANCED ORAL COMMUNICATION. Oral communication skills appropriate for studying and working in a Japanese-speaking environment either formal or informal. Prerequisite: All of JAPN 301, JAPN 303.

JAPN 411 (3) ADVANCED ORAL COMMUNICATION. Prerequisite: JAPN 410.

JAPN 416 (3) NEWSPAPER JAPANESE. The aim of the course will be to develop fluency in reading contemporary Japanese newspapers. Concentration on current and emerging vocabulary, evolving grammatical features, and style of presentation. Prerequisite: All of JAPN 301, JAPN 303.

JAPN 417 (3) NEWSPAPER JAPANESE. Prerequisite: JAPN 416.

JAPN 420 (3) GRAMMATICAL ANALYSIS OF JAPANESE. Analysis of the grammatical structure of modern Japanese. Contrastive analysis of Japanese and English as well as error analysis. Prerequisite: All of JAPN 301, JAPN 303.

JAPN 421 (3) GRAMMATICAL ANALYSIS OF JAPANESE. Prerequisite: JAPN 420.

JAPN 440 (3-18) C SUPERVISED STUDY IN THE JAPANESE LANGUAGE. Primarily for graduate students.

JAPN 442 (12) TUTORIAL IN JAPANESE FOR HONOURS STUDENTS. This course will require the presentation of at least one research paper.

JRNL — JOURNALISM SCHOOL OF JOURNALISM

JRNL 503 (3-9) D NEWSROOM PRACTICE AND STANDARDS.

JRNL 505 (3-9) D PRINCIPLES OF INVESTIGATIVE JOURNALISM.

JRNL 510 (3) NEWS WRITING AND REPORTING.

JRNL 520 (3-9) D ISSUES IN CONTEMPORARY JOURNALISM.

JRNL 523 (3) AUDIENCE RESEARCH AND RECEPTION THEORIES.

JRNL 525 (3) CRITICAL THINKING FOR JOURNALISTS.

JRNL 533 (3-9) D ETHICS AND THE LAW.

JRNL 535 (3) THE PRESS AND SOCIETY.

JRNL 539 (3-9) D DIRECTED STUDIES.

JRNL 549 (6-12) D THESIS PROJECT.

KORN — KOREAN FACULTY OF ARTS

KORN 102 (6) BASIC KOREAN. An introduction to the grammar and syntax of modern spoken and written Korean.

KORN 104 (6) BASIC KOREAN GRAMMAR. Emphasis on grammar, writing and reading. For heritage learners and students with prior background in spoken Korean. Prepares students for KORN 300.

KORN 200 (6) INTERMEDIATE KOREAN. Reading and writing of modern colloquial Korean at an intermediate level. Prerequisite: KORN 102.

KORN 300 (6) READINGS IN KOREAN TOPICS. Readings in intermediate-level Korean on aspects of Korean culture, customs, and contemporary life, along with structured conversations based on those readings. Prerequisite: KORN 200.

KORN 301 (3/6) D INTRODUCTION TO SINO-KOREAN READINGS. Chinese characters in their Korean pronunciations and shapes. Students learn approximately 600 characters, related vocabulary, and do structured readings in mixed scripts on aspects of Korean culture and contemporary life. Prerequisite: Permission of instructor.

KORN 410 (3/6) D MODERN KOREAN SHORT FICTION. Prerequisite: KORN 300.

KORN 411 (3/6) D ADVANCED READINGS IN KOREAN NON-FICTION. Guided readings on contemporary affairs from the Korean press and/or selected readings in Korean academic prose. Prerequisite: KORN 300.

KORN 412 (3/6) D KOREAN-TO-ENGLISH TRANSLATION. Translation into English of Korean writing in various literary genres, including short story, poetry, personal essay, and academic essay. Supplementary readings in translation studies and translation theory.

KORN 415 (3/6) D KOREAN CONVERSATION AND COMPOSITION. Structured conversation practice and weekly composition assignments based on viewing one designated Korean television program per week. Prerequisite: KORN 300.

KORN 440 (3/6) D SUPERVISED STUDY IN THE KOREAN LANGUAGE. Primarily for students in Asian Studies and Linguistics.

LARC — LANDSCAPE ARCHITECTURE SCHOOL OF ARCHITECTURE AND LANDSCAPE ARCHITECTURE

LARC 316 (3) TREES AND SHRUBS IN LANDSCAPE. Culture and identification of landscape materials with emphasis on woody plants. Elementary principles of landscape composition. Suitable for students of other faculties and departments interested in landscape materials and their uses, but priority given to Agroecology and Landscape Architecture students. [2-2]

LARC 415 (3) STRUCTURE, FORM AND ADAPTABILITY IN PLANTING DESIGN. Lectures and exercises dealing with plants as structural elements in landscape. Plant associations. Horticultural adaptations. Planning relation to subsequent maintenance. Prerequisite: LARC 316. [2-2]

LARC 421 (3) CREATIVITY AND DESIGN APPLIED. An exploration of creativity and design and their application to a number of design disciplines. Web based. [3-0-0]

LARC 422 (3) LANDSCAPE ARCHITECTURAL HISTORY. History, principles and theory of landscape architecture in Europe, America and

Asia. Influence of cultural attitudes and societal change upon natural environments, parks, gardens and town planning. [3-0]

LARC 431 (3) SITE ANALYSIS AND PLANNING 1. A final lecture course/studio course in technology examines the making of a complete set of working drawings for the purposes of tendering and construction. Open only to B.En.D. students. Credit will be given for only one of LARC 431, LARC 531.

LARC 440 (3) SITE ANALYSIS AND PLANNING II. Site analysis and planning of relatively complex sites, emphasizing storm water management design. Open only to B.En.D. students. Credit will be given for only one of LARC 440, LARC 540.

LARC 500 (1) LANDSCAPE ARCHITECTURE SEMINAR. A forum for the exchange of ideas and the presentation of papers by faculty, students, and visitors.

LARC 501 (12) DESIGN STUDIO 1: INTRODUCTION. Landscape design, process, and representation explored through several small scale projects. Restricted to M.L.A. students.

LARC 502 (9) DESIGN STUDIO 2: DESIGN METHODS. Prerequisite: LARC 501. [2-10]

LARC 503 (9) DESIGN STUDIO 3: DESIGN DEVELOPMENT. Prerequisite: LARC 502.

LARC 504 (9) DESIGN STUDIO 4: URBAN AND REGIONAL PUBLIC REALMS. Vertical design studio. Prerequisite: Either (a) LARC 502 or (b) ARCH 500 or equivalent.

LARC 505 (9) DESIGN STUDIO 5: PATTERNS, POLICIES, AND TYPES. Prerequisite: LARC 504. [2-10]

LARC 510 (2-9) D ADVANCED FIELD STUDIES IN LANDSCAPE ARCHITECTURE.

LARC 511 (1) INTRODUCTORY WORKSHOP. All incoming students are required to attend this late summer workshop prior to enrolling in their autumn courses.

LARC 520 (3) THEORIES IN EXPERIENCE AND PLACE. Exploration in the experience of landscape and various place theories, including the systems, attitudes and ideas that influence the design and functioning of good place. [3-2]

LARC 521 (3) DESIGN THINKING. Study of methods-theories of design knowledge. Includes design as reflective-iterative process, idea generation, visual-visual and visual verbal transformation, design criticism and project evaluation methods. [3-2]

LARC 525 (3) DESIGN-RESEARCH METHODS IN LANDSCAPE IN LANDSCAPE ARCHITECTURE. An examination of various quantitative, qualitative and design research methods in landscape architecture using case studies, lectures and seminars. [2-2]

LARC 531 (3) LANDSCAPE TECHNOLOGIES I: SITE ENGINEERING. Terrain design, drainage and stormwater management. [2-3]

LARC 532 (3) LANDSCAPE TECHNOLOGIES II: STRUCTURES AND MATERIALS. [2-3]

LARC 533 (3) ADVANCED LANDSCAPE TECHNOLOGY. Prerequisite: LARC 532. [2-3]

LARC 535 (1-4) D INTRODUCTION TO COMPUTERS IN LANDSCAPE ARCHITECTURE. Students may take a maximum of four 1-credit sections.

LARC 540 (3) SITE ANALYSIS AND PLANNING II. Site analysis and planning of relatively complex sites, emphasizing stormwater management design. [3-2]

LARC 541 (3) LANDSCAPE PLANNING AND MANAGEMENT. [2-3]

LARC 542 (3) VISUAL RESOURCE MANAGEMENT. Study of history, aesthetic theory, legislative role and practice of VRM. Equivalency: FRST 490. [3-2]

LARC 551 (3) PROFESSIONAL PRACTICE IN LANDSCAPE ARCHITECTURE. [3-2]

LARC 580 (2-6) D DIRECTED STUDIES IN DESIGN ANALYSIS, PROGRAMMING AND THEORY.

LARC 581 (2-6) D DIRECTED STUDIES IN LANDSCAPE PLANNING AND SUSTAINABILITY.

LARC 582 (1-3) D SPECIAL TOPICS SEMINAR.

LARC 595 (3) GRADUATE PROJECT DEVELOPMENT. Prerequisite: LARC 525.

LARC 598 (12) DESIGN THESIS. Open only to M.L.A. candidates.

LARC 599 (12) RESEARCH THESIS. Open only to M.A.S.L.A. candidates.

LAST — LATIN AMERICAN STUDIES FACULTY OF ARTS

LAST 100 (3) INTRODUCTION TO LATIN AMERICAN STUDIES. An overview of the culture and society of Latin America from ancient to contemporary times and from Argentina to Mexico.

LAST 201 (3) POPULAR CULTURE IN LATIN AMERICA. The culture of everyday life, both rural and urban: issues of identity, popular memory, resistance, negotiation, as expressed through ritual, crafts, the body, social movements, films, music, and literature.

LAST 205 (3) ISSUES OF DEVELOPMENT IN MODERN LATIN AMERICA. Theory of development in the Latin American context: current problems and development alternatives.

LAST 301 (3) HUMAN AND CIVIL RIGHTS IN LATIN AMERICA. Focuses on human rights movements; state violence and impunity; reform of criminal justice systems; rights of indigenous peoples, women, and minorities; international protection of human rights; the UN and inter-American systems.

LAST 303 (3) INDIGENOUS PEOPLES OF LATIN AMERICA. Ethnohistory and contemporary cultures of the indigenous peoples of Mexico, Middle America, and South America. Different cultural areas or regions may be selected to illustrate the course's principal themes.

LATN — LATIN FACULTY OF ARTS

Not all courses are offered every year. For current listings, consult the departmental website at: www.cnr.ubc.ca.

LATN 100 (6) FIRST-YEAR LATIN. For students with no previous knowledge of Latin.

LATN 200 (3-6) SECOND-YEAR LATIN. Prerequisite: LATN 100.

LATN 300 (6) INTRODUCTION TO LATIN FOR SENIOR STUDENTS. An intensive course in the fundamentals of Latin grammar and syntax. Designed for students who need to acquire a knowledge of basic Latin in one year for background in their own discipline or who plan to proceed to LATN 305. Not for credit towards a Major or Honours in Classics. Students may not receive credit for both LATN 100 and 300.

LATN 301 (6) LATIN LITERATURE OF THE CLASSICAL PERIOD. Readings in the major Latin authors in prose and verse. Prerequisite: LATN 200.

LATN 305 (3/6) D MEDIEVAL LATIN. Introduction to Medieval Latin language and literature. Development of a reading knowledge of Medieval Latin through selections from major authors and genres after 400 AD. Prerequisite: One of LATN 200, LATN 300.

LATN 401 (3-12) C LATIN PROSE. Studies in history, oratory and/or philosophy. May be repeated for up to 12 credits. Corequisite: LATN 301.

LATN 402 (3-12) C LATIN VERSE. Studies in narrative verse, comedy, satire, elegiac and lyric poetry. May be repeated for up to 12 credits. Corequisite: LATN 301.

LATN 501 (3/6) C LATIN PROSE. History, oratory and/or philosophy. Credit will not be given for both LATN 401 and LATN 501.

LATN 502 (3/6) C LATIN VERSE. Narrative verse, comedy, satire, elegiac and lyric poetry. Credit will not be given for both LATN 402 and LATN 502.

LATN 521 (3/6) C STUDIES IN LATIN LITERATURE.

LATN 525 (3/6) D SEMINAR IN LATIN LITERATURE.

LATN 530 (3/6) D SEMINAR IN ROMAN ARCHAEOLOGY.

LATN 535 (3/6) D SEMINAR IN ROMAN HISTORY.

LATN 540 (3/6) D SEMINAR IN LATIN PALAEOGRAPHY.

LATN 545 (3/6) D SEMINAR IN LATIN EPIGRAPHY.

LATN 548 (0) MAJOR ESSAY.

LATN 549 (6/12) C MASTER'S THESIS.

LATN 550 (3/6) C DIRECTED STUDIES.

LATN 649 (0) PH.D. THESIS.

LAW — LAW FACULTY OF LAW

LAW 100 (6) CANADIAN CONSTITUTIONAL LAW. The general principles of Canadian constitutional law; the nature of Canadian federalism, with emphasis on the division of powers; the protection of civil liberties, with primary emphasis on the Charter of Rights and Freedoms. [3-0; 3-0]

LAW 120 (5) D CRIMINAL LAW AND PROCEDURE. Bases of criminal responsibility; principles and objectives of the criminal law and procedure; pre-trial procedure. [2-0; 3-0]

LAW 130 (5) D PROPERTY LAW. The legal concept of property and its changing nature and application. Surveying various aspects of property including the acquisition and transfer of interests, the regulation of use, Aboriginal title, and systems for registering interests in land. [2-0; 3-0]

LAW 140 (5) D TORTS. A study of the bases of civil liability for intentionally and accidentally caused harms. [2-0; 3-0]

LAW 150 (3) TRANSNATIONAL LAW. Introduction to principles of public and private international law and research methods for international legal materials.

LAW 160 (3) THE REGULATORY STATE. Statutory interpretation and research methods.

LAW 170 (3) LAW IN CONTEXT. The legal profession and professional ethics. Critical theoretical perspectives on the law.

LAW 200 (3) ABORIGINAL PEOPLES AND CANADIAN LAW. Survey of the history and present status of the legal relationships between Canada's Aboriginal peoples and the state. [3-0]

LAW 210 (3) ADMINISTRATIVE LAW. The system of legal control exercised through non-judicial agencies and the relationship of the courts to the administrative process. [3-0]

LAW 220 (3) TAXATION I. A survey of the law and practice of income and capital gains taxes. [3-0]

LAW 230 (3-4) D CORPORATIONS I. The law of corporations, including the rights and duties of directors and shareholders. [3-0]; [2-0; 2-0] or [4-0]

LAW 240 (3) FAMILY LAW. The law relating to family relationships, including the law of marriage, divorce, maintenance, custody, matrimonial property, and related matters. [3-0]

LAW 250 (3) TRUSTS. History and nature of trusts; express, resulting, implied and constructive trusts; charitable and purpose trusts; administration of trusts; breach of trust. [3-0]

LAW 260 (2-3) D ADVANCED CRIMINAL PROCEDURE. Selected topics relating to procedural law and practice in criminal matters. [2-0] or [3-0]

LAW 270 (2-3) D CIVIL PROCEDURE.

Problems in the conduct of civil litigation including: ethical considerations; substantive problems such as notice, pleading, and discovery; and selected procedural problems. [2-0] or [3-0]

LAW 280 (4) EVIDENCE. The admissibility and use of evidence in litigation. [2-0; 2-0] or [4-0]

LAW 301 (3) PHILOSOPHY OF LAW. An examination of the principal schools of legal theory, such as legal positivism, legal realism, sociological jurisprudence, and contemporary rights theory. Not offered each year, consult Faculty. [3-0]

LAW 302 (3) FUNDAMENTAL CONCEPTS OF LAW. A study of some of the fundamental principles and ideas that cut across many areas of the substantive law, including such concepts as fault, intent, legal personality, possession, ownership, justice, and causation. Not offered each year, consult Faculty. [3-0]

LAW 303 (3) THE WESTERN IDEA OF LAW. A comparative and interdisciplinary study of the evolution of Western law from its origins in mythology and patriarchy through to the present time. Not offered each year, consult Faculty. [3-0]

LAW 305 (2-4) D LAW, SOCIETY AND STATE. Theories of the relationship between the legal system, social relations and the state. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 307 (3) WOMEN, LAW AND SOCIAL CHANGE. A survey of feminist approaches to law, with reference to selected substantive areas of the law. [3-0]

LAW 308 (2-4) D FEMINIST LEGAL THEORY. Recent developments in feminist legal theory. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 309 (2-4) D TOPICS IN FEMINIST LEGAL STUDIES. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 310 (2-4) D ECONOMIC ANALYSIS OF LAW. Economic analysis used to explore, describe, evaluate and offer prescriptive suggestions for legal decision-making. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 312 (2-4) D TOPICS IN PHILOSOPHY OF LAW AND THEORETICAL PERSPECTIVES. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 313 (3) LEGAL HISTORY. The relationship between law, society and historical change, normally emphasizing 19th and 20th century issues. Not offered each year, consult Faculty. [3-0]

LAW 315 (2-4) D TOPICS IN LEGAL HISTORY. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 316 (3) INTERNATIONAL LAW. The history, sources and evidence of international law and its relation to municipal law; international personality; state jurisdiction; and

treaties. Students who have taken POLI 465 cannot take this course. [3-0]

LAW 318 (2-4) D MARINE RESOURCES LAW. Legal regimes governing the protection and exploitation of ocean resources. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 319 (2-4) D INTERNATIONAL HUMAN RIGHTS. The recognition and protection of human rights in international law. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 320 (2-4) D INDIGENOUS PEOPLES IN COMPARATIVE AND INTERNATIONAL LAW. The legal situation of indigenous peoples in various states and in modern international law. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 321 (2-4) D INTERNATIONAL LAW OF SOUTH-NORTH RELATIONS. Existence, applications and deficiencies of international law in sectors where the interests of industrialized and developing nations are linked. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 322 (2-4) D INTERNATIONAL LAW PROBLEMS. Selected issues in international law. Not offered each year, consult Faculty. Prerequisite: LAW 316. [2-0] or [3-0]

LAW 323 (2-4) D INTERNATIONAL ENVIRONMENTAL LAW. Customary international law and treaties relating to the environment; institutional structures. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 324 (2-4) D TOPICS IN INTERNATIONAL LAW AND TRANSACTIONS. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 325 (3) CONFLICT OF LAWS. A study of the private legal problems arising in cases in which the relevant facts cut across provincial or national boundaries. Recommended to be taken in third year. [3-0]

LAW 326 (4) D GLOBALIZATION AND LAW.

LAW 327 (2 3) D INTERNATIONAL TRADE LAW. Rules and regulatory systems that govern the international movement of capital, goods and services. [2-0] or [3-0]

LAW 328 (2-4) D INTERNATIONAL BUSINESS TRANSACTIONS. Legal problems in international financial and commercial transactions. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 329 (2-4) D INTERNATIONAL COMMERCIAL DISPUTES. International commercial arbitration and other means for resolving legal disputes relating to international commercial transactions. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 330 (3) CULTURAL PROPERTY AND ART LAW. National and international aspects of the law relating to the art trade and the protection and regulation of cultural property and cultural heritage. [2-0] or [3-0]

LAW 331 (2-4) D TOPICS IN CULTURAL HERITAGE AND ART LAW.

LAW 332 (2-3) D MARITIME LAW. Canadian maritime law and admiralty practice. [2-0] or [3-0]

LAW 334 (2-3) D INTRODUCTION TO ASIAN LEGAL SYSTEMS. Introduction to the comparative study of legal systems of East and South-East Asia, including those of China and Japan. [2-0] or [3-0]

LAW 335 (3) KOREAN LAW. Overview of Korean laws and legal systems with emphasis on South Korea [3-0-0]

LAW 336 (2-4) D CHINESE LAW. A comparative study of Chinese Law, emphasizing the role of law in the People's Republic of China. [2-0] or [3-0]

LAW 337 (2-4) D TRADE AND INVESTMENT IN THE PEOPLE'S REPUBLIC OF CHINA. The legal regime in The People's Republic of China governing trade and foreign investment. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 338 (2-3) D JAPANESE LAW. An introduction to the Japanese legal system from a comparative perspective. [2-0] or [3-0]

LAW 339 (2-4) D HUMAN RIGHTS IN ASIA. Legal issues relating to civil, political, social and cultural rights in particular areas in Asia. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 341 (2-4) D EUROPEAN UNION LAW. The legal system of the European Union as created by the treaties establishing the Union and by the Union's institutions. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 342 (2-4) D TOPICS IN COMPARATIVE LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 343 (2-4) D TOPICS IN PUBLIC LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 345 (3) CANADIAN CONSTITUTIONAL LAW A: FEDERALISM. The general principles of Canadian constitutional law; the nature of Canadian federalism, with emphasis on the division of powers. Credit may not be obtained for LAW 345 and LAW 344. [3-0]

LAW 346 (3) CANADIAN CONSTITUTIONAL LAW B: CHARTER OF RIGHTS. The constitutional protection of civil liberties in Canada, with primary emphasis upon the Charter of Rights and Freedoms. Credit may not be obtained for LAW 346 and LAW 344. [3-0]

LAW 349 (2-4) D TOPICS IN CONSTITUTIONAL LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 350 (2-4) D ISSUES OF EQUALITY AND SOCIAL JUSTICE. Selected topics related to the Charter right to equality and other rights related to social justice. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 351 (2-4) D TOPICS IN HUMAN RIGHTS. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 353 (2-3) D ABORIGINAL AND TREATY RIGHTS. Rights of First Nations people stemming from their aboriginal status and from treaties. Not offered each year, consult Faculty. Prerequisite: LAW 352. [2-0] or [3-0]

LAW 353 (2-3) D ABORIGINAL AND TREATY RIGHTS. Rights of First Nations people stemming from their aboriginal status and from treaties. Not offered each year, consult Faculty. Prerequisite: One of LAW 200, LAW 352. [2-0] or [3-0]

LAW 354 (2-4) D FIRST NATIONS SELF-GOVERNMENT. Issues relating to First Nations' assumption of self-government powers. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 355 (2-4) D FIRST NATIONS AND THE ADMINISTRATION OF JUSTICE. The justice system and its operation in relation to First Nations people. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 356 (2-4) D FIRST NATIONS AND ECONOMIC DEVELOPMENT. Legal issues affecting land use and economic activity involving First Nations' resources. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 358 (2-4) D TOPICS IN FIRST NATIONS LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 360 (3) CHILDREN AND THE LAW. The civil and criminal law affecting juveniles; custody, guardianship and adoption. Prerequisite: LAW 240 or LAW 359 is recommended [3-0]

LAW 362 (2-4) D TOPICS IN FAMILY LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 363 (2-4) D RACISM AND LAW. Legal issues relating to race and racism, including related issues of gender, culture or identity. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 364 (2-4) D TOPICS IN RACE AND LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 365 (2-4) D WOMEN, LAW AND FAMILY. Feminist and other critical perspectives on the relationship between unequal gender relations and laws embodying a concept of "family". Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 367 (2-4) D REPRODUCTION AND LAW. Legal issues relating to human reproduction. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 368 (2-4) D SEXUALITY AND LAW. Legal issues relating to sexual activity, orientation and identification. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 371 (2-4) D TOPICS IN LAW AND SOCIAL RELATIONS. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 373 (2-4) D TOPICS IN ADMINISTRATIVE LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 374 (3) MUNICIPAL LAW. The municipality as a legal entity; its creation, operation and powers; by-laws and their validity; contractual liability; judicial review; business regulation; expropriation and land use control. [3-0]

LAW 375 (2-3) D LAND USE PLANNING. The legal and administrative aspects of the regula-

tion of land use and development, especially at the local level. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 376 (2-4) D TOPICS IN MUNICIPAL AND PLANNING LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 377 (3) IMMIGRATION LAW. Admission of immigrants into Canada; refugee protection; practice and procedure before immigration tribunals and the courts. [3-0]

LAW 378 (2-4) D ISSUES IN IMMIGRATION AND REFUGEE LAW. Selected issues related to the law and process of immigration and refugee determination. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 381 (2-4) D DISABILITIES AND LAW. Legal issues relating to people with disabilities. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 382 (2-4) D LAW AND MEDICINE. Legal issues relating to medicine and the health care system. [2-0] or [3-0]

LAW 383 (2-4) D MENTAL HEALTH LAW. The law relating to commitment and treatment issues for persons with mental disabilities. [2-0] or [3-0]

LAW 384 (2-4) D LAW AND PSYCHIATRY. The interaction of psychiatry and criminal law; legal issues relating to those who enter the psychiatric system through the criminal justice system. Not offered each year; consult Faculty. [2-0] or [3-0]

LAW 385 (2-4) D SOCIAL WELFARE LAW. Aspects of the law structuring the provision of welfare and other social services in Canada. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 387 (2-3) D CANADIAN ENVIRONMENTAL LAW. The legal and regulatory framework for the protection of the environment. [2-0] or [3-0]

LAW 388 (2-4) D ENVIRONMENTAL LAW IN PRACTICE. Jurisdiction, remedies and administrative schemes as they apply in practice to selected environmental law problems. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 389 (2-4) D SELECTED ISSUES IN ENVIRONMENTAL LAW AND POLICY. Case studies of leading problems in environmental law and regulation. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 390 (4) ENVIRONMENTAL LAW WORKSHOP. Legal research and writing for environmental agency or NGO under supervision of faculty member and lawyer. Not offered every year, consult Faculty. [4-0]

LAW 391 (2-4) D TOPICS IN ENVIRONMENTAL LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 392 (2-3) D NATURAL RESOURCES. A foundation course dealing with legal problems common to the management of natural resources such as fisheries, mines and minerals, petroleum, forests, and water resources. [2-0] or [3-0]

LAW 393 (2) WATER LAW. The law relating to the acquisition and protection of water rights; public management and planning; water quality and conservation. Not offered each year, consult Faculty. Prerequisite: LAW 392 is recommended. [2-0]

LAW 394 (2) MINING LAW. Acquisition of mineral interests; development, financing and organization of mining companies; regulation of exploitation industry interests; management taxation. Not offered each year, consult Faculty. Prerequisite: LAW 392 is recommended. [2-0]

LAW 395 (2-3) D FOREST LAW. Acquisition of timber interests; development, financing and organization of timber companies; regulation of exploitation industry interests; management taxation. Not offered each year; consult Faculty. Prerequisite: LAW 392 is recommended. [2-0] or [3-0]

LAW 396 (2-3) D FISHERIES LAW. Legal regimes for the exploitation and regulation of fisheries. Not offered each year, consult Faculty. Prerequisite: LAW 392 is recommended. [2-0] or [3-0]

LAW 397 (2-3) D OIL AND GAS LAW. Legal regimes for the disposition of interests in petroleum; government regulation. Not offered each year, consult Faculty. Prerequisite: LAW 392 is recommended. [2-0] or [3-0]

LAW 398 (2-4) D TOPICS IN NATURAL RESOURCES. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 399 (2-3) D ADVANCED CRIMINAL LAW. Selected topics in advanced substantive criminal law and related issues. [2-0] or [3-0]

LAW 401 (2-4) D PENAL POLICY. Selected legal policy issues relating to punishment for crime. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 403 (2-4) D CRIMINOLOGY. Relations among the legislative, police, courts and penal organizations in the criminal justice system, and relations between the criminal justice system and other social institutions. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 405 (2-4) D TOPICS IN CRIMINAL LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 406 (2-4) D TOPICS IN CRIMINAL JUSTICE. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 408 (2-3) D TAXATION II. The taxation of corporations, the taxation of shareholders, and the tax implications of the reorganization of corporations. Prerequisite: One of LAW 220, LAW 407. [2-0] or [3-0]

LAW 410 (2-3) D INTERNATIONAL TAXATION. The tax aspects of international transactions. Not offered each year; consult Faculty. [2-0] or [3-0]

LAW 411 (2-4) D TAX POLICY. The policies underlying the creation and implementation of tax laws. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 413 (2-4) D TOPICS IN TAXATION

LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 414 (2-4) D COMPETITION POLICY.

The law and policy relating to the regulation of competition in Canada and other jurisdictions. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 415 (3) LABOUR LAW. Union-management relations; the collective bargaining process; the collective agreement, arbitration and conciliation procedure. The relationship between the union and its membership. [3-0]

LAW 417 (2-4) D LABOUR LAW AND POLICY. The role of the law in the operation of the labour market. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 418 (2-4) D RESOLUTION OF LABOUR DISPUTES. Labour arbitration and collective agreement negotiation and interpretation. Not offered each year, consult Faculty. Prerequisite: LAW 415. [2-0] or [3-0]

LAW 419 (2-4) D INDIVIDUAL EMPLOYMENT LAW. Legal aspects of employment relationships other than those arising by collective bargaining. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 421 (2-4) D TOPICS IN LABOUR LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 422 (3) INTELLECTUAL PROPERTY. Copyright, patents, trade marks, industrial design, the protection of computer software, and torts such as passing-off and breach of confidence. [3-0]

LAW 423 (2-4) D TOPICS IN INTELLECTUAL PROPERTY. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 424 (2-4) D COMMUNICATIONS LAW. Selected legal issues relating to the communications industries and their regulation. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 426 (2-4) D TOPICS IN LAW AND TECHNOLOGY. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 430 (2-4) D ADVANCED LEGAL RESEARCH. Research using electronic databases, information systems, and non-legal databases relevant to the resolution of legal issues. [2-0] or [3-0]

LAW 432 (2-4) D TOPICS IN PRIVATE LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 435 (2-4) D TOPICS IN TORT LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 436 (2-3) D RESTITUTION. Unjust enrichment as the basis of civil liability. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 437 (3) COMMERCIAL TRANSACTIONS. The law of sale of goods, bills of exchange, promissory notes, and cheques. [3-0]

LAW 438 (3) SECURED TRANSACTIONS. The law governing the creation, perfection and enforcement of security interests in personal property. [3-0]

LAW 439 (2-4) D CONSTRUCTION LAW.

Legal issues relating to the construction process. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 440 (2/3) D INSURANCE LAW. The general legal principles of life, automobile, fire and other types of insurance; the regulation of the insurance industry. [2-0]

LAW 441 (2-3) D CONSUMER PROTECTION. Relation of the legal process to the marketplace; history of market practices; appraisal of how the political process treats consumer proposals; the overcommitted debtor; adequacies of government services for the consumer. Not offered each year, consult Faculty. Prerequisite: LAW 437 and LAW 438 are recommended. [2-0] or [3-0]

LAW 443 (3) CREDITORS' REMEDIES. Remedies of an unsecured creditor; fraudulent conveyances and preferences; builders' liens; bankruptcy. Prerequisite: LAW 437 and LAW 438 are recommended. [3-0]

LAW 444 (2-4) D INSOLVENCY LAW. The law relating to insolvency, receivership and bankruptcy. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 447 (2-4) D TOPICS IN COMMERCIAL LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 448 (2-4) D SPORTS LAW. Legal issues relating to the sports industry and those who participate in it. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 449 (2-4) D MEDIA AND ENTERTAINMENT LAW. Selected legal issues relating to the media and entertainment industries and their regulation. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 450 (2-4) D TOPICS IN SPORTS, MEDIA, ENTERTAINMENT OR COMMUNICATIONS LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 452 (2-3) D SUCCESSION. The law of wills and intestate succession, variation of wills, principles of probate and administration of estates. Prerequisite: LAW 230 or LAW 451 is recommended. [2-0] or [3-0]

LAW 453 (2-3) D EQUITABLE REMEDIES. The history and development of equitable remedies such as specific performance, injunctions, declarations, relief against forfeiture, and tracing. [2-0] or [3-0]

LAW 454 (2-4) D TOPICS IN TRUSTS AND ESTATES. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 455 (3) REAL ESTATE TRANSACTIONS. The law relating to the sale and purchase of land, real estate agency, and mortgages. [3-0]

LAW 456 (2-3) D REAL ESTATE LEASE LAW. The law relating to residential and commercial tenancies. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 457 (2-4) D REAL ESTATE DEVELOPMENT. A study of the legal aspects of the development of real estate projects such as shopping centres, sports centres and

condominiums. Not offered each year, consult Faculty. Prerequisite: LAW 456. [2-0] or [3-0]

LAW 458 (2-4) D TOPICS IN REAL PROPERTY. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 460 (3) CORPORATIONS II. Selected topics such as the nature of shares, equity financing, corporate structure and reorganization, and shareholder squeezeouts. Prerequisite: One of LAW 230, LAW 459. [3-0]

LAW 461 (2-4) D CORPORATE TRANSACTIONS. Legal aspects of selected transactions relating to public corporations and corporate governance. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 462 (2-4) D CLOSE CORPORATIONS. The corporation, taxation, accounting, insurance and estate planning aspects of the close corporation. Not offered each year, consult Faculty. Prerequisite: One of LAW 230, LAW 459. [2-0] or [3-0]

LAW 463 (2-3) D SECURITIES REGULATION. The law relating to the distribution of securities. Continuous and timely disclosure requirements and civil liability. Prerequisite: LAW 459 is recommended. [2-0] or [3-0]

LAW 467 (2-4) D TOPICS IN CORPORATE LAW. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 468 (2-3) D PROFESSIONAL RESPONSIBILITY. The nature, role and organization of the legal profession; philosophical and ethical dimensions of the role of lawyers. [2-0] or [3-0]

LAW 472 (4) ADVANCED TRIAL ADVOCACY. Skills-training in all aspects of civil and criminal trial advocacy. Prerequisite: One of LAW 270, LAW 469, LAW 470 or LAW 280 recommended. [4-0-0]

LAW 473 (2-4) D APPELLATE ADVOCACY. Issues relating to advocacy before appellate courts; techniques of appellate advocacy. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 474 (3) TRIAL ADVOCACY. Techniques of advocacy in civil and criminal cases including interviewing, pre-trial preparation, tactical analysis, development of facts, direct and cross examination and various ethical considerations. A student who receives credit for LAW 488 or LAW 491 cannot receive credit for this course. Prerequisite: One of LAW 280, LAW 470. [3-0]

LAW 475 (2-4) D COMPETITIVE TRIAL ADVOCACY CREDIT. Trial advocacy. Restricted to students participating in one or more faculty approved trial advocacy competitions. Students enrolled in this course must also be enrolled in LAW 474.

LAW 476 (2-4) D PSYCHOLOGY AND LITIGATION. Human psychology as it is treated in different areas of law and litigation. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 477 (2-4) D NEGOTIATION AND DISPUTE RESOLUTION. Negotiation and bargaining; formulation of general principles

governing the negotiation process; negotiation in legal practice; alternative means of dispute resolution. [2-0] or [3-0]

LAW 478 (2-4) D ALTERNATIVE DISPUTE RESOLUTION. Theoretical premises underlying the dispute-resolving process; arbitration, other non-judicial means of resolving legal disputes, and their relationship to litigation. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 479 (2-4) D MEDIATION. Mediation of legal disputes; negotiation theory and practice as they relate to mediation. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 480 (2-4) D MEDIATION PRACTICUM. An opportunity to learn and practice mediation skills in real-life situations. Not offered every year, consult Faculty. [3-0]

LAW 481 (2-4) D TOPICS IN LITIGATION, DISPUTE RESOLUTION AND THE ADMINISTRATION OF JUSTICE. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 482 (2-4) D TOPICS IN PROCEDURE AND EVIDENCE. Not offered each year, consult Faculty. [2-0] or [3-0]

LAW 483 (3-6) D COMPETITIVE MOOTS AND ADVOCACY CREDIT A. Appellate and related forms of advocacy. Restricted to students representing the Faculty for the first time in an approved advocacy competition. [5-0]

LAW 484 (3-6) D COMPETITIVE MOOTS ADVOCACY AND CLIENT COUNSELLING CREDIT B. Appellate and related forms of advocacy and client counselling. Restricted to students representing the Faculty for a second time in an approved advocacy or client counselling competition. [5-0] or [6-0]

LAW 485 (3-6) D CLIENT COUNSELLING COMPETITION CREDIT. Interviewing, counselling and negotiating. Restricted to students representing the Faculty in an approved client counselling competition. [3-0]

LAW 486 (2) LAW REVIEW CREDIT. Study and practice of law journal editing and business operations. For students acting as senior editors or the business manager for the UBC Law Review, the Canadian Journal of Family Law or any other equivalent legal journal based in the Faculty of Law.

LAW 487 (2-4) D NEGOTIATION COMPETITION CREDIT A. Simulated legal negotiation. Restricted to students representing the Faculty for the first time in an approved legal negotiation competition. [4-0]

LAW 488 (11) CLINICAL TERM. Designed to explore the legal system in relation to disadvantaged members of society. Under supervision, students will act for clients in a range of legal matters and can expect to appear before courts and tribunals. Students will also work with community-based organisations. A student who receives credit for LAW 474, LAW 490 or LAW 491 cannot receive credit for this course. Prerequisite: One of LAW 280, LAW 470.

LAW 489 (4) CLINICAL TERM: PAPER. The graded component of LAW 488.

LAW 490 (6) CLINICAL CRIMINAL LAW. The aim of the course is to teach a basic familiarity with the skills required for the practice of criminal law. Students will represent defendants in summary conviction cases under supervision of an experienced lawyer. A student who receives credit for LAW 488 or LAW 491 cannot receive credit for this course. Prerequisite: Either (a) all of LAW 280, LAW 240 or (b) LAW 260 or (c) LAW 470. [6-0]

LAW 491 (4) LAW STUDENTS LEGAL ADVICE PROGRAM CREDIT. Restricted to a limited number of third year students who (a) in their first or second year have participated in the provision of legal services to the public through the Law Students Legal Advice. Program operated under the supervision of the Community Legal Assistance Society, and (b) continue that participation in their third year. A student who receives credit for LAW 474, LAW 488 or LAW 490 cannot receive credit for this course.

LAW 492 (2) MEDIATION MOOT. Simulated legal mediation. Students enrolled in this course must also be enrolled in a Mediation Advocacy section of Law 481. [2-0]

LAW 493 (2-4) D DIRECTED RESEARCH. Enrolment restricted.

LAW 494 (2-4) D DIRECTED RESEARCH. Enrolment restricted.

LAW 495 (2-4) D DIRECTED RESEARCH. Enrolment restricted.

LAW 496 (2-4) D DIRECTED RESEARCH. Enrolment restricted.

LAW 497 (2-4) D NEGOTIATION COMPETITION CREDIT B. Simulated legal negotiation. Restricted to students representing the Faculty for the second time in an approved legal negotiation competition. [4-0]

LAW 498 (2-4) D COMPETITIVE MEDIATION ADVOCACY CREDIT. Advocacy in a simulated legal mediation. Restricted to students representing the Faculty in approved legal mediation competitions. [4-0]

LAW 499 (2-4) D COMPETITIVE MEDIATION CREDIT. Simulated legal mediation. Restricted to students representing the Faculty as mediators in approved legal mediation competitions. [4-0]

LAW 500 (4) CURRENT LEGAL PROBLEMS.

LAW 501 (2-8) D DIRECTED RESEARCH. Students will be able to undertake advanced research into a topic approved by a faculty member, under the supervision of and in consultation with, that faculty member.

LAW 510 (2-4) D SENTENCING. Comparative sentencing structures; competing sentencing philosophies and principles; the exercise of discretion; sentencing law and practice; sentencing advocacy; aids to sentencing, such as computerized information systems; prescriptive guidelines; problematic issues in sentencing, such as wife and child abuse.

LAW 511 (2-4) D INTERNATIONAL CRIMINAL LAW. Analysis of topics such as jurisdiction, immunity from prosecution, mutual assistance

in penal matters, recognition and enforcement of foreign penal laws, and international police co-operation; examination of selected offences such as war crimes, crimes against humanity, genocide, terrorism, illicit drug trafficking and torture.

LAW 512 (2-4) D PROCEEDS OF CRIME. Criminal and civil law relating to the tracing, freezing and forfeiture of proceeds derived from crime; a comparative analysis of law from Canada, the US and other jurisdictions; bilateral and multilateral. Conventions dealing with issues such as money laundering, bank secrecy and tax havens.

LAW 518 (2-4) D FEMINIST LEGAL STUDIES: KEY THEMES AND CURRENT DEBATES. Diverse theoretical perspectives, key resources for feminist research on law, and the viability of different strategies or methods of engaging with law.

LAW 520 (2-4) D ASIAN LAW TUTORIAL.

LAW 521 (2-4) D LAW AND DEVELOPMENT. Law and legal institutions in development policy and practice; multilateral, state and NGO perspectives.

LAW 522 (2-4) D MODERN LEGAL CULTURE: HISTORICAL EXPLORATIONS. Aspects of the history of ideas relating to law in North America and elsewhere.

LAW 549 (20) MASTER'S THESIS.

LAW 550 (6) SEMINAR IN COMMON LAW THEORY AND PRACTICE. History and characteristics of the common law and how it differs from other systems of law.

LAW 552 (2-4) D TOPICS IN COMMON LAW THEORY AND PRACTICE: PUBLIC LAW I. Completion of a course from the cluster of public law I courses together with the fulfillment of a significant supplemental requirement involving advanced analysis.

LAW 553 (2-4) D TOPICS IN COMMON LAW THEORY AND PRACTICE: PUBLIC LAW II. Completion of a course from the cluster of public law II courses together with the fulfillment of a significant supplemental requirement involving advanced analysis.

LAW 554 (2-4) D TOPICS IN COMMON LAW THEORY AND PRACTICE: COMPARATIVE AND INTERNATIONAL LAW. Completion of a course from the cluster of Comparative and International Law courses together with the fulfillment of a significant supplemental requirement involving analysis.

LAW 555 (2-4) D TOPICS IN COMMON LAW THEORY AND PRACTICE: LEGAL THEORY AND PRACTICE. Completion of a course from the cluster of Legal Theory and Practice courses together with the fulfillment of a significant supplemental requirement involving advanced analysis.

LAW 556 (2-4) D TOPICS IN COMMON LAW THEORY AND PRACTICE: PRIVATE AND COMMERCIAL LAW. Completion of a course from the cluster of Private and Commercial Law courses together with the fulfillment of a

significant supplemental requirement involving advanced analysis.

LAW 557 (2-4) D TOPICS IN COMMON LAW THEORY AND PRACTICE: HUMAN AND GROUP RIGHTS LAW. Completion of a course from the cluster of Human and Groups Rights Law courses together with the fulfillment of a significant supplemental requirement involving advanced analysis.

LAW 560 (4) SEMINAR IN TOPICS IN COMMON LAW THEORY AND PRACTICE. Completion of an upper-level 300 or 400 level LL.B. seminar or workshop course 4 credit minimum, completion of a substantial research paper consisting of an advanced analysis relating to the subject matter of the particular seminar or workshop.

LAW 610 (2) DOCTORAL SEMINAR I: ISSUES IN LEGAL THEORY. This seminar will address salient issues of legal theory. Topics covered will include feminism and the law; Marxism and the law; post-modernism and the law; social theory and the law; law and the state; legal liberalism and its critics; and other jurisprudential discourses.

LAW 611 (2) DOCTORAL SEMINAR II: COMPARATIVE AND INTERDISCIPLINARY PERSPECTIVES ON LEGAL THEORY. Issues of legal theory in interdisciplinary and comparative perspective. Applicability of legal concepts in different cultures and societies, and the consequences for the form and structure of law. Topics such as “the origins and development of legal traditions in Europe and Asia,” and “the influence of religion in Asian and European legal systems,” could be included.

LAW 649 (0) DOCTORAL THESIS.

LIBE — TEACHER LIBRARIANSHIP FACULTY OF EDUCATION

LIBE 461 (3) ADMINISTRATION OF THE SCHOOL LIBRARY RESOURCE CENTRE. The role, philosophy, and management of school library resource centres in elementary and secondary schools. Equivalency: LIBE 381. [3-0-0]

LIBE 463 (3) SELECTION OF LEARNING RESOURCES I. Equivalency: LIBE 383. [3-0-0]

LIBE 464 (3) SELECTION OF LEARNING RESOURCES II. Prerequisite: One of LIBE 383, LIBE 463. Equivalency: LIBE 384. [3-0-0]

LIBE 465 (3) ORGANIZATION OF LEARNING RESOURCES. Equivalency: LIBE 385. [3-0-0]

LIBE 466 (3) CLASSIFICATION AND CATALOGUING OF LEARNING RESOURCES. Prerequisite: One of LIBE 385, LIBE 465. Equivalency: LIBE 386. [3-0-0]

LIBE 467 (3) INFORMATION SERVICES I. Equivalency: LIBE 387. [3-0-0]

LIBE 468 (3) INFORMATION SERVICES II. Prerequisite: One of LIBE 387, LIBE 467. Equivalency: LIBE 388. [3-0-0]

LIBE 477 (3/6) D SPECIAL TOPICS IN TEACHER LIBRARIANSHIP. In-depth study of selected topics in library education. [3-0-0]

LIBE 494 (3/6) C SUPERVISED STUDY IN TEACHER LIBRARIANSHIP. Equivalency: LIBE 449.

LIBE 508 (3/6) D THEORY AND RESEARCH IN TEACHER LIBRARIANSHIP.

LIBE 527 (3/6) D SEMINAR IN TEACHER LIBRARIANSHIP. Research and its application for school library resource centres.

LIBE 561 (3-12) C LABORATORY PRACTICUM.

LIBE 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD. Courses in various subject matter fields designed to bring teachers up to date in recent findings in each field.

LIBE 580 (3-12) C PROBLEMS IN EDUCATION. Investigation and report of a problem.

LIBE 590 (3) GRADUATING PAPER. Pass/Fail.

LIBE 598 (3-12) C FIELD EXPERIENCES. For those on master's, doctoral and diploma programs.

LIBE 599 (6-12) D MASTER'S THESIS.

LIBR — LIBRARY AND INFORMATION STUDIES SCHOOL OF LIBRARY, ARCHIVAL & INFORMATION STUDIES

Core courses LIBR 500, 510, 540, and 560 are pre- or corequisite to most other courses. Some courses will have additional prerequisites. Specific information about course pre-requisites and course sequencing is available from the school.

LIBR 699 (0) THESIS.

LING — LINGUISTICS FACULTY OF ARTS

LING 100 (3) INTRODUCTION TO LANGUAGE AND LINGUISTICS. An introduction to the study of language as a universal and uniquely human cognitive system: What universals do all languages share and how do languages differ? An investigation of sound systems, word-building, grammatical principles, language

change, dialect variation, language acquisition, neurolinguistics.

LING 101 (3) LANGUAGES OF THE WORLD. A survey of the linguistic map of the world, examining how languages are genetically classified and how different languages evolve. Principles underlying different writing systems and the decipherment of historical documents.

Issues of languages in contact, minority language endangerment, language death and the role of English as a world language.

LING 200 (3) LINGUISTIC THEORY AND ANALYSIS I. Introduction to phonetics and phonology; training in the identification and production of speech sounds; principles and methods for describing and writing the sound system of a language; phonological theory with reference to selected languages; the interface between phonology and morphology. Analytical practice and seminar discussion.

LING 201 (3) LINGUISTIC THEORY AND ANALYSIS II. Introduction to grammatical analysis; morphology, syntax, semantics; synchronic analysis and description with illustrations from various languages. Analytical practice and seminar discussion.

LING 300 (3) STUDIES IN GRAMMAR. Introduction to syntactic analysis and theory, with emphasis on description and analysis of data from a wide variety of languages. Prerequisite: Either (a) LING 201 or (b) ENGL 329.

LING 305 (3) MORPHOLOGY. Analytic problem-solving and discussion of theoretical questions concerning the development and present status of morphological theory and the principles governing morphosyntax and morphophonology. Not offered every year. Prerequisite: All of LING 200, LING 201.

LING 311 (3) STUDIES IN PHONOLOGY. Introduction to phonological analysis and theory, with a strong emphasis on description and analysis of data from a wide variety of languages. Prerequisite: Either (a) LING 200 or (b) ENGL 329.

LING 316 (3) INTRODUCTION TO PHONETICS AND SPEECH SCIENCE. Introduction to the speech chain, with examples from speech anatomy, physiological phonetics, acoustic phonetics, linguistic phonetics, and speech perception. Introduction to microcomputer acoustic analysis. Examples primarily from normal speech. Prerequisite: LING 200. Recommended: All of PSYC 100 (or PSYC 101 and 102), PSYC 217 and 218, PHYS 341.

LING 317 (3) INSTRUMENTAL PHONETICS. Physiological and acoustic phonetics, with limited discussion of the underlying anatomy. Source-filter theory. Acoustic analysis, linked to speech production data. Inter-articulator timing and coordination. Microcomputer acoustic analysis. Examples primarily from normal speech. Prerequisite: All of LING 200, LING 316. Recommended: All of PSYC 100 (or PSYC 101 and 102), PSYC 217 and 218, PHYS 341.

LING 319 (3) COMPARATIVE AND HISTORICAL LINGUISTICS. The historical study of language. Linguistic change. Language

families and evidence for genetic relationship. Comparative method and internal reconstruction. Emphasis on phonological and morphological reconstruction. Not offered every year. Prerequisite: All of LING 200, LING 201.

LING 327 (3/6) D INTRODUCTION TO SEMANTICS. Lexical analysis: the linguistic sign, language and thought, semantic fields and componential analysis, basic semantic relationships. Syntax and semantics: propositions and semantic cases, anaphora, negation, quantifiers, semantic interpretation in current syntactic theories. Prerequisite: LING 300. Equivalency: LING 427.

LING 420 (3) INTRODUCTION TO LINGUISTICS. General background to linguistic studies; the different approaches to the analysis of languages; synchronic and diachronic linguistics; phonetics, phonology, morphology, syntax, and semantics. Not available for credit toward a Major or Honours program in Linguistics.

LING 430 (3/6) D HONOURS SEMINAR IN LINGUISTICS. Research papers on general linguistic topics to be read and discussed.

LING 431 (3) FIELD METHODS I. Elicitation, transcription, organization, and analysis of linguistic data from a native speaker of a language not commonly studied. Practical experience in the use of fieldwork equipment. Prerequisite: LING 311.

LING 432 (3) FIELD METHODS II. Elicitation, transcription, organization, and analysis of linguistic data from a native speaker of a language not commonly studied. Practical experience in the use of fieldwork equipment. Prerequisite: LING 431.

LING 433 (3) NATIVE LANGUAGES OF THE AMERICAS. Survey of the indigenous languages of the Americas. Study of the basis of genetic classification and areal similarities. The structure of representative languages will be presented and contrasted. The present status of American Indian languages will be considered. Note: this course is not necessarily offered every year.

LING 436 (3) COMMUNITY-BASED LANGUAGE RESEARCH. Research methods and partnerships, ethical paradigms, the social, cultural and historical context of language research, and the relation of language research to pedagogy, policy and planning.

LING 445 (3) SOCIOLINGUISTICS. The systematic study of language as a social phenomenon.

LING 447 (3/6) D TOPICS IN LINGUISTICS. A capstone course for Linguistics and Speech Sciences majors. Individual sections will differ substantially; see online Course List for detailed descriptions and prerequisites. May be repeated for credit when content is different.

LING 448 (3/6) D DIRECTED STUDIES. Supervised by a faculty member chosen by the student. Agreement of Supervisor and approval of Head required.

LING 449 (6) HONOURS ESSAY.

LING 451 (3/6) D ACQUISITION OF PHONOLOGY. Infant speech perception, prelinguistic phases, word phonology, early phonology, and later morphophonology. Child language data will be informed by phonological theory (e.g., syllable structure, metrical structure, harmony processes, feature geometry, underspecification). Not offered every year. Prerequisite: LING 311.

LING 452 (3) ACQUISITION OF SYNTAX. The logical problem of language acquisition, learnability theory, early syntactic and semantic development (e.g., semantic bootstrapping, acquisition of lexical semantics) and later syntactic and morphological development (e.g., word order, control, coreference, movement). Not offered every year. Prerequisite: LING 300.

LING 502 (4) FORMAL FOUNDATIONS OF SYNTAX & SEMANTICS. Conceptual underpinnings of the study of sentence structure and meaning; core issues in syntax and semantics; the place of syntax and semantics in a model of grammar; interface issues. Prerequisite: LING 520 and 525 are recommended.

LING 505 (3/6) D ISSUES IN MORPHOLOGICAL THEORY AND ANALYSIS. Morphology from both historical and theoretical perspectives.

LING 507 (4) FORMAL FOUNDATIONS OF PHONETICS & PHONOLOGY. Conceptual underpinnings of the study of speech sounds; core issues in phonetics and phonology; the place of phonetics and phonology in a model of grammar; interface issues. Prerequisite: LING 508 and 510 are recommended.

LING 508 (3) PHONETIC THEORY & ANALYSIS. Discussion and critical analysis of current issues in linguistic phonetics; instrumental analysis.

LING 510 (3) PHONOLOGICAL THEORY AND ANALYSIS. Discussion and critical analysis of current issues in phonological theory.

LING 512 (3) TOPICS IN PHONETICS & PHONOLOGY. Advanced topics in phonetics and phonology; in-depth analysis of specific issues and problems. Prerequisite: One of LING 508, LING 510.

LING 518 (3-9) D ADVANCED RESEARCH SEMINAR. Prerequisite: One of LING 512, LING 522 or equivalent.

LING 519 (3/6) D PROBLEMS IN COMPARATIVE AND HISTORICAL LINGUISTICS.

LING 520 (3) SYNTACTIC THEORY AND ANALYSIS. Discussion and critical analysis of current issues in syntactic theory

LING 522 (3) TOPICS IN SYNTAX AND SEMANTICS. Advanced topics in syntax and semantics; in-depth analysis of specific issues and problems. Prerequisite: One of LING 520, LING 525.

LING 525 (3) SEMANTIC THEORY AND ANALYSIS. Discussion and critical analysis of current issues in semantic theory.

LING 530 (3–12) D LINGUISTIC PROBLEMS IN A SPECIAL AREA.

LING 531 (3) FIELD METHODS IN LINGUISTICS I.

LING 532 (3) FIELD METHODS IN LINGUISTICS II. Prerequisite: LING 531.

LING 533 (3/6) D INDIAN LANGUAGES OF THE NORTHWEST.

LING 538 (3/6) D SEMINAR ON LANGUAGE ACQUISITION IN CHILDREN. Linguistic analysis of data from children learning a first language. Intensive examination of a topic that will vary each year dealing with advanced research into phonological, syntactic, and semantic aspects of language acquisition.

LING 545 (3/6) D PROBLEMS IN SOCIOLINGUISTICS.

LING 546 (3/6) C DIRECTED READING IN TOPICS RELATED TO LINGUISTICS.

LING 548 (0) MAJOR ESSAY.

LING 549 (3–18) C MASTER'S THESIS.

LING 649 (0) PH.D. THESIS.

LLED — LANGUAGE AND LITERACY EDUCATION FACULTY OF EDUCATION

LLED 206 (3/6) D LANGUAGE FIELD EXPERIENCE. Guided individual and group projects related to concurrent studies. Field-based assignments related to language study.

LLED 226 (3/6) D INTRODUCTION TO LANGUAGE ACROSS THE CURRICULUM. Understanding text structure within, and language diversity among, subject areas. Analysis of oral and written language from various curriculum areas in which English is the medium of instruction; implications for learning and instruction. [1.5-3-0; 1.5-3-0]

LLED 300 (5) FOUNDATIONS OF LANGUAGE AND LITERACY EDUCATION: ELEMENTARY AND MIDDLE YEARS. [5-0-0]

LLED 301 (4) LANGUAGE ACROSS THE CURRICULUM IN MULTILINGUAL CLASSROOMS: SECONDARY. Pass/Fail. Equivalency: LANE 426. [4-0-0]

LLED 310 (3) INTRODUCTION TO READING AND LANGUAGE ARTS INSTRUCTION: ELEMENTARY AND MIDDLE YEARS. Pass/Fail. Corequisite: All of EDUC 310, E DUC 315. [3-0-0]

LLED 312 (4/5) D CURRICULUM AND INSTRUCTION IN FRENCH: SECONDARY. Taught in French. Pass/fail. Prerequisite: A completed concentration in French or permission of the Head. Equivalency: MLED 312.

LLED 313 (4/5) D CURRICULUM AND INSTRUCTION IN THEATRE AND DRAMA: SECONDARY. Pass/fail. Prerequisite: A completed concentration in theatre or drama or permission of the Head.

LLED 314 (4/5) D CURRICULUM AND INSTRUCTION IN ENGLISH: SECONDARY. Pass/Fail. Prerequisite: A completed concentration in English or permission of the Head.

LLED 315 (4/5) D CURRICULUM AND INSTRUCTION IN ENGLISH AS A SECOND LANGUAGE: SECONDARY. Pass/Fail. Prerequisite: One of LLED 489, ENGL 329, LING 420. Prerequisite must have been taken within the last five years.

LLED 318 (4/5) D CURRICULUM AND INSTRUCTION IN MODERN LANGUAGES: SECONDARY. A completed concentration in a modern language (Chinese, German, Italian, Japanese, Russian, Spanish, or Punjabi) or permission of the Head. Pass/Fail.

LLED 320 (4) CURRICULUM AND INSTRUCTION IN LANGUAGE AND LITERACY EDUCATION: ELEMENTARY AND MIDDLE YEARS. Pass/Fail. Prerequisite: LLED 310. [2-4-0]

LLED 323 (3) TEACHING AND LEARNING MODERN LANGUAGES: ELEMENTARY AND MIDDLE YEARS. (Formerly MLED 320.) Curriculum and methods of teaching in modern languages (including Chinese, French, German, Italian, Japanese, Punjabi, Russian and Spanish). [3-0-0]

LLED 324 (3) TEACHING AND LEARNING FRENCH AS A SECOND LANGUAGE: ELEMENTARY AND MIDDLE YEARS. For non-specialists. Pass/Fail. Note: For those planning to teach grade 7 or grade 8, university-level French courses within the past five years are also highly desirable. Prerequisite: French 12, graduation from French Immersion (secondary/high school), or equivalent prior French experience. Equivalency: LLED 325.

LLED 325 (3/6) D TEACHING AND LEARNING FRENCH IN ELEMENTARY SCHOOLS. Taught in French. Strategies, techniques, and materials for teaching and administration of Elementary French Immersion and French core programs. Pass/Fail. Prerequisite: Either (a) FREN 220 or (b) all of FREN 222, FREN 223 or approval of advisors in Modern Languages Education. Equivalency: LLED 324.

LLED 333 (3) DRAMA-IN-EDUCATION: KINDERGARTEN AND PRIMARY GRADES. Credit may not be obtained for both LANE or LLED 333 and 335. Pass/Fail. [3-0-0]

LLED 334 (3) DRAMA-IN-EDUCATION: INTERMEDIATE THROUGH SECONDARY. Credit may be obtained for only 1 of LLED 313, 333, 334 or 335. Pass/Fail. [3-0-0]

LLED 335 (3/6) D DRAMA-IN-EDUCATION: K–12. Credit may not be obtained for only one of LLED 313, 333, 334 or 335. Pass/Fail. [3-0-0]

LLED 336 (3) SPEECH COMMUNICATION FOR TEACHERS. Oral presentation skills. Effectiveness of the teacher's voice in the classroom. Pass/Fail. [3-0-0]

LLED 337 (3) REMEDIAL INSTRUCTION IN THE LANGUAGE ARTS. Instructional principles, materials and methods for teaching students whose literacy achievement is at a low level. Prerequisite: An introductory-level reading or language arts course. [3-0-0]

LLED 391 (3) THEORY AND PRACTICE IN READING INSTRUCTION. Credit may be obtained for only one of READ/LANE/LLED 310, READ/LANE/LLED 391, or LLED 300. [3-0-0]

LLED 392 (3) TRENDS AND ISSUES IN READING INSTRUCTION. Prerequisite: An introductory-level reading or language arts education course.

LLED 420 (3/4) D USING CANADIAN CHILDREN'S LITERATURE IN THE FRENCH EDUCATION CLASSROOM. Taught in French. Credit will be given for one of LLED 440, LLED 420.

LLED 426 (3) PRINCIPLES AND PRACTICE OF FRENCH PROGRAM DEVELOPMENT. Taught in French. The development and implementation of French Immersion, Program Cadre, and French as a Second language Programs for preschool, elementary, secondary, or adult.

LLED 428 (3) APPLIED LINGUISTICS FOR TEACHERS OF FRENCH. Prerequisite: Either (a) FREN 220 or (b) all of FREN 222, FREN 223. Equivalency: MLED 489. [3-0-0]

LLED 429 (3/6) C ADVANCED STUDIES IN MODERN LANGUAGE EDUCATION. Credit will be given for only 6 credits of LLED 480 and LLED 429.

LLED 435 (3/6) D ADVANCED STUDIES IN DRAMA-IN-EDUCATION. Pass/Fail. Prerequisite: One of LLED 313, LLED 333, LLED 334, LLED 335 or permission of the instructor. [2-2-0 or 2-2-0; 2-2-0]

LLED 436 (3/6) C ADVANCED SPEECH COMMUNICATION. Equivalency: LANE 416. [3-0-0]

LLED 438 (3) TEACHING WRITTEN COMPOSITION: ELEMENTARY AND SECONDARY. Pass/Fail. Prerequisite: or corequisite: Introductory-level reading, language arts or English education course.

LLED 439 (3) SHAKESPEARE IN THE CLASSROOM. Pass/Fail. Prerequisite: LLED 314. Recommended: at least 3 credit hours of Shakespeare study at the 300 or 400 level in the Faculty of Arts. [3-0-0]

LLED 440 (3) USING CANADIAN CHILDREN'S LITERATURE IN THE CLASSROOM. Equivalency: LLED 420.

LLED 441 (3) INTRODUCTION TO TEACHING CHILDREN'S LITERATURE.

LLED 442 (3) TRENDS AND ISSUES IN TEACHING CHILDREN'S LITERATURE.

LLED 443 (3) TEACHING FOLKLORE IN THE ELEMENTARY CLASSROOM.

LLED 444 (3) MULTICULTURAL CHILDREN'S LITERATURE IN THE ELEMENTARY CLASSROOM.

LLED 445 (3) POETRY IN EDUCATION: ELEMENTARY AND MIDDLE YEARS. Prerequisite: or corequisite: An introductory-level reading or language arts education course.

LLED 446 (3) TEACHING WITH ILLUSTRATED MATERIALS, K–12: FROM PICTURE BOOKS TO INFORMATION TEXTS.

LLED 449 (3) TEACHING ADOLESCENTS' LITERATURE. Prerequisite: or corequisite: An introductory-level reading, language arts or English education course.

LLED 450 (3) TEACHING AND LEARNING LANGUAGE AND LITERACY: KINDERGARTEN AND PRIMARY GRADES. Prerequisite: An introductory-level reading or language arts education course

LLED 451 (3) TEACHING AND LEARNING LANGUAGE AND LITERACY: INTERMEDIATE AND MIDDLE YEARS. Prerequisite: An introductory-level reading or language arts education course.

LLED 452 (3) LITERACY IN THE CONTENT AREAS: INTERMEDIATE THROUGH SECONDARY. Equivalency: LANE 472. [3-0-0]

LLED 453 (3) MATERIALS AND TEXTS OF LITERACY INSTRUCTION: ELEMENTARY. Prerequisite: An introductory-level reading or language arts education course.

LLED 454 (3) ADOLESCENT LITERACY. Prerequisite: or corequisite: an introductory-level reading, language arts, or English education course.

LLED 456 (3/6) D IDENTIFYING AND SUPPORTING LEARNERS WITH LITERACY DIFFICULTIES. Individualized assessment, diagnosis, and instructional planning for students with literacy difficulties. Intensive practicum is included in the 6-credit version of this course. Prerequisite: an introductory-level reading or language arts course; successful completion of an extended practicum or one year of teaching experience. Equivalency: LANE 476.

LLED 457 (3/6) D SPECIAL TOPICS IN READING. Equivalency: READ 477. [3-0-0]

LLED 462 (3) SCHOOL LIBRARY RESOURCE CENTRE PROGRAMS. Equivalency: READ 382. [3-0-0]

LLED 469 (3) RESOURCE-BASED TEACHING. Principles and practices of teachers and teacher-librarians planning and teaching the curriculum using the resources of the school library resource centre. Equivalency: LANE 389. [3-0-0]

LLED 478 (3/6) D INTRODUCTION TO TEACHING ENGLISH AS A SECOND LANGUAGE. Practicum normally required. Excellent oral proficiency in English is required for the teaching practicum. Prerequisite: 6 credits of LLED 489, ENGL 329, LING 420, LING 200, LING 201. Must have been taken within the last five years or may be taken as corequisite with consent of instructor.

LLED 479 (3) THE EDUCATION OF IMMIGRANT STUDENTS. An examination of the cultural backgrounds of major ethnic groups. Instructional techniques for meeting the needs of immigrant students in the regular

classroom with respect to culture and language. [3-0-0]

LLED 480 (3/6) C ADVANCED STUDIES IN LANGUAGE AND LITERACY EDUCATION. Credit will be given for only 6 credits of LLED 480 and LLED 429 (formerly LANE 480 and MLED 480.) [3-0-0]

LLED 481 (3) INTEGRATING COMPUTERS IN LANGUAGE ARTS PROGRAMS. Prerequisite: CSED 402 or experience with computers. [3-0-0]

LLED 482 (3) LANGUAGE, EDUCATION, AND GENDER. (Formerly LANE 360.) [3-0-0]

LLED 486 (3) SUPPORTING CHILDREN'S LANGUAGE DEVELOPMENT. Prerequisite: An introductory-level reading or language arts course. [3-0-0]

LLED 487 (3/6) D SPECIAL TOPICS IN ENGLISH EDUCATION. Prerequisite: One of LLED 300, LLED 310 and one of LLED 320, LLED 321, LLED 322, LLED 391, LANE 320. Equivalency: LANE 477. [3-0-0]

LLED 489 (3/6) D APPLIED LINGUISTICS FOR TEACHERS. [3-0-0; 3-0-0]

LLED 491 (3/6) D SUPERVISED STUDY IN ENGLISH EDUCATION. (Formerly ENED 449.)

LLED 492 (3/6) C SUPERVISED STUDY IN READING. Equivalency: READ 449.

LLED 493 (3/6) C SUPERVISED STUDY IN MODERN LANGUAGES EDUCATION. Equivalency: MLED 449.

LLED 510 (3) LANGUAGE, DISCOURSE AND IDENTITY. Prerequisite: Preference to students admitted to TESL graduate program.

LLED 511 (3/6) D SEMINAR IN CHILD LANGUAGE IN EDUCATION. Prerequisite: One of LING 350, LLED 300 or senior course work in verbal learning or human development. Equivalency: LANE 588.

LLED 520 (3/6) D THEORY AND RESEARCH IN TEACHING OF MODERN LANGUAGES. Equivalency: MLED 508.

LLED 522 (3) ASIA-PACIFIC NARRATIVES AS INQUIRY ON INTERCULTURAL ASPECTS OF LANGUAGE EDUCATION. Equivalency: MLED 540.

LLED 525 (3) BILINGUAL EDUCATION: THEORY AND PRACTICE. (Formerly MLED 575.) Equivalency: MLED 525.

LLED 526 (3) SECOND LANGUAGE ASSESSMENT: CONCEPTUAL AND EMPIRICAL APPROACHES.

LLED 534 (3/6) C THEORY AND RESEARCH IN TEACHING WRITTEN COMPOSITION.

LLED 535 (3) THEORY AND RESEARCH IN DRAMA IN EDUCATION. Prerequisite: LANE 435.

LLED 540 (3) INTRODUCTION TO RESEARCH IN THE TEACHING OF LITERATURE.

LLED 541 (3) THEORIES AND PERSPECTIVES IN TEACHING LITERATURE.

LLED 550 (3/6) C REVIEW OF READING RESEARCH. (Formerly READ 508.)

LLED 552 (3) THEORETICAL FOUNDATIONS OF READING RESEARCH AND PRACTICE.

LLED 553 (3) THEORETICAL FOUNDATIONS OF ESL/EL READING PEDAGOGY. Prerequisite: Admission into the TESL Graduate Program or permission of instructor.

LLED 554 (3/6) D ASSESSMENT IN READING AND OTHER LANGUAGE ARTS. Prerequisite: LLED 456. Corequisite: LLED 562. Equivalency: LLED 562.

LLED 555 (6) SUPERVISION OF READING. Curriculum analysis and planning. Implications for the administrator, the consultant and supervisor of reading. Equivalency: LLED 574.

LLED 556 (3–6) D THEORY AND RESEARCH IN EARLY LITERACY.

LLED 557 (3) FAMILY LITERACY: ISSUES AND PERSPECTIVES.

LLED 561 (3–12) C LABORATORY PRACTICUM.

LLED 562 (3) PRACTICUM IN ASSESSMENT IN READING AND OTHER LANGUAGE ARTS. Pass/Fail.

LLED 565 (3–12) D SPECIAL COURSE IN SUBJECT MATTER FIELD. Courses in various subject matter fields designed to bring teachers up to date in recent findings in each field.

LLED 570 (3) THEORY AND RESEARCH IN ENGLISH LANGUAGE EDUCATION: DISCOURSE PERSPECTIVES. Prerequisite: Admission into the TESL Graduate Program or permission of instructor.

LLED 571 (3) RESEARCH IN LANGUAGE CURRICULUM: SOCIAL PRACTICE PERSPECTIVES. Prerequisite: Admission into the TESL Graduate Program or permission of instructor.

LLED 572 (3/6) D THEORY AND RESEARCH IN TEACHING ENGLISH AS A SECOND LANGUAGE. Prerequisite: Admission into the TESL Graduate Program or permission of instructor.

LLED 573 (3/6) D THEORIES OF SECOND LANGUAGE ACQUISITION. Prerequisite: Admission into the TESL Graduate Program or permission of instructor.

LLED 574 (3) THEORY AND RESEARCH IN TEACHING SECOND LANGUAGE WRITING. Prerequisite: Admission into the TESL Graduate Program or permission of instructor.

LLED 580 (3/6) C PROBLEMS IN EDUCATION. Investigation and report of a problem.

LLED 590 (3) GRADUATING PAPER. Pass/Fail.

LLED 598 (3–12) C FIELD EXPERIENCES. For those on master's, doctoral and diploma programs.

LLED 599 (6–12) D MASTER'S THESIS.

LLED 601 (3–12) D DOCTORAL SEMINAR.

LLED 699 (0) DOCTORAL THESIS.

MAED — MATHEMATICS AND SCIENCE EDUCATION FACULTY OF EDUCATION

MAED 300 (3) TEACHING AND LEARNING MATHEMATICS EDUCATION AND INFORMATION TECHNOLOGY ACROSS THE CURRICULUM: ELEMENTARY. [3-0-0]

MAED 314 (4/5) D CURRICULUM AND INSTRUCTION IN MATHEMATICS: SECONDARY. Pass/Fail. Prerequisite: A completed concentration in mathematics or permission of the Head.

MAED 320 (2) CURRICULUM AND INSTRUCTION IN MATHEMATICS: ELEMENTARY AND MIDDLE YEARS. Curriculum organization in mathematics; principles and methods of instruction applied to teaching mathematics. Pass/Fail. [1-2-0]

MAED 372 (3) MATHEMATICS TEACHING: PROBLEM SOLVING. Prerequisite: One of MAED 300, MAED 314, MAED 320. [3-0-0]

MAED 373 (3) MATHEMATICS TEACHING: GEOMETRY AND MEASUREMENT. Prerequisite: One of MAED 300, MAED 314, MAED 320. [3-0-0]

MAED 440 (3) TOPICS IN THE TEACHING AND LEARNING OF MATHEMATICS: SECONDARY. [3-0-0]

MAED 471 (3/6) D ASSESSMENT IN SCHOOL MATHEMATICS. Prerequisite: One of MAED 300, MAED 314, MAED 320. [1-3-0 or 2-6-0]

MAED 485 (3) MATHEMATICS HISTORY FOR TEACHERS. [3-0]

MAED 508 (3-6) D REVIEW OF RESEARCH IN MATHEMATICS EDUCATION. Studies are made of recent research bearing on educational practice.

MAED 545 (3) FOUNDATIONS OF MATHEMATICS EDUCATION.

MAED 547 (3) MATHEMATICS TEACHING IN THE ELEMENTARY SCHOOL. Recent theories and research.

MAED 548 (3) MATHEMATICS TEACHING IN THE SECONDARY SCHOOL. Recent theories and research.

MAED 549 (3) MATHEMATICS EDUCATION. An advanced course in curriculum and instruction.

MAED 561 (3/12) C LABORATORY PRACTICUM.

MAED 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD. Courses in variable subject matter fields designed to bring teachers up to date in recent findings in each field.

MAED 580 (3-12) C PROBLEMS IN EDUCATION. Investigation and report of a problem.

MAED 590 (3) GRADUATING PAPER. Pass/Fail.

MAED 598 (3/12) C FIELD EXPERIENCES. For those on master's, doctoral and diploma programs.

MAED 599 (6/12) C MASTER'S THESIS.

MATH — MATHEMATICS FACULTY OF SCIENCE

The first digit in the number of a course is intended to convey the level of mathematical maturity at which the course is conducted rather than the year in which it must be taken. Students wishing to enter a 300-level course must have obtained a grade of 51% or better in all prerequisite 200-level courses. Students who expect to follow an Honours Science program or one with high mathematical content are urged to apply for admission to MATH 120 and 121. The following courses are for students in the Faculty of Applied Science: MATH 152, MATH 253, MATH 255, MATH 256, MATH 257, MATH 263, MATH 265, MATH 267. Secondary-school calculus is a prerequisite for MATH 100, 102, and 104. Students with this qualification should see "UBC-SFU-UVIC-UNBC Calculus Examination Certificate" in the Admissions section. MATH 180 and 184 are designed for students without high-school calculus. Continuing Studies offers MATH 098 and 099, refresher courses in pre-calculus material. For further information see the department's website at www.math.ubc.ca.

MATH 98 (0) PRE-CALCULUS I.

MATH 99 (0) PRE-CALCULUS II.

MATH 100 (3) DIFFERENTIAL CALCULUS WITH APPLICATIONS TO PHYSICAL SCIENCES AND ENGINEERING. Derivatives of elementary functions. Applications and modeling: graphing, optimization. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: High-school calculus and a score of 67% or higher in Principles of Mathematics 12. [3-0-0]

MATH 101 (3) INTEGRAL CALCULUS WITH APPLICATIONS TO PHYSICAL SCIENCES AND ENGINEERING. The definite integral, integration techniques, applications, modeling, linear ODE's. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: One of MATH 100, MATH 102, MATH 104, MATH 111, MATH 120, MATH 180, MATH 184. [3-0-0]

MATH 102 (3) DIFFERENTIAL CALCULUS WITH APPLICATIONS TO LIFE SCIENCES. Functions, derivatives, optimization, growth and decay, oscillations and series. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: High-school calculus and a score of 67% or higher in Principles of Mathematics 12. [3-0-1*]

MATH 103 (3) INTEGRAL CALCULUS WITH APPLICATIONS TO LIFE SCIENCES. Antiderivatives and definite integrals, applications to probability and dynamical systems. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: One of MATH 100, MATH 102, MATH 104, MATH 111, MATH 120, MATH 180, MATH 184. [3-0-1*]

MATH 104 (3) DIFFERENTIAL CALCULUS WITH APPLICATIONS TO COMMERCE AND SOCIAL SCIENCES. Derivatives and rates of change, exponential and trigonometric

functions, Newton's method, Taylor series, maxima and minima, and graphing. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: High-school calculus and a score of 67% or higher in Principles of Mathematics 12. [3-0-0]

MATH 105 (3) INTEGRAL CALCULUS WITH APPLICATIONS TO COMMERCE AND SOCIAL SCIENCES. Antiderivatives, the definite integral, techniques of integration, partial derivatives, maxima and minima with constraints, discrete and continuous random variables. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: One of MATH 100, MATH 102, MATH 104, MATH 111, MATH 120, MATH 180, MATH 184. [3-0-0]

MATH 120 (4) HONOURS DIFFERENTIAL CALCULUS. Limits, derivatives, Mean Value Theorem and applications, elementary functions, optimization, Taylor series, approximation. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: High-school calculus and at least 95% on the Provincial Exam in Principles of Mathematics 12; or Principles of Mathematics 12 with a letter of invitation from the Math Dept. based on performance in the Euclid Contest; or permission from dept. head. [4-0-0]

MATH 121 (4) HONOURS INTEGRAL CALCULUS. Definite integrals and the Fundamental Theorem of Calculus, techniques and applications of integration, infinite series. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: Either (a) a score of 68% or higher in MATH 120 or (b) a score of 80% or higher in one of MATH 100, MATH 102, MATH 104, MATH 180, MATH 184 or (c) a score of 5 in AP Calculus AB or (d) permission of the Department Head. [4-0-0]

MATH 152 (3) LINEAR SYSTEMS. 2D and 3D geometry, vectors and matrices, eigenvalues and vibration, physical applications. Laboratories demonstrate computer solutions of large systems. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Corequisite: MATH 101. [3-1*-0]

MATH 180 (4) DIFFERENTIAL CALCULUS WITH PHYSICAL APPLICATIONS. Topics as for Math 100; intended for students with no previous knowledge of Calculus. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Not for credit for students with High School Calculus, AP Calculus AB, AP Calculus BC, or a passing score on the UBC-SFU-UVIC-UNBC Calculus Challenge Examination. Prerequisite: A score of 67% or higher in one of Math 099, Principles of Mathematics 12. [4-0-0]

MATH 184 (4) DIFFERENTIAL CALCULUS FOR SOCIAL SCIENCE AND COMMERCE. Topics as for Math 104; intended for students with no previous knowledge of Calculus. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Not for credit for students with High School Calculus, AP Calculus AB, AP Calculus BC, or a passing

score on the UBC-SFU-UVIC-UNBC Calculus Challenge Examination. Prerequisite: A score of 67% or higher in one of MATH 099, Principles of Mathematics 12. [4-0-0]

MATH 200 (3) CALCULUS III. Analytic geometry in 2 and 3 dimensions, partial and directional derivatives, chain rule, maxima and minima, second derivative test, Lagrange multipliers, multiple integrals with applications. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: One of MATH 101, MATH 103, MATH 105, MATH 121, SCIE 001. [3-0-0]

MATH 210 (3) INTRODUCTION TO MATHEMATICAL COMPUTING. Introduction to numerical computation, computer algebra, mathematical graphics. Primarily for second year students taking a degree in mathematics. One hour laboratory each week. Corequisite: MATH 215 and one of MATH 220, MATH 226 and one of MATH 221, MATH 223. [3-1-0]

MATH 215 (3) ELEMENTARY DIFFERENTIAL EQUATIONS I. First-order equations; linear equations; linear systems; Laplace transforms; numerical methods; trajectory analysis of plane nonlinear systems. Applications of these topics will be emphasized. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: One of MATH 101, MATH 103, MATH 105, MATH 121, SCIE 001. Corequisite: One of MATH 200, MATH 217, MATH 226, MATH 253 and one of MATH 152, MATH 221, MATH 223. [3-0-0]

MATH 217 (4) MULTIVARIABLE AND VECTOR CALCULUS. Partial differentiation, extreme values, multiple integration, vector fields, line and surface integrals, the divergence theorem, Green's and Stokes' theorems. Intended for students in Honours Physics and Engineering Physics. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: A score of 68% or higher in one of PHYS 101, PHYS 107, PHYS 121, PHYS 153 and a score of 68% or higher in one of PHYS 102, PHYS 108, PHYS 122, PHYS 153 and a score of 68% or higher in one of MATH 101, MATH 103, MATH 105, MATH 121. [4-0-0]

MATH 220 (3) MATHEMATICAL PROOF. Sets and functions; induction; cardinality; properties of the real numbers; sequences, series, and limits. Logic, structure, style, and clarity of proofs emphasized throughout. Prerequisite: Either (a) a score of 64% or higher in one of MATH 101, MATH 103, MATH 105 or (b) one of MATH 121, MATH 200. [3-0-0]

MATH 221 (3) MATRIX ALGEBRA. Systems of linear equations, operations on matrices, determinants, eigenvalues and eigenvectors, diagonalization of symmetric matrices. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: Either (a) a score of 64% or higher in one of MATH 100, MATH 102, MATH 104, MATH 120, MATH 180, MATH 184 or (b) one of MATH 101, MATH 103, MATH 105,

MATH 121, SCIE 001 or (c) advanced credit for MATH 100. [3-0-0]

MATH 223 (3) LINEAR ALGEBRA. Matrices, eigenvectors, diagonalization, orthogonality, linear systems, applications. Intended for Honours students. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: Either (a) MATH 121 or (b) a score of 68% or higher in one of MATH 101, MATH 103, MATH 105, SCIE 001. [3-0-0]

MATH 226 (3) ADVANCED CALCULUS I. Functions of several variables: limits, continuity, differentiability; implicit functions; Taylor's theorem; extrema; Lagrange multipliers; multiple integration, Fubini's theorem; improper integrals. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar.) Prerequisite: A score of 68% or higher in MATH 121 or permission of the department head. Corequisite: One of MATH 221, MATH 223. [3-0-0]

MATH 227 (3) ADVANCED CALCULUS II. Parametrization of curves and surfaces; line and surface integrals; theorems of Green, Gauss, Stokes; applications to physics and/or introduction to differential forms. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar.) Prerequisite: A score of 68% or higher in MATH 226 or permission of the department head. [3-0-0]

MATH 230 (3) INTRODUCTION TO FINITE MATHEMATICS. Difference equations, number theory, counting. Intended primarily for students not in the Faculty of Science who wish to have some exposure to mathematical thinking. Students who obtain credit for MATH 100, MATH 102, MATH 104, MATH 111, or MATH 120 cannot in the same year or in later years obtain credit for MATH 230. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: Principles of Mathematics 11. [3-0-0]

MATH 231 (3) TOPICS IN FINITE MATHEMATICS. Probability, game theory, Markov chains, linear programming. Students who obtain credit for MATH 101, MATH 103, MATH 105, or MATH 121 cannot in the same year or in later years obtain credit for MATH 231. Prerequisite: MATH 230. [3-0-0]

MATH 253 (3) MULTIVARIABLE CALCULUS. Partial and directional derivatives; maxima and minima; Lagrange multipliers and second derivative test; multiple integrals and applications. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: One of MATH 101, MATH 103, MATH 105, MATH 121, SCIE 001. [3-0-0]

MATH 255 (3) ORDINARY DIFFERENTIAL EQUATIONS. Review of linear systems; nonlinear equations and applications; phase plane analysis; Laplace transforms; numerical methods. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: One of MATH 101, MATH 103, MATH 105, MATH 121, SCIE 001. Corequisite: One of MATH 152, MATH 221, MATH

223 and one of MATH 200, MATH 217, MATH 226, MATH 263. [3-0-0]

MATH 256 (3) DIFFERENTIAL EQUATIONS. Ordinary and partial differential equations. Particular examples from physics. Laboratories demonstrate graphical and numerical analysis of realistic examples. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: One of MATH 101, MATH 103, MATH 105, MATH 121, SCIE 001. Corequisite: One of MATH 200, MATH 217, MATH 226, MATH 263 and one of MATH 152, MATH 221, MATH 223. [3-1-1]

MATH 257 (3) PARTIAL DIFFERENTIAL EQUATIONS. Introduction to partial differential equations; Fourier series; the heat, wave and potential equations; boundary-value problems; numerical methods. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: One of MATH 215, MATH 255, MATH 265. [3-0-0]

MATH 263 (4) MULTIVARIABLE AND VECTOR CALCULUS. Partial and directional derivatives, multiple integrals, divergence, gradient, curl, vector fields, potentials, line and surface integrals, theorems of Gauss, Green and Stokes. For students in Electrical and Computer Engineering. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: One of SCIE 001, PHYS 101, PHYS 107, PHYS 153 and one of SCIE 001, PHYS 102, PHYS 108, PHYS 153 and one of SCIE 001, MATH 101, MATH 103, MATH 105, MATH 121. Corequisite: One of MATH 152, MATH 221, MATH 223. [4-0-0]

MATH 265 (2) LINEAR DIFFERENTIAL EQUATIONS. Linear ordinary differential equations. Complex numbers, Laplace transforms, frequency response, resonance, step response, systems. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: One of MATH 101, MATH 103, MATH 105, MATH 121, SCIE 001. Corequisite: One of MATH 152, MATH 221, MATH 223 and one of MATH 200, MATH 217, MATH 226, MATH 263. [2-0-1*]

MATH 267 (3) MATHEMATICAL METHODS FOR ELECTRICAL AND COMPUTER ENGINEERING. Fourier series and transforms, wave equation, d'Alembert's solution, modes. Discrete Fourier transform. Recurrence relations, z-transform, generating functions, applications. Prerequisite: One of MATH 215, MATH 255, MATH 256, MATH 265 and one of MATH 152, MATH 221, MATH 223. [3-0-1*]

MATH 300 (3) INTRODUCTION TO COMPLEX VARIABLES. Functions of a complex variable, Cauchy-Riemann equations, elementary functions, Cauchy's theorem and contour integration, Laurent series, poles and residues. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Corequisite: One of MATH 217, MATH 227, MATH 263, MATH 317. [3-0-0]

MATH 301 (3) APPLIED ANALYSIS. Integrals involving multi-valued functions, conformal mapping and applications, analytic continuation, Laplace and Fourier transforms. Prerequisite: MATH 300. Corequisite: One of MATH 257, MATH 316. [3-0-0]

MATH 302 (3) INTRODUCTION TO PROBABILITY. Basic notions of probability, random variables, expectation and conditional expectation, limit theorems. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: One of MATH 200, MATH 226. Equivalency: STAT 302. [3-0-0]

MATH 303 (3) INTRODUCTION TO STOCHASTIC PROCESSES. Discrete-time Markov chains, Poisson processes, continuous time Markov chains, renewal theory. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: One of MATH 302, STAT 302. [3-0-0]

MATH 307 (3) APPLIED LINEAR ALGEBRA. Dependence/independence, bases and orthogonality; linear transformations from \mathbb{R}^n to \mathbb{R}^m ; change of basis; triangularization; quadratic forms in n variables. Prerequisite: One of MATH 221, MATH 223, MATH 152. [3-0-0]

MATH 308 (3) EUCLIDEAN GEOMETRY. Classical plane geometry, solid geometry, spherical trigonometry, polyhedra, linear and affine transformations. Linear algebra proofs are used. It is suggested that MATH 307 be taken concurrently. Prerequisite: One of MATH 152, MATH 221, MATH 223 and one of MATH 220, MATH 226, CPSC 121. [3-0-0]

MATH 309 (3) TOPICS IN GEOMETRY. Topics chosen by the instructor. These may include conic sections, projective configuration, convexity, non-Euclidean geometries, fractal geometry, combinatorial problems of points in the plane. Prerequisite: One of MATH 152, MATH 221, MATH 223 and one of MATH 220, MATH 226, CPSC 121. [3-0-0]

MATH 312 (3) INTRODUCTION TO NUMBER THEORY. Euclidean algorithm, congruences, Fermat's theorem, applications. Some diophantine equations. Distribution of the prime numbers. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: One of MATH 220, MATH 226, CPSC 121 and 9 additional credits of Mathematics courses.

MATH 313 (3) TOPICS IN NUMBER THEORY. Topics chosen by the instructor. These might include: division algorithms, group theory, continued fractions, primality testing, factoring. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: MATH 312. [3-0-0]

MATH 314 (3) REAL VARIABLES. Riemann integral, uniform convergence, interchange of limits, orthogonal functions, other topics. Credit will be given for only one of MATH 314 and MATH 320. Prerequisite: MATH 220. [3-0-0]

MATH 316 (3) ELEMENTARY DIFFERENTIAL EQUATIONS II. Power series methods (ordinary and regular singular points, Bessel's equation); boundary value problems and separation of variables (Fourier series and other orthogonal series), applications to the vibrating string, heat flow, potentials. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: One of MATH 215, MATH 255, MATH 265. [3-0-0]

MATH 317 (3) CALCULUS IV. Parametrizations, inverse and implicit functions, integrals with respect to length and area; grad, div, and curl, theorems of Green, Gauss, and Stokes. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: MATH 200. MATH 221 is recommended. [3-0-0]

MATH 318 (3) PROBABILITY WITH PHYSICAL APPLICATIONS. Random variables, discrete and continuous distributions. Random walk, Markov chains, Monte Carlo methods. Characteristic functions, limit laws. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) Prerequisite: One of MATH 152, MATH 221, MATH 223. Corequisite: One of MATH 257, MATH 316. [3-0-0]

MATH 320 (3) REAL VARIABLES I. The real number system; real Euclidean n -space; open, closed, compact, and connected sets; Bolzano-Weierstrass theorem; sequences and series. Continuity and uniform continuity. Differentiability and mean-value theorems. Prerequisite: Either (a) a score of 68% or higher in MATH 226 or (b) MATH 200 and a score of 80% or higher in MATH 220. [3-0-0]

MATH 321 (3) REAL VARIABLES II. The Riemann or Riemann-Stieltjes integrals. Sequences and series of functions, uniform convergence. Approximation of continuous functions by polynomials. Fourier series. Functions from \mathbb{R}^m to \mathbb{R}^n , inverse and implicit function theorems. Prerequisite: MATH 320. [3-0-0]

MATH 322 (3) INTRODUCTION TO ALGEBRA. Polynomials, rings, ideals, unique factorization, Euclidean rings, fields, groups, cosets, homomorphisms, permutations, matrix groups. Prerequisite: One of MATH 152 [with 80% or above], MATH 221 [with 80% or above], MATH 223 [with 68% or above] and one of MATH 220, CPSC 121, MATH 226. [3-0-0]

MATH 331 (3) PROBLEM SOLVING. Intended for honours students. A seminar on the techniques and art of solving problems based primarily on the mathematics curriculum of the first two years. Prerequisite: One of MATH 223, MATH 221, MATH 152 and one of MATH 226, MATH 200. [3-0-0]

MATH 335 (4) INTRODUCTION TO MATHEMATICS. Intensive course with required tutorial. Combinatorics, probability, geometry and elementary number theory. Not for credit in the Faculty of Science. Students who obtain credit at UBC for any other mathematics course cannot in the same or later

years obtain credit for MATH 335. (Consult the Credit Exclusion list in the Faculty of Science section of the Calendar.) [3-0-2]

MATH 336 (3) MATHEMATICS BY INQUIRY. A problem-based exploration of topics selected from the BC secondary school curriculum. Formal language and notation minimized. Intended for those with minimal background in Mathematics. Not for credit in the Faculty of Science. Prerequisite: Two years teaching experience, normally a teaching certificate, and permission of the department head. [3-0-0]

MATH 337 (3) MATHEMATICS FOR TEACHING. An overview of mathematical topics of the grade 8 to 10 BC school curriculum. Not for credit in the Faculty of Science. Prerequisite: MATH 336. [3-0-0]

MATH 340 (3) INTRODUCTION TO LINEAR PROGRAMMING. Linear programming problems, dual problems, the simplex algorithm, solution of primal and dual problems, sensitivity analysis. Additional topics chosen from: Karmarkar's algorithm, non-linear programming, game theory, applications. Prerequisite: One of MATH 152, MATH 221, MATH 223. [3-0-0]

MATH 342 (3) ALGEBRA, CODING THEORY, AND CRYPTOGRAPHY. Cryptography and error-correcting codes via groups, rings, and fields. Emphasis on both computation and simple proofs; congruences, RSA cryptosystems, linear codes. Prerequisite: One of MATH 152, MATH 221, MATH 223. [3-0-0]

MATH 345 (3) APPLIED NONLINEAR DYNAMICS AND CHAOS. Phase plane methods, bifurcation and stability theory, limit-cycle behavior and chaos for nonlinear differential equations with applications to the sciences. Assignments involve the use of computers. Prerequisite: A score of 68% or higher in one of MATH 215, MATH 255, MATH 256. [3-1-0]

MATH 361 (3) INTRODUCTION TO MATHEMATICAL BIOLOGY. Mathematical modeling of basic biological processes in ecology, physiology, neuroscience and genetics. Dynamic behavior of difference equations, differential equations, and partial differential equations, explained with reference to concrete biological examples. Prerequisite: BIOL 120 and one of BIOL 301, MATH 215, MATH 255, MATH 256 or permission of the instructor. [3-0-0]

MATH 398 (3) CO-OPERATIVE WORK PLACEMENT I. Approved and supervised technical work experience involving mathematics in industry for a minimum of 3.5 months. Technical report required. Restricted to students admitted to the Mathematics Co-operative Education Program.

MATH 399 (3) CO-OPERATIVE WORK PLACEMENT II. Approved and supervised technical work experience involving mathematics in industry for a minimum of 3.5 months. Technical report required. Restricted to students admitted to the Mathematics Co-operative Education Program. Prerequisite: MATH 398.

MATH 400 (3) APPLIED PARTIAL DIFFERENTIAL EQUATIONS. Laplace, wave, and diffusion equations. Conformal mapping with applications in fluid flow. Prerequisite: One of MATH 300, MATH 266 and one of MATH 316, MATH 257. [3-0-0]

MATH 401 (3) GREEN'S FUNCTIONS AND VARIATIONAL METHODS. Green's functions for partial differential equations. Calculus of variations. Eigenfunction expansions. Rayleigh-Ritz and finite element methods. Prerequisite: MATH 400. [3-0-0]

MATH 402 (3) CALCULUS OF VARIATIONS. Classical variational problems; necessary conditions of Euler, Weierstrass, Legendre, and Jacobi; Erdmann corner conditions, transversality, convex Lagrangians, fields of extremals, sufficient conditions for optimality, numerical methods; applications to classical mechanics, engineering and economics. Prerequisite: A score of 68% or higher in one of MATH 301, MATH 320. [3-0-0]

MATH 403 (3) STABILIZATION AND OPTIMAL CONTROL OF DYNAMICAL SYSTEMS. Dynamical systems; stability by Liapunov's direct method; controllability and eigenvalue assignment for autonomous linear systems; linear-quadratic regulator, time optimal control, Pontryagin maximum principle, dynamic programming; applications in engineering, economics and resource management. Prerequisite: A score of 68% or higher in one of MATH 320, MATH 301. MATH 402 is recommended. [3-0-0]

MATH 405 (3) NUMERICAL METHODS FOR DIFFERENTIAL EQUATIONS. Interpolation, numerical integration, numerical solution of ordinary and partial differential equations. Practical computational methods emphasized and basic theory developed through simple models. Prerequisite: One of MATH 257, MATH 316. [3-0-0]

MATH 407 (3) APPLIED MATRIX ANALYSIS. Numerical analysis of matrices, including solution of linear systems and eigenvalue/eigenvector calculations. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar.) Prerequisite: MATH 307. [3-0-0]

MATH 412 (3) THEORY OF MODULES. Modules and vector spaces, modules over principal ideal domains, canonical forms, duality, representation theory, bilinear forms. Prerequisite: A score of 68% or higher in MATH 322. [3-0-0]

MATH 414 (3) MATHEMATICAL DEMONSTRATIONS. Students will prepare material illustrating ideas and applications of mathematics and present it to audiences outside the University. Intended for third or fourth year Mathematics students and Math/Science Education students. Prerequisite: Permission of the department head is required. [2-0-0; 1-0-0]

MATH 415 (3) INTRODUCTION TO MATHEMATICAL LOGIC. Predicate calculus, models, theories. Introduction to recursive functions. The Goedel incompleteness theorem. Prerequisite: 24 credits of MATH courses. [3-0-0]

MATH 416 (3) ORDINARY DIFFERENTIAL EQUATIONS. Existence and uniqueness, first order systems, stability, attractors, oscillation and comparison theorems, Sturm-Liouville theory, solution of partial differential equations by separation of variables. Prerequisite: A score of 68% or higher in all of MATH 215, MATH 321. [3-0-0]

MATH 417 (3) PARTIAL DIFFERENTIAL EQUATIONS. Poisson, heat, and wave equations; uniqueness theorems, maximum principle, Green's function, existence for the Dirichlet problem. Cauchy problem for the heat and wave equations, variational principles and generalized solutions, Fourier/Galerkin approximations, Sobolev spaces, spectral theorem, initial boundary value problems. Prerequisite: Either (a) MATH 416 or (b) a score of 68% or higher in MATH 321 and consent of the instructor. [3-0-0]

MATH 418 (3) PROBABILITY. Probability spaces, random variables, distributions, expectation, conditional probabilities, convergence of random variables, generating and characteristic functions, weak and strong laws of large numbers, central limit theorem. Prerequisite: A score of 68% or higher in MATH 321. [3-0-0]

MATH 419 (3) STOCHASTIC PROCESSES. Random walks, Markov chains, branching processes, Poisson processes, continuous time Markov chains, martingales, Brownian motion. Prerequisite: MATH 418. [3-0-0]

MATH 420 (3) REAL ANALYSIS I. Lebesgue measure; integration and differentiation; L^p spaces. Prerequisite: A score of 68% or higher in MATH 321. [3-0-0]

MATH 421 (3) REAL ANALYSIS II. Metric spaces, topological spaces, Banach spaces. Prerequisite: MATH 420. [3-0-0]

MATH 422 (3) GROUPS AND FIELDS. Isomorphism Theorems, group actions, Sylow groups, solvable groups, field extensions, automorphisms, Galois theory. Prerequisite: A score of 68% or higher in MATH 322. [3-0-0]

MATH 423 (3) TOPICS IN ALGEBRA. Commutative algebra, algebraic geometry, algebraic number theory, Lie theory, homological algebra and category theory, or some other advanced topic in algebra. Prerequisite: A score of 68% or higher in one of MATH 412, MATH 422. [3-0-0]

MATH 424 (3) CLASSICAL DIFFERENTIAL GEOMETRY. The differential geometry of curves and surfaces in three-dimensional Euclidean space. Mean curvature and Gaussian curvature. Geodesics. Gauss's Theorema Egregium. Prerequisite: A score of 68% or higher in MATH 321. [3-0-0]

MATH 425 (3) INTRODUCTION TO MODERN DIFFERENTIAL GEOMETRY. Riemannian manifolds, tensors and differential forms, curvature and geodesics. Prerequisite: MATH 424. [3-0-0]

MATH 426 (3) INTRODUCTION TO TOPOLOGY. General topology, combinatorial topology, fundamental group and covering spaces, topics chosen by the instructor. Prerequisite: A score of 68% or higher in all of MATH 321, MATH 322. [3-0-0]

MATH 427 (3) TOPICS IN TOPOLOGY. Homology theory, homotopy theory, manifolds, and other topics chosen by the instructor. Prerequisite: MATH 426. [3-0-0]

MATH 428 (3) MATHEMATICAL CLASSICAL MECHANICS I. Newton's equation, conservation laws, the Euler-Lagrange equation; Hamilton's principle of least action, Hamilton's equations, Lagrangian mechanics on manifolds. PHYS 306 is recommended as a companion course. Prerequisite: All of PHYS 206, MATH 215. Corequisite: MATH 320. [3-0-0]

MATH 429 (3) MATHEMATICAL CLASSICAL MECHANICS II. Differential forms, symplectic manifolds, canonical transformations, Hamilton-Jacobi equation, integrable systems, Liouville-Arnold theorem, perturbations of integrable systems. Prerequisite: MATH 428. Corequisite: MATH 321. [3-0-0]

MATH 430 (2-6) C SPECIAL TOPICS IN ANALYSIS. The student should consult the Mathematics Department for the particular topics offered in a given year. [3-0-0]

MATH 431 (2-6) C SPECIAL TOPICS IN GEOMETRY. The student should consult the Mathematics Department for the particular topics offered in a given year. [3-0-0]

MATH 432 (2-6) C SPECIAL TOPICS IN ALGEBRA. The student should consult the Mathematics Department for the particular topics offered in a given year. [3-0-0]

MATH 437 (3) NUMBER THEORY. Divisibility, congruences, Diophantine equations, arithmetic functions, quadratic reciprocity, advanced topics. (Consult the Credit Exclusion section in the Faculty of Science section of the Calendar.) Corequisite: One of MATH 320, MATH 322. [3-0-0]

MATH 440 (3) COMPLEX ANALYSIS. The residue theorem, the argument principle, conformal mapping, the maximum modulus principle, harmonic functions, representation of functions by integrals, series, and products. Other topics at the discretion of the instructor. Prerequisite: MATH 300 and a score of 68% or higher in MATH 320. [3-0-0]

MATH 441 (3) MATHEMATICAL MODELING: DISCRETE OPTIMIZATION PROBLEMS. Formulation of real-world optimization problems using techniques such as linear programming, network flows, integer programming, dynamic programming. Solution by appropriate software. Prerequisite: MATH 340. [3-0-0]

MATH 442 (3) OPTIMIZATION IN GRAPHS AND NETWORKS. Basic graph theory, emphasizing trees, tree growing algorithms, and proof techniques. Problems chosen from: shortest paths, maximum flows, minimum cost flows, matchings, graph colouring. Linear programming duality will be an important tool. Prerequisite: MATH 340. [3-0-0]

MATH 443 (3) GRAPH THEORY. Introductory course in mostly non-algorithmic topics including: planarity and Kuratowski's theorem, graph colouring, graph minors, random graphs, cycles in graphs, Ramsey theory, extremal graph theory. Proofs emphasized. Prerequisite: At least 6 credits of Mathematics courses numbered 300 or above. [3-0-0]

MATH 445 (3) MATHEMATICAL MODELING: APPLICATIONS IN THE NATURAL AND SOCIAL SCIENCES. Formulation, analysis, simulation, and interpretation for practical problems. An integration of dynamical, continuous optimization, and probabilistic techniques in modeling. Prerequisite: One of MATH 215, MATH 255, MATH 265 and one of STAT 241, STAT 251 or the corequisite. Corequisite: One of MATH 302, STAT 302. [3-0-0]

MATH 446 (3) TOPICS IN THE HISTORY OF MATHEMATICS I. Historical development of concepts and techniques in areas chosen from Geometry, Number Theory, Algebra, Calculus, Probability, Analysis. The focus is on historically significant writings of important contributors and on famous problems of Mathematics. Prerequisite: 27 credits in Mathematics. [3-0-0]

MATH 447 (3) TOPICS IN THE HISTORY OF MATHEMATICS II. A continuation of MATH 446. Prerequisite: MATH 446. [3-0-0]

MATH 449 (2-6) C HONOURS READING. Independent reading by Honours students in Mathematics under the direction of a faculty member. Written report required.

MATH 450 (3) ASYMPTOTIC AND PERTURBATION METHODS. Asymptotic expansions. Asymptotic evaluation of integrals; WKB methods. Regular and singular expansions. Boundary layer theory; matched asymptotic expansions. Multiple scale techniques. Prerequisite: All of MATH 301, MATH 400. [3-0-0]

MATH 462 (3) PROJECTS IN MATHEMATICAL BIOLOGY. Development and analysis of mathematical models for complex systems in ecology, evolution, cell biology, neurophysiology, and other biological and medical disciplines. Prerequisite: MATH 361. [3-0-0]

MATH 498 (3) CO-OPERATIVE WORK PLACEMENT III. Approved and supervised technical work experience involving mathematics in industry for a minimum of 3 1/2 months. Technical report required. Restricted to students admitted to the Mathematics Co-operative Education Program. Prerequisite: MATH 399.

MATH 499 (3) CO-OPERATIVE WORK PLACEMENT IV. Approved and supervised technical work experience involving mathematics in industry for a minimum of 3 1/2 months. Technical report required. Restricted to

students admitted to the Mathematics Co-operative Education Program. Prerequisite: MATH 498.

MATH 500 (3) MATHEMATICAL LOGIC.

MATH 501 (3) ALGEBRA I.

MATH 502 (3) ALGEBRA II.

MATH 503 (3) ALGEBRAIC STRUCTURES I.

MATH 504 (3) ALGEBRAIC STRUCTURES II.

MATH 507 (3) MEASURE THEORY AND INTEGRATION.

MATH 508 (3) COMPLEX ANALYSIS I.

MATH 509 (3) COMPLEX ANALYSIS II.

MATH 510 (3) FUNCTIONAL ANALYSIS.

MATH 511 (3) OPERATOR THEORY AND APPLICATIONS.

MATH 512 (3) QUANTUM THEORY.

MATH 513 (3) STATISTICAL MECHANICS.

MATH 514 (3) ORDINARY DIFFERENTIAL EQUATIONS I.

MATH 515 (3) ORDINARY DIFFERENTIAL EQUATIONS II.

MATH 516 (3) PARTIAL DIFFERENTIAL EQUATIONS I.

MATH 517 (3) PARTIAL DIFFERENTIAL EQUATIONS II.

MATH 518 (3) NONLINEAR DIFFERENTIAL EQUATIONS.

MATH 519 (3) FLUID MECHANICS I.

MATH 520 (3) FLUID MECHANICS II.

MATH 521 (3) NUMERICAL ANALYSIS OF PARTIAL DIFFERENTIAL EQUATIONS.

MATH 522 (3) NUMERICAL ANALYSIS.

MATH 523 (3) COMBINATORIAL OPTIMIZATION.

MATH 525 (3) DIFFERENTIAL GEOMETRY I.

MATH 526 (3) DIFFERENTIAL GEOMETRY II.

MATH 527 (3) ALGEBRAIC TOPOLOGY I.

MATH 528 (3) ALGEBRAIC TOPOLOGY II.

MATH 529 (3) DIFFERENTIAL TOPOLOGY.

MATH 530 (3) GEOMETRIC TOPOLOGY I.

MATH 531 (3) GEOMETRIC TOPOLOGY II.

MATH 532 (3) ALGEBRAIC GEOMETRY I.

MATH 533 (3) ALGEBRAIC GEOMETRY II.

MATH 534 (3) LIE THEORY I.

MATH 535 (3) LIE THEORY II.

MATH 537 (3) NUMBER THEORY.

MATH 538 (3) ALGEBRAIC NUMBER THEORY.

MATH 539 (3) ANALYTIC NUMBER THEORY.

MATH 540 (3) ANALYTIC NUMBER THEORY II.

MATH 541 (3) HARMONIC ANALYSIS I.

MATH 542 (3) HARMONIC ANALYSIS II.

MATH 544 (3) PROBABILITY I.

MATH 545 (3) PROBABILITY II.

MATH 547 (3) OPTIMAL CONTROL THEORY. Optimal control of systems governed by ordinary differential equations. The control problem will be carefully stated, and existence results and necessary conditions will be established. Hamilton-Jacobi-Bellman theory will be introduced.

MATH 549 (6/12) C THESIS FOR MASTER'S DEGREE.

MATH 550 (3) METHODS OF ASYMPTOTIC ANALYSIS. Prerequisite: Applied complex analysis (MATH 301 or equivalent) and ordinary and partial differential equations (MATH 400 or equivalent).

MATH 551 (3) PERTURBATION METHODS FOR DIFFERENTIAL EQUATIONS. Prerequisite: MATH 550. Ordinary and partial differential equations (MATH 400 or equivalent).

MATH 552 (3) INTRODUCTION TO DYNAMICAL SYSTEMS. Ideas, methods and applications of bifurcation theory and dynamical systems: differential and difference equations, local bifurcations, perturbation methods, chaos. Prerequisite: One of MATH 215, MATH 255, MATH 256 and one of MATH 256, MATH 257, MATH 316.

MATH 553 (3) ADVANCED DYNAMICAL SYSTEMS. Topics from: hyperbolic invariant sets and symbolic dynamics, global bifurcations, local bifurcations for partial differential equations, multiple bifurcations, bifurcations and symmetry, applications. Prerequisite: MATH 552.

MATH 554 (3) SYMMETRIES AND DIFFERENTIAL EQUATIONS. Dimensional analysis, modelling and invariance. Lie groups of transformations, infinitesimal transformations. Applications to ordinary and partial differential equations. No knowledge of group theory will be assumed. Prerequisite: Elementary courses in differential equations and linear algebra.

MATH 557 (3) LINEAR AND NONLINEAR WAVES. Classical and recent results in linear and nonlinear waves. Geometrical acoustics and kinematic waves; large amplitude waves in weakly stratified media; small amplitude waves in strongly stratified media. Dispersive waves; group velocity; applications. Prerequisite: MATH 400 and some knowledge of either fluid mechanics or elasticity.

MATH 560 (3) MATHEMATICAL BIOLOGY I. Mathematical methods in modeling biological processes, at levels from cell biochemistry to community ecology. Prerequisite: Completion of an undergraduate degree in Biological, Physical or Mathematical science, including basic training in mathematics and statistics (e.g., STAT 200).

MATH 561 (3) MATHEMATICAL BIOLOGY II. Advanced techniques and models in mathematical biology, with applications. Prerequisite:

MATH 560 and ordinary and partial differential equations.

MATH 562 (3) INTRODUCTION TO MATHEMATICAL NEUROBIOLOGY. Cable theory. Passive and active membrane properties. Action potentials, Hodgkin-Huxley and FitzHugh-Nagumo models. Bursting phenomena. Nonlinear waves in excitable media. Prerequisite: Some background in ordinary and partial differential equations. No background in neurobiology is required.

MATH 589 (3) M.SC. MAJOR ESSAY.

MATH 590 (2–6) C GRADUATE SEMINAR. Presentation and discussion of recent results in the mathematical literature.

MATH 591 (2) GRADUATE SEMINAR IN APPLIED MATHEMATICS.

MATH 597 (3) CO-OPERATIVE WORK PLACEMENT I. Prerequisite: Registration in Mathematics M.Sc. program, Mathematical Finance Option, and approval of the mathematical finance program director.

MATH 598 (3) CO-OPERATIVE WORK PLACEMENT II. Prerequisite: MATH 597 and approval of the mathematical finance program director.

MATH 599 (1) MATHEMATICS TEACHING TECHNIQUES. [3-0-0]

MATH 600 (2–15) C TOPICS IN ALGEBRA.

MATH 601 (2–15) C TOPICS IN ANALYSIS.

MATH 602 (2–15) C TOPICS IN GEOMETRY.

MATH 603 (2–15) C TOPICS IN TOPOLOGY.

MATH 604 (2–15) C TOPICS IN OPTIMIZATION.

MATH 605 (2–15) C TOPICS IN APPLIED MATHEMATICS.

MATH 606 (2–15) C TOPICS IN DIFFERENTIAL EQUATIONS.

MATH 607 (2–15) C TOPICS IN NUMERICAL ANALYSIS.

MATH 608 (2–15) C TOPICS IN PROBABILITY.

MATH 609 (2–15) C TOPICS IN MATHEMATICAL PHYSICS.

MATH 610 (2–15) C TOPICS IN PURE MATHEMATICS.

MATH 611 (2–15) C TOPICS IN FUNCTIONAL ANALYSIS.

MATH 612 (2–15) C TOPICS IN MATHEMATICAL BIOLOGY.

MATH 613 (3) TOPICS IN NUMBER THEORY.

MATH 620 (2–15) C DIRECTED STUDIES IN MATHEMATICS. Advanced study under the direction of a faculty member may be arranged in special situations.

MATH 649 (0) PH.D. THESIS.

MDVL — MEDIEVAL STUDIES FACULTY OF ARTS

See Medieval Studies under the Faculty of Arts section of the Calendar for other acceptable courses.

MDVL 200 (6) INTRODUCTION TO THE MIDDLE AGES. Selected topics (e.g., Age of Charlemagne, Twelfth-Century Renaissance) studied from an interdisciplinary approach designed to integrate the major areas of history, literature, and art; topics vary from year to year; interested students should consult the Medieval Studies advisor, Department of History.

MDVL 301 (3) EUROPEAN LITERATURE FROM THE 5TH TO THE 14TH CENTURY. Selected works from the 5th to the 14th centuries in their cultural and social contexts.

MDVL 302 (3) EUROPEAN LITERATURE FROM THE 14TH TO THE 16TH CENTURY. Selected works of the Late Middle Ages and Renaissance in their cultural and social contexts.

MDVL 440 (3/6) D MEDIEVAL SEMINAR.

MDVL 449 (6/12) C GRADUATING ESSAY OR SUPERVISED STUDY.

MECH — MECHANICAL ENGINEERING FACULTY OF APPLIED SCIENCE

MECH 220 (4) TECHNICAL SKILLS PRACTICUM. Engineering graphics, spatial visualization, CAD, equation solvers, machine shop practice, electronic circuit construction and troubleshooting, elements of engineering science. Prerequisite: All of MATH 101, MATH 152, PHYS 170, PHYS 153 and one of APSC 150, APSC 151. Corequisite: All of ENGL 112, MECH 221. [1-3-3]

MECH 221 (13) ENGINEERING SCIENCE I. Rigid body kinetics and kinematics, basic electrical circuits, work and power, stress and strain, torsion, bending. This course includes the content of EECE 263. Prerequisite: All of MATH 101, MATH 152, PHYS 170, PHYS 153. Corequisite: All of ENGL 112, MECH 220. [12-2-2]

MECH 222 (7) ENGINEERING SCIENCE II. Fluid properties, equations of state. Pressure, buoyancy, hydrostatic forces, pressure measurement. Conservation of mass, momentum, and energy. Bernoulli's equation. dimensional analysis, modeling. Turbulent flow in pipes; turbomachinery; conduction and convection. Prerequisite: All of MECH 220, MECH 221. Corequisite: MECH 223. [5-2-2]

MECH 223 (7) MECHANICAL DESIGN. Design methodology, synthesis and analysis. Design projects representing both mechanical mechanism design and thermofluid systems. Prerequisite: All of MECH 220, MECH 221. Corequisite: MECH 222. [3-8-0]

MECH 260 (3) INTRODUCTION TO MECHANICS OF MATERIALS. Statically determinate frames and trusses; shear force and bending moment diagrams; theory of beam bending, moment-curvature relation, bending

stress, shear stress; torsion of circular rods; transformation of stress and strain in two dimensions, Mohr's circle. Prerequisite: All of MATH 101, PHYS 170. [3-0-1]

MECH 280 (3) INTRODUCTION TO FLUID MECHANICS. Fluid properties; statics; kinematics, dynamics, energy, and momentum principles for one-dimensional flow; dimensional analysis and similarity; laminar and turbulent flow; pipe flow; principles of turbo-machine flow; forces on bodies in flow. Prerequisite: All of MATH 152, PHYS 170 and one of MATH 217, MATH 253 and either (a) all of PHYS 101, PHYS 102 or (b) PHYS 153. [3-0-1]

MECH 301 (2) MECHANICAL ENGINEERING LABORATORIES III. Typical applications of fundamental principles in mechanics of materials, dynamics, thermodynamics and fluid dynamics. Instrumentation, data acquisition and data manipulation using modern computational tools. Behaviour and applications of common mechanical devices. Prerequisite: All of MECH 201, MECH 202, MECH 260, MECH 280. [0-3-0]

MECH 302 (2) MECHANICAL ENGINEERING LABORATORIES IV. Typical applications of fundamental principles in mechanics of materials, dynamics, thermodynamics and fluid mechanics. Instrumentation, data acquisition and data manipulation using modern computational tools. Behaviour and applications of common mechanical devices. Prerequisite: All of MECH 201, MECH 202, MECH 265, MECH 270. [0-3-0]

MECH 303 (2) MECHATRONICS LABORATORIES. Mechanics of materials and dynamics. Instrumentation, data acquisition and data manipulation using modern computational tools. Common mechanical devices. For students in Mechatronics option only. Prerequisite: All of MECH 220, MECH 221, MECH 222, MECH 223. [0-3*-0; 0-3*-0]

MECH 304 (4) MECHANICAL ENGINEERING LABORATORIES. Mechanics of materials, dynamics, heat transfer, and fluid dynamics. Instrumentation, data acquisition and data manipulation using modern computational tools. Common mechanical devices. Prerequisite: All of MECH 220, MECH 221, MECH 222, MECH 223. [1-6-0]

MECH 325 (4) MECHANICAL DESIGN I. Introduction to manufacturing operations. Design for manufacturing and assembly. Design and selection of shafts, bearings, springs, seals and packing, and couplings. Fatigue and fracture considerations in design. Prerequisite: All of MECH 220, MECH 221, MECH 222, MECH 223. Corequisite: MECH 360. [3-0-3]

MECH 326 (3) MECHANICAL DESIGN II. Design and application of mechanisms, linkages and cams. Design of bolted joints and power screws. Design and selection of gears, gear trains, brakes and clutches. Prerequisite: All of MECH 220, MECH 221, MECH 222, MECH 223. Corequisite: MECH 360. [2-0-3]

MECH 327 (3) THERMAL SYSTEM DESIGN. Energy conservation. Microscopic meaning of entropy. Equilibrium. Reacting systems. Process sheets. Fluid flow, heat transfer, and material considerations. Economic and environmental impact of energy use. Application to thermofluid systems such as power plants. Prerequisite: One of MECH 222, PHYS 257, CHBE 241. [3-0-1]

MECH 328 (3) MECHANICAL ENGINEERING DESIGN PROJECT. Design project course linked to MECH 325, MECH 326, or MECH 327. The project provides experience in applying the design process, making educated assumptions and decisions, and working in teams to fabricate and provide a new mechanical design. The course has a weekly lecture discussing product development and various factors affecting the design. Corequisite: MECH 325 and one of MECH 326, MECH 327. [1-4-1]

MECH 340 (3) STATICS OF MARINE VEHICLES. Hydrostatic curves, transverse and longitudinal stability of surface ships and submersibles. Flooding, damaged stability. Launching. Load due to cargo and waves. Prerequisite: Second-year Mechanical Engineering program. [3-0-0]

MECH 341 (3) SHIP RESISTANCE AND PROPULSION. Elementary theory of ocean waves, dimensional analysis, ship resistance and interference. Ship propulsion methods, propeller theory and design. Prerequisite: Second-year Mechanical Engineering program. [3-0-0]

MECH 356 (3) MACHINE COMPONENTS. Machines used for wood products manufacturing, design, maintenance, purchasing. Selection of components including drives, bearings, brakes, clutches, fasteners, springs. Not open to students in the Faculty of Applied Science. Prerequisite: WOOD 376. Corequisite: WOOD 386. [3-2-0]

MECH 360 (3) MECHANICS OF MATERIALS. Beam deflections, column buckling; Castigliano's theorem, statically indeterminate beams, frames and rings; bending of curved beams, bending of beams with asymmetric cross-sections, shear centre; principal stresses and stress invariants in three dimensions; yield and fracture criteria. Prerequisite: All of MECH 220, MECH 221, MECH 222, MECH 223. [3-0-1]

MECH 364 (4) MECHANICAL VIBRATIONS. Theory of vibration of mechanical systems. Undamped 1 degree of freedom vibration, forced vibrations and resonance, damping, multiple degree of freedom systems, mode shapes and orthogonality, continuous systems, vibration measuring instruments and frequency spectrum analysis. Prerequisite: All of MECH 220, MECH 221, MECH 222, MECH 223. Corequisite: MECH 360. [3-2*-1]

MECH 366 (3) MODELING OF MECHATRONIC SYSTEMS. Modeling of mechanical, electrical, thermal, fluid elements and mixed mechatronic systems. Signal processing, signal conditioning. Sensors, data acquisi-

tion systems, actuators. Prerequisite: All of MECH 220, MECH 221, MECH 222, MECH 223. [2-2-0]

MECH 375 (3) HEAT TRANSFER I. Steady and transient conduction. Radiation heat transfer; blackbody laws, optical properties of surfaces, radiative heat exchange. Convective heat and mass transfer in pipes and from external surfaces. Boiling and condensation heat transfer. Design of boilers, condensers and heat exchangers. Prerequisite: Either (a) all of MECH 220, MECH 221, MECH 222, MECH 223 or (b) either (a) CHBE 241 or (b) all of PHYS 257, CIVL 215 or (c) CHBE 251 or (d) all of MECH 280, MATH 255, MATH 257. [3-0-1]

MECH 380 (3) FLUID DYNAMICS. Review of principles, compressible flow, open-channel flow, potential flow, simple laminar viscous flow, boundary layers, flow around bluff bodies. Prerequisite: Either (a) all of MECH 220, MECH 221, MECH 222, MECH 223 or (b) all of CHBE 241, CIVL 215 or (c) all of CHBE 251, MATH 255, MATH 257. [3-0-1]

MECH 386 (3) INDUSTRIAL FLUID MECHANICS. Analysis of piping networks. Review of pumps, turbines and hydraulic motors. Flow measurement devices such as flow meters and transducers for measuring velocity and pressure. Multiphase flows. Introduction to turbulence, mixing and buoyancy driven flows. Prerequisite: MECH 380. [3-1*-0]

MECH 392 (2) MANUFACTURING PROCESSES. Manufacturing characteristics of materials and their control. Metal forming processes, plastic deformations, rolling, forging, drawing, extrusion, sheet metal forming. Machining processes and machine tools, turning, milling, drilling, grinding. Metal fabrication, welding and casting. An introduction to process planning. [2-0-0]

MECH 405 (3) ACOUSTICS AND NOISE CONTROL. Wave properties; the decibel; hearing, deafness, and hearing protectors; noise criteria and regulations; sound measurement; sound-source characterization; real noise sources, sound propagation outdoors, in ducts and pipes and in rooms; sound transmission; silencers; sound absorbers; partitions. [3-1-0]

MECH 410 (2-6) D SPECIAL TOPICS IN MECHANICAL ENGINEERING. Lectures and readings on specialized topics of current interest in Mechanical Engineering.

MECH 420 (3) SENSORS AND ACTUATORS. Measurement of motion, stress, force, torque, temperature, flow and pressure; principles of sensors and signal conditioning methods; selection and sizing of actuators. Prerequisite: All of MECH 360, MECH 364, MECH 366. [2-2-0]

MECH 421 (3) MECHATRONICS SYSTEM INSTRUMENTATION. Architecture of mechatronics devices; integration of mechanical, electronics, sensors, actuators, computer and real time software systems; PLC and PC based systems; discrete and continuous automation system design. Prerequisite: MECH 366. Corequisite: MECH 420. [2-2-0]

MECH 422 (3) INTRODUCTION TO MICROELECTROMECHANICAL SYSTEMS. Fundamentals of MEMS (MicroElectroMechanical Systems). Microfabrication of MEMS with solid-state technology. LIGA and micro injection molding. Physics of MEMS. Operational principles of various MEMS devices. Prerequisite: One of EECE 363, EECE 365 and all of MECH 360, MECH 364. [3-1-0]

MECH 430 (3) ENGINEERING DATA ANALYSIS. The use of probability and statistical methods for engineering applications. [3-0-0]

MECH 431 (3) ENGINEERING ECONOMICS. Discounted cash flows. Sources of funds, cost of capital. Effects of depreciation, taxes, inflation. Evaluation and comparison of economic models for engineering projects. Replacement decisions. Public project analysis. Risk analysis. Project control, inventory analysis, simulation. [3-0-0]

MECH 435 (3) ORTHOPAEDIC BIOMECHANICS. Musculoskeletal anatomy. Muscle and joint loads. Muscle mechanics. Musculoskeletal dynamics. Gait. Tissue mechanics of tendon, ligament, articular cartilage, and bone. Biomaterials. Application examples in orthopaedics including joint replacement and fracture fixation. Prerequisite: All of MECH 220, MECH 221, MECH 222, MECH 223. [3-0-1]

MECH 436 (3) FUNDAMENTALS OF INJURY BIOMECHANICS. Introduction to injury biomechanics. Anatomy. Impact experiments. Multi-body dynamic simulation and finite element analysis. Skull, face, brain, spine, eye, pelvis, abdomen, and extremity injury. Anthropomorphic test devices, seat belts, airbags, child restraints, and helmets. Credit cannot be obtained for both MECH436 and MECH536. Prerequisite: All of MECH 360, MECH 364. [3-0-1]

MECH 441 (3) COMPUTER-AIDED SHIP DESIGN. Introduction to computer-aided ship design; numerical procedures applied to form, curve fairing, stability, resistance, propulsion, motion maneuvering and strength. Each student will complete a preliminary design of a conventional ship or, with permission of the instructor, may undertake a preliminary design of a ship intended for special applications. Prerequisite: All of MECH 340, MECH 341. [2-2-0]

MECH 442 (3) SHIP STRUCTURES AND VIBRATION. Structural theory and practice of ship structural design. Longitudinal and transverse strength of hull girder, bending moment, torsion in a seaway, plate theory, development of ship structural design, pressure hull design and ship building materials. Concepts of ship vibrations and their isolation. [3-0-1]

MECH 443 (3) EXPERIMENTAL NAVAL ARCHITECTURE. Planning and execution of experiments related to marine vehicle resistance, propulsion, seakeeping, structural and hydroelastic systems. Vehicle hydrodynamics as well as experimental methods, data

acquisition, processing and interpretation are stressed. Prerequisite: MECH 341. [1-4-0]

MECH 451 (3) MECHATRONICS DESIGN PROJECT 1. The design, analysis, manufacturability, instrumentation and computer control of a selected mechatronic system will be studied. The course is open only to the students registered in the Mechatronics option. Prerequisite: Completion of 3rd year of Mechatronics Option. [1-2-2]

MECH 452 (3) MECHATRONICS DESIGN PROJECT II. The assembly, instrumentation, computer and electronic interfacing, and testing of a mechatronic system. This course is open only to students registered in the Mechatronics option. Prerequisite: MECH 451. [1-2-2]

MECH 455 (3) MECHANICAL ENGINEERING DESIGN PROJECT I. A capstone design project designed to give students experience in the design/development of practical mechanical devices. Projects are provided by local industry and engineering research laboratories. For students in Co-operative Education programs. [1-2-2]

MECH 456 (3) MECHANICAL ENGINEERING DESIGN PROJECT II. A capstone design project designed to give students experience in the design/development of practical mechanical devices. Projects are provided by local industry and engineering research laboratories. For students in Co-operative Education programs. Prerequisite: MECH 455. [1-2-2]

MECH 457 (6) MECHANICAL ENGINEERING DESIGN PROJECT. A capstone design project designed to give students experience in the design/development of practical mechanical devices. Projects are provided by local industry and engineering research laboratories. Prerequisite: Third-year Mechanical Engineering. [1-2-2;1-2-2]

MECH 458 (6) ELECTRO-MECHANICAL DESIGN PROJECT. A capstone design program designed to give students experience in the design/development of practical mechanical and electro-mechanical devices. Projects are provided by local industry and engineering research laboratories. Prerequisite: Third-year standing. [1-2-2;1-2-2]

MECH 460 (3) ADVANCED MECHANICS OF MATERIALS. Axisymmetric membrane stresses in thin shells of revolution, stresses in thick-walled cylinders and rotating disks, beams on elastic foundations, axisymmetric bending of cylindrical shells, axisymmetric bending of circular plates. Prerequisite: MECH 360. [3-0-0]

MECH 462 (3) FINITE ELEMENT ANALYSIS. Theory and element selection. Development of computer programs for simple problems. Utilization of existing computer packages. Application to mechanical engineering problems. Prerequisite: MECH 360. [2-2*-0]

MECH 463 (3) COMPUTER CONTROLLED MACHINES. Introduction to control theory, transfer function representation, steady state performance, and stability issues. A survey of common actuators, transducers and their performance characteristics. Introduction to

practical application of these devices to secondary wood products manufacturing. Not open to students in the Faculty of Applied Science. [3-1-0]

MECH 464 (3) INDUSTRIAL ROBOTICS. Definition and classification of industrial robotic devices. Selection and implementation issues. Workcell environments. Forward and inverse kinematics, dynamics, trajectory planning. Sensing and manipulation tasks. Control architectures. Credit cannot be received for both MECH 464 and MECH 563. Corequisite: One of MECH 466, MECH 467. [3-0-1]

MECH 465 (4) MECHANICAL VIBRATIONS. Response of multi degree of freedom and continuous systems. Approximate numerical methods. Frequency analysis. Measurement of vibration. Prerequisite: MECH 365. [3-3*-0]

MECH 466 (4) AUTOMATIC CONTROL. Process and system characteristics; transient response; the closed loop; block diagrams and transfer functions; control actions; stability; Nyquist diagrams; Bode diagrams; root locus methods; frequency response; system compensation; nonlinear control systems; digital computer control. Laboratory experiments to support the lecture content. Prerequisite: One of EECE 251, EECE 263, PHYS 209. [3-3*-0]

MECH 467 (4) COMPUTER CONTROL OF MECHATRONICS SYSTEMS. Block diagrams and transfer functions, continuous and discrete domain transformations, feedback control system characteristics, control design in both continuous and discrete domain, absolute and relative stability, optimal control, adaptive control, laboratory examples of Mechatronic systems design. Prerequisite: All of MECH 326, MECH 366. [3-3*-0]

MECH 468 (3) MODERN CONTROL ENGINEERING. Introduction to state space control methods for linear systems including modal control, controllability, observability, linear quadratic regulators, optimal control. Prerequisite: One of EECE 360, MECH 466. [3-0-0]

MECH 469 (3) DYNAMIC SYSTEM MODELING. Modeling of mechanical, electrical, fluid, and thermal systems; analytical models; model representations such as linear and bond graphs; response analysis; digital simulation. [3-0-0]

MECH 470 (2) THERMAL POWER GENERATION. Steam power plant cycles, Rankine cycle, reheat and regenerative cycles, component selection. Gas turbine cycles, Brayton cycle, intercooling, reheat and regeneration. Conditions for maximum cycle efficiency. Combined cycles and binary cycles. Nuclear power generation, reactor types and design. Boiler design and selection, boiler codes. Turbomachinery design and selection. Prerequisite: MECH 370. [2-0-1]

MECH 473 (2/3) HEATING, VENTILATING AND AIR CONDITIONING. Principles of air conditioning; psychometrics and refrigeration. Heat transfer through building materials. Estimation of heating and cooling loads

including the use of current software. System design. Ground, air and water source heat pumps. Lab demonstration/analysis of basic psychometric processes. [2-0-1]

MECH 474 (3) MATERIALS FOR CLEAN ENERGY TECHNOLOGIES. Introduction to operation of gas turbines and fuel cells. Diffusion and migration in solids. Fundamental basis of ionic, electronic, and mixed conductivity in fuel cell materials. Thermal barrier coatings for gas turbines. Material constraints in wind turbines. Credit cannot be obtained for both MECH 474 and MECH 574. Prerequisite: Either (a) all of MECH 220, MECH 221, MECH 222, MECH 223 or (b) APSC 278. [3-0-0]

MECH 475 (2) HEAT TRANSFER II. Unsteady heat conduction. Radiative heat exchange between gray surfaces. Gas radiation. Free convection from plates and cylinders. Boiling. Mass transfer. Simultaneous heat and mass transfer. Heat exchanger design. Boilers, condensers, and cooling towers. Building heat transfer. Prerequisite: MECH 375. [2-0-0]

MECH 479 (3) COMPUTATIONAL FLUID DYNAMICS. Techniques for numerical solution of ordinary and partial differential equations, including an introduction to the finite difference, finite volume and finite element approaches. Simulation of laminar and turbulent flows, including common turbulent models. Validation techniques. Prerequisite: All of MECH 375, MECH 380 and one of MECH 327, MECH 370. [3-2-0]

MECH 481 (3) AERODYNAMICS OF AIRCRAFT I. Low speed aerodynamics of airfoils, wings, wind tunnels. Prerequisite: MECH 380. [3-1*-0]

MECH 482 (3) WIND ENGINEERING. The special theoretical and experimental problems and methods of aerodynamics relevant to the nature of winds and their steady and oscillatory effects on structures and people; wind energy utilization. Prerequisite: MECH 380. [3-1*-0]

MECH 483 (3) AERODYNAMICS OF AIRCRAFT II. High speed aerodynamics of airfoils and wings; oblique shock waves; method of characteristics. Prerequisite: MECH 481. [3-1*-0]

MECH 484 (3) AIRCRAFT DESIGN: AERODYNAMICS. Aircraft performance, stability and control, loading and air worthiness. Detailed example. [2-2-0]

MECH 485 (3) AIRCRAFT DESIGN: STRUCTURES. Development of aircraft wing structure, moments of inertia for complex shapes, crippling loads, shear lag. [2-2-0]

MECH 489 (4) EXPERIMENTAL THERMOFLUIDS. Experimental uncertainty. Design of experiments. Test facilities. Temperature and pressure measurement techniques and instrumentation. Velocity and flow rate measurement techniques. Flow visualization. Case studies of industrial and research experimental practice. Prerequisite: All of MECH 375, MECH 380 and one of MECH 327, MECH 370. [3-2-0]

MECH 490 (3) PRODUCTION ENGINEERING.

Analysis and modelling of production processes, equipment and facilities with specific emphasis on machine tool operations, process planning, the economics of automation, and selected aspects of production/operations planning. Prerequisite: MECH 392. [3-0-0]

MECH 491 (3) COMPUTER-AIDED

MANUFACTURING. NC programming and machining with interactive CAD/CAM systems. Curve and surface geometry for tool-path generation. Tool-path generation methodologies. Geometric modeling techniques for simulation and verification of manufacturing processes. Introduction to Computer-Aided Process Planning. Supplementary tutorial laboratory experiments. Prerequisite: MECH 392. [2-2*-0]

MECH 492 (4) CAD/CAM. Introduction to computer assisted design and manufacturing with a focus on the fundamental issues of geometry and machine tools including an understanding of standard computer tools. Applications to secondary wood products manufacturing. Not open to students in the Faculty of Applied Science. Prerequisite: WOOD 290. [3-4-0]

MECH 495 (3) INDUSTRIAL ENGINEERING. Organizational structure. Manufacturing systems and group technology. Classification and coding. Scheduling and sequencing of operations. Forecasting. Quality control for variables and attributes. Plant location. System reliability analysis. Advanced manufacturing automation concepts. [3-0-0]

MECH 496 (3) ENGINEERING

MANAGEMENT. Organization structures. Management styles. Cost systems and control. Financial statements; accounting procedures. Budgets and performance control. Project management. Human resources management. [3-0-0]

MECH 501 (3) THERMODYNAMICS. Thermodynamic principles, Maxwell relations, availability, irreversibility and equilibrium. Introduction to statistical mechanics.

MECH 502 (3) FLUID MECHANICS.

Governing equations; viscous incompressible flow, incompressible potential flow; incompressible boundary layers, stability and turbulence; compressible potential flow.

MECH 505 (3) INDUSTRIAL AND ENVIRONMENTAL ACOUSTICS AND VIBRATION.

Fundamentals of acoustics and vibrations, physiologic effects, measurement, instrumentation, interpretation of data, industrial standards and control. For students in Occupational and Environmental Hygiene; other graduate students may enrol with permission of the instructor. Equivalency: OCCH 515.

MECH 506 (3) LINEAR VIBRATIONS.

Transient and steady state vibration analysis of continuous and discrete mechanical systems. Lagrange's equation and Hamilton's Principle. Measurement of vibration. Machinery health monitoring. Frequency domain analysis. Experimental modal analysis. Vibration of rotating machinery.

MECH 507 (3) ANALYTICAL DYNAMICS.

Newtonian mechanics; generalized co-ordinates and analytical mechanics; Lagrange equations; Hamilton's Principle; rotational motion and rigid body dynamics; Gyroscopic motion; phase space, equilibrium and stability of motion; stability characteristics of autonomous systems; Hamilton-Jacobi method; applications.

MECH 510 (4) COMPUTATIONAL METHODS IN TRANSPORT PHENOMENA I.

Analytical, computational, and experimental methods in fluid mechanics. Overview of CFD program development. Finite volume methods, spacial discretization and spatial accuracy analysis. Boundary conditions. Time advance methods, time accuracy, and stability. Application to model problems and to the incompressible laminar Navier-Stokes equations. Validation techniques for CFD codes. [3-2-0]

MECH 511 (3) COMPUTATIONAL METHODS IN TRANSPORT PHENOMENA II.

Selected advanced topics in CFD, typically chosen from: Finite volume methods on curvilinear meshes and structured mesh generation. Finite volume methods on unstructured meshes. Multigrid methods for elliptic PDE's. Reynolds-averaged form of the Navier-Stokes equations and turbulence modeling. Three-dimensional flows. Compressible flows. Prerequisite: MECH 510.

MECH 515 (3) FINITE ELEMENT ANALYSIS OF NON-LINEAR AND FIELD PROBLEMS.

Review of finite element theory in linear static and dynamic analyses. Material and geometric non-linearity, various formulation and solution methods, convergence. Fracture mechanics problems. Non-linear transient conduction, convection and radiation boundary conditions. Fluid flow problems.

MECH 516 (3) OPTIMAL MECHANICAL DESIGN.

Formulation of optimal design mechanical problems, unconstrained and constrained problems, search and quasi-Newton methods, finite element formulation for optimal design problems, optimal design of mechanical dynamic systems, interactive design optimization, applications.

MECH 520 (3) CONTROL SENSORS AND ACTUATORS.

Review of control, instrumentation and design. Performance specification of control components, component matching, error analysis. Operating principles, analysis, modelling, design considerations of control sensors and actuators such as analog sensors for motion measurement, digital transducers, stepper motors, DC motors, induction motors, synchronous motors, and hydraulic actuators. Control techniques pertaining to actuators. Applications.

MECH 523 (3) INTELLIGENT CONTROL.

Review of traditional control techniques and comparison with intelligent control; methods of representing and processing knowledge; conventional sets and crisp logic; fuzzy logic; fuzzy logic control; hierarchical fuzzy control; control system tuning; industrial applications.

MECH 524 (3) INTELLIGENT ROBOTIC SYSTEMS.

System components and organization. Modelling and advanced control

techniques. Vision, tactile, laser and proximity sensing. Task planning, path planning, planning with uncertainty. Robot learning. Online applications, collision avoidance, object interception, robotic assembly. Students will be required to present a research seminar. Prerequisite: MECH 563 is recommended.

MECH 525 (3) SUPERVISORY CONTROL

SYSTEMS. General structure of supervision; elements of automata theory; communication links; supervised control; distributed systems; hierarchical systems; multi-agent systems; process monitoring and diagnosis; self-tuning control; adaptive control; intelligent supervisory control; man-machine interface; applications of supervisory control.

MECH 526 (3) ADVANCED INDUSTRIAL

SYSTEMS CONTROL. Discrete time models; process control algorithms; control of systems with process delay; minimum variance control; parameter identification; Kalman filtering. Prerequisite: One of MECH 466, EECE 360. [3-0-0]

MECH 535 (3) ORTHOPAEDIC

BIOMECHANICS. Musculoskeletal anatomy. Static and dynamic analysis of the musculoskeletal system. Gait. Musculoskeletal tissue mechanics. Biomaterials. Advanced study of relevant problems in orthopaedics, including joint replacement, fracture fixation, and spinal disorders. Credit given for only one of MECH 435 and MECH 535. [3-0-1]

MECH 536 (3) FUNDAMENTALS OF INJURY BIOMECHANICS.

Introduction to injury biomechanics. Anatomy. Impact experiments. Multi-body dynamic simulation and finite element analysis. Skull, face, brain, eye, pelvis, abdomen, and extremity injury. Anthropomorphic test devices, seat belts, airbags, child restraints, and helmets. Credit cannot be obtained for both MECH436 and MECH536. [3-0-1]

MECH 540 (3) MARINE HYDRODYNAMICS.

Fundamentals of model testing, ship frictional resistance. Laminar boundary layer theory, turbulent flow on a flat plate. Ship wave resistance. Thin ship theory. Direct measurement of wave resistance.

MECH 541 (3) DYNAMICS OF MARINE

VEHICLES. Water waves, motion of a body in an inviscid fluid, concepts of added mass, damping. Uncoupled and coupled motion of platforms, irregular seaway, dynamic effects, motion, stabilization.

MECH 542 (3) ADVANCED MARINE

VEHICLES. Design of advanced marine vehicles such as air cushion vehicles, hydrofoils, autonomous underwater vehicles, interfaced vehicles. Principles of operation, stability, powering, control and maneuvering. Individual or group design exercise.

MECH 543 (3) ACOUSTICS AND NOISE

CONTROL. Wave properties; the decibel; hearing, deafness and hearing protectors; noise criteria and regulations; sound measurement; sound-source characterization; real noise sources; sound propagation outdoors, in ducts

and pipes and in rooms; sound transmission; silencers; sound absorbers; partitions. [3-1-0]

MECH 549 (0) MAJOR ESSAY. For students in the M.Eng. program.

MECH 550 (2-6) D SPECIAL ADVANCED COURSES. Special advanced courses may be arranged for a graduate student upon the approval of the department head. There will not be more than 6 credits in any one such course.

MECH 551 (6) ELECTRO-MECHANICAL SYSTEM DESIGN PROJECT I. The design, analysis, manufacturability, instrumentation and computer control of a selected dynamic machinery assembly will be studied. Prerequisite: Fourth year of Electro-Mechanical Design option. [0-4-2]

MECH 552 (6) ELECTRO-MECHANICAL SYSTEM DESIGN PROJECT II. The full assembly, instrumentation, computer and electronic interfacing, and testing of a dynamic machine. Prerequisite: MECH 551. [0-3-1]

MECH 555 (4) FUNDAMENTALS OF MICROELECTROMECHANICAL SYSTEMS. Micro-fabrication of MEMS: solid-state technology and other micromachining techniques. Engineering principles of various MEMS devices. [3-2-0]

MECH 558 (3) ENGINEERING APPLICATIONS OF STATISTICAL DISTRIBUTIONS THEORY. Classical and contemporary theory of the prominent statistical models employed in the Applied Sciences. The Normal, Gamma, Beta, and Extreme Value classes of distributions. Estimation techniques and applications to engineering problems. Prerequisite: One of MECH 390, STAT 251.

MECH 560 (3) EXPERIMENTAL METHODS IN MECHANICS. Operating principles of transducers for measuring typical quantities; the construction of transducers and factors controlling their measurement accuracy; electronic signal conditioning equipment and computerized data acquisition system.

MECH 561 (3) LINEAR ELASTICITY. Stress and strain in three dimensions, fundamental field equations of linear elasticity; equilibrium, compatibility, Hooke's law; Papkovitch-Neuber solution, plane stress and plane strain; torsion, torsion of thin-walled members with warping restraint; plate theory.

MECH 562 (3) INTRODUCTION TO CONTINUUM MECHANICS. Cartesian tensors, transformation and invariants of stress and strain, equations of motion and equilibrium, boundary conditions, constitutive equations for elastic, viscous and viscoelastic materials, plastic yield conditions and associated flow rules. [3-0-0]

MECH 563 (3) ROBOTICS: KINEMATICS, DYNAMICS AND CONTROL. Definitions and classification Kinematics: homogeneous transformations, manipulator kinematic equations, forward and inverse kinematic solution methods, differential kinematic equations, motion trajectories. Dynamics: Lagrange-Euler formulations, Newton-Euler

formulation. Control: methods of control, robot control hierarchy, control of single joint and multiple link manipulators, advanced control methods.

MECH 568 (3) THEORY OF PLASTICITY. Yield conditions and flow rules; upper and lower bound theorems; elastic-plastic analysis of circular disks, thick-walled cylinders and spheres; torsion; slip-line fields; rigid-plastic analysis of plates and shells. Credit will be given for only one of MECH 568 or CIVL 536.

MECH 569 (2/4) D NON-LINEAR VIBRATION. Phase plane representation, singular points, exact solutions, equivalent linearization, perturbation method, averaging method, variation of parameters, forced vibration, self-excited vibration.

MECH 572 (3) CONVECTION HEAT TRANSFER. Governing equations for laminar and turbulent flow. Forced convection in internal and external flow. Free, and combined free and forced convection. Heat transfer at high velocities, in rarefied gases and in two-phase flow. Mass transfer.

MECH 573 (3) RADIATION HEAT TRANSFER. Monochromatic and goniometric surface properties. Energy exchange of grey, non-grey, diffuse, directional or specular surfaces. Absorption coefficient and radiation intensity in gas radiation. Radiation between a gas and its enclosure. Radiation of luminous flames.

MECH 574 (3) MATERIALS FOR CLEAN ENERGY TECHNOLOGIES. Introduction to operation of gas turbines and fuel cells. Diffusion and migration in solids. Fundamental basis of ionic, electronic, and mixed conductivity in fuel cell materials. Thermal barrier coatings for gas turbines. Material constraints in wind turbines. Credit cannot be obtained for both MECH 474 and MECH 574.

MECH 575 (1-3) C SPECIAL TOPICS IN HEAT AND MASS TRANSFER.

MECH 576 (3) COMBUSTION. Thermodynamics of combustion, stoichiometry, heat of formation and reaction. Equilibrium composition and adiabatic flame temperature. Chemical kinetics of combustion. Flames in premixed gases; laminar and turbulent flame propagation. Diffusion flames, pollutant emissions and combustion in IC engines.

MECH 578 (3) INTERNAL COMBUSTION ENGINES. Analysis of spark and compression ignition engines. Calculation of fuel economy, power and emission. Practical considerations in engine design.

MECH 579 (4) ADVANCED THERMOFLUIDS COMPUTATION WITH EXPERIMENTAL VALIDATION. Students design a thermofluids experiment to solve an industrially relevant problem, predict the outcome by computational fluid dynamics, and present their conclusions. Credit cannot be obtained for both MECH 479 and MECH 579. [3-2-0]

MECH 580 (3) THEORY OF IDEAL FLUIDS. Topics selected from the kinematics and dynamics of inviscid incompressible fluids in steady and non-steady motion; two-

dimensional and axisymmetric potential flows; applications of conformal mapping; free streamline flows; vortex motions.

MECH 581 (3) LOW SPEED AERODYNAMICS. Circulation, vorticity and Kelvin's Theorem. Potential flow theory and the Kutta-Joukowski Law 2D Vortex Panel. Method. Laminar and turbulent boundary layer computations. Lifting line theory. Vortex Lattice Method. High lift devices. Total airplane drag. Credit cannot be obtained for both MECH 581 and MECH 481.

MECH 582 (3) EXPERIMENTAL FLUID MECHANICS. Modelling Test facilities. Wind tunnel force measurement. Theory of conventional and modern manometry. Classical velocimetry. Hotwire anemometry. Theory and application of laser Doppler velocimetry. Particle image velocimetry. Flow visualization techniques.

MECH 583 (3) BOUNDARY ELEMENT THEORY. Introduction to Boundary Element Theory for applications to fluid flows, elasticity and acoustics.

MECH 584 (3) ADVANCED ENGINEERING ACOUSTICS. Sound sources waves and propagation; reflection and transmission at fluid and solid interfaces; sound propagation outdoors, in ducts and pipes, underwater, in rooms; sound-absorbing materials; experimental and numerical methods; acoustical signal processing. Prerequisite: MECH 405.

MECH 586 (4) TURBULENT SHEAR FLOW. The basic equations of fluid motion; introduction to hydro-dynamic stability; Reynolds' equations; energy equations for turbulent motion; intermittency; similarity near a solid boundary and in free turbulence; approximate methods for predicting the growth of turbulent boundary layers and free symmetrical shear flows.

MECH 587 (3) FRACTURE CONTROL FOR DESIGN. Transition temperature, linear-elastic and elastic-plastic theory, experimental testing methods, fracture-resistant design methodology, application to mechanical and structural components.

MECH 588 (3) FATIGUE. Review of smooth-body fatigue: high-cycle; low-cycle; cumulative damage; cycle counting methods; cracked-body fatigue theory; effects of load history and stress ratio; numerical crack-growth prediction models; application to components and structures; crack detection methods.

MECH 590 (3) MANUFACTURING AUTOMATION. Review of mechanics of metal cutting. Machine tool structures, static deformations, forced and self-excited vibrations and chatter. Design principles of CNC machines; state space and transfer function models of feed drivers, dc servo motors and amplifiers. Contouring analysis in multi-axes machining. Unmanned manufacturing topics: Sensors, adaptive control and monitoring in metal-removing processes.

MECH 591 (3) PRODUCTION ENGINEERING. Basic metal removal processes. Introduction to the mechanics of the processes. Economics of

simple processes. Introduction to machine selection, flexibility and automation. Organization of manufacturing, process planning, group technology, facilities layout and production scheduling. Credit cannot be obtained for both MECH 591 and MECH 490.

MECH 592 (3) MACHINE TOOL STRUCTURES AND VIBRATIONS. Review of metal cutting mechanics, milling, static deformations of machine tools. Machine tool vibrations, forced and self excited vibrations in machining, chatter, stability. Sensors for machine tool monitoring and adaptive control. Sensor assisted intelligent machining techniques. Prerequisite: All of MECH 392, MECH 466.

MECH 593 (3) METAL REMOVAL PROCESSES. The basic mechanics of metal removal, experimental evidence and extension of force models to practical processes. Tool wear processes, tool life equations and the optimization of single and multiple pass processes. Introduction to the optimization of process plans.

MECH 594 (3) COMPUTER-INTEGRATED MANUFACTURING. Objectives and elements of Computer-Integrated manufacturing, information control, computer/device networks. Sensor and sensor fusion, layout and material handling issues. Production line design, and design for manufacturing. Flexible automation, virtual manufacturing, rapid prototyping, quality control and reliability issues and Artificial Intelligence applications.

MECH 595 (2) SYSTEMS MODELLING AND SIMULATION. Modelling of discrete and continuous systems on digital computers. Application of discrete simulation languages to the analysis and design of service and manufacturing systems. Statistical concepts in analysis and validation. Application of continuous simulation languages to the analysis and design of dynamic and control systems. Integration methods and algorithms, optimization and iterative problems.

MECH 597 (6) PROJECT FOR M.ENG. STUDIES. Project on assigned topic of specialization. For students registered in the M.Eng. program whose project is supervised by a faculty member in the department of Mechanical Engineering.

MECH 598 (2) RESEARCH SEMINAR. Current topics in mechanical engineering research for M.A.Sc. students.

MECH 599 (6-12) C THESIS. For M.A.Sc.

MECH 698 (3) SEMINAR. Current topics in mechanical engineering for doctoral students.

MECH 699 (0) THESIS. For Ph.D.

MEDG — MEDICAL GENETICS FACULTY OF MEDICINE

MEDG 410 (3) IMMUNOGENETICS.

Molecular basis of lymphocyte development, activation and adhesion; immunogenetics and the major histocompatibility complex. Consult the Credit Exclusion list within the Faculty of Science section of the Calendar. Prerequisite: MICB 302 and one of BIOL 334, BIOL 335. A

standing of “B” or better is recommended. Equivalency: MICB 402. [3-0-1]

MEDG 419 (3) HUMAN CYTOGENETICS. Human chromosome variation as it relates to genetic disease. Cytogenic diagnostic techniques, structural and numerical chromosome anomalies, genomic organization, epigenetics, and mutation. Prerequisite: All of BIOL 334, BIOL 335. A standing of ‘B’ or higher recommended. [3-0; 0-0]

MEDG 420 (3) HUMAN BIOCHEMICAL AND MOLECULAR GENETICS. Analysis of human biology using information from the sequence of the human genome. Normal and pathological human variation. Genetic basis of diversity and individuality, identification of human disease genes, and potential applications of the sequence information. Prerequisite: All of BIOL 335, BIOC 300. A standing of ‘B’ or higher is recommended. [3-0; 0-0]

MEDG 421 (3) GENETICS AND CELL BIOLOGY OF CANCER. Molecular mechanisms of oncogenes and tumor suppressors and the effects of oncogenic mutations on the biology of cancer cells. Prerequisite: BIOL 335 and one of BIOC 300, BIOC 302, BIOC 303, BIOL 350. [0-0; 3-0]

MEDG 448 (3/6) D DIRECTED STUDIES. A supervised individual program of study of a topic to be agreed upon by a member of faculty and the student. Permission of the appropriate supervisor and the department head is required.

MEDG 505 (3) GENOME ANALYSIS. Investigation of genetic information as it is organized within genomes, genetic and physical map construction, sequencing technologies, gene identification, database accessing and integration, functional organization of genomes from contemporary, historic and evolutionary perspectives. Prerequisite: All of BIOL 334, BIOL 300.

MEDG 510 (3) ADVANCED IMMUNOGENETICS. Cell-cell interaction, intracellular control mechanisms, analysis of complex physiological systems using transgenic animals and molecular approaches. Equivalency: MICB 502. [0-0; 3-0]

MEDG 515 (3) MAMMALIAN DEVELOPMENTAL GENETICS. Genetic determination of morphology and differentiation in human and other mammalian embryos. Prerequisite: BIOL 335. [3-0]

MEDG 520 (3) ADVANCED HUMAN MOLECULAR GENETICS. Genetic variation, genome analysis, cloning of genes for diseases and normal functions, mutation detection, animal models of human genetic disease. Prerequisite: BIOL 334. [3-0; 0-0]

MEDG 521 (3) MOLECULAR AND CELL BIOLOGY OF CANCER. Focuses on molecular and cell biology of cancer through a series of lectures, reviews, student presentations and discussion. Prerequisite: BIOL 334 and permission of the instructor. Equivalency: PATH 531. [0-0; 3-0]

MEDG 525 (3) MEDICAL POPULATION GENETICS. Population genetics, genetic epidemiology and methodology in data analysis applicable to the study of human genes, traits or diseases. Prerequisite: BIOL 335. [3-0]

MEDG 530 (3) HUMAN GENETICS. Human Mendelian and non-Mendelian inheritance and clinical applications of genetics. Prerequisite: BIOL 335. [3-0]

MEDG 535 (3) GENETICS AND ETHICS. This course is intended to serve the diverse needs of genetic counseling students, research graduate students in genetics, genetic residents and clinical fellows, other health professional students, and graduate students from other sciences and humanities. [0-0; 3-0]

MEDG 540 (3) SEMINAR. All seminars will be presented by graduate students in the Department of Medical Genetics. Although students will be encouraged to attend these seminars throughout their graduate studies, credit will only be available for one year. Not offered in 2005-2006. [2-0; 2-0]

MEDG 545 (3) CURRENT TOPICS IN MEDICAL GENETICS RESEARCH. Critical discussion of current primary research literature in medical genetics.

MEDG 548 (3-6) C DIRECTED STUDIES. A series of laboratory sessions, directed readings and directed counselling interviews related to selected areas of Medical Genetics. This advanced course may be taken upon approval of the department head.

MEDG 549 (12) M.Sc. THESIS.

MEDG 550 (6) CONCEPTS IN CLINICAL GENETICS FOR GENETIC COUNSELLING. Practical applications, theories and principles of medical genetics as they apply to genetic counselling. Prerequisite: Acceptance into M.Sc. Genetic Counselling program.

MEDG 560 (2) GENETIC COUNSELLING SEMINAR. Medical and genetic interviewing and family history taking; decision making; family dynamics; impact of congenital defects, genetic disease, and chronic disease on individuals and families; support groups and other community resources; computer resources; cross-cultural issues. Prerequisite: Acceptance into M.Sc. Genetic Counselling program.

MEDG 565 (2) ADVANCED GENETIC COUNSELLING SEMINAR. Patient attitudes toward genetic counselling; the grieving process in response to pregnancy loss, death and disability; risk perception, attitudes toward prenatal testing, dealing with results of genetic testing, crisis counselling, giving bad news; ethical dilemmas; legal and professional issues. Prerequisite: MEDG 560. And acceptance into M.Sc. Genetic Counselling program. [0-2; 0-2]

MEDG 570 (3) INTRODUCTORY CLINICAL AND LABORATORY ROTATION. Clinical experience in prenatal procedures and counselling; teratogen counselling. Clinically relevant experience in cytogenetics, molecular, biochemical disease and embryopathology laboratories. Prerequisite: Acceptance into M.Sc. Genetic Counselling program. [0-0; 0-5]

MEDG 575 (10) ADVANCED CLINICAL ROTATION. In-depth clinical experience in general and prenatal genetic counselling. Prerequisite: MEDG 570. And acceptance into M.Sc. Genetic Counselling program. [0-15; 0-15]

MEDG 649 (12) PH.D. THESIS.

MEDG 702 (0) CLINICAL GENETICS CLINIC. A rotation for three months through the Clinical Genetics. Clinic dealing with the techniques of diagnosis and counselling, and of the prenatal diagnoses of genetic disease and genetic counselling relative to congenital malformations and failures of reproduction.

MEDI — MEDICINE FACULTY OF MEDICINE

See also courses listed under: Anatomy, Biochemistry, Family Practice, Health Care and Epidemiology, Health Sciences, History of Medicine, Interdepartmental, Medical Genetics, Medicine, Microbiology, Obstetrics and Gynaecology, Ophthalmology, Orthopaedics, Paediatrics, Pathology, Pharmacology and Therapeutics, Physiology, Psychiatry, Radiology, Surgery

MEDI 430 (8) MEDICINE – CLINICAL CLERKSHIP. Clinical activities including examination, diagnosis, on-going management and discharge planning of patients and participation in academic half-days, consisting of seminars and patient-related discussions.

MEDI 501 (3) MOLECULAR AND CELLULAR BIOLOGY OF EXPERIMENTAL MEDICINE. Cell and molecular function in normal tissues and in specific disease processes, including, genetic, viral, bacterial, immune, and physiological disorders.

MEDI 502 (3) EXPERIMENTAL MEDICINE METHODOLOGY. Laboratory experience with experimental models of human disease; critical reviews of their relevance. Laboratory rotations, oral presentations and written reviews. Registration requires permission of the Department.

MEDI 510 (3) NEPHROLOGY. Mechanisms of regulation of acid-base balance, fluid and electrolyte content, excretion of proteins and organic substances in kidney disease; abnormal renal mechanisms in hypertension.

MEDI 530 (3) GASTROENTEROLOGY. Pathogenesis and abnormal physiology in disease of the intestine and accessory organs; carcinogenesis; regulatory peptides; liver disease; inflammatory bowel disease; oesophageal dysfunction.

MEDI 535 (3) RESEARCH SEMINAR. Reviews of research in selected areas of experimental medicine, including presentation of student's own research results.

MEDI 540 (3) ADVANCES IN NEUROLOGY. Pathogenesis and immunological mechanisms in acute and chronic virus infections of the central nervous system; immunologically induced non-infectious neurological disease.

MEDI 548 (2-6) D DIRECTED STUDIES IN EXPERIMENTAL MEDICINE.

MEDI 549 (12) M.SC. THESIS.

MEDI 560 (3) PULMONARY PATHOPHYSIOLOGY. Same as PATH 518.

MEDI 570 (3) CARDIOLOGY. Pathogenesis, abnormal physiology and therapeutic approaches in heart disease including cardiac arrhythmia, heart failure, myocardial infarction, hypertension, atherosclerosis.

MEDI 580 (3/6) C EXPERIMENTAL MEDICINE: INFECTIOUS DISEASES. Supervised individual program of directed studies in experimental aspects of pathogenesis, diagnosis and treatment of infectious diseases, and mechanisms of host defence against microbial infections.

MEDI 590 (3) MOLECULAR REGULATION OF CELL GROWTH AND DIFFERENTIATION. Cytokines and signal transduction mechanisms in the growth and differentiation of germ line, haemopoietic and other eukaryotic cells; actions of oncogene and tumor-suppressor gene products; molecular concepts derived from experimental model systems; molecular strategies of cytokine therapy. Prerequisite: One of MICB 302, BIOC 402, BIOC 403. Permission of course coordinator is also acceptable.

MEDI 649 (0) PH.D. THESIS.

MICB — MICROBIOLOGY FACULTY OF SCIENCE

BIOL 112 or MICB 201 is a prerequisite for all MICB courses except MICB 153 and MICB 353. Consult the Credit Exclusion List in the Faculty of Science section of the Calendar. Additional fees are charged for some courses.

MICB 153 (3) APPLIED MICROBIOLOGY. Principles in the study of microorganisms and their relation to human health. Epidemiology of disease and the measures to prevent the transmission of pathogenic organisms. Open only to students in the School of Nursing. [3-0-0]

MICB 201 (3) INTRODUCTORY MICROBIOLOGY. Fundamental properties of prokaryotes: structure, metabolic diversity, environmental relationships, growth, genetics and applications. Prerequisite: One of BIOL 120, BIOL 121. [3-0-1]

MICB 202 (3) INTRODUCTORY MEDICAL MICROBIOLOGY AND IMMUNOLOGY. Introduction to cellular and humoral immune responses, the properties of viruses and the principles of bacterial pathogenesis. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar.) Prerequisite: One of BIOL 112, MICB 201, SCIE 001. BIOL 200 is also recommended. [3-0-1]

MICB 203 (1) BASIC MICROBIOLOGICAL TECHNIQUES. Procedures and principles associated with isolation, characterization and handling of microorganisms. Intended for students requiring a basic microbiology laboratory course. Prerequisite: One of MICB 153, BIOL 112, SCIE 001. [0-3-1]

MICB 300 (3) MICROBIAL ECOLOGY. Effects of microbial and metabolic activities in nature. Interactions of microbes with microbes, plants

and animals. Metabolic basis for applied uses of environmental bacteria. Prerequisite: BIOL 201 and one of BIOL 112, MICB 201, SCIE 001. [3-0-1]

MICB 302 (3) IMMUNOLOGY. Tissues, cells and molecules of immune system, innate immunity and complement, adaptive immunity, cellular and humoral immune responses, cytokines, T-cell activation, the major histocompatibility complex, antibody structure and genetics, immune system and cancer, AIDS, autoimmunity, hypersensitivity. Prerequisite: MICB 202 and third-year standing. [3-0-1]

MICB 306 (3) MOLECULAR VIROLOGY. Introduction to virus structure and replication. Detailed examination of selected viruses including polio, HIV and cancer-causing retroviruses. Development of vaccines and antiviral drugs, the use of virus vectors to cure genetic diseases. Prerequisite: MICB 202. [3-0-1]

MICB 318 (3) BIOLOGICAL PROCESS ENGINEERING. Design and modeling of single and multi-species bioreactors, industrial fermentation and product recovery systems. (Consult the Credit Exclusion List within the Faculty of Science section of the Calendar.) Prerequisite: Either (a) SCIE 001 or (b) BIOL 112 and one of MATH 100, MATH 102, MATH 104, MATH 180, MATH 184. Third- or fourth-year standing. [3-0-2]

MICB 322 (3) MICROBIOLOGICAL TECHNIQUES. Aseptic handling and characterization of microbes, growth properties, enzyme assays, protein analysis and plasmid isolation. Restricted to students in Microbiology and Immunology programs. Prerequisite: All of BIOL 200, BIOL 201, MICB 202 and one of BIOL 112, MICB 201, SCIE 001 and two of CHEM 203, CHEM 204, CHEM 233, CHEM 235. [0-4-2]

MICB 323 (3) ADVANCED MICROBIOLOGICAL TECHNIQUES. Genetic manipulations of bacteria, introductory immunological and virological procedures, tissue culture. Restricted to Majors and Honours students in Microbiology. Prerequisite: MICB 322. [0-4-2]

MICB 324 (3) THE MOLECULAR BASIS OF BACTERIAL GROWTH REGULATION. Response of bacterial cell to changing environments. Role of the cell envelope in energetics, transport and peptidoglycan synthesis. Regulation of gene expression. Biochemistry and physiology of bacterial growth. Prerequisite: One of BIOL 112, MICB 201, SCIE 001. Corequisite: One of BIOC 302, BIOC 300, BIOC 303. [3-0-1]

MICB 353 (1) FOOD MICROBIOLOGY. Procedures and principles associated with isolation, enumeration, characterization and handling of microorganisms. Restricted to students registered in the Food Science program. Prerequisite: One of BIOL 112, MICB 201. [0-2-1]

MICB 398 (3) CO-OPERATIVE WORK PLACEMENT I. Work experience in an industrial research setting, taken during the

Winter Session (Term 2) of third year. Restricted to students admitted to the Co-operative Education Program of Biotechnology in Microbiology and Immunology. Prerequisite: MICB 202.

MICB 399 (3) CO-OPERATIVE WORK PLACEMENT II. Work experience in an industrial research setting, taken during Summer Session (Terms 1 and 2) following third year. Restricted to students admitted to the Co-operative Education Program of Biotechnology in Microbiology and Immunology. Prerequisite: MICB 202.

MICB 401 (3) ENVIRONMENTAL MICROBIOLOGY TECHNIQUES. Microbiological analysis using culture, microscopic, gene characterization, chemical and immunological techniques. Prerequisite: All of BIOL 201, MICB 300, MICB 322. [2-4-0]

MICB 402 (3) ADVANCED IMMUNOLOGY. Molecular basis of lymphocyte development, activation and adhesion; immunogenetics and the major histocompatibility complex. Consult the credit exclusion list within the Faculty of Science section of the calendar. Prerequisite: MICB 302 and one of BIOL 334, BIOL 335. Standing of "B" or better is recommended. [3-0-1]

MICB 403 (3) MOLECULAR BACTERIAL PATHOGENESIS. Molecular studies of bacterial pathogens. Topics include bacterial virulence factors, host defences against pathogens and vaccines, and diagnostics and antibiotics as control measures. Prerequisite: MICB 202. [3-0-0]

MICB 404 (3) TOPICS IN MOLECULAR BACTERIAL PATHOGENESIS. A lecture/discussion/library research course. Topics such as antibiotic resistance, pathogen genomics; host-pathogen interactions; evolution of pathogens; host responses to infection, invasive mechanisms, resistance mechanisms. Prerequisite: All of MICB 302, MICB 403. [1-0-4]

MICB 405 (3) BIOINFORMATICS. Computational methods to analyze genome and protein sequences to derive structural and functional information. Related topics in functional genomics. Prerequisite: One of MICB 324, BIOC 300, BIOC 302, BIOC 303, BIOL 335. [3-0-1]

MICB 406 (3) TOPICS IN MOLECULAR VIROLOGY. Presentations, library research, paper reviews, class discussions about current research in virology. Topics such as molecular targets in viral therapy; chronic viral infection; virus-host cell interaction. Prerequisite: All of MICB 202, MICB 306. [1-0-4]

MICB 407 (3) VIRAL INFECTIONS IN HUMANS. Interactions between viruses and humans; pathogenesis; persistence and viral oncogenesis; virological diagnosis and treatment. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar.) Prerequisite: MICB 306. [3-0-0]

MICB 409 (3) MICROBIAL GENETICS. Plasmids, phage and cloning vectors, gene transfer, genetic maps, genetic analysis of

microbial gene expression. Prerequisite: BIOL 335. [3-0-0]

MICB 410 (3) MICROBIAL METABOLISM. Bacterial metabolism of environmental relevance such as anaerobic metabolisms, xenobiotics degradation, co-metabolisms, secondary metabolisms, and transformation of minerals and halo-organics. Applications and theoretical basis of particular capabilities. Prerequisite: BIOL 201 and one of BIOL 112, MICB 201, SCIE 001 and two of CHEM 203, CHEM 204, CHEM 233, CHEM 235. [3-0-0]

MICB 412 (3) TOPICS IN IMMUNOLOGICAL RESEARCH. Presentations, library research, paper reviews and class discussion on selected areas of advanced molecular and cellular immunological research. Prerequisite: MICB 302 and one of MICB 402, MEDG 410. [1-0-4]

MICB 418 (3) INDUSTRIAL MICROBIOLOGY AND BIOTECHNOLOGY. Exploitation of microbial and animal cells for the industrial production of chemicals ranging from alcohol to therapeutic proteins. Genetic manipulation of cellular characteristics, fermentation methods, patenting and governmental approval processes. Corequisite: BIOL 335. [3-0-0]

MICB 419 (3) INDUSTRIAL BIOTECHNOLOGY LABORATORY. Modern bioreactor technology, upstream and downstream processing of biotechnology products. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar.) Prerequisite: MICB 318. [1-4-0]

MICB 421 (3) EXPERIMENTAL MICROBIOLOGY. Research in microbial physiology and molecular genetics. Guided and independent laboratory projects are developed. Prerequisite: MICB 323. [2-4-0]

MICB 430 (3/6) C SEMINAR IN MICROBIOLOGICAL LITERATURE. Student seminars on selected papers from the microbiological literature. Compulsory for Honours students. Major students may enroll with permission of the department head.

MICB 447 (3) EXPERIMENTAL RESEARCH. A laboratory course with a choice of independent, supervised research projects. Students develop protocols to carry out investigation of selected molecular biology problems.

MICB 448 (3/6) C DIRECTED RESEARCH. A library (3 credits) or laboratory (6 credits) project. Requires permission of the Undergraduate Advisor. The results are presented in a written report to be reviewed by oral examination. Prerequisite: MICB 323.

MICB 449 (6) RESEARCH PROBLEM. A laboratory investigation in the final year of the Honours program. The results are presented in a written report, to be reviewed by oral examination. Prerequisite: MICB 323.

MICB 498 (3) CO-OPERATIVE WORK PLACEMENT III. Work experience in an industrial research setting, taken during the Summer Session (Terms 1 and 2) following fourth year. Restricted to students admitted to the Co-operative Education Program of Biotechnology in Microbiology and Immunol-

ogy. Prerequisite: One of MICB 398, MICB 399.

MICB 499 (3) CO-OPERATIVE WORK PLACEMENT IV. Work experience in an industrial research setting, taken during the Winter Session (Term 1) of fifth year. Restricted to students admitted to the Co-operative Education Program of Biotechnology in Microbiology and Immunology. Prerequisite: One of MICB 399, MICB 498.

MICB 502 (3) ADVANCED IMMUNOGENETICS. Consult the Credit Exclusion List in the Faculty of Science section of the Calendar.

MICB 503 (3) BACTERIAL CYTOLOGY AND GENETICS.

MICB 505 (3) MOLECULAR MICROBIOLOGY.

MICB 506 (2-6) D MICROBIOLOGICAL RESEARCH PROCEDURES. Normally taken in conjunction with MICB 530. To be taken only with permission of the department head.

MICB 507 (3) TOPICS IN MOLECULAR PATHOGENESIS AND IMMUNOLOGY.

MICB 508 (3) MOLECULAR GENETICS OF PLANT-MICROBE INTERACTIONS. Consult the Credit Exclusion List in the Faculty of Science section of the Calendar.

MICB 530 (3) SEMINAR IN MICROBIOLOGY.

MICB 548 (6) DIRECTED STUDIES ON AN APPROVED PROBLEM.

MICB 549 (12) MASTER'S THESIS.

MICB 649 (0) PH.D. THESIS.

MIDW — MIDWIFERY FACULTY OF MEDICINE

MIDW 200 (3) BIRTH AND ITS MEANING. Social, cultural, psychological aspects of pregnancy and childbirth.

MIDW 205 (12) MIDWIFERY CARE I. Normal pregnancy, labour, birth and puerperium with an emphasis on prenatal and postnatal midwifery care.

MIDW 210 (3) CRITICAL APPRAISAL FOR MIDWIFERY.

MIDW 215 (1) ETHICS IN HEALTH CARE.

MIDW 300 (15) MIDWIFERY CARE II. Normal pregnancy, labour, birth, and puerperium with an emphasis on the intrapartum period.

MIDW 305 (12) PHYSICIAN/COMMUNITY PLACEMENT.

MIDW 310 (3) PROFESSIONAL ISSUES IN MIDWIFERY. [0-0-3]

MIDW 315 (15) MIDWIFERY CARE III. Pregnancy, birth and puerperium with an emphasis on the recognition and management of variations of normal and findings outside of normal.

MIDW 400 (15) MIDWIFERY CARE IV. Abnormal situations in pregnancy and birth and in newborns.

MIDW 405 (12) CLINICAL CLERKSHIP.

MIDW 410 (3) GRADUATING ESSAY.

**MINE — MINING ENGINEERING
FACULTY OF APPLIED SCIENCE**

MINE 290 (3) INTRODUCTION TO MINING AND MINERAL PROCESSING. The nature and scope of mining and mineral processing. The course will include one afternoon field trip. Equivalency: MMPE 290. [3-0-2]

MINE 293 (1) SEMINAR. Oral presentation of topics by students. Graded on basis of report and presentation. Equivalency: MMPE 293. [0-0-1; 0-0-1]

MINE 295 (3) MINERAL DEPOSIT MODELING. Types of mineral deposits. Exploration and sampling methods. Methods for data analysis and computer modeling of mineral deposits and their use in production planning and design. Prerequisite: CPSC 152. Corequisite: preferred corequisite STAT 251 Equivalency: MMPE 295. [2-1-1]

MINE 302 (3) UNDERGROUND MINING AND DESIGN. Selection, design and development of underground mining methods based upon physical, geological, economical and environmental constraints. Underground materials handling (ore, waste, slurry, water) with equipment selection, production requirements, performance and costs. Prerequisite: One of MMPE 290, MINE 290. Equivalency: MMPE 302. [3-2*-0]

MINE 303 (3) ROCK MECHANICS FUNDAMENTALS. The study of the mechanical and structural properties of rock materials at the laboratory and field level. The relevance of such studies to common mining, geological and civil engineering problems. Credit given for only one of MMPE/MINE 303 or MMPE/MINE 305. Prerequisite: One of CIVL 230, MECH 260. MMPE/MINE 290 is recommended. Equivalency: MMPE 302. [2-2-0]

MINE 304 (3) DRILLING AND BLASTING. Theory and practice of rock fragmentation by drilling and blasting; introduction to explosives and detonators; design of surface and underground blasts for mining and the construction industry. Equivalency: MMPE 304. [3-0-0]

MINE 305 (4) GEOMECHANIC FUNDAMENTALS. The study of the mechanical and structural properties of rock materials at the laboratory and field level. The relevance of such studies to common mining problems, geological and civil engineering problems. Laboratory will include a) rock material testing; b) descriptive structural geology. Credit given for only one of MMPE/MINE 303 or MMPE/MINE 305. Prerequisite: MECH 260. MMPE/MINE 290 is recommended. Equivalency: MMPE 305. [2-4-0]

MINE 331 (3) PHYSICAL MINERAL PROCESSES. Mineral processing unit operations and sampling, crushing, grinding, screening, classification, gravity separation, magnetic separation, electrostatic separation, concentrate dewatering practices. Prerequisite: MINE 290. Equivalency: MMPE 331. [2-3-0]

MINE 333 (3) FLOTATION. Theory and technology of flotation and ancillary processes. Equivalency: MMPE 333. [2-3-0]

MINE 338 (3) PROCESS MINERALOGY. Mineralogy to troubleshoot processing circuits; degree of liberation; coal macerals; selective chemical extraction; heavy liquid separation; instrumental analysis; optical microscopy; mineralogy applied to ore extraction and beneficiation, extractive metallurgy, industrial minerals and advanced materials; environmental mineralogy; tailing characterization. Equivalency: MMPE 338. [2-2-0]

MINE 391 (3) MINING AND THE ENVIRONMENT. Environmental topics of importance to engineers practicing within the mining, metallurgical and related industries including technical practices, regulatory and public issues. [3-0-0]

MINE 393 (1) SEMINAR. Oral presentation of topics by students. Prerequisite: Third-year standing in Mining and Mineral Process Engineering. [0-0-1; 0-0-1]

MINE 396 (3) ENGINEERING ECONOMICS. Accounting principles, time value of money principles, depreciation and taxes, economic analysis of projects, sensitivity and risk analysis, financing and cost of capital; optimization of product processes. Prerequisite: Second-year standing in Engineering. Equivalency: MMPE 396. [3-0-0]

MINE 402 (3) MINE VENTILATION. Design and analysis for ventilation systems for mining. Topics such as ventilation design, ventilation surveys, thermodynamic aspects, psychrometry of air and air conditioning. Prerequisite: One of MMPE 290, MINE 290. Equivalency: MMPE 402. [3-2*-0]

MINE 403 (3) ROCK MECHANICS DESIGN. The design of rock slopes and underground openings with respect to stress, structure and the rock mass. Stabilization and monitoring of rock movement. Prerequisite: One of MINE 303, MINE 305. Equivalency: MMPE 403. [3-0-0]

MINE 404 (3) MINE MANAGEMENT. Human relations in an organization; types of organizations; personnel evaluations and job rating systems; impact of manpower planning on decision-making; union negotiations; public relations; dealing with the media; corporate responsibilities to society and employees. Prerequisite: Fourth-year standing in Mining and Mineral Process Engineering. Equivalency: MMPE 404. [3-0-0]

MINE 410 (3) SURFACE MINING AND DESIGN. Surface mining methods, production planning and scheduling; slope design and drainage; wall control; materials handling and equipment selection; production control and automation, waste disposal and closure. Equivalency: MMPE 410. [3-0-0]

MINE 432 (3) INDUSTRIAL AUTOMATION AND ROBOTICS. Automatic control theory, PID control, Laplace and z-transforms, loop tuning, frequency response, stability analysis, control strategies in flotation, comminution, dewatering, reagent and bin/sump levels,

automated load-haul-dump and drilling equipment, telerobotics in mining operations, instrumentation and soft sensors. Equivalency: MMPE 432. [3-2-0]

MINE 433 (3) SURFACE PROPERTIES. Basic characteristics of interfaces. Electrical effects at solid/liquid interfaces. Surfactants, adsorption and its effect on wettability. Utilization of surface properties in mineral engineering: flotation, selective flocculation and selective coagulation, oil agglomeration. Prerequisite: CHEM 262. Equivalency: MMPE 433. [2-3-0]

MINE 434 (3) PROCESSING PRECIOUS METAL ORES. Process alternatives and mineralogical considerations; physical and chemical recovery technologies; environmental protection; flowsheet studies. Prerequisite: One of MMPE 331, MINE 331. Equivalency: MMPE 434. [2-2-0]

MINE 435 (3) PLANT AND PROCESS DESIGN. Design of unit operations in a mineral processing plant including crushing, grinding, classification, gravity separation, magnetic separation, flotation, thickening and filtration. Equipment selection and sizing, flowsheet design, circuit analysis and processing options. Prerequisite: One of MMPE 331, MINE 331. Equivalency: MMPE 435. [2-3-0]

MINE 462 (3) COAL PREPARATION TECHNOLOGY. Thermal and metallurgical coals: objectives of their cleaning; coal washability and flotability fundamentals; coal preparation unit operations; performance characteristics of coal washing equipment; products dewatering; plant flowsheets. Prerequisite: One of MMPE 290, MINE 290 and one of MMPE 331, MINE 331. Equivalency: MMPE 462. [2-3-0]

MINE 480 (2) MINE WASTE MANAGEMENT. Basic geotechnical, hydrological and water management aspects of mine waste management. Equivalency: MMPE 480. [2-0-0]

MINE 482 (3) MAINTENANCE ENGINEERING. Analytical foundation for maintenance of industrial plant equipment and mobile equipment in various production environments; maintenance planning and management, life cycle analysis, reliability theory, total quality maintenance, condition monitoring. Equivalency: MMPE 482. [3-0-0]

MINE 491 (4) MINE AND PLANT FEASIBILITY STUDY. Design of a mining operation or a mineral processing plant as part of a realistic feasibility study project. Prerequisite: One of MMPE 396, MINE 396. Fourth-year standing in Mining and Mineral Process Engineering is required. Equivalency: MMPE 491. [1-3-3]

MINE 493 (1) SEMINAR. Oral presentation of a technical nature. Use of closed circuit television for personal evaluation. Prerequisite: Fourth-year standing in Mining and Mineral Process Engineering. Equivalency: MMPE 493. [0-0-1; 0-0-1]

MINE 495 (3) SYSTEMS ANALYSIS. Optimization and operations research techniques used in mining and mineral processing including effects of multiple factors in a process. Case

studies are used to demonstrate the techniques. Equivalency: MMPE 495. [3-0-1]

MINE 496 (3) ADVANCED COMPUTER APPLICATION IN THE MINING INDUSTRY. Use of computers to solve complex problems. Topics: artificial intelligence, expert systems, fuzzy logic, neural networks, genetic algorithms, hypertext and intelligent user interfaces. Simulation models in mining and processing. Registrants will build a system using one of the software packages. Equivalency: MMPE 496. [3-0-0]

MINE 497 (1-3) D DIRECTED STUDIES. Requires approval of the department head. Equivalency: MMPE 497.

MINE 550 (2) MINING METHODS. A more advanced study of some aspects of mining methods. Equivalency: MMPE 550.

MINE 551 (3) APPLIED UNDERGROUND ROCK MECHANICS. Study of design methods; underground engineering of openings, pillars and support. Emphasis on design with input being stress, structure and rock mass, employing analytical, empirical and numerical tools. Equivalency: MMPE 551.

MINE 552 (3) MINING GEOSTATISTICS. Basic geostatistical concepts. Applications of geostatistical techniques and stochastic simulation to orebody modelling and grade control. Equivalency: MMPE 552.

MINE 553 (2-4) D MANAGEMENT IN SCIENCE METHODS IN ENGINEERING. Use of mathematical programming, network theory, queuing models and simulation to analyze and improve engineering designs and industrial operations. Model formulation and relevance of the analysis to corporate strategy are emphasized. Equivalency: MMPE 553.

MINE 554 (3) MINE ECONOMICS AND FINANCE. Mine valuation using discounted cash flow analysis and option pricing methods. Sources of mine finance and requirements. Sensitivity and risk assessment. Introduction to metals marketing, hedging and risk management. Equivalency: MMPE 554.

MINE 556 (2) ROCK SLOPE ENGINEERING. Geologic investigations and field and laboratory testing; detailed review of the mechanisms of rock slope instability; the influence of geology, ground water and blasting on rock slope stability; design of stable rock slopes; monitoring of rock slope behaviour; stabilization or rock slope failures. Equivalency: MMPE 556.

MINE 557 (3) INTEGRATED MINING AND PROCESSING SYSTEMS. Methods and systems for integrated mining and processing, conceptual model development, simulation, economic and technical evaluation. Equivalency: MMPE 557.

MINE 560 (2) MINE VENTILATION. Mine air conditioning, ventilation network analysis, radioactivity in mining, case studies in mine ventilation and control of dust, fumes and diesel exhausts. Equivalency: MMPE 560.

MINE 561 (2) MINE SHAFTS AND HOISTING. Shaft layout, guide and bunton selection. Hoist rope properties and characteristics. Drum, reel and friction hoisting. Loading and dump arrangements. Headframe layout. Incline hoisting. Signaling and safety devices. Shaft inspection and maintenance. Sinking hoists and stages. Equivalency: MMPE 561.

MINE 562 (2) EQUIPMENT SELECTION. Methods of selecting equipment for underground and surface mining. Case studies and applications. Equivalency: MMPE 562.

MINE 565 (2) ROCK FRAGMENTATION. Theory and practice of drilling and blasting; explosive types and strengths. Blast pattern design for underground and surface operations. Equivalency: MMPE 565.

MINE 566 (3) ADVANCED COAL PREPARATION. Thermal and metallurgical coals. Desulphurization Theory of coal beneficiation. Dense media separation. Coal surface properties and their effect on fine coal processing by flotation and oil agglomeration; coal/water/slurries. Plant performance testing and instrumentation. Equivalency: MMPE 566.

MINE 572 (2/4) D PROCESSING OF MINERAL FINES. Particulate systems. Role of particle size and interfacial phenomena in properties of disperse systems. Stability of colloids and suspensions DLVO (Dejaguin-Landau-Vervey-Overbeek). Equivalency: MMPE 572.

MINE 573 (2) TREATMENT OF MINERAL INDUSTRY EFFLUENTS. Characteristics of mineral dispersions in gases and in water; dust suppression in mining and in mineral transport facilities; solid-liquid separations; removal of noxious chemicals; waste disposal systems. Prerequisite: Permission of instructor is required. Equivalency: MMPE 573.

MINE 574 (3) MINING ENVIRONMENT CASE STUDIES. Regulatory requirements for mine-mill environmental protection in design, operation and closure. Studies of environmental impact statements and closure plans. Equivalency: MMPE 574.

MINE 575 (3) MATHEMATICAL MODELLING OF MINERAL PROCESSES. Emphasis on crushing, grinding, screening, classification and flotation. Equivalency: MMPE 575.

MINE 576 (3) SIMULATION AND OPTIMIZATION OF MINERAL PROCESSES. Mineral process simulators including off-line optimization strategies; optimal flow sheet design. Prerequisite: One of MMPE 575, MINE 575. Equivalency: MMPE 576.

MINE 577 (3) PROCESSING OF PRECIOUS METAL ORES. Advances in science and technology for recovering gold, silver and platinum group elements Equivalency: MMPE 577.

MINE 578 (3) INDUSTRIAL EXPERT SYSTEMS. The use of artificial intelligence to solve complex problems in industry. Topics include knowledge acquisition, knowledge representation, knowledge accumulation, and conflict resolution. Equivalency: MMPE 578.

MINE 579 (3) RHEOLOGY OF MINERAL SUSPENSIONS. Rheological measurements, flowcurve modelling, micro-rheology, control of rheological properties. Application to mineral processing unit operations. Equivalency: MMPE 579.

MINE 580 (3) ACID ROCK DRAINAGE. Lectures and seminars on topics of importance in acid rock drainage including fundamentals of ARD generation, prediction, prevention, control, treatment and monitoring for waste management and regulatory control in the mining industry. Equivalency: MMPE 580.

MINE 581 (3) ENVIRONMENTAL TECHNOLOGIES AND ISSUES IN MINING. Advanced topics related to mining environment selected in consultation with the instructor. Equivalency: MMPE 581.

MINE 582 (3) MAINTENANCE ENGINEERING. The analytical foundation for maintenance of industrial plant equipment and mobile equipment in various production environments. Reliability theory, sensing technology and theory, Risk Analysis, and operations research applied to maintenance management. Equivalency: MMPE 582.

MINE 583 (3) MINING AND SOCIETY. Discussion of social, political and technical topics concerning mining-related activities. Equivalency: MMPE 583.

MINE 584 (3) ENERGY FROM THE EARTH: RENEWABLE VERSUS CONVENTIONAL. Coal, oil, gas, uranium, hydro, wind, geothermal and geosolar.

MINE 590 (2-6) C SPECIAL ADVANCED TOPICS. A special advanced course may be arranged upon the approval of the department head. Prerequisite: Permission of instructor is required. Equivalency: MMPE 590.

MINE 597 (6) ENGINEERING PROJECT. A project involving laboratory, pilot plant or field work is to be completed in close collaboration with an academic adviser. For M.Eng. students only. Equivalency: MMPE 597.

MINE 598 (2) SEMINAR. Topics in mining, mineral processing and the environment for M.A.Sc. and M.Eng. students. Equivalency: MMPE 598.

MINE 599 (6-12) C M.A.SC. THESIS. Equivalency: MMPE 599.

MINE 698 (2) SEMINAR. Topics in mining and mineral processing for Ph.D. students. Equivalency: MMPE 698.

MINE 699 (0) PH.D. THESIS. Equivalency: MMPE 699.

MRNE — MARINE SCIENCE FACULTY OF SCIENCE

MRNE 400 (3/6) D DIRECTED STUDIES. A research project approved by the supervisor in the field of interest of the student designed to take advantage of the opportunities offered by the Bamfield Marine Sciences Centre. Note: the supervisor may be teaching at the Marine Centre; or a member of faculty of WCUMSS whether at the Marine Centre as a research

investigator or as one of the members of WCUMSS.

MRNE 401 (6) SPECIAL TOPICS IN MARINE BIOLOGY. This course will be offered, as opportunities arise, by distinguished scientists visiting at the Bamfield Marine Sciences Centre. It is expected that the course will generally be of a specialized nature and be at a level appropriate to graduate or senior undergraduate students.

MRNE 402 (3) SPECIAL TOPICS IN MARINE BIOLOGY. This course will be offered, as opportunities arise, by distinguished scientists visiting at the Bamfield Marine Sciences Centre who are prepared to offer a course extending over a 3-week period. This course will be of a specialized nature and at a level appropriate to graduate or senior undergraduate students.

MRNE 410 (6) MARINE INVERTEBRATE ZOOLOGY. A survey of the marine phyla, with emphasis on the benthic fauna in the vicinity of the Marine Station. The course includes lectures, laboratory periods, field collection, identification and observation. Emphasis is placed on the study of living specimens in the laboratory and in the field.

MRNE 411 (6) COMPARATIVE INVERTEBRATE EMBRYOLOGY. A comprehensive study of development of marine invertebrates available at the Bamfield Marine Sciences Centre, including all major phyla and most of the minor phyla. Prerequisite: course in invertebrates or embryology.

MRNE 412 (6) BIOLOGY OF FISHES. Classification, physiology, ecology, behaviour and zoogeography of fishes with particular emphasis on those in the marine environment of the British Columbia coast. Prerequisite: A course in comparative vertebrate anatomy.

MRNE 413 (6) BIOLOGY OF MARINE MOLLUSCS. Advanced course of selected topics emphasizing functional morphology, ecology and evolution. Field trips survey representative molluscs of the Bamfield region. Students are expected to complete an independent field or laboratory study of selected molluscs. Prerequisite: MRNE 410.

MRNE 415 (3) STRUCTURE AND FUNCTION IN MARINE ANIMALS. Principles of classification, evolution, morphology, biomechanics, physiology and biochemistry will be illustrated in representatives from a variety of animal phyla. Prerequisite: Completion of second year in a biology program. [3-3-0]

MRNE 420 (6) MARINE PHYCOLOGY. A survey of the marine algae, with emphasis on the benthic forms in the vicinity of the Marine Centre. The course includes lectures, laboratory periods, field collection, identification and observation. Emphasis is placed on the study of living specimens in the laboratory and in the field.

MRNE 425 (3) ECOLOGICAL ADAPTATIONS OF SEAWEEDS. Morphological, physiological, genetic and reproductive adaptations of seaweeds to their environments. Prerequisite: Completion of second year in a biology program. [3-3-0]

MRNE 430 (6) MARINE ECOLOGY. An analytical approach to biotic associations in the marine environment. Opportunities are provided for study of the intertidal realm in exposed and protected areas, and of beaches and estuaries in the vicinity of the Marine Centre; plankton studies and investigations of the subtidal and benthic environments by diving and dredging are envisaged.

MRNE 435 (6) INTRODUCTION TO BIOLOGICAL OCEANOGRAPHY. An introduction to the biology of oceans, with supporting coverage of relevant physics and chemistry. Emphasis will be placed on plankton biology, community structure and life histories, and influencing environmental factors. Collections will be made from sheltered inlets, through Barkely Sound to offshore waters. The course will involve both field and laboratory. Prerequisite: All of BIOL 320, BIOL 205.

MRNE 437 (3) POPULATION AND COMMUNITY ECOLOGY OF MARINE ORGANISMS. Emphasis on interactions among organisms and between organisms and their physiochemical environment, and on biological diversity. Prerequisite: Completion of second year in a biology program. [3-3-0]

MRNE 440 (6) BIOLOGY OF MARINE BIRDS. Study of interrelationship of birds and the marine environment. Census techniques and observation of birds in the field will be emphasized. Prerequisite: Completion of a course in vertebrate zoology or permission of the instructor.

MRNE 445 (6) BIOLOGY OF MARINE MAMMALS. Survey course covering systematics and distribution of marine mammals, their sensory capabilities and physiology, with special emphasis on the Cetacea. The course will involve an independent field study. Prerequisite: Introductory vertebrate zoology.

MRNE 450 (3) PRINCIPLES OF AQUACULTURE. An interdisciplinary introduction to the principles underlying the commercial cultivation of aquatic plants and animals emphasizing marine systems. The course will include working site visits to a range of commercial farms and research and development facilities.

MRNE 454 (3) SPECIAL TOPICS IN AQUACULTURE. An examination of the culture techniques for selected groups of aquatic plants, animals or micro organisms. Participants will be expected to complete a project which examines some aspect of applied science relevant to commercial culture.

MRNE 460 (3) SPECIAL TOPICS IN AQUACULTURAL APPLIED SCIENCE. An examination of the principles underlying the application of selected areas of scientific information to commercial aquaculture. Participants will be expected to complete a written project.

MRNE 470 (3) DIRECTED RESEARCH IN AQUACULTURE. Design and execution of a research project in the field of aquaculture under the supervision of a scientist working at

the Bamfield Centre. A written report is a requirement.

MRNE 480 (3) SEMINARS AND PAPERS IN MARINE SCIENCE. Instruction in the critical analysis of published research papers and of oral seminars. Prerequisite: Completion of second year in a biology program. [2-2-0]

MRNE 500 (6) DIRECTED STUDIES. Research project approved by the supervisor in the field of interest of the student designed to take maximum advantage of the laboratory and/or field opportunities offered by the Bamfield Marine Sciences Centre.

MRNE 501 (6) SPECIAL TOPICS. 6 weeks. Offered, as opportunities arise, by distinguished scientists who are visiting at the Bamfield Marine Sciences Centre. The course will be of a specialized nature.

MRNE 502 (3) SPECIAL TOPICS. 3 weeks. Offered, as opportunities arise, by distinguished scientists who are visiting at the Bamfield Marine Sciences Centre. The course will be of a specialized nature.

MTRL — MATERIALS ENGINEERING FACULTY OF APPLIED SCIENCE

MTRL 250 (4) METALLURGICAL THERMODYNAMICS I. Thermodynamic and electrochemical principles applied to metallurgical processes; phase rule, heat of reaction, free energy, activity, thermodynamic equilibrium; thermodynamics of aqueous solutions. Equivalency: MMAT 250. [3-0-2]

MTRL 252 (4) PYROMETALLURGY I. Process flow sheets for ferrous and non-ferrous metal extraction; mass and energy conservation; roasting and smelting; refractory properties. Equivalency: MMAT 252. [2-3*-2]

MTRL 263 (4) TRANSPORT PHENOMENA I. Fluid Mechanics; laminar and turbulent flow; boundary layers; flow in conduits and fluidized beds; flow measurements. Heat transfer; conduction through solids. Equivalency: MMAT 263. [3-0-2]

MTRL 280 (3) MATERIALS IN DESIGN. The process of materials selection for different design criteria; the importance of shape and processing variables; the use of computer software in the selection process. Equivalency: MMAT 280. [2-0-3]

MTRL 329 (3) MATERIALS FOR MECHANICAL DESIGN. Selection of material properties and processing techniques for mechanical design. Properties of steel and other alloys. Heat treatment. Ceramics, composites, plastics. Credit only given for one of MTRL 329 or MTRL 380. Prerequisite: All of MECH 220, MECH 221, MECH 222, MECH 223. [3-0-2*]

MTRL 350 (4) METALLURGICAL THERMODYNAMICS II. The application of thermodynamics to metallurgical processes: thermochemistry of gas mixtures, solution thermochemistry, inter-action parameters, chemical potential and free energy diagrams applied to metallurgical processes and thermodynamic modelling. Prerequisite: One of

MMAT 250, MTRL 250. Equivalency: MTRL 350. [3-0-2]

MTRL 358 (3) HYDROMETALLURGY I.

Aqueous extraction of metals from ores and concentrates. Equivalency: MTRL 358. [3-0-0]

MTRL 359 (1) HYDROMETALLURGY I

LABORATORY. Laboratory exercises on aqueous extraction of metals from ores and concentrates. Corequisite: One of MMAT 358, MTRL 358. Equivalency: MMAT 359. [0-3*-0]

MTRL 361 (4) MODELLING OF MATERIALS

PROCESSES. Mathematical and physical modelling of processes employed in the production of materials. The application of models to analyse, design and improve materials production. Equivalency: MMAT 361. [3-0-2]

MTRL 363 (3) TRANSPORT PHENOMENA II.

Diffusion and mass transfer with chemical reaction; gas-liquid, gas-solid and liquid-liquid systems; analysis of mass transfer processes in metallurgical operations; mixing in continuous and batch processes. Prerequisite: One of MMAT 263, MTRL 263. Equivalency: MMAT 363. [2-0-2]

MTRL 365 (3) MECHANICAL BEHAVIOUR OF

MATERIALS. Polycrystalline and single crystal deformation; dislocation theory; strengthening mechanisms; fracture mechanics; fatigue; high temperature deformation mechanisms. Prerequisite: APSC 278. Equivalency: MMAT 365. [3-0-0]

MTRL 378 (3) PHASE TRANSFORMATIONS.

Solidification and solid state transformations; nucleation and growth processes; segregation and structure in castings; phase changes in steel; transformation diagrams; diffusion equations. Equivalency: MMAT 378. [3-0-2*]

MTRL 380 (3) STRUCTURE AND PROPERTIES

OF MATERIALS. Strengthening mechanisms; heat treatment and properties of steel and other alloys; metal failures. Prerequisite: APSC 278. Equivalency: MMAT 380. [3-0-0]

MTRL 381 (1) STRUCTURE AND PROPERTIES

LABORATORY. Structure and properties of ferrous and non-ferrous metals; heat treatment; hardenability; metallography; age hardening. Equivalency: MMAT 381. [0-3*-0]

MTRL 382 (4) CERAMICS I.

Fundamentals of ceramics: raw materials, forming, sintering of ceramics; properties of ceramics; ceramic coating; process control in the manufacturing of ceramics; applications and design with ceramics; ceramic armor, ceramic lamp envelope, ceramic cutting tools. Equivalency: MMAT 382. [3-3*-0]

MTRL 389 (1) SEMINAR I.

Public speaking and presentation of technical papers. Equivalency: MMAT 389. [0-0-1]

MTRL 390 (1) SEMINAR II.

Public speaking and presentation of technical papers. Equivalency: MMAT 390. [0-0-1]

MTRL 394 (4) POLYMER AND POLYMER

MATRIX COMPOSITES. The structure and properties of polymeric materials, reinforced polymers and polymer matrix composites with emphasis on their engineering properties and applications. Equivalency: MMAT 394. [3-0-2]

MTRL 398 (1) ENGINEERING REPORT. All students entering third year Metals and Materials Engineering are required to write two reports, one based on the field trip. Detailed information on the form, content and dates for submission of the preliminary and final copies is available in the office of the department head. Equivalency: MMAT 398.

MTRL 451 (3) MICROSTRUCTURAL

ANALYSIS LABORATORY. Basic principles and techniques of microstructural analysis with particular reference to engineered materials including x-ray, SEM microprobe TEM and high energy electron analysis. Equivalency: MMAT 451. [1-3*-2]

MTRL 455 (3) ECONOMIC ASPECTS OF

MATERIALS ENGINEERING. Time value of money, cash flows, capital and operating cost estimation, financial decision making and relevant case studies. Equivalency: MMAT 455. [2-0-2]

MTRL 456 (3) CORROSION ENGINEERING.

Thermodynamics of corrosion (Pourbaix diagrams); kinetics of corrosion (polarization curves); practical aspects of corrosion. Equivalency: MMAT 456. [2-0-2]

MTRL 458 (3) HYDROMETALLURGY II.

Leaching, purification, precipitation, regeneration; thermodynamics and kinetics of separation steps; electrochemical applications. Prerequisite: One of MMAT 358, MTRL 358. Equivalency: MMAT 458. [3-0-0]

MTRL 460 (3) ELECTRONIC CERAMICS.

Electromagnetic field interaction with electroceramics, mechanisms of conduction and insulation; properties and applications of basic groups of electronic ceramics. Equivalency: MMAT 460. [3-0-0]

MTRL 462 (3) SPECIALTY ALLOYS FOR HIGH

TEMPERATURE APPLICATIONS. Role of material science and engineering in high temperature applications: alloy development, alloy production, component design, component lifetime estimation and component manufacturing. Equivalency: MMAT 462. [3-0-0]

MTRL 464 (3) ENGINEERING DESIGN I.

Case studies illustrating the process of design in materials engineering. Equivalency: MMAT 464. [2-0-2]

MTRL 465 (3) ENGINEERING DESIGN II.

Case studies illustrating the process of design in materials engineering. Equivalency: MMAT 465. [2-0-2]

MTRL 466 (3) ENGINEERING PROJECT I.

Design projects to illustrate the full spectrum of design encountered in Metals and Materials Engineering including the design of components, structures and processes used to manufacture materials. Equivalency: MMAT 466. [1-0-5]

MTRL 467 (3) ENGINEERING PROJECT II.

Design projects to illustrate the full spectrum of design encountered in Metals and Materials Engineering including the design of components, structures and processes used to

manufacture materials. Equivalency: MMAT 467. [1-0-5]

MTRL 469 (3) SOLIDIFICATION. Solidification theory and application to casting processes; heat diffusion in solidification; solute diffusion models; nucleation theory; growth kinetics; eutectic and dendritic growth. Equivalency: MMAT 469. [2-0-2]

MTRL 474 (3) MECHANICAL WORKING.

Effect of temperature, strain rate, state of stress and structure on the deformation behaviour of metals and alloys at large strains. Criteria for workability of metals. Applications to the analysis of such hot and cold working processes as forging, rolling, extrusion, deep drawing, wire and tube drawing, Friction and lubrication in metal working. Equivalency: MMAT 474. [2-0-2]

MTRL 478 (3) ELECTRONIC MATERIALS.

Materials and physics aspects of semiconductor, optical and magnetic devices: energy bandstructure, crystal structure, crystal defects and impurity effects, relationship of material characteristics and physical properties; production of electronic materials and devices: single crystal growth, epitaxy, metallization, ion implantation, lithography and etching; characterization techniques: X-ray diffraction, photoluminescence. Equivalency: MMAT 478. [3-0-0]

MTRL 482 (3) CERAMICS II.

Ceramic coatings, sol-gel and thermal spray coatings, chemical and glass coatings, coating properties and characterization. Equivalency: MMAT 482. [3-0-0]

MTRL 484 (2) REFRACTORY CERAMICS FOR

HIGH TEMPERATURE APPLICATIONS. Refractory applications in metallurgical furnaces; requirements, specifications, causes of failure, common problems and their solutions; new developments in refractory practice. Prerequisite: One of MMAT 382, MTRL 382. Equivalency: MMAT 484. [2-0-0]

MTRL 486 (2) NONDESTRUCTIVE

EVALUATION. Principles of test methods; inspection techniques and equipment; quantitative flaw evaluation; reliability analysis. Equivalency: MMAT 486. [2-0-0]

MTRL 489 (1) SEMINAR III. Training and practice in public speaking and presentation of technical papers. Equivalency: MMAT 489. [0-0-1]

MTRL 494 (3) COMPOSITE MATERIALS.

Understanding the properties and the mechanical behaviour of composite materials with emphasis on analysis, design, and manufacturing. Equivalency: MMAT 494. [2-0-2*]

MTRL 495 (3) BIOMATERIALS.

Engineered materials in medical applications with an emphasis on material properties, functionality, design, and material response in the biological environment. Prerequisite: APSC 278. Equivalency: MMAT 495. [2-0-2]

MTRL 496 (3) BIOMIMETIC MATERIALS

PROCESSING. A comprehensive study of the structure-function relations of biological hard tissues, and their application to the design and

processing of novel materials and devices. Prerequisite: APSC 278. Equivalency: MMAT 496. [2-0-2]

MTRL 497 (1-6) D SPECIAL TOPICS IN MATERIALS ENGINEERING.

MTRL 498 (1) ENGINEERING REPORT. All students in fourth year Metals and Materials Engineering are required to write two reports, one based on the field trip. Detailed information on the form, content and dates for submission of the preliminary and final copies is available in the office of the department head. Equivalency: MMAT 498.

MTRL 550 (2-4) C METALLURGICAL THERMODYNAMICS. Application of advanced thermodynamic principles in metallurgical processes. Prerequisite: One of MMAT 350, MTRL 350. Equivalency: MMAT 550.

MTRL 557 (3) SEPARATION SCIENCE IN AQUEOUS METAL PROCESSING. The theory of solvent extraction and ion exchange, membrane separations, chemical precipitation, electrochemical separations and other techniques for aqueous metal processing, applications from the metal processing literature. Equivalency: MMAT 557.

MTRL 558 (3) CORROSION. Modern theories relating to corrosion and corrosion protection of metals. Thermodynamic and kinetic phenomena, corrosion measurements, inhibition and passivation, design for corrosive environments, stress corrosion cracking theory. Prerequisite: One of MMAT 456, MTRL 456. Equivalency: MMAT 558.

MTRL 562 (3) FINITE ELEMENTS IN HEAT TRANSFER. Application of the finite element method to heat transfer and solidification; steady state and transient heat conduction; latent heat evolution and radiation. Equivalency: MMAT 562.

MTRL 564 (3) HYDROMETALLURGICAL REACTOR DESIGN AND ANALYSIS. Batch leaching kinetics, leaching mechanisms; statistical methods for design of multiparticle continuous leaching reactors; coupled heat and mass balances, mixing phenomena, redox and precipitation reactions, complex mineralogical feeds; heap and dump leaching. Equivalency: MMAT 564.

MTRL 570 (3) DEFORMATION OF CRYSTALLINE MATERIALS. Nature and properties of lattice imperfections; dislocation theory and its use to describe work hardening, creep, structure of grain boundaries and other phenomena. Equivalency: MMAT 570.

MTRL 575 (3) ADVANCED PHASE TRANSFORMATIONS. Thermodynamic and kinetic bases for the theory of phase transformations in the condensed state. Equivalency: MMAT 575.

MTRL 578 (3) MICROSTRUCTURAL EVOLUTION OF DEFORMED MATERIALS. Physical mechanisms of microstructure evolution; structure, energy and mobilities of grain boundaries, grain boundary segregation, precipitation, recovery, recrystallization, grain

growth; microstructure engineering of steels. Equivalency: MMAT 578.

MTRL 579 (3) ADVANCED DEFORMATION PROCESSES. Mechanical and metallurgical behaviour of metals during deformation, design of deformation processes (rolling, extrusion, forging, etc.), development of microstructure and texture during deformation. Equivalency: MMAT 579.

MTRL 582 (3) ADVANCED CERAMICS. Complex silicate structures; ion exchange in silicates; kinetics of solid state reactions; kinetics of high temperature processes. Equivalency: MMAT 582.

MTRL 585 (3) TOPICS IN FRACTURE MECHANICS. The equations and concepts of linear elastic fracture mechanics. Fracture toughness testing, statistical theories of fracture and proof testing, stress corrosion cracking and static fatigue. Acoustic emission and other nondestructive testing methods. Case studies of large scale fractures of pressure vessels and structures. Equivalency: MMAT 585.

MTRL 586 (3) ELECTRON METALLOGRAPHY. The principles of advanced research microscopy utilizing electron beams; transmission and scanning electron microscopy, electron diffraction, X-ray micro-analysis, electron energy analysis. Equivalency: MMAT 586.

MTRL 588 (3) ELECTROCHEMICAL SCIENCE, ENGINEERING AND TECHNOLOGY. Electrochemical interfaces; electrode reactions; thermodynamics; kinetics and transport processes in electrochemical systems; experimental techniques. Electrochemical reactors and processes; modelling, design and economics. Electrochemical technologies; electrosynthesis, batteries and fuel cells. Electrometallurgy; electrowinning and refining of metals, corrosion, leaching and cementation. Equivalency: CHBE 577, MMAT 588.

MTRL 592 (2-6) D ADVANCED TOPICS IN METALS AND MATERIALS ENGINEERING. A special advanced course may be arranged on approval of the department head. Equivalency: MMAT 592.

MTRL 593 (1-6) C DIRECTED STUDIES IN METALS AND MATERIALS ENGINEERING. Equivalency: MMAT 593.

MTRL 595 (3) ADVANCED BIOMATERIALS. Formation and structure-function relations of biological materials, the interaction of tissue-synthetic biomaterials, advanced biomaterials design, biomimetic processing, and current progress in drug delivery systems and biomedical devices. Equivalency: MMAT 595.

MTRL 596 (12) M.SC. THESIS. Equivalency: MMAT 596.

MTRL 597 (6) M.ENG. PROJECT. Equivalency: MMAT 597.

MTRL 598 (0) SEMINAR. Presentation and discussion of current topics in metals and materials research. A required course for graduate students in metals and materials which carries no academic credit. Equivalency: MMAT 598.

MTRL 599 (12) THESIS. For M.A.Sc. Degree. Research studies in chemical metallurgy, physical metallurgy, or ceramics. Equivalency: MMAT 599.

MTRL 699 (0) THESIS. For Ph.D. Equivalency: MMAT 699.

MUED — MUSIC EDUCATION FACULTY OF EDUCATION

MUED 300 (3) TEACHING AND LEARNING MUSIC AND DANCE ACROSS THE CURRICULUM: ELEMENTARY. [3-0-0]

MUED 302 (4/6) C INSTRUMENTAL PEDAGOGY: SECONDARY. [2-0-0; 2-0-0]

MUED 303 (4/6) D CHORAL PEDAGOGY: SECONDARY. [2-0-0; 2-0-0]

MUED 304 (3) INSTRUMENTAL PEDAGOGY: ELEMENTARY. [3-0-0]

MUED 308 (3) ELEMENTARY CHORAL MUSIC. Prerequisite: All of MUED 300, MUED 320 or an introductory course in music education. [0-3-0]

MUED 314 (4/5) D CURRICULUM AND INSTRUCTION IN MUSIC: SECONDARY. Pass/Fail. Prerequisite: A completed concentration in music and permission of the Head.

MUED 320 (2) CURRICULUM AND INSTRUCTION IN MUSIC: ELEMENTARY. Curriculum organization in music; principles and methods of instruction applied to teaching music. Pass/Fail. [1-2-0]

MUED 332 (3) INSTRUMENTAL JAZZ PEDAGOGY. Teaching instrumental jazz in the secondary school. [3-0]

MUED 333 (3) CHORAL JAZZ PEDAGOGY. Teaching choral jazz in the schools. [3-0]

MUED 336 (3) KODALY I. Prerequisite: One of MUED 300, MUED 320. [1-2-0]

MUED 339 (3) THE MUSICAL. Organization and production of school musicals. [3-0]

MUED 340 (3) CANADIAN MUSIC IN THE CLASSROOM. Aspects of Canadian music suitable for elementary and secondary school curricula. The interrelation between music and other subjects. [3-0]

MUED 400 (3) MUSIC CURRICULUM AND INSTRUCTION: ELEMENTARY. Prerequisite: One of MUED 300, MUED 320. [3-0-0]

MUED 402 (3) CONDUCTING AND REHEARSAL TECHNIQUES FOR TEACHERS. Instrumental and choral techniques for teachers with prior experience teaching music.

MUED 405 (3) COMPUTER STUDIES FOR MUSIC EDUCATION. Classroom strategies for scoring and composing music using electronic music sequencing and composition programs. Prerequisite: CUST 321 or equivalent experience. [1-4]

MUED 407 (3) MUSIC CURRICULUM AND INSTRUCTION: ELEMENTARY. Philosophy, objectives, curriculum, methods, and materials for teaching music in elementary schools. Prerequisite: One of MUED 300, MUED 320. [3-0-0]

MUED 408 (3) ELEMENTARY CHORAL MUSIC. Foundations for choral singing; the child voice; methods and materials for elementary singers; choral and conducting techniques. Prerequisite: One of MUED 300, MUED 320, or an introductory course in music education. [0-3-0]

MUED 412 (3) MUSIC EDUCATION FOR CHILDREN WITH EXCEPTIONAL NEEDS. The practice and theory of music as used for the education of children with exceptional needs. Prerequisite: One of EPSE 312, EPSE 317. [3-0]

MUED 434 (3) ORFF BASICS. Introduction to the Orff approach to Music Education. Prerequisite: One of MUED 300, MUED 320. [1-2-0]

MUED 435 (3) ORFF LEVEL I. Prerequisite: One of MUED 304, MUED 434, MUED 407, MUED 408.

MUED 436 (2) KODALY II. Advanced study of Kodaly methods, strategies, and curricula. Prerequisite: MUED 336. [0-2]

MUED 437 (3) ORFF LEVEL II. Prerequisite: MUED 435.

MUED 438 (3) ORFF LEVEL III. Prerequisite: MUED 437.

MUED 508 (3) REVIEW OF RESEARCH IN MUSIC EDUCATION METHODS. Studies of recent research bearing on music education practice. Prerequisite: Appropriate senior undergraduate introductory or methods course.

MUED 542 (3/6) D THEORY AND PRINCIPLES OF MUSIC EDUCATION.

MUED 561 (3/12) C LABORATORY PRACTICUM.

MUED 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD. Courses in various subject matter fields designed to bring teachers up to date in recent findings in each field.

MUED 580 (3/12) C PROBLEMS IN EDUCATION. Investigation and report of a problem.

MUED 590 (3) GRADUATING PAPER. Pass/Fail.

MUED 598 (3/12) C FIELD EXPERIENCES. For those in master's, doctoral and diploma programs.

MUED 599 (6/12) C MASTER'S THESIS.

MUED 601 (3/12) D DOCTORAL SEMINAR.

MUED 699 (0) DOCTORAL THESIS. Pass/Fail.

MUSIC — MUSIC FACULTY OF ARTS

MUSIC 100 (3) PRINCIPLES OF MUSICAL FORM. Fundamental materials and processes of music – rhythmic, melodic, textural and harmonic – and how they create small-scale structures in a variety of styles. Compositional and analytical applications. Training in listening, sight-singing and score-reading skills.

MUSIC 101 (3) DIATONIC HARMONY AND VOICE LEADING. Harmonic and linear functions of diatonic chords; common progressions and sequences; introduction to tonal hierarchy and prolongation; simple modulation. Compositional and analytical exercises.

Training in related listening, sight-singing and score-reading skills. Prerequisite: MUSIC 100.

MUSIC 102 (2) CLASS STRINGS. Group instruction in music performance. Restricted to B.Mus. students.

MUSIC 103 (3) INTRODUCTION TO THE THEORY OF MUSIC. Concepts of rhythm, pitch, timbre, and texture. Notation and aural recognition of rhythmic and pitch patterns. Basic principles of melody and form. This course is not applicable to the B.Mus.

MUSIC 104 (3) INTRODUCTION TO DIATONIC HARMONY. Triads, key and elementary harmony in Western music. Elements of musical form. Aural training and exercises in composition, modeled on historical styles. Not for credit in the B.Mus. Prerequisite: MUSIC 103 or permission of the instructor.

MUSIC 107 (3/6) D COMPOSITION I. An introduction to musical composition.

MUSIC 112 (2) CLASS BRASSES AND PERCUSSION. Group instruction in music performance. Restricted to B.Mus. students.

MUSIC 120 (3) HISTORY OF MUSIC I. An introductory survey of music and musical values in Western and selected non-Western societies through humanistic, cultural, historical, and musical-analytical perspectives.

MUSIC 121 (3) HISTORY OF MUSIC II. The development of Western music from circa 1500 to circa 1750.

MUSIC 122 (2) CLASS WOODWINDS. Group instruction in music performance. Restricted to B.Mus. students.

MUSIC 131 (2) CLASS VOICE. Group instruction in music performance. Required of all first-time secondary voice students. Restricted to B.Mus. students.

MUSIC 135 (2) OPERA REPERTOIRE I. A musico-dramatic study and analysis of representative works in the international operatic theatre from 1600 to the present, through musical, literary and graphic sources. Each sequential year of study, the student is expected to show increased facility in musical and dramatic analysis as well as a greater understanding of the works under examination. Open to students outside the B.Mus. program by permission of the instructor.

MUSIC 136 (2/4) D PIANO REPERTOIRE I. Performance and discussion of the repertoire for string-keyboard instruments essential to the performer and teacher. Special attention to matters of structure, style, and performance practices. Required of piano performance majors and open to piano concentrators, space permitting. First term prerequisite to second term.

MUSIC 141 (2) CLASS PIANO I. Required of all first-time secondary piano students.

MUSIC 149 (2) COLLABORATIVE PIANO I. Skills and performance practice with primary emphasis on voice/piano partnership principles and repertoire. Strong sight-reading skills essential. For Piano majors; open to others by audition.

MUSIC 150 (4) LARGE INSTRUMENTAL ENSEMBLE. Symphony Orchestra or Wind Ensemble. May be repeated for credit in accordance with program requirements for B.Mus. or B.A. in Music. Open to other students by audition, with credit, as stipulated by their faculties.

MUSIC 151 (2-8) D UNIVERSITY CHAMBER ORCHESTRA. May be repeated for credit in accordance with program requirements for B.Mus. or B.A. in Music. Open to other students by audition, with credit, as stipulated by their faculties.

MUSIC 153 (4) UNIVERSITY SINGERS. May be repeated for credit in accordance with program requirements for B.Mus. or B.A. in Music. Open to other students by audition, with credit, as stipulated by their faculties.

MUSIC 154 (3) UNIVERSITY CHORAL UNION. May be repeated for credit in accordance with program requirements for B.Mus. or B.A. in Music. Open to other students by audition, with credit, as stipulated by their faculties.

MUSIC 155 (4) UNIVERSITY CHAMBER SINGERS. May be repeated for credit in accordance with program requirements for B.Mus. or B.A. in Music. Open to other students by audition, with credit, as stipulated by their faculties.

MUSIC 156 (2-8) D VOCAL CHAMBER ENSEMBLES. May be repeated for credit in accordance with program requirements for B.Mus. or B.A. in Music. Open to other students by audition, with credit, as stipulated by their faculties.

MUSIC 157 (2-8) D COLLEGIUM MUSICUM ENSEMBLE. Performance of early Western instrumental and vocal ensemble music. May be repeated for credit in accordance with program requirements for B.Mus. or B.A. in Music. Open to other students by audition, with credit, as stipulated by their faculties.

MUSIC 159 (2-8) D UNIVERSITY CHAMBER STRINGS. May be repeated for credit in accordance with program requirements for B.Mus. or B.A. in Music. Open to other students by audition, with credit, as stipulated by their faculties.

MUSIC 160 (2-8) D STRING CHAMBER ENSEMBLES. May be repeated for credit in accordance with program requirements for B.Mus. or B.A. in Music. Open to other students by audition, with credit, as stipulated by their faculties.

MUSIC 161 (2-6) D PIANO CHAMBER ENSEMBLES. May be repeated for credit in accordance with program requirements for B.Mus.

MUSIC 162 (2-8) D WIND AND PERCUSSION CHAMBER ENSEMBLES. May be repeated for credit in accordance with program requirements for B.Mus. or B.A. in Music. Open to other students by audition, with credit, as stipulated by their faculties.

MUSIC 163 (2-8) D CONTEMPORARY PLAYERS. Performance of contemporary music. An ensemble of variable size, including

both instrumentalists and singers, will be formed to present several concerts of 20th-century music during the academic year. May be repeated for credit in accordance with program requirements for B.Mus. or B.A. in Music.

MUSC 164 (2–8) D JAZZ ENSEMBLE. Performance techniques and repertoire. May be repeated for credit in accordance with program requirements for B.Mus. or B.A. in Music.

MUSC 165 (2–8) D ASIAN MUSIC ENSEMBLE. Training on traditional Asian instruments and their techniques, with emphasis on ensemble performance. Different sections focus on the music of different Asian cultures, e.g., China and Bali. May be repeated for credit in accordance with program requirements for B.Mus. or B.A. in Music.

MUSC 167 (2) INTRODUCTION TO PIANO CHAMBER MUSIC. A survey of repertoire and performance issues.

MUSC 169 (1–4) D INTENSIVE CHAMBER ENSEMBLE. Intensive coaching in chamber ensemble for advanced players. Performance of works prepared is expected. Corequisite: Any small ensemble (MUSC 156–166) and permission of the instructor.

MUSC 170 (2) LYRIC DICTION. A study of the basic phonetics and accepted principles of lyric diction of the four languages most commonly used in concert and operatic repertoire: French, German, Italian, and English.

MUSC 171 (2) MUSIC PERFORMANCE (SECONDARY). Private instruction, vocal or instrumental.

MUSC 172 (4) MUSIC PERFORMANCE (SECONDARY). Private instruction, vocal or instrumental.

MUSC 173 (6) MUSIC PERFORMANCE (SECONDARY). Private instruction, vocal or instrumental.

MUSC 181 (2) MUSIC PERFORMANCE (CONCENTRATION). Private instruction, vocal or instrumental.

MUSC 182 (4) MUSIC PERFORMANCE (CONCENTRATION). Private instruction, vocal or instrumental.

MUSC 183 (6) MUSIC PERFORMANCE (CONCENTRATION). Private instruction, vocal or instrumental.

MUSC 184 (8) MUSIC PERFORMANCE (CONCENTRATION). Private instruction, vocal or instrumental.

MUSC 191 (2) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental.

MUSC 192 (4) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental.

MUSC 193 (6) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental.

MUSC 194 (8) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental.

MUSC 195 (10) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental. This course also lists as MUSC 295, 395 and 495.

MUSC 200 (3) CHROMATIC HARMONY AND VOICE LEADING. Harmonic and linear functions of common chromatic chords; mixture; chords and progressions of linear origin; tonal plans. Compositional and analytical exercises. Training in related listening, sight-singing and score-reading skills. Prerequisite: MUSC 101.

MUSC 201 (3) MUSICAL FORMS. Study of various forms in tonal music and the rhythmic, melodic, textural and harmonic processes that create them on small and large scales. Compositional and analytical exercises. Training in related listening, sight-singing and score-reading skills. Prerequisite: MUSC 200.

MUSC 207 (3/6) C COMPOSITION II. Continuation of MUSC 107. Prerequisite: MUSC 107 and permission of Composition Division based on submission of scores.

MUSC 220 (3) HISTORY OF MUSIC III. The development of Western music from circa 1750 to circa 1870.

MUSC 221 (3) HISTORY OF MUSIC IV. The development of Western music from circa 1870; an introduction to jazz and popular music and to music of selected non-Western societies.

MUSC 235 (2) OPERA REPERTOIRE II. See MUSC 135.

MUSC 236 (2/4) D PIANO REPERTOIRE II. Continuation of MUSC 136.

MUSC 241 (2) CLASS PIANO II. Continuation of MUSC 141.

MUSC 249 (2) COLLABORATIVE PIANO II. Further development of skills and performance practice with primary emphasis on voice/piano partnership principles and repertoire. Strong sight-reading skills essential. For Piano majors; open to others by audition. Prerequisite: MUSC 149.

MUSC 271 (2) MUSIC PERFORMANCE (SECONDARY). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 171–195.

MUSC 272 (4) MUSIC PERFORMANCE (SECONDARY). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 171–195.

MUSC 273 (6) MUSIC PERFORMANCE (SECONDARY). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 171–195.

MUSC 281 (2) MUSIC PERFORMANCE (CONCENTRATION). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 171–195.

MUSC 282 (4) MUSIC PERFORMANCE (CONCENTRATION). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 171–195.

MUSC 283 (6) MUSIC PERFORMANCE (CONCENTRATION). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 171–195

MUSC 284 (8) MUSIC PERFORMANCE (CONCENTRATION). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 171–195

MUSC 291 (2) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 171–195

MUSC 292 (4) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 171–195

MUSC 293 (6) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 171–195

MUSC 294 (8) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 171–195

MUSC 295 (10) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 171–195

MUSC 300 (3) COMPOSITIONAL AND ANALYTICAL APPROACHES TO THE MUSIC OF MODERNISM. Modernist art-music techniques established before 1950 and their later developments, with projects in analysis, compositional exercises, and training in related listening, sight-singing and score-reading skills. Prerequisite: MUSC 201.

MUSC 301 (3) COMPOSITIONAL AND ANALYTICAL APPROACHES TO MUSIC TODAY. Technical and stylistic perspectives on contemporary art music and popular and world music idioms. Exercises in composition and production. Training in related listening, sight-singing and score reading skills. Prerequisite: MUSC 300.

MUSC 305 (2) READINGS IN ORCHESTRAL REPERTOIRE. A laboratory course designed primarily for orchestral wind and percussion performance majors. Emphasis on reading a large cross-section of standard orchestral repertoire with further emphasis given to music currently being programmed by local professional orchestras.

MUSC 307 (3/6) C COMPOSITION III. Continuation of MUSC 207. Prerequisite: MUSC 207 and permission of Composition Division based on submission of scores.

MUSC 309 (2) INSTRUMENTATION. The study of string, woodwind, brass and percussion instruments; orchestral sections and scoring for various small ensembles. Activities include demonstrations of instruments, scoring projects, analysis and listening. For credit towards the B.Mus. and the B.A. in Music; not open to other students. Prerequisite: MUSC 201 and completion of the second-year piano requirement.

MUSC 310 (2) ORCHESTRATION. The study of orchestration through the analysis of orchestral works, listening and scoring projects. Activities also include choral arranging and scoring for stage band and wind ensemble. Prerequisite: MUSC 309.

MUSC 311 (2) FUNDAMENTALS OF CONDUCTING. Basic conducting techniques: patterns, cueing, dynamic shading, and physical presentation. Prerequisite: MUSC 201 and completion of the second-year piano requirement.

MUSC 312 (2) INSTRUMENTAL CONDUCTING. The relation of conducting gestures to instrumental sound; development of practical skills in directing ensembles and reading scores, considering instruments' special characteristics. Prerequisite: MUSC 311.

MUSC 313 (2) CHORAL CONDUCTING. The relation of conducting gestures to choral sound; development of practical skills in directing ensembles and reading scores; attendant issues of vocal technique and pedagogy. Prerequisite: MUSC 311.

MUSC 319 (3/6) D INTRODUCTION TO ELECTROACOUSTIC MUSIC. Study of acoustics, audio technology, and electroacoustic composition. Composition of original works using facilities of the UBC Electroacoustic Music Studio. Prerequisite: MUSC 201. Permission of instructor is also required.

MUSC 320 (3) COMPUTER MUSIC. The study of computer applications to music, focusing on digital synthesis techniques and languages, methods of algorithmic composition, and the design of music editors. Prerequisite: MUSC 319 or permission of instructor.

MUSC 321 (3/6) D MUSIC APPRECIATION, TWENTIETH-CENTURY. Designed for students with little or no musical background. Not for credit toward the B.Mus. or B.A. in Music.

MUSC 322 (3) TOPICS IN WESTERN MUSIC. Study in one major genre of Western music (e.g., "The Symphony", "Women in Opera", "History of the Song Cycle"). No musical knowledge is required. Not for credit toward the B.Mus. or B.A. in Music.

MUSC 324 (3) MUSIC AND CIVILIZATION I. Development of music in relation to the other arts, science, philosophy, literature and history: Ancient Greece, the Middle Ages, and the Renaissance. Not for credit toward the B.Mus. or B.A. in Music.

MUSC 325 (3) MUSIC AND CIVILIZATION II. A continuation of MUSC 324, dealing with Europe after 1600. Not for credit toward the B.Mus. or B.A. in Music.

MUSC 326 (3/6) D MUSIC APPRECIATION. An introductory course for which previous musical background is helpful, but not required. Contents include a discussion of musical concepts, evolution of forms, style, and media and detailed study of selected works from the concert repertoire. Popular forms of music (jazz, folk, rock, etc) not included. Not for credit towards the B.Mus. or B.A. in Music.

MUSC 328 (3/6) D WORLD MUSIC CULTURES. Introduction to the principles of ethnomusicology and an examination of two contrasting musical traditions (e.g., North American Indian and Japanese). For credit toward the B.Mus. and the B.A. in Music, and open to other third-year students with

knowledge of music rudiments. May be repeated once for credit if different traditions are covered.

MUSC 329 (3) LITURGICAL MUSIC FROM THE REFORMATION TO THE PRESENT. Music of the Western liturgies since 1520, including a study of hymnology and contemporary church music issues. Open to Music students and to non-Music students who can read music. Prerequisite: MUSC 221.

MUSC 330 (3) MUSIC IN VANCOUVER'S ETHNIC COMMUNITIES. Examination of music within the ethnic context as found in the urban environment of Vancouver. The musics of several traditions (e.g., Chinese, Jewish, English folk) will be studied together with the social issues surrounding their preservation. For credit toward the B.Mus. and the B.A. in Music, but open to students not majoring in music.

MUSC 331 (2) WORKSHOP IN WORLD RHYTHM. Theory and practice of selected rhythmic systems of world music cultures, focusing on West African drumming, and including other systems such as Indian Tala and Peking opera percussion. Prerequisite: MUSC 201.

MUSC 333 (2) ACCOMPANYING ON THE HARPSICHORD I. Basic techniques and styles of continuo playing. Open to keyboard players with no previous harpsichord experience.

MUSC 336 (4) OPERA THEATRE TECHNIQUES I. Performance techniques associated with the musical theatre of various historical periods. Basic dance. Most operatic excerpts will be in English.

MUSC 339 (3/6) D OPERA WORKSHOP I. Participation in performances by the School. Open also to students outside Music without credit, after audition.

MUSC 340 (3) PIANO PEDAGOGY I: THEORY AND STUDIO MANAGEMENT. Basic principles of teaching piano. Business aspects of establishing and maintaining a music studio. For piano majors.

MUSC 345 (3) AESTHETICS AND PRACTICE OF FILM MUSIC.

MUSC 349 (2) KEYBOARD HARMONY AND TRANSPOSITION. Designed for the keyboard performance major and keyboard concentrator in General Studies.

MUSC 350 (3/6) D EARLY CHRISTIAN AND MEDIEVAL MUSIC. Early notations and musical developments from early Christian times to 1400. Prerequisite: MUSC 120.

MUSC 352 (3) LATE MEDIEVAL AND EARLY RENAISSANCE MUSIC. Sacred and secular music, vocal and instrumental. Prerequisite: All of MUSC 120, MUSC 121.

MUSC 353 (3) RENAISSANCE MUSIC FROM 1500 TO 1620. Sacred and secular music, vocal and instrumental. Prerequisite: MUSC 121.

MUSC 354 (3) BAROQUE MUSIC. Prerequisite: MUSC 121.

MUSC 355 (3) CLASSICAL MUSIC. Prerequisite: MUSC 220.

MUSC 356 (3) ROMANTIC MUSIC. Prerequisite: MUSC 220.

MUSC 357 (3) TWENTIETH-CENTURY MUSIC. Prerequisite: MUSC 221.

MUSC 358 (3) HISTORY OF JAZZ. Jazz styles and their cultural contexts; the relationship of performers and audiences; issues of race and gender; non-Western influences. Prerequisite: MUSC 220.

MUSC 363 (4) HISTORY AND REPERTOIRE OF THE GUITAR AND RELATED INSTRUMENTS. A chronological survey, from the Renaissance to the present day, of music for the guitar and related instruments and of the development of the instruments themselves. Instruments considered include Renaissance and Baroque lutes, the vihuela, and early types of guitar as well as the modern six-string guitar. Musical forms and genres, national schools and the works of principal composers of every period are explored and attention is given to national systems, continuo realization, historical ornamentation and pedagogical systems. Prerequisite: MUSC 221.

MUSC 364 (1/2) D CHAMBER MUSIC REPERTOIRE. Perspectives on the performance of selected chamber music. Specific works vary from year to year. May be repeated for credit.

MUSC 365 (2) SONG REPERTOIRE I. An exploration of the solo art song repertoire from 1600 to the Romantic period. Repertoire essential to the performer and teacher will be studied through live and recorded performance with special attention given to poetic content and musical style. Prerequisite: MUSC 221.

MUSC 371 (2) MUSIC PERFORMANCE (SECONDARY). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 271-295.

MUSC 372 (4) MUSIC PERFORMANCE (SECONDARY). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 271-295.

MUSC 373 (6) MUSIC PERFORMANCE (SECONDARY). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 271-295.

MUSC 381 (2) MUSIC PERFORMANCE (CONCENTRATION). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 271-295.

MUSC 382 (4) MUSIC PERFORMANCE (CONCENTRATION). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 271-295.

MUSC 383 (6) MUSIC PERFORMANCE (CONCENTRATION). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 271-295.

MUSC 384 (8) MUSIC PERFORMANCE (CONCENTRATION). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 271-295.

MUSC 391 (2) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 271–295.

MUSC 392 (4) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 271–295.

MUSC 393 (6) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 271–295.

MUSC 394 (8) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 271–295.

MUSC 395 (10) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 271–295.

MUSC 402 (3/6) C SPECIAL PROJECTS. For fourth-year students who receive permission of the Director of the School of Music to do advanced studies in their major field.

MUSC 403 (3/6) D SELECTED TOPICS IN MUSIC. See School of Music schedule for description and prerequisites. Restricted to B. Mus. and B.A. in Music students.

MUSC 406 (2/4) D CONDUCTING II. Advanced choral and orchestral conducting techniques and rehearsal practices. Prerequisite: One of MUSC 311, MUSC 312. Permission of the instructor is required.

MUSC 407 (3/6) C COMPOSITION IV. Continuation of MUSC 307.

MUSC 409 (3/6) D JAZZ THEORY AND ARRANGING. Jazz scales, chord relationships, substitutions, orchestration, listening, and score analysis. Restricted to B.Mus. and B.A. in Music students. Prerequisite: MUSC 201.

MUSC 410 (3) INTRODUCTION TO SCHENKERIAN ANALYSIS. The key concepts of Schenker's theory of tonality. Applications to the analysis of short pieces in various tonal styles, emphasizing clear and correct graphing. Issues of interpretive scope. Prerequisite: MUSC 201.

MUSC 411 (3) ANALYSIS OF TONAL MUSIC. Analytical approaches that complement Schenkerian analysis, including motivic construction, harmonic rhythm and phrase rhythm, chromaticism and enharmonicism, features of musical form, aspects of structure and hierarchy at the small and large scale. Prerequisite: MUSC 201.

MUSC 412 (3) ANALYTICAL STUDIES IN THE DEVELOPMENT OF MUSICAL MODERNISM (1860–1940). Analysis of late- and post-romantic works within a theoretical framework that bridges earlier to later works. Assignments in various formats, emphasizing analysis but possibly including composition. Prerequisite: MUSC 201.

MUSC 413 (3) CONTEMPORARY ART MUSIC: THEORY AND ANALYSIS. A technical approach to the diverse concert-music repertoire since 1950, including orchestral, chamber, solo, and electro-acoustic genres. Applicable theories of pitch and rhythm, with

reference to composers' own writings. Prerequisite: MUSC 301.

MUSC 414 (3) COUNTERPOINT. Analysis and composition of pieces that rely on the control and development of imitative, polyphonic textures. Models to be taken from one or more European historical repertoires. Prerequisite: MUSC 201.

MUSC 415 (3) IMAGINING MUSICAL PERFORMANCES. How performance and analysis engage the musical imagination, as complementary activities; how analytical observations can stimulate performance, and vice versa. Selected topics, with special emphasis on temporal factors. Prerequisite: MUSC 201 or permission of instructor.

MUSC 417 (3/6) D MUSICAL SCORING FOR FILM. Addresses the practical aspects of composing music for film through assignments of written scores. Prerequisite: MUSC 319. Permission of instructor is required.

MUSC 428 (3/6) D AREA STUDIES IN ETHNIC MUSICS. The history, theory, style, organology, and forms of the music of a particular culture in its aesthetic and cultural context. Students should consult the School as to which music culture will be covered in a particular year. May be repeated once for credit if different cultures are covered. Prerequisite: MUSC 328 or instructor's permission.

MUSC 430 (3/6) D MAJOR COMPOSERS. The musical works of no more than two significant composers will be examined. Specific topics will be announced; may be repeated for credit. Prerequisite: All of MUSC 120, MUSC 121, MUSC 220, MUSC 221.

MUSC 433 (2) ACCOMPANYING ON THE HARPSICHORD II. Continuation of MUSC 333 with emphasis on more advanced continuo and obbligato techniques. Prerequisite: MUSC 333.

MUSC 436 (4) OPERA THEATRE TECHNIQUES II. Advanced studies in acting, movement, gesture, dance and stage combat. Emphasis on communication and the art of singing and acting recitative in foreign languages.

MUSC 439 (3/6) D OPERA WORKSHOP II. A continuation of MUSC 339.

MUSC 440 (3) PIANO PEDAGOGY II: APPLICATIONS. Teaching musical concepts and keyboard skills; observation of group and private lessons; supervised practicum. Prerequisite: MUSC 340.

MUSC 441 (2) VOCAL TECHNIQUES. A study of the scientific principles related to vocal performance: acoustical, physiological and psychological. Restricted to B.Mus. students.

MUSC 442 (4/8) D SONG INTERPRETATION. Survey of the literature for voice with keyboard accompaniment, with emphasis on performance problems. Open to piano and voice majors, and to others by permission of instructor. May be repeated once for credit.

MUSC 443 (3/6) D OPERA COACHING. Principles and practice, focusing on current Opera Workshop repertoire. Reproducing

orchestrations on the piano; preparing scores; study of the voice and the rehearsal process; coaching languages; related conducting skills. Prerequisite: MUSC 249.

MUSC 449 (6) GRADUATING ESSAY.

MUSC 450 (3/6) D SELECTED TOPICS IN VOCAL OR INSTRUMENTAL GENRES. Intensive study of one genre of music (e.g., orchestral music 1760-1849; the Lied in Austria and Germany) through analysis and the consideration of cultural milieu and historical development. Specific topics will be announced. May be repeated for credit to a maximum of 6 credits.

MUSC 454 (3) HISTORY OF OPERA I. The development of opera between 1600 and 1800. Prerequisite: All of MUSC 121, MUSC 220.

MUSC 455 (3) HISTORY OF OPERA II. The development of opera between 1800 and the present. Prerequisite: All of MUSC 220, MUSC 221.

MUSC 465 (2) SONG REPERTOIRE II. A sequel to MUSC 365, exploring the solo art song repertoire from the Romantic era to the present. Prerequisite: MUSC 221.

MUSC 468 (2) CHAMBER MUSIC MASTER CLASS. Enrolment by audition only.

MUSC 471 (2) MUSIC PERFORMANCE (SECONDARY). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 371–395.

MUSC 472 (4) MUSIC PERFORMANCE (SECONDARY). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 371–395.

MUSC 473 (6) MUSIC PERFORMANCE (SECONDARY). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 371–395.

MUSC 481 (2) MUSIC PERFORMANCE (CONCENTRATION). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 371–395.

MUSC 482 (4) MUSIC PERFORMANCE (CONCENTRATION). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 371–395.

MUSC 483 (6) MUSIC PERFORMANCE (CONCENTRATION). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 371–395.

MUSC 484 (8) MUSIC PERFORMANCE (CONCENTRATION). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 371–395.

MUSC 491 (2) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 371–395.

MUSC 492 (4) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 371–395.

MUSC 493 (6) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental. Prerequisite: One of MUSC 371–395.

- MUSC 494 (8) MUSIC PERFORMANCE (MAJOR).** Private instruction, vocal or instrumental. Prerequisite: One of MUSC 371–395.
- MUSC 495 (10) MUSIC PERFORMANCE (MAJOR).** Private instruction, vocal or instrumental. Prerequisite: One of MUSC 371–395.
- MUSC 500 (3/6) D ADVANCED MUSICAL ANALYSIS.** Prerequisite: One of MUSC 410, MUSC 411, MUSC 412, MUSC 413.
- MUSC 501 (3) READINGS IN SCHENKERIAN THEORY.** Prerequisite: MUSC 410.
- MUSC 502 (3) THE STRUCTURE AND FUNCTION OF MUSIC THEORIES.** Prerequisite: One of MUSC 410, MUSC 411, MUSC 412 or permission of the instructor.
- MUSC 503 (3/6) D TOPICS IN THE HISTORY OF MUSIC THEORY.**
- MUSC 504 (3/6) D THEORIES OF NON-TONAL PITCH RELATIONSHIPS.**
- MUSC 506 (2) READINGS IN ORCHESTRAL REPERTOIRE.** Standard repertoire for wind and percussion players. See Divisional Coordinator for placement.
- MUSC 507 (3/6) C COMPOSITION.** The composition of original music for conventional instruments and/or electronic media.
- MUSC 508 (3/6) C COMPOSITION.** A continuation of MUSC 507. Prerequisite: MUSC 507.
- MUSC 509 (3/6) C ADVANCED ORCHESTRATION AND ARRANGING.**
- MUSC 511 (3) TOPICS IN MUSICAL AESTHETICS.**
- MUSC 512 (3/6) C DIRECTED INDIVIDUAL STUDIES.** Approval by the Director, School of Music, is required.
- MUSC 520 (3/6) D MUSIC BIBLIOGRAPHY AND RESEARCH TECHNIQUES.** Introduction to the principal resources of the research library, with particular attention to reference tools and bibliographical repertoires.
- MUSC 521 (3/6) D SEMINAR IN PERFORMANCE PRACTICES.** Studies in the theoretical and practical problems of musical interpretation.
- MUSC 522 (3/6) D SEMINAR IN NOTATION OF POLYPHONIC MUSIC.**
- MUSC 523 (3/6) D SEMINAR IN MEDIEVAL MUSIC.**
- MUSC 524 (3/6) D SEMINAR IN RENAISSANCE MUSIC.**
- MUSC 525 (3/6) D SEMINAR IN BAROQUE MUSIC.**
- MUSC 526 (3/6) D SEMINAR IN CLASSICAL PERIOD MUSIC.**
- MUSC 527 (3/6) D SEMINAR IN NINETEENTH-CENTURY MUSIC.**
- MUSC 528 (3/6) D SEMINAR IN TWENTIETH-CENTURY MUSIC.**
- MUSC 529 (3) INTRODUCTION TO ETHNOMUSICOLOGY.** Preliminary studies in the discipline of ethnomusicology, with an emphasis on history and orientations.
- MUSC 530 (3) TOPICS IN ETHNOMUSICOLOGY.** Topics involving methodology and fieldwork in non-Western traditions. Topics will vary and students should consult the School as to areas of focus in any given term.
- MUSC 531 (3/6) D SEMINAR IN ETHNOMUSICOLOGY.** Research studies in selected areas or regions of world music cultures. Prerequisite: MUSC 529.
- MUSC 532 (3/6) D ADVANCED STUDIES IN MUSIC HISTORY AND MUSICOLOGY.**
- MUSC 537 (3/6) D SEMINAR IN THE LITERATURE OF OPERA.** Special topics related to the bibliography, history, repertoire and pedagogy of operatic music. Prerequisite: All of MUSC 221, MUSC 301, MUSC 454, MUSC 455, MUSC 520. Corequisite: MUSC 520.
- MUSC 538 (3/6) D STAGING AND DIRECTING OPERA.** Prerequisite: Permission of instructor is required.
- MUSC 539 (6–12) D OPERA PRODUCTION.** Stylistic and technical studies and participation in the production of opera performances. May be repeated for credit, in accordance with program requirements. Prerequisite: MUSC 439.
- MUSC 547 (3/6) D SEMINAR IN THE LITERATURE OF SONG.** Special topics related to the bibliography, history, repertoire and pedagogy of song. Prerequisite: All of MUSC 221, MUSC 301, MUSC 365, MUSC 465, MUSC 520. Corequisite: MUSC 520.
- MUSC 549 (6/12) C MASTER'S THESIS.**
- MUSC 550 (4) LARGE INSTRUMENTAL ENSEMBLE.** Symphony Orchestra or Wind Ensemble. Open only to graduate students.
- MUSC 551 (2) UNIVERSITY CHAMBER ORCHESTRA.** Open only to graduate students.
- MUSC 553 (4) UNIVERSITY SINGERS.** Open only to graduate students.
- MUSC 554 (3) UNIVERSITY CHORAL UNION.** Open only to graduate students.
- MUSC 555 (4) UNIVERSITY CHAMBER SINGERS.** Open only to graduate students.
- MUSC 556 (2) INSTRUMENTAL COLLEGIUM MUSICUM ENSEMBLE.** Open only to graduate students.
- MUSC 557 (2) VOCAL COLLEGIUM MUSICUM ENSEMBLE.** Open only to graduate students.
- MUSC 559 (2) UNIVERSITY CHAMBER STRINGS.** Open only to graduate students.
- MUSC 560 (2) STRING CHAMBER ENSEMBLES.** Open only to graduate students.
- MUSC 561 (2) PIANO CHAMBER ENSEMBLES.** Open only to graduate students.
- MUSC 562 (2) WIND AND PERCUSSION CHAMBER ENSEMBLES.** Open only to graduate students.
- MUSC 563 (2) CONTEMPORARY PLAYERS.** Open only to graduate students.
- MUSC 564 (2) JAZZ ENSEMBLE.** Open only to graduate students.
- MUSC 565 (2) ASIAN MUSIC ENSEMBLE.** Study of Asian music, to include practical training in instrumental techniques and ensemble performance. The music of one major Asian civilization, often Chinese, will be emphasized.
- MUSC 566 (1) INTENSIVE CHAMBER ENSEMBLE.** Intensive coaching.
- MUSC 569 (1) INTENSIVE SPECIALIZED CHAMBER ENSEMBLE.** Intensive coaching.
- MUSC 571 (2) MUSIC PERFORMANCE (SECONDARY).** Private instruction, vocal or instrumental.
- MUSC 572 (4) MUSIC PERFORMANCE (SECONDARY).** Private instruction, vocal or instrumental.
- MUSC 573 (6) MUSIC PERFORMANCE (SECONDARY).** Private instruction, vocal or instrumental.
- MUSC 591 (2) MUSIC PERFORMANCE (MAJOR).** Private instruction, vocal or instrumental.
- MUSC 592 (4) MUSIC PERFORMANCE (MAJOR).** Private instruction, vocal or instrumental.
- MUSC 593 (6–12) D MUSIC PERFORMANCE (MAJOR).** Private instruction, vocal or instrumental. May be repeated for credit, in accordance with program requirements.
- MUSC 594 (8) MUSIC PERFORMANCE (MAJOR).** Private instruction, vocal or instrumental.
- MUSC 595 (10) MUSIC PERFORMANCE (MAJOR).** Private instruction, vocal or instrumental.
- MUSC 600 (3) SEMINAR IN ANALYTICAL TECHNIQUES.** Not open to Master's students or to Ph.D. students in Music Theory. Prerequisite: One of MUSC 500, MUSC 410, MUSC 411, MUSC 412, MUSC 413.
- MUSC 606 (2) READINGS IN ORCHESTRAL REPERTOIRE.** Continuation of MUSC 506. See Divisional Coordinator for placement.
- MUSC 607 (3/6) C COMPOSITION.** Further study for doctoral candidates in Composition.
- MUSC 609 (3/6) C ADVANCED ORCHESTRATION AND ARRANGING.** Prerequisite: MUSC 509.
- MUSC 649 (0) PH.D. OR D.M.A. THESIS.**
- MUSC 671 (2) MUSIC PERFORMANCE (SECONDARY).** Private instruction, vocal or instrumental.
- MUSC 672 (4) MUSIC PERFORMANCE (SECONDARY).** Private instruction, vocal or instrumental.

MUSC 673 (6) MUSIC PERFORMANCE (SECONDARY). Private instruction, vocal or instrumental.

MUSC 691 (2) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental.

MUSC 692 (4) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental.

MUSC 693 (6) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental.

MUSC 694 (8) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental.

MUSC 695 (10) MUSIC PERFORMANCE (MAJOR). Private instruction, vocal or instrumental.

NEST — NEAR EASTERN STUDIES FACULTY OF ARTS

NEST 301 (3) THE ANCIENT NEAR EAST. A history from 3100-333 BC with emphasis on Mesopotamia.

NEST 302 (6) ARCHAEOLOGY OF THE ANCIENT NEAR EAST.

NEST 303 (3) HISTORY OF ANCIENT EGYPT.

NEST 304 (3) ART AND ARCHAEOLOGY OF ANCIENT EGYPT. Equivalency: ARTH 325.

NEST 310 (3) HISTORY OF WOMEN IN EARLY TO LATE MEDIEVAL MUSLIM SOCIETIES. Realities of Muslim Women's lives are reconstructed through a critical examination of a variety of literary and material sources.

NEST 500 (3/6) D STUDIES IN NEAR EASTERN ARCHAEOLOGY IN THE BRONZE AGE.

NEST 501 (3/6) D STUDIES IN NEAR EASTERN ARCHAEOLOGY IN THE IRON AGE.

NEST 502 (3/6) D WARFARE AND DIPLOMACY IN ANCIENT EGYPT.

NEST 503 (3/6) D STUDIES IN THE MATERIAL CULTURE OF ANCIENT EGYPT.

NEUR — NEUROSURGERY FACULTY OF MEDICINE

NEUR 512 (2) ADVANCED NEUROSURGERY I. Selected topics in neurosurgery and the related basic sciences. Given in alternate years.

NEUR 513 (2) ADVANCED NEUROSURGERY II. The second year of the above program. Given in alternate years.

NEUR 730 (0) CORRELATIVE CLINICAL NEUROSURGERY ROUNDS. Residents meet with radiology, neuropathology, and active staff members for discussion of problem cases. One and one-half hours weekly.

NEUR 731 (0) NEUROSURGERY PROFESSORS CONFERENCE. One one-hour session weekly with a member of the active staff, conducted at the bedside or in conference room. Cases reviewed with emphasis on the proper applica-

tion of diagnostic methods and the indications for operative management.

NEUR 732 (0) NEURORADIOLOGY. Sessions conducted by members of the Department of Radiology in which case histories are reviewed and related to radiological investigation and interpretation. One hour weekly.

NEUR 733 (0) ANATOMY AND NEUROPATHOLOGY IN THE BRAIN. Sessions conducted by a neuropathologist, Department of Pathology. Attended weekly by neurosurgical resident staff. Two hours weekly.

NEUR 734 (0) OPERATIVE NEUROSURGERY. Technique of neurosurgical procedures. Anatomy, surgical judgement, pre- and post-operative care. From a general selection of neurosurgical procedures, approximately 950 major neurosurgical procedures per year are carried out under supervision.

NRSC — NEUROSCIENCE FACULTY OF GRADUATE STUDIES

NRSC 500 (6) NEUROSCIENCE I. Comprehensive multidisciplinary course with lectures, seminars, and laboratory demonstrations encompassing molecular, cellular, systemic, and behavioural approaches to the study of nervous systems. Emphasis is on the physiology, pharmacology, and biochemistry of excitable cells and their synaptic interactions. Permission of Neuroscience Chair is required. Normally to be taken in conjunction with NRSC 501.

NRSC 501 (6) NEUROSCIENCE II. Continuation of NRSC 500 with emphasis on the integrative functions of the brain, behaviour, and selected neural disorders. Permission of Neuroscience Chair is required. Normally to be taken in conjunction with NRSC 500.

NRSC 549 (12) MASTER'S THESIS.

NRSC 649 (0) PH.D. THESIS.

NURS — NURSING SCHOOL OF NURSING

In the clinical nursing courses the ratio between class and supervised nursing experience varies but in the overall program it is approximately 1:3; the credit values for these courses are based on both instruction and supervised nursing experience.

NURS 309 (3) CONTEMPORARY NURSING PRACTICE. Exploration of the knowledge, competencies and roles underlying professional nursing practice in the current social, political and health care contexts. For post-RN students only. [3-0-0]

NURS 310 (3) THE CORE OF NURSING PRACTICE. The study of key concepts and frameworks fundamental to the practice of nursing. Not available for RN students. [2-2-0]

NURS 312 (3) SUPPORTIVE ENVIRONMENTS FOR THE HEALTH OF FAMILIES. Fostering the health of families in times of health and illness. [3-0]

NURS 320 (4) NURSING ROLES AND COMPETENCIES I. Introduction to nursing care with emphasis on the promotive and

preventative roles of the nurse. Not available for RN students. [2-0-6]

NURS 321 (2) NURSING ROLES AND COMPETENCIES II. Continued study and clinical practice in nursing, with emphasis on restorative, rehabilitative and supportive roles of the nurse. Not available for RN students. [1-0-3]

NURS 330 (6) NURSING CARE OF INDIVIDUALS WITHIN THE CONTEXT OF COMMUNITY. Clinical nursing practice focused on acutely ill individuals within the larger context of community. Not available for RN students. [2-0-12]

NURS 331 (8) NURSING CARE OF FAMILIES. Clinical nursing practice with families experiencing transitions related to health and illness. Childbearing and childrearing families. [4-0-12]

NURS 350 (3) THE SOCIOCULTURAL CONSTRUCTION OF HEALTH AND ILLNESS. Social and cultural constructs as related to health and illness. Diversity and its relationship to definitions of health and illness. [3-0]

NURS 410 (3/6) D EXPLORING AVENUES OF NURSING PRACTICE. A specific avenue is selected from a number of options in consultation with faculty. For post-RN students only. [2-0-12]

NURS 411 (4) EXPLORING AVENUES OF NURSING PRACTICE. A specific avenue of nursing practice is selected from a number of options, in consultation with faculty. For basic baccalaureate students. [1-0-9]

NURS 413 (6) FOSTERING POPULATION HEALTH PROMOTION. Theory and strategies for working in partnership with populations, health professionals, and community service providers. Students use primary health care principles and population health promotion approaches during community nursing practice. Not available for RN students. [3-0-9]

NURS 414 (3) POPULATION HEALTH PROMOTION. Theory and strategies for working in partnership with populations, health professionals, and community service providers. Students examine primary health care principles and evidence-based population health promotion approaches. For post-RN students only.

NURS 416 (3) HEALTH CARE POLICY AND THE NURSING PROFESSION. Study of professional nursing within the context of Canadian health care policy. [3-0-0]

NURS 421 (2) NURSING ROLES AND COMPETENCIES III. Study and clinical practice within a variety of nursing roles, focusing on complex client problems and nursing interventions. [1-0-3]

NURS 426 (3) NURSING AND THE HEALTH OF COMMUNITIES. Study of epidemiological concepts as they relate to the health of Canadian communities. Application of concepts to the planning of health care programs. Open to other health sciences students with permission of instructor. Prereq-

quisite: Third- or fourth-year standing in Nursing. [3-0-0; 0-0-0]

NURS 430 (8) POPULATION-FOCUSED NURSING PRACTICE I. Clinical nursing practice with selected populations in the community. [4-0-12]

NURS 432 (6) NURSING PRACTICE WITH ACUTE AND CHRONICALLY ILL POPULATIONS. Clinical nursing practice with persons affected by acute and chronic illness [2-0-12]

NURS 450 (3) INTRODUCTION TO RESEARCH UTILIZATION. The process of research and scholarship in nursing; principles and processes in utilizing research. [3-0]

NURS 452 (3) ETHICAL BASIS OF HEALTH CARE. Theories related to the ethical basis of professions. Ethical problems in healthcare and in nursing. Ethical decision-making. [3-0]

NURS 453 (3) LEADERSHIP AND MANAGEMENT IN HEALTH CARE. Structures, contexts and processes basic to management in health care settings. Interdisciplinary approaches to management and leadership. [3-0]

NURS 460 (8) CONSOLIDATION PRACTICE EXPERIENCE. Extended practice in nursing. For Basic students only. [1-0-21]

NURS 501 (3) THEORETICAL AND CRITICAL THINKING IN NURSING. Critical analysis of nursing theory and foundations for reasoning in nursing practice.

NURS 502 (3) NURSING AND THE DELIVERY OF HEALTH CARE. The structures and process of health care delivery, health policy and other factors influencing nursing in the Canadian health care system.

NURS 503 (3) CONCEPTUAL KNOWLEDGE IN CLINICAL NURSING. Analysis of historical and theoretical development of knowledge within a substantive area of nursing practice.

NURS 504 (3) RESEARCH AND EVIDENCE-BASED PRACTICE.

NURS 505 (3) STATISTICAL LITERACY IN NURSING.

NURS 507 (3) PHARMACOLOGY AND THERAPEUTICS IN PRIMARY CARE.

NURS 508 (3) PATHOPHYSIOLOGICAL PROCESSES FOR NURSE PRACTITIONERS.

NURS 510 (6) ADVANCED HEALTH ASSESSMENT ACROSS THE LIFE SPAN.

NURS 520 (3) ADMINISTRATIVE LEADERSHIP IN NURSING. Study of organizational behaviour, management methods and administrative processes in health care.

NURS 530 (3) ADVANCED PRACTICE IN NURSING. Study of advanced practice nursing models, their development and implementation with a changing health care system. Prerequisite: All of NURS 501, NURS 502, NURS 503, NURS 504.

NURS 540 (3) EDUCATIONAL PROCESSES IN NURSING. Study of the historical development, theoretical basis, practical knowledge,

accountability of, and issues regarding curriculum process and teaching in nursing education or practice. Prerequisite: All of NURS 501, NURS 502, NURS 503, NURS 504.

NURS 541 (3) CLINICAL NURSING EDUCATION. Study of the theory and practice of clinical nursing education. Prerequisite: NURS 540.

NURS 550 (3) QUALITATIVE RESEARCH METHODS. Study of the expectations, foundations and methodological applications of established qualitative approaches to research. Prerequisite: NURS 504 or permission of instructor.

NURS 551 (3) QUANTITATIVE RESEARCH METHODS. Study of design, measurement, analysis, and interpretation in the quantitative research tradition. Prerequisite: All of EPSE 592, NURS 504. Permission of instructor is acceptable in lieu of NURS 504.

NURS 553 (3) ADVANCED METHODS IN QUALITATIVE FIELDWORK. Prerequisite: NURS 550.

NURS 554 (3) ADVANCED STUDIES IN QUANTITATIVE DESIGN. Prerequisite: All of NURS 551, EPSE 592 or equivalent. Corequisite: EPSE 596.

NURS 560 (3) THE POLITICS OF HEALTH POLICY. Prerequisite: NURS 502. Or permission of instructor.

NURS 577 (3-6) D GRADUATE PRACTICUM IN NURSING.

NURS 578 (3-9) D FAMILY NURSE PRACTITIONER CONSOLIDATED PRACTICUM.

NURS 580 (3) THE PHILOSOPHY OF EVIDENCE. Students not enrolled in the doctoral program require permission of instructor. Prerequisite: All of NURS 501, NURS 503, NURS 504.

NURS 581 (3) THE GENEALOGY OF NURSING KNOWLEDGE. Prerequisite: NURS 580.

NURS 585 (1-6) D SPECIAL TOPICS IN NURSING.

NURS 590 (3/6) C DIRECTED STUDIES IN NURSING. Prerequisite: All of NURS 501, NURS 502, NURS 503, NURS 504.

NURS 595 (3) M.S.N. MAJOR ESSAY.

NURS 599 (6) MASTER'S THESIS. Prerequisite: All of NURS 501, NURS 502, NURS 503, NURS 504, NURS 550, NURS 551.

NURS 601 (0) DOCTORAL SEMINAR.

NURS 690 (3/6) C DIRECTED STUDIES IN NURSING.

NURS 699 (0) PH.D. THESIS.

OBMS — ORAL BIOLOGICAL MEDICAL SCIENCES FACULTY OF DENTISTRY

OBMS 430 (2) UNDERSTANDING AND EVALUATING DENTAL RESEARCH. [1-0-0; 1-0-0]

OBMS 431 (2) ENDODONTICS. Application of the basic principles of endodontics. [0-1.5-0; 1-1.5-0]

OBMS 434 (4) INTRODUCTION TO ORAL AND MAXILLOFACIAL SURGERY. [3-1.5; 0-1.5]

OBMS 436 (1) ORAL RADIOLOGY. Radiographic techniques and radiological interpretation with emphasis on extraoral techniques. [.5-1.5]

OBMS 437 (2) PAIN AND ANXIETY CONTROL. [1-0-2]

OBMS 439 (3) ORAL MEDICINE AND ORAL DIAGNOSIS. Oral diagnosis, including orofacial pain and temporomandibular disorders. [1-3-0; 1-3-0]

OBMS 440 (1) ADVANCED TOPICS IN ORAL BIOLOGY. [1-0-0]

OBMS 441 (2) ADVANCED ENDODONTICS. [1-3-0; 0-1.5-0]

OBMS 443 (1) ORAL MEDICINE, ORAL DIAGNOSIS AND THERAPEUTICS. Assessment and treatment of advanced periodontal diseases. [1-2-2]

OBMS 444 (2) ADVANCED ORAL AND MAXILLOFACIAL SURGERY. [2-1.5]

OBMS 446 (1) ADVANCED ORAL RADIOLOGY AND ORAL RADIOGRAPHY.

OBMS 448 (2-6) D DIRECTED RESEARCH IN ORAL BIOLOGY. An elective laboratory project taken with the permission of the appropriate supervisor and the department head.

OBMS 449 (4) ADVANCED PERIODONTICS. Assessment and treatment of advanced periodontal diseases. [1-3-0]

OBST — OBSTETRICS AND GYNAECOLOGY FACULTY OF MEDICINE

OBST 430 (6) OBSTETRICS AND GYNAECOLOGY CLINICAL CLERKSHIP. Common problems in ambulatory care and surgical gynaecology. Clinical experience in the delivery of antenatal care including high-risk conditions, as well as intrapartum and postpartum care. Prerequisite: All of Medicine I and Medicine II.

OBST 501 (3) REPRODUCTIVE ENDOCRINOLOGY I. Neuroendocrine regulation of reproduction, regulation of the ovarian and testicular function.

OBST 502 (3) PHYSIOLOGY OF THE MOTHER, FETUS AND NEWBORN. Functional development of the placenta and major organ systems in the fetal and newborn period in man and animals.

OBST 503 (3) PERINATAL PHYSIOLOGY. Prerequisite: Knowledge of fetal growth and development, physiology, pathology of labour.

OBST 504 (3) REPRODUCTIVE ENDOCRINOLOGY II. Lectures and seminars on cellular processes in hormone secretion, steroid biosynthesis, steroid transport and metabolism, mechanism of hormone action, prostaglandins in reproduction.

OBST 505 (6) EXPERIMENTAL TECHNIQUES IN REPRODUCTIVE BIOLOGY. Laboratory course on: cell and organ cultures, radioimmunoassay of steroid and protein hormones and prostaglandins, in vitro fertilization, neuroendocrine techniques, techniques to study fetuses, techniques for metabolic studies in newborn animals.

OBST 506 (3) SEMINARS IN REPRODUCTIVE BIOLOGY.

OBST 549 (12) M.SC. THESIS.

OBST 649 (0) PH.D. THESIS.

OCCH — OCCUPATIONAL AND ENVIRONMENTAL HYGIENE SCHOOL OF OCCUPATIONAL AND ENVIRONMENTAL HYGIENE

OCCH 401 (3) INTRODUCTION TO OCCUPATIONAL HYGIENE AND SAFETY. Scientific basis for the recognition, evaluation, and control of chemical, physical, and biological hazards encountered in occupational settings; health and safety standards; exposure measurement methods; and evaluation strategies. Credit will be given for only one of OCCH 401 or OCCH 501. Prerequisite: Third- or fourth-year standing in the Faculty of Applied Science, Faculty of Science or one of the health sciences. Other upper-level students may enrol with the permission of the instructor. [3-0; 0-0]

OCCH 501 (3) PRINCIPLES OF OCCUPATIONAL AND ENVIRONMENTAL HYGIENE. Scientific basis for the recognition, evaluation, and control of chemical, physical, and biological hazards encountered in occupational settings; health and safety standards; exposure measurements methods and evaluation strategies. Equivalency: HCEP 535. [3-0-0; 0-0-0]

OCCH 502 (3) CHEMICAL AND BIOLOGICAL HAZARD MEASUREMENT. Industrial hygiene and environmental exposure monitoring, methods, and instrumentation; theory of atmospheric and biological sampling and analysis. Laboratories demonstrate workplace sampling and analysis techniques. Prerequisite: OCCH 501. [0-0; 2-3]

OCCH 503 (3) CHEMICAL AND BIOLOGICAL HAZARD CONTROL. Design and evaluation of control strategies for occupational and environmental exposure. Engineering control methods; design of industrial ventilation systems; substitution and isolation strategies; administrative control measures; personal protective equipment. Corequisite: OCCH 501. [3-2*]

OCCH 504 (3) ADVANCED OCCUPATIONAL AND ENVIRONMENTAL HYGIENE ISSUES. Sampling strategies for compliance, determinants of exposure and epidemiology; workers' compensation; environmental law; communication, ethics and labour management interaction in the practice of occupational and environmental hygiene. Prerequisite: Completion of first year coursework. [3-0; 0-0]

OCCH 505 (1.5/3) C ERGONOMICS. Human factors in workplace design, anthropometry, work physiology.

OCCH 506 (3) OCCUPATIONAL HYGIENE PRACTICE. Application of occupational hygiene principles to actual worksites; using field investigations and interactive seminars on evaluation strategies, critical appraisal of results, and communication with labour and management. Prerequisite: All of OCCH 502, OCCH 503. [2-3; 0-0]

OCCH 507 (1.5) RESEARCH METHODS IN EXPOSURE ASSESSMENT AND EPIDEMIOLOGY. Assessment of occupational and environmental exposure for research purposes; introduction to epidemiology. Prerequisite: One of OCCH 501, HCEP 535 and introductory statistics.

OCCH 508 (1.5/3) D SAFETY. Safety management; systems analysis; accident investigation; collection of accident data; fault trees; total loss control.

OCCH 510 (3) TOPICS IN ENVIRONMENTAL HEALTH. Role of air, water, food, and solid waste as sources of human health risks; global environmental health issues; sustainability. Equivalency: HCEP 522.

OCCH 511 (1.5) OCCUPATIONAL HEALTH AND ILLNESS PROCESSES. Common occupational diseases; research issues, historical perspectives and measurement issues. [0-0-0; 1.5-0-0]

OCCH 512 (3) QUANTITATIVE METHODS FOR THE ASSESSMENT AND ANALYSIS OF EXPOSURE DATA. Sampling strategies, analysis of exposure data, determinants of exposure. Required course. Prerequisite: Introductory statistics or permission of instructor.

OCCH 530 (1.5-6) D DIRECTED STUDIES.

OCCH 540 (1.5) RESEARCH SEMINAR. [1.5-0; 1.5-0]

OCCH 550 (1.5-6) D SPECIAL TOPICS. Special projects or advanced courses may be arranged for graduate students upon the approval of the program director.

OCCH 595 (0) OCCUPATIONAL AND ENVIRONMENTAL HYGIENE SEMINAR. Current occupational and environmental hygiene related research; issues in hygiene program management. [1-0; 1-0]

OCCH 598 (6) OCCUPATIONAL AND ENVIRONMENTAL HYGIENE PROJECT. Applied occupational or environmental hygiene project on approved topic based on practicum: requires a written and oral report.

OCCH 599 (12) M.SC. THESIS.

OCCH 640 (1.5) DOCTORAL RESEARCH-IN-PROGRESS SEMINAR.

OCCH 699 (0) PH.D. THESIS.

OHS — ORAL HEALTH SCIENCES FACULTY OF DENTISTRY

OHS 430 (4) OPERATIVE DENTISTRY. The art and science of diagnosing and treating single tooth defects. [0-4.5-0; 0-4.5-0]

OHS 431 (3) ORTHODONTICS. Differential diagnosis, treatment planning, biomechanical principles and clinical treatment. [1-2-0; 1-2-0]

OHS 432 (4) PEDIATRIC DENTISTRY. [0-4.5-0; 1-4.5-0]

OHS 434 (2) BEHAVIOURAL SCIENCES IN DENTISTRY. [1-0-0; 1-0-0]

OHS 435 (8) PROSTHODONTICS I. The art and science of restoring and replacing teeth and surrounding tissues. [2-5-0; 1-9-0]

OHS 440 (2) ADVANCED OPERATIVE DENTISTRY. The art and science of diagnosing and treating single tooth defects. Prerequisite: OHS 430. [0-3-0; 0-3-0]

OHS 441 (3) ADVANCED ORTHODONTICS. [1-2-0; 0-3-0]

OHS 442 (1) ADVANCED PEDIATRIC DENTISTRY. [0-3-0]

OHS 444 (4) PRACTICE MANAGEMENT. Ethics, jurisprudence, practice management, intra- and interprofessional relationships. [2-0-0; 2-0-0]

OHS 445 (8) PROSTHODONTICS II. The art and science of restoring and replacing teeth and surrounding tissues. [1-9-0; 0-12-0]

ONCO — ONCOLOGY FACULTY OF MEDICINE

ONCO 501 (3) INTERDISCIPLINARY RESEARCH IN ONCOLOGY.

ONCO 502 (3) CONCEPTS IN ONCOLOGY.

ONCO 510 (3) SEMINARS IN ONCOLOGY.

ONCO 549 (12) MASTER OF SCIENCE THESIS.

ONCO 649 (0) PH.D. THESIS.

OPTH — OPHTHALMOLOGY FACULTY OF MEDICINE

OPTH 450 (1) OPHTHALMOLOGY. Third-year Medicine Students only. An introduction to Clinical Ophthalmology: four morning sessions introducing the third-year Medical Students to basic ophthalmic history, clinical symptoms, signs and patient management.

ORNT — ORIENTATION TO MEDICAL SCHOOL FACULTY OF MEDICINE

ORNT 400 (2) ORIENTATION TO MEDICAL SCHOOL AND PROFESSION. A general introduction to the medical school including beliefs and values embedded within the curriculum. The overall curricular design and expectations regarding evaluation are discussed.

ORPA — ORTHOPAEDICS FACULTY OF MEDICINE

ORPA 430 (2) ORTHOPAEDICS. Musculoskeletal pathology, including baseline levels of knowledge, skill and attitude, plus surgical exposure to orthopaedic injuries and management.

ORPA 508 (2) ADVANCED ORTHOPAEDICS I. Selected topics in orthopaedic surgery and related basic sciences. Given in alternate years.

ORPA 509 (2) ADVANCED ORTHOPAEDICS II. The second year of the above program which will be given in alternate years.

ORPA 715 (0) ORTHOPAEDIC CLINIC. Evaluation of new patients and diagnosis and treatment of appropriate diseases. Basic signs and clinical features are both stressed in the total management of the patient. Two hours per week in the Outpatient Department under supervision of an orthopaedics faculty member.

ORPA 716 (0) ORTHOPAEDIC BEDSIDE CLINIC. Evaluation of orthopaedic diseases and injuries in patients at bedside. A review of clinical features is correlated with relevant physiology and pathology.

ORPA 717 (0) ORTHOPAEDIC GRAND ROUNDS. Formal presentations by the orthopaedic residents, fellows, faculty and guests. Subject matter includes the whole spectrum of orthopaedics.

ORPA 718 (0) RHEUMATOLOGY CONFERENCE. Patients with a variety of rheumatological disorders are presented for discussion and evaluation in this combined conference, which rheumatologists and orthopaedic surgeons who have a special interest in reconstructive surgery attend. During each weekly two hour session, patients with difficult management problems are presented for clinical evaluation and discussion of medical and orthopaedic treatment.

ORPA 719 (0) ORTHOPAEDIC SURGICAL ANATOMY. A course in clinical anatomy as applied to orthopaedics. A regional approach involving surgical dissections in cadavers. Each session lasts two hours. Emphasis is on surgical anatomical approach.

ORPA 720 (0) ORTHOPAEDIC BASIC SCIENCE COURSE. Weekly lectures by orthopaedic faculty and guest faculty from other departments. Lecture topics include applied physiology, anatomy, and pathology as they relate to orthopaedic diseases.

ORPA 721 (0) ORTHOPAEDIC SEMINARS. A series of seminars is given weekly, and during each 2-hour session a topic in clinical orthopaedics is reviewed. The subject matter includes the whole spectrum of orthopaedics. One or more faculty members are in attendance at each seminar.

ORPA 722 (0) PAEDIATRIC ORTHOPAEDICS. Case presentation in paediatric orthopaedics, stressing history, physical findings and total management of the patient, including a review of paediatric fractures with x-rays.

ORPA 723 (0) ORTHOPAEDIC SURGERY. The practical application of orthopaedics in the operating room with discussion of techniques of surgery, anatomy, pathology, pathophysiology and complications of diseases.

ORPA 724 (0) TRAUMA ROUNDS. Orthopaedic traumatology is reviewed, with emphasis being placed on applied basic science, surgical anatomy, diagnosis and definitive management. These sessions are supervised by a faculty member and are held weekly, each session lasting one hour.

ORPA 725 (0) BONE TUMOUR REGISTRY. A review of musculoskeletal oncology and related problems with presentation of clinical and laboratory information, radiographs and pathological materials. One and one-half hours monthly.

ORPA 904 (0) SEMINAR IN ORTHOPAEDICS. A series of 60 seminars in orthopaedics and traumatic surgery given over a two-year period: thirty sessions in each of the two years. One evening per week throughout the Winter Session. For post-graduate students proceeding to Certification and Fellowship of the Royal College of Physicians and Surgeons of Canada.

PAED — PAEDIATRICS FACULTY OF MEDICINE

PAED 430 (8) PAEDIATRICS. Students are assigned to the Department of Paediatrics for eight-weeks. The eight weeks are divided into two blocks, four weeks providing an in-patient experience and four weeks in ambulatory clinics. Specific clinical teaching is taught in small groups and an Academic Half-Day each week supplies a series of lectures and seminars. The emphasis is on the acquisition of clinical skills and a knowledge base of general paediatrics. Clinical duties include patient histories, physical examinations, participation in investigation and management, following patient progress, taking part in daily rounds, and night call. Evaluations include a clinical evaluation, written examinations and a four station objective structured clinical examination.

PATH — PATHOLOGY FACULTY OF MEDICINE

PATH 300 (6) BACKGROUND TO MEDICAL LABORATORY SCIENCE. Introductory lectures and laboratory sessions in clinical chemistry, haematology and blood banking, hospital microbiology, preparation and examination of tissue sections. For Medical Laboratory Science students without previous experience in hospital laboratories. Prerequisite: All of BIOL 112, BIOL 200, BIOL 201, CHEM 123, CHEM 205, CHEM 233, CHEM 235, MICB 202. [3-4; 0-0]

PATH 301 (4) BASIC AND PHYSICAL BIOCHEMISTRY FOR MEDICAL LABORATORY SCIENTISTS. An integrated approach to specific areas of the theoretical and practical aspects of those physical and biological sciences relevant to medical laboratory science. Emphasis will be placed upon the application of basic science to those clinical

disciplines practised by the medical laboratory scientist, e.g., histochemistry, clinical chemistry, microbiology, haematology, etc.

PATH 303 (4) CYTOGENETICS, TISSUE CULTURE & CYTOLOGY. Tissue culture techniques in clinical diagnosis; cytological techniques used in the diagnosis and control of cancer. Sex chromatin determination.

PATH 304 (4) NORMAL HUMAN HISTOLOGY. An advanced lecture and laboratory course in the microscopic structure of the human body necessary for a complete understanding of histochemistry and histopathology.

PATH 305 (4) MODERN MICROSCOPY. A lecture and laboratory course in the theoretical and practical application of modern biological microscopes – compound, dissecting, comparison, dark ground, fluorescent, phase contrast, interference and electron microscopes.

PATH 306 (2) NUCLEAR MEDICINE FOR MEDICAL LABORATORY SCIENTISTS. Introductory Nuclear Medicine with specific reference to the Pathology laboratory.

PATH 327 (6) BACTERIOLOGY, MYCOLOGY, VIROLOGY AND PARASITOLOGY. Descriptions of each group of human microbial pathogens according to biological attributes, clinical features, pathogenesis and pathology, epidemiology, immunological reactions, laboratory diagnosis, principles of antimicrobial therapy, preventative measures. For students in the Faculty of Medicine B.M.L.Sc.

PATH 375 (3) INTRODUCTION TO HUMAN PATHOLOGY. A lecture-demonstration course designed to acquaint students in the allied health professions with a basic understanding of the causes, natural history, and pathophysiology of common disease processes. Prerequisite: 6 credits each first year BIOL and CHEM

PATH 402 (4) MEDICAL LABORATORY SCIENCE: HAEMATOLOGY. A theoretical and practical examination of those modern concepts of haematology which relate to the practice of medical laboratory science.

PATH 404 (6) DIAGNOSTIC HISTOCHEMISTRY. A lecture and laboratory course that encompasses the theory and the practice of currently available histochemical techniques. This course is to supplement the histopathological technique course taken as a requirement for CSLT (RT). Prerequisite: Certification.

PATH 405 (2) SEMINARS IN CURRENT TOPICS. This seminar course is intended to train students in the oral presentation of scientific papers and make them critically aware of the current literature. They will be assigned, on a rotational basis, current issues of journals in the field of laboratory medicine. In consultation with faculty they will select one or more papers for review in a 15–20 minute presentation. The presentation will be followed by a general discussion.

PATH 406 (6) CLINICAL CHEMISTRY. This course will review and discuss the methodology of clinical chemistry in order to put these

analytical methods into the broad perspective of the pathophysiology of human disease and biochemistry.

PATH 407 (4) MEDICAL LABORATORY TOXICOLOGY: ANALYTICAL, CLINIC. A theoretical and practical examination of analytical and pathophysiological aspects of clinical and forensic toxicology. Prerequisite: Prerequisites for students not registered in the B.M.L.Sc. program: BIOC 300, CHEM 311 and PATH 375.

PATH 408 (3) LABORATORY ADMINISTRATION. Personnel management, staff management relationships, stock control, record keeping, etc. Medicolegal aspects of medical laboratory science. Theory and practice of quality control. Use of computers in the medical laboratory.

PATH 415 (2) IMMUNOPATHOLOGY. Immunological events causing tissue injury.

PATH 417 (3) BACTERIAL INFECTION IN HUMANS. Explores the virulence factors of the microorganism and the pathophysiology of the host response. Working in small groups online, students direct their learning using cases presented over the internet. Prerequisite: MICB 202.

PATH 427 (3) BASIC PRINCIPLES OF INFECTION PREVENTION AND CONTROL. This course provides the basic principles to prevent the spread of microorganisms pathogenic to humans. It may be taken towards a Certificate in Infection Control.

PATH 437 (3) VIRAL INFECTIONS IN HUMANS. Interactions between viruses and humans; pathogenesis; prompt virological diagnosis; rationale for antiviral chemotherapy and prophylaxis. Equivalency: MICB 407. [3-0-0]

PATH 438 (2-6) C MEDICAL LABORATORY SCIENCE: DIRECTED STUDIES. Investigation of a specific topic in Medical Laboratory Science. Permission of the department head is required.

PATH 447 (3) DIRECTED STUDIES. An elective in clinical infection control, medical microbiology or molecular biology. Prerequisite: All of PATH 427, PATH 467.

PATH 448 (2) INTRODUCTION TO LABORATORY MEDICINE. An elective course open to first-year medical students who spend at least three consecutive hours each week in one of the affiliated hospitals of the Department of Pathology, Vancouver Hospital, under the joint supervision of a Senior Resident in Pathology and the Professional Staff of the following Divisions: anatomical pathology, clinical biochemistry, haematology, paediatric pathology. Enrolment is limited.

PATH 450 (0) SYSTEMIC PATHOLOGY. A series of Pathology discussions in conjunction with various clinical departments designed to illustrate the role of Pathology in the diagnosis and management of various diseases.

PATH 451 (3) CLERKSHIP IN LABORATORY MEDICINE AND INFECTION PREVENTION AND CONTROL. May involve attendance at an approved institution and/or a project assigned by the instructor(s). Instructor permission required. Enrolment may be limited.

PATH 452 (3) CLERKSHIP IN ANATOMIC PATHOLOGY. An elective course open to third-year medical students, designed to familiarize the student with Anatomic Pathology, including Surgical Pathology, Paediatric Pathology, Autopsy Pathology and Cytology. This elective may involve attendance at one or more affiliated hospitals. Registration requires consent of the Department and enrolment may be limited.

PATH 453 (0) CLINICAL LABORATORY HAEMATOLOGY. Correlative seminars based on haematology case studies relating clinical features to laboratory investigations. Equivalency: MEDI 452.

PATH 457 (3) CLINICAL LABORATORY MICROBIOLOGY. Selected clinical laboratory exercises plus seminars to illustrate the diagnosis and management of patients with microbial infections. Elective course limited to third- and fourth-year medical students. Prerequisite: Departmental approval required.

PATH 467 (3) BASIC MICROBIOLOGY FOR INFECTION CONTROL. The identification, clinical significance, and transmission of pathogenic organisms are presented. This course is available by correspondence or webCT. It may be taken towards fulfillment of the Certificate in Infection Control.

PATH 477 (3) BASIC EPIDEMIOLOGY FOR INFECTION CONTROL. Epidemiology, study, design and analysis, and outbreak investigation as it applies to institutional infection control. Equivalency: HCEP 401.

PATH 500 (2-6) D GENERAL PRINCIPLES OF PATHOLOGY. Experimental pathology (2) and general principles of etiology, pathogenesis, disordered physiology and anatomic pathology of common disease processes.

PATH 518 (2-4) C PULMONARY PATHOPHYSIOLOGY. A review of current topics in pulmonary pathophysiology at an advanced level suitable for graduate students majoring in pathology, medicine, surgery or anaesthesiology. Topics will include lung anatomy, ventilation, blood flow, gas and fluid exchange. Prerequisite: One of PHYL 301, PHYL 303, PHYL 400.

PATH 521 (6) INTRODUCTION TO THE PATHOGENESIS OF HUMAN DISEASE. A lecture/laboratory course reviewing current areas of medical research focusing mainly on cardiovascular and pulmonary disease. Requires instructor permission.

PATH 523 (3) PRINCIPLES OF ANTIMICROBIAL CHEMOTHERAPY. Classification, structure and mode of action of antimicrobial agents. In-depth comparison of factors affecting the activity of antimicrobials in vivo and in vitro. Prerequisite: All of MICB 200, PATH 427.

PATH 527 (2-4) D BACTERIOLOGY, MYCOLOGY, VIROLOGY AND PARASITOLOGY. All groups of microorganisms pathogenic for humans. Clinical features, pathogenesis and pathology, epidemiology, properties of the agents, immunology, laboratory diagnosis, therapy, preventative measures.

PATH 530 (3) NUTRITION AND METABOLIC ASPECTS OF HUMAN DISEASE. Molecular effects of changes in nutrient status and metabolism on health. Prerequisite: Restricted to students registered in the Pathology Graduate Program or instructor approval required.

PATH 531 (3) MOLECULAR AND CELL BIOLOGY OF CANCER. This course focuses on molecular and cell biology of cancer and consists of a series of lectures/reviews combined with discussions and presentations by students on the topics selected by the instructors. Emphasis will be on students' presentations and discussion. Prerequisite: MEDG 421 is recommended. Course coordinator approval is required. Equivalency: MEDG 521. [0-0; 3-0]

PATH 535 (2) SEMINAR. Attendance required of all M.Sc. candidates in the Department.

PATH 547 (3) TECHNIQUES IN MOLECULAR BIOLOGY AND EXPERIMENTAL PATHOLOGY. Nucleic acid purification and characterization; restriction enzyme digests; northern and southern blotting; cloning; DNA sequencing; polymerase chain reaction technology; electron microscopy; fluorescein-activated cell sorting. [0-0; 0-6]

PATH 548 (1-12) C DIRECTED STUDIES.

PATH 549 (18) M.SC. THESIS.

PATH 582 (3) TOXICOLOGY III – ENVIRONMENTAL TOXICOLOGY. Toxicology and risk assessment of air, water and soil pollutants; food additives; animal and plant toxins; pesticides; heavy metals; solvents. Equivalency: PHAR 582. [3-0-0]

PATH 583 (3/4) D TOXICOLOGY IV – MOLECULAR MECHANISMS OF TOXICOLOGY. Activation versus detoxification by cytochromes P-450; the role of the Ah receptor; reactive oxygen species; heavy metals; apoptosis. Equivalency: PHAR 583. [3-0-0]

PATH 635 (2) SEMINAR. Attendance required for all Ph.D. candidates in the department.

PATH 649 (0) PH.D. THESIS.

PATH 720 (0) MICROBIOLOGICAL DIAGNOSIS. Conduct of bacterial, fungal, parasitological, and viral laboratory tests relevant to the microbiological examination of patients. For medical residents.

PATH 721 (0) MICROBIOLOGICAL RESEARCH. Conduct of research on some aspect of clinical or basic microbiology. For medical residents.

PATH 722 (0) MICROBIAL INFECTIONS. Review in depth of syndromes caused by common human pathogenic bacteria, fungi and viruses, including principles of current laboratory diagnostic procedures and the rational use

of antibiotics and prophylactic agents. For medical residents.

PATH 725 (0) HISTOPATHOLOGY OF INFECTIOUS DISEASES. Gross and microscopic changes associated with infections, and the pathophysiology involved in their development. The course includes seminars based on histological specimens. For residents in Medical Microbiology, General and Anatomical Pathology, and Infectious Diseases.

PATH 730 (0) CLINICAL NUCLEAR MEDICINE. See RADI 710.

PATH 731 (0) PROGRESS IN NUCLEAR MEDICINE. See RADI 711.

PATH 732 (0) CLINICAL INVESTIGATION/RESEARCH. See RADI 712.

PATH 733 (0) QUALITY CORRELATION IN NUCLEAR MEDICINE. See RADI 713.

PCTH — PHARMACOLOGY AND THERAPEUTICS FACULTY OF MEDICINE

PCTH 300 (6) INTRODUCTION TO PHARMACOLOGY. The concepts, language and techniques of scientific pharmacology. Intended primarily for Honours and Major students in Pharmacology. Prerequisite: Either (a) all of BIOL 200, BIOL 201, CHEM 233, CHEM 235 or (b) all of BIOL 200, BIOL 201, CHEM 203, CHEM 204; and CHEM 211 and one of CHEM 205, CHEM 201. Permission of the undergraduate adviser is required. [3-3-0; 3-3-0]

PCTH 302 (3) INTRODUCTORY PHARMACOLOGY LABORATORY. A series of experimental demonstrations and individual laboratory experiments illustrating the basic principles of pharmacology. Corequisite: PCTH 300. [1-3*; 1-3*]

PCTH 305 (6) BASIC HUMAN PHARMACOLOGY. Lectures and assigned reading on the effects, mechanisms of action, absorption, distribution, fate and excretion of major classes of therapeutic agents. Indications for the use of particular drugs will be discussed in terms of risk versus benefit for the individual and for society. Corequisite: All of BIOC 302, PHYL 301. [3-0; 3-0]

PCTH 325 (3) RATIONAL BASIS OF DRUG THERAPY. The principles and applications underlying the action and disposition of therapeutic agents (including alternative medicines) in the body. Use of drugs as tools in experimental research. Prerequisite: BIOL 201. [3-0-0]

PCTH 398 (3) CO-OPERATIVE WORK PLACEMENT I. Approved and supervised technical work experience in an industrial research setting for a minimum of 3.5 months. Technical report required. Restricted to students admitted to the Co-operative Education Program in Pharmacology. Prerequisite: PCTH 300.

PCTH 399 (3) CO-OPERATIVE WORK PLACEMENT II. Approved and supervised technical work experience in an industrial research setting for a minimum of 3.5 months. Technical report required. Restricted to

students admitted to the Co-operative Education Program in Pharmacology. Prerequisite: PCTH 398.

PCTH 400 (6) SYSTEMATIC PHARMACOLOGY. Lectures and discussions in scientific pharmacology. All aspects of the study of drugs will be covered, but the course will concentrate on the scientific aspects of the pharmacology of neurohumoral transmission, mathematics of pharmacology, cardiovascular and clinical pharmacology, and to a lesser extent on the pharmacology of various organs and tissues. Prerequisite: PCTH 300. [3-0-1*; 3-0-1*]

PCTH 402 (6) SYSTEMATIC PHARMACOLOGY LABORATORY. A series of demonstrated, group, and individual laboratory experiments designed to illustrate the concepts and hypotheses of pharmacology. The course is restricted to Honours students in Pharmacology, but may be taken by others with permission of the department head. Prerequisite: PCTH 300. [0-9; 0-9]

PCTH 404 (3) DRUG ASSAY AND PHARMACOMETRICS. The techniques, including methods of statistical analysis, used to detect and measure the actions of endogenous or exogenous chemicals, using chemical assays and bioassays as appropriate. Enrolment limited to students in Pharmacology and others with permission of the department head. Prerequisite: All of PCTH 300, BIOL 300. [1-0; 2-0]

PCTH 425 (8) MEDICAL PHARMACOLOGY. A lecture and laboratory course covering the fundamental pharmacological action of drugs. Both terms.

PCTH 448 (2-6) C DIRECTED STUDIES IN PHARMACOLOGY. Advanced investigation of a specific topic in Pharmacology.

PCTH 449 (3/6) D HONOURS THESIS. A research problem directed by a faculty member. Restricted to Honours students.

PCTH 451 (3) REVIEW OF CLINICAL PHARMACOLOGY. This course has been designed as a basic science elective for third-year medical students. Prerequisite: Departmental approval required.

PCTH 453 (2) ADVANCED THERAPEUTICS. A lecture, assigned problems, and discussion course dealing with practical aspects of therapeutics. This course is designed to give fourth-year medical students some practical experience in the science of drug prescribing.

PCTH 498 (3) CO-OPERATIVE WORK PLACEMENT III. Approved and supervised technical work experience in an industrial research setting for a minimum of 3.5 months. Technical report required. Restricted to students admitted to the Co-operative Education Program in Pharmacology. Prerequisite: PCTH 399.

PCTH 499 (3) CO-OPERATIVE WORK PLACEMENT IV. Approved and supervised technical work experience in an industrial research setting for a minimum of 3.5 months. Normally taken during the summer after fourth

year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Pharmacology. Prerequisite: PCTH 498.

PCTH 500 (3) MOLECULAR ASPECTS OF DRUG ACTION AT THE MEMBRANE LEVEL. Lectures, discussions and assigned reading on actions of drugs on ion channels, receptors and intracellular processes and the methodologies used including electrophysiology, fluorescence measurements, molecular neurobiology and microdialysis. Given in even-numbered and alternate years.

PCTH 501 (3) STRUCTURE-ACTIVITY RELATIONSHIPS IN PHARMACOLOGY. Lectures, discussions and assigned reading on physicochemical approaches to drug design – the relationship between molecular structure and pharmacological activity in various representative classes of drugs. Given in odd-numbered and alternate years.

PCTH 502 (4) DRUGS AND INTERCELLULAR COMMUNICATION (INCLUDING NEUROPHARMACOLOGY). Lectures, discussions and assigned reading on the actions of drugs on the production, release and cellular effects of hormones and neurotransmitters. Given in odd-numbered and alternate years.

PCTH 512 (3) EXPERIMENTAL DESIGN AND ANALYSIS IN PHARMACOLOGY. A series of lectures, tutorials and exercises designed to improve student skills in the design and statistical analyses of pharmacological experiments.

PCTH 513 (4) PHARMACOLOGY OF ANAESTHESIA. Pharmacology of drugs used in anaesthesia. Conferences, assigned reading and laboratory exercises demonstrating the actions of drugs as currently applied in the practice of anaesthesia. Prerequisite: Permission of the department head is required.

PCTH 514 (1) SEMINAR IN PHARMACOLOGY OR THERAPEUTICS. To give students experience in the presentation of data and to enhance communication skills in the discussion of scientific topics. All students will present at least one seminar during their graduate work and would be expected to attend all seminars.

PCTH 548 (2-6) C DIRECTED STUDIES IN PHARMACOLOGY. In special cases, with the approval of the department head, advanced courses may be arranged.

PCTH 549 (12) M.SC. THESIS.

PCTH 649 (0) PH.D. THESIS.

PETE — PHYSICAL EDUCATION – TEACHER EDUCATION FACULTY OF EDUCATION

PETE 300 (3) TEACHING AND LEARNING PHYSICAL EDUCATION ACROSS THE CURRICULUM: ELEMENTARY. An interdisciplinary approach toward integrating physical education in the school curriculum; principles and methods of instruction for classroom teachers. [3-0-0]

PETE 314 (4/5) D CURRICULUM AND INSTRUCTION IN PHYSICAL EDUCATION: SECONDARY. Pass/Fail. Prerequisite: A completed concentration in physical education or permission of the head.

PETE 320 (2) CURRICULUM AND INSTRUCTION IN PHYSICAL EDUCATION: ELEMENTARY. Curriculum organization in physical education; principles and methods of instruction applied to teaching physical education. Pass/Fail. [1-2-0]

PETE 380 (3) TEACHING ADVENTURE ACTIVITIES IN THE OUTDOORS. An interdisciplinary focus in methodology and program planning. Costs for field trips and an overnight experience are borne by students. [1-2]

PETE 400 (3) ELEMENTARY SCHOOL PHYSICAL EDUCATION: CURRICULUM TOPICS. Prerequisite: One of PETE 300, PETE 320. [3-0-0]

PETE 401 (3) ELEMENTARY SCHOOL PHYSICAL EDUCATION: INSTRUCTION. Prerequisite: One of PETE 300, PETE 320. [3-0-0]

PETE 480 (3) ADVANCED METHODOLOGY IN OUTDOOR ENVIRONMENTAL EDUCATION. Using the outdoor environment as an educational setting for experiential and integrative learning. Costs for field trips and an overnight experience are borne by students. Prerequisite: PETE 380 or permission of the instructor.

PETE 508 (3/6) D REVIEW OF RESEARCH IN KINESTHETIC LEARNING. Studies are made of recent research bearing on educational practice. Prerequisite: Appropriate senior undergraduate introductory or methods course.

PETE 545 (3) MOVEMENT ACROSS THE CURRICULUM. Developing an integrated approach toward curriculum planning and instruction by utilizing principles of kinesthetic learning and concepts of movement education. Prerequisite: PETE 508.

PETE 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD. Courses on various topics designed to bring teachers up to date in recent findings in the field.

PETE 580 (3/12) C PROBLEMS IN EDUCATION.

PETE 585 (3) HEALTH PROMOTION, WELLNESS AND LIFESKILLS IN OUTDOOR SETTINGS.

PETE 590 (3) GRADUATING PAPER.

PETE 598 (3/12) D FIELD EXPERIENCES. For those on Master's, Doctoral and Diploma programs.

PETE 599 (6/12) D MASTER'S THESIS.

PHAR — PHARMACEUTICAL SCIENCES FACULTY OF PHARMACEUTICAL SCIENCES

PHAR 200 (4) PROFESSIONAL PRACTICE II. Professional relationships; interactions with patients and with other health care providers. Patterns of medication use and abuse in society;

the detection and resolution of medication problems. Corequisite: PHAR 311. [2-3*-0]

PHAR 201 (3) PHARMACIST, PATIENT AND SOCIETY. The Canadian health care system, the pharmacist-patient relationship, and contemporary trends and standards in pharmacy practice. [3-0-0]

PHAR 202 (2) PHARMACY SKILLS I. Legal, technical and professional aspects of dispensing prescriptions and providing pharmaceutical care, primarily for community pharmacy practice. Corequisite: PHAR 201. [0-3*-3*]

PHAR 220 (3) PHYSICOCHEMICAL PROPERTIES OF DRUGS. Drug discovery, physicochemical principles, theory of spectroscopy and chromatography, chemical stability. [3-0-0]

PHAR 240 (3) PHARMACOLOGY FOR NURSES. A study of the effects, side effects, mechanism of action and interaction of drugs. Primarily intended for students in second-year nursing. [3-0-0]

PHAR 241 (2) FOUNDATIONS OF PHARMACOLOGY. An introduction to general principles and concepts of drug action in selected systems. [2-0-0]

PHAR 299 (3) CASES IN PHARMACEUTICAL SCIENCES I. Case studies, laboratory exercises, and tutorials intergrading scientific and clinical concepts. [0-0-3; 0-0-3]

PHAR 300 (4) PROFESSIONAL PRACTICE III. Development of pharmaceutical care practice skills; drug problem identification in patients and selected disease states; critical thinking, self-directed learning and problem-solving skills. Preparation for structured practice experiences. Prerequisite: Successful completion of all required courses in the first two years of the pharmacy curriculum. [2-3*-0; 2-3*-0]

PHAR 301 (3) SELF-MEDICATION PRODUCTS. A study of non-prescription medications for the self-medicating patient. The pharmacist's role in recommending safe and effective drug preparations will be emphasized. Prerequisite: Successful completion of all required courses of the first two years of the pharmacy program. [3-0-0]

PHAR 302 (3) PHARMACEUTICAL CARE. Overview of the pharmaceutical care model of practice; introduction to home health care products and drug information techniques. Prerequisite: PHAR 201. Corequisite: PHAR 303. [3-0-0]

PHAR 303 (2) PHARMACY SKILLS II. Legal, technical and professional aspects of dispensing prescriptions and providing pharmaceutical care, primarily for community pharmacy practice. Prerequisite: PHAR 202. Corequisite: PHAR 302. [0-3*-3*]

PHAR 311 (4) DRUG DELIVERY SYSTEMS II. Principles of the design, preparation and evaluation of parenteral, intrapulmonary, dermal, ophthalmic, otic, nasal, rectal and vaginal drug delivery systems. [2-3*-0]

PHAR 315 (4) PHARMACOKINETICS.

Pharmacokinetics and clinical applications of pharmacokinetic principles. Prerequisite: All of PHAR 321, PHAR 341. [4-0-0]

PHAR 321 (3) BIOPHYSICAL PHARMACY I. Applications of the physical chemical properties of drugs to oral drug delivery systems. Prerequisite: PHAR 220. Corequisite: PHAR 322. [3-0-0]

PHAR 322 (1) BIOPHYSICAL PHARMACY LABORATORY I. Analytical techniques for the assay of biological systems, drugs and drug products. Prerequisite: PHAR 220. Corequisite: PHAR 321. [0-3-0]

PHAR 323 (3) BIOPHYSICAL PHARMACY II. Applications of the physical chemical properties of drugs to non-oral drug delivery systems. Prerequisite: All of PHAR 321, PHAR 322. [3-0-0]

PHAR 325 (4) PHARMACEUTICAL ANALYSIS. An introduction to quality control methods used to analyse drugs including: aqueous, non-aqueous, redox, compleximetric and potentiometric, titrimetry, colorimetric, fluorometric, ultra-violet and infrared spectroscopy; paper, column thin-layer, gas-liquid, and high-pressure-liquid chromatography; biochemical tests and the use of radioisotopes in Pharmacy. [4-3-0]

PHAR 330 (2) BIOMOLECULAR PHARMACEUTICAL CHEMISTRY I. Application of genetic information to drug therapy. Prerequisite: PHAR 321. Corequisite: All of BIOC 300, PHAR 315. [2-0-0]

PHAR 341 (3) PHARMACOLOGY I. Pharmacological principles and the pharmacology of selected agents. Prerequisite: All of PHAR 241, PHYL 301, PHYL 302. Corequisite: All of PHAR 351, PHAR 361, PHAR 371. [3-0-0]

PHAR 342 (2) PHARMACOLOGY II. Principles of chemotherapy and drug resistance and the pharmacology of selected drug classes. Prerequisite: PHAR 341. Corequisite: All of PHAR 352, PHAR 362. [2-0-0]

PHAR 351 (2) THERAPEUTICS I. Rational drug therapy, management of patient-specific drug-related problems and therapeutic monitoring of selected disease states. Corequisite: All of PHAR 341, PHAR 361, PHAR 371. [2-0-0]

PHAR 352 (2) THERAPEUTICS II. Rational drug therapy, management of patient-specific drug-related problems and therapeutic monitoring of selected disease states. Prerequisite: PHAR 351. Corequisite: All of PHAR 342, PHAR 356. [2-0-0]

PHAR 360 (3) INTRODUCTION TO PHARMACEUTICAL BIOTECHNOLOGY. An introduction to recombinant DNA technology used in the design and production of agents for the prevention, diagnosis and treatment of disease and a discussion of the ethical, economic and societal issues associated with these agents. [3-0-0]

PHAR 361 (1) NON-PRESCRIPTION DRUGS AND NATURAL HEALTH PRODUCTS I. The use of non-prescription drugs and natural health products for selected conditions. Corequisite: All of PHAR 341, PHAR 351. [1-0-0]

PHAR 362 (1) NON-PRESCRIPTION DRUGS AND NATURAL HEALTH PRODUCTS II. The use of non-prescription drugs and natural health products for selected conditions. Prerequisite: PHAR 361. Corequisite: All of PHAR 342, PHAR 352. [1-0-0]

PHAR 369 (3) STRUCTURED PRACTICAL EXPERIENCE I. Prerequisite: Promotion to third year.

PHAR 370 (4) DRUGS: CHEMISTRY, PHARMACOLOGY AND THERAPEUTICS I. Pharmacological, chemical and physical principles of defined groups of drugs; the relationship of chemical structure to biological activity; the treatment with these drugs of diseases commonly encountered in pharmacy practice. Drug groups will include those affecting the autonomic nervous system, local anaesthetics and selected others. The role of the pharmacist in the resolution of drug-related problems will be stressed. [4-0-0]

PHAR 371 (1) PATHOPHYSIOLOGY I. Pathophysiology of selected disease states. Corequisite: All of PHAR 341, PHAR 351. [1-0-0]

PHAR 380 (6) DRUGS: CHEMISTRY, PHARMACOLOGY AND THERAPEUTICS II. Pharmacological, chemical and physical principles of defined groups of drugs; the relationship of chemical structure to biological activity; the treatment with these drugs of diseases commonly encountered in pharmacy practice. Drug groups will include: renal, cardiac, respiratory, endocrine and selected others. The role of the pharmacist in the resolution of drug-related problems will be stressed. [6-0-2*]

PHAR 385 (6) DRUGS: CHEMISTRY, PHARMACOLOGY AND THERAPEUTICS III. Pharmacological, chemical and physical principles of defined groups of drugs; the relationship of chemical structure to biological activity; the treatment with these drugs of diseases commonly encountered in pharmacy practice. Drug groups will include: gastrointestinal, psychotropic, neurological disorders, analgesics and selected others. The role of the pharmacist in the resolution of drug-related problems will be stressed. [6-0-2*]

PHAR 399 (3) CASES IN PHARMACEUTICAL SCIENCES II. Case studies and other activities integrating scientific and clinical concepts. Prerequisite: PHAR 299. [0-0-3]

PHAR 400 (3) PHARMACY MANAGEMENT. Application of management principles to pharmacy operations. [3-0-0]

PHAR 401 (2) PHARMACY SKILLS III. Legal, technical and professional aspects of dispensing prescriptions and providing pharmaceutical care, primarily for community pharmacy practice. Prerequisite: PHAR 303. [0-3*-3*]

PHAR 402 (6) CLERKSHIP I-COMMUNITY. Structured practice education experience in community pharmacies.

PHAR 403 (3) CLERKSHIP II-INSTITUTIONAL. Structured practice education experience in hospitals and other health care facilities.

PHAR 404 (3) DRUG THERAPY FOR THE PAEDIATRIC PATIENT. Introduction to the paediatric patient. Emphasis is placed on developmental pharmacology, paediatric disease states and their treatment, and drug therapy considerations specific to the paediatric population. Limited enrolment; permission from instructor required. Graduate and undergraduate students from other faculties may be admitted. [3-0-0]

PHAR 405 (2-6) C PROBLEMS IN CLINICAL PHARMACY. Individual assignments involving library and clinical investigation of specific problems relating to drug utilization and information topics.

PHAR 407 (3) DRUG INFORMATION SKILLS. Communication skills, search strategies and drug literature appraisal issues relating to the provision of drug information by the pharmacist to other health professionals and the public. Prerequisite: PHAR 385. [3-0-0]

PHAR 408 (3) CLINICAL PHARMACOKINETICS. Lectures and discussions of topics on the application of pharmacokinetic principles and the use of therapeutic drug level monitoring in clinical pharmacy practice. Prerequisite: Successful completion of all required courses in the first three years of the pharmacy curriculum. Permission of instructor required. [3-0-0]

PHAR 409 (3) DRUG THERAPY FOR THE GERIATRIC PATIENT. A combination of lectures and workshops is used to address topics such as: the social, individual, physiological and pharmacological aspects of aging; major disease states occurring in the elderly and their respective drug and non-drug management; specific communication difficulties encountered with the elderly and methods of minimizing their impact on patient education and compliance. Permission of instructor required. [3-0-0]

PHAR 414 (6) PROBLEMS IN PHARMACEUTICS AND BIOPHARMACEUTICS. Individual assignments involving library and laboratory investigation of problems involved in the development of pharmaceutical dosage forms.

PHAR 415 (4) TOPICS IN PHARMACEUTICS AND BIOPHARMACEUTICS. A study of selected topics in the field of pharmaceutics and biopharmaceutics. Registration restricted. Permission of instructor required. [2-0-0; 2-0-0]

PHAR 425 (6) DRUG TESTING AND ASSAYING. Modern analytical techniques applied to separation and analysis of pharmaceutical preparations and special methods employed in pharmaceutical research. Registration limited. [1-4-0]

PHAR 426 (6) PROBLEMS IN PHARMACEUTICAL CHEMISTRY. Research and library thesis projects related to problems in analytical and synthetic aspects of drugs and natural products, and molecular aspects of drug action. Registration limited.

PHAR 429 (2) BIOCHEMICAL AND CLINICAL ASPECTS OF DRUG METABOLISM. A study of the major enzymes and the reactions involved in the biotransformation of drugs. Factors affecting drug metabolism, enzyme induction and inhibition, as well as pharmacokinetic models and drug interactions will be discussed. Prerequisite: Permission of the instructor is required. [2-0-0]

PHAR 430 (4) BIOMOLECULAR PHARMACEUTICAL CHEMISTRY II. Chemical principles and their application to drugs used to regulate enzyme activity. Prerequisite: PHAR 330. [4-0-0]

PHAR 435 (3) BIOMOLECULAR PHARMACEUTICAL CHEMISTRY III. Chemical principles and their application to drugs used to regulate receptor activity. Prerequisite: PHAR 430. [3-0-0]

PHAR 441 (3) PHARMACOLOGY III. The pharmacology of selected drug classes. Prerequisite: PHAR 342. Corequisite: All of PHAR 451, PHAR 461, PHAR 471. [3-0-0]

PHAR 442 (3) PHARMACOLOGY IV. The pharmacology of selected drug classes. Prerequisite: PHAR 441. Corequisite: All of PHAR 452, PHAR 462, PHAR 472. [3-0-0]

PHAR 444 (6) PROBLEMS IN PHARMACOLOGY. Individual assignments involving library and laboratory investigation of certain aspects of drug action. Enrolment restricted.

PHAR 448 (3) ENVIRONMENTAL AND CELLULAR TOXICOLOGY. Toxicology of heavy metals, pesticides; mutagenic, teratogenic and carcinogenic effects of drugs. Prerequisite: All of BIOC 300, PHYL 301, PHYL 302, PHAR 370, PHAR 380, PHAR 385. [3-0-0]

PHAR 450 (2-6) C SELECTED TOPICS. Thesis or Essay.

PHAR 451 (2) THERAPEUTICS III. Rational drug therapy, management of patient-specific drug-related problems and therapeutic monitoring of selected disease states. Prerequisite: PHAR 352. Corequisite: All of PHAR 441, PHAR 461, PHAR 471. [2-0-0]

PHAR 452 (2) THERAPEUTICS IV. Rational drug therapy, management of patient-specific drug-related problems and therapeutic monitoring of selected disease states. Prerequisite: PHAR 451. Corequisite: All of PHAR 442, PHAR 462, PHAR 472. [2-0-0]

PHAR 453 (2-6) C DIRECTED STUDIES IN PHARMACY PRACTICE. Individual assignments involving library and field work investigations of problems associated with pharmacy practice. Enrolment restricted. Open to upper level students. Prerequisite: Successful completion of the first three years of required courses in the pharmacy curriculum.

PHAR 454 (3) PEDIATRIC AND GERIATRIC DRUG THERAPY. Drug therapy considerations in pediatric and geriatric patients. Prerequisite: PHAR 451. Corequisite: PHAR 452. [3-0-0]

PHAR 455 (3) PHARMACY IN CANADA'S HEALTH CARE SYSTEM. Issues in health care, community health services and pharmacy practice. [3-0-0]

PHAR 461 (1) NON-PRESCRIPTION DRUGS AND NATURAL HEALTH PRODUCTS III. The use of non-prescription drugs and natural health products for selected conditions. Prerequisite: PHAR 362. Corequisite: All of PHAR 441, PHAR 451. [1-0-0]

PHAR 462 (1) NON-PRESCRIPTION DRUGS AND NATURAL HEALTH PRODUCTS IV. The use of non-prescription drugs and natural health products for selected conditions. Prerequisite: PHAR 461. Corequisite: All of PHAR 442, PHAR 452. [1-0-0]

PHAR 469 (3) STRUCTURED PRACTICAL EXPERIENCE II. A 160-hour community or institutional pharmacy clerkship. Prerequisite: PHAR 369 and promotion to fourth year.

PHAR 471 (1) PATHOPHYSIOLOGY II. Pathophysiology of selected disease states. Prerequisite: PHAR 371. Corequisite: All of PHAR 441, PHAR 451. [1-0-0]

PHAR 472 (1) PATHOPHYSIOLOGY III. Pathophysiology of selected disease states. Prerequisite: PHAR 471. Corequisite: All of PHAR 442, PHAR 452. [1-0-0]

PHAR 479 (12) STRUCTURED PRACTICAL EXPERIENCE III. Prerequisite: PHAR 469.

PHAR 480 (6) DRUGS: CHEMISTRY, PHARMACOLOGY AND THERAPEUTICS IV. Pharmacological, chemical and physical principles of defined groups of drugs; the relationship of chemical structure to biological activity; the treatment with these drugs of diseases commonly encountered in pharmacy practice. Drug groups will include: antimicrobials, chemotherapeutic agents and selected others. The role of the pharmacist in the resolution of drug-related problems will be stressed. [6-0-2*]

PHAR 489 (6) STRUCTURED PRACTICAL EXPERIENCE IV. Prerequisite: PHAR 469.

PHAR 490 (3) ALTERNATIVE MEDICINES IN PHARMACY PRACTICE. Critical evaluation of the safety and efficacy of selected herbal medicines and homeopathic remedies; regulatory, ethical, cultural and clinical issues in pharmaceutical care. Prerequisite: PHAR 385. [1-0-2]

PHAR 498 (3) CASES IN PHARMACEUTICAL SCIENCES III. Case studies and other activities integrating scientific and clinical concepts. Prerequisite: PHAR 399. [0-0-3]

PHAR 499 (3) CASES IN PHARMACEUTICAL SCIENCES IV. Case studies and other activities integrating scientific and clinical concepts. Prerequisite: PHAR 498. [1-0-6]

PHAR 501 (12) ADVANCED PHARMACOTHERAPEUTICS. Pharmacotherapeutic intervention in selected acute and chronic diseases and disorders. Emphasis is on recommendations for and monitoring of drug therapy. [3-6; 3-6]

PHAR 502 (4) ADVANCED CONCEPTS IN PHARMACOKINETICS. Models of linear and dose-dependent systems in pharmacokinetics including sustained release, volumes of distribution, drug clearance, metabolite kinetics, multiple dosing and computer modelling. Prerequisite: PHAR 315. [4-0-0]

PHAR 503 (2-12) C GRADUATE CLINICAL CLERKSHIP. This course will consist of clinical rotations of 4–6 weeks' duration (20–40 hours per week, 2 credit/rotation) in selected specialty areas in medicine and clinical pharmacy. Students will be assigned to clinicians in the selected specialty who are members of either the Faculty of Medicine or Pharmaceutical Sciences and who are appointed as clinical instructors for this course. Rotations will take place at the site(s) where the majority of the clinician's practice is conducted.

PHAR 508 (4) ADVANCED APPLICATIONS IN CLINICAL PHARMACOKINETICS. Pharmacokinetic applications in therapeutic drug monitoring and patient care; specific drugs and disease states; effects of age and concomitant drug administration. Prerequisite: PHAR 502. [4-0-0]

PHAR 510 (2-6) D ADVANCED PHARMACEUTICS I. A study of physical and chemical properties of pharmaceutical systems with emphasis on formulation and preparative aspects.

PHAR 511 (2-6) D ADVANCED PHARMACEUTICS II. A study of problems in pharmaceuticals with emphasis on biopharmaceutical aspects.

PHAR 514 (6) ADVANCED DRUG DELIVERY SYSTEMS. Controlled-release and targeted drug delivery systems. Advances in delivery systems for peptide and protein drugs. [3-0-0]

PHAR 525 (4) PHARMACEUTICAL RESEARCH TECHNIQUES I. Spectroscopic, GC, HPLC, LCMS and NMR analytical techniques for drug analysis, pharmacokinetics and metabolism. [2-6-0]

PHAR 526 (4) PHARMACEUTICAL RESEARCH TECHNIQUES II. Immunological assays, capillary and gel electrophoresis, radioisotope techniques, PET, peptide analysis and receptor binding studies. [2-6-0]

PHAR 533 (12-24) D CLINICAL CLERKSHIPS I. Required clinical rotations of four weeks' duration in selected specialty areas in medicine and clinical pharmacy.

PHAR 534 (2-12) D CLINICAL CLERKSHIPS II. Elective clinical rotations of 4 weeks' duration in hospital, office or clinic locations.

PHAR 535 (1/2) D PHARM.D. SEMINAR.

PHAR 540 (2-6) D TOPICS IN PHARMACOLOGY. Lectures and supervised studies in selected areas of pharmacology. Enrolment restricted.

PHAR 541 (3) DRUG METABOLISM AND TOXICOLOGY. The biotransformation of drugs, pesticides, carcinogens and other foreign chemicals in animals and humans. The biochemical mechanisms responsible, particularly the cytochrome P-450 mono-oxygenases, will be emphasized. The formation of toxic reactive metabolites and their effects will be discussed. Enrolment restricted.

PHAR 542 (3) CENTRAL NERVOUS SYSTEM PHARMACOLOGY. A course comprised of lectures, assigned readings and reports on selected topics dealing with drug actions in the central nervous system. Given in alternate years. Permission of instructor required.

PHAR 543 (3) ADVANCED LABORATORY IN PHARMACOLOGY. A laboratory course giving instruction in the methods and techniques used in pharmacological research. Registration limited. [0-6-0]

PHAR 544 (3) PHYSIOLOGY AND PHARMACOLOGY OF THE AUTONOMIC NERVOUS SYSTEM. A lecture and seminar course dealing with adrenergic, cholinergic and peptidergic transmission in the peripheral nervous system. Topics to be discussed will include mechanisms of synthesis, storage and release of neurotransmitters and effects of drugs on these processes. Given in alternate years. Permission of instructor required.

PHAR 545 (3) CARDIOVASCULAR PHARMACOLOGY. A course composed of lectures, assigned readings and conferences dealing with aspects of drug actions and cardiovascular function. Topics include the role of adenylate cyclase in cardiac function, the role of calcium in myocardial contractility and the effect of drugs on myocardial and vascular function. Enrolment restricted. Given in alternate years.

PHAR 548 (2) M.SC. SEMINAR. Attendance at regular seminars throughout the session and presentation of one or more papers on selected topics.

PHAR 549 (6/12) C MASTER'S THESIS.

PHAR 550 (2-6) C DIRECTED STUDIES.

PHAR 551 (6) PHARMACY IN CANADA. Cultural, social, behavioural and organizational foundations and theories of pharmacy in the Canadian health care system. Open only to Pharmacy Practice graduate students. [3-0-0; 3-0-0]

PHAR 552 (6) ISSUES IN PHARMACY PRACTICE RESEARCH. Research methods applied to the study of social and behavioural aspects of health care and pharmacy practice. Open only to pharmacy administration doctoral students who have completed graduate-level courses in statistics and research design. [3-0-0]

PHAR 554 (3) ADVANCED HOSPITAL PHARMACY MANAGEMENT. Institutional, professional and regulatory factors that

influence the planning, implementation and control of pharmacy services in hospitals. Permission of instructor required. [3-0-0]

PHAR 570 (2) PHYSICAL ASSESSMENT.

Principles of and clinical experience in physical assessment of patients for monitoring of drug efficacy and toxicity; interpretation of objective patient data by the clinical pharmacist. [2-0-0]

PHAR 580 (4) TOXICOLOGY I – GENERAL PRINCIPLES OF TOXICOLOGY. Absorption, distribution, metabolism and excretion of toxins. Chemical mutagenesis, carcinogenesis and teratogenesis and radiation toxicology. Various subspecialties introduced include regulatory, forensic, occupational and clinical toxicology. [4-0-0]

PHAR 581 (3) TOXICOLOGY II – TARGET ORGAN TOXICOLOGY. Action of toxins in specific organ systems, the causative agents and their mechanisms of action. The role of the toxicologist in prevention and resolution of various toxin-related problems. [3-0-0]

PHAR 582 (3) TOXICOLOGY III – ENVIRONMENTAL TOXICOLOGY. Toxicology and risk assessment of air, water and soil pollutants; food additives; animal and plant toxins; pesticides; heavy metals; solvents. Equivalency: PATH 582. [3-0-0]

PHAR 583 (3) TOXICOLOGY IV – MOLECULAR MECHANISMS OF TOXICOLOGY. Activation versus detoxification by cytochromes P-450; the role of the Ah receptor; reactive oxygen species; heavy metals; apoptosis. Equivalency: PATH 583. [3-0-0]

PHAR 584 (3) CELL CULTURE: CONCEPTS AND TECHNIQUES. Principles and methods of culturing isolated cells. Morphological and functional examination of normal cells and cells exposed to damaging agents or conditions. [0-6-0]

PHAR 590 (2) RESEARCH IN THE PHARMACEUTICAL SCIENCES: PRINCIPLES AND METHODS.

PHAR 648 (2) SEMINAR FOR PH.D. STUDENTS. Attendance at regular seminars throughout the session and presentation of one or more papers on selected topics.

PHAR 649 (0) DOCTOR OF PHILOSOPHY THESIS.

PHIL — PHILOSOPHY FACULTY OF ARTS

Philosophy is an interdisciplinary subject, and students with training in other subjects may be adequately prepared to take on a course even though they lack the formal prerequisites.

Students are encouraged to consult with the instructor. Variable credit courses: Most 200, 300, and 400 level courses in Philosophy are offered for 3 credits, but may be taken for 4 credits for extra work with the consent of the instructor. Students should consult the instructor if they wish to exercise this option as it may not be available in all sections. For detailed information about courses and topics within courses, see the departmental website (www.philosophy.ubc.ca).

PHIL 100 (6) INTRODUCTION TO PHILOSOPHY. Basic problems and methods of Philosophy. Topics such as the existence of God, the nature and scope of human knowledge, the relationship between mind and body, personal identity, free will, issues and problems in moral philosophy.

PHIL 120 (3) INTRODUCTION TO LOGIC AND CRITICAL THINKING. Tools for dealing with both everyday and more technical arguments and concepts. Analysis and resolution of confusions, ambiguities, and fallacies. This course is restricted to students with fewer than 90 credits.

PHIL 125 (3) INTRODUCTION TO SCIENTIFIC REASONING. Historical and logical analysis of various types of scientific hypotheses and the data that support or undermine them. This course is restricted to students with fewer than 90 credits.

PHIL 211 (3/4) D GREEK PHILOSOPHY I. The Presocratics; Socrates; Sophists. Recommended as preparation for CLST/PHIL 212 and PHIL 310. Equivalency: CLST 211.

PHIL 212 (3/4) D GREEK PHILOSOPHY II. Plato; Aristotle; selections from Hellenistic Philosophy. Recommended as preparation for PHIL 310. Equivalency: CLST 212.

PHIL 220 (3/4) D SYMBOLIC LOGIC I. Sentential and predicate logic. Translation from natural language; truth tables and interpretations; systems of natural deduction up to relational predicate logic with identity; alternative proof methods. Some sections may use computer-based materials and tests.

PHIL 230 (3/4) D INTRODUCTION TO MORAL THEORY. Theories of obligation and value; moral reasoning; normative ethics, descriptive ethics and meta-ethics. Readings in classic and contemporary texts.

PHIL 235 (3/4) D CONTEMPORARY MORAL ISSUES. Philosophical approaches or moral problems.

PHIL 240 (3/4) D KNOWLEDGE AND REALITY I. Topics in metaphysics and epistemology such as truth, knowledge, justification, the nature of physical reality, and personal identity. Readings from classic and contemporary texts.

PHIL 260 (3/4) D SCIENCE AND SOCIETY. An introduction to the historical development, conceptual foundations, and cultural significance of contemporary science. Themes will vary from year to year. Equivalency: HIST 260.

PHIL 310 (3/4) D THE PHILOSOPHY OF PLATO. A study of Plato's dialogues and his influence on subsequent philosophy.

PHIL 311 (3/4) D THE PHILOSOPHY OF ARISTOTLE. A study of Aristotle's writings and his influence on subsequent philosophy. Prerequisite: PHIL 310.

PHIL 313 (3) MEDIEVAL PHILOSOPHY. Survey of Western European thought from Augustine to the 14th century. Possible topics and authors include: Augustine; Abelard; the influence of Islam; the rediscovery of Aristotle;

Aquinas; Scotus; Ockham. Equivalency: RELG 328.

PHIL 314 (3/4) D PHILOSOPHY IN THE 17TH CENTURY. Survey of 17th-century philosophy from Bacon to Leibniz, including the writings of Hobbes, Descartes, and Spinoza. The influence of science and religion on philosophical thought.

PHIL 315 (3/4) D PHILOSOPHY IN THE 18TH CENTURY. Survey of 18th-century philosophy from Locke to Kant, including the writings of Berkeley, Rousseau, and Hume. The influence of science and religion on philosophy. Prerequisite: PHIL 314.

PHIL 316 (3/4) D PHILOSOPHY AFTER 1800. Survey of 19th and 20th century philosophy. May include Hegel, Schopenhauer, Nietzsche, Mill, Meinong, Brentano, the British Idealists, Russell, and Moore. Social and political currents in 19th century philosophical thought.

PHIL 320 (3/4) D SYMBOLIC LOGIC 2. Continuation of PHIL 220. A system of deduction for predicate logic is selected for further study. Completeness of this system and other metatheoretic results are proved. Other topics include computability, recursive function theory, incompleteness and decidability. Prerequisite: PHIL 220.

PHIL 321 (3/4) D INDUCTION AND DECISION. Formal methods relevant to the logic of decision. Decision theory, game theory, axiomatic probability theory and its interpretations, belief dynamics, simulation and modelling. Prerequisite: One of PHIL 125, PHIL 220.

PHIL 322 (3/4) D MODAL LOGIC. Logic of the modal operators "It is necessary that" and "It is possible that." Possible-world semantics and a method of derivation for this logic. Prerequisite: PHIL 220.

PHIL 323 (3/4) D NON-CLASSICAL LOGICS. One or more of conditional logic, deontic logic, epistemic logic, many-valued logic, systems of belief dynamics. Prerequisite: PHIL 220.

PHIL 324 (3/4) D PHILOSOPHY OF LOGIC. Fundamental concepts and methods of logic; the logic method, syntax and semantics; the conditional; entailment; consequence; modal logic; problems concerning extensionality and intentionality. Frege's distinction between sense and reference; Russell's theory of definite descriptions; Tarski's definition of truth. Prerequisite: PHIL 220.

PHIL 330 (3/4) D SOCIAL AND POLITICAL PHILOSOPHY. Theories of political and legal obligation and authority, legal reasoning, society and the state. Readings in classic and contemporary texts.

PHIL 334 (3/4) D SEX, GENDER AND PHILOSOPHY. Relationship between sex, gender, and philosophy. Topics may include ethics, epistemology, science, social relations, law, and personhood.

PHIL 335 (3/4) D POWER AND OPPRESSION. Philosophical approaches to historical problems of inequality and social harm, with readings drawn from historical and contempo-

rary sources. Topics to be studied may include slavery, colonialism, labour, and the position of women in society.

PHIL 338 (3/4) D PHILOSOPHY OF LAW.

Concepts of law, constitution and sovereignty; law and morality; natural law theories and legal positivism; obligation, responsibility, and punishment.

PHIL 339 (3/4) D PHILOSOPHY OF ART.

Topics include art and perception, art and reality, imagination, expression, censorship, and the role of art in human life.

PHIL 340 (3/4) D KNOWLEDGE AND REALITY II.

Topics in metaphysics and epistemology such as induction, the mind/body problem, free will, and action theory. Readings from classic and contemporary texts. Prerequisite: PHIL 240.

PHIL 349 (3/4) D PHILOSOPHY OF RELIGION.

A critical and analytical examination of arguments for and arguments against the existence of God, and other related topics.

PHIL 360 (3/4) D INTRODUCTION TO HISTORY AND PHILOSOPHY OF SCIENCE.

An examination of historical, conceptual and methodological conditions of scientific knowledge through detailed consideration of important episodes in the history of science. Equivalency: HIST 360.

PHIL 362 (3-6) D HISTORY AND PHILOSOPHY OF ECONOMICS FROM ARISTOTLE TO ADAM SMITH.

The development of economic thought from Aristotle to Adam Smith, focusing primarily on the conceptual foundations of economics, particularly the problems of value, distribution, and economic growth. Equivalency: ECON 318.

PHIL 363 (3-6) D HISTORY AND PHILOSOPHY OF ECONOMICS FROM RICARDO TO KEYNES.

The development of economic thought from David Ricardo up to the present, including such figures as Malthus, Mill, Jevons, and Keynes, focusing primarily on the conceptual foundations of economics, particularly the problems of value, distribution and growth. Equivalency: ECON 319.

PHIL 375 (3/4) D PHILOSOPHY AND LITERATURE.

Philosophical issues in works of literature or arising from theories of literary interpretation. Topics include issues relating to relativism, the nature of morality, free will, personal identity, the nature of the emotions.

PHIL 378 (3) PHILOSOPHICAL WISDOM OF EARLY INDIA.

Epistemological and ontological thought from the Vedic Period to the period of the rise of philosophical schools or systems. Philosophy in the Mahabharata, Gita; early Buddhist and Jain views on knowledge and reality; views on language. Equivalency: ASIA 378.

PHIL 385 (3/4) D EXISTENTIALISM. Meaning, identity and alienation as explored in the works for example of Kierkegaard, Dostoyevsky, Tolstoy, Sartre, and Camus.

PHIL 388 (3) BUDDHIST, BRAHMANICAL AND JAIN PHILOSOPHERS IN INTERACTION. Debates on issues of epistemology, language and ontology among the philosophical schools or systems of classical India Nagarjuna, Bhartrhari, Uma-svati, Sankara and others. Equivalency: ASIA 388.

PHIL 390 (6/12) C HONOURS TUTORIAL.

For students in third-year Honours.

PHIL 400 (3/4) D MORALS, POLITICS AND THE INDIVIDUAL.

Introduction to major themes in moral and political philosophy. Primarily for fourth-year and graduate students who have had no previous course in Philosophy.

PHIL 401 (3/4) D KNOWLEDGE, EXPLANATION, AND THE NATURE OF THINGS.

Introduction to major themes in epistemology and metaphysics. Primarily for fourth-year and graduate students who have had no previous course in Philosophy.

PHIL 410 (3/4) D TOPICS IN ANCIENT PHILOSOPHY.

Advanced study of the Presocratics, or of a philosopher such as Plato, or of a school such as the Sceptics or Stoics. Topics vary from year to year. Prerequisite: PHIL 311.

PHIL 412 (3/4) D TOPICS IN MEDIEVAL PHILOSOPHY.

Advanced study of a medieval philosopher such as Aquinas, or school. Prerequisite: PHIL 313.

PHIL 414 (3/6) D TOPICS IN THE HISTORY OF MODERN PHILOSOPHY.

Intensive study of a major philosopher or school such as Descartes, Hume, Empiricism, Rationalism, or the British utilitarians. Prerequisite: One of PHIL 314, PHIL 315, PHIL 316.

PHIL 415 (3/4) D THE PHILOSOPHY OF IMMANUEL KANT.

Study of Kant's critical philosophy. Prerequisite: One of PHIL 314, PHIL 315, PHIL 340.

PHIL 416 (3/6) D TOPICS IN 19TH-CENTURY PHILOSOPHY.

Study of a major 19th-century philosopher such as Hegel, Mill or Nietzsche, or school, such as German Idealism. Prerequisite: One of PHIL 314, PHIL 315, PHIL 316, PHIL 340.

PHIL 418 (3/6) D TOPICS IN TWENTIETH-CENTURY PHILOSOPHY.

Intensive study of a major philosopher such as Wittgenstein, Russell, or Heidegger, or school, such as pragmatism or logical empiricism. Prerequisite: PHIL 340.

PHIL 419 (3/4) D PHILOSOPHY OF HISTORY.

Concepts of history and historical explanation, historical progress, purpose, necessity, law and causation. Hegel, Marx, Vico, Spengler, Pareto, Collingwood, Croce, and Toynbee, as well as contemporary figures. Students will be expected to have an adequate knowledge of ancient or modern history.

PHIL 420 (3/4) D TOPICS IN SYMBOLIC LOGIC.

Formal semantics, proof theory, incompleteness and decidability, axiomatic set theory, independence results. Consult the Department as to which topics are offered in a given year. Prerequisite: PHIL 220.

PHIL 425 (3/4) D PHILOSOPHY OF LANGUAGE I. Philosophical discussion of language, meaning and communication. Prerequisite: Philosophy or Linguistics courses totaling 9 credits at the 200 level or above.

PHIL 426 (3/4) D PHILOSOPHY OF LANGUAGE II. Advanced topics in the philosophy of language. Prerequisite: PHIL 425 and 6 credits of Philosophy or Linguistics courses at the 200 level or above.

PHIL 427 (3/4) D PHILOSOPHY OF MATHEMATICS. Logicism, formalism and constructivism, implications of metatheorems such as those of Gödel and Church, mathematical truth, mathematics and mental construction, mathematics and the physical world. Prerequisite: Philosophy or Mathematics courses totaling 9 credits at the 200 level or above.

PHIL 431 (3/4) D SOCIAL AND POLITICAL PHILOSOPHY. Central concepts and problems in political life and thought including obligation, citizenship, representation, justice; equality; civil rights and liberty; disobedience. Prerequisite: Philosophy or Political Science courses totaling 9 credits at the 200 level or above.

PHIL 432 (3/4) D ETHICAL THEORY. Classic or contemporary works in ethical theory. Prerequisite: 9 credits in Philosophy at the 200 level or above; PHIL 230 is recommended.

PHIL 433 (3/4) D BIO-MEDICAL ETHICS. Moral problems arising in the health sciences, especially in medicine but also in biology, psychology, and social work. Topics include abortion, death and euthanasia, genetic engineering, behaviour modification, compulsory treatment, experimentation with human beings and animals, and the relationship between professionals and their patients, subjects or clients. No philosophical background is required.

PHIL 434 (3/4) D BUSINESS AND PROFESSIONAL ETHICS. Moral problems in contemporary business and professional practice, general moral theory, the law, and policy formation. Corporate social and environmental responsibility, employee rights, preferential hiring and affirmative action programs, conflicts of interest, advertising, "whistle blowing" and self-regulation.

PHIL 435 (3/4) D ENVIRONMENTAL ETHICS. Moral problems arising in the context of human relationships to nature and to non-human living things, considered in terms of both general moral theory and policy formation. Topics include moral standing, animal rights, obligations to future generations, pollution, hazardous materials, the depletion of natural resources and the treatment of non-human living things.

PHIL 440 (3/4) D EPISTEMOLOGY. Analysis of the concept of knowledge; problems of justifying ordinary and basic empirical beliefs. Prerequisite: PHIL 240.

PHIL 441 (3/4) D PHILOSOPHY OF PERCEPTION. The contribution of the senses to knowledge of the external world; the nature

of perception and its contribution to empirical knowledge. Prerequisite: PHIL 240, or COGS 200 if accompanied by 3 credits in PHIL at the 200 level or above.

PHIL 449 (3/4) D CONTINENTAL PHILOSOPHY. A study of European philosophers from amongst Husserl, Heidegger, Habermas, Foucault, Derrida, Lacan, Levinas, and others.

PHIL 450 (3/4) D METAPHYSICS. Topics including ontology, universals and particulars, substance, determinism and indeterminism, identity over time, and theories of truth. Prerequisite: 9 credits in PHIL at the 200 level or above.

PHIL 451 (3/4) D PHILOSOPHY OF MIND. The nature of the mental and physical; the relation between minds and bodies; the character of psychological explanation. Prerequisite: PHIL 240, or COGS 200 if accompanied by 3 credits of PHIL at the 200 level or above.

PHIL 452 (3/4) D PHILOSOPHY OF ACTION. Explanation of human actions; the conditions of responsibility; freedom of the will; the domains of rational and moral appraisal; the category of action and the individuation of actions. Prerequisite: PHIL 340.

PHIL 460 (3-6) D PHILOSOPHY OF SCIENCE. Issues common to all sciences. Philosophical questions including the character of scientific laws, theories and revolutions, the nature of scientific confirmation, causality, explanation and prediction, and the use of logic and probability. Difficulties in the interpretation of atomic physics and questions about relationships between biology and psychology. No philosophical background is assumed.

PHIL 461 (3/4) D PHILOSOPHY OF SOCIAL SCIENCE. Topics in the philosophy of science of special concern to the social and behavioural sciences; hypotheses and explanation; principles, theories, models; the formation of scientific concepts; the function of mathematics in social science. Prerequisite: 9 credits at the 200 level or above from Philosophy, Anthropology, Geography, Economics, History, Political Science, Psychology or Sociology.

PHIL 462 (3-6) D SPACE AND TIME. Such topics as: Are space and time continuous? Is motion always relative to another body? Does time flow? Is time irreversible? Prerequisite: PHIL 340 or 12 credits of Mathematics or Science.

PHIL 464 (3) PHILOSOPHY OF BIOLOGY. Methodological, historical, philosophical and social science questions about biology. Credit will be given for only one of PHIL 464 or BIOL 446. Prerequisite: Fourth-year standing in any degree program or 9 credits of philosophy.

PHIL 469 (3/4) D TOPICS IN PHILOSOPHY OF SCIENCE. Topics such as probability and induction; foundations of measurement; theory construction. Prerequisite: PHIL 460.

PHIL 485 (3/4) D DIRECTED READING. Same as PHIL 486-9.

PHIL 486 (1-4) D DIRECTED READING.

PHIL 487 (3-4) D DIRECTED READING.

PHIL 488 (3-4) D DIRECTED READING.

PHIL 489 (3-4) D DIRECTED READING.

PHIL 490 (6/12) C HONOURS TUTORIAL. For students in fourth-year Honours.

PHIL 499 (3-4) D DIRECTED READING.

PHIL 510 (3-12) D ANCIENT PHILOSOPHY.

PHIL 512 (3-12) D MEDIEVAL PHILOSOPHY.

PHIL 514 (3-12) D EARLY MODERN PHILOSOPHY.

PHIL 516 (3-12) D MODERN PHILOSOPHY.

PHIL 518 (3-12) D TWENTIETH-CENTURY PHILOSOPHY.

PHIL 520 (3-12) D LOGIC.

PHIL 525 (3-12) D PHILOSOPHY OF LANGUAGE.

PHIL 527 (3-12) D PHILOSOPHY OF MATHEMATICS.

PHIL 528 (3-12) D PHILOSOPHICAL ISSUES IN THE FOUNDATIONS OF MATHEMATICS.

PHIL 530 (3-12) D MORAL PHILOSOPHY.

PHIL 531 (3-12) D POLITICAL PHILOSOPHY.

PHIL 532 (3-12) D ETHICAL THEORY AND PRACTICE.

PHIL 533 (3-12) D ISSUES IN BIO-MEDICAL ETHICS.

PHIL 534 (3-12) D ISSUES IN BUSINESS AND PROFESSIONAL ETHICS.

PHIL 535 (3-12) D ISSUES IN ENVIRONMENTAL ETHICS.

PHIL 536 (3-12) D ETHICAL ISSUES IN PUBLIC POLICY.

PHIL 539 (3-12) D AESTHETICS.

PHIL 540 (3-12) D EPISTEMOLOGY.

PHIL 550 (3-12) D METAPHYSICS.

PHIL 551 (3-12) D PHILOSOPHY OF MIND.

PHIL 560 (3-12) D PHILOSOPHY OF SCIENCE.

PHIL 581 (3-12) D PROBLEMS.

PHIL 585 (3-12) D DIRECTED READING.

PHIL 586 (3) PHILOSOPHY OF ACTION.

PHIL 599 (12) MA THESIS.

PHIL 699 (0) PH.D. THESIS.

PHYL — PHYSIOLOGY FACULTY OF MEDICINE

MATH 102 (or MATH 100 or 104 or 120) and MATH 103 (or MATH 101 or 105 or 121) and PHYS 101 and any other Physics course that is for credit in the Faculty of Science are prerequisite to all courses in Physiology. In the Honours program the required second year courses, BIOL 200, 201, CHEM 201 or 205, and CHEM 233, 235, MATH 200 and MICB 202 must normally be completed prior to entry into third year. For admission to PHYL 422, 423,

424 or 426 see Physiology in the Science section. Students wishing to undertake directed studies at the undergraduate or graduate level are required to consult a departmental adviser before registering.

PHYL 301 (6) HUMAN PHYSIOLOGY. A lecture course on body function with particular reference to mammalian and human physiology. Credit will normally be given for only one of the following: PHYL 301 and 303 or BIOL 353,355. Prerequisite: All of BIOL 112, BIOL 121, BIOL 140 and one of CHEM 203, CHEM 233, CHEM 260. [3-0]

PHYL 302 (3) HUMAN PHYSIOLOGY LABORATORY. A laboratory course designed to illustrate physiological principles and to provide training in physiological techniques. Must be taken in conjunction with PHYL 301. Enrolment limited. Available only to students in the Faculty of Pharmaceutical Sciences. [0-3]

PHYL 303 (3) LABORATORY IN HUMAN PHYSIOLOGY (HONOURS). Techniques and principles of human physiology. This course must be taken in conjunction with PHYL 301. Restricted to Physiology and Pharmacology Honours students. [0-3]

PHYL 422 (3) MAMMALIAN CARDIO-VASCULAR AND RESPIRATORY PHYSIOLOGY. The control and integration of cardio-pulmonary function in mammals. Intended for Honours students in Physiology or other life sciences. Prerequisite: PHYL 301. Permission of the department head is also required. [3-0; 0-0]

PHYL 423 (3) MAMMALIAN RENAL AND GASTROINTESTINAL PHYSIOLOGY. Control of mammalian renal and gastrointestinal systems. Role in homeostasis. Intended for Honours students in Physiology or other life sciences. Prerequisite: PHYL 301. Permission of the department head is also required. [3-0]

PHYL 424 (3) MAMMALIAN ENDOCRINOLOGY. Hormonal control of homeostatic, metabolic and reproductive function. Intended for Honours students in Physiology or other life sciences. Prerequisite: PHYL 301. Permission of the department head is also required. [3-0]

PHYL 426 (3) PHYSIOLOGICAL BASIS OF CENTRAL NERVOUS SYSTEM FUNCTIONS. An integrated study of the structural and functional organization of the central nervous system with special emphasis on neurophysiological mechanisms. Prerequisite: PHYL 301. Permission of the department head is also required. [3-0]

PHYL 430 (6) ADVANCED LABORATORY IN PHYSIOLOGY. A laboratory course giving training in the methods, techniques and use of instruments required for physiological investigation. PHYL 303 and the consent of the department are required and enrolment will be limited. [0-6]

PHYL 448 (2-6) C DIRECTED STUDIES IN PHYSIOLOGY.

PHYL 449 (6) GRADUATING ESSAY. Prior to graduation, students in the Honours course will be required to carry out an investigation approved by the department head and to submit a satisfactory graduating essay based on this work.

PHYL 511 (2–6) C SEMINAR IN MAMMALIAN PHYSIOLOGY.

PHYL 521 (3) ADVANCED TOPICS IN RENAL PHYSIOLOGY.

PHYL 522 (3) ADVANCED TOPICS IN CARDIOVASCULAR PHYSIOLOGY.

PHYL 523 (3) ADVANCED TOPICS IN GASTROINTESTINAL PHYSIOLOGY.

PHYL 524 (3) ADVANCED TOPICS IN ENDOCRINOLOGY.

PHYL 526 (3) ADVANCED TOPICS IN NEUROPHYSIOLOGY.

PHYL 527 (3) ADVANCED TOPICS IN RESPIRATORY PHYSIOLOGY.

PHYL 530 (3) MUSCLE BIOPHYSICS. Equivalency: ANAT 527.

PHYL 531 (3) SENSORY PHYSIOLOGY I: HEARING AND VISION. Offered in even numbered years. Equivalency: AUDI 512.

PHYL 532 (3) SENSORY PHYSIOLOGY II; VESTIBULAR SYSTEM, SOMATIC. Offered in odd numbered years.

PHYL 533 (3) PHYSIOLOGY OF THERMOREGULATION. Comprehensive study of thermoregulatory physiology and pathophysiology from molecular to organismal levels in mammal and other vertebrates.

PHYL 548 (2–6) C ADVANCED TOPICS IN HUMAN PHYSIOLOGY.

PHYL 549 (12) M.SC. THESIS.

PHYL 649 (0) PH.D. THESIS.

PHYS — PHYSICS FACULTY OF SCIENCE

Science students with BC Secondary School Physics 11, but not Physics 12, are required to take PHYS 100. Many science programs require PHYS 101 or 107. Students planning to go into Physics or Applied Science (and some other programs) are required to take PHYS 102 (108 & 109) in addition to PHYS 101 (107). PHYS 100 is intended primarily for students who have completed only Physics 11 or its equivalent. Credit will not be given for PHYS 100 to students with credit for Physics 12. PHYS 101 normally requires Physics 12 or PHYS 100. Students with only Physics 11 but with a good mathematics background, after consultation with an adviser, may omit PHYS 100 and enroll in PHYS 101. Credit will be given for only one of PHYS 101, 107 and for only one of PHYS 102, 108. The following courses are for students in the Faculty of Applied Science: PHYS 153, PHYS 170, PHYS 250, PHYS 253, PHYS 257, PHYS 258, PHYS 259, PHYS 270, PHYS 350, PHYS 352, PHYS 354, PHYS 389, PHYS 450, PHYS 454, PHYS

455, PHYS 458, PHYS 473, PHYS 474. Additional fees are charged for some courses.

PHYS 100 (3) INTRODUCTORY PHYSICS. An introduction to fundamental concepts such as force, energy, momentum, and the use of graphs and vectors in physics; geometrical optics; electricity; laboratory exercises to familiarize the student with both the phenomena and the basic laboratory instruments commonly used to measure them. Prerequisite: Not open to students with credit for PHYS 12. Mathematics 12 is required; Physics 11 is required for first-year students, strongly recommended for others. Students with credit for Physics 12 may not obtain credit for this course. [3-3*-1*]

PHYS 101 (3) ENERGY AND WAVES. Conservation laws, rotational motion, simple harmonic motion, sound, fluids, heat, including biological applications. Prerequisite: One of PHYS 12, PHYS 100. Corequisite: One of MATH 100, MATH 102, MATH 104, MATH 120, MATH 180, MATH 184. [3-3*-1*]

PHYS 102 (3) ELECTRICITY, LIGHT AND RADIATION. Introduction to optics, electricity and magnetism, electric circuits, radioactivity, including biological applications. Prerequisite: PHYS 101. Corequisite: One of MATH 101, MATH 103, MATH 105, MATH 121. [3-3*-1*]

PHYS 107 (3) PHYSICS 1. An enriched course dealing with conservation laws, angular momentum of rigid bodies, simple harmonic motion and wave phenomena. Concepts of probability and kinetic theory. Intended for students planning to take higher level courses in physics and astronomy. Prerequisite: Either (a) a score of 85% or higher in PHYS 12 and a score of 85% or higher in MATH 12; or (b) a score of 85% or higher in PHYS 100. Corequisite: One of MATH 100, MATH 102, MATH 104, MATH 120, MATH 180, MATH 184. [3-3*-1*]

PHYS 108 (3) PHYSICS II. Concepts of thermal Physics. Electricity and magnetism up to Maxwell's equations and electromagnetic waves, including interference and diffraction of light. Intended for students planning to take higher-level courses in physics and astronomy. Prerequisite: Either (a) PHYS 107 or (b) a score of 85% or higher in PHYS 101. Corequisite: One of MATH 101, MATH 103, MATH 105, MATH 121. [3-0-1]

PHYS 109 (1) INTRODUCTION TO EXPERIMENTAL PHYSICS. A laboratory course accompanying PHYS 108 with emphasis on data collection and analysis and experimental techniques. Prerequisite: Either (a) PHYS 107 or (b) PHYS 101. [0-3-0]

PHYS 153 (6) ELEMENTS OF PHYSICS. Thermometry, thermal properties of matter, heat, oscillations, waves, sound, wave optics; geometrical optics, elementary electricity and magnetism, simple DC and AC circuits. Credit will be given for only one of PHYS 153 and 101/102 or 107/108/109. Prerequisite: PHYS 12. [3-0-1; 3-3-1]

PHYS 170 (3) MECHANICS I. Statics of particles, equilibrium of rigid bodies, rigid body statics and internal forces; kinematics: rectilinear motion; dynamics: Newton's second law, friction, impulse, momentum, work and energy. Prerequisite: Either (a) PHYS 100 or (b) PHYS 12. [3-0-1]

PHYS 200 (3) RELATIVITY AND QUANTA. Special relativity: Lorentz transformation, dynamics and conservation laws. Quantum physics: the experimental evidence for quantization; a qualitative discussion of the concepts of quantum mechanics and their application to simple systems of atoms and nuclei. Prerequisite: Either (a) one of PHYS 102, PHYS 108, PHYS 153 and one of MATH 101, MATH 103, MATH 105, MATH 121; or (b) SCIE 001. [3-0-1]

PHYS 203 (3) THERMAL PHYSICS I. Laws of thermodynamics. Thermodynamic potentials. Applications to homogeneous and inhomogeneous equilibrium systems with particular reference to electric and magnetic systems. Non-equilibrium systems. Prerequisite: Either (a) a score of 68% or higher in PHYS 102 or (b) a score of 68% or higher in PHYS 108 or (c) a score of 68% or higher in PHYS 153 or (d) a score of 68% or higher in SCIE 001. Corequisite: One of MATH 217, MATH 200. [3-0-0]

PHYS 206 (3) MECHANICS. Newtonian mechanics, non-inertial frames, central potentials, Kepler's laws, variational calculus, Lagrangian dynamics, rigid body motion, Hamiltonian mechanics, Poisson brackets, canonical, Hamilton-Jacobi theory, action angle variables. Prerequisite: One of MATH 200, MATH 217, MATH 226 and either (a) one of PHYS 108, PHYS 153, SCIE 001 or (b) PHYS 102. PHYS 216 if less than 68% in PHYS 102. Corequisite: MATH 215 and one of MATH 221, MATH 223. [3-0-1]

PHYS 209 (3) INTERMEDIATE EXPERIMENTAL PHYSICS. Use of analog electronics and amplifiers, digital electronics and analog-to-digital conversion and the use of computers in data analysis and simulations in thermodynamic, electronic and modern physics experiments. Prerequisite: Either (a) all of PHYS 108, PHYS 109 or (b) one of PHYS 102, PHYS 153 or (c) SCIE 001. Corequisite: MATH 215 and one of MATH 200, MATH 217, MATH 226. [0-3-1*]

PHYS 216 (3) MECHANICS I. Review of kinematics, Newton's laws, angular momentum and fixed axis rotation. Rigid body motion, central forces, non-inertial frames of reference. Prerequisite: One of PHYS 101, PHYS 107, SCIE 001 and all of MATH 200, MATH 221. [3-0-1]

PHYS 250 (3) INTRODUCTION TO MODERN PHYSICS. Wave-particle duality of matter, special relativity, processes in atomic, nuclear and solid state, and introduction to quantum mechanical devices and techniques. Prerequisite: One of PHYS 102, PHYS 108, PHYS 153, SCIE 001. [3-0-1]

PHYS 253 (3) INTRODUCTION TO INSTRUMENT DESIGN. Practical laboratory exposure to instrument bread-boarding including simple mechanical and electrical design, and communications with sensors, actuators. Micro-controller implementation and design. Prerequisite: One of PHYS 259, PHYS 209. [1-6-0]

PHYS 257 (2) HEAT AND THERMODYNAMICS. Thermometry, thermal properties of matter; heat transfer by conduction; convection and radiation; kinetic theory of gases and gas laws; heat engines; refrigeration; change of state; first and second laws of thermodynamics. Prerequisite: Either (a) SCIE 001 or (b) one of MATH 200, MATH 217, MATH 226, MATH 255, MATH 263 and either (a) all of PHYS 108, PHYS 109 or (b) one of PHYS 102, PHYS 153. [1-3-1]

PHYS 258 (2) PRINCIPLES OF PHOTONICS. Practical aspects of classical and quantum treatments of light; generation, transmission and detection. Prerequisite: One of PHYS 102, PHYS 108, PHYS 153, SCIE 001. Corequisite: One of MATH 200, MATH 217, MATH 226, MATH 255, MATH 263. [2-0-1]

PHYS 259 (2) EXPERIMENTAL TECHNIQUES. Basic experimental techniques in acquisition, analysis and presentation of data. Prerequisite: Either (a) all of PHYS 108, PHYS 109 or (b) one of PHYS 102, PHYS 153 or (c) SCIE 001. [1-3-0]

PHYS 270 (2) MECHANICS II. Dynamics: systems of particles, kinematics and kinetics of rigid bodies (plane motion), energy and momentum, rotating coordinates. Prerequisite: PHYS 170. [2-0-1]

PHYS 298 (3) CO-OPERATIVE WORK PLACEMENT I. Approved and supervised technical work experience in an industrial research setting for a minimum of 3.5 months. Normally taken during the winter term of the second year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Physics. Prerequisite: All of PHYS 200, PHYS 203.

PHYS 299 (3) CO-OPERATIVE WORK PLACEMENT II. Approved and supervised technical work experience in an industrial research setting for a minimum of 3.5 months. Normally taken during the summer following the second year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Physics. Prerequisite: PHYS 298.

PHYS 301 (3) ELECTRICITY AND MAGNETISM. Electrical fields and potentials of static charge distributions, current, fields of moving charges, magnetic field, electromagnetic induction, Maxwell's equations. Prerequisite: One of PHYS 102, PHYS 108, PHYS 153, SCIE 001 and one of MATH 217, MATH 227, MATH 317. Corequisite: MATH 215. [3-0-1]

PHYS 304 (3) INTRODUCTION TO QUANTUM MECHANICS. The beginnings of quantum mechanics, wave mechanics and the Schrodinger equation, one-dimensional potentials, the postulates of quantum mechan-

ics, applications to three-dimensional systems. Prerequisite: PHYS 200. Corequisite: One of MATH 316, PHYS 312. [3-0-0]

PHYS 305 (3) INTRODUCTION TO BIOPHYSICS. An introduction for physicists (assumed to have no background in biology) to the basics of molecular biology, followed by selected examples where insights from physics and mathematics have helped solve important biological problems. Intended for students with third- or fourth-year standing in physics. Not for credit for Life Science students. Prerequisite: a minimum third year standing in Science. [3-0-0]

PHYS 308 (3) OPTICS. Physical optics: polarization, Fresnel equation coherence, interference, diffraction, lasers, holography, Fourier optics. Prerequisite: One of MATH 200, MATH 217, MATH 226 and one of MATH 221, MATH 223 and MATH 215; and either (a) one of PHYS 102, PHYS 153, SCIE 001 or (b) all of PHYS 108, PHYS 109. [2-3-0]

PHYS 309 (3) ELECTRICAL LABORATORY. Selected experiments in electromagnetism and electronics; computer data acquisition; advanced data analysis and simulation. Prerequisite: PHYS 209. [1-4-0]

PHYS 312 (3) INTRODUCTION TO MATHEMATICAL PHYSICS. The application of ordinary and partial differential equations to physical problems; boundary and initial value problems associated with heat, wave and Laplace equations. Fourier analysis; expansions in Bessel and Legendre functions. Credit will be given for only one of PHYS 312 and MATH 316. Prerequisite: MATH 215. [3-0-0]

PHYS 313 (3) THERMODYNAMICS. The laws of thermodynamics, thermodynamic potentials, phase changes, elementary statistical physics. Prerequisite: One of MATH 200, MATH 217, MATH 226, MATH 255 and one of PHYS 102, PHYS 108, PHYS 153, SCIE 001. [3-0-0]

PHYS 314 (3) FLUIDS. Kinetic theory: Diffusion, viscosity and sound waves. Introduction to hydrodynamics: Laminar flow, capillary and gravity waves, convection and turbulence. Dimensional analysis. Prerequisite: MATH 215. Corequisite: One of PHYS 203, PHYS 313. [3-0-0]

PHYS 315 (3) PHYSICS OF MATERIALS. Crystal structure, elasticity and phonons, elementary electronic transport, defects, alloys, liquid crystals and polymers. Prerequisite: One of PHYS 203, PHYS 313, CHEM 201, CHEM 205. Corequisite: MATH 215. [3-0-0]

PHYS 317 (3) LIGHT. Radiation, photometry, illumination, colour, geometrical optics. Prerequisite: One of MATH 152, MATH 221, MATH 223 and one of PHYS 102, PHYS 122. [3-3*-0]

PHYS 318 (3) ACOUSTICS. Acoustic oscillators (including loudspeakers), acoustic waves, and architectural acoustics. Prerequisite: PHYS 209. [3-3*-0]

PHYS 319 (3) ELECTRONICS LABORATORY. A project-oriented lab introducing the design and construction of microprocessor-controlled devices. Prerequisite: PHYS 209. [1-4-0]

PHYS 330 (3) TWENTIETH-CENTURY PHYSICS. Quantum physics, nuclear energy and particle physics at a level suitable for third- and fourth-year Science students not proceeding to a physics degree. Not for credit towards a B.Sc. in Physics. Prerequisite: One of MATH 100, MATH 102, MATH 104, MATH 180, MATH 184 and one of PHYS 101, PHYS 107, PHYS 153. [3-0-0]

PHYS 340 (3) FROM ATOMS TO THE UNIVERSE. Ancient Greek ideas of substance and forms and modern concepts of forces and fields. The twentieth-century quantum revolution. The modern universe, from quarks and atoms to the big bang. Quantum paradoxes. Not for credit in the faculties of Science and Applied Science. No mathematics required. [3-0-0]

PHYS 341 (3) PHYSICS OF MUSIC. An introduction to the physical principles important to the production, transmission and perception of musical sounds. The treatment will be non-mathematical; with emphasis on demonstrations. Topics may include the description of sound waves, resonances, scales, physics of hearing, examination of specific musical instruments, etc. Not for credit in the Faculties of Science and Applied Science. [3-0-0]

PHYS 343 (3) PHYSICAL SCIENCE BY INQUIRY. A guided sequence of hands-on science modules intended primarily for prospective elementary schoolteachers, to help them to work constructively in a science teaching role. Not for credit in the Faculties of Science and Applied Science. Prerequisite: Secondary school algebra. [0-6-0]

PHYS 349 (2-6) C DIRECTED STUDIES. With approval of the Head of the Physics Department, studies under the direction of a staff member may be arranged. Intended for Honours and Major physics students.

PHYS 350 (3) APPLICATIONS OF CLASSICAL MECHANICS. Review of principles. Particle mechanics: Euler's equations, tops and gyroscopes, motion of the Earth, Lagrangian and Hamiltonian methods. Variational principles in optics and mechanics, Liouville's theorem and statistical mechanics. The relationship between classical and quantum mechanics. Prerequisite: PHYS 270. [3-0-0]

PHYS 352 (2) LABORATORY TECHNIQUES IN PHYSICS. Some of the experiments will be based on the lecture material for PHYS 354. Other techniques and subjects will also be covered. Corequisite: PHYS 354. [0-3-0]

PHYS 354 (3) ELECTRIC AND MAGNETIC FIELDS. Applications of electricity and magnetism. Maxwell's equations. Prerequisite: One of PHYS 102, PHYS 108, PHYS 153, SCIE 001 and one of MATH 215, MATH 255 and one of MATH 217, MATH 227, MATH 317. [3-0-1]

PHYS 389 (1) TECHNICAL REPORT. A technical report based on summer work or a co-operative education work term to be submitted to the Department, followed by an oral presentation of the work.

PHYS 399 (3) CO-OPERATIVE WORK PLACEMENT III. Approved and supervised technical work experience in an industrial research setting for a minimum of 3.5 months. Normally taken during the summer following the third year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Physics. Prerequisite: PHYS 299.

PHYS 400 (3) INTRODUCTION TO ELEMENTARY PARTICLES. Standard model, classification of elementary particles and forces of nature, symmetries, conservation laws, quark model, quantum electrodynamics, quantum chromodynamics and the theory of weak interactions. Prerequisite: PHYS 304. (or PHYS 412 prior to 2003) [3-0-0]

PHYS 401 (3) ELECTROMAGNETIC THEORY. The application of Maxwell's theory to the propagation of electromagnetic waves. Prerequisite: PHYS 301. [3-0-0]

PHYS 402 (3) APPLICATIONS OF QUANTUM MECHANICS. Spin and angular momentum addition, perturbation methods, and applications in the fields of Atomic, Molecular, Nuclear, and Solid State Physics. Prerequisite: PHYS 304. [3-0-0]

PHYS 403 (3) STATISTICAL PHYSICS. Kinetic theory of transport. Ensemble theory, application to classical and quantum systems. Interacting systems and phase change. Fluctuations. Intended for Honours students. Prerequisite: One of PHYS 203, PHYS 257, CHEM 201 and one of PHYS 304, PHYS 350, CHEM 312. MATH 318 is recommended [3-0-0]

PHYS 404 (3) INTRODUCTION TO MEDICAL PHYSICS. Radiotherapy, X-ray imaging, nuclear medicine, magnetic resonance imaging and biomedical optics. Prerequisite: Third or fourth year standing in science is required. MATH 200 (or MATH 217 or MATH 226) is recommended. [3-0-0]

PHYS 405 (3) RADIATION BIOPHYSICS. Physical and chemical interactions of ionizing radiations and their biological effects at the cellular, tissue and whole-animal levels. Credit will be given for only one of PHYS 405, 436 and 536. Prerequisite: Third- or fourth-year standing in Science or permission of the department head is required. [3-0-0]

PHYS 407 (3) INTRODUCTION TO GENERAL RELATIVITY. Physical consequences of Einstein's equations, including the principle of equivalence, curved space-time, geodesics, the Schwarzschild solution, deflection of light, black holes and gravitational radiation. Prerequisite: MATH 215 and one of MATH 217, MATH 227, MATH 317. PHYS 206 and PHYS 301 are recommended. [3-0-0]

PHYS 408 (2) FLUID FLOW. Subsonic flow of viscous and non-viscous fluids. Boundary layers. Laminar and turbulent flow. Supersonic flow and shock waves, cavitation and capillarity. Prerequisite: PHYS 206. [3-0-0]

PHYS 409 (3/6) C EXPERIMENTAL PHYSICS. A laboratory course with a wide choice of experiments for fourth year Honours and Major students. Topics include solid state,

nuclear, classical, quantum, electromagnetic and low temperature physics. For 6 credits, two weekly laboratory periods and completion of a project in second term are required. [0-3-0]

PHYS 410 (3) COMPUTATIONAL PHYSICS. Scientific programming applied to problems in physics. Fundamentals of numerical analysis for continuum problems. Solution of linear and non-linear algebraic systems, ordinary differential equations and stochastic problems. Prerequisite: One of PHYS 312, MATH 316 and one of CPSC 111, CPSC 121, CPSC 122, CPSC 126, CPSC 152, CPSC 260, EOSC 211. [3-0-1]

PHYS 412 (3) QUANTUM PHYSICS. Fundamentals of atomic, nuclear, particle, and condensed matter physics. Prerequisite: MATH 215 and one of CHEM 312, PHYS 200. [3-0-0]

PHYS 420 (2-4) C PHYSICS DEMONSTRATIONS. The students will prepare, under the supervision of a faculty member, a demonstration or series of demonstrations intended to illustrate physical principles to diverse audiences. Intended for third- or fourth-year Physics Majors and Math/Science Education students.

PHYS 436 (3) HEALTH PHYSICS MEASUREMENT AND CONTROL. Biological effects of the physical and chemical interactions of gamma-ray, ultraviolet, infrared and microwave radiation. Instrumentation for monitoring of radiation, accident prevention and control strategy. This course includes both lecture and laboratory components. Credit will be given for only one of PHYS 405 and 436. Prerequisite: Third or fourth year standing in Science or permission of the director of the Occupational Hygiene Program. [3-0-0]

PHYS 437 (3) PHYSICS OF BIOCELLULAR STRUCTURE AND MACHINERY. Molecular structure and architecture of biological cells, interactions of molecules in aqueous solution and at interfaces, physical properties of polymers and surfactants, mechanisms of cell membranes and cytoplasmic structures, thermodynamics of molecular machines and mechanical enzymes. Credit can not be given for both PHYS 437 and 537. Prerequisite: One of PHYS 313, PHYS 403, PHYS 455, CHEM 304. [3-0-0]

PHYS 438 (3) ZOOLOGICAL PHYSICS. Animal systems viewed from a physicist's perspective. Topics include sensory systems, energy budgets, locomotion, internal flows, physical advantages of grouping. Prerequisite: One of PHYS 101, PHYS 107. BIOL 325 is recommended. Equivalency: BIOL 438. [3-0-0]

PHYS 445 (1) ANATOMY, PHYSIOLOGY AND STATISTICS FOR MEDICAL PHYSICISTS. Restricted to graduate students to the M.Sc. (Medical Physics) Program.

PHYS 447 (3/6) C ADVANCED TOPICS IN PHYSICS. Directed studies available to students in Honours Physics with approval from the Head of the Department.

PHYS 449 (6) HONOURS THESIS. A research project, undertaken under the direction of a

faculty member culminating in a thesis. [0-6-1*]

PHYS 450 (3) QUANTUM MECHANICS. Postulates of quantum mechanics, expectation values, hermitian operators, commuting observables, applications to one-dimensional systems, harmonic oscillators, angular momentum, applications in three dimensions, hydrogen atom, time dependent perturbations. Prerequisite: PHYS 250. [3-0-0]

PHYS 454 (3) APPLIED ELECTROMAGNETIC THEORY. Wave propagation and related phenomena in dielectrics, conductors and plasmas. Wave guides, radiation, antennae, special relativity. Prerequisite: One of PHYS 301, PHYS 354. [3-0-0]

PHYS 455 (3) STATISTICAL MECHANICS. Introduction to quantum statistical mechanics and its application to systems of varying complexity from the simple ideal gas to the degenerate gas. Quantum fluids, phase transitions and simulation methods will also be introduced. Credit cannot be given for both PHYS 403 and 455. Prerequisite: One of PHYS 257, PHYS 203, PHYS 313 and one of PHYS 304, PHYS 450. [3-0-0]

PHYS 458 (4) APPLIED OPTICS. Basic applications of lasers, geometrical optics, fibre optics, diffraction, and Fourier optics. Prerequisite: All of PHYS 250, PHYS 354. [3-3-0]

PHYS 473 (3) APPLIED NUCLEAR PHYSICS. Radioactive decay and radiations, nuclear properties, interactions of neutrons, physical principles of power reactors, nuclear fusion, radiation monitoring and safety. Prerequisite: One of PHYS 450, PHYS 304. [3-0-1*]

PHYS 474 (3) APPLIED SOLID STATE PHYSICS. Symmetry of crystal structures, reciprocal lattice, band theory, conduction in metals and semiconductors, phonons and superconductivity. Prerequisite: One of PHYS 450, PHYS 304. [3-0-0]

PHYS 498 (3) CO-OPERATIVE WORK PLACEMENT IV. Approved and supervised technical work experience in an industrial research setting for a minimum of 3.5 months. Normally taken during the fall term of the fourth year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Physics. Prerequisite: PHYS 399.

PHYS 499 (3) CO-OPERATIVE WORK PLACEMENT V. Approved and supervised technical work experience in an industrial research setting for a minimum of 3.5 months. Normally taken during the summer following the fourth year. Technical report required. Restricted to students admitted to the Co-operative Education Program in Physics. Prerequisite: PHYS 498.

PHYS 500 (3) QUANTUM MECHANICS I. Non-relativistic quantum mechanics with applications to atomic, nuclear and particle physics. Perturbation theory, multielectron atoms, molecular structure, WKB, scattering theory. Prerequisite: One of PHYS 450, PHYS 402.

PHYS 501 (3) QUANTUM MECHANICS II.

Time-dependent perturbation theory, density matrix formalism, NMR, emission and absorption of radiation. Elementary field theory techniques for many body systems. Quasiparticles, phonons, magnons, holes. Relativistic Klein-Gordon and Dirac equations.

PHYS 502 (3) CONDENSED MATTER

PHYSICS I. One-electron theory of solids, energy bands, lattice vibration, transport theory.

PHYS 503 (3) CONDENSED MATTER

PHYSICS II. Interacting electrons, electron-phonon interaction, Hubbard model, magnetism, superconductivity, use of Green functions. Prerequisite: PHYS 502. Corequisite: PHYS 500.

PHYS 504 (3) RELATIVITY AND

ELECTROMAGNETISM. A review of special relativity, and a presentation of classical electromagnetism as a relativistic field theory. Radiation from moving charges, classical electron theory, Wheeler Feynman electrodynamics. Prerequisite: PHYS 401.

PHYS 505 (3) NUCLEAR PHYSICS. General properties of the nucleus, two-body problem at low energies, nuclear forces, nuclear models, nuclear reactions, interaction of nuclei with electromagnetic radiation, beta-decay. Properties of elementary particles, classification of interactions, intermediate and high energy reactions.

PHYS 506 (3) ELEMENTARY PARTICLE

PHYSICS.

PHYS 507 (3) PLASMA PHYSICS. Equilibrium theory of ionized gases, kinetic theory, transport coefficients. Motion of individual charges, cyclotron radiation. Waves, Landau damping. Derivation of magnetohydrodynamic equations.

PHYS 508 (3) QUANTUM FIELD THEORY.

Prerequisite: All of PHYS 500, PHYS 526.

PHYS 509 (2-4) D THEORY OF

MEASUREMENTS. Estimation of parameters from experimental measurements; maximum likelihood; least squares; tests of significance (chi square, etc). Noise properties of common devices. Extracting signals from noise; signal averaging; auto and cross-correlation, etc.

PHYS 510 (2-3) D STOCHASTIC PROCESSES
IN PHYSICS. Statistical and thermodynamic fluctuations in electromagnetic, mechanical and thermal systems. Fundamental limits of observation and measurement in classical and quantum systems.

PHYS 511 (2-3) D SPECIAL TOPICS IN

MAGNETISM. Spin Hamiltonian, theory of ferro- and antiferromagnetism, nuclear magnetic resonance, relaxation in spin systems. Prerequisite: PHYS 503.

PHYS 512 (2-3) D VIBRATIONAL

SPECTROSCOPY OF SOLIDS. Symmetry of vibrations of isolated molecules; calculation of normal modes; vibrations of molecular crystals, optical properties of solids.

PHYS 513 (2-4) D TOPICS IN ADVANCED

SPECTROSCOPY.

PHYS 514 (2-4) D CLASSICAL FIELD

THEORY. Classical field theory in flat space-time. Variational principles and conservation laws. Tensor fields and manifolds. The course is a preparation for study of relativistic gravitation and quantum field theory. Prerequisite: PHYS 504.

PHYS 515 (2-4) D NEURAL NETWORKS.

Perceptrons; the XOR problem; hidden units; back propagation; generalized delta rule; content addressable memories (Hopfield model); extended Hopfield model; travelling salesman problem; model based on neurons that exhibit hysteresis.

PHYS 516 (3) STATISTICAL MECHANICS.

Mean field theory, Landau theory of phase transitions, critical phenomena, renormalization theory. Monte Carlo method, linear response theory, fluctuations.

PHYS 517 (2) INTRODUCTION TO LOW

TEMPERATURE PHYSICS. Cryogenic techniques and instrumentation. Some aspects of superconductors and liquid helium.

PHYS 518 (2/3) D SUPERCONDUCTIVITY.

Conventional theories: BCS and Landau-Ginsburg, Josephson effect. New theories of high TC superconductivity.

PHYS 519 (2) SURFACE PHYSICS.

Structure and electronic properties of solid surfaces, optical properties, adsorption phenomena, surface analysis, epitaxy.

PHYS 521 (2-4) C GROUP THEORY METHODS

IN QUANTUM MECHANICS. Selected topics from atomic, molecular, solid state, nuclear and elementary particle physics treated by group theory methods. Prerequisite: PHYS 500.

PHYS 522 (2/3) D TOPICS IN INTERMEDIATE

ENERGY NUCLEAR PHYSICS. Prerequisite: PHYS 505.

PHYS 523 (2-3) D QUANTUM ELECTRONICS

AND NONLINEAR OPTICS. Macroscopic and microscopic treatments of linear and non-linear response to electromagnetic fields.

PHYS 524 (4) NON-EQUILIBRIUM

THERMODYNAMICS. Recent developments in thermodynamics, with special emphasis on the stability of systems far from equilibrium.

PHYS 525 (2-3) D ADVANCED CONDENSED

MATTER PHYSICS. Current issues in condensed matter theory. Prerequisite: All of PHYS 500, PHYS 503.

PHYS 526 (3) QUANTUM

ELECTRODYNAMICS.

PHYS 527 (2/3) D TOPICS IN NUCLEAR

PHYSICS. Selected topics from current nuclear theory. Prerequisite: All of PHYS 501, PHYS 505.

PHYS 528 (2/3) D ELEMENTARY PARTICLE

PHYSICS. Prerequisite: All of PHYS 508, PHYS 505. Corequisite: PHYS 508.

PHYS 529 (2/3) D TOPICS IN QUANTUM

THEORY.

PHYS 530 (2-4) D TOPICS IN GENERAL

RELATIVITY THEORY.

Prerequisite: PHYS 514.

PHYS 531 (3/4) C PARTICLE DETECTION

TECHNIQUES.

PHYS 532 (4) PLASMA DYNAMICS. The magnetohydrodynamic formulation of plasma dynamics including the effects of diffusion, viscosity, thermal conduction and ionization phenomena on plasma motion.

PHYS 533 (2) LASER PHYSICS. Interaction of EM-radiation with matter, Gaussian beams and optical resonators, laser oscillators, specific laser systems, amplification in laser media, the electro-optic effect.

PHYS 534 (3) RADIOTHERAPY PHYSICS I.

Principles of dosimetry of ionizing radiation with emphasis on applications to radiotherapy and radiobiology.

PHYS 535 (3) RADIOTHERAPY PHYSICS II. A continuation of PHYS 534, including an extension of the topics discussed in that course.

PHYS 536 (2) ADVANCED RADIATION

BIOPHYSICS. Interactions of radiation with matter in living cells. Description of events following ionizing irradiation; cell survival as a function of dose; survival models. Students will be expected to present a seminar on a pre-selected topic, and participate in class discussions.

PHYS 537 (3) PHYSICS OF SOFT ORGANIC

INTERFACES. Interactions in liquids, free liquid interfaces, surfactant assemblies, membranes of biological organisms, emphasizing the relation of chemical characteristics to structure and physical properties. Prerequisite: One of PHYS 303, CHEM 304.

PHYS 538 (3) PHYSICAL PROPERTIES OF

SYNTHETIC AND NATURAL MEMBRANE
INTERFACES.

PHYS 539 (3) RADIATION DOSIMETRY.**PHYS 540 (3) RADIOLOGICAL IMAGING.**

PHYS 541 (3) NUCLEAR MEDICINE.
Prerequisite: PHYS 473.

PHYS 542 (3) NUCLEAR MAGNETIC

RESONANCE IMAGING.

PHYS 543 (3) BIOMEDICAL OPTICS.

PHYS 545 (3) ANATOMY, PHYSIOLOGY AND
STATISTICS FOR MEDICAL PHYSICISTS.
Restricted to graduate students in the M.Sc. (Medical Physics) Specialization.

PHYS 549 (12) MASTER'S THESIS.

PHYS 555 (1-6) C DIRECTED STUDIES IN
PHYSICS. With approval of the department head, advanced studies under the direction of a staff member may be arranged in special cases.

PHYS 570 (2-4) C RADIO ASTRONOMY.

Emission, propagation and detection of radio noise from the solar system, galaxy and extragalactic radio sources.

PHYS 571 (3) PHYSICAL COSMOLOGY.

Credit will not be given for both ASTR 403 and PHYS 571. [3-0-0]

PHYS 599 (12/18) C M.A.SC. THESIS.

PHYS 649 (0) PH.D. THESIS.

PLAN — COMMUNITY AND REGIONAL PLANNING SCHOOL OF COMMUNITY AND REGIONAL PLANNING

Not all courses offered each year.

PLAN 425 (3) URBAN PLANNING ISSUES AND CONCEPTS. Evolution, practice and future of urban planning and development, with emphasis on institutional arrangements, housing, transportation, urban design and development control. For third- and fourth-year undergraduate students interested in urban planning. Prerequisite: One of URST 200, COMM 306, GEOG 350 or permission of the instructor. [3-0]

PLAN 500 (3) FUNDAMENTALS OF PLANNING PRACTICE. The design and use of problem-solving procedures. The effective leadership of planning groups, and the development of appropriate community planning processes. Styles of public participation.

PLAN 501 (3) HISTORY OF COMMUNITY AND REGIONAL PLANNING. The origins and evolution of modern urban and regional planning in North America and Europe, emphasizing the changing role of government in the development of Canadian communities during this century.

PLAN 502 (3) PLANNING THEORY. Historical and contemporary concepts of the planning process and its legitimacy. The role of the state, public interest, and the responsibilities of professional planners. Concepts and codes of professional ethics.

PLAN 503 (3) PLANNING FOR COMMUNITY ECONOMIC DEVELOPMENT. Theories of community economic development planning. Concepts of community wealth, income, growth and development. Models of the formal and informal community economy.

PLAN 504 (3) THE ECOLOGICAL CONTEXT OF PLANNING. A planning-oriented approach to ecosystems theory emphasizing the structural and functional properties of the biophysical environment. Definition of the urban-centered region in terms of interregional flows and ecological accounts.

PLAN 505 (3) COMMUNITY DEVELOPMENT PLANNING. Evolution of development theory emphasizing the changing relationships among community, state and individuals. Development paradigms and alternative concepts of community.

PLAN 506 (3) THE LEGAL CONTEXT OF PLANNING. Legal principles affecting the administration of planning programs including the meaning and sources of the law, the separation of the functions of government, the Canadian Constitution and Charter of Rights and Freedoms, the law of Canadian municipal corporations, natural resource law, the nature and control of administrative action, judicial review of discretionary power, and the drafting of legislation.

PLAN 507 (3) REGIONAL DEVELOPMENT PLANNING. Origins, theory, and practice of planning for regions in Canada and abroad. Types of planning regions, institutional forms for regional planning, regional disparities, and approaches to regional analysis. Resource frontiers, urban, amenity, and rural regions provide the policy context.

PLAN 511 (3) QUANTITATIVE REASONING AND STATISTICS FOR PLANNING. Research design and statistics for the analysis of empirical issues in planning and policy studies.

PLAN 513 (3) ECONOMIC IMPACT AND EVALUATION FOR PLANNING. Topics include economic base, income-expenditure, input-output, computer simulation, cost-benefit, goals achievement matrix and the planning balance sheet.

PLAN 514 (3) IMPACT ANALYSIS FOR PLANNING. A planning-oriented approach to environmental impact assessment emphasizing institutional, procedural and methodological issues. The conceptual and systemic relationship among biophysical, social and economic impact assessment and the evolving relationship with community development planning.

PLAN 515 (3) DATA FOR PLANNING PRACTICE. Data collection and analysis in relation to professional practice and the scientific method. Questionnaire surveys and alternatives including secondary analysis, unobtrusive measures and client participation techniques.

PLAN 540 (3-12) D PLANNING PROJECT. Group preparation and presentation of a professional report.

PLAN 545 (3/6) D PLANNING STUDIES ABROAD. An extended site visit outside Canada to understand the cultural context for community and regional planning issues and the local institutional response.

PLAN 547 (3/6) D PROFESSIONAL PROJECT REPORT. Research and preparation of a professional project report on a planning topic in public policy or professional practice.

PLAN 548 (1-12) D CURRENT ISSUES IN PLANNING. Each year the school may offer one or more courses on a topical issue covering recent advances in the field.

PLAN 549 (6-12) C MASTER'S THESIS. Research and preparation of a thesis on a topic in public policy or professional practice.

PLAN 550 (3-12) C DIRECTED STUDIES. In special cases and with the approval of the Director of the school, a student may study an advanced topic under the direction of a faculty member.

PLAN 561 (3) SEMINAR IN REAL PROPERTY DEVELOPMENT AND PLANNING. Topics will vary.

PLAN 565 (1-12) D CURRENT ISSUES IN REAL PROPERTY DEVELOPMENT AND PLANNING. Topics will vary.

PLAN 571 (3) HOUSING POLICY AND PRACTICE IN CITIES OF THE DEVELOPING WORLD. Housing development and government policy in cities of developing countries.

PLAN 572 (3) PROJECT AND PROGRAM DESIGN IN DEVELOPING ASIAN COUNTRIES. Development theories, the role of the state, the importance of political and social contexts, and the influence of foreign planning models.

PLAN 573 (3) SHELTER AND SERVICES IN DEVELOPING COUNTRIES. Human settlements paradigm in international development, especially in relation to urban poverty and enabling strategies.

PLAN 575 (3) INTERNATIONAL DEVELOPMENT PLANNING SEMINAR. Topics will vary.

PLAN 580 (3) URBAN TRANSPORTATION PLANNING. Topics include the relationship between transportation and urban activity systems; analysis of supply and demand; accessibility and environment; institutional arrangements and public finance.

PLAN 581 (3) URBAN INFRASTRUCTURE PLANNING AND DEVELOPMENT. Policy considerations in the provision of infrastructure including the legal framework, institutional arrangements, and public finance. Planning considerations in drainage, waterworks, sewerage and waste management.

PLAN 582 (3/6) D RESIDENTIAL SITE PLANNING STUDIO. Evaluation of neighbourhoods and projects, site analysis, housing types and densities, provision of community facilities and services, and the design of site plans.

PLAN 583 (3) HOUSING AND COMMUNITY PLANNING. The social, economic, political and land use dimensions of Canadian housing in the context of demographic trends, housing demand and affordability. Recent trends in housing policy and the role of the public and private sectors in housing supply.

PLAN 585 (3) HOUSING SEMINAR. Prerequisite: PLAN 583.

PLAN 586 (3) GENDER AND PLANNING. Analysis of women's dual roles as users and creators of built environments and the comparative roles of men and women.

PLAN 587 (3-12) D URBAN DESIGN. A studio/seminar on the history of the physical form of cities and theories of city design. Topics include social impacts, heritage and environmental conservation, urban revitalization, and the legal and administrative instruments for the implementation of city designs.

PLAN 588 (3) SOCIAL ASPECTS OF URBAN FORM. Exploration of how the urban built environment has been shaped by the actors in the development process.

PLAN 589 (3) INFLUENCING THE POLICY PROCESS. The evolution of policies through the legislative, regulatory and bureaucratic processes with an emphasis on the federal and provincial governments.

PLAN 590 (3/6) C PUBLIC POLICY AND URBAN PLANNING. Development of public policy in theory and practice. The impact of federal, provincial and local government policies on urban and regional planning. Exercises in policy making and documentation.

PLAN 592 (3) URBAN RESTRUCTURING. The determinants of urban restructuring, including emerging theoretical perspectives and case studies of Canadian and foreign cities.

PLAN 593 (3) RESOURCE ANALYSIS FOR REGIONAL PLANNING. An ecological approach to land use and resource analysis for regional planning covering inventory, classification, and alternative methods of analysis.

PLAN 595 (3) PLANNING AND NEGOTIATION IN NATURAL RESOURCES MANAGEMENT. Institutional structures for policy development and implementation.

PLAN 596 (3) SEMINAR ON ENVIRONMENTAL-ECONOMIC SYSTEMS. Relationships between economic activity and the biophysical environment. Topics include the assumptions and determinants underlying economic growth, market failure and traditional approaches to public intervention, the implications of alternatives such as the steady-state economy and sustainable development. Prerequisite: PLAN 504.

PLAN 597 (3) PLANNING FOR WATER RESOURCES MANAGEMENT. The relationships among relevant bio-physical, socio-economic and institutional systems as applied to regional planning for watersheds, lakes, estuaries, coastal zones and international river basins. Water supply, waste disposal, fisheries, aquaculture, recreation, hydropower and flood control.

PLAN 599 (3) ENVIRONMENTAL POLICY ANALYSIS. Determination of risks and values in environmental policy decisions.

PLAN 601 (3) RESEARCH METHODS SEMINAR.

PLAN 602 (3) PLANNING THEORY ADVANCED SEMINAR.

PLAN 603 (3) PH.D. COLLOQUIUM.

PLAN 649 (0) PH.D. THESIS.

PLAS — PLASTIC SURGERY FACULTY OF MEDICINE

PLAS 514 (3) ADVANCED PLASTIC SURGERY I. Seminar and tutorial on selected topics of plastic surgery. Given in alternate years.

PLAS 515 (2) ADVANCED PLASTIC SURGERY II. The second year course of the above program. Given in alternate years.

PLAS 750 (0) PLASTIC SURGERY CONFERENCE. Presentation of clinical cases with discussion of the underlying pathophysiology as related to patient management. One hour weekly.

PLAS 751 (0) PLASTIC SURGERY SEMINAR COURSE. A one-hour weekly seminar course spread over two years for discussion of

embryology, anatomy, physiology and pathology relative to the specialty of plastic surgery. These basic science aspects are discussed in relation to patient management.

PLAS 752 (0) OPERATIVE PLASTIC SURGERY. Techniques of surgery and the relative anatomy and pathophysiology are reviewed during the course of operative procedures.

PLNT — PLANT SCIENCE FACULTY OF LAND AND FOOD SYSTEMS

Most of the undergraduate courses have been renamed as Agroecology (AGRO). Please see this section. The Faculty of Land and Food Systems is undergoing major program revisions. All new and continuing students are required to consult the Faculty.

PLNT 508 (3) MOLECULAR GENETICS OF PLANT-MICROBE INTERACTIONS. Molecular genetics of microbial pathogenesis and symbiosis on plants. Analysis of plant-pathogen recognition and host response to interaction with viruses, bacteria and fungi. Offered in alternate years. Equivalency: MICB 508.

PLNT 513 (3/6) C ADVANCES IN PLANT BREEDING. Recent advances in plant breeding methodology. Novel methods of gene transfer and the application of in vitro technology to breeding problems. Offered in alternate years. Prerequisite: All of PLNT 413, BIOL 433.

PLNT 523 (0) GRADUATE RESEARCH SEMINAR.

PLNT 525 (3) ANALYSIS OF PLANT PERFORMANCE. Quantitative analysis of plant growth and yield. Indices of plant performance and relationships among crop density, planting patterns, canopy structure and productivity.

PLNT 530 (2-6) C DIRECTED STUDIES.

PLNT 531 (3) BIOLOGICAL CONTROL. Theory of biological control. Case histories. Concepts of natural insect population regulation. Development of integrated control programs and environmental manipulations. Offered in alternate years.

PLNT 532 (3) ADVANCED INSECT PHYSIOLOGY. Recent advances in selected fields of insect physiology, emphasizing the neural and/or hormonal integration of metabolic activities. Offered in alternate years.

PLNT 535 (3) TOPICS IN PLANT PATHOLOGY. Advances in techniques for pathogen detection, disease assessment and plant disease control. Offered in alternate years.

PLNT 536 (3) PLANT VIROLOGY. Identification, structure, biosynthesis and control of viruses causing plant diseases. Laboratories will emphasize instrumental techniques used in plant virus research. Limited enrolment. Offered in alternate years. [2-3; 0-0]

PLNT 540 (3) PLANT MOLECULAR BIOLOGY LABORATORY. Techniques of purification, cloning, sequencing, restriction-hybridization analysis of plant nucleic acids, in vitro labelling

of plant nucleic acids and proteins, and electrophoresis and immunodetection of plant proteins. Offered by the Biotechnology Teaching Laboratory in cooperation with Plant Science. Admissions to the course is limited and requires recommendation from the Program Coordinator. Prerequisite: BIOL 335 is recommended. Equivalency: BOTA 544, FRST 503.

PLNT 549 (12) MASTER'S THESIS.

PLNT 649 (0) PH.D. THESIS.

POLI — POLITICAL SCIENCE FACULTY OF ARTS

For details of courses consult the Departmental website at www.politics.ubc.ca.

POLI 100 (3) INTRODUCTION TO POLITICS. Political issues and case studies, drawn from Canadian and international contexts, will be used to introduce students to central debates and concepts of politics and political analysis.

POLI 101 (3) THE GOVERNMENT OF CANADA. An examination of the institutions and processes of Canadian government.

POLI 220 (3) INTRODUCTION TO COMPARATIVE POLITICS. A comparative analysis of foreign governments. Specific countries to be covered will vary according to section; consult the brochure issued by the Department.

POLI 240 (3) CURRENTS OF POLITICAL THOUGHT. A critical introduction to some major ideologies and traditions of Western political thought that examines their philosophical origins as well as their implications for political life.

POLI 260 (3) INTRODUCTION TO GLOBAL POLITICS. Applies conceptual tools to topics such as war, conflict management, the global economy, poverty, and civil society. Prerequisite: Recommended for prospective students of POLI 360-373.

POLI 301 (3) CANADIAN POLITICAL PARTIES. The organization and operation of party politics and the systems of party competition in Canada. The focus is on national-level politics. Prerequisite: POLI 101.

POLI 302 (3/6) D PUBLIC ADMINISTRATION. The structure and organization of the administrative branch of government in theory and practice. Administrative powers and policy-making in the modern state. Examples of the administrative processes are drawn from Canada and other countries. Prerequisite: POLI 101.

POLI 303 (3) FEDERALISM IN CANADA. Theory and practice of federalism; cultural duality, social stresses, and problems of flexibility. The constitution and role of the courts. Prerequisite: POLI 101.

POLI 304 (3) BRITISH COLUMBIA GOVERNMENT AND POLITICS. An examination of the party system, and other institutions and processes of the British Columbia political system. Prerequisite: POLI 101.

POLI 305 (3) CANADIAN POLITICAL IDEAS.

Political theories and ideologies in Canada. Prerequisite: POLI 101.

POLI 306 (3) LOCAL GOVERNMENT AND POLITICS IN CANADA. Local and regional political institutions and processes in Canada, with particular attention to those of Vancouver and other British Columbia localities. Prerequisite: POLI 101.

POLI 307 (3) QUEBEC GOVERNMENT AND POLITICS. The nature of politics and the conduct of government in contemporary Quebec. The course is open to students from fields other than political science. Prerequisite: POLI 101.

POLI 308 (3/6) D ISSUES IN CANADIAN POLITICS. An examination of one or more major issues in Canadian politics (e.g., the Charter, electoral reform). Topics will vary from year to year. Prerequisite: POLI 101.

POLI 320 (3/6) D GOVERNMENT AND POLITICS OF THE UNITED STATES OF AMERICA. The institutions, behaviour, and policies of the political system of the US in a comparative context. The constitution and the major institutions of government and public policy.

POLI 321 (3/6) D CHINESE POLITICS AND DEVELOPMENT. The course will explore various aspects of Chinese politics and the dynamics of China's development since 1949. Topics include: the Cultural Revolution, political reform and protest, and economic reform policies and their consequences.

POLI 322 (3) JAPANESE GOVERNMENT AND POLITICS. A general introduction to modern Japanese politics from various theoretical and comparative perspectives.

POLI 323 (3/6) D SOUTH ASIAN GOVERNMENT AND POLITICS. Comparative analysis of politics and government in India, Pakistan, Bangladesh, and Sri Lanka. Imperial legacies and nationalist movements; political institution-building amidst socio-cultural diversity; parties and interest groups; elections and leadership crises; military intervention; ethnic and class conflicts; foreign policy.

POLI 324 (3/6) D SOUTHEAST ASIAN GOVERNMENT AND POLITICS. The political systems of contemporary Southeast Asia.

POLI 325 (3) COMMUNIST AND POST-COMMUNIST POLITICS. An examination of the origins, development, and demise of Communist political systems, as well as the nature of post-Communist politics, with special emphasis on the Soviet Union and its successor states.

POLI 326 (3) EUROPEAN POLITICS: SELECTED CASES. The politics and government of one or more European countries: political development, institutional structure, party politics, and policy-making. The specific country or countries will vary by section.

POLI 327 (3) EUROPEAN INTEGRATION. Post-1945 integration of Europe, comparison of national politics and attitudes to integration,

and the history and institutions of the European Union.

POLI 328 (3/6) D TOPICS IN COMPARATIVE POLITICS. Topics will vary from year to year. Consult the departmental website.

POLI 329 (3) GENDER AND POLITICS. Relations between gender and political processes and institutions, including the impact of globalization and economic development.

POLI 330 (3) JAPANESE POLITICAL ECONOMY. Issues in contemporary Japanese political economy, including industrial policy, the Keiretsu groupings, the main-bank system, trends toward deregulation, and business-labour relations.

POLI 331 (3) KOREAN GOVERNMENT AND POLITICS. An introduction to the politics of Korea. The evolution of Korean politics from authoritarian rule to democratic transition, focusing on present and future political, economic and social issues.

POLI 332 (3/6) D POLITICS AND GOVERNMENT OF LATIN AMERICA. A comparative examination of democracy and authoritarianism in Latin America: populism, corporatism, bureaucratic authoritarianism, transitions from authoritarianism, and contemporary debates on the quality and diversity of democratic institutions.

POLI 333 (3/6) D ISSUES IN COMPARATIVE POLITICS. An examination of a major issue in comparative politics (e.g., the media, gender, nationalism, ethnic conflict). Topics will vary from year to year.

POLI 334 (3) COMPARATIVE DEMOCRATIZATION. Literatures and theories on regime democratization around the world; the roles of political, economic, social, and international factors in encouraging or impeding democratization.

POLI 335 (3/6) D COMPARATIVE FEDERALISM. An empirical and normative analysis of federalism as a way of structuring political life in industrialized democracies, investigating explanations for the design, persistence and operation of federal systems.

POLI 340 (6) HISTORY OF POLITICAL IDEAS. An introduction to the political ideas of leading political philosophers from Ancient Greece to the 19th century.

POLI 342 (3) MODERN POLITICAL THEORY: ANALYSIS OF A SELECTED THEORIST. A detailed examination of an acknowledged masterpiece of modern political theory. The text and attendant literature vary from year to year. Consult the departmental website.

POLI 344 (3/6) D SOCIAL AND POLITICAL THOUGHT. An examination of some of the major concepts in political philosophy such as justice, equality, rights, obligation, liberty in the context of both classical and contemporary political thought.

POLI 345 (3/6) D GENDER AND POLITICS: POLITICAL THOUGHT AND PRACTICE. The role of gender in Western political theory and the implications for the practice of politics.

POLI 346 (3) DEMOCRATIC THEORY. An examination of both classical and contemporary theories of democracy. Representative democratic theory, participatory democratic theory, and their relationship to twentieth century concepts of democracy.

POLI 347 (3/6) D LAW AND POLITICAL THEORY. An examination of law and political theory that considers topics such as sovereignty, constitutionalism, civil disobedience, rights and the political role of judges.

POLI 350 (3/6) D PUBLIC POLICY. An introduction to public policy: rationales for government intervention, the influence of interest groups and political institutions on policy outcomes, and the various stages in the policy process.

POLI 351 (3) ENVIRONMENTAL POLITICS AND POLICY. Domestic and international determinants of environmental policy; alternative approaches to environmental protection. The sustainable development paradigm; public opinion and interest group pressures; risk assessment; mandatory, voluntary and market-based policy instruments.

POLI 352 (3/6) D COMPARATIVE POLITICS OF PUBLIC POLICY. Policy making across industrialized democracies, with a focus on North America and Europe.

POLI 360 (3/6) D SECURITY STUDIES. The contemporary international security context: reorientation of the study of security, patterns of inter- and intrastate conflict and communal violence, dilemmas of international response and conflict management.

POLI 361 (3/6) D INTERNATIONAL VIOLENCE AND ITS CONTROL. A study of the nature of international violence from guerrilla to nuclear war; a survey of theories of the causes of interstate war; recent research findings on the causes of war and conditions for peace; a comparative analysis of strategies for controlling violence through disarmament and the promotion of alternative means of conflict resolution.

POLI 362 (3) THE GREAT POWERS AND INTERNATIONAL POLITICS. An examination of the changing nature of Great Power relations, including procedures and institutions for managing their conflicts, in the pre-Cold War, Cold War, and post-Cold War international systems.

POLI 363 (3/6) D CANADIAN FOREIGN POLICY. An analysis of Canadian foreign policy on important international issues since the 1960s and of the policy-making process. Issues may include defence commitments, economic relations, activities of international organizations, and relations with the US, Europe, USSR, Asia and the Third World.

POLI 364 (3/6) D INTERNATIONAL ORGANIZATIONS. Analysis of the activities and influence of modern international organizations in international security, economic, and social issue areas. The course will focus on organizations associated with the United Nations, but other world and regional bodies will be analysed as well.

POLI 365 (3/6) D ASIAN INTERNATIONAL RELATIONS. Analysis of the foreign policies of one or more of the states of East, Southeast, and South Asia; their relations with other states in the region as well as with major outside powers.

POLI 366 (3) INTERNATIONAL POLITICAL ECONOMY. An analysis of governmental policies and international political bargaining in regard to such issues as international investment, trade, and monetary relations. Prerequisite: ECON 100 or 309 are recommended.

POLI 367 (3/6) D INTERNATIONAL RELATIONS THEORY AND THE INTERNATIONAL SYSTEM. The evolution of the international system and empirical and normative theories of international relations such as realism, liberalism, and Marxism.

POLI 368 (3) JAPAN'S FOREIGN RELATIONS. Japan's security policy, aid policy, relations with the United States and with neighbouring Asian nations, role in the United Nations and other international institutions.

POLI 369 (3/6) D ISSUES IN INTERNATIONAL SECURITY. An examination of issues such as interstate conflicts, terrorism, environmental change, international crime. Topics will vary from year to year.

POLI 370 (3-6) D ISSUES IN INTERNATIONAL CONFLICT MANAGEMENT. Problems of managing conflict in the international system (e.g., intervention, mediation, sanctions). Topics will vary from year to year.

POLI 373 (3) ETHICS IN WORLD POLITICS. When is it right to wage war? Who should pay for global warming? Should the wealthy provide foreign aid—how much? Analysis of traditions of moral thought to reach reasoned judgments about such dilemmas in global politics.

POLI 374 (3/6) D INTERNATIONAL PEACEKEEPING. The development of peacekeeping within and outside the United Nations system and as an instrument of conflict management.

POLI 375 (3/6) D GLOBAL ENVIRONMENTAL POLITICS. Ecological consequences of the global political economy.

POLI 380 (3) QUANTITATIVE METHODS IN POLITICAL SCIENCE. An introduction to quantitative methods as utilized in the study of Political Science. Not available for credit in the Faculty of Commerce and Business Administration.

POLI 381 (3) TOPICS IN QUANTITATIVE ANALYSIS. Application of quantitative techniques to selected topics in Political Science. Topics vary from year to year. Consult the departmental website. Prerequisite: POLI 380.

POLI 385 (3/6) D PUBLIC OPINION AND ELECTIONS. Psychological and social foundations of public opinion; quality of democratic decision-making; how voters make up their minds; impact of electoral systems; social bases of party systems; campaigns and the mass

media. The Canadian experience in comparative context.

POLI 390 (6/12) D HONOURS SEMINAR. An examination of the dimensions of Political Science and the major debates within the discipline.

POLI 401 (3/6) D CANADIAN PROVINCIAL AND REGIONAL POLITICS. Seminar examines political parties, processes, and institutions in the provincial political systems and regional arrangements between provinces. Prerequisite: POLI 101 and one of POLI 301, POLI 302, POLI 303, POLI 304, POLI 305, POLI 306, POLI 307, POLI 308.

POLI 402 (3/6) D LAW AND POLITICS OF THE CANADIAN CONSTITUTION. Seminar on the origins and development of the Canadian Constitution: the political aspects of federalism and the legal consequences of the Charter of Rights. Prerequisite: POLI 101 and one of POLI 301, POLI 302, POLI 303, POLI 304, POLI 305, POLI 306, POLI 307, POLI 308.

POLI 403 (3/6) D THE POLITICAL ECONOMY OF CANADA. A seminar to the analysis of the interplay of economic and social factors in the shaping of Canadian politics: the major issues and strains in the functioning of the Canadian polity. Prerequisite: POLI 101 and one of POLI 301, POLI 302, POLI 303, POLI 304, POLI 305, POLI 306, POLI 307, POLI 308.

POLI 404 (3/6) D PUBLIC POLICY AND ITS ADMINISTRATION. This seminar examines political and administrative aspects of public policy, particularly in Canada. Prerequisite: POLI 101 and one of POLI 301, POLI 302, POLI 303, POLI 304, POLI 305, POLI 306, POLI 307, POLI 308.

POLI 405 (3/6) D TOPICS IN CANADIAN POLITICS. This seminar examines in depth some of the important issues in Canadian politics. Prerequisite: POLI 101 and one of POLI 301, POLI 302, POLI 303, POLI 304, POLI 305, POLI 306, POLI 307, POLI 308.

POLI 406 (3) ABORIGINAL PEOPLES AND CANADIAN POLITICS. Seminar in political structures, activities, and demands of aboriginal peoples; the policies of federal, provincial, and territorial governments; the relations between these governments and aboriginal peoples; the role of the courts and the constitution. Prerequisite: POLI 101 and at least 3 credits from POLI 301–308.

POLI 420 (3/6) D ADVANCED TOPICS IN COMPARATIVE POLITICS. Seminar in comparative analysis of politics in democratic systems. For specific content in a given year, consult the departmental website. Prerequisite: Two of POLI 220, POLI 320, POLI 321, POLI 322, POLI 323, POLI 324, POLI 325, POLI 326, POLI 327, POLI 328, POLI 329, POLI 330, POLI 331, POLI 332, POLI 333, POLI 350, POLI 351.

POLI 421 (3/6) D ADVANCED TOPICS IN COMPARATIVE POLITICS: NON-WESTERN. A seminar devoted to comparative analysis of politics in non-western states. For specific content in a given year, consult the departmental website. Prerequisite: Two of POLI 220,

POLI 320, POLI 321, POLI 322, POLI 323, POLI 324, POLI 325, POLI 326, POLI 327, POLI 328, POLI 329, POLI 330, POLI 331, POLI 332, POLI 333, POLI 350, POLI 351.

POLI 422 (3/6) D SELECTED PROBLEMS IN COMPARATIVE POLITICS. A seminar devoted to intensive analysis of a contemporary political problem from a comparative perspective, e.g., ethnic politics, class politics, the politics of post-industrial society. For specific content in a given year, consult the departmental website. Prerequisite: Two of POLI 220, POLI 320, POLI 321, POLI 322, POLI 323, POLI 324, POLI 325, POLI 326, POLI 327, POLI 328, POLI 329, POLI 330, POLI 331, POLI 332, POLI 333, POLI 350, POLI 351.

POLI 423 (3/6) D ISSUES IN COMPARATIVE POLITICS. Seminar in comparative analysis of constitutionalism, authoritarianism, democracy, etc. For specific content in a given year, consult the departmental website. Prerequisite: Two of POLI 220, POLI 320, POLI 321, POLI 322, POLI 323, POLI 324, POLI 325, POLI 326, POLI 327, POLI 328, POLI 329, POLI 330, POLI 331, POLI 332, POLI 333, POLI 350, POLI 351.

POLI 424 (6) CHINESE POLITICAL THOUGHT AND INSTITUTIONS. Equivalency: ASIA 411.

POLI 425 (6) COMMUNIST MOVEMENTS IN EASTERN EUROPE SINCE 1900. Equivalency: HIST 435.

POLI 426 (3/6) D SEMINAR ON COMPARATIVE PARTIES AND PARTY SYSTEMS. Prerequisite: Two of POLI 220, POLI 320, POLI 321, POLI 322, POLI 323, POLI 324, POLI 325, POLI 326, POLI 327, POLI 328, POLI 329, POLI 330, POLI 331, POLI 332, POLI 333, POLI 350, POLI 351.

POLI 429 (3) SEMINAR IN ISSUES IN GENDER AND POLITICS. Prerequisite: Two of POLI 220, POLI 320, POLI 321, POLI 322, POLI 323, POLI 324, POLI 325, POLI 326, POLI 327, POLI 328, POLI 329, POLI 330, POLI 331, POLI 332, POLI 333, POLI 345, POLI 350, POLI 351.

POLI 440 (3/6) D CONTEMPORARY POLITICAL THEORY. This seminar examines the political ideas of leading political philosophers of the twentieth century. Consult the departmental website. Prerequisite: Any 6 credits from POLI 240, POLI 340–349.

POLI 442 (3) CONTEMPORARY POLITICAL THEORISTS: ANALYSIS OF A SELECTED THEORIST. This seminar examines in detail the political ideas of an important political philosopher of the twentieth century. The theorist studied varies from year to year. Consult the departmental website. Prerequisite: Any 6 credits from POLI 240, 340–349.

POLI 444 (3) SOCIAL SCIENCE AND POLITICAL THEORY. This seminar examines the political and social theories of the founders of modern social science through the relevant writings of such theorists as Tocqueville, Comte, Mill, Marx, Toennies, Weber, and Durkheim. Prerequisite: Any 6 credits from POLI 240, 340–349.

POLI 446 (3/6) D TOPICS IN POLITICAL THOUGHT. A seminar devoted to the intensive study of a concept, theme, or school in the history of political thought or contemporary political philosophy. Topics vary from year to year. Consult the departmental website. Prerequisite: Any 6 credits from POLI 240, 340–349.

POLI 460 (3/6) D FOREIGN POLICY ANALYSIS. A seminar devoted to the analysis of the foreign policies of one or more states, as well as to the study of literature pertaining to foreign policy analysis. For specific content in a given year, consult the departmental website. Prerequisite: Two of POLI 260, POLI 360, POLI 361, POLI 362, POLI 363, POLI 364, POLI 365, POLI 366, POLI 367, POLI 368, POLI 369, POLI 370.

POLI 461 (3) PEACE AND CONFLICT STUDIES. A seminar on a selected topic concerning the causes of war and strategies for the promotion of peace. For specific content in a given year, consult the departmental website. Prerequisite: Two of POLI 260, POLI 360, POLI 361, POLI 362, POLI 363, POLI 364, POLI 365, POLI 366, POLI 367, POLI 368, POLI 369, POLI 370.

POLI 462 (3) INTERNATIONAL RELATIONS THEORY. This seminar examines some of the major theoretical approaches to the study of international relations. For specific content in a given year, consult the departmental website. Prerequisite: Two of POLI 260, POLI 360, POLI 361, POLI 362, POLI 363, POLI 364, POLI 365, POLI 366, POLI 367, POLI 368, POLI 369, POLI 370.

POLI 463 (3) INTERNATIONAL INTERDEPENDENCE. This seminar analyses issues relating to the politics of international economic relations. For specific content in a given year, consult the brochure issued by the Department. Prerequisite: Two of POLI 260, POLI 360, POLI 361, POLI 362, POLI 363, POLI 364, POLI 365, POLI 366, POLI 367, POLI 368, POLI 369, POLI 370. 6 credits of ECON are recommended.

POLI 464 (3/6) D PROBLEMS IN INTERNATIONAL RELATIONS. Content varies from year to year. Consult the departmental website. One section (of 3 credits) is reserved for fourth-year students in the Major program in International Relations.

POLI 465 (3) INTERNATIONAL LAW. The nature, sources, and sanctions of international law; the notion of nationhood with particular reference to the status of the British Dominions; territorial and extra-territorial jurisdiction; diplomatic and sovereign immunities; international delinquency; treaties; settlement of disputes; international organizations. This course may not be taken for credit in both Arts and Law. Equivalency: LAW 316.

POLI 466 (3) THE POLITICS OF INTERNATIONAL LAW. Seminar on the origins and politics of international law, and its impact on international affairs; the laws of war, human rights, environment, law of the sea, and international criminal law.

POLI 490 (6) HONOURS SEMINAR. An advanced seminar dealing with some of the classic themes and emerging frontiers in the discipline.

POLI 491 (6) HONOURS ESSAY.

POLI 501 (3/6) D CANADIAN GOVERNMENT AND POLITICS.

POLI 502 (3/6) D CANADIAN POLITICAL INSTITUTIONS AND PROCESSES.

POLI 503 (3/6) D CANADIAN POLITICAL PARTIES AND PARTICIPATION.

POLI 504 (3/6) D TOPICS IN CANADIAN POLITICS.

POLI 511 (3/6) D COMPARATIVE GOVERNMENT AND POLITICS.

POLI 512 (3/6) D THEORIES IN COMPARATIVE POLITICS: POLITICAL DEVELOPMENT.

POLI 513 (3/6) D THEORIES IN COMPARATIVE POLITICS: CLEAVAGES AND INTEGRATION.

POLI 514 (3/6) D COMPARATIVE WESTERN GOVERNMENTS.

POLI 515 (3/6) D COMPARATIVE NON-WESTERN GOVERNMENTS.

POLI 516 (3/6) D ISSUES IN COMPARATIVE POLITICS.

POLI 521 (3/6) D POLITICAL THEORY.

POLI 522 (3–6) D TOPICS IN POLITICAL THEORY.

POLI 523 (3/6) D POLITICAL THOUGHT.

POLI 531 (3/6) D PUBLIC ADMINISTRATION.

POLI 532 (3/6) D TOPICS IN PUBLIC ADMINISTRATION.

POLI 533 (3/6) D TOPICS IN PUBLIC POLICY.

POLI 549 (6/12) C MASTER'S THESIS.

POLI 551 (3/6) D POLITICAL BEHAVIOUR.

POLI 552 (3/6) D RESEARCH SEMINAR IN POLITICAL BEHAVIOUR.

POLI 553 (3/6) D TOPICS IN EMPIRICAL THEORY.

POLI 561 (3/6) D INTERNATIONAL RELATIONS.

POLI 562 (3/6) D TOPICS IN INTERNATIONAL RELATIONS.

POLI 563 (3/6) D INTERNATIONAL ORGANIZATION.

POLI 564 (3/6) D RESEARCH SEMINAR IN INTERNATIONAL RELATIONS.

POLI 571 (3/6) D METHODS OF POLITICAL ANALYSIS.

POLI 572 (3/6) D QUANTITATIVE TECHNIQUES OF POLITICAL ANALYSIS.

POLI 580 (3/6) C DIRECTED STUDIES.

POLI 649 (0) PH.D. THESIS.

POLS — POLISH FACULTY OF ARTS

POLS 110 (6) BASIC POLISH. Introduction to contemporary Polish. Oral practice, grammar, reading, writing.

POLS 300 (6) INTERMEDIATE POLISH. Intermediate oral practice, grammar, reading, composition. Prerequisite: POLS 200.

POLS 345 (3/6) D INTRODUCTION TO TWENTIETH-CENTURY POLISH LITERATURE. Readings and discussion of selected works of representative writers. Prerequisite: POLS 210.

PORT — PORTUGUESE FACULTY OF ARTS

PORT 101 (3) FIRST-YEAR PORTUGUESE I. Grammar, composition, translation, oral practice.

PORT 102 (3) FIRST-YEAR PORTUGUESE II. Grammar, composition, translation, oral practice. Prerequisite: PORT 101 or equivalent.

PORT 201 (3) SECOND-YEAR PORTUGUESE I. Grammar, composition, translation, oral practice, readings. Prerequisite: PORT 102 or equivalent.

PORT 202 (3) SECOND-YEAR PORTUGUESE II. Grammar, composition, translation, oral practice, readings. Prerequisite: PORT 201.

PORT 392 (3) STUDIES IN PORTUGUESE AND BRAZILIAN LITERATURE.

PRIN — PRINCIPLES OF HUMAN BIOLOGY FACULTY OF MEDICINE

PRIN 401 (12) PRINCIPLES OF HUMAN BIOLOGY. An interdisciplinary approach to the structural design and functioning of the human body, from subcellular organelles to gross anatomic structures. Integrates major concepts from gross anatomy, cell biology, biochemistry, molecular biology, genetics, physiology, immunology, pathology and pharmacology. [7-6-6]

PSYC — PSYCHOLOGY FACULTY OF ARTS

Unless otherwise specified, the prerequisite for 300-level Psychology courses is PSYC 100, or 101 and 102, or 6 credits of 200-level Psychology courses (but not 205 or 263), or permission of the instructor. Students registered in the B.Sc. Psychology program must elect Faculty of Arts courses other than Psychology to satisfy the Faculty of Science requirements of 18 credits of Arts. In addition to Psychology 348 and 448, all Psychology courses numbered 60 or higher in the last two digits have Science credit but they cannot be used to satisfy the science requirements of the Faculty of Arts. Listed below are courses in which there is sufficient overlap that credit may be obtained for only one course in each pair. However, it does not necessarily follow that the paired courses are equivalent: PSYC 304, 360, PSYC 217, 366, PSYC 218, 366. Students with fewer than 36 previous credits may not take 300-level courses. Not every course is offered every year. For

current listings, consult the departmental website at www.psych.ubc.ca.

PSYC 100 (6) INTRODUCTORY PSYCHOLOGY. Introduction to Methods and Statistics, Biopsychology, Learning, Perception, Memory, Cognition, Motivation, Assessment, Developmental, Personality, Clinical, and Social Psychology. Credit will be given for either PSYC 100 or PSYC 101 and 102.

PSYC 101 (3) INTRODUCTION TO BIOLOGICAL AND COGNITIVE PSYCHOLOGY. Introduction to Methods and Statistics, Biopsychology, Learning, Perception, Memory, and Cognition. Credit will not be given for both PSYC 100 and PSYC 101.

PSYC 102 (3) INTRODUCTION TO DEVELOPMENTAL, SOCIAL, PERSONALITY, AND CLINICAL PSYCHOLOGY. Introduction to Methods and Statistics, Motivation, Assessment, Developmental, Personality, Clinical, and Social Psychology. Credit will not be given for both PSYC 100 and PSYC 102.

PSYC 205 (3/6) D CONTEMPORARY ISSUES IN PSYCHOLOGY. Topics include addiction, culture and evolution in social behaviour, personal relationships, pro- and anti-social behaviour, judgment and decision-making, prejudice and discrimination. Consult the Psychology Department for topics offered each term. May be repeated on a different topic once for credit.

PSYC 217 (3) THINKING CLEARLY ABOUT PSYCHOLOGY. Thinking about psychological science, with an emphasis on common errors of judgement. Credit will not be given for both PSYC 217 and 317. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102. Corequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102.

PSYC 218 (3) ANALYSIS OF BEHAVIOURAL DATA. Introduces behavioural data analysis; the use of inferential statistics in psychology and conceptual interpretation of data; experimental design (laboratory, field research methods); presentation of data analyses in reports. Credit will not be given for both PSYC 218 and 318. Prerequisite: PSYC 217. Corequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102.

PSYC 260 (8) EXPERIMENTAL PSYCHOLOGY AND LABORATORY. Detailed introduction to experimental and theoretical aspects of motivation, sensation, perception and learning. Prerequisite: Completion of first-year Science program and permission of the department head is also required. Corequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102.

PSYC 263 (3/6) D CONTEMPORARY ISSUES IN BIOPSYCHOLOGY. Contemporary issues in biopsychology (e.g., neuropsychology, mental illness, brain damage, addiction, hormones and the brain). Consult the Psychology Department for topics offered each term. May be repeated on a different topic once for credit.

PSYC 300 (3/6) D BEHAVIOUR DISORDERS. The definition, history, and scope of deviant behaviour; emphasis on the psychological factors that control its origins, maintenance,

and modification. Prerequisite: Either (a) PSYC 100, or (b) all of PSYC 101, PSYC 102, or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 302 (3) INFANCY. Human cognition, perception, motor, social, emotional needs, brain development and their interactions from birth until the emergence of language. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102 or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 303 (3) TESTS AND MEASUREMENTS I. Theory and practice of mental measurement, test reliability and validity, uses, administration, scoring, and interpretation of psychological tests. Prerequisite: One of PSYC 217, PSYC 366. Corequisite: May be taken concurrently with PSYC 366.

PSYC 304 (6) BRAIN AND BEHAVIOUR. The neurobiological bases of behaviour; brain processes involved in perception, motivation, emotion, psychopathology, learning and memory. Open to all Arts and Science majors except those in the B.Sc. Psychology program. Credit will not be given for both PSYC 304 and PSYC 360. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102 or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 305 (6) THEORY OF PERSONALITY. Approaches and principal theoretical problems; research theories of personality as represented by psychological systems. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102 or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 306 (3/6) D PRINCIPLES OF ANIMAL BEHAVIOUR. Theory of evolution; behavioural genetics; social systems as ecological adaptation; mating and parental strategies; instinct and learning; evolution of human behaviour. Credit will be given for only one of BIOL 310 or PSYC 306. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102. Or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 308 (3/6) D SOCIAL PSYCHOLOGY. Theory and research of individual social behaviour; social motivation; attitudes; group interaction; socialization; prejudice. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102 or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 309 (3/6) D COGNITIVE PROCESSES. Contribution of cognitive processes to perception, attention, and memory; cognitive development, language, thinking, and creativity. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102. Or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 312 (3/6) D HISTORY OF PSYCHOLOGY. The principal trends of psychological explanation and events in the history of psychology from the earliest times to the present. Open only to Major or Honours students or by permission of the instructor. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102 or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 314 (3) HEALTH PSYCHOLOGY.

Health-related behaviours such as smoking and drug use; effects of stressful events on health; methods for coping with stress; impact of chronic illness on the family; social support systems. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102. Or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 315 (3) CHILDHOOD AND ADOLESCENCE. Human development from the preschool period through adolescence. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102 or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 319 (3) APPLIED DEVELOPMENTAL PSYCHOLOGY. Applications of theories and research in developmental psychology to contemporary social issues; topics may include daycare, child abuse, divorce and remarriage, substance abuse, sexuality. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102 or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 320 (6) PSYCHOLOGY OF GENDER. Physical, psychological, and cultural influences. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102 or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 321 (6) ENVIRONMENTAL PSYCHOLOGY. Psychological theory and research on the interaction between organisms and the physical environment; emphasis on applications to the design and management of constructed and natural environments. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102 or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 322 (3) ADULTHOOD AND AGING. Issues, theories, and psychological research regarding adulthood and the aging process. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102 or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 323 (3) TESTS AND MEASUREMENTS II. A survey of tests for assessing intelligence, abilities, personality, motivation, and interests. Prerequisite: PSYC 303.

PSYC 325 (3) SOCIALIZATION: MEDIA CONTENT AND EFFECTS. Examines human development in the context of the socializing role of media. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102 or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 333 (3) MEMORY: HISTORICAL, CLINICAL AND COGNITIVE PERSPECTIVES. Classical and contemporary metaphors for memory and their impact on theory development. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102 or (c) 6 credits of 200-level Psychology (but not 205 or 263). Non-PSYC students may substitute LING 460 or LING 200 and 201 for the above prerequisite.

PSYC 334 (3) MEMORY II. Organic amnesia; remembering childhood events; the self and memory; and the problem of distinguishing genuine from simulated forgetting. Prerequisite: PSYC 333.

PSYC 336 (3) THE PSYCHOLOGY OF LANGUAGE I. Psychological abilities underlying human language; language processing, lexical representation, and principles of online conversation; animal versus human communication. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102. Non-PSYC students may substitute ENGL 329, or LING 420, or LING 200 and 201 for the above prerequisite.

PSYC 337 (3) THE PSYCHOLOGY OF LANGUAGE II. Language and thought; deriving psychological principles from language universals; the psychology of literacy, dyslexia, multilingualism, and natural language processing. Prerequisite: PSYC 336 or permission of the instructor.

PSYC 340 (2-6) C DIRECTED STUDIES IN PSYCHOLOGY. Directed investigation of a problem, requiring a written report of the findings. Prerequisite: At least 72% average in the preceding 30 credits and permission of a faculty member who is prepared to supervise the investigation.

PSYC 348 (2-6) C DIRECTED STUDIES IN BIOPSYCHOLOGY. Directed investigation of an experimental problem requiring a written report of the findings. Prerequisite: At least 72% average in the preceding 30 credits and permission of a faculty member who is prepared to supervise the investigation.

PSYC 349 (6) HONOURS SEMINAR. Orientation to psychological research, with special emphasis on ongoing research within the department; effective presentation of research findings, oral and written; critical evaluation of research. Requires a research project. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102; and all of PSYC 217, 218.

PSYC 350 (3/6) D PSYCHOLOGICAL ASPECTS OF HUMAN SEXUALITY. Human sexuality from a biopsychological, behavioural, and psychosocial perspective. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102 or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 359 (3) ADVANCED RESEARCH METHODS IN BEHAVIOURAL SCIENCES. Prepares students for graduate studies or other advanced behavioural research; experimental design and analytic techniques; laboratory with computer applications. Prerequisite: Either (a) all of PSYC 217, PSYC 218 or (b) PSYC 366.

PSYC 360 (6) BIOPSYCHOLOGY. The relationship between the nervous system and behaviour; the physiological basis of perception, motivation, learning, and memory. Prerequisite: PSYC 260.

PSYC 361 (3) MOTIVATION. Experimental analysis of hunger, thirst, exploratory and curiosity behaviour, maternal and reproductive behaviour, fixed action patterns, and complex processes involved in social motivation with

emphasis on the biological basis of motivation. Prerequisite: Either (a) all of PSYC 101, PSYC 102 or (b) one of PSYC 100, PSYC 260, PSYC 304, PSYC 360.

PSYC 363 (3) PRINCIPLES OF ANIMAL LEARNING. Introduction to basic theories of non-associative learning, classical and operant conditioning. Experimental findings from behavioural and biological analyses with animals and humans. Prerequisite: One of PSYC 260, PSYC 263, PSYC 304.

PSYC 364 (3) ANIMAL COGNITION. Investigations of animal cognitive abilities, including spatial learning, timing, counting, concept formation and language use. Experimental findings presented from behavioural and biological approaches with animals and humans. Prerequisite: PSYC 363.

PSYC 365 (3) COGNITIVE NEUROSCIENCE. Brain mechanisms underlying cognitive processes such as perception, attention, consciousness, and memory. Prerequisite: One of PSYC 260, COGS 200.

PSYC 366 (8) METHODS IN RESEARCH. Detailed coverage of basic research methods; the design of experiments and statistical analysis; methods will be applied in laboratory and project work. Prerequisite: PSYC 260 or in Honours program.

PSYC 367 (3) SENSORY SYSTEMS. Anatomy and physiology of the sensory pathways and their relation to perception. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102 or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 368 (3) PERCEPTUAL PROCESSING. Perceptual phenomena and their underlying brain mechanisms. Prerequisite: PSYC 367.

PSYC 401 (3/6) D CLINICAL PSYCHOLOGY. The theoretical and research foundations of the processes of assessment and behaviour modification in clinical psychology. Prerequisite: PSYC 300 or permission of the instructor.

PSYC 403 (6) HUMAN EMOTION. Developmental, cognitive, and social psychological theories and research on human emotion. Prerequisite: One of PSYC 302, PSYC 305, PSYC 308, PSYC 309, PSYC 315.

PSYC 407 (3) CULTURAL PSYCHOLOGY. Cultural influences on human thought; interactions of culture and self, cultural differences in ways of thinking, multicultural experiences, and methodological issues. Prerequisite: PSYC 308.

PSYC 408 (6) SOCIAL PSYCHOLOGICAL RESEARCH. Representative studies on social psychological topics; emphasis on the formulation of significant questions and the design and execution of relevant research. Prerequisite: PSYC 308 and either (a) all of PSYC 217, PSYC 218 or (b) PSYC 366 or permission of the instructor.

PSYC 412 (3) COGNITIVE DEVELOPMENT. The development of fundamental cognitive abilities from infancy through adulthood, including traditional approaches to cognitive development as well as new areas of current

investigation. Prerequisite: One of PSYC 302, PSYC 315, PSYC 319, PSYC 322, PSYC 325.

PSYC 413 (3) SOCIAL AND PERSONALITY DEVELOPMENT. Comprehensive overview of the psychological processes in the social and personality development of infants, children, and adolescents. Prerequisite: One of PSYC 302, PSYC 315, PSYC 319, PSYC 322, PSYC 325.

PSYC 414 (6) RESEARCH METHODS IN DEVELOPMENTAL PSYCHOLOGY. Principal research methods and designs; students undertake supervised research projects. Prerequisite: Either (a) all of PSYC 217, PSYC 218 or (b) PSYC 366; and one of PSYC 302, PSYC 315, PSYC 319, PSYC 322, PSYC 325 or permission of the instructor.

PSYC 415 (6) APPLIED SOCIAL PSYCHOLOGY. The application of social psychological research and theory to the solution of social problems. Prerequisite: PSYC 308 and either (a) all of PSYC 217, PSYC 218 or (b) PSYC 366 or permission of instructor.

PSYC 417 (3/6) D SPECIAL TOPICS IN PSYCHOLOGY. Intensive examination of selected topics and issues in psychology. Prerequisite: Either (a) all of PSYC 217, PSYC 218 or (b) PSYC 366.

PSYC 430 (6) FORENSIC PSYCHOLOGY. The implications of theory and research in psychology for the criminal justice system. Prerequisite: Either (a) PSYC 100 or (b) all of PSYC 101, PSYC 102. Or (c) 6 credits of 200-level Psychology (but not 205 or 263).

PSYC 440 (2-6) C DIRECTED STUDIES IN PSYCHOLOGY. Directed investigation of an experimental problem, requiring a written report of the findings. Prerequisite: At least 72% average in the preceding 30 credits and permission of a faculty member who is prepared to supervise the investigation.

PSYC 448 (2-6) C DIRECTED STUDIES IN BIOPSYCHOLOGY. Directed investigation of an experimental problem requiring a written report of the findings. Prerequisite: At least a 72% average in the preceding 30 credits and permission of a faculty member who is prepared to supervise the investigation.

PSYC 449 (6) HONOURS SEMINAR AND ESSAY. Students carry out a research project and report on its development during seminars. Students also discuss research by Departmental staff, with emphasis on choice of problems, research design and data analysis.

PSYC 460 (3) BEHAVIOURAL NEUROENDOCRINOLOGY. Detailed examination of the interaction between hormones and neural control of reproductive and non-reproductive behaviours; emphasis on gonadal and adrenal hormone effects on learning and memory in the brain. Prerequisite: One of PSYC 304, PSYC 360.

PSYC 461 (3) NEUROPLASTICITY AND BEHAVIOUR. Experimental findings and theory documenting the plasticity of the brain and its relationship to behaviour: emphasis on gene regulation, neurogenesis and cell morphol-

ogy changes in relation to learning and experience. Prerequisite: One of PSYC 304, PSYC 360, PSYC 460.

PSYC 462 (3) DRUGS AND BEHAVIOURAL NEUROSCIENCE. Introduction to neurochemical systems and functional neuroanatomy; animal models of human cognitive processes and mental disorders; neurochemical foundations and treatments for mental disorders. BIOL 205 and/or PCTH 325 recommended. Prerequisite: One of PSYC 304, PSYC 360.

PSYC 463 (3/6) D RESEARCH IN SENSATION AND PERCEPTION. Vision and audition; physical properties and subjective experience of stimuli. Prerequisite: Either (a) all of PSYC 217, PSYC 218 or (b) PSYC 260.

PSYC 465 (3/6) D COMPUTERS IN PSYCHOLOGY. Applications of computers unique to psychology. Microcomputer programming experience desirable but not necessary; students can learn this early in the course. Prerequisite: Either (a) all of PSYC 217, PSYC 218 or (b) PSYC 366.

PSYC 466 (6) RESEARCH METHODS IN ANIMAL LEARNING AND COGNITION. Supervised research project on learning, memory or other cognitive process. Prerequisite: Either (a) all of PSYC 217, PSYC 218 or (b) PSYC 366; and one of PSYC 304, PSYC 306, PSYC 309, PSYC 360, PSYC 363, PSYC 365, BIOL 310.

PSYC 467 (3/6) D PHYSIOLOGICAL PSYCHOLOGY LABORATORY. Laboratory methods for studying the relation between brain and behaviour. Prerequisite: Either (a) all of PSYC 217, PSYC 218 or (b) PSYC 366; and one of PSYC 304, PSYC 360.

PSYC 500 (3/6) D HISTORY OF PSYCHOLOGY.

PSYC 513 (3) SPECIAL TOPICS IN DEVELOPMENTAL PSYCHOLOGY.

PSYC 514 (3) ADVANCED TOPICS IN BIOPSYCHOLOGY. Not offered each year; consult Department of Psychology.

PSYC 515 (3) ANIMAL BEHAVIOUR.

PSYC 516 (3) ANIMAL LEARNING, MEMORY, AND COGNITION. Not offered each year; consult Department of Psychology.

PSYC 517 (3) BIOPSYCHOLOGY OF MOTIVATION. Not offered each year; consult Department of Psychology.

PSYC 520 (3) DEVELOPMENTAL BIOPSYCHOLOGY. Not offered each year; consult Department of Psychology.

PSYC 521 (3/6) D PSYCHOLINGUISTICS.

PSYC 522 (3) DRUGS AND BEHAVIOUR. Not offered each year; consult Department of Psychology.

PSYC 523 (3) EXPERIMENTAL NEUROPSYCHOLOGY AND ANIMAL MODELS. Not offered each year; consult Department of Psychology.

PSYC 524 (3/6) D NEURAL MODELS OF LEARNING AND MEMORY. Not offered each year; consult Department of Psychology.

PSYC 525 (3) ATTITUDES AND SOCIAL COGNITION. To be offered in alternate years only.

PSYC 526 (3) INDIVIDUALS AND GROUPS. To be offered in alternate years only.

PSYC 527 (3) INTERPERSONAL PROCESSES. To be offered in alternate years only.

PSYC 528 (3) ADVANCED METHODS IN SOCIAL PSYCHOLOGY AND PERSONALITY. To be offered in alternate years only.

PSYC 529 (3) SPECIAL TOPICS IN SOCIAL PSYCHOLOGY. Not offered each year; consult Department of Psychology.

PSYC 530 (3) ASSESSMENT: A CRITICAL SURVEY.

PSYC 531 (3) ASSESSMENT: CLINICAL APPLICATIONS.

PSYC 532 (3) CHILD ASSESSMENT.

PSYC 533 (3/6) D CURRENT ISSUES IN CLINICAL PSYCHOLOGY.

PSYC 534 (3–12) C CLINICAL PSYCHOLOGY PRACTICUM.

PSYC 535 (3) PSYCHOPATHOLOGY OF THE ADULT.

PSYC 536 (3) PSYCHOPATHOLOGY OF THE CHILD.

PSYC 537 (3) ETHICAL AND PROFESSIONAL ISSUES IN CLINICAL PSYCHOLOGY.

PSYC 538 (3) CLINICAL NEUROPSYCHOLOGICAL ASSESSMENT.

PSYC 539 (3) HEALTH PSYCHOLOGY.

PSYC 540 (3/6) D STRATEGIES OF PSYCHOLOGICAL INTERVENTION.

PSYC 542 (3) COGNITIVE/BEHAVIOURAL INTERVENTIONS.

PSYC 543 (3/6) D SPECIAL TOPICS IN THEORY.

PSYC 544 (3/6) D PATTERNS OF CHILD-REARING.

PSYC 545 (3/6) D ADVANCED STATISTICS I.

PSYC 546 (3/6) D SEMINAR IN PSYCHOLOGICAL PROBLEMS.

PSYC 547 (2–6) C READING AND CONFERENCE.

PSYC 548 (2) DEPARTMENTAL SEMINAR.

PSYC 549 (6/9) C MASTER'S THESIS.

PSYC 550 (3/6) D OFFENDERS AND THEIR VICTIMS.

PSYC 551 (3/6) D PSYCHOLOGY AND THE CRIMINAL JUSTICE SYSTEM.

PSYC 552 (3) ETHICS AND PROFESSIONAL ISSUES FOR FORENSIC PSYCHOLOGY.

PSYC 553 (3/6) D ADVANCED TOPICS IN FORENSIC PSYCHOLOGY.

PSYC 555 (3) ADVANCED TOPICS IN COGNITIVE/BEHAVIOURAL INTERVENTION.

PSYC 556 (3) PSYCHOLOGICAL TREATMENT OF CHILDHOOD DISORDERS.

PSYC 557 (3) INTERPERSONAL THEORY, RESEARCH AND TREATMENT.

PSYC 559 (6) CLINICAL PSYCHOLOGICAL INTERNSHIP.

PSYC 560 (3) CLINICAL RESEARCH DESIGN.

PSYC 566 (3) THEORIES OF PERSONALITY. To be offered in alternate years only.

PSYC 567 (3) PERSONALITY DIMENSIONS AND STRUCTURE. To be offered in alternate years only.

PSYC 568 (3) PERSONALITY ASSESSMENT. To be offered in alternate years only.

PSYC 569 (3) CONTEMPORARY CONCEPTUAL ISSUES IN PERSONALITY. To be offered in alternate years only.

PSYC 570 (3) COGNITIVE NEUROSCIENCE.

PSYC 571 (3) SPECIAL TOPICS IN COGNITIVE NEUROSCIENCE.

PSYC 573 (3) INDUSTRIAL PSYCHOLOGY.

PSYC 574 (3) BIOPSYCHOLOGY I.

PSYC 575 (3) BIOPSYCHOLOGY II.

PSYC 578 (3/6) D PERCEPTION.

PSYC 579 (3/6) D SPECIAL TOPICS IN PERCEPTION.

PSYC 582 (3/6) D COGNITION.

PSYC 583 (3/6) D SPECIAL TOPICS IN COGNITION.

PSYC 586 (3/6) D DEVELOPMENTAL PSYCHOLOGY I.

PSYC 587 (3/6) D DEVELOPMENTAL PSYCHOLOGY II.

PSYC 590 (3) SURVEY OF SOCIAL PSYCHOLOGY I.

PSYC 591 (3) SURVEY OF SOCIAL PSYCHOLOGY II.

PSYC 592 (3) NEUROETHOLOGY. Not offered each year; consult Department of Psychology.

PSYC 593 (3) NEUROPHYSIOLOGY AND CORTICAL PLASTICITY. Not offered each year; consult Department of Psychology.

PSYC 594 (3)

PSYCHONEUROENDOCRINOLOGY. Not offered each year; consult Department of Psychology.

PSYC 595 (3) PSYCHOPHYSIOLOGY. Not offered each year; consult Department of Psychology.

PSYC 596 (3) STRATEGIES AND TECHNIQUES OF STUDYING BEHAVIOUR. Not offered each year; consult Department of Psychology.

PSYC 649 (0) PH.D. THESIS.

PSYT — PSYCHIATRY FACULTY OF MEDICINE

PSYT 430 (6) PSYCHIATRY CLINICAL CLERKSHIP. Supervised treatment of adult inpatients and outpatients within a multi-disciplinary team. Assessment and treatment of a child and family as well as seminars on selected topics.

PSYT 550 (6) DIRECTED STUDIES. This provides for a program of directed reading and study in such special areas as may be relevant to the student engaged in some particular field of study and research in Psychiatry.

PUNJ — PUNJABI FACULTY OF ARTS

PUNJ 102 (6) INTRODUCTORY PUNJABI. Spoken and written Punjabi.

PUNJ 200 (6) INTERMEDIATE PUNJABI. Study of the grammar and introduction to Punjabi literature. Prerequisite: PUNJ 102.

PUNJ 205 (1) INTRODUCTION TO THE GURMUKHI SCRIPT. The writing system of Punjabi for those with some background in the spoken language. May be taken at the same time as PUNJ 200.

PUNJ 300 (6) ADVANCED PUNJABI. Advanced grammar and conversation. Major genres of Punjabi literature. Prerequisite: PUNJ 200.

RADI — RADIOLOGY FACULTY OF MEDICINE

RADI 700 (0) PHYSICS AND TECHNOLOGY FOR RADIOLOGY. During the first month of residency training, didactic instruction is given at the British Columbia Institute of Technology in the physics of Radiology and the fundamentals of radiographic technology (radiography). During this one-month residency period, the resident is trained in radiographic technology by working as a technologist at one of the affiliated hospitals. Eight hours daily.

RADI 701 (0) CONTINUING INSTRUCTION IN BASIC SCIENCES. During the four years of training in Radiology and/or Nuclear Medicine, scheduled and unscheduled instruction is given in physics (one hour per week). Prerequisite: Pathology correlated with radiology (one hour per week).

RADI 702 (0) CLINICAL INVESTIGATION OR RESEARCH. Each resident is encouraged to complete an investigative project in each of the four years in Radiology, under the supervision of a faculty member, for possible presentation at an annual department meeting. Average 80 hours each year.

RADI 703 (0) CURRENT TOPICS IN RADIOLOGY. Approximately six internationally recognized authorities in Radiology and two or three in Nuclear Medicine are invited to visit this department each year for one to five day periods, during which lectures, consultations and small group seminars are given.

RADI 705 (0) ELECTIVE PERIODS. During the third and fourth years of Radiology for eight hours daily, elective periods of one to twelve months, as acceptable to the resident and the

Program Director, are available for two or more of the radiologic subspecialties including computed tomography, ultrasound, neuroradiology, paediatric radiology, nuclear medicine, angiography, interventional radiology and magnetic resonance imaging.

RADI 710 (0) CLINICAL NUCLEAR MEDICINE. Daily discussions of the clinical applications of Nuclear Medicine. See PATH 730.

RADI 711 (0) PROGRESS IN NUCLEAR MEDICINE. Weekly reviews of current literature topics in Nuclear Medicine. See PATH 731.

RADI 712 (0) CLINICAL INVESTIGATION/RESEARCH. Participation in ongoing research projects within the Division. See PATH 732.

RADI 713 (0) AUDIT IN NUCLEAR MEDICINE. Review of diagnostic Nuclear Medicine procedure Correlation with other diagnostic tests and final patient diagnosis. Also offered as PATH 733.

RELG — RELIGIOUS STUDIES FACULTY OF ARTS

Not all courses are offered every year. For current listings, consult the departmental website at: www.cnr.ubc.ca.

RELG 100 (6) RELIGIONS OF THE WORLD. An introduction to the major religions of the world (including Judaism, Christianity, Islam, Hinduism, and Buddhism), together with the concepts used in understanding religion.

RELG 202 (6) MYTHS, LEGENDS AND SCRIPTURES OF THE NEAR EAST. An introduction to ancient Near Eastern mythology and to the Scriptures of Judaism, Christianity, and Islam.

RELG 204 (6) INTRODUCTION TO ASIAN RELIGIONS. The religions of India, China, and Japan in their interactions and cultural contexts, including Hinduism, Buddhism, Jainism, Sikhism, Taoism, Confucianism, and Shinto. Equivalency: ASIA 204.

RELG 205 (6) HISTORY OF THE CHRISTIAN CHURCH. A survey of the history of the Christian church from the close of the period of the New Testament to the present day.

RELG 302 (3) DEATH AND AFTERLIFE IN WESTERN RELIGIOUS TRADITION. A survey of traditional attitudes toward death and beliefs regarding human existence after death in Western religions.

RELG 304 (3) CREATION AND COVENANT IN ANCIENT ISRAEL. A detailed literary-historical study of the Torah (Pentateuch) against the background of ancient Near Eastern creation myths.

RELG 305 (3) PROPHECY AND KINGSHIP IN ANCIENT ISRAEL. An examination of Israelite prophecy and prophetic writings in their historical context.

RELG 306 (3) ARCHAEOLOGY AND THE BIBLE. The impact of archaeological research on understanding the history and religion of ancient Israel.

RELG 308 (3/6) D MIDRASH AND THE RABBINIC IMAGINATION.

RELG 309 (3) JEWS AND CHRISTIANS. Aspects of Jewish-Christian relations from the beginnings of Christianity to the present day. Emphasis on the study of Christian and Jewish texts in translation.

RELG 310 (3) JEWISH RESPONSES TO CATASTROPHE. Topics include the destruction of the Second Temple, the Crusades, the expulsions from Spain and Portugal, and the Holocaust. A study of texts in translation.

RELG 311 (3) JEWISH LITERATURE IN TRANSLATION. A survey of Jewish literature in medieval and modern times.

RELG 312 (3) JEWS AND JUDAISM IN CANADA. The history of the Jewish community in Canada, from New France to the present. Emphasis on the relationship between immigration and religious transformation, Jewish-Christian relations, the development of community structures.

RELG 313 (3) MODERN JEWISH ETHICS IN HISTORICAL PERSPECTIVE.

RELG 314 (6) THE ORIGINS OF CHRISTIANITY. The life and teachings of Jesus of Nazareth; the history, literature, and religion of the Christian communities to 150 AD.

RELG 315 (6) HISTORY OF CHRISTIAN THOUGHT. Selected topics with special emphasis on doctrinal change and development, orthodoxy and heresy, tradition and authority, and Church and State in the Patristic, Medieval, Reformation, and Modern periods.

RELG 320 (3/6) D MEDIEVAL LATIN. Introduction to Medieval Latin language and literature. Development of a reading knowledge of Medieval Latin through selections from major authors and genres after 400 AD. Latin Major and Honours students require approval of the departmental adviser. Prerequisite: One of LATN 200, LATN 300. Equivalency: LATN 305.

RELG 321 (3/6) D PROPHETIC FIGURES IN THE CHRISTIAN TRADITION. Examined in their historical context and in terms of their continuing significance. Selection will vary from year to year, but may include Augustine, Thomas Aquinas, Martin Luther, and Teresa of Avila.

RELG 323 (6) CHRISTIANITY IN THE MODERN WORLD. The interaction between Christianity and the major intellectual, social, and cultural developments since 1648 with special attention to the expansion of Christianity and its encounter with urban industrial society.

RELG 328 (3/4) D MEDIEVAL PHILOSOPHY. Survey of Western European thought from Augustine to the fourteenth century. Possible topics and authors include: Augustine; Abelard; the influence of Islam; the rediscovery of Aristotle; Aquinas; Scotus; Ockham. Equivalency: PHIL 312.

RELG 331 (3) MEDIEVAL JEWISH HISTORY.

A survey of the political, social, economic, and cultural history of the Jews from the time of the Christianization of the Roman Empire to the expulsion of professing Jews from Spain and Portugal at the end of the fifteenth century.

RELG 332 (3) MODERN JEWISH HISTORY. A survey of the political, social, economic, and cultural history of the Jews from the beginning of the sixteenth century to the present, with special emphasis on changing attitudes to Jews and Judaism, and social and cultural transformations.

RELG 335 (3) JEWISH LAW: ANCIENT AND LATE ANTIQUE TRADITIONS. History, sources, theoretical issues and current state of research about early Jewish legal traditions, focusing on close readings of classic primary texts.

RELG 336 (3) JEWISH LAW: MEDIEVAL AND EARLY MODERN TRADITIONS. History, sources, theoretical issues and current state of research about later Jewish legal traditions, focusing on close readings of classic primary texts.

RELG 340 (6) HERITAGE OF ISLAM. A detailed study of the history, beliefs, institutions, and literature of Islam. Not given every year.

RELG 341 (3/6) D ISLAMIC ART AND ARCHAEOLOGY. A study of the artifacts of Islam as an expression of Islamic beliefs. Credit will be granted to only one of ARTH 351, FINA 359 or RELG 341. Equivalency: ARTH 351.

RELG 365 (3) DAOIST (TAOIST) RELIGION AND ITS PHILOSOPHICAL BACKGROUND. A study of the Daoist religious traditions from their beginnings in the second century C.E. in cultural, intellectual and social contexts. Equivalency: ASIA 381.

RELG 366 (3) BUDDHISM IN CHINA. History, thought and practices of Chinese Buddhism from its beginnings until the twentieth century. Equivalency: ASIA 366.

RELG 370 (6) CONCEPTS AND METHODS IN THE STUDY OF RELIGION. Required of Major and Honours students in their third year. Open to others by permission of the instructor.

RELG 385 (3) MYSTICAL TRADITIONS: JEWISH AND CHRISTIAN. Methodology, textual study and scholarly analysis of selected texts from these traditions.

RELG 403 (3) JOB AND THE PROBLEM OF SUFFERING. A seminar on the Book of Job and the history of its interpretation.

RELG 407 (3) TOPICS IN EARLY JUDAISM. Judaism and Hellenism, the rise of the synagogue, Jewish sects, the development of Mishnah and Talmud.

RELG 408 (3) TOPICS IN MEDIEVAL JUDAISM. The work of Maimonides and other Jewish philosophers, early developments in Jewish mysticism, the Jews as a minority culture in Islamic and Christian lands.

RELG 409 (3) TOPICS IN MODERN JUDAISM.

The Jews in the ghetto culture, Hasidism, the Emancipation, Reform, Orthodox, and Conservative Movements.

RELG 414 (3) THE GOSPELS AND THE HISTORICAL JESUS.

RELG 415 (3) THE LIFE AND THOUGHT OF PAUL OF TARSUS.

RELG 420 (6) RELIGION IN CANADA. An examination of Canadian religious development with special reference to the separation of church and state, the rise of denominationalism and religious pluralism, secularization and ecumenicity, and the emergence of new religious movements.

RELG 448 (3) SEMINAR IN THE HISTORY OF THE RELIGION OF ISLAM. A topic relevant to the study of Islam as a religion: e.g., the text and doctrines of the Qur'an; the Hadith (or Traditions) of the Prophet; Islamic Law; mysticism in Islam; the Shi'ah and the Isma'ilis. Not offered every year. Consult the departmental brochure for the topic to be offered.

RELG 452 (6) READINGS IN HINDU RELIGIOUS TEXTS. Representative texts, in translation, of the Vedic, Epic, Puranic, Classical, Medieval, and Modern periods. Emphasis in the second term on texts of particular periods, movements, or sects, depending on the students' needs and interests. Those with the necessary preparation may read some texts in the original languages.

RELG 475 (3/6) D TOPICS IN RELIGION. Consult the course registration information each year for offered topics.

RELG 479 (3/6) C DIRECTED STUDIES. Reading and, where appropriate, other research on a topic arising in the discipline, arranged by agreement between the student and the instructor.

RELG 480 (3/6) D WOMEN AND RELIGION. A study of the roles of women in the literature of one or more religious traditions.

RELG 485 (3) IMAGES OF EVE. The story of Adam and Eve, and its influence on the role and image of women in Judaism, Christianity, and Islam.

RELG 499 (6/12) C HONOURS ESSAY.

RELG 500 (3/6) C TOPICS IN BIBLICAL STUDIES. Studies in the history, literature, canon and text, and the religious thought of the Old and New Testaments. This includes the study of the cultural and religious milieu out of which these documents arose. Such studies require a competence in the canonical languages (Biblical Hebrew and/or Koine Greek), usually achieved by not less than two years of study.

RELG 502 (3/6) C TOPICS IN JUDAISM. Studies in the texts (in translation), history, and religious thought of Judaism after the close of the Biblical Period.

RELG 503 (3/6) C TOPICS IN THE POST-BIBLICAL CHRISTIAN TRADITION. Studies in post-Biblical history, documents, and religious ideas of the Christian tradition. Depending on

the area of concentration, language requirements include either Latin or Greek and a reading knowledge of French or German.

RELG 514 (3/6) C TOPICS IN ISLAM. Studies in the literature (in translation), history, and religious thought of Islam in Western Asia and North Africa from its inception to the rise of the Ottoman Empire.

RELG 531 (6) GRADUATE SEMINAR.

RELG 548 (0) MAJOR ESSAY.

RELG 549 (6/12) C MASTER'S THESIS.

RELG 631 (6/12) D BUDDHIST STUDIES.

RELG 649 (0) PH.D. THESIS.

RGLA — RELIGION, LITERATURE AND THE ARTS FACULTY OF ARTS

Not all courses are offered every year. For current listings, consult the departmental website at: www.cnrs.ubc.ca.

RGLA 371 (3) SEMINAR IN RELIGION AND LITERATURE.

RGLA 372 (3/6) D TOPICS IN RELIGION, LITERATURE, AND THE ARTS. The topic is selected and announced annually by the RGLA Committee.

RGLA 471 (3) ADVANCED SEMINAR IN RELIGION AND LITERATURE. Application of critical methods to one or more major authors.

RHSC — REHABILITATION SCIENCES SCHOOL OF REHABILITATION SCIENCES

RHSC 420 (4) ELEMENTS OF NEUROANATOMY AND NEUROPHYSIOLOGY. An introduction to the structure and function of the human nervous system. [2-3-0]

RHSC 500 (3) ADVANCED CONCEPTS FOR REHABILITATION RESEARCH. Issues relevant to clinical investigations in rehabilitation. Emphasis on research design, measurement issues, selection of analytical approaches, and relevant epidemiological concepts. Prerequisite: RHSC 402.

RHSC 501 (3) EVALUATING SOURCES OF EVIDENCE.

RHSC 502 (3) REHABILITATION THEORY. The history, evolution and analysis of conceptual systems underlying practice in occupational therapy and physical therapy.

RHSC 503 (3) REASONING AND DECISION-MAKING.

RHSC 504 (3/6) C DIRECTED STUDIES IN REHABILITATION.

RHSC 505 (3) MEASUREMENT IN PRACTICE.

RHSC 506 (3/6) C CURRENT TOPICS IN REHABILITATION.

RHSC 507 (3) DEVELOPING EFFECTIVE REHABILITATION PROGRAMS.

RHSC 509 (3) FACILITATING LEARNING IN REHABILITATION CONTEXTS.

RHSC 510 (3) DISABILITY: SOCIAL, ECONOMIC AND POLITICAL INFLUENCE. Interrelationships between disability and the social, economic and political environment, with emphasis on factors shaping experiences of health and illness. The social consequences of disability in the context of family, community and workplace.

RHSC 512 (2) DIRECTED STUDIES IN PATHOLOGY IN REHABILITATION.

RHSC 515 (3) EXERCISE PHYSIOLOGY AND METABOLISM IN INJURY AND DISEASE. Physiological factors underlying fatigue and recovery from injury and disease. Energy metabolism, substrate utilization, and the effects of training on skeletal muscle, and on respiratory and cardiovascular systems.

RHSC 520 (3) NEUROREHABILITATION. Therapeutic approaches and strategies in physical and occupational therapy for persons with motor control problems resulting from central nervous system dysfunction.

RHSC 549 (12) THESIS.

RHSC 581 (1.5-3) C WRITING TO ENHANCE PRACTICE.

RHSC 583 (1.5-6) C APPLYING RESEARCH TO PRACTICE. Prerequisite: RHSC 501.

RHSC 587 (3) MAJOR PROJECT, PART I.

RHSC 589 (3) MAJOR PROJECT, PART II. Prerequisite: RHSC 587.

RHSC 699 (0) DOCTORAL THESIS.

RMES — RESOURCE MANAGEMENT AND ENVIRONMENTAL STUDIES FACULTY OF GRADUATE STUDIES

RMES 500 (3-12) D RESOURCE AND ENVIRONMENTAL WORKSHOP. Faculty and students from different disciplines act as an interdisciplinary team studying specific resource problems with ecological, economic, demographic and social dimensions. Techniques and methods are emphasized to show their value in integrating knowledge, defining policy and facilitating communication. Several sections with different emphasis offered each year. Prerequisite: Permission of the instructor is required.

RMES 501 (3) PERSPECTIVES ON RESOURCES AND ENVIRONMENT. Concepts of natural resources and environment; environment and resource management; tools of management; case studies.

RMES 502 (3) SEMINAR ON RESOURCES AND ENVIRONMENT. Environment and resource management goals and issues. Students enrolled in the program will give two presentations. The first will outline specific research interests of the students. The second will provide a synopsis of research at a time when the student is nearing completion of the thesis. Faculty members and other speakers will also be invited to participate and present seminars.

RMES 515 (3) INTEGRATED WATERSHED MANAGEMENT. Methods of watershed evaluation, land-water interactions, key aspects of hydrology, water quality and aquatic biota, land use impacts on water resources, community involvement, and integration of multiple land use activities and their cumulative impacts.

RMES 516 (3) URBAN WATERSHED MANAGEMENT. Urban land use impacts on water resources with a focus on impervious surfaces, storm-water management, non-point sources of pollution, cumulative effects, water quality, rehabilitation of urban streams and application of best management practices. Prior completion of RMES 515 strongly recommended.

RMES 517 (3) AGRICULTURAL WATERSHED MANAGEMENT. Intensive and extensive agriculture with a focus on water needs, water use and impacts on water resources. Non-point sources of pollution, nutrient modeling, soil and land degradation, protection and rehabilitation of watersheds including buffer zones, wetlands, and best management practices.

RMES 518 (3) WATER IN INTERNATIONAL DEVELOPMENT. Key water issues associated with international development: global water demand, scarcity, efficiency of use, water as a commodity, biophysical and policy aspects of water management, water and health, land use impact, water harvesting, improved irrigation, and pollution prevention.

RMES 520 (3) CLIMATE CHANGE IN THE 21ST CENTURY. Historical, methodological, and policy dimensions of climate change in the 21st century. Application of natural and social science literature to climate science, impacts on ecosystems and societies, and response options.

RMES 530 (3) KNOWLEDGE, POLICY AND VALUES IN RISK AND RESOURCE MANAGEMENT. The course focuses on the role of values, science and validity of alternate knowledge systems. Included in the dialogue are the democratization of science, uncertainty, adaptive scientific practices and the values that govern management programs.

RMES 542 (3) INTEGRATED ASSESSMENT. Basic skills for quantitative analysis including probability, validity of quantitative statements and experimental design to test hypothesis validity.

RMES 550 (3) ENVIRONMENTAL POLICY ANALYSIS. Determination of risks and values in environmental policy decisions. Equivalency: PLAN 599.

RMES 586 (3) FISH CONSERVATION AND MANAGEMENT. Offered concurrently with CONS 486. Equivalency: CONS 486.

RMES 599 (12) MASTER'S THESIS.

RMES 699 (0) PH.D. THESIS.

RMST — ROMANCE STUDIES FACULTY OF ARTS

RMST 220 (3-9) D SELECTED TOPICS IN THE LITERATURES AND CULTURES OF THE ROMANCE WORLD.

RMST 420 (3/6) D STUDIES IN ROMANCE LANGUAGES AND LITERATURE.

RMST 468 (6) ROMANCE LINGUISTICS. The Indo-European background; Classical and Vulgar Latin; the origin, development and spread of the Romance languages; their vocabulary, phonology, morphology, syntax; vernacular Latin texts and Romance texts. Prerequisite: Two years study of each of two Romance languages or two years of one Romance language and one year of Latin. Equivalency: FREN 468, SPAN 468.

RMST 520 (3) STUDIES IN ROMANCE LANGUAGES AND CULTURES.

RMST 548 (0) MAJOR ESSAY.

RSOT — OCCUPATIONAL THERAPY SCHOOL OF REHABILITATION SCIENCES

RSOT 511 (3) FUNDAMENTALS OF THEORY AND PRACTICE. [1-2-2]

RSOT 513 (3) HEALTH, ILLNESS & OCCUPATION I. [1.5-0-0; 1.5-0-0]

RSOT 515 (3) PRACTICE SKILLS AND THERAPEUTIC PROCEDURES I. [0-3-3]

RSOT 519 (10) PROFESSIONAL PRACTICE I.

RSOT 521 (3) OCCUPATIONAL ANALYSIS, ACTIVITY AND PARTICIPATION. [1-2-2]

RSOT 525 (3) PRACTICE SKILLS AND THERAPEUTIC PROCEDURES II. [0-3-3]

RSOT 527 (3) EVIDENCE FOR PRACTICE I: RESEARCH PARADIGMS AND METHODS. [2-0-2]

RSOT 537 (2) EVIDENCE AND REASONING IN PRACTICE. [0-0-4]

RSOT 541 (3) THEORY AND PRACTICE: ADVANCED APPLICATIONS. [1-2-2]

RSOT 545 (4) PRACTICE SKILLS AND THERAPEUTIC PROCEDURES III: ADVANCED APPLICATIONS. [0-2-2; 0-2-2]

RSOT 547 (6) EVIDENCE FOR PRACTICE: PROJECT. [2-0-8]

RSOT 549 (18) PROFESSIONAL PRACTICE II.

RSOT 551 (3) SOCIETAL AND ENVIRONMENTAL INFLUENCES. [2-0-2]

RSOT 553 (3) DEVELOPING EFFECTIVE PROGRAMS.

RSPT — PHYSICAL THERAPY SCHOOL OF REHABILITATION SCIENCES

RSPT 514 (3) CLINICAL PRACTICE I.

RSPT 516 (2) CLINICAL DECISION-MAKING I.

RSPT 518 (6) EXERCISE AND MOVEMENT.

RSPT 524 (10) CLINICAL PRACTICE II. Pass/Fail.

RSPT 526 (1) CLINICAL DECISION MAKING II.

RSPT 528 (1) CASE-BASED INTEGRATION.
RSPT 532 (3) REHABILITATION RESEARCH I.
RSPT 538 (1) CASE-BASED INTEGRATION II.
RSPT 544 (18) CLINICAL PRACTICE III.
 Pass/Fail
**RSPT 546 (3) CLINICAL DECISION-
 MAKING III.**
RSPT 548 (1) CASE-BASED INTEGRATION III.
RSPT 558 (2) CASE-BASED INTEGRATION IV.
RSPT 564 (10) CLINICAL PRACTICE IV.
 Pass/Fail.
**RSPT 566 (4) CLINICAL DECISION-
 MAKING IV.**
RSPT 572 (2) REHABILITATION RESEARCH II.
RSPT 578 (1) CASE-BASED INTEGRATION V.

RUSS — RUSSIAN FACULTY OF ARTS

RUSS 100 (6) FIRST-YEAR RUSSIAN.
 Introduction to contemporary Russian Oral practice, grammar, reading, writing.
RUSS 101 (3) BASIC RUSSIAN I. Introduction to contemporary Russian with emphasis on specialized vocabulary for science, commerce, law, etc. Oral practice, grammar, reading and writing. Note: Students who intend to use RUSS 101, 102 and 200 to satisfy the Faculty of Arts language requirement must register for both RUSS 101 and 102 in the same year.
RUSS 102 (3) BASIC RUSSIAN II.
 Continuation of RUSS 101.
RUSS 200 (6) SECOND-YEAR RUSSIAN.
 Intermediate oral practice, grammar, reading, composition. A special section may be provided for Science students. Prerequisite: One of RUSS 100, RUSS 102.
**RUSS 206 (3) NINETEENTH-CENTURY
 RUSSIAN WRITERS IN TRANSLATION.** The writings, lives, and thought of selected authors.
**RUSS 207 (3) TWENTIETH-CENTURY
 RUSSIAN WRITERS IN TRANSLATION.** The writings, lives, and thought of major Russian authors.
RUSS 215 (3) RUSSIAN PRACTICE. Emphasis on oral practice and reading. It is recommended that this course be taken concurrently with RUSS 200. Prerequisite: RUSS 100.
RUSS 300 (6) THIRD-YEAR RUSSIAN.
 Intermediate oral practice, syntax and composition. Prerequisite: RUSS 200.
**RUSS 305 (6) READINGS IN RUSSIAN
 LITERARY TEXTS.** Texts are selected from 19th- and 20th-century sources. Prerequisite: RUSS 200.
**RUSS 306 (6) RUSSIAN LITERATURE IN
 TRANSLATION.** A comprehensive historical and critical presentation with emphasis on the nineteenth and twentieth centuries.
**RUSS 315 (3) ADVANCED RUSSIAN
 PRACTICE.** Continuation of RUSS 215. May be taken concurrently with RUSS 300. Prerequisite: RUSS 215.

RUSS 400 (6) FOURTH-YEAR RUSSIAN.
 Advanced oral practice, reading and composition. Prerequisite: RUSS 300.
**RUSS 401 (6) RUSSIAN FOR READING
 KNOWLEDGE.** Russian for Reading Knowledge This course provides a reading knowledge of Russian, sufficient to enable students to understand scientific and scholarly material. Basic grammar and practice in the translation into English of texts in the natural sciences, social sciences, and humanities. Intended primarily for upper-year and graduate students.
**RUSS 407 (3/6) D STUDIES IN RUSSIAN
 POETRY.** For further details see Department. Prerequisite: RUSS 300.
**RUSS 408 (3/6) D STUDIES IN RUSSIAN
 PROSE BEFORE 1917.** See Department for further details. Prerequisite: RUSS 300.
**RUSS 409 (3/6) D CONTEMPORARY RUSSIAN
 LITERATURE AFTER 1917.** See Department for further details. Prerequisite: RUSS 300.
**RUSS 410 (3/6) D WOMEN IN RUSSIAN
 LITERATURE AND CULTURE.** Analysis of translated texts by and concerning women from folklore to contemporary society.
RUSS 411 (3) TOLSTOY IN TRANSLATION.
**RUSS 412 (3) DOSTOEVSKY IN
 TRANSLATION.**

SANS — SANSKRIT FACULTY OF ARTS

SANS 102 (6) INTRODUCTORY SANSKRIT.
 Basic vocabulary and most important grammatical features of classical Sanskrit. Useful to students of South Asian history, culture, languages, philosophies, and religions, and of linguistics and classics.
SANS 200 (6) INTERMEDIATE SANSKRIT.
 Advanced grammar and selected readings. Prerequisite: SANS 102.
**SANS 300 (6) FURTHER READINGS IN
 SANSKRIT.** Study of selected texts belonging to a particular period (e.g., Vedic) or representing a specific branch of kavya (poetic literature) or sastra (technical-philosophical literature). Prerequisite: SANS 200.

SCAN — SCANDINAVIAN FACULTY OF ARTS

SCAN 300 (3) ELEMENTARY SWEDISH I.
 Introduction to Swedish language, elementary grammar, reading, writing and oral work.
SCAN 310 (3) ELEMENTARY SWEDISH II.
 Continuation of SCAN 300 Prerequisite: SCAN 300.
SCAN 350 (3) ELEMENTARY DANISH I.
 Introduction to Danish language, elementary grammar, reading, writing and oral work. Prerequisite: Placement Interview
SCAN 360 (3) ELEMENTARY DANISH II.
 Prerequisite: SCAN 350.
SCAN 400 (3) INTERMEDIATE SWEDISH I.
 Intermediate grammar, reading practice and oral work. Prerequisite: SCAN 310.

SCAN 402 (3) INTERMEDIATE SWEDISH II.
 Prerequisite: SCAN 400.
**SCAN 411 (3/6) D SCANDINAVIAN DRAMA
 AND FILM IN TRANSLATION.** Traces the explosive development of a provincial theatre into one of the seminal forces of 20th-century drama and film. Emphasis on Ibsen, Strindberg, and Bergman.
**SCAN 412 (3) THE NORTHERN EUROPEAN
 EPIC IN TRANSLATION.** Major prose works of the Scandinavian literatures with emphasis on the stylistic qualities of the Old Icelandic sagas and their transformation in the novels of modern Icelandic, Danish, Swedish, and Norwegian writers. Possible authors: Laxness, Blixen, Hamsun, Lindgren.

**SCAN 413 (3/6) D THE LITERATURES OF THE
 BALTIC IN ENGLISH TRANSLATION.** An examination through literature of the historical, cultural, and ethnic elements that have made the Baltic area the crossroads of northeastern Europe. The emphasis is on literature from the Germanic and Finno-Ugric languages. Authors to be studied include Strindberg, Tikkanen, Transtromer, Kaplinski, Grass, Bobrowski, Lenz.

**SCAN 414 (3) TOPICS IN DANISH AND
 NORTHERN EUROPEAN CULTURAL STUDIES
 (IN ENGLISH).** Selected topics, such as ethnicity, migration, identity, women's issues, Danish and Northern European film.

SCAN 450 (3) INTERMEDIATE DANISH I.
 Intermediate reading, writing and oral work. Prerequisite: SCAN 360.
SCAN 460 (3) INTERMEDIATE DANISH II.
 Prerequisite: SCAN 450.
SCAN 501 (3/6) C OLD ICELANDIC. Though 501 is usually taught as a 6-credit course, students may elect to take the first term only, "Introduction to Old Icelandic," for 3 credits.

SCED — SCIENCE EDUCATION FACULTY OF EDUCATION

SCED 190 (6) GENERAL SCIENCE. The major ideas and techniques in the biological sciences (biology, botany, zoology) and physical sciences (physics, chemistry, astronomy, and geology). While experience is provided in studying science in a systematic way, concepts are interpreted for use in teaching at the elementary school level. [3-2; 3-2]
**SCED 300 (3) TEACHING AND LEARNING
 SCIENCE ACROSS THE CURRICULUM:
 ELEMENTARY.** [3-0-0]
**SCED 312 (2) CURRICULUM AND
 INSTRUCTION IN AGRICULTURAL SCIENCES:
 SECONDARY.** Pass/Fail. Prerequisite: A completed concentration in Agricultural Sciences or permission of the Head. [2-0-0]
**SCED 313 (2) CURRICULUM AND
 INSTRUCTION IN BIOLOGICAL SCIENCES:
 SECONDARY.** Pass/Fail. Prerequisite: A completed concentration in biological sciences or permission of the Head. [2-0-0]

SCED 314 (2/3) D CURRICULUM AND INSTRUCTION IN CHEMISTRY:

SECONDARY. Pass/Fail. Prerequisite: A completed concentration in chemistry or permission of the Head. [2-0-0]

SCED 315 (2) CURRICULUM AND INSTRUCTION IN EARTH AND SPACE SCIENCE: SECONDARY.

Pass/Fail. Prerequisite: A completed concentration in earth and space science or permission of the Head. [2-0-0]

SCED 316 (2/3) D CURRICULUM AND INSTRUCTION IN GENERAL SCIENCE: SECONDARY.

Pass/Fail. Prerequisite: A completed concentration in agricultural sciences, biological sciences, chemistry, earth and space science, or physics, or permission of the Head.

SCED 317 (2) CURRICULUM AND INSTRUCTION IN PHYSICS: SECONDARY.

Curriculum organization in physics; principles and methods of instruction applied to teaching physics. Pass/Fail. Prerequisite: A completed concentration in physics or permission of the Head. [2-0-0]

SCED 320 (2) CURRICULUM AND INSTRUCTION IN SCIENCE: ELEMENTARY.

Curriculum organization in science; principles and methods of instruction applied to teaching science. Pass/Fail. [1-2-0]

SCED 330 (3) TEACHING BIOLOGICAL SCIENCES: ELEMENTARY.

Prerequisite: One of SCED 300, SCED 320. [2-2-0]

SCED 331 (3) TEACHING PHYSICAL SCIENCES: ELEMENTARY.

A course in physical sciences emphasizing applications to elementary school science teaching. Prerequisite: One of SCED 300, SCED 320. [2-2-0]

SCED 380 (3) ENVIRONMENTAL SCIENCE EDUCATION.

Curriculum implications of physical and biological environmental issues. Field experiences are normally part of the course; transportation and living expenses will be borne by the student. [3-2]

SCED 400 (3/6) D SCIENCE EDUCATION: ELEMENTARY.

Prerequisite: One of SCED 300, SCED 320. [2-2-0;2-2-0]

SCED 411 (3) FOREST EDUCATION.

Forest studies in the science curriculum; the forest environment as a teaching resource; selection of teaching sites. Transportation and living costs for required field experiences will be borne by the student. [3-0]

SCED 412 (3) COMPUTER-BASED SCIENCE EDUCATION.

Integration of microcomputers and related technology into secondary science instruction. Applications to experiments, lessons, activities, and demonstrations in biology, chemistry, general science, geoscience, and physics. Previous computer experience is recommended. [3-2-0]

SCED 413 (3) CONCEPTIONS OF THE NATURAL WORLD: IMPLICATIONS FOR SCIENCE EDUCATION.

Conceptual and practical issues associated with diverse human understandings of the natural world and their applications to classroom practice. [3-0]

SCED 420 (3) TEACHING EARTH AND SPACE SCIENCE BEYOND THE TEXTBOOK.

SCED 421 (3) TEACHING LIFE SCIENCE BEYOND THE TEXTBOOK.

SCED 422 (3) TEACHING PHYSICAL SCIENCE BEYOND THE TEXTBOOK.

SCED 430 (3) TEACHING SCIENCE AND TECHNOLOGY THROUGH HISTORICAL EXAMPLES.

[3-0]

SCED 440 (3) SPECIAL STUDY IN SUBJECT-MATTER FIELD: BIOLOGY. Topics in a subject field relevant to secondary teaching and not covered in previous undergraduate work. Teacher Education Office approval is required. Open only to secondary students admitted with an academic deficiency. Not for credit toward graduate degree or for undergraduate credit in an academic subject. Pass/Fail.

SCED 441 (3) SPECIAL STUDY IN SUBJECT-MATTER FIELD: CHEMISTRY. Topics in a field relevant to secondary teaching and not covered in previous undergraduate work. Teacher Education Office approval is required. Open only to secondary students admitted with an academic deficiency. Not for credit toward graduate degree or for undergraduate credit in an academic subject. Pass/Fail.

SCED 442 (3) SPECIAL STUDY IN SUBJECT-MATTER FIELD: EARTH AND SPACE SCIENCE. Topics in a subject field relevant to secondary teaching and not covered in previous undergraduate work. Teacher Education Office approval is required. Open only to secondary students admitted with an academic deficiency. Not for credit toward graduate degree or for undergraduate credit in an academic subject. Pass/Fail.

SCED 443 (3) SPECIAL STUDY IN SUBJECT-MATTER FIELD: BOTANY. Topics in a subject field relevant to secondary teaching and not covered in previous undergraduate work. Teacher Education Office approval is required. Open only to secondary students admitted with an academic deficiency. Not for credit toward graduate degree or for undergraduate credit in an academic subject. Pass/Fail.

SCED 444 (3) SPECIAL STUDY IN SUBJECT-MATTER FIELD: ZOOLOGY. Topics in a subject field relevant to secondary teaching and not covered in previous undergraduate work. Teacher Education Office approval is required. Open only to secondary students admitted with an academic deficiency. Not for credit toward graduate degree or for undergraduate credit in an academic subject. Pass/Fail.

SCED 506 (3) RESEARCH IN SCHOOL HEALTH EDUCATION. Research in specific areas of school health education and theories on which health behavior changes are grounded. Prerequisite: EDUC 306.

SCED 507 (3) SEMINAR IN SCHOOL HEALTH EDUCATION. Current trends, problems and issues in school health education and the development of strategies for dealing with health education problems and issues in the schools. Prerequisite: EDUC 306.

SCED 508 (3-6) D REVIEW OF RESEARCH IN SCIENCE EDUCATION. Studies of recent research bearing on educational practice. Prerequisite: Appropriate senior undergraduate introductory or methods course.

SCED 510 (3/6) D PROBLEMS IN CURRICULUM DEVELOPMENT IN SCIENCE EDUCATION. Problems of practice in the development of science curricula. Special emphasis is given to science curricula in BC.

SCED 517 (3) CRITICAL ANALYSIS OF GOALS IN SCHOOL SCIENCE. A review of selected purposes of school science in light of current ideas about the nature of science and its implications for scientific literacy.

SCED 518 (3) THEORY AND RESEARCH IN THE SOCIAL CONTEXT OF SCHOOL SCIENCE. Historical and current social, political and economic influences on science curriculum and science teaching.

SCED 520 (3) SCIENCE LEARNING IN INFORMAL ENVIRONMENTS. Theoretical perspectives and current research on science learning in contexts other than formal science classes.

SCED 544 (3) ISSUES IN THE TEACHING AND LEARNING OF THE SCHOOL SCIENCES. Conceptual and practical issues associated with contemporary constructivist approaches to educational inquiry in the school sciences.

SCED 545 (3) RESEARCH IN THE TEACHING AND LEARNING OF THE SCHOOL SCIENCES. Current models and methods of inquiry in the school sciences, particularly using constructivist approaches.

SCED 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD. Courses in various subject matter fields designed to bring teachers up to date in recent findings in each field.

SCED 580 (3/12) C PROBLEMS IN EDUCATION. Investigation and report of a problem.

SCED 581 (3) THEORY AND RESEARCH IN ENVIRONMENTAL EDUCATION. Research literature and theoretical issues in environmental education.

SCED 590 (3) GRADUATING PAPER. Pass/Fail.

SCED 598 (3/12) C FIELD EXPERIENCES. For those on master's, doctoral and diploma programs.

SCED 599 (6/12) C MASTER'S THESIS.

SCED 699 (0) DOCTORAL THESIS. Pass/Fail.

SCIE — SCIENCE ONE FACULTY OF SCIENCE

Science One is an innovative first year undergraduate Science program at UBC in which the traditional disciplines of Biology, Chemistry, Mathematics and Physics are presented in a unified, integrated format. The program emphasizes and cultivates critical, independent thought as the basis of scientific inquiry. Science One has at its core a single, academically rigorous interdisciplinary course

which incorporates lectures, tutorials, laboratories and field trips.

SCIE 1 (25) SCIENCE ONE PROGRAM.

SEAL — SOUTHEAST ASIAN LANGUAGES FACULTY OF ARTS

SEAL 440 (3-18) C SUPERVISED STUDY IN SOUTHEAST ASIAN LANGUAGES.

SLAV — SLAVIC STUDIES FACULTY OF ARTS

SLAV 105 (6) INTRODUCTION TO RUSSIAN AND SLAVIC CULTURE. Cultural developments from the medieval period to the present.

SLAV 307 (3/6) D LITERATURE AND FILM IN EASTERN EUROPE. Films and translated literature by Slavic writers with emphasis on the interaction between politics and literature.

SOAL — SOUTH ASIAN LANGUAGES FACULTY OF ARTS

SOAL 100 (6) KHICHRİ: THE SOUTH ASIAN LANGUAGES OF VANCOUVER. A systematic introduction to the grammars and scripts of Hindi, Urdu, Punjabi and Sanskrit, primarily through the media of Indo-Canadian popular culture (film, radio, bhangra, etc.)

SOAL 440 (3-18) C SUPERVISED STUDY IN SOUTH ASIAN LANGUAGES.

SOCI — SOCIOLOGY FACULTY OF ARTS

SOCI 100 is prerequisite to most third- and fourth-year SOCI courses.

SOCI 100 (6) INTRODUCTION TO SOCIOLOGY. Introduction to problems in the analysis of social structures and processes. Basic sociological concepts will be introduced and their application demonstrated in various areas of sociology. The course includes a survey of research methods, major theoretical trends, and representative works of contributors to sociology.

SOCI 201 (3/6) D ETHNIC RELATIONS. An introduction to the study of the relations between ethnic groups and of the interplay between ethnicity and other social factors. The course examines such concepts as: ethnicity, racism, prejudice, discrimination, assimilation, and multiculturalism. Ordinarily the course deals with ethnic groups in British Columbia, and students are expected to carry out elementary research projects. Equivalency: ANTH 201.

SOCI 210 (3/6) D CANADIAN SOCIAL STRUCTURE. Descriptive and analytic survey of such features as demographic characteristics, class structure, ethnicity, and regional variation in Canadian society as a basis for understanding current social issues.

SOCI 213 (3/6) D WOMEN IN COMPARATIVE PERSPECTIVE. An exploration of topics from Anthropology or Sociology focusing on explanations, in current and historical perspective, for variations in the situation of women. Equivalency: ANTH 213.

SOCI 214 (3/6) D THE FAMILY IN CROSS-CULTURAL PERSPECTIVE. A cross-cultural comparison of family and kinship to provide an understanding of variations in the structure and meaning of marriage relations; forms of domestic organization; and the sexual division of labour, property, and inheritance. Equivalency: ANTH 214.

SOCI 215 (3/6) D INTRODUCTION TO JAPANESE SOCIETY. Survey of contemporary Japanese life, with a focus on social organization and cultural patterns. Topics may include family, kinship, rural and urban conditions, economic organization, class and other inequalities, ethnic relations, and introduction of Western culture and value systems. Equivalency: ANTH 215.

SOCI 240 (3/6) D INTRODUCTION TO SOCIAL INTERACTION. A general introduction to research on social interaction, with an emphasis on group (as opposed to individual) processes and behaviour. Topics include: status, power and prestige, distributive justice, marginality and social control, authority relations, and group structure and membership, all to be studied in the context of a variety of groups (such as families, formal organizations, communities and friendship groups) and cultures.

SOCI 250 (3/6) D CRIME AND SOCIETY. Crime as a social phenomenon, with emphasis on the changing definitions of crime in relation to social and political change in Canadian and other societies. The scope and nature of the crime problem, the growth of criminology as a science and profession, and relationships between components of state criminal justice systems.

SOCI 260 (3/6) D TECHNOLOGY, WORK AND SOCIETY. The social forces responsible for changing patterns of technological innovation and work organization in modern industrial societies. Emphasis on the organization of work and the labour force. Topics may include division of labour, professionalization, labour movements, management techniques and bureaucracy, the social context of research and development initiatives, the effects of new technologies (e.g., automation) on the work place and social aspects of technological development in the Third World.

SOCI 301 (3/6) D SOCIOLOGY OF DEVELOPMENT AND UNDERDEVELOPMENT. Processes of social change in the Third World and other developing countries. Major themes stress the relationship between urbanization and industrialization; modernization and ethnic conflict; imperialism, neo-colonialism, and foreign aid; and intra-national modernization problems such as regional underdevelopment in industrial societies. Prerequisite: SOCI 100.

SOCI 302 (3/6) D ETHNIC AND RACIAL INEQUALITY. A critical examination of classical and contemporary theories and research evidence concerning ethnic and racial inequality at the societal and interpersonal levels. Prerequisite: SOCI 100.

SOCI 310 (6) CANADIAN SOCIETY. Examination of selected features of the social organization of Canadian society which will include, for example, the relationships between industrial organization and other social institutions and processes, such as family structure, welfare systems, crime rates, ethnic relations and industrial and political conflict. Prerequisite: SOCI 100.

SOCI 312 (3/6) D GENDER RELATIONS. The nature of gender relations, their social and cultural expression, and theories of gender inequality drawn from anthropological or sociological research. Prerequisite: SOCI 100. Equivalency: ANTH 312.

SOCI 315 (3/6) D JAPANESE CULTURE AND SOCIETY. An intensive examination of modern industrial Japan, including such topics as: demographic characteristics, class structure and inequality, industrial organization, political structure and conflict, ethnic relations, value systems, urban and rural traditions and cultural background of current events. Major theories of Japanese culture and economic development will be studied. Prerequisite: SOCI 100. Equivalency: ANTH 315.

SOCI 328 (3/6) D SOCIAL STATISTICS I. The testing of sociological theories using quantitative data analysis techniques on numerical data from social surveys, experiments and official statistics. Prerequisite: SOCI 100.

SOCI 350 (3/6) D SOCIOLOGICAL THEORIES: CLASSICAL AND CONTEMPORARY APPROACHES. An examination of selected traditions, conceptual problems, and current topics in the field of sociological theory. Prerequisite: SOCI 100.

SOCI 352 (3/6) D ORGANIZATION OF WORK. The meaning of work and leisure. Properties of work organization: division of labour and specialization; technology and working knowledge; means of coordinating work, such as cooperation, authority, and exchange. Research problems concerning work in households, offices, and industry, division of labour by gender, industrial democracy and the relation of work and social inequality. Prerequisite: SOCI 100.

SOCI 354 (3/6) D COMMUNITY STUDIES. Study of the organization of human communities; a focus upon collective activities including family, work, neighbourhood, and formal and informal networks. Prerequisite: SOCI 100.

SOCI 360 (3/6) D SOCIOLOGY AND NATURAL RESOURCES. Sociological perspectives on property, resource industries (such as agriculture, fishing, forestry and mining), resource development, and resource communities. May also include examination of social aspects of resource development in the Third World. Prerequisite: SOCI 100 or 3 credits of 200-level Sociology.

SOCI 361 (3/6) D SOCIAL INEQUALITY. Tendencies toward equality and inequality; manifestations of inequality (occupation, education, gender, ethnicity, income, power) and their consequences; caste and class features of major stratification systems; theories of

social class; stratification profile of contemporary industrial societies. Prerequisite: SOCI 100.

SOCI 368 (3/6) D DEVIANCE AND SOCIAL CONTROL. An analytic framework for the study of the generation and control of deviant activities, with particular emphasis on societal processes directed to the recognition and organizational treatment of 'deviants' as a phenomenon. The course stresses theoretical issues rather than social problems and their remedy. Prerequisite: SOCI 100.

SOCI 369 (3/6) D SOCIOLOGY OF SEXUALITIES. Historical and social construction of sexual identities, desires, communities, and politics in the twentieth century. Prerequisite: SOCI 100.

SOCI 380 (3) SOCIOLOGICAL METHODS: SURVEY RESEARCH. Questionnaire design, interviewing, sampling, and analysis of survey data. Prerequisite: SOCI 100.

SOCI 381 (3) SOCIOLOGICAL METHODS: EXPERIMENTAL RESEARCH. The nature of experimentation. Various types of experimental design and of laboratory and field techniques. The advantages and limitations of experiments in sociological research. Some ethical questions regarding experimentation. Prerequisite: SOCI 100.

SOCI 382 (3) SOCIOLOGICAL METHODS: QUALITATIVE RESEARCH. Examination of the different traditions of qualitative sociological inquiry and the associated methodological features used to study the interpretive practices and meanings in the everyday lives of individuals. Prerequisite: SOCI 100.

SOCI 383 (3) SOCIOLOGICAL METHODS: HISTORICAL RESEARCH. Methodological problems and research strategies associated with the interpretation of socio-historical data; contributions of classical and contemporary approaches to historical sociology and social history. Prerequisite: SOCI 100.

SOCI 400 (3/6) D THEORETICAL AND METHODOLOGICAL ISSUES. Sociological theories and their relationship to methodological issues in the discipline. Prerequisite: SOCI 100.

SOCI 410 (3/6) D SPECIAL STUDIES IN CANADIAN SOCIETY. Selected areas of study relating to Canadian society such as BC Studies; French Canada's demographic problems; rural communities; social welfare and community programs in Canada. Consult the Department for this year's offerings. Prerequisite: SOCI 100.

SOCI 413 (3/6) D FAMILY AND KINSHIP. A cross-cultural survey of ways of defining family relationships and kinship organizations, including theoretical analysis as well as case studies. Prerequisite: SOCI 100. Equivalency: ANTH 413.

SOCI 414 (3/6) D FEMINIST THEORY. The emergence of feminist theory, its relationship to sociology, and the major theoretical schools of thought. The social basis and development of feminist thought from critiques of scholarship

and research to contemporary debates will be addressed. Prerequisite: SOCI 100.

SOCI 416 (3/6) D THE ETHNOGRAPHY OF JAPAN. Through an analysis of contemporary ethnographic accounts of Japan, this course addresses the interplay of cultural predispositions with modern organizational structure, differences in rural/urban lifestyles, family relationships, gender roles, health, aging and Japan's international role. Prerequisite: One of ANTH 215, SOCI 215, ANTH 315, SOCI 315 and SOCI 100. Permission of the instructor is also acceptable. Equivalency: ANTH 416.

SOCI 418 (3/6) D SOCIAL STATISTICS II. Primary emphasis on applications of statistical techniques to quantitative and qualitative data in both Anthropology and Sociology. Prerequisite: All of SOCI 100, SOCI 328. Equivalency: ANTH 418.

SOCI 420 (3/6) D SOCIOLOGY OF THE ENVIRONMENT. Sociological approaches to the study of environmental conflicts, issues, movements, impact of changing technology, economic development on the environment. Prerequisite: SOCI 100.

SOCI 425 (3/6) D URBAN SOCIOLOGY. Demographic, behavioural, and organizational aspects of urban structures and of urbanization in different societies and periods. Prerequisite: SOCI 100.

SOCI 433 (3/6) D DIRECTED STUDIES. General reading and/or a research undertaking, with the agreement, and under the supervision, of a Department faculty member selected by the student. Prerequisite: SOCI 100.

SOCI 449 (6) HONOURS TUTORIAL. Requires the presentation of at least one research paper. Prerequisite: SOCI 100.

SOCI 460 (3/6) D SOCIOLOGY OF SPECIAL GEOGRAPHICAL AREAS. The description of areas to be covered will be announced each year. Prerequisite: SOCI 100.

SOCI 461 (3/6) D POLITICAL SOCIOLOGY. The social and economic bases of political power. May include studies of the state and interstate relations, ideology and control, alienation and anomie, political movements and social revolutions, political violence and terrorism, and the political economy of world conflict. Prerequisite: SOCI 100.

SOCI 464 (3/6) D SOCIAL MOVEMENTS. A study of the sources, stages, and effects of social movements in developing and modernized societies. Prerequisite: SOCI 100.

SOCI 465 (3/6) D SOCIOLOGY OF THE ARTS. An examination of the arts as social practices from the standpoint of the relationships among artists, critics, patrons, and public; and the social institutions through which these relationships are structured. Prerequisite: SOCI 100.

SOCI 466 (3/6) D SOCIALIZATION AND EDUCATION. Study of induction into social structures and the acquisition of membership in society. Includes the structure and influence of educational and other socializing institutions. Prerequisite: SOCI 100.

SOCI 470 (3/6) D SOCIOLOGY OF CRIME AND JUSTICE. Critical examination of specific forms of crime and delinquency in relation to the criminal justice system including law, enforcement, and corrections. Issues selected for study will be further scrutinized within the cultural framework of ethics, morality, and social justice. Prerequisite: SOCI 100.

SOCI 473 (3/6) D SOCIOLOGY OF MENTAL ILLNESS. A sociological approach to the meaning of mental illness; the organization of psychiatric treatment; problems in the explanation of the distribution of mental illness in a population. Prerequisite: SOCI 100.

SOCI 475 (6) INTERPERSONAL RELATIONS. A self-analytic seminar for the study of group interaction and social conflict processes; interdisciplinary reading materials and assignments complement analysis of ongoing group and individual behaviour. Prerequisite: SOCI 100.

SOCI 484 (3/6) D SOCIOLOGY OF HEALTH AND ILLNESS. Sociological perspectives on health, illness, and health care as represented in classic and contemporary sociological studies of selected topics such as illness experience, social aspects of the practice of health professionals, training of health professionals, and the social organization of health delivery systems. Prerequisite: SOCI 100.

SOCI 495 (3/6) D ADVANCED STUDIES IN SOCIOLOGY. An intensive examination of selected topics in Sociology. Consult the department for this year's offerings. Prerequisite: SOCI 100.

SOCI 500 (3) FOUNDATIONS OF SOCIOLOGICAL THOUGHT. A critical survey of classical sociological thought and the theoretical works which have shaped the discipline of sociology.

SOCI 501 (3) CONTEMPORARY SOCIOLOGICAL THEORY. Theoretical trends, issues, and perspectives in contemporary sociology, including problems of theory formation and the relation of theory and research.

SOCI 502 (3) RESEARCH DESIGN AND TECHNIQUES (QUANTITATIVE). Sociological research design and the analysis and interpretation of data.

SOCI 503 (3) RESEARCH DESIGN AND TECHNIQUES (QUALITATIVE). Sociological research design and the analysis and interpretation of data.

SOCI 504 (3) METHODOLOGY OF SOCIAL INQUIRY. The nature of sociological understanding and explanation, including a critical review of issues in the theory of methods.

SOCI 505 (3/6) C TUTORIAL IN SOCIOLOGICAL THEORY. Prerequisite: One of SOCI 500, SOCI 501.

SOCI 506 (3/6) D TUTORIAL IN RESEARCH METHODS. Prerequisite: Two of SOCI 502, SOCI 503, SOCI 504.

SOCI 507 (3/6) D ADVANCED THEORY SEMINAR. Prerequisite: All of SOCI 500, SOCI 501. Corequisite: SOCI 504.

SOCI 508 (3/6) D ADVANCED METHODS SEMINAR. Prerequisite: All of SOCI 502, SOCI 503.

SOCI 509 (3/6) D SOCIOLOGY OF THE ENVIRONMENT.

SOCI 510 (3/6) D SEMINAR IN POPULATION, COMMUNITY AND DEMOGRAPHY.

SOCI 511 (3) CROSS-NATIONAL COMPARISONS IN THE SOCIAL SCIENCES. The methodological and epistemological underpinnings of cross-national comparative research across the social sciences. Focused on but not limited to Northeast Asia. Equivalency: IAR 511.

SOCI 512 (3/6) D SOCIOLOGY OF GENDER AND FEMINIST ISSUES.

SOCI 515 (3/6) C TUTORIAL IN POPULATION, COMMUNITY AND DEMOGRAPHY. Prerequisite: SOCI 510.

SOCI 520 (3/6) D SEMINAR IN CRIME, LAW AND SOCIAL CONTROL.

SOCI 525 (3/6) C TUTORIAL IN CRIME, LAW AND SOCIAL CONTROL. Prerequisite: SOCI 520.

SOCI 530 (3/6) D SEMINAR IN SOCIAL CHANGE AND DEVELOPMENT.

SOCI 535 (3/6) C TUTORIAL IN SOCIAL CHANGE AND DEVELOPMENT. Prerequisite: SOCI 530.

SOCI 540 (3/6) D SEMINAR IN SOCIAL INEQUALITY.

SOCI 545 (3/6) C TUTORIAL IN SOCIAL INEQUALITY. Prerequisite: SOCI 540.

SOCI 549 (6/12) C MASTER'S THESIS.

SOCI 550 (3/6) D SEMINAR IN SOCIAL INTERACTION.

SOCI 555 (3/6) C TUTORIAL IN SOCIAL INTERACTION. Prerequisite: SOCI 550.

SOCI 560 (3/6) D SEMINAR IN THE SOCIOLOGY OF CULTURE AND KNOWLEDGE.

SOCI 562 (3/6) D SEMINAR IN THE SOCIOLOGY OF MASS MEDIA AND COMMUNICATIONS.

SOCI 565 (3/6) C TUTORIAL IN THE SOCIOLOGY OF CULTURE AND KNOWLEDGE. Prerequisite: SOCI 560.

SOCI 570 (3/6) D SEMINAR IN WORK, INDUSTRY AND TECHNOLOGY.

SOCI 575 (3/6) C TUTORIAL IN WORK, INDUSTRY AND TECHNOLOGY. Prerequisite: SOCI 570.

SOCI 580 (3/6) D SEMINAR IN CANADIAN SOCIETY.

SOCI 584 (3/6) D SEMINAR IN HEALTH, ILLNESS AND SOCIETY.

SOCI 585 (3/6) C TUTORIAL IN CANADIAN SOCIETY. Prerequisite: SOCI 580.

SOCI 590 (3/6) D SEMINAR IN AN ETHNOGRAPHIC AREA.

SOCI 595 (3/6) C TUTORIAL IN AN ETHNOGRAPHIC AREA. Prerequisite: SOCI 590.

SOCI 596 (3/6) D SEMINAR IN POLITICAL SOCIOLOGY AND SOCIAL MOVEMENTS.

SOCI 597 (3/6) C TUTORIAL IN POLITICAL SOCIOLOGY AND SOCIAL MOVEMENTS. Prerequisite: SOCI 596.

SOCI 598 (3/6) C DIRECTED STUDIES.

SOCI 599 (3/6) D SPECIAL TOPICS SEMINAR.

SOCI 649 (0) PH.D. THESIS.

SOIL — SOIL SCIENCE FACULTY OF LAND AND FOOD SYSTEMS

Most of the undergraduate courses have been renamed as Agroecology (AGRO). Please see this section. Admission to undergraduate courses numbered 300 or higher requires previous credit for SOIL 200 or consent of instructor.

SOIL 200 (3) INTRODUCTION TO SOIL SCIENCE. Physical, chemical and biological properties of soils; soil formation, classification, use and conservation. Prerequisite: All of BIOL 12, CHEM 12, PHYS 12 or first-year university level. [3-2]

SOIL 500 (2) GRADUATE SEMINAR.

SOIL 501 (3) ADVANCED SOIL PROCESSES.

SOIL 502 (3) ADVANCED SUSTAINABLE SOIL MANAGEMENT.

SOIL 503 (3) ADVANCED FIELD AND LABORATORY METHODS IN SOIL SCIENCE.

SOIL 512 (3/6) C ADVANCED SOIL BIOLOGY. Current research in root-soil interfaces. Offered in alternate years. Prerequisite: SOIL 321. Permission of the instructor is also acceptable.

SOIL 513 (3/6) C ADVANCED SOIL PHYSICS. Infiltration and evaporation of water, flow and storage of heat and chemicals in soil, and interactions with the atmosphere. Emphasis on mathematical formulation of problems and solutions using analytical and numerical methods. Prerequisite: All of SOIL 313, SOIL 314.

SOIL 514 (3/6) C BIOMETEOROLOGY. Energy and mass exchange in the biosphere with emphasis on the interfaces between the atmosphere and soils, plants and animals. Offered in alternate years.

SOIL 517 (3) LAND AND RESOURCE EVALUATION. Concepts and methods for multi-purpose land evaluations and assessing resource development options; monitoring and modelling environmental systems using GIS techniques. Prerequisite: One of SOIL 417, FRST 422. Permission of the instructor is also acceptable.

SOIL 524 (2) INSTRUMENTATION FOR BIOMETEOROLOGY. The theory, design and evaluation of instrumentation for biometeorological research. Consent of instructor. Prerequisite: Permission of the instructor is required.

SOIL 530 (2-6) C DIRECTED STUDIES.

SOIL 549 (12) MASTER'S THESIS.

SOIL 649 (0) PH.D. THESIS.

SOWK — SOCIAL WORK FACULTY OF ARTS

SOWK 200 (3) INTRODUCTION TO SOCIAL WELFARE. An introduction to the perspectives, concepts and theoretical foundations of social welfare, including an analysis of the institutional structures of social welfare in the modern state.

SOWK 201 (3) INTRODUCTION TO SOCIAL WORK PRACTICE. An introduction to the knowledge, skills and values of social work practice in its many forms, emphasizing different ways of understanding the context of social and personal problems. Prerequisite: SOWK 200.

SOWK 305 (6) SOCIAL WORK PRACTICE I. An examination of the foundation, knowledge and competencies underlying generalist social work practice. Enrolment is limited to students in the B.S.W. program.

SOWK 310 (3) INTERVIEWING SKILLS. Communication theory and interviewing skills and their application to the Social Work interview.

SOWK 315 (6) PRACTICUM I. A supervised practicum in an assigned social service, two days a week throughout the program year. Limited to students in the B.S.W. program. This course will be graded Pass/Fail. Prerequisite: SOWK 310.

SOWK 316 (3) INTEGRATIVE SEMINAR IN SOCIAL WORK THEORY, POLICY AND PRACTICE. Integrates students' learning from field, practice, policy and theory courses for the purposes of professional development.

SOWK 320 (3) INTRODUCTION TO SOCIAL WORK RESEARCH. Introduction to theory and conduct of social research as applied to social welfare and social work practice. The focus is on development of social work research questions and design of studies. Enrolment is limited to students in the B.S.W. program, except by permission of the school.

SOWK 335 (6) SOCIAL ANALYSIS FOR SOCIAL WORK PRACTICE. Theoretical considerations of relevance to social work practice.

SOWK 337 (3) CROSS-CULTURAL SOCIAL WORK. Issues and problems inherent in practising social work in diverse cultural settings.

SOWK 400 (3) CANADIAN SOCIAL POLICY. Analysis of race, gender, class and culture as factors in the distribution and delivery of Canadian social benefits and social services.

SOWK 405 (3) SOCIAL WORK PRACTICE II. This course examines the principles of optimal social work process with individuals, small groups, families and larger collectivities.

SOWK 415 (6) PRACTICUM II. A supervised practicum in an assigned social service, two days a week throughout the program year.

Enrolment is limited to students in the B.S.W. program. This course will be graded Pass/Fail.

SOWK 416 (3) ADVANCED INTEGRATIVE SEMINAR IN SOCIAL WORK THEORY, POLICY AND PRACTICE. Development of professional judgement, evaluation, and self-evaluation in practice.

SOWK 425 (3) FIRST NATIONS SOCIAL ISSUES. Contemporary social issues facing First Nations peoples and communities examined in the context of the history of Euro-Canadian/First Nations relations; the impact of Euro-Canadian institutions upon First Nations peoples; implications for social policy and social work practice.

SOWK 430 (3-6) D SPECIAL STUDIES IN SOCIAL WORK. Lectures, seminars and/or individual tutorials to develop knowledge and skills in relation to a defined theory, policy or practice problem or client population. Enrolment is limited to students in the B.S.W. program, except by permission of the School.

SOWK 440 (3-12) D INTEGRATIVE SEMINARS IN SOCIAL WORK. A series of seminars offered during the final term of studies which address salient issues in social policy and social work practice and draw upon combined knowledge from social work and related disciplines.

SOWK 441 (3) SOCIAL CONTEXT OF CHILD DEVELOPMENT. The ways in which the familial, physical, and social environment effects the life structures, opportunities and outcomes of epigenetic developmental processes. Equivalency: FMST 441.

SOWK 442 (3) POLICY AND PRACTICE IN CHILD WELFARE. Covers the statutory bases and practices associated with the continuum of child welfare services from prevention through permanency planning. Prerequisite: SOWK 441 or another course in child development.

SOWK 501 (3/6) D THEORETICAL FOUNDATIONS OF SOCIAL WORK.

SOWK 502 (3/6) D THEORIES OF CANADIAN AND INTERNATIONAL SOCIAL DEVELOPMENT.

SOWK 503 (3/6) D THEORETICAL FOUNDATIONS OF SOCIAL WORK IN THE HEALTH FIELD.

SOWK 504 (3/6) D FEMINISM AND SOCIAL WORK PRAXIS.

SOWK 526 (3) SOCIAL WORK PRACTICE IN ADDICTIONS.

SOWK 527 (3/6) D FAMILY MEDIATION AND CONFLICT RESOLUTION.

SOWK 528 (3/6) D CROSS-CULTURAL SOCIAL WORK PRACTICE.

SOWK 530 (3/6) D SOCIAL SERVICES MANAGEMENT.

SOWK 541 (3/6) D SOCIAL WORK PRACTICE WITH THE FAMILY.

SOWK 542 (3/6) D SOCIAL WORK PRACTICE WITH INDIVIDUALS AND COUPLES.

SOWK 543 (3/6) D SOCIAL WORK PRACTICE WITH CHILDREN.

SOWK 544 (3/6) D SOCIAL WORK PRACTICE WITH GROUPS.

SOWK 545 (3/6) D SOCIAL WORK PRACTICE IN THE COMMUNITY.

SOWK 546 (3/6) D METHODS FOR POPULAR SECTOR ORGANIZING.

SOWK 547 (3) SOCIAL WORK PRACTICE IN THE FIELD OF AGING.

SOWK 548 (3) GRADUATING ESSAY.

SOWK 549 (6/9) D MASTER'S THESIS.

SOWK 552 (3/6) D CLINICAL RESEARCH AND SOCIAL WORK. Prerequisite: SOWK 320.

SOWK 553 (3/6) D QUANTITATIVE METHODS IN SOCIAL WORK RESEARCH. Prerequisite: SOWK 320.

SOWK 554 (3/6) D QUALITATIVE METHODS IN SOCIAL WORK RESEARCH. Prerequisite: SOWK 320.

SOWK 555 (3/6) D SEMINAR IN METHODOLOGICAL ISSUES IN SOCIAL WELFARE.

SOWK 556 (3/6) D SEMINAR IN SOCIAL WELFARE THEORY.

SOWK 557 (3/6) D SEMINAR IN SOCIAL WORK PRACTICE THEORY.

SOWK 560 (3/6) D DIRECTED FIELD STUDIES IN SOCIAL WORK.

SOWK 570 (3/6) D DIRECTED STUDIES IN SOCIAL WORK.

SOWK 571 (3/6) D INTERNATIONAL SOCIAL DEVELOPMENT.

SOWK 572 (3/6) D SOCIAL POLICY AND PROGRAM PLANNING: FAMILY AND CHILD WELFARE.

SOWK 573 (3/6) D SOCIAL POLICY AND PROGRAM PLANNING IN THE HEALTH FIELD.

SPAN — SPANISH FACULTY OF ARTS

Students offering a prerequisite equivalent from another institution should consult a departmental adviser.

SPAN 101 (3) BEGINNERS' SPANISH I. Grammar, composition, translation, oral practice. Prerequisite: Not open to students with credit for SPAN 11.

SPAN 102 (3) BEGINNERS' SPANISH II. Grammar, composition, translation, oral practice. Not available for credit to students with SPAN 11. Prerequisite: SPAN 101.

SPAN 111 (3) REFRESHER SPANISH I. Grammar course for students with previous exposure to Spanish and students with some first-year knowledge in need of a grammar review. Not open to students with the prerequisite for SPAN 201. Prerequisite: SPAN 102 or permission of the department.

SPAN 112 (3) REFRESHER SPANISH II.

Grammar course for students with previous exposure to Spanish and students with some first-year knowledge in need of a grammar review. Not open to students with the prerequisite for SPAN 202. Completion of SPAN 112 fulfills the Faculty of Arts language requirement. Prerequisite: SPAN 111 or permission of the department.

SPAN 201 (3) INTERMEDIATE SPANISH I.

Grammar, composition, translation, oral practice, readings. Not available for credit to students with SPAN 12. Credit will not be given for both SPAN 111 and 201. Prerequisite: A score of 68% or higher in SPAN 102 or permission of the department.

SPAN 202 (3) INTERMEDIATE SPANISH II.

Grammar, composition, translation, oral practice, readings. Not available for credit to students with Spanish 12. Credit will not be given for both SPAN 112 and 202. Prerequisite: One of SPAN 111 [with 68% or above], SPAN 201 or permission of the department.

SPAN 206 (3) CONVERSATIONAL SPANISH I.

Conversation, translation, and readings. Students with 68% or better in SPAN 102 may take this course concurrently with SPAN 201 or 202. Prerequisite: One of SPAN 12, SPAN 202.

SPAN 207 (3) CONVERSATIONAL SPANISH II.

Conversation, translation, and readings. Students with 68% or better in SPAN 102 may take this course concurrently with SPAN 202. Prerequisite: SPAN 206.

SPAN 220 (3/6) D INTRODUCTION TO METHODS OF LITERARY ANALYSIS. Basic techniques of literary analysis through the study of selected texts from the literatures of Spain and Spanish America. This course is required for the Major or Honours program.

SPAN 301 (3) ADVANCED SPANISH I.

Composition, translation, and oral practice. The course places special emphasis on pronunciation and syntax.

SPAN 302 (3) ADVANCED SPANISH II.

Composition, translation, and oral practice. The course places special emphasis on pronunciation and syntax. Prerequisite: SPAN 301.

SPAN 312 (3) LATIN AMERICAN LITERATURE IN TRANSLATION.

Introduction for the non-specialist to the major contemporary Latin American literary works and their cultural background. Not available for credit toward a Major or Honours program in Spanish.

SPAN 321 (3) INTRODUCTION TO SPANISH CIVILIZATION AND CULTURE. History and culture of Spain. In English

SPAN 322 (3) LATIN-AMERICAN CIVILIZATION AND CULTURE. History and culture of Latin-America. In English

SPAN 357 (3) SURVEY OF PENINSULAR LITERATURE FROM THE ORIGINS TO 1700.

SPAN 358 (3) SURVEY OF PENINSULAR LITERATURE FROM 1700 TO THE PRESENT.

SPAN 364 (3) SURVEY OF SPANISH-AMERICAN LITERATURE TO THE 1820S.

SPAN 365 (3) SURVEY OF SPANISH-AMERICAN LITERATURE SINCE THE 1820S.

SPAN 401 (3) ADVANCED TRANSLATION: SPANISH-ENGLISH. Intensive training in advanced translation from a variety of sources (literary, journalistic, legal and technical), with an introduction to translation theory. Prerequisite: SPAN 302.

SPAN 402 (3) ADVANCED SPANISH III. Advanced studies in Spanish language and style. Prerequisite: SPAN 302.

SPAN 403 (3) HISTORY OF THE SPANISH LANGUAGE. The origins and development of Spanish; study of representative texts.

SPAN 404 (3) TOPICS IN HISPANIC CINEMA.

SPAN 405 (3) TOPICS IN PENINSULAR AND LATIN-AMERICAN CULTURE.

SPAN 406 (3) GENDER REPRESENTATION(S) IN HISPANIC LITERATURE AND CULTURE. Analysis of major works from the seventeenth century to the present.

SPAN 410 (3) MEDIEVAL LITERATURE. Topics in Spanish Literature from its origins to 1500.

SPAN 420 (3) GOLDEN-AGE LITERATURE. Topics in Spanish Literature from 1500 to 1700.

SPAN 430 (3) PENINSULAR LITERATURE OF THE EIGHTEENTH, NINETEENTH AND TWENTIETH CENTURIES. Selected topics.

SPAN 450 (3) SPECIAL TOPICS IN SPANISH LANGUAGE. Introduction to some problems of dialectology and/or other Romance languages spoken in the Hispanic world.

SPAN 468 (6) ROMANCE LINGUISTICS. The Indo-European background, Classical and Vulgar Latin; the origin, development and spread of the Romance languages; their vocabulary, phonology, morphology, syntax; vernacular Latin texts and Romance texts. Prerequisite: Two years study of each of two Romance languages or two years of one Romance language and one year of Latin. Equivalency: FREN 468, RMST 468.

SPAN 470 (3) SELECTED TOPICS IN SPANISH-AMERICAN COLONIAL AND NINETEENTH-CENTURY LITERATURE.

SPAN 490 (3) SELECTED TOPICS IN SPANISH-AMERICAN LITERATURE OF THE TWENTIETH-CENTURY.

SPAN 499 (3) HONOURS ESSAY.

SPAN 500 (0) SEMINAR IN HISPANIC STUDIES.

SPAN 501 (3) THEORETICAL APPROACHES TO LITERATURE.

SPAN 502 (3) STUDIES IN HISPANIC FEMINISMS.

SPAN 504 (3) STUDIES IN HISPANIC CINEMA.

SPAN 505 (3) STUDIES IN PENINSULAR AND LATIN-AMERICAN CULTURE.

SPAN 520 (3) GOLDEN-AGE LITERATURE.

SPAN 527 (3/6) D SELECTED TOPICS IN MEDIEVAL SPANISH LITERATURE. Also lists as SPAN 528.

SPAN 530 (3) PENINSULAR LITERATURE OF THE EIGHTEENTH, NINETEENTH AND TWENTIETH CENTURIES.

SPAN 548 (3) GRADUATING ESSAY.

SPAN 549 (6) MASTER'S THESIS.

SPAN 550 (3) STUDIES IN PENINSULAR AND LATIN-AMERICAN LANGUAGES AND LITERATURES.

SPAN 570 (3) SPANISH-AMERICAN COLONIAL LITERATURE.

SPAN 580 (3) NINETEENTH-CENTURY SPANISH-AMERICAN LITERATURE.

SPAN 590 (3) TWENTIETH-CENTURY SPANISH-AMERICAN LITERATURE.

SPAN 649 (0) PH.D. THESIS.

SSED — SOCIAL STUDIES EDUCATION FACULTY OF EDUCATION

SSED 300 (3) TEACHING AND LEARNING SOCIAL STUDIES ACROSS THE CURRICULUM: ELEMENTARY. [3-0-0]

SSED 314 (4/5) D CURRICULUM AND INSTRUCTION IN SOCIAL STUDIES: SECONDARY. Pass/Fail.

SSED 317 (3) CURRICULUM TOPICS IN SOCIAL STUDIES: SECONDARY. Pass/Fail. [2-0-0]

SSED 320 (2) CURRICULUM AND INSTRUCTION IN SOCIAL STUDIES: ELEMENTARY. Curriculum organization in social studies; principles and methods of instruction applied to teaching social studies. Pass/Fail. [1-2-0]

SSED 324 (3) CURRICULUM AND INSTRUCTION IN CANADIAN STUDIES. Pass/Fail. Prerequisite: One of SSED 300, SSED 312, SSED 314, SSED 320. [2-1-0]

SSED 361 (3) INTRODUCTION TO CURRICULUM AND INSTRUCTION IN LAW-RELATED EDUCATION. The rationales and objectives, teaching and learning activities, and curriculum materials for law-related education in elementary and secondary schools. [3-0]

SSED 400 (3/6) D SOCIAL STUDIES CURRICULUM AND INSTRUCTION: ELEMENTARY. Prerequisite: One of SSED 300, SSED 320. [3-0-0]

SSED 440 (3) SPECIAL STUDY IN SUBJECT-MATTER FIELD: HISTORY. Topics in a subject field relevant to secondary teaching. Open only to secondary students admitted with an academic deficiency. Not for credit toward graduate degree or for undergraduate credit in an academic subject. Pass/Fail.

SSED 441 (3) SPECIAL STUDY IN SUBJECT-MATTER FIELD: GEOGRAPHY. Topics in a subject field relevant to secondary teaching. Not for credit toward graduate degree or for undergraduate credit in an academic subject. Pass/Fail.

SSED 469 (3/6) C INTRODUCTION TO CURRENT PRACTICES IN VALUES EDUCATION. Examination of recognized approaches to values education, including strategies, curriculum materials, rationale and theory, and research evidence. Critical examination and practical applications of approaches will be emphasized. [3-0; 3-0]

SSED 508 (3/12) C REVIEW OF RESEARCH IN EDUCATIONAL METHODS. Studies are made of recent research bearing on educational practice. Prerequisite: Appropriate senior undergraduate introductory or methods course.

SSED 511 (3) PROBLEMS IN HISTORICAL UNDERSTANDING. Recent controversies in North American historical literature and implications for school curriculum in the light of research on teaching and learning history. Issues include gender, ethnicity, environmental history, and the objectivity question.

SSED 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD. Courses in various subject matter fields designed to bring teachers up to date in recent findings in each field.

SSED 580 (3/12) C PROBLEMS IN EDUCATION. Investigation and report of a problem.

SSED 590 (3) GRADUATING PAPER. Pass/Fail.

SSED 598 (3/12) C FIELD EXPERIENCES. For those on master's, doctoral and diploma programs.

SSED 599 (6/12) C MASTER'S THESIS.

STAT — STATISTICS FACULTY OF SCIENCE

Introductory courses in probability and statistics are offered by many different departments at UBC. For a list of these courses and details concerning restrictions on the number of credits students may obtain for such courses, see "Pairing Lists" and "Probability and Statistics" in the Science section. The following course is for students in the Faculty of Applied Science: STAT 251. Additional fees are charged for some courses.

STAT 200 (3) ELEMENTARY STATISTICS FOR APPLICATIONS. Classical, nonparametric and robust inferences about means, variances, and analysis of variance, using computers. Emphasis on problem formulation, assumptions, and interpretation. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar.) Prerequisite: One of MATH 101, MATH 103, MATH 105, MATH 120. [3-1-0]

STAT 203 (3) STATISTICAL METHODS. Organizing, displaying and summarizing data. Inference estimation and testing for elementary probability models. Not for credit towards a B.Sc. (Consult the Credit Exclusion list within the Faculty of Science section in the Calendar.) Prerequisite: MATH 11. [3-1-0]

STAT 241 (3) INTRODUCTORY PROBABILITY AND STATISTICS. Probability models, random variables and vectors, estimation, testing, regression, analysis of variance,

goodness of fit, quality control. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar). Prerequisite: One of MATH 200, MATH 253. [3-1-0]

STAT 251 (3) ELEMENTARY STATISTICS. Probability, discrete and continuous random variables, joint probability distributions, estimation, hypothesis testing, regression, analysis of variance, goodness of fit. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar). Prerequisite: One of MATH 200, MATH 253. [3-1-0]

STAT 300 (3) INTERMEDIATE STATISTICS FOR APPLICATIONS. Multi-factor analysis-of-variance and other experimental designs; multiple linear regression and regression diagnostics; analysis of covariance; categorical data and log-linear models; further topics in model fitting and data analysis, with statistical computing. Intended for students seeking additional exposure to statistical methodology, but not wishing to concentrate in statistical science. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar). Prerequisite: One of STAT 200, BIOL 300. [3-1-0]

STAT 302 (3) INTRODUCTION TO PROBABILITY. Basic notions of probability, random variables, expectation and conditional expectation, limit theorems. (Consult the Credit Exclusion list within the Faculty of Science section of the Calendar). Prerequisite: One of MATH 200, MATH 226. Equivalency: MATH 302. [3-0-0]

STAT 305 (3) INTRODUCTION TO STATISTICAL INFERENCE. Review of probability theory. Sampling distribution theory, large sample theory and methods of estimation and hypothesis testing, including maximum likelihood estimation, likelihood ratio testing and confidence interval construction. Prerequisite: Either (a) one of STAT 200, BIOL 300 and one of MATH 302, STAT 302; or (b) a score of 65% or higher in one of MATH 302, STAT 302. STAT 200 or BIOL 300 is recommended. [3-0-1]

STAT 306 (3) FINDING RELATIONSHIPS IN DATA. Modeling a response (output) variable as a function of several explanatory (input) variables: multiple regression for a continuous response, logistic regression for a binary response, and log-linear models for count data. Finding low-dimensional structure: principal components analysis. Cluster analysis. (Consult the Credit Exclusion List within the Faculty of Science section in the Calendar). Prerequisite: One of MATH 152, MATH 221, MATH 223 and one of STAT 200, STAT 241, STAT 251, BIOL 300. [3-0-1]

STAT 307 (2) STATISTICS LABORATORY I. Implementing theory in applications. Problem based learning. Generation and analysis of case data. Modelling, computation and reporting. Corequisite: STAT 306. [0-4-0]

STAT 308 (1) STATISTICS LABORATORY II. Continuation of STAT 307. [0-2-0]

STAT 335 (3) STATISTICS IN QUALITY ASSURANCE. Philosophy of quality improvement and total quality control. Definitions of quality. Deming's principles, Ishikawa's tools, control charts, acceptance sampling, continuous improvement, quality design. Credit cannot be obtained for both STAT 335 and WOOD 335. Prerequisite: One of STAT 200, STAT 241, STAT 251, BIOL 300. [3-0-1]

STAT 344 (3) SAMPLE SURVEYS. Planning and practice of sample surveys. Random sampling, bias and variance, unequal probability sampling, systematic, multistage and stratified sampling, ratio and regression estimators, post-stratification, establishing a frame, pretesting, pilot studies, nonresponse and additional topics. Prerequisite: Either (a) one of STAT 200, BIOL 300 and one of MATH 302, STAT 302; or (b) STAT 305. [3-0-1]

STAT 398 (3) CO-OPERATIVE WORK PLACEMENT I. Work experience in an industrial research setting. Normally taken during Winter Session of third year. Restricted to students admitted to the Co-operative Education Program in Statistics. Prerequisite: Registration in Statistics Honours or Major Program.

STAT 399 (3) CO-OPERATIVE WORK PLACEMENT II. Work experience in an industrial research setting. Normally taken during Summer Session following third year. Restricted to students admitted to the Co-operative Education Program in Statistics. Prerequisite: STAT 398.

STAT 404 (3) DESIGN AND ANALYSIS OF EXPERIMENTS. Theory and application of analysis of variance for standard experimental designs, including blocked, nested, factorial and split plot designs. Fixed and random effects, multiple comparisons, analysis of covariance. (Consult the Credit Exclusion list within the Faculty of Science section in the Calendar). Prerequisite: STAT 305. Corequisite: STAT 306. [3-0-1]

STAT 406 (3) ALGORITHMS FOR CLASSIFICATION AND PREDICTION. Flexible, data-adaptive methods for modeling large data sets: visualization and summarization of data; handling large data sets; robust regression and smoothing; methods for assessing accuracy of prediction; neural networks; classification and regression trees; nearest-neighbour methods; model averaging. Prerequisite: One of STAT 306, CPSC 340. [3-0-1]

STAT 441 (3) MULTIVARIATE STATISTICAL METHODS. Multivariate analysis of variance and regression. Canonical correlations, principal components, factor analysis, discrimination, classification and cluster analysis. Emphasis on computer implementation and applications to the various sciences. Prerequisite: STAT 306 and one of MATH 223, MATH 307. [3-0-1]

STAT 442 (3) STATISTICAL METHODS FOR CATEGORICAL DATA. Exact and asymptotic methods for 2x2 and rxc contingency tables, logistic regression models for binary response

variables, log-linear models for multiway contingency tables, model selection, special topics. Emphasis will be on computer implementation and applications to the various sciences and interpretation of the various models. Prerequisite: STAT 306. [3-0-1]

STAT 445 (3) INTRODUCTION TO EXPLORATORY DATA ANALYSIS. Methods for exploring and presenting the structure of data: one group of numbers, several groups, bivariate data, time series data and two-way tables. Data displays, outlier identification, transformations, resistant regression, several types of data smoothing, comparisons with standard statistical methods. Prerequisite: STAT 306. [3-0-1]

STAT 447 (2-6) C SPECIAL TOPICS IN STATISTICS. Students should consult the Statistics Department for the particular topics offered in a given year. Prerequisite: STAT 305. Permission of the instructor is required.

STAT 450 (3) CASE STUDIES IN STATISTICS. Readings and projects in areas of current statistical application including environmental science, industrial statistics, official statistics, actuarial statistics, and medical statistics. Prerequisite: STAT 306. [3-0-1]

STAT 460 (3) STATISTICAL INFERENCE I. A detailed theoretical development. Statistical models, exponential families, sufficiency, completeness, and detailed properties of point estimation. Intended for Honours students. Prerequisite: MATH 320. STAT 305 is recommended. [3-0-0]

STAT 461 (3) STATISTICAL INFERENCE II. Detailed development of the theory of testing hypotheses and confidence regions, Bayesian models and inference, elements of decision theory and additional topics. Intended for Honours students. Prerequisite: STAT 460. [3-0-0]

STAT 498 (3) CO-OPERATIVE WORK PLACEMENT III. Work experience in an industrial research setting. Normally taken during Summer Session following fourth year. Restricted to students admitted to the Co-operative Education Program in Statistics.

STAT 499 (0) CO-OPERATIVE WORK PLACEMENT IV. Work experience in an industrial research setting. Normally taken during Term 1 of Winter Session of fifth year. Restricted to students admitted to the Co-operative Education Program in Statistics.

STAT 518 (3) THEORETICAL STATISTICS. The foundations of statistical inference, exponential families. Likelihood, sufficiency and ancillarity. Principles of estimation and asymptotic theory. Special topics. Prerequisite: All of STAT 461, MATH 418 and one of MATH 420, MATH 544.

STAT 520 (1-6) D TOPICS IN BAYESIAN ANALYSIS AND DECISION THEORY.

STAT 521 (1-6) D TOPICS IN MULTIVARIATE ANALYSIS.

STAT 522 (1-6) D TOPICS IN ASYMPTOTIC THEORY AND STATISTICAL INFERENCE.

STAT 526 (1-6) D TOPICS IN SMOOTHING METHODS.

STAT 527 (1-6) D TOPICS IN BIOSTATISTICS.

STAT 530 (1-3) D BAYESIAN INFERENCE AND DECISION. Utility functions and subjective probability distributions, uninformative priors, inference for common models such as the multivariate normal and regression models, hierarchical prior models, intersubjective statistical decision theory. Prerequisite: STAT 461.

STAT 531 (1-3) D RELIABILITY THEORY. Probabilistic aspects of reliability theory. Classes of life distributions based on notions of aging, coherent systems, shock models, notions of dependence, multivariate distributions for dependent components, maintenance and replacement models. Prerequisite: All of MATH 303, MATH 321, STAT 305.

STAT 532 (1-3) D SEQUENTIAL STATISTICAL PROCEDURES. Sequential probability ratio test, fundamental identity, operating characteristics, optimality. Sequential tests for composite hypotheses. Sequential design of experiments, Bayes sequential decision problems, numerical methods. Applications to statistical problems. Prerequisite: All of MATH 419, STAT 461.

STAT 533 (1-3) D SURVIVAL ANALYSIS. Basic concepts, special distributions, censoring. Parametric and nonparametric methods, product-limit estimator, log-rank test, goodness-of-fit. Models for dependence on explanatory variables, residual analysis, time-dependent covariates. Prerequisite: All of STAT 306, STAT 461.

STAT 534 (1-3) D EXPERIMENTAL DESIGN AND QUALITY IMPROVEMENT. Graphical methods including Ishikawa's methods and control charts. Deming and Taguchi philosophy and methods. Acceptance sampling. Robust parameter designs. Fractional factorial designs and orthogonal arrays. Response surface methodology. Special topics. Prerequisite: STAT 404.

STAT 535 (1-3) D STATISTICAL COMPUTING. Numerical methods useful for statistical research, and numerical analysis useful for writing statistical software (e.g., numerical linear algebra, optimization, generation of pseudo-random numbers, statistical graphics). The statistical language and computing environments for data analysis. Special research topics.

STAT 536 (1-3) D STATISTICAL THEORY FOR THE DESIGN AND ANALYSIS OF CLINICAL STUDIES. Theory for statistical problems commonly encountered in medical studies, including clinical trials, studies of agreement and diagnostic accuracy, rate-comparisons, and standardization. Corequisite: STAT 460.

STAT 537 (1-3) D LINEAR MODELS. Inference for normal theory linear models using projections and linear algebra, unifying regression and analysis of variance. Model building and model verification, mixed models and variance components. Special topics. Prerequisite: All of STAT 404, STAT 460.

STAT 538 (1-3) D GENERALIZED LINEAR MODELS. Natural exponential families, moment generating functions, variance functions, dispersion models. The saddlepoint approximation, asymptotic theory, chi-square, F- and T-tests. Analysis of deviance, residual analysis, iterative least squares algorithm. Applications to positive, discrete, mixed, compositional and directional data. Special topics. Prerequisite: All of STAT 306, STAT 461.

STAT 540 (3) STATISTICAL METHODS FOR HIGH DIMENSIONAL BIOLOGY.

STAT 541 (1-3) D APPLIED MULTIVARIATE ANALYSIS. Topics to be developed with motivation provided by examples from various sciences include: multivariate normal distribution, assessing multivariate normality, Hotelling's T^2 , multivariate analysis of variance and covariance, multivariate regression, discrimination and classification, cluster analysis, canonical correlation, principal components and factor analysis. Prerequisite: All of MATH 307, STAT 404.

STAT 542 (1-3) D ANALYSIS OF CATEGORICAL DATA. A systematic treatment of the theory and use of log-linear and linear logistic models for categorical response variables. Poisson, multinomial and product-multinomial sampling models, maximum likelihood estimation, existence of direct estimates, computational algorithms, adjusted residuals, asymptotic inference, approaches to model selection, special topics. Prerequisite: STAT 404.

STAT 543 (1-3) D TIME SERIES ANALYSIS. A systematic treatment of many of the techniques of the analysis of time series data. Topics include time dependence and randomness, trend, seasonality and error, stationarity, finite parameter models, Box-Jenkins techniques, spectral analysis, the Wiener-Kolmogorov approach, multivariate time series, cross-spectral analysis, "final form" -type models and Kalman filtering. Prerequisite: Permission of the instructor is required.

STAT 544 (1-3) D THEORY OF SAMPLING. A comprehensive account of sampling theory for use in sample surveys. Topics include simple random sampling, stratified random sampling, ratio estimates, regression estimates, systematic sampling, cluster sampling, subsampling, double sampling, estimation of sample size, sources of errors in surveys.

STAT 545 (1-3) D DATA ANALYSIS. Topics will include the philosophy of exploratory data analysis, indication and cross validation, displaying and summarizing data, residual plotting, transforming data, assessing uncertainty, the jackknife, multiway analysis, robustness, standardization, regression and curve fitting, the bootstrap and other computer-intensive methods. Prerequisite: STAT 404.

STAT 546 (1-3) D NONPARAMETRIC STATISTICAL METHODS. Linear rank tests for one and two samples, sign test, rank sum test, normal scores test, Savage test. Rank tests for k samples and nonparametric regression.

Permutation tests. Goodness-of-fit tests, Kolmogorov-Smirnov and Cramer-von Mises tests. Power and efficiency of nonparametric methods. Nonparametric estimation. Theory of U-statistics. Prerequisite: STAT 461.

STAT 547 (1-6) D TOPICS IN STATISTICS. Students should consult the Statistics Department for the particular advanced topics offered in a given year.

STAT 548 (1-6) C DIRECTED STUDIES IN STATISTICS. Advanced study under the direction of a faculty member may be arranged in special situations.

STAT 549 (6/12) C THESIS FOR MASTER'S DEGREE.

STAT 550 (3) TECHNIQUES OF STATISTICAL CONSULTING. The basic skills of statistical consulting. Analysis of data sets, modelling, and statistical computing. Special topics such as graphical methods and data reduction techniques. Readings on consulting and applying statistics. Corequisite: STAT 404.

STAT 551 (3) STATISTICAL CONSULTING. Supervised statistical practice directed toward the solution of current problems posed by subject-area researchers. Prerequisite: STAT 550.

STAT 560 (3) STATISTICAL THEORY I. Credit will not be given for both STAT 460 and STAT 560. [3-0-0]

STAT 561 (3) STATISTICAL THEORY II.

STAT 589 (3) M.SC. PROJECT.

STAT 598 (3) CO-OPERATIVE WORK PLACEMENT I. Restricted to students admitted to the Co-operative M.Sc. Education Program in Statistics.

STAT 599 (3) CO-OPERATIVE WORK PLACEMENT II. Restricted to students admitted to the Co-operative M.Sc. Education Program in Statistics. Prerequisite: STAT 598.

STAT 649 (0) PH.D. THESIS.

SURG — SURGERY FACULTY OF MEDICINE

SURG 430 (8) SURGERY. Post-operative care of patients, evaluation of pre-operative patients, mastery of technical skills for common ward procedures, assessing ambulatory patients and assisting in the operating room.

SURG 500 (4) EXPERIMENTAL SURGERY. Lectures and seminars dealing with the selected application of surgical techniques in biological investigation.

SURG 501 (4) SURGICAL METHODOLOGY IN RESEARCH. Seminars with the laboratory preparation of advanced procedures used in modern physiological and surgical research. Courses 502 to 511 consist of a series of two-year courses common to all branches of surgery (core). Prerequisite: Plus lectures structured for selected major disciplines in surgery.

SURG 502 (2) SURGICAL CORE – POS SERIES. The basic principles of surgery common to all branches of surgery.

SURG 504 (4) ADVANCED GENERAL SURGERY I. Fundamental concepts in general surgery. Given in alternate years.

SURG 505 (4) ADVANCED GENERAL SURGERY II. The second year of the above program. Given in alternate years.

SURG 548 (2-4) C SEMINAR IN SURGERY.

SURG 549 (6-18) C M.SC. THESIS.

SWFS — SOCIAL WORK AND FAMILY STUDIES FACULTY OF ARTS

SWFS 601 (3) SOCIAL WORK AND FAMILY STUDIES DOCTORAL SEMINAR. Critical examination of research, teaching, proposal writing and publication.

SWFS 621 (3) SOCIAL THEORY, IDEOLOGY AND ETHICS. Critical analysis of major social theories, differentiating competing approaches to understanding human behaviour; social theory, social ideology, and social ethics.

SWFS 623 (3) ADVANCED DATA ANALYSIS IN SOCIAL WORK AND FAMILY STUDIES.

SWFS 654 (3) ADVANCED QUALITATIVE INQUIRY.

THTR — THEATRE FACULTY OF ARTS

THTR 120 (3) INTRODUCTION TO THEATRE. Theory and practice of the theatrical arts. Attendance at plays is required.

THTR 130 (3) INTRODUCTION TO ACTING. Equivalency: THTR 160.

THTR 150 (3) INTRODUCTION TO TECHNICAL THEATRE. Foundation study of the technical aspects of theatre production.

THTR 205 (3/6) D GRAPHICS FOR THEATRE AND FILM DESIGN.

THTR 230 (3) PERFORMANCE STUDY I. Study of the actor's process. Equivalency: THTR 260.

THTR 245 (3) PLAY-INTERPRETATION AND PRODUCTION-ANALYSIS. Basic methods of interpreting dramatic texts and analyzing plays in performance. The plays presented on the Frederic Wood Stage will be studied in this course.

THTR 254 (3) TECHNICAL THEATRE. The construction and execution of scenery, costumes, properties, lighting, and sound for the stage. Corequisite: THTR 299. Equivalency: THTR 250.

THTR 263 (3) VOICE AND SPEECH. A course in voice production, diction, and oral interpretation, designed to cultivate effective and expressive speech. Prerequisite: THTR 120 or THTR 160 are recommended.

THTR 271 (3) BEGINNING B.F.A. ACTING I. Open only to B.F.A. Acting students. An audition is required. Prerequisite: At least one Theatre course. Corequisite: THTR 273. Equivalency: THTR 271 and THTR 272 are equivalent to THTR 261.

THTR 272 (3) BEGINNING B.F.A. ACTING II. Open only to B.F.A. Acting students. Corequisite: All of THTR 271, THTR 273, THTR 274.

Equivalency: THTR 271 and THTR 272 are equivalent to THTR 261.

THTR 273 (3) BEGINNING VOICE AND MOVEMENT I. Open only to B.F.A. Acting students. An audition is required. Prerequisite: At least one Theatre course. Corequisite: THTR 271. Equivalency: THTR 273 and THTR 274 are equivalent to THTR 262.

THTR 274 (3) D BEGINNING VOICE AND MOVEMENT II. Open only to B.F.A. Acting students. Corequisite: THTR 271, THTR 272, THTR 273. Equivalency: THTR 273 and THTR 274 are equivalent to THTR 262.

THTR 299 (3/6) D PRODUCTION I. Assigned projects in theatre production. Corequisite: One of THTR 205, THTR 254, THTR 261. Equivalency: THTR 251.

THTR 301 (3) STYLES OF DECOR AND DRESS. Artistic, decorative, cultural, and social contexts of selected theatrical genres and periods.

THTR 305 (3) SCENERY DESIGN I. Principles and practice of scenery design for the theatre. Prerequisite: THTR 205.

THTR 306 (3) COSTUME DESIGN I. Principles and practice of costume design for the theatre. Prerequisite: THTR 205. Equivalency: THTR 353.

THTR 307 (3) LIGHTING DESIGN I. The optical, distribution, and control systems used in stage lighting design. Equivalency: THTR 351.

THTR 308 (3) SOUND DESIGN. Audio design and production for theatre and other performance forms.

THTR 317 (3) INTRODUCTION TO DIRECTING. Prerequisite: One of THTR 230, THTR 299. Corequisite: THTR 299. Equivalency: THTR 317 and THTR 417 are equivalent to THTR 400.

THTR 320 (3) HISTORY OF THEATRE I. Core concepts in world theatre history and the development of theatre prior to the nineteenth century.

THTR 323 (3) HISTORY AND THEORY OF DIRECTING. Equivalency: THTR 321.

THTR 325 (3/6) D HISTORY OF CANADIAN THEATRE.

THTR 330 (3) PERFORMANCE STUDY II. Study of performance styles. Prerequisite: THTR 230. Equivalency: THTR 360.

THTR 339 (3) CREATING THEATRE I. Study and practice of processes and forms used to create ensemble performance. Prerequisite: THTR 230. Corequisite: THTR 230. Equivalency: THTR 369.

THTR 340 (3/6) D STUDIES IN NON-WESTERN THEATRE. Open to all students in third year and above.

THTR 350 (3) SCENERY PRODUCTION I. Scenery construction, rigging, and systems.

THTR 352 (3) SCENE PAINTING I. Media, techniques, and textural treatments used in scene painting.

THTR 354 (3) STAGE MANAGEMENT. Principles and procedures of stage management: organizations, systems, and operations.

THTR 356 (3) COSTUME CONSTRUCTION. Advanced assembly and specialized construction methods for producing costume for stage and screen.

THTR 371 (3) INTERMEDIATE B.F.A. ACTING I. Open only to B.F.A. Acting students. Prerequisite: All of THTR 271, THTR 272, THTR 273, THTR 274. Equivalency: THTR 371 and THTR 372 are equivalent to THTR 361.

THTR 372 (3) INTERMEDIATE B.F.A. ACTING II. Open only to B.F.A. Acting students. Corequisite: All of THTR 371, THTR 373, THTR 374.

THTR 373 (3) INTERMEDIATE VOICE, SPEECH, AND MOVEMENT I. Open only to B.F.A. Acting students. Prerequisite: All of THTR 271, THTR 272, THTR 273, THTR 274.

THTR 374 (3) INTERMEDIATE VOICE, SPEECH, AND MOVEMENT II. Open only to B.F.A. Acting students. Corequisite: All of THTR 371, THTR 372, THTR 373.

THTR 391 (3/6) D TUTORIAL IN ACTING. Application of actor training to rehearsal and performance. Open only to B.F.A. Acting students. Prerequisite: All of THTR 271, THTR 272, THTR 273, THTR 274. Equivalency: THTR 370.

THTR 399 (3/6) D PRODUCTION 2. Assigned projects in theatre design and production. Corequisite: One of THTR 305, THTR 306, THTR 307, THTR 308, THTR 350, THTR 352, THTR 354, THTR 356, THTR 370.

THTR 405 (3) SCENERY DESIGN 2. Exploration of complex scenery design and development of design portfolio. Prerequisite: THTR 305.

THTR 406 (3) COSTUME DESIGN 2. Complex problems and selected historical studies in theatrical costume design. Prerequisite: THTR 306. Equivalency: THTR 453.

THTR 407 (3) LIGHTING DESIGN 2. Complex design and advanced technologies in theatre lighting and scenography. Prerequisite: THTR 307. Equivalency: THTR 451.

THTR 408 (3/6) D ADVANCED STUDY IN DESIGN AND SCENOGRAPHY. Topics will vary from year to year. Consent of Department required. Equivalency: THTR 459.

THTR 417 (3) DIRECTING LAB. Prerequisite: THTR 317. Permission of the instructor is required for admission to this course.

THTR 420 (3) HISTORY OF THEATRE II. Key movements in world theatre history from the nineteenth century to the present. Prerequisite: THTR 320. Equivalency: THTR 415.

THTR 421 (3) HISTORY OF THEATRE FROM 1900 TO THE PRESENT. The development of Western Theatre from 1900 to the present

THTR 425 (3/6) D TOPICS IN CANADIAN THEATRE.

THTR 430 (6) THEORY OF DRAMA AND PERFORMANCE. The basic principles of dramaturgy and theory of performance. Historical and contemporary writing on theatrical theory and criticism and their relation to theatrical practice.

THTR 439 (3/6) D CREATING THEATRE. Ensemble creation culminating in the presentation of a theatrical work. Permission of the instructor is required. Equivalency: THTR 490.

THTR 440 (3/6) D TOPICS IN THEATRE. An examination in depth of a selected area of theatre history, theory or practice. Topics will change from year to year. May be repeated for credit when topics differ. Prerequisite: 6 credits of THTR at the 300-level or above. Equivalency: THTR 410.

THTR 443 (3/6) D WOMEN IN THEATRE AND FILM. A course dealing with women's involvement in and contribution to various aspects of Theatre and/or Film Topics will change from year to year. Equivalency: THTR 415.

THTR 445 (3) MAJORS AND HONOURS SEMINAR.

THTR 448 (3/6) C DIRECTED STUDIES IN THEATRE THEORY AND PRACTICE.

THTR 449 (6) SUPERVISED STUDY AND HONOURS ESSAY.

THTR 450 (3) SCENERY PRODUCTION 2. Technical direction; complex techniques and problems in scenery production. Prerequisite: THTR 350.

THTR 452 (3) SCENE PAINTING 2. Study of selected scene painting styles. Prerequisite: THTR 352.

THTR 454 (3) PRODUCTION AND THEATRE MANAGEMENT. Production and theatre management with emphasis on budgeting, publicity, scheduling, press relations, special events, legal issues, season selection, resumes and interpersonal skills. Prerequisite: THTR 354.

THTR 456 (3) COSTUME CONSTRUCTION 2. Pattern development and cutting for costume for stage and screen using flat pattern and draping. Prerequisite: THTR 356.

THTR 471 (3) ADVANCED B.F.A. ACTING I. Open only to B.F.A. (Acting) students. Prerequisite: All of THTR 371, THTR 372, THTR 373, THTR 374, THTR 391.

THTR 472 (3) ADVANCED B.F.A. ACTING II. Open only to B.F.A. Acting students. Corequisite: All of THTR 471, THTR 473, THTR 474.

THTR 473 (3) ADVANCED SPEECH AND MOVEMENT I. Open only to B.F.A. Acting students. Prerequisite: Three of THTR 371, THTR 372, THTR 373, THTR 374, THTR 391.

THTR 474 (3) ADVANCED SPEECH AND MOVEMENT II. Open only to B.F.A. Acting students. Corequisite: THTR 471, THTR 472, THTR 473

THTR 491 (3/6) D TUTORIAL IN ACTING. Application of actor training to rehearsal and performance. Open only to B.F.A. Acting

students. Prerequisite: Three of THTR 371, THTR 372, THTR 373, THTR 374, THTR 391. Equivalency: THTR 470.

THTR 499 (6/9) D PRODUCTION 3. Assigned projects in Theatre or Film design and production. Prerequisite: THTR 399. Corequisite: One of THTR 405, THTR 406, THTR 407, THTR 408, THTR 450, THTR 452, THTR 454, THTR 456, THTR 470.

THTR 500 (3) BIBLIOGRAPHY AND RESEARCH METHODS.

THTR 505 (3) SCENERY DESIGN STUDIO I. Scenery design for theatre and other performance forms.

THTR 506 (3) COSTUME DESIGN STUDIO I. Costume design for theatre and other performance forms.

THTR 507 (3) SCENERY DESIGN STUDIO II. Complex scenery design for opera, dance, theatre, and other performance forms.

THTR 508 (3) COSTUME DESIGN STUDIO II. Complex costume design for opera, dance, theatre, and other performance forms.

THTR 510 (3/6) D SEMINAR IN COMPARATIVE DRAMATIC LITERATURE.

THTR 515 (3/6) D SEMINAR: STUDIES IN THEATRICAL STYLE.

THTR 520 (6) DIRECTION AND PRODUCTION.

THTR 521 (6) STYLES IN DIRECTING. An advanced course in directing; detailed study of the major styles in the history of production. Prerequisite: THTR 520.

THTR 525 (3/6) D SEMINAR: STUDY OF A MAJOR DRAMATIST.

THTR 530 (3/6) D SEMINAR: RELATIONSHIPS BETWEEN THEATRE AND THE OTHER ARTS. Studies in a selected area of theatre in relation to one or more of the other arts.

THTR 547 (3/6) D DIRECTED STUDIES IN THEATRE AND DRAMA AND FILM/ TELEVISION.

THTR 549 (6/12) C MASTER'S THESIS.

THTR 550 (6) STUDIES IN HISTORIC DESIGN. Seminar in theatre scenery, costumes, and architecture of selected historical periods. Pre- or co-requisite: THTR 505 and THTR 506.

THTR 551 (3) LIGHTING DESIGN STUDIO 1. Lighting design for theatre and other performance forms.

THTR 560 (3/6) D STUDIES IN THEATRICAL HISTORY.

THTR 561 (3/6) D STUDIES IN DRAMATIC LITERATURE.

THTR 562 (3/6) D STUDIES IN DRAMATIC THEORY AND CRITICISM.

THTR 649 (0) PH.D. THESIS.

TSED — TECHNOLOGY STUDIES EDUCATION FACULTY OF EDUCATION

TSED 314 (4/5) D CURRICULUM AND INSTRUCTION IN TECHNOLOGY EDUCATION: SECONDARY. Pass/Fail. Prerequisite: A completed major in technology education or permission of the head.

TSED 321 (3) TEACHING AND LEARNING TECHNOLOGY EDUCATION ACROSS THE CURRICULUM: ELEMENTARY AND MIDDLE YEARS. Pass/Fail. [3-0-0]

TSED 414 (3/6) D CURRICULUM DEVELOPMENT IN TECHNOLOGY EDUCATION. Curriculum and course design, with emphasis on current practice. Prerequisite: TSED 314. [3-0]

TSED 465 (3/12) C TECHNICAL PROBLEM. This course gives students the opportunity to conduct directed study in an area within their technical field of specialization. Each directed study will culminate in a written paper. Prerequisite: Completion of a technical specialty or equivalent.

TSED 508 (3-6) D REVIEW OF RESEARCH IN TECHNOLOGY STUDIES EDUCATION. Studies are made of recent research bearing on educational practice. Prerequisite: Appropriate senior undergraduate introductory or methods course.

TSED 561 (3/12) C LABORATORY PRACTICUM.

TSED 565 (3/6) D SPECIAL COURSE IN SUBJECT MATTER FIELD. Courses in various subject matter fields designed to bring teachers up to date in recent findings in each field.

TSED 580 (3/12) C PROBLEMS IN EDUCATION. Investigation and report of a problem.

TSED 590 (3) GRADUATING PAPER. Pass/Fail.

TSED 598 (3/12) C FIELD EXPERIENCES. For those on master's, doctoral and diploma programs.

TSED 599 (6/12) C MASTER'S THESIS.

UKRN — UKRAINIAN FACULTY OF ARTS

UKRN 125 (6) BASIC UKRAINIAN.

UKRN 225 (6) ADVANCED UKRAINIAN. Prerequisite: UKRN 125.

UROL — UROLOGICAL SURGERY FACULTY OF MEDICINE

UROL 510 (2) ADVANCED UROLOGY I.

UROL 511 (2) ADVANCED UROLOGY II.

UROL 760 (0) UROLOGY CONFERENCE I.

UROL 761 (0) UROLOGY CONFERENCE II.

UROL 762 (0) UROLOGIC RADIOLOGY.

UROL 764 (0) UROLOGY SEMINARS.

UROL 765 (0) OPERATIVE UROLOGIC SURGERY.

URST — URBAN STUDIES FACULTY OF ARTS

URST 200 (3) CITIES. An interdisciplinary introduction to the city in the context of contemporary globalization. Analysis of urban patterns and processes from the theoretical perspectives of various disciplines and methodologies. Equivalency: GEOG 250.

URST 400 (3) SEMINAR IN URBAN STUDIES. A seminar for senior students who wish to explore some common topics of importance to urban studies from the viewpoints of several disciplines. Prerequisite: Permission of the instructor is required.

VISA — VISUAL ARTS FACULTY OF ARTS

Not every course is given every year. For details of current offerings, consult the departmental website at www.finearts.ubc.ca. Credit will be given to either the current VISA listing or its former VISA/FINA equivalent. As of Winter 2006/07, completion of VISA 110 will be a prerequisite for registration in 200-level VISA courses. In special circumstances VISA 110 may be taken as a corequisite. A Studio Course Fee of \$30.00 will be charged for each 3-credit undergraduate VISA course. Fees will be applied toward classroom supplies, equipment and materials. Fees are payable to the Department.

VISA 110 (3) FOUNDATION COMPUTING FOR THE VISUAL ARTS. This Lecture/Lab course provides foundation level instruction in basic computer skills, image manipulation and digital media. The nature and role of digital media in contemporary culture, with special emphasis on applications in visual art, theatre, film and creative writing, will be examined.

VISA 180 (3) INTRODUCTORY STUDIO ONE. Introductory drawing and related studio practices for those without high school art beyond Grade 10 or no formal training. Offered in both terms. Credit granted for only one of VISA 180 or 182.

VISA 182 (3) STUDIO ONE. Introductory drawing and related media for students who have completed at least Grade 11 art. Credit granted for only one of VISA 180 or 182.

VISA 183 (3) STUDIO TWO. Introductory visual art, emphasizing basic colour, painting and other art media. Prerequisite: Either (a) VISA 180 or (b) VISA 182.

VISA 210 (3) DIGITAL ARTS. Introduction to digital imaging. Includes technical instruction such as Photoshop and emphasizes history and conceptualization of digital technologies and artistic media. Prerequisite: A score of 68% or higher in VISA 110 and a score of 68% or higher in one of VISA 180, VISA 182 and a score of 68% or higher in VISA 183.

VISA 220 (3) DRAWING. Development of skills in drawing including life drawing. Introduction to the development of personal style and concepts. Prerequisite: A score of 68% or higher in VISA 110 and a score of 68% or higher in one of VISA 180, VISA 182 and a score of 68% or higher in VISA 183.

VISA 230 (3) PAINTING. Development of a variety of techniques and approaches to painting. Emphasis on developing a strong paint vocabulary as well as acquiring knowledge of historical and contemporary issues in painting. Prerequisite: A score of 68% or higher in VISA 110 and a score of 68% or higher in one of VISA 180, VISA 182 and a score of 68% or higher in VISA 183.

VISA 240 (3) INTRODUCTION TO PHOTOGRAPHY. Introduction to photography techniques and image-making. Emphasis on camera techniques and film and darkroom production. Prerequisite: VISA 110 and a score of 68% or higher in one of VISA 180, VISA 182 and a score of 68% or higher in VISA 183.

VISA 250 (3) INTRODUCTION TO PRINT MEDIA. Introduction to visual print culture, and contemporary and historical technical print practices in a selection of media that may include traditional and photographic intaglio, relief, and screen printing, and basic digital applications. Prerequisite: A score of 68% or higher in VISA 110 and a score of 68% or higher in one of VISA 180, VISA 182 and a score of 68% or higher in VISA 183.

VISA 260 (3) BASIC SCULPTURE. Contemporary sculpture practice and theory. Various sculpture materials and technologies including machinery use. Prerequisite: A score of 68% or higher in VISA 110 and a score of 68% or higher in one of VISA 180, VISA 182 and a score of 68% or higher in VISA 183.

VISA 270 (3) SPECIAL STUDIES. Introduction to various aspects of contemporary studio practice. Not offered every year. Prerequisite: A score of 68% or higher in VISA 110 and a score of 68% or higher in one of VISA 180, VISA 182 and a score of 68% or higher in VISA 183.

VISA 310 (3) INTERMEDIATE DIGITAL ARTS I. Issues and topics of digital media and visual culture. Includes technical introduction to Internet applications and the creation of Web-based art. Prerequisite: One of VISA 210, VISA 287, FINA 287.

VISA 311 (3) INTERMEDIATE DIGITAL ARTS II. Continuing investigation into issues and topics of digital media. Further use of internet applications and development of Web-based art projects. Prerequisite: One of VISA 210, VISA 287, FINA 287.

VISA 320 (3) INTERMEDIATE DRAWING I. Investigation of drawing as a discipline in the context of contemporary art. Emphasis on expanding definitions of the drawing practice while focusing on technical and conceptual development. Prerequisite: One of VISA 220, VISA 281, FINA 281.

VISA 321 (3) INTERMEDIATE DRAWING II. Investigation of drawing as a discipline in the context of contemporary Art and theory. Emphasis on self directed projects in consultation with the instructor. Prerequisite: One of VISA 220, VISA 281, FINA 281.

VISA 330 (3) INTERMEDIATE PAINTING I. Development of techniques and personal style in relation to ideas. History and contemporary issues in painting will be introduced to assist

students in conceptualizing their painting practice. Prerequisite: One of VISA 230, VISA 282, FINA 282.

VISA 331 (3) INTERMEDIATE PAINTING II. Further investigation of painting in the context of contemporary art. Emphasis on self directed projects in consultation with the instructor. Prerequisite: One of VISA 230, VISA 282, FINA 282.

VISA 340 (3) INTERMEDIATE PHOTOGRAPHY I. An investigation of approaches to photography and its meaning in the context of contemporary art. The term theme will be determined by the instructor. B & W, colour and digital production. Prerequisite: One of VISA 240, VISA 289, VISA 289.

VISA 341 (3) INTERMEDIATE PHOTOGRAPHY II. An investigation of contemporary photography production and approaches to the constructed image. There will be an emphasis on medium and large format camera use and studio lighting techniques. Prerequisite: One of VISA 240, VISA 289, FINA 289.

VISA 350 (3) INTERMEDIATE PRINT MEDIA I. Investigation of intaglio and relief print media (i.e. may include etching, wood and lino cut, and collagraph) within an interdisciplinary format, combining digital print procedures. Discussion of contemporary and historical visual print culture. Prerequisite: Either (a) VISA 250 or (b) one of VISA 290, VISA 283, VISA 284, FINA 290, FINA 283, FINA 284.

VISA 351 (3) INTERMEDIATE PRINT MEDIA II. Investigation of traditional and non-traditional print media (i.e. may include screen printing and/or lithographic techniques combining drawn, photographic, and digital print procedures) within an interdisciplinary format. Discussion of contemporary and historical visual print culture. Prerequisite: Either (a) VISA 250 or (b) one of VISA 283, VISA 284, VISA 290, FINA 283, FINA 284, FINA 290.

VISA 360 (3) INTERMEDIATE SCULPTURE I. Investigation of contemporary practices in sculpture and the use of scale. Emphasis on public sculpture. Prerequisite: One of VISA 260, VISA 285, VISA 286, FINA 285, FINA 286.

VISA 361 (3) INTERMEDIATE SCULPTURE II. Development of personal concerns in three-dimensional work. Emphasis on the integration of diverse materials and techniques. Prerequisite: One of VISA 260, VISA 285, VISA 286, FINA 285, FINA 286.

VISA 370 (3/6) D SPECIAL STUDIES I. Intermediate tutorial. Not offered every year. Prerequisite: 6 credits of 200 level VISA

VISA 371 (3/6) D SPECIAL STUDIES II. Intermediate tutorial. Not offered every year. Prerequisite: 6 credits of 200 level VISA

VISA 380 (3) STUDIO THEORY I. A seminar in problems in contemporary art practice and related theory. Preference given to Visual Arts students.

VISA 381 (3) STUDIO THEORY II. A seminar in problems in contemporary art practice and related theory. Preference given to Visual Art students. Prerequisite: VISA 380.

VISA 410 (3) INTERACTIVE DIGITAL ARTS I. Consideration of critical issues relating to Cyber-culture and interactivity is emphasized. Introduction to technical features of multimedia applications and creation of interactive computer-based art projects. Prerequisite: One of VISA 310, VISA 311, VISA 387, FINA 387.

VISA 411 (3) INTERACTIVE DIGITAL ARTS II. Continuing emphasis on critical issues of Cyber-culture and interactivity. Further development of artistic projects in interactive multimedia. Prerequisite: One of VISA 310, VISA 311, VISA 387, FINA 387.

VISA 430 (3) ADVANCED DRAWING AND PAINTING I. Interdisciplinary studio practice with emphasis on drawing, painting, and related media. Prerequisite: One of VISA 320, VISA 321, VISA 330, VISA 331, VISA 381, VISA 382, FINA 381, FINA 382.

VISA 431 (3) ADVANCED DRAWING AND PAINTING II. Interdisciplinary studio practice with emphasis on drawing, painting, and related media. Prerequisite: One of VISA 320, VISA 321, VISA 330, VISA 331, VISA 381, VISA 382, FINA 381, FINA 382.

VISA 440 (3) ADVANCED PHOTOGRAPHY I. Photography practice in the context of contemporary art. Interdisciplinary connections to other media will be encouraged. Prerequisite: One of VISA 340, VISA 341, VISA 386, FINA 386.

VISA 441 (3) ADVANCED PHOTOGRAPHY II. The production of self-directed projects investigating photography as art. Focus on integrative approaches including conventional, digital and multi-media. Prerequisite: One of VISA 340, VISA 341, VISA 386, FINA 386.

VISA 450 (3) ADVANCED PRINT MEDIA AND SCULPTURE I. Studies in contemporary trends in studio practice and theory. Emphasis on advanced two and three-dimensional work developed out of experimental approaches to sculpture, installation art and print-based media. Prerequisite: One of VISA 350, VISA 351, VISA 360, VISA 361, VISA 383, VISA 384, FINA 383, FINA 384.

VISA 451 (3) ADVANCED PRINT MEDIA AND SCULPTURE II. Further studies in advanced two and three-dimensional work developed out of experimental approaches to sculpture, installation art and print-based media. Prerequisite: One of VISA 350, VISA 351, VISA 360, VISA 361, VISA 383, VISA 384, FINA 383, FINA 384.

VISA 470 (3/6) D ADVANCED SPECIAL STUDIES I. Advanced work in contemporary and historical aspects of studio practice. Not offered every year. Prerequisite: 300-level VISA

VISA 471 (3/6) D ADVANCED SPECIAL STUDIES II. Advanced work in contemporary and historical aspects of studio practice. Not offered every year. Prerequisite: 300-level VISA

VISA 480 (3) ADVANCED SEMINAR I. Readings in art theory and criticism. Prerequisite: All of VISA 380, VISA 381.

VISA 481 (3) ADVANCED SEMINAR II. Readings in art theory and criticism. Prerequisite: VISA 480.

VISA 490 (3) ADVANCED TUTORIAL IN STUDIO I. Advanced work in contemporary and historical aspects of studio practice. Permission of instructor required. Not offered every year.

VISA 491 (3) ADVANCED TUTORIAL IN STUDIO II. Advanced work in contemporary and historical aspects of studio practice. Permission of instructor required.

VISA 580 (0) MAJOR ESSAY. M.F.A. only.

VISA 581 (12) STUDIO V. Special course for students enrolled in the first year of the M.F.A. program.

VISA 582 (12) STUDIO VI. Special course for students enrolled in the second year of the M.F.A. program.

VISA 590 (3-6) C DIRECTED STUDIES IN VISUAL ART. Tutorial work in visual arts and theory arranged by permission with an individual faculty member. Not available to students enrolled in the M.F.A. program in Visual Arts.

VRHC — VOCATIONAL REHABILITATION COUNSELLING FACULTY OF EDUCATION

VRHC 501 (3) ISSUES IN VOCATIONAL REHABILITATION COUNSELLING.

VRHC 502 (3) MEDICAL ASPECTS OF DISABILITY.

VRHC 503 (3) VOCATIONAL IMPLICATIONS OF DISABILITY. Corequisite: VRHC 502.

VRHC 504 (3) JOB DEVELOPMENT AND PLACEMENT.

VRHC 505 (3) REHABILITATION LITERATURE AND APPLICATIONS TO PRACTICE. Prerequisite: EPSE 481.

VRHC 507 (3/6) D PRACTICUM.

VRHC 508 (6) INTERNSHIP.

VRHC 510 (8) VOCATIONAL EVALUATION INTERNSHIP.

VRHC 511 (3) CASE AND DISABILITY MANAGEMENT. Prerequisite: All of VRHC 501, VRHC 502. At least 3 credits of VRHC 502 is required.

VRHC 512 (3) CASE AND DISABILITY MANAGEMENT. Prerequisite: All of VRHC 501, VRHC 502, VRHC 511.

VRHC 590 (0) MAJOR PAPER. Pass/Fail.

VRHC 599 (6-12) D THESIS.

VURS — VISITING UNDERGRADUATE RESEARCH STUDENTS FACULTY OF APPLIED SCIENCE

VURS 499 (0) VISITING UNDERGRADUATE STUDENTS.

WMST — WOMEN'S STUDIES & GENDER RELATIONS FACULTY OF ARTS

For other acceptable courses, see the "Women's Studies" listing under the Faculty of Arts section of the Calendar or visit the program's website at www.ws.arts.ubc.ca.

WMST 100 (6) INTRODUCTION TO WOMEN'S STUDIES. An interdisciplinary exploration of the situation of women in Canadian society, both past and present. Theoretical analyses, research, and literary sources are used to broaden understanding of the determinants of women's experience, with a focus on the Canadian Context.

WMST 201 (4) CONNECTING WITH COMPUTER SCIENCE. Fundamentals of computer science and their connections with the arts, psychology, and biology. Historical, cultural and gender perspectives of important contributions to the field will be discussed. No prior computing background required. Equivalency: CPSC 101.

WMST 205 (3) WOMEN IN CANADA FROM THE 16TH CENTURY TO 1920. The experiences of diverse groups of women from just prior to the establishment of New France to the end of World War One.

WMST 210 (3) WOMEN IN CANADA FROM 1920 TO THE PRESENT. The experiences of diverse groups of women from World War One to the present.

WMST 224 (3/6) D WOMEN IN LITERATURE. Techniques of literary study, with emphasis on the ways in which women are represented in and have contributed to the literary tradition.

WMST 230 (3) WOMEN AND REPRESENTATION IN MODERN ASIA. Women's self-representation and the social constructions of "womanhood" or "femininity" in modern Asian literature, art, film, popular culture and the media. Three distinct Asian cultures will be addressed.

WMST 235 (3) WOMEN AND SOCIAL STRUCTURES IN MODERN ASIA. Women's roles in politics, economics, family structure, the military, and other institutions as these were involved in efforts toward modernization in Asian countries.

WMST 300 (3) INTRODUCTION TO GENDER RELATIONS. An interdisciplinary exploration of gender, sexual identity, and gender relations, emphasizing historical and cross-cultural aspects and the social construction of masculinity and femininity.

WMST 301 (3) THE ROLES OF ABORIGINAL WOMEN IN CANADA. Historical, current and future roles of Aboriginal women, with a focus on British Columbia.

WMST 302 (3) WOMEN, WORK AND EDUCATION. The intersections of gender, education and work using sociological and economic frameworks. Prerequisite: WMST 100 or upper-level standing.

WMST 303 (3) WOMEN, LAW AND SOCIAL CHANGE. A survey of feminist legal thought and recent developments in feminism and law,

with a focus on Canada. Prerequisite: WMST 100 or upper-level standing.

WMST 320 (3) FEMINIST PEDAGOGIES IN THE CLASSROOM AND COMMUNITY.

Feminist pedagogies and feminist debates about pedagogy in formal, nonformal and informal educational settings.

WMST 325 (3) FEMINIST QUALITATIVE METHODS FOR RESEARCH. Data collection techniques, the politics of interpretation, and the formulation of a research proposal using a feminist, anti-racist framework. Formerly part of WMST 322. Prerequisite: WMST 100.

WMST 326 (3) THE POLITICS OF GENDER, FAMILIES AND NATION-BUILDING. Investigation of historical and contemporary scholarship on the diversity of families, focusing on differences of gender, sexuality, race/ethnicity and social class within and across national borders. Formerly part of WMST 322.

WMST 326 (3) THE POLITICS OF GENDER, FAMILIES, AND NATION-BUILDING. Investigation of historical and contemporary scholarship on the diversity of families, focusing on differences of gender, sexuality, race/ethnicity and social class within and across national borders. Formerly part of WMST 322. Prerequisite: WMST 100.

WMST 327 (3) FEMINIST THEORIES OF REPRESENTATION AND DIFFERENCE. Feminist scholarship emphasizing languages and processes of representation and the construction of difference in cultural discourses and institutions. Formerly part of WMST 324. Prerequisite: WMST 100.

WMST 328 (3) THEORIES OF SUBJECTIVITY. How feminist scholarship has shaped and reinterpreted accounts of the subject, drawing on such traditions as structuralism, poststructuralism, psychoanalysis, postcolonialism, postmodernism, and Queer Theory. Formerly part of WMST 324. Prerequisite: WMST 100.

WMST 401 (3) BODY, GENDER AND SOCIETY. An interdisciplinary examination of the body, exploring how social relations and space are implicated in the constitution and experience of gendered bodies and identities, with an emphasis on feminist analyses of body-societal relations. Prerequisite: WMST 100 or upper-level standing.

WMST 403 (3) GENDER, GLOBALIZATION, AND INTERNATIONAL POLITICS. Critical examination of the gender dimension of globalization and the theories, discourse and practices in international politics using gender analysis. Prerequisite: WMST 100 or upper-level standing.

WMST 405 (3) GENDER ISSUES IN COMMUNITY AND INTERNATIONAL ORGANIZING. Critical examination and practical applications of concepts, theories, methods and strategies of gender-aware organizing at the community and international levels.

WMST 410 (3) WOMEN'S HEALTH ISSUES. Explore a variety of women's health issues using selected theoretical frameworks. Prereq-

uisite: WMST 100 or permission of the instructor. Equivalency: NURS 409A.

WMST 411 (3) AFRICAN/BLACK WOMEN IN THE AMERICAS. An interdisciplinary survey of African/Black women in the Americas from the beginning of the slave trade to the present. Prerequisite: WMST 100 or upper-level standing.

WMST 422 (3) ADVANCED RESEARCH SEMINAR IN WOMEN'S STUDIES. Critical theories, methodologies, ethics and practices appropriate for advanced feminist research. Prerequisite: WMST 100 and two of WMST 325, WMST 326, WMST 327, WMST 328.

WMST 425 (3/12) C SPECIAL TOPICS IN WOMEN'S STUDIES. Examination in depth of selected topics in Women's Studies. Consult the Women's Studies Office for course offerings. May be repeated for credit. Prerequisite: WMST 100. Permission of the instructor is also acceptable.

WMST 440 (3) GENDER, EDUCATION AND POPULAR CULTURE. Feminist debates in education concerning how young and adult women are culturally constructed and, in turn, how they construct themselves both in and outside school.

WMST 450 (3/6) C DIRECTED STUDIES. General reading and/or a research undertaking, with the agreement, and under supervision of, a faculty member selected by the student and approved by the Chair of Women's Studies. A written paper or equivalent will be required. Open to Women's Studies majors or minors.

WMST 480 (3/6) D WOMEN AS AGENTS OF CHANGE: A PRACTICUM IN WOMEN'S STUDIES. Connects feminist theory and feminist practice through placement in a community organization. Open to WMST Majors or Minors. This course is graded Pass/Fail. Prerequisite: Two of WMST 325, WMST 326, WMST 327, WMST 328. Consult the department.

WMST 500 (3) INTERDISCIPLINARY RESEARCH IN WOMEN'S STUDIES.

WMST 501 (3) ISSUES IN FEMINIST RESEARCH METHODOLOGY.

WMST 502 (3) ISSUES IN FEMINIST THEORY.

WMST 503 (1-3) D SPECIAL TOPICS IN WOMEN'S STUDIES.

WMST 504 (3-6) C PRACTICUM OR INTERNSHIP.

WMST 505 (1-6) C DIRECTED READING IN ADVANCED WOMEN'S STUDIES.

WMST 510 (3) EXTENDED ESSAY.

WMST 520 (6-9) C M.A. THESIS.

WMST 606 (0) PH.D. THESIS.

WOOD — WOOD PRODUCTS PROCESSING FACULTY OF FORESTRY

WOOD 120 (3) INTRODUCTION TO WOOD PRODUCTS AND FOREST MANAGEMENT.

Introduction to forestry, wood products industry, processes, products, markets and forest policy issues affecting the wood industry. Not available for credit to students in the B.S.F. degree. [2-3]

WOOD 242 (3) INTRODUCTION TO BUSINESS STATISTICS AND QUALITY CONTROL. A practical introduction to the use of statistics and quality control to solve problems in the wood products industry. Students will exercise skills using problem cases taken from industrial applications. Corequisite: One of MATH 100, MATH 102, MATH 111. [3-2-0]

WOOD 243 (3) INTRODUCTION TO MANUFACTURING BUSINESS ECONOMICS. Introduction to the relationship of a manufacturing enterprise and the business environment from an economic perspective. [3-0]

WOOD 244 (3) QUANTITATIVE METHODS IN THE WOOD INDUSTRY. Solving practical problems in the wood industry using computer-based mathematical tools including spreadsheets, visual basic programming and relational database systems. Prerequisite: One of MATH 101, MATH 103, MATH 121. [2-3-0]

WOOD 271 (4) WOOD PRODUCTS CHEMISTRY I. Chemistry relating to wood and wood products: chemistry of lignin, cellulose, hemicelluloses, extractives, and biological degradation of lignocellulosics; wood pressure impregnation procedures. Prerequisite: WOOD 280 and one of CHEM 113, CHEM 123. [3-3-0]

WOOD 273 (3) WOOD ADHESIVES AND COATINGS. Introduction to structure and properties of polymers and wood finishes; chemistry of adhesives and preservatives. Corequisite: WOOD 271. [2-3-0]

WOOD 280 (3) WOOD ANATOMY AND IDENTIFICATION. Introduction to tree growth; macroscopic and microscopic anatomy and identification of softwoods and hardwoods; descriptions of cell wall ultra-structure, wood variability and wood quality. [3-2-0]

WOOD 282 (3) WOOD PHYSICS AND DRYING. Wood-moisture relationships, transport phenomena, acoustical and electrical properties of wood; wood drying methods. Prerequisite: WOOD 280. [3-2-0]

WOOD 288 (2) FORESTRY: PRACTICES RELATED TO PRODUCT QUALITY AND MANUFACTURE. Stand, silviculture and harvesting activities that influence the resource entering the wood manufacturing sector. Not open for credit to students in the BSF program. [2-1-0]

WOOD 290 (3) WOOD PRODUCTS MANUFACTURING. Basic wood manufacturing including primary and secondary manufacturing. Focus on producing and joining lumber,

edging, drilling, veneers and CNC equipment. Prerequisite: WOOD 120. [2-3-0]

WOOD 300 (3) CO-OPERATIVE WORK PLACEMENT I. Supervised work experience in approved organizations for a minimum of 13 weeks. Restricted to students in the Co-operative Education Program in Wood Products Processing.

WOOD 305 (3) WOOD MACHINING SKILLS. Safe working procedures for wood processing machinery, explanation of various manufacturing equipment, product documentation, product development and manufacturing processes. Prerequisite: WOOD 290.

WOOD 310 (3) CO-OPERATIVE WORK PLACEMENT. Supervised work experience in approved organization for 16 weeks. Restricted to students in the Co-operative Education Program in Wood Products Processing and can only be taken with the permission of the Co-op Coordinator. Prerequisite: One 300-level WOOD cooperative work placement course.

WOOD 311 (3) CO-OPERATIVE WORK PLACEMENT. Supervised work experience in approved organizations for 16 weeks. Restricted to students in the Co-operative Education Program in Wood Products Processing.

WOOD 312 (3) CO-OPERATIVE WORK PLACEMENT. Supervised work experience in approved organizations for 16 weeks. Restricted to students in the Co-operative Education Program in Wood Products Processing. Prerequisite: All of WOOD 310, WOOD 311.

WOOD 330 (4) INDUSTRIAL ENGINEERING. Use of industrial engineering concepts and methods to analyze and improve organizations, including operations strategy and competitiveness, process planning, facilities layout, human resource issues, work measurement, inventory management, linear programming, sensitivity analysis, transportation problems, and capacity planning. Prerequisite: All of ECON 101, FRST 231. [3-3]

WOOD 335 (3) QUALITY IMPROVEMENT. Modern techniques for improving quality in the workplace with particular emphasis on the forest products industry. Topics include quality control management, control charting, continuous improvement and analysis of variance techniques. Prerequisite: FRST 231. [3-3-0]

WOOD 341 (3) PROBLEM SOLVING. Practical computer and problem solving skills; problem cases taken from industrial applications. Prerequisite: WOOD 244. [2-4-0]

WOOD 353 (2) MILL SITE VISITS. One week of on-site study of forest products manufacturing plants immediately following Spring examinations of second or third year. Representative sawmills, plywood mills, remanufacturing plants, particleboard manufacturers, pulp mills, laminated timber plants and wood preservation facilities in the Interior are studied. Fees will be assessed to meet expenses.

WOOD 376 (3) MECHANICS OF WOOD PRODUCTS. Introduction to the strength of materials with emphasis on the elastic properties and ultimate strength of wood and wood products. Prerequisite: One of PHYS 101, PHYS 170 and one of MATH 101, MATH 103, MATH 121. [3-2-0]

WOOD 386 (3) APPLIED MECHANICS OF MATERIALS. Beam analysis, shaft analysis, columns, stress/strain transformations, thin-walled pressure vessels, material strength failure, criteria, fatigue, design and sizing, ISO standards. Prerequisite: WOOD 376. [2-2-0]

WOOD 400 (3) CO-OPERATIVE WORK PLACEMENT. Supervised work experience in approved organizations for 16 weeks. Restricted to students in the Co-operative Education Program in Wood Products Processing and can only be taken by permission of the Co-op Coordinator. Prerequisite: Either (a) all of WOOD 300, WOOD 310 or (b) WOOD 311 or (c) WOOD 312.

WOOD 411 (3) COOP WORK PLACEMENT. Supervised work experience in approved organizations for 16 weeks. Restricted to students in the Co-operative Education Program in Wood Products Processing. Prerequisite: Two of WOOD 300, WOOD 310, WOOD 311, WOOD 312.

WOOD 412 (3) COOP WORK PLACEMENT. Supervised work experience in approved organizations for 16 weeks. Restricted to students in the Co-operative Education Program in Wood Products Processing. Prerequisite: WOOD 300 and two of WOOD 310, WOOD 311, WOOD 312.

WOOD 430 (3) PLANT LAYOUT AND DESIGN. Techniques for developing a plan, setting goals, and evaluating the impact of changes in the design, layout and operation of the factory with an emphasis on computer simulation. Prerequisite: All of WOOD 290, WOOD 330, WOOD 485.

WOOD 440 (3) JOB COSTING AND ENGINEERING ECONOMICS. Use of engineering economics to evaluate investment proposals of an engineering nature, including decision making processes, cost concepts, time value of money, cash flow analysis, comparison methods, depreciation, replacement analysis, taxes, inflation and sensitivity analysis. Prerequisite: WOOD 330. [3-1]

WOOD 448 (3) SUMMER WORK REPORT. Technical report on relevant wood industry experience. Faculty advice during the summer and preparation of the report required for style and content.

WOOD 449 (1-6) C DIRECTED STUDIES IN WOOD PRODUCTS PROCESSING. In special cases and with the approval of the instructor concerned, a student may carry on directed studies of specific problems in wood products processing.

WOOD 461 (3) GLOBALIZATION AND THE MARKETING OF WOOD PRODUCTS. Examination of globalization and the impact of changing regions of demand and supply on the

marketing of wood products. Prerequisite: Third-year standing. [3-1-0]

WOOD 462 (3) INTERNATIONAL MARKETING OF WOOD PRODUCTS. The theory and practice of international marketing of primary and secondary solid wood products. Corequisite: WOOD 461. [3-0]

WOOD 463 (3) CUSTOMER RESEARCH METHODS. Qualitative and quantitative customer research methods in the forest products industry. Prerequisite: All of WOOD 242, FRST 231 or an equivalent course in introductory probability and statistics. [3-0]

WOOD 464 (3) WOOD FINISHING. Introduction to polymeric coatings and finishes used in the wood products industry. Examines surface preparation, application equipment and properties of various coatings. Prerequisite: WOOD 290. [2-3-0]

WOOD 465 (3) WOOD INDUSTRY BUSINESS MANAGEMENT. Business management concepts common in the forest products industry including marketing, customer research, product development and design. [3-0-2]

WOOD 467 (3) PRODUCT DEVELOPMENT AND DESIGN IN THE WOOD INDUSTRY. The principles and practice of new product design and development in the wood industry, from the conceptual stage to commercialization. [3-0-0]

WOOD 473 (4) WOOD CHEMISTRY AND CHEMICAL UTILIZATION. Wood chemical composition; cellulose, hemicelluloses, lignins and extractive structures, reactions and responses in wood, pulp, and derivatives processing; wood as energy source. Prerequisite: One of CHEM 253, CHEM 230. [3-4]

WOOD 474 (2) WOOD PROPERTIES AND PRODUCTS MANUFACTURING. Wood moisture, density and strength properties; manufacturing processes for major forest products. [2-0-0]

WOOD 475 (3) WOOD PROPERTIES, IDENTIFICATION AND USES. Elementary chemical, physical and mechanical properties of wood and their variations in relation to structure; identification by hand lens features; manufacture of lumber, pulp and composite wood products. Not available for credit to Wood Science and Industry students. Prerequisite: FRST 111. [3-2]

WOOD 476 (3) TIMBER STRUCTURES DESIGN. Design of engineered structural elements for light frame systems using limit states design principles with emphasis on load duration, stress grades, sawn and glued laminated members, deflection, elastic instability, combined loads, timber joints and fasteners. Credit will not be given for both WOOD 476 or CIVL 439. Prerequisite: One of WOOD 376, CIVL 230. Equivalency: CIVL 439. [2-2]

WOOD 477 (3) WOOD BUILDING DESIGN. Case studies of wood buildings with emphasis on conceptual design aspects. [2-0-2]

WOOD 478 (3) BUILDING SCIENCE. Building enclosure design considering heat and moisture

transmission, air flow and ventilation, condensation, acoustics; roofing systems; diagnostic evaluations; fire protection. Equivalency: CIVL 478. [3-0-0]

WOOD 484 (3) SAWMILLING SYSTEMS.

Principles for the design and operation of sawmills from the log sorting yard to the green lumber stage. Emphasis on designing and coordinating sawmill machine centers in the context of marketing requirements and raw material availability. Introduction to sawing optimization systems and process control. Prerequisite: FRST 332. [2-3]

WOOD 485 (3) FURNITURE

CONSTRUCTION. The theory and practice of modern construction techniques used in the manufacture of furniture and cabinets. Prerequisite: All of WOOD 290, WOOD 386. [3-1-0]

WOOD 487 (4) GLUED WOOD PRODUCTS.

Physical, chemical and mechanical variables involved in cold, hot and non-conventional adhesive bonding of wood; preparation and characteristics of adhesives; plywood, composite wood panels, hardboard, medium density fibreboard and laminated wood manufacturing processes; important physical and chemical properties of products; methods of prefinishing. [3-3-0]

WOOD 490 (3) ADVANCED WOOD

PRODUCTS MANUFACTURING. Advanced wood manufacturing techniques for producing furniture and cabinets including the design, production and use of jigs and fixtures for automated processing. Prerequisite: WOOD 290. Corequisite: WOOD 485. [3-3]

WOOD 491 (3) ENVIRONMENTAL FACILITIES

DESIGN. Introduction to pneumatic and hydraulic power, design and selection of waste recycling systems, boilers, energy generation and environmental legislation. Prerequisite: All of WOOD 430, WOOD 464. [3-2]

WOOD 492 (3) MODELING FOR DECISION

SUPPORT. Applications of mathematical modeling, optimization, and simulation in forest planning and manufacturing; formulating models and interpreting results for decision support. Prerequisite: One of FRST 232, WOOD 341. [3-3]

WOOD 493 (3) PROJECT IN PROGRAM

MAJOR. A report (approved by a faculty supervisor and the Program Director) based on either a technical description of a study, an extension of the senior co-op report, a detailed literature review, a research-based project, or a guided independent study developed by the student. Prerequisite: Fourth-year standing

WOOD 494 (3) PRINCIPLES OF WOOD

CUTTING AND TOOLING. Wood cutting fundamentals, chip formation, cutting conditions, cutting edge maintenance, sawing, planing and molding, veneer cutting, chipping, turning. Prerequisite: MECH 356. [2-3-0]

WRIT — UNIVERSITY WRITING CENTRE COURSES WRIT 98 (0) PREPARATION FOR UNIVERSITY WRITING AND THE LPI.

WRIT 99 (0) ADVANCED COMPOSITION.

ZOOL — ZOOLOGY FACULTY OF SCIENCE

All undergraduate courses in Zoology are listed under Biology.

ZOOL 500 (3/6) C DIRECTED STUDIES IN ZOOLOGY.

ZOOL 502 (6) ECOLOGY SEMINAR.

ZOOL 503 (6) COMPARATIVE ANIMAL PHYSIOLOGY SEMINAR.

ZOOL 504 (3) ETHOLOGY SEMINAR.

ZOOL 505 (6) CELL BIOLOGY SEMINAR.

ZOOL 519 (6) TOPICS IN PARASITOLOGY.

ZOOL 521 (6) FISHERIES BIOLOGY AND MANAGEMENT.

ZOOL 522 (4) LIMNOLOGY SEMINAR.

Offered in alternate years. Prerequisite: ZOOL 502.

ZOOL 524 (3) TOPICS IN CONSERVATION GENETICS. Equivalency: CONS 501.

ZOOL 525 (3) SYSTEMATICS AND EVOLUTION SEMINAR.

ZOOL 527 (6) THEORETICAL POPULATION DYNAMICS. Corequisite: ZOOL 502.

ZOOL 533 (3) ADVANCED TOPICS IN WILDLIFE ECOLOGY.

ZOOL 549 (6-18) C M.SC. THESIS.

ZOOL 553 (6) WORKSHOP IN COMPARATIVE AND ENVIRONMENTAL PHYSIOLOGY.

ZOOL 554 (3) TOPICS IN COMPARATIVE AND ENVIRONMENTAL PHYSIOLOGY.

ZOOL 562 (3) PROJECTS IN MATHEMATICAL BIOLOGY. Development and analysis of mathematical models for complex systems in ecology, evolution, cell biology, neurophysiology, and other biological and medical disciplines. Prerequisite: MATH 361.

ZOOL 649 (0) PH.D. THESIS.

2006-07

Appendix I: Enrolment Statistics 2005/06

The following figures reflect enrolment as of November 1, 2005 including Distance Education and Technology students.

FACULTY OF LAND AND FOOD SYSTEMS

	M	F	Total
Environmental Design			
Second Year	7	8	15
Third Year	5	11	16
Fourth Year	8	9	17
Away on Exchange (EAP)	0	0	0
Total	20	28	48
Home Economics			
Second Year	0	0	0
Third Year	0	1	1
Fourth Year	0	0	0
Total	0	1	1
Agroecology			
First Year	31	39	70
Second Year	27	44	71
Third Year	12	12	24

Appendix III: Emeritus Staff

Chancellors Emeriti

R. Lee, Chancellor Emeritus (1996)
L. R. Peterson, Chancellor Emeritus (1993)
W. L. Sauder, Chancellor Emeritus (2002)
W. R. Wyman, Chancellor Emeritus (1987)

President Emeritus

D. W. Strangway, President Emeritus (1999)

Vice-Presidents Emeriti

D. R. Birch, Vice-President Emeritus, Academic and Provost (1999)
B. C. McBride, Vice-President Emeritus, Academic and Provost (2005)
M. Shaw, Vice-President Emeritus, Academic and Provost (1989)
K. D. Srivastava, Professor Emeritus of Electrical Engineering and Vice President Emeritus of Student Services (1997)

Deans Emeriti

F. S. Abbott, Dean Emeritus of Pharmaceutical Sciences (2002); J. H. Andrews, Dean Emeritus of Education (1988); G. S. Beagrie, Dean Emeritus of Dentistry (1989); P. T. Burns, Dean Emeritus of Law (2004); I. McT. Cowan, Dean Emeritus of Graduate Studies (1975); C. V. Finnegan, Dean Emeritus of Science (1988); J. A. Gardner, Dean Emeritus of Forestry (1985); M. Hollenberg, Dean Emeritus of Medicine (1999); R. Kennedy, Dean Emeritus of Forestry (1992); W. D. Kitts, Dean Emeritus of Agricultural Sciences (1984); P. A. Lusztig, Dean Emeritus of Commerce and Business Administration (1995); M. P. Marchak, Dean Emerita of Arts (2001); J. H. McNeill, Dean Emeritus of Pharmaceutical Sciences (2004); J. F. Richards, Dean Emeritus of Agricultural Sciences (2001); B. E. Riedel, Dean Emeritus of Pharmaceutical Sciences (1985); M. Shaw, Dean Emeritus of Agricultural Sciences (1989); N. Sheehan, Dean Emeritus of Education (2000); P. Suedfeld, Dean Emeritus of Graduate Studies and Professor Emeritus of Psychology (2000); W. A. Webber, Dean Emeritus of Medicine (1999); L. M. Wedepohl, Dean Emeritus of Applied Science (1997); R. M. Will, Dean Emeritus of Arts (1996)

Director Emeritus

D. S. Mosedale, Director Emeritus of Continuing Education (1999)

Program Directors Emeriti

A. Bates, Program Director Emeritus (2004); S. Kort, Program Director Emeritus (1990); J. Kulich, Program Director Emeritus of Continuing Education (1991); G. Ledingham, Program Director Emerita of Continuing Studies (1999); A. L. MacDonell, Program Director Emeritus (1990); M. MacFarlane, Program Director Emerita (1990); M. Powell, Program Director Emerita of Continuing Studies (1995); B. G. Riddell, Program Director Emerita of Faculty Development and Instructional Services (1999); H. Rosenthal, Program Director Emeritus (1990); R. Sigal, Program Director Emerita of Continuing Education (2001); P. Thom, Program Director Emerita (1990); W. Uegama, Associate Vice President Emeritus of Continuing Studies (2003); K. C. Woodsworth, Program Director Emeritus (1990)

Librarians Emeriti

F. Bailey, Librarian Emerita (1987); N. Baldwin, Assistant University Librarian Emerita (2001); M. Banham, Administrative Librarian Emerita (1990); I. S. Bhugra, General Librarian Emeritus (1997); L. Brongers, Administrative Librarian Emerita (1996); R. J. Brongers, Librarian Emeritus (1990); H. Burndorfer, Administrative Librarian Emeritus (1996); R. Butterfield, Librarian Emerita (1987); L. J. Carrier, Librarian Emerita (1988); E. J. Caskey, Administrative Librarian Emerita (2001); E. L. Daniells, University Archivist Emerita (1988); J. E. De Bruijn, Assistant University Librarian Emeritus (1999); D. J. Dennis, Administrative Librarian Emeritus (1997); G. Dobbin, General Librarian Emerita (1990); S. C. Dodson, Administrative Librarian Emerita (1998); F. Doidge, General Librarian Emerita (2000); P. J. Dunn, General Librarian Emeritus of Humanities and Social Science (2004); M. Dutton, Librarian Emerita (1985); M. J. Dwyer, Librarian Emerita (1985); S. Dykstra, General Librarian Emerita (2000); T. Erickson, General Librarian Emeritus (1992); C. F. Forbes, General Librarian Emeritus (1991); J. Forbes, General Librarian Emerita (1999); N. Forbes, General Librarian Emerita (1997); G. C. Freeman, Administrative Librarian Emeritus (1997); J. D. Friesen, Administrative Librarian Emerita (2000); M. Fukuyama, Librarian Emerita (1985); T. Gonnami, General Librarian Emeritus (2002); J. C. Gray, Librarian Emeritus (1978); M. E. Guarnaschelli, General Librarian Emerita; R. M. Hamilton, Assistant Librarian Emeritus (1977); M. Hartman, Librarian Emeritus (1999); H. R. Hurt, Administrative Librarian Emeritus (1997); A. Jeffreys, Assistant University Librarian Emeritus (1994); L. Joe, Administrative Librarian Emerita (1999); J. Jones, General Librarian Emeritus (2003); L. Karpinski, General Librarian Emeritus (1996); R. G. Kaye, Librarian Emeritus (1989); M. H. Keate, Assistant University Librarian Emerita (2002); N. Kent, General Librarian Emerita (1996); I. G. M. Laponce, General Librarian Emerita (2003); A. R. Leith, Librarian Emerita (1988); O. Litwinow, General Librarian Emeritus (2000); P. Lysyk, General Librarian Emerita (1998); A. H. S. Ma, General Librarian Emeritus (1999); M. W. Macaree, Librarian Emerita (1985); R. W. MacDonald, Assistant University Librarian Emeritus (1992); S. Mathew, Librarian Emerita (1998); H. Mayoh, General Librarian Emerita (1994); P. K. McBride, General Librarian Emerita (2003); D. McInnes, University Librarian Emeritus (1991); J. D. McIntosh, General Librarian Emeritus (2001); E. Misewich, Librarian Emerita (1988); E. Neufeld, General Librarian Emeritus (1991); T.-K. Ng, Librarian Emerita (1987); N. E. Omelusik, Admin. Librarian III Emeritus (2005); M. Pahr, Librarian Emerita (1987); W. E. Parker, General Librarian Emeritus (2000); R. Patrick, University Librarian Emerita (2000); M. Price, Admin Librarian III Emerita (2002); H. M. Redding, General Librarian Emerita (2003); A. E. Rowley, General Librarian Emerita (1999); B. Scott, Administrative Librarian I Emerita (2003); J. Sharpe, General Librarian Emeritus (1994); D. Shields, Librarian Emerita (1985); T. J. Shorthouse, Administrative Librarian Emeritus (1998); R. V. Simmer, General Librarian Emeritus (2004); A. H. Soroka, General Librarian Emeritus (2000); P. Thiele, Admin. Librarian I Emeritus (2001); S. Y. Tse, General

Librarian Emeritus (1999); R. A. Turner, Admin. Librarian III Emerita (2001); S. Venkataraman, General Librarian Emeritus (1996); W. J. Watson, Assistant University Librarian Emeritus (1991); F. J. Whitney, General Librarian Emerita (2002); E. Wollaston, Administrative Librarian Emerita (1999); F. M. Woodward, General Librarian Emerita (2004); A. Yandle, Administrative Librarian Emerita (1992)

Professors Emeriti

R. T. Abboud, Professor Emeritus of Medicine (2001); N. Abu-Zahra, Assistant Professor Emerita of Anthropology and Sociology (2002); M. E. Ace, Associate Professor Emeritus of Commerce and Business Administration (2000); S. Acorn, Professor Emerita of Nursing (2004); L. Adamovich, Professor Emeritus of Forestry (1984); R. Adams, Clinical Assistant Professor Emeritus of Anaesthesia (2004); R. A. Adams, Professor Emeritus of Mathematics (2000); M. J. Adler, Associate Professor Emeritus of Mathematics (2005); B. Ahlborn, Professor Emeritus of Physics (1999); E. J. Akesson, Assistant Professor Emerita of Anatomy (1997); D. J. Albert, Professor Emeritus of Psychology (1998); T. H. Alden, Professor Emeritus of Metals and Materials Engineering (1999); S. A. Alderson, Professor Emerita of Theatre, Film, and Creative Writing (2005); B. M. Alfred, Associate Professor Emeritus of Anthropology and Sociology (1998); J. A. B. Allan, Professor Emeritus of Counseling Psychology (1997); B. Allardye, Associate Professor Emeritus of Surgery (2002); K. Alldritt, Professor Emeritus of English (2000); E. A. Allen, Clinical Professor Emeritus of Medicine (1998); D. E. Allison, Associate Professor Emeritus of Educational Psychology and Special Education (1998); K. Amacher, Associate Professor Emerita of Social Work (1994); M. M. Ames, Professor Emeritus of Anthropology and Sociology (1998); C. J. Anastasiou, Professor Emeritus of Mathematics and Science Education (1994); C. P. Anderson, Associate Professor Emeritus of Religious Studies (1995); C. T. Anderson, Associate Professor Emeritus of Mathematics (1987); D. L. Anderson, Professor Emeritus of Civil Engineering (1999); F. H. Anderson, Associate Professor Emeritus of Gastroenterology (2003); G. H. Anderson, Clinical Professor Emeritus of Pathology and Laboratory Medicine (1997); J. D. Anderson, Associate Professor Emeritus of Civil Engineering (1988); J. D. Anderson, Professor Emeritus of Medical Microbiology (1995); J. M. A. Anderson, Professor Emerita of Nursing (2005); R. Anderson, Associate Professor Emeritus of Mathematics (1999); T. W. Anderson, Professor Emeritus of Health Care and Epidemiology (1992); C. I. Andreen, Assistant Professor Emerita of Curriculum Studies (1999); R. Andrew, Clinical Professor Emeritus of Family Practice (2006); G. J. Ankenman, Clinical Professor Emeritus of Surgery (1993); A. M. Anthony, Senior Instructor Emerita of Curriculum Studies (2003); A. Anzarut, Clinical Professor Emeritus of Medicine (2000); D. A. Applegarth, Professor Emeritus of Pediatrics (2002); M. E. Arcus, Professor Emerita of Social Work and Family Studies (1999); N. Armstrong, Associate Professor Emerita of Education (1984); K. Asante, Clinical Assistant Professor Emeritus of Pediatrics (2000); L. F. Ashley, Associate Professor Emeritus of Education (1982); P. G. Ashmore, Clinical Professor Emeritus of Surgery (1994); N. M. Ashworth, Professor Emerita of

Language Education (1988); C. Astell, Professor Emerita of Biochemistry and Molecular Biology (2001); K. G. Atkinson, Clinical Professor Emeritus of Surgery (1995); J. Atrens, Professor Emeritus of Law (1996); F. Aubke, Professor Emeritus of Chemistry (1997); N. Auersperg, Professor Emerita of Anatomy (1994); E. G. Auld, Professor Emeritus of Physics & Astronomy (2001); J. R. Auman, Professor Emeritus of Physics and Astronomy (1998); A. P. Autor, Professor Emerita of Pathology (2000); I. Avakumovic, Professor Emeritus of History (1992); J. Axelson, Professor Emeritus of Pharmaceutical Sciences (2002); D. A. Axen, Professor Emeritus of Physics & Astronomy (2004); B. Z. Aylward, Clinical Assistant Professor Emeritus of Family Practice (1997); G. A. Badger, Clinical Associate Professor of Surgery (1987); D. A. Bain, Associate Professor Emeritus of Educational Psychology and Special Education (1990); P. A. H. Baird, Professor Emerita of Medical Genetics (2002); R. Baird, Clinical Professor Emeritus of Surgery (2000); J. M. Bak, Professor Emeritus of History (1992); V. A. Baldwin, Professor Emerita of Pathology (2000); D. A. Balzarini, Professor Emeritus of Physics & Astronomy (2003); R. J. Bandoni, Professor Emeritus of Botany (1989); D. Bankson, Professor Emeritus of Creative Writing (1985); J. Barman, Professor Emerita of Educational Studies (2004); R. Barman, Professor Emeritus of History (2002); J. Barnard, Professor Emeritus of Physics (1994); W. Barnes, Associate Professor Emeritus of Earth & Ocean Sciences (1999); J. D. Barrett, Professor Emeritus of Wood Science (2005); R. Barrie, Professor Emeritus of Physics (1993); N. Basco, Professor Emeritus of Chemistry (1991); V. Basco, Clinical Professor Emerita of Surgery (1991); F. Bass, Clinical Associate Professor Emeritus of Health Care and Epidemiology (2000); D. V. Bates, Professor Emeritus of Medicine (1987); T. Bates, Associate Professor Emeritus of Mathematics and Science Education (1985); M. S. Batts, Professor Emeritus of Germanic Studies (1991); D. Baudouin, Professor Emeritus of French (1991); R. Baudouin, Associate Professor Emerita of French (1994); R. M. Beames, Professor Emeritus of Animal Science (1997); B. L. Beattie, Professor Emerita of Geriatric Medicine (2005); I. Beattie, Associate Professor Emeritus of Mathematics and Science Education (1993); R. C. Beaumont, Assistant Professor Emeritus of Germanic Studies (1996); M. P. Beddoes, Professor Emeritus of Electrical Engineering (1989); D. Beder, Associate Professor Emeritus of Physics and Astronomy (1999); A. Beedle, Professor Emeritus of Commerce and Business Administration (1983); C. T. Beer, Professor Emeritus of Biochemistry (1981); I. S. Begg, Associate Professor Emeritus of Ophthalmology (1999); J.F. Belanger, Associate Professor Emeritus of Language and Literacy Education (2005); L. P. Belluce, Associate Professor Emeritus of Mathematics (1988); G. D. Bellward, Professor Emerita of Pharmaceutical Sciences (2004); C. S. Belshaw, Professor Emeritus of Anthropology and Sociology (1987); A. P. Benguerel, Professor Emeritus of Audiology and Speech Sciences (1997); K. Benson, Clinical Associate Professor Emeritus of Health Care and Epidemiology (1988); T. R. Bentley, Professor Emeritus of Language Education (1996); B. Bergersen, Professor Emeritus of Physics & Astronomy (2004); F. G. Berry, Senior Instructor Emeritus of Electrical Engineering (1993); K. Berry, Clinical Professor Emeritus of Pathology and Laboratory Medicine (1999); F. E. Bertram, Associate Professor Emeritus of Language Education (1985); D. Bethune-Johnson, Assistant Professor Emerita of Social and Educational Studies (1984); R. W. Bevis, Professor Emeritus of English (1997); L. M. Bewley, Professor Emerita of Library, Archival and Information Studies (1992); T. Bezcredi, Clinical Professor Emeritus of Psychiatry (1997); E. A. Bird, Associate Professor Emeritus of French (1981); A. G. Birkett, Professor Emerita of Education (1974); T. Bisalputra,

Professor Emeritus of Botany (1989); W. Black, Clinical Professor Emeritus of Pathology and Laboratory Science (2005); W. W. Black, Professor Emeritus of Law (2005); C. Blackorby, Professor Emeritus of Economics (2002); R. E. Blaine, Associate Professor Emeritus of Commerce and Business Administration (1997); R. Blair, Professor Emeritus of Animal Science (1998); D. E. Blake, Professor Emeritus of Political Science (2004); S. Blank, Professor Emeritus of Educational Psychology and Special Education (1993); B. Blasberg, Associate Professor Emeritus of Oral Biological & Medical Sciences (2001); M. H. Blom, Associate Professor Emerita of English (1999); M. Bloom, Professor Emeritus of Physics (1994); A. Boggie, Associate Professor Emeritus of Family Practice (1988); A. Bogoch, Clinical Professor Emeritus of Medicine (1995); B. Bohm, Professor Emeritus of Botany (1999); E. V. Bohn, Professor Emeritus of Electrical Engineering (1989); E. A. Bongie, Associate Professor Emerita of Classics (1992); L. L. Bongie, Professor Emeritus of French (1992); J. Boone, Clinical Professor Emeritus of Medicine (2000); M. Bose, Assistant Professor Emerita of Asian Research (2003); C. B. Bourne, Professor Emeritus of Law (1986); C. P. Bouygues, Professor Emeritus of French (1994); F. Bowlers, Associate Professor Emeritus of English (1989); J. Boyd, Assistant Professor Emeritus of Economics (2002); M. Boyd, Professor Emerita of Oral Health Sciences (2001); D. A. Boyes, Clinical Professor Emeritus of Obstetrics and Gynaecology (1990); W. J. Bracher, Assistant Professor Emerita of Family and Nutritional Sciences (1985); P. Bradley, Professor Emeritus of Economics, (1996); P. Bragg, Professor Emeritus of Medicine (1997); A. Branda, Senior Instructor Emerita of Human Kinetics (1996); R. M. R. Branion, Professor Emeritus of Chemical and Bio-Resource Engineering (1999); P. Bratty, Clinical Professor Emeritus of Medicine (1997); C. Brauner, Professor Emeritus of Social and Educational Studies (1993); C. O. Brawner, Professor Emeritus of Mining and Mineral Process Engineering (1995); K. T. Brearley, Associate Professor Emerita of French (1980); A. V. Bree, Professor Emeritus of Chemistry (1997); P. I. Brennan, Senior Instructor Emerita of English (1988); L. Brenzinger, Senior Instructor Emerita of Linguistics (1995); V. C. Brink, Professor Emeritus of Plant Science (1978); C. Brion, Professor Emeritus of Chemistry (2002); E. Broom, Professor Emeritus of Physical Education and Recreation (1993); S. G. Brough, Associate Professor Emeritus of Mathematics and Science Education (1992); D. Brown, Assistant Professor Emeritus of Music (1990); D. G. Brown, Professor Emeritus of Philosophy (1989); G. R. Brown, Associate Professor Emeritus of Civil Engineering (1996); J. C. Brown, Professor Emeritus of Physiology (1997); L. Brown, Professor Emeritus of Metals and Materials Engineering (1992); M. Brown, Assistant Professor Emerita of Language Education (1985); T. H. Brown, Associate Professor Emeritus of Pharmaceutical Sciences (1987); S. L. Brumelle, Professor Emeritus of Commerce and Business Administration (2000); W.A. Bruneau, Associate Professor Emeritus of Educational Studies (2003); F. E. Bryans, Professor Emeritus of Obstetrics and Gynaecology (1989); C. Bryner, Professor Emeritus of Slavonic Studies (1973); W. Buchan, Assistant Professor Emeritus of Family Practice (1993); S. Buckley, Clinical Associate Professor Emerita of Pediatrics (2000); A. T. Bui, Professor Emeritus of Mathematics (2002); P. S. Bullen, Professor Emeritus of Mathematics (1993); M. H. Bullock, Professor Emeritus of Creative Writing (1983); D. J. C. Bures, Professor Emeritus of Mathematics (1997); R. W. Burling, Professor Emeritus of Oceanography (1986); P. C. Burns, Associate Professor Emeritus of Classical, Near Eastern and Religious Studies (2005); L. H. Burr, Clinical Associate Professor Emeritus of Surgery (2004); K. O. Burridge, Professor Emeritus of Anthro-

pology and Sociology (1988); A. F. Burton, Associate Professor Emeritus of Biochemistry (1991); J. D. Burton, Clinical Associate Professor Emeritus of Pathology (1991); K. V. Bury, Professor Emeritus of Mechanical Engineering (2000); P. Bustamante, Clinical Assistant Professor Emerita of Rehabilitation Sciences (2006); A. S. Busza, Associate Professor Emeritus of English (2004); A. M. Butler, Assistant Professor Emerita of Nursing (1988); S. J. Butler, Assistant Professor Emeritus of Language Education (1995); D. S. Butt, Associate Professor Emerita of Psychology (2003); R. G. Butters, Assistant Professor Emeritus of Metals and Materials Engineering (1991); P. M. Byre, Professor Emeritus of Civil Engineering (2001); W. K. Caird, Associate Professor Emeritus of Psychiatry (1992); A. R. Cairns, Associate Professor Emeritus of Medicine (1994); H. A. Cairns, Professor Emeritus of Political Science (1995); J. H. Calam, Professor Emeritus of Social and Educational Studies (1985); S. M. Calisal, Professor Emeritus of Mechanical Engineering (2005); U. Callegarini, Clinical Associate Professor Emeritus of Pediatrics (1992); D. B. Calne, Professor Emeritus of Medicine (2001); S. E. Calvert, Professor Emeritus of Earth and Ocean Sciences (2000); K. Cambon, Clinical Professor Emeritus of Surgery (1988); E. C. Cameron, Associate Professor Emeritus of Nephrology (2004); R. G. Campanella, Professor Emeritus of Civil Engineering (1997); D. J. Campbell, Professor Emeritus of Pathology (1990); J. D. Campbell, Professor Emerita of Psychology (2003); J. J. Campbell, Professor Emeritus of Microbiology (1983); P. Candido, Professor Emeritus of Biochemistry & Molecular Biology (2003); T. H. Carefoot, Associate Professor Emeritus of Zoology (2004); R. W. Carlisle, Associate Professor Emeritus of Curriculum Studies (1997); J. F. Carolan, Professor Emeritus of Physics and Astronomy (2005); D. Carr, Clinical Associate Professor Emeritus of Medicine (2004); F. A. Carre, Associate Professor Emeritus of Human Kinetics (2004); J.B. Carrell, Professor Emeritus of Mathematics (2005); B. Carter, Assistant Professor Emerita of Social Work (1998); J. E. J. Carter, Professor Emeritus of Pediatrics (2003); W. F. Caselton, Associate Professor Emeritus of Civil Engineering (1996); J. Caswell, Professor Emeritus of Fine Arts (2002); J. H. Catterson, Professor Emerita of Language Education (1989); A. H. Cayford, Associate Professor Emeritus of Mathematics (1995); R. V. Chacon, Professor Emeritus of Mathematics (1994); A. C. Chaklader, Professor Emeritus of Metals and Materials Engineering (1993); E. V. Chamberlain, Associate Professor Emerita of Family and Nutritional Sciences; H. B. Chamberlain, Assistant Professor Emeritus of Political Science (2001); A. D. Chambers, Associate professor Emeritus of Forest Resources Management (1997); P. Champion, Clinical Professor Emeritus of Medicine (2006); M. J. Chandler, Professor Emeritus of Psychology (2004); B. Chang, Associate Professor Emeritus of Mathematics (1996); D. J. Chang, Clinical Associate Professor Emeritus of Anaesthesiology (1991); F. C. Chang, Professor Emeritus of Asian Studies (1973); Y. Chang, Professor Emeritus of Anthropology & Sociology (2003); C. Y. Chao, Professor Emerita of Asian Studies (1990); J. D. Chapman, Professor Emeritus of Geography (1989); R. L. Chase, Professor Emeritus of Earth and Ocean Sciences (1999); W. H. Chase, Professor Emeritus of Pathology (1992); H. Chaun, Clinical Professor Emeritus of Medicine (2002); E. Chave, Assistant Professor Emerita of Social Work (1974); H. T. Chen, Senior Instructor Emeritus of Asian Studies (1992); A. N. Cherkezoff, Clinical Professor Emeritus of Family Practice (1997); S. Cherry, Professor Emeritus of Civil Engineering (1993); R. D. Chester, Associate Professor Emeritus of Language Education (1997); H. Chew, Clinical Professor Emeritus of Ophthalmology (2003); M. Chiarenza, Professor Emerita of French, Hispanic and Italian Studies (2000); D. H. Chitty, Professor Emeritus of Zoology (1978); D. P.

Chong, Professor Emeritus of Chemistry (2001); **C. P. Christensen**, Professor Emerita of Social Work and Family Studies (2004); **R. Christensen**, Clinical Professor Emeritus of Surgery (1998); **M. H. Chung**, Clinical Professor Emerita of Obstetrics and Gynaecology (1990); **W. B. Chung**, Professor Emeritus of Surgery (1989); **S. G. Ciccone**, Professor Emerita of Hispanic and Italian Studies (1996); **C. W. Clark**, Professor Emeritus of Mathematics (1994); **R. M. Clark**, Professor Emeritus of Economics (1985); **B. R. Clarke**, Professor Emeritus of Educational Psychology and Special Education (1987); **R. Clarke**, Associate Professor Emeritus of Architecture (1990); **J. Claxton**, Associate Professor Emeritus of Commerce & Business Administration (2002); **I. G. M. Cleator**, Professor Emeritus of Surgery (2004); **D. B. Clement**, Professor Emeritus of Family Practice (1999); **L. R. Cochran**, Professor Emeritus of Educational and Counselling Psychology and Special Education (2000); **W. H. Cockroft**, Clinical Associate Professor Emeritus of Medical Microbiology and Pathology (1976); **W. Cohn**, Professor Emeritus of Anthropology and Sociology (1986); **T. A. Conine**, Professor Emerita of Rehabilitation Sciences (1995); **J. L. Conry**, Assistant Professor Emerita of Educational & Counselling Psychology & Special Education (2001); **J. S. Conway**, Professor Emeritus of History (1995); **T. S. Cook**, Assistant Professor Emerita of Educational Studies; **J. Coombs**, Professor Emeritus of Educational Studies (2000); **J. A. R. Coope**, Professor Emeritus of Chemistry (1996); **M. G. R. Coope**, Associate Professor Emerita of Hispanic and Italian Studies (1996); **R. J. Copeman**, Professor Emeritus of Agroecology (2003); **R. Copley**, Senior Instructor Emeritus of Geography (1996); **R. Corteen**, Associate Professor Emeritus of Psychology (1997); **T. L. Coulthard**, Professor Emeritus of Agricultural Engineering and Mechanics (1975); **A. D. Courtemanche**, Clinical Professor Emeritus of Surgery (1995); **J. E. Coury**, Associate Professor Emeritus of Mathematics (2001); **K. D. Coutts**, Associate Professor Emeritus of Human Kinetics (1999); **S. C. Coval**, Professor Emeritus of Philosophy (1993); **R. J. Cowan**, Clinical Professor Emeritus of Surgery (1986); **M. K. Craddock**, Professor Emeritus of Physics & Astronomy (2001); **J. Cragg**, Professor Emeritus of Economics (2002); **O. Cragg**, Associate Professor Emerita of French, Hispanic and Italian Studies (1999); **K. D. Craig**, Professor Emeritus of Psychology (2002); **C. F. Cramer**, Associate Professor Emeritus of Physiology (1987); **A. O. Crichton**, Professor Emerita of Health Care and Epidemiology (1985); **D. Crockett**, Associate Professor Emeritus of Psychiatry (1997); **S. A. Crooks**, Senior Instructor Emerita of Library, Archival & Information Studies (2001); **J. J. L. Crosby**, Clinical Associate Professor Emeritus of Anaesthesia (2003); **L. G. Crouch**, Professor Emeritus of Mineral Engineering (1978); **M. Crowhurst**, Professor Emerita of Language Education (1999); **J. Cruikshank**, Professor Emerita of Anthropology & Sociology; **M. Csapo**, Professor Emerita of Educational Psychology and Special Education (1994); **W. R. Cullen**, Professor Emeritus of Chemistry (1998); **I. G. Cumming**, Professor Emeritus of Electrical and Computer Engineering (2005); **C. K. Curtis**, Associate Professor Emeritus of Social and Educational Studies (1994); **F. L. Curzon**, Professor Emeritus of Physics and Astronomy (1997); **B. Czaykowski**, Professor Emeritus of History (1997); **C. Daem**, Senior Instructor Emerita of Family and Nutritional Sciences (1997); **J. Dahlie**, Professor Emeritus of Social and Educational Studies (1985); **F. W. Dalby**, Professor Emeritus of Physics (1993); **L. B. Daniels**, Professor Emeritus of Educational Studies (1995); **W. R. Danner**, Professor Emeritus of Geological Sciences (1989); **A. G. F. Davidson**, Professor Emeritus of Pediatrics (2002); **J. E. Davies**, Professor Emeritus of Microbiology (1997); **L. E. Davies**, Clinical Instructor Emerita of Anaesthesia (1988); **M. S. Davies**, Professor Emeritus of Electrical and Computer Engineering (2004); **S. J. Davies**, Assistant Professor Emerita of Visual and Performing Arts in Education (1995); **H. C. Davis**, Professor Emeritus of Community and Regional Planning (1998); **I. Davis**, Associate Professor Emeritus of Commerce and Business Administration (1983); **R. M. Davis**, Senior Instructor Emeritus of Commerce and Business Administration (1999); **A. Dawes**, Professor Emeritus of Music (2005); **K. G. Dawson**, Professor Emeritus of Medicine (1996); **J. De Bruyn**, Associate Professor Emeritus of English (1983); **L. De Sobrino**, Professor Emeritus of Physics (1995); **J. De Vries**, Associate Professor Emeritus of Soil Science (1992); **J. R. Deakins**, Assistant Professor Emeritus of Social Work (1991); **I. Dehnel**, Senior Instructor Emerita of English (1991); **R. E. Delavault**, Associate Professor Emeritus of Geological Sciences (1973); **K. G. Denike**, Assistant Professor Emeritus of Geography (2004); **P. Dennis**, Professor Emeritus of Biochemistry and Molecular Biology (2004); **J. D. Dennison**, Professor Emeritus of Administrative, Adult and Higher Education (1994); **D. Der**, Assistant Professor Emeritus of Counselling Psychology (1997); **D. deSa**, Professor Emeritus of Pathology (2004); **I. D. Desai**, Professor Emeritus of Family and Nutritional Sciences (1997); **M. Devenyi**, Lecturer Emerita of Chemistry (1997); **M. E. Dewis**, Assistant Professor Emerita of Nursing (1995); **A. S. Dexter**, Professor Emeritus of Commerce and Business Administration (2001); **J. Diamond**, Professor Emeritus of Pharmaceutical Sciences (1999); **J. Dick**, Clinical Associate Professor Emeritus of Medicine (1987); **B. Dill**, Senior Instructor Emerita of Microbiology & Immunology (2003); **F. J. Dill**, Associate Professor Emeritus of Medical Genetics (2004); **N. J. Divinsky**, Professor Emeritus of Mathematics (1991); **G. T. Dixon**, Associate Professor Emeritus of Curriculum Studies (2004); **W. Doll**, Clinical Associate Professor Emeritus of Anaesthesia (1993); **D. H. Dolphin**, Professor Emeritus of Chemistry (2005); **H. W. Dommel**, Professor Emeritus of Electrical Engineering (1999); **D. J. Donaldson**, Professor Emeritus of Economics (1998); **R. W. Donaldson**, Professor Emeritus of Electrical & Computing Engineering (2004); **K. R. Donnelly**, Associate Professor Emeritus of Anatomy (1994); **P. J. Dooling**, Associate Professor Emeritus of Forest Resources Management (1995); **D. S. Dorcas**, Associate Professor Emerita of Psychology (2003); **P. M. Douglas**, Professor Emeritus of Music (1992); **P. Dow**, Professor Emeritus of Oral Medical and Surgical Sciences (1988); **G. E. Dower**, Associate Professor Emeritus of Pharmacology and Therapeutics (1989); **P. J. Doyle**, Professor Emeritus of Surgery (1992); **V. R. Doyle**, Professor Emeritus of Social and Educational Studies (1993); **S. Drance**, Professor Emeritus of Ophthalmology (1990); **M. S. Duke**, Professor Emeritus of Asian Studies (2005); **J. P. Duncan**, Professor Emeritus of Mechanical Engineering (1985); **H. G. Dunn**, Professor Emeritus of Pediatrics (1982); **W. L. Dunn**, Professor Emeritus of Pathology (1987); **F. Durity**, Professor Emeritus of Surgery (2002); **G. H. Durrant**, Professor Emeritus of English (1981); **K. A. Dusing**, Assistant Professor Emerita of Classical, Near Eastern and Religious Studies (1997); **G. G. Dutton**, Professor Emeritus of Chemistry (1988); **J. Dybikowski**, Professor Emeritus of Philosophy (2003); **G. W. Eaton**, Professor Emeritus of Plant Science (1995); **H. G. Edinger**, Associate Professor of Classical, Near Eastern & Religious Studies (2001); **S. B. Effer**, Professor Emeritus of Obstetrics and Gynaecology (1995); **D. J. Egleston**, Senior Instructor Emeritus of Law (2003); **A. A. Eisen**, Professor Emeritus of Medicine (2001); **A. J. Elder**, Associate Professor Emerita of History (1992); **H. Elfert**, Associate Professor Emerita of Nursing (1990); **D. J. Elkins**, Professor Emeritus of Political Science (2001); **P. J. Ellickson**, Senior Instructor Emeritus of Zoology (1994); **G. R. Elliott**, Professor Emeritus of Health Care and Epidemiology (1978); **R. M. Ellis**, Professor Emeritus of Earth & Ocean Sciences (2001); **R. A. English**, Clinical Associate Professor Emeritus of Pathology (1994); **N. Epstein**, Professor Emeritus of Chemical Engineering (1989); **K. L. Erdman**, Professor Emeritus of Physics (1991); **J. Erickson**, Assistant Professor Emerita of Nursing (2002); **D. L. Evans**, Associate Professor Emeritus of English (1999); **E. Evans**, Professor Emeritus of Pathology (2005); **J. A. S. Evans**, Professor Emeritus of Classical, Near Eastern and Religious Studies (1996); **J. Fankhauser**, Professor Emeritus of Music (2000); **A. L. Farley**, Professor Emeritus of Geography (1986); **J. B. Farmer**, Professor Emeritus of Chemistry (1994); **V. Fearing**, Clinical Professor Emerita of Rehabilitation Sciences (2006); **G. Feaver**, Professor Emeritus of Political Science (2002); **G. A. Feltham**, Professor Emeritus of Commerce & Business Administration (2004); **J. Ferguson**, Assistant Professor Emerita of Education (1977); **T. Fernando**, Associate Professor Emeritus of Anthropology & Sociology (2003); **J. Ferris**, Professor Emeritus of Pathology and Laboratory Medicine (2000); **H. C. Fibiger**, Professor Emeritus of Psychiatry (1998); **E. G. Fiedler**, Assistant Professor Emeritus of Educational Psychology and Special Education (1988); **D. B. Fields**, Professor Emeritus of Commerce and Business Administration (1984); **S. Fine**, Professor Emeritus of Psychiatry (2002); **D. G. Finlay**, Professor Emeritus of Social Work (1991); **W. D. L. Finn**, Professor Emeritus of Civil Engineering (1999); **C. V. Finnegan**, Professor Emeritus of Zoology (1988); **R. C. Fitzsimmons**, Associate Professor Emeritus of Animal Science (1992); **D. G. Fleming**, Professor Emeritus of Chemistry (2004); **W. K. Fletcher**, Professor Emeritus of Earth & Ocean Sciences (2003); **R. M. Flores**, Professor Emeritus of French, Italian and Hispanic Studies (2002); **Z. Folejewski**, Professor Emeritus of Slavonic Studies (1976); **J. Foort**, Senior Instructor Emeritus of Orthopaedics (1987); **J. D. Forbes**, Professor Emeritus of Commerce and Business Administration (1997); **D. K. Ford**, Professor Emeritus of Medicine (1989); **D. M. Ford**, Instructor Emerita of Rehabilitation Sciences (2002); **R. Foreman**, Associate Professor Emeritus of Botany (1998); **J. Forrester**, Clinical Associate Professor Emeritus of Health Care & Epidemiology (2001); **M. Forster**, Assistant Professor Emerita of Mathematics and Science Education (1987); **A. D. Forward**, Associate Professor Emeritus of Surgery (1997); **M. Foschi**, Professor Emerita of Anthropology and Sociology (2002); **R. Foschi**, Professor Emeritus of Civil Engineering (2002); **J. W. Foster**, Professor Emeritus of English (2002); **M. I. Foster**, Professor Emeritus of Visual and Performing Arts in Education (1989); **I. K. Fox**, Professor Emeritus of Community and Regional Planning (1982); **H. Franklyn**, Assistant Professor Emerita of French (1994); **R. T. Franson**, Associate Professor Emeritus of Law (1995); **G. Fraser**, Clinical Professor Emeritus of Surgery (1997); **D. S. Freeman**, Professor Emeritus of Social Work (2002); **R. D. Freeman**, Professor Emeritus of Psychiatry (1999); **A. Frei**, Professor Emeritus of Mathematics (1996); **C. L. Friedman**, Associate Professor Emerita of Anatomy (1986); **S. M. Friedman**, Professor Emeritus of Anatomy (1985); **J. D. Friesen**, Professor Emeritus of Counselling Psychology (1997); **C. T. Friz**, Professor Emeritus of Anatomy (1993); **D. W. Froese**, Clinical Associate Professor Emeritus of Family Practice (1995); **V. Froese**, Professor Emeritus of Language Education (1999); **D. C. Frost**, Professor Emeritus of Chemistry (1989); **A. M. Furness**, Associate Professor Emerita of Social Work (1988); **M. Furstenwald**, Associate Professor Emerita of Germanic Studies (1985); **M. H. Futrell**, Professor Emeritus of Slavonic Studies (1990); **J. A. Gaitanakis**, Assistant Professor Emeritus of Architecture (1995); **F. D. Garrett**, Professor Emeritus of Anatomy (1977); **I. S. Gartshore**, Professor Emeritus of Mechanical Engineering (2000); **C. L. Gass**, Professor Emeritus of

Zoology (2004); **A. Gerein**, Clinical Professor Emeritus of Surgery (1994); **M. C. L. Gerry**, Professor Emeritus of Chemistry (2004); **G. Gibson**, Associate Professor Emeritus of Oral Biological & Medical Sciences (2000); **W. C. Gibson**, Professor Emeritus of History of Medicine and Science (1978); **W. H. Gilbert**, Associate Professor Emeritus of Fine Arts (1986); **S. Gillam**, Professor Emerita of Pathology (2000); **D. C. Gillespie**, Associate Professor Emeritus of Mathematics and Science Education (1992); **P. C. Gilmore**, Professor Emeritus of Computer Science (1990); **C. Giovannella**, Senior Instructor Emeritus of Earth and Ocean Sciences (1999); **A. D. M. Glass**, Professor Emeritus of Botany (2003); **F. P. Glick**, Associate Professor Emeritus of Health Care and Epidemiology (1992); **C. I. Godwin**, Professor Emeritus of Earth and Ocean Sciences (1997); **G. Goertzen**, Clinical Associate Professor Emeritus of Family Practice (1993); **M. Goetz-Stankiewicz**, Professor Emerita of Germanic Studies (1992); **A. V. Gold**, Professor Emeritus of Physics (1999); **M. K. Goldberg**, Professor Emeritus of English (1991); **T. Goldberg**, Professor Emeritus of Visual and Performing Arts (1987); **J. Goldie**, Clinical Professor Emeritus of Medicine (1999); **D. L. Golding**, Associate Professor Emeritus of Forest Resources Management (1996); **R. Goldman**, Assistant Professor Emeritus of Asian Studies (1997); **F. Goldsack**, Lecturer Emerita of Teacher Education (1997); **V. Gomel**, Professor Emeritus of Obstetrics and Gynaecology (2000); **A. M. Gomes**, Senior Instructor Emerita of Hispanic and Italian Studies (1997); **A. M. Goodeve**, Assistant Professor Emeritus of Pharmaceutical Sciences (1986); **G. B. Goodman**, Clinical Professor Emeritus of Surgery (1991); **B. Gordon**, Assistant Professor Emerita of Human Kinetics (2002); **G. Gorelik**, Associate Professor Emeritus of Commerce and Business Administration (1991); **W. Goresky**, Clinical Professor Emeritus of Psychiatry (1994); **J. M. Gormick**, Assistant Professor Emerita of Nursing (1997); **F. A. Gornall**, Associate Professor Emeritus of Mathematics and Science Education (1983); **E. B. Gose**, Professor Emeritus of English (1991); **C. C. Gourlay**, Professor Emeritus of Commerce and Business Administration (1982); **R. H. Gourlay**, Clinical Professor Emeritus of Surgery (1987); **J. I. Gow**, Assistant Professor Emerita of History (1989); **D. C. Graham**, Assistant Professor Emeritus of Medicine (1980); **K. Graham**, Professor Emeritus of Forestry (1977); **E. E. Granirer**, Professor Emeritus of Mathematics (1997); **P. Grantham**, Professor Emeritus of Family Practice (1997); **G. R. Gray**, Associate Professor Emeritus of Pathology (1997); **J. U. Gray**, Professor Emeritus of Visual and Performing Arts in Education (1992); **P. Gray**, Lecturer Emerita of Education (1989); **R. F. Gray**, Professor Emeritus of Mathematics and Science Education (1985); **B. R. Green**, Professor Emerita of Botany (2003); **D. D. Greenwood**, Professor Emeritus of Audiology and Speech Sciences (1996); **F. M. Greenwood**, Associate Professor Emeritus of History (1988); **H. J. Greenwood**, Professor Emeritus of Geological Sciences (1990); **P. Greenwood**, Professor Emerita of Mathematics (2000); **P. Gregory**, Professor Emeritus of Physics & Astronomy (2002); **B. L. Grenberg**, Associate Professor Emeritus of English (1993); **A. J. Griffiths**, Professor Emeritus of Botany (2005); **G. M. Griffiths**, Professor Emeritus of Physics (1989); **E. V. Grill**, Associate Professor Emeritus of Oceanography (1988); **F. J. Grover**, Professor Emeritus of French (1985); **A. Gruft**, Associate Professor Emeritus of Architecture (1999); **M. Grymaloski**, Clinical Professor Emerita of Radiology (1999); **D. T. Guest**, Associate Professor Emeritus of Social Work (1989); **A. M. Gunn**, Professor Emeritus of Social and Educational Studies (1985); **H. P. Gush**, Professor Emeritus of Physics (1996); **R. A. Hagler**, Professor Emeritus of Library, Archival, and Information Studies; **P. Hahn**, Professor Emeritus of Obstetrics and

Gynaecology (1989); **G. Hainsworth**, Associate Professor Emeritus of Economics (1999); **D. Haley**, Professor Emeritus of Forest Resources Management (2004); **A. E. Hall**, Associate Professor Emeritus of Mining & Mineral Process Engineering (2001); **J. G. Hall**, Professor Emerita of Pediatrics (2004); **K. J. F. Hall**, Professor Emeritus of Institute of Resources, Environment and Sustainability (2005); **N. A. Hall**, Professor Emeritus of Commerce and Business Administration (1996); **R. J. Hall**, Professor Emeritus of Theatre, Film & Creative Writing (1997); **S. W. Hamilton**, Professor Emeritus of Commerce and Business Administration (2004); **A. G. Hannam**, Professor Emeritus of Oral Health Sciences (2004); **D. H. Harder**, Clinical Professor Emeritus of Orthopaedics (1999); **P. E. Harding**, Professor Emeritus of Classical, Near Eastern and Religious Studies (2004); **M. E. Hardman**, Senior Instructor Emerita of English (1992); **D. F. Hardwick**, Professor Emeritus of Pathology/Pediatrics (1999); **W. N. Hardy**, Professor Emeritus of Physics and Astronomy (2005); **R. D. Hare**, Professor Emeritus of Psychology (1997); **R. Harlow**, Professor Emeritus of Creative Writing (1989); **T. R. Harmon**, Clinical Associate Professor Emeritus of Pathology (1979); **P. Harnetty**, Professor Emeritus of Asian Studies (1992); **R. C. Harris**, Professor Emeritus of Geography (2001); **B. Harrison**, Professor Emeritus of History (1974); **L. G. Harrison**, Professor Emeritus of Chemistry (1994); **T. J. Harrop**, Professor Emeritus of Clinical Dental Sciences (1989); **S. Hashimoto**, Clinical Professor Emeritus of Medicine (2006); **R. B. Hatch**, Associate Professor Emeritus of English (2004); **E. G. Hauptmann**, Professor Emeritus of Mechanical Engineering (1995); **J. Havens**, Clinical Associate Professor Emeritus of Family Practice (2006); **E. B. Hawbolt**, Professor Emeritus of Metals and Materials Engineering (1998); **H. B. Hawthorn**, Professor Emeritus of Anthropology and Sociology (1976); **L. D. Hayward**, Professor Emeritus of Chemistry (1984); **S. Healy**, Associate Professor Emeritus of Visual and Performing Arts (1985); **T. Heaven**, Professor Emeritus of Commerce and Business Administration (1997); **B. Heldt**, Professor Emerita of Russian (1996); **J. F. Helliwell**, Professor Emeritus of Economics (2002); **H. Hennings**, Associate Professor Emeritus of Cardiology (2004); **F. G. Herring**, Professor Emeritus of Chemistry (2004); **R. J. W. Hewat**, Associate Professor Emerita of Nursing (2004); **J. G. Heywood**, Professor Emeritus of Mathematics (2005); **M. A. Hickling**, Professor Emeritus of Law (1999); **H. C. Hightower**, Professor Emeritus of Community and Regional Planning (1996); **H. Hildebrand**, Clinical Professor Emeritus of Surgery (1995); **A. Hill**, Professor Emeritus of Paediatrics (2005); **L. E. Hill**, Professor Emeritus of History (1996); **M. A. Hill**, Associate Professor Emerita of Social Work (1986); **P. G. Hill**, Professor Emeritus of Mechanical Engineering (1997); **R. H. Hill**, Professor Emeritus of Pediatrics (1992); **R. J. Hills**, Professor Emeritus of Administrative, Adult and Higher Education (1994); **R. Hindmarch**, Professor Emeritus of Human Kinetics (1995); **J. Hingston**, Clinical Professor Emeritus of Pediatrics (1986); **S. Hirshen**, Professor Emeritus of Architecture (2000); **J. N. Hlynka**, Professor Emeritus of Pharmaceutical Sciences (1991); **F. C. W. Ho**, Clinical Professor Emeritus of Family Practice (1997); **S. Ho**, Professor Emeritus of Economics (2001); **W. S. Hoar**, Professor Emeritus of Zoology (1979); **K. F. Hoehsman**, Professor Emeritus of Mathematics (1995); **J. Hogarth**, Professor Emeritus of Law (2000); **J. Hogg**, Professor Emeritus of Pathology (2000); **R. G. C. Holdaway**, Assistant Professor Emeritus of French, Hispanic and Italian Studies (2000); **F. B. Holl**, Professor Emeritus of Agricultural Sciences (2000); **W. L. Holland**, Professor Emeritus of Asian Studies (1973); **D. G. Holm**, Professor Emeritus of Zoology (2000); **K. J. Holsti**, Professor Emeritus of Political Science (2000); **P. Hoogewerf**, Clinical Assistant Professor Emeritus of

Family Practice (1994); **R. Hopkins**, Assistant Professor Emeritus of Library, Archival and Information Studies (2005); **V. G. Hopwood**, Associate Professor Emeritus of English (1984); **A. Hori**, Clinical Professor Emeritus of Family Practice (1997); **B. E. J. Housego**, Associate Professor Emerita of Educational and Counselling Psychology and Special Education (2000); **I. Housego**, Professor Emeritus of Administrative, Adult and Higher Education (1994); **R. Howard**, Associate Professor Emeritus of Physics and Astronomy (1998); **J. F. Howes**, Professor Emeritus of Asian Studies (1989); **J. B. Hudson**, Professor Emeritus of Pathology (2004); **A. M. Hughes**, Assistant Professor Emerita of Nursing (2000); **G. C. Hughes**, Professor Emeritus of Botany (1998); **J. Hugill**, Clinical Professor Emeritus of Anaesthesia (2000); **J. F. Hulcoop**, Professor Emeritus of English (1993); **E. J. Hundert**, Professor Emeritus of History (2000); **S. G. Hutton**, Professor Emeritus of Mechanical Engineering (2002); **J. Huzel**, Assistant Professor Emeritus of History (2003); **E. J. Hyde**, Assistant Professor Emeritus of Preventive and Community Dentistry (1985); **K. Hyde**, Associate Professor Emerita of Nursing (1988); **D. Ingram**, Professor Emeritus of Linguistics (1999); **M. Iqbal**, Professor Emeritus of Mechanical Engineering (1996); **M. R. Ito**, Professor Emeritus of Electrical & Computing Engineering (2003); **H. Jackson**, Associate Professor Emeritus of Philosophy (1994); **M. Jackson**, Assistant Professor Emerita of Zoology (1990); **S. M. Jackson**, Clinical Professor Emeritus of Surgery (2000); **H. E. Jacobson**, Associate Professor Emerita of Anthropology and Sociology (1992); **L. G. Jahnke**, Professor Emeritus of Law (1987); **B. R. James**, Professor Emeritus of Chemistry (2001); **D. G. James**, Professor Emeritus of Chemistry (1990); **I. Jeffrey**, Clinical Associate Professor Emerita of Audiology and Speech Sciences (2004); **W. G. Jilek**, Clinical Professor Emeritus of Psychiatry (1996); **L. Jilek-Aall**, Clinical Professor Emerita of Psychiatry (1997); **A. M. Johnson**, Clinical Professor Emeritus of Medicine (1982); **G. J. Johnson**, Assistant Professor Emeritus of Psychology (1997); **R. C. Johnson**, Assistant Professor Emeritus of English (1993); **R. R. Johnson**, Professor Emeritus of Physics & Astronomy (2004); **F. R. Johnstone**, Professor Emeritus of Surgery (1984); **G. Jones**, Professor Emeritus of Physics and Astronomy (1997); **L. D. Jones**, Professor Emeritus of Commerce and Business Administration (1996); **R. M. Jordan**, Professor Emeritus of English (1989); **E. V. Jull**, Professor Emeritus of Electrical Engineering (1999); **F. A. Kaempffer**, Professor Emeritus of Physics (1986); **D. Kalousek**, Professor Emerita of Pathology (2002); **S. Karim**, Professor Emeritus of Pharmacology and Therapeutics (2000); **H. Kasinsky**, Associate Professor Emeritus of Zoology (2003); **H. E. Kassis**, Professor Emeritus of Classical, Near Eastern and Religious Studies (1997); **D. Kavanagh-Gray**, Clinical Professor Emerita of Medicine (1998); **J. K. Kealy**, Assistant Professor Emeritus of English (2004); **R. Keeler**, Professor Emeritus of Physiology (1992); **J. W. Kehoe**, Professor Emeritus of Curriculum Studies (1998); **R. F. Kelly**, Associate Professor Emeritus of Commerce and Business Administration (1997); **G. T. Kelsey**, Professor Emeritus of Educational Studies (1998); **J. G. Kelso**, Senior Instructor Emeritus of Human Kinetics (1998); **D. C. Kendall**, Professor Emeritus of Educational Psychology and Special Education (1988); **G. Kennedy**, Associate Professor Emeritus of Global Resource Systems (2003); **J. E. M. Kew**, Associate Professor Emeritus of Anthropology and Sociology (1997); **S. L. Khanna**, Assistant Professor Emeritus of Clinical Dental Sciences (1989); **M. M. Kharadly**, Professor Emeritus of Electrical Engineering (1992); **P. J. Kiernan**, Associate Professor Emeritus of Mathematics (2001); **D. G. Kilburn**, Professor Emeritus of Microbiology (2000); **S. U. Kim**, Professor Emeritus of Medicine (2001); **M. H. Kirkley**, Assistant Professor Emerita of English (2000); **V. J.**

Kirkness, Associate Professor Emerita of Administrative, Adult and Higher Education (1993); D. Klang, Associate Professor Emeritus of History (1993); M.C. Klein, Professor Emeritus of Family Practice Medicine and Pediatrics (2003); M. Kliman, Clinical Associate Professor Emeritus of Surgery (1990); K. Klinka, Professor Emeritus of Forest Sciences (2002); H. Klonoff, Professor Emeritus of Psychiatry (1990); W. J. Knickerbocker, Clinical Associate Professor Emeritus of Radiology (1999); F. Knobloch, Professor Emeritus of Psychiatry (1982); J. Knobloch, Clinical Associate Professor Emerita of Psychiatry (1991); G. Knox, Professor Emeritus of Fine Arts (1987); H. C. Knutson, Professor Emeritus of French (1988); K. I. Kobbervig, Professor Emeritus of Hispanic and Italian Studies (1993); B. Koehler, Clinical Professor Emeritus of Medicine (2006); Y. Koga, Senior Instructor Emeritus of Chemistry (2001); N. Korchinsky, Assistant Professor Emeritus of Human Kinetics (2005); G. W. Korn, Clinical Professor Emeritus of Obstetrics and Gynaecology (1990); A. Kozak, Professor Emeritus of Forest Resources Management (2001); A. D. Kraus, Professor Emeritus of Commerce and Business Administration (2004); C. J. Krebs, Professor Emeritus of Zoology (2001); R. Krell, Professor Emeritus of Psychiatry (1996); C. R. Krishnamurti, Professor Emeritus of Animal Science (1991); H. Krivel, Clinical Professor Emeritus of Pediatrics (1986); R. V. Kubicek, Professor Emeritus of History (2000); R. E. Kucera, Associate Professor Emeritus of Geological Sciences (1987); J. P. Kutney, Professor Emeritus of Chemistry (1997); E. R. Labrie, Professor Emeritus of English (2001); H. Laimon, Clinical Associate Professor Emeritus of Surgery (1991); R. Lakowski, Professor Emeritus of Psychology (1992); K. Y. Lam, Professor Emeritus of Mathematics (2004); N. Lamb, Senior Instructor Emerita of Audiology & Speech Sciences (2001); F. C. Langdon, Professor Emeritus of Political Science (1984); J. A. Laponce, Professor Emeritus of Political Science (1991); A. Laquin, Professor Emeritus of Community and Regional Planning (2000); J. S. Laskowski, Professor Emeritus of Mining & Mineral Process Engineering (2001); C. Laszlo, Professor Emeritus of Electrical Engineering (1998); C.C. Lau, Clinical Assistant Professor Emeritus of Family Practice (2006); T. M. Lau, Clinical Professor Emeritus of Anaesthesia (2002); D. P. Lavender, Professor Emeritus of Forest Science (1992); L. M. Lavkulich, Professor Emeritus of Agricultural Sciences and Graduate Studies (2004); C. S. Lear, Professor Emeritus of Clinical Dental Sciences (1990); P. H. LeBlond, Professor Emeritus of Earth and Ocean Sciences (1997); J. R. Ledson, Professor Emeritus of Physiology (1997); R. J. Leduc, Associate Professor Emeritus of Mathematics and Science Education (1987); M. Lee, Professor Emeritus of Family and Nutritional Sciences (1991); S. S. Lee, Professor Emeritus of Educational Psychology and Special Education (1998); P. O. Lehmann, Clinical Instructor Emeritus of Surgery (1978); J. Leichter, Professor Emeritus of Family and Nutritional Sciences (1997); J. Leja, Professor Emeritus of Mining and Mineral Process Engineering (1983); B. C. Lentle, Professor Emeritus of Radiology (2000); L. Leonard, Associate Professor Emerita of Nursing (2003); P. Leslie, Professor Emeritus of Educational & Counselling Psychology & Special Education (2003); J. Levy, Professor Emerita of Microbiology (1999); A. G. Lewis, Professor Emeritus of Earth Ocean Sciences and Zoology (1999); R. C. Lewis, Associate Professor Emeritus of Mathematics and Science Education (1986); J. Lielmezs, Professor Emeritus of Chemical Engineering (1991); L. Lighthall, Associate Professor Emerita of Library, Archival & Information Studies (2001); N. R. Liley, Professor Emeritus of Zoology (2001); T. Y. Lin, Professor Emeritus of Psychiatry (1986); W.-C. Lin, Professor Emeritus of Chemistry (1980); D. A. Lindquist, Senior Instructor Emeritus of

Physics (1988); C. C. Lindsey, Professor Emeritus of Zoology (1988); F. Lioy, Professor Emeritus of Physiology (1993); D. Lirenman, Professor Emeritus of Pediatrics (2002); H. Litherland, Clinical Professor Emeritus of Surgery (1992); H. V. Livermore, Professor Emeritus of Hispanic and Italian Studies (1981); A. F. Livesey, Senior Instructor Emerita of English (1981); W.J. Livesley, Professor Emeritus of Psychiatry (2005); D. Livingstone, Assistant Professor Emerita of Visual and Performing Arts in Education (1988); J. A. Loban, Professor Emeritus of Music (1992); R. R. Loffmark, Professor Emeritus of Commerce and Business Administration (1985); D. Logan, Professor Emerita of Journalism (2004); W. J. P. Logan, Associate Professor Emeritus of Curriculum Studies (1996); L. E. Lowe, Professor Emeritus of Soil Science (1994); D. Ludwig, Professor Emeritus of Mathematics/Zoology (1994); E. Luft, Professor Emeritus of Mathematics (1999); A. Lukasevich, Assistant Professor Emerita of Language Education (1997); J. Lund, Professor Emeritus of Metals and Materials Engineering (1993); K. H. Lynn, Senior Instructor Emerita of Asian Studies (2004); D. M. Lyster, Professor Emeritus of Pharmaceutical Sciences (2001); L. Lythgoe, Lecturer Emeritus of Language Education (1997); K. R. MacCrimmon, Professor Emeritus of Commerce and Business Administration (2002); M. MacCrimmon, Professor Emeritus of Law (2002); A. N. Macdonald, Associate Professor Emeritus of History (1990); J. A. Macdonald, Professor Emeritus of Visual and Performing Arts in Education (1985); J. L. MacDonald, Professor Emeritus of Mathematics (2004); W. Macdonald, Associate Professor Emeritus of Medicine (1996); D. J. MacDougall, Professor Emeritus of Law (1999); J. K. MacFarlane, Professor Emeritus of Surgery (2004); R. N. MacGregor, Professor Emeritus of Curriculum Studies (1997); J. M. MacIntyre, Professor Emeritus of Law (1999); A. R. Mackay, Associate Professor Emeritus of French (1992); J. R. Mackay, Professor Emeritus of Geography (1981); V. A. Mackay, Associate Professor Emerita of Education (1979); C. Mackenzie, Clinical Assistant Professor Emeritus of Family Practice (1991); C. J. Mackenzie, Professor Emeritus of Health Care and Epidemiology (1986); H. M. Mackenzie, Associate Professor Emerita of Education (1973); R. Maclean, Clinical Professor Emeritus of Pediatrics (1994); S. Maddin, Clinical Professor Emeritus of Medicine (1987); B. Madsen, Professor Emeritus of Civil Engineering (1992); G. Manning, Clinical Associate Professor Emeritus of Anesthesia (2004); D. Manson, Clinical Professor Emeritus of Surgery (2002); M. A. Manzalaoui, Professor Emeritus of English (1989); J. C. Mao, Professor Emeritus of Commerce and Business Administration (1988); B. E. March, Professor Emerita of Animal Science (1986); A. Marcus, Associate Professor Emeritus of Psychiatry (1992); E. L. Margetts, Professor Emeritus of Psychiatry (1985); S. E. Marks, Associate Professor Emeritus of Counselling Psychology (1993); A. J. Marriage, Associate Professor Emeritus of Sociology (1990); A. W. Marshall, Professor Emeritus of Statistics (1987); P. W. Martin, Professor Emeritus of Physics (1998); D. Matheson, Associate Professor Emeritus of Pediatrics (2000); R. G. Matson, Professor Emeritus of Anthropology and Sociology; E. J. Matte, Associate Professor Emeritus of French (1993); R. V. Mattessich, Professor Emeritus of Commerce and Business Administration (1988); P. W. Matthews, Associate Professor Emeritus of Physics and Astronomy (2000); W. L. Maurice, Associate Professor Emeritus of Psychiatry (2004); G. A. Maxwell, Associate Professor Emeritus of Mathematics (2001); J. R. Maze, Professor Emeritus of Botany (1997); D. W. McAdam, Senior Instructor Emeritus of Mechanical Engineering (2005); A. J. McClean, Professor Emeritus of Law (2001); P. R. McClelland, Assistant Professor Emeritus of Social Work (1995); R. McConnell, Professor Emerita of Education (1981); W.H. McCutcheon, Professor

Emeritus of Physics and Astronomy (2005); C. E. McDonnell, Clinical Professor Emeritus of Medicine (1990); T. B. McDonough, Assistant Professor Emerita of Education (1981); T. G. McGee, Professor Emeritus of Asian Research (2001); E. McGeer, Professor Emerita of Psychiatry (1989); P. L. McGeer, Professor Emeritus of Psychiatry (1992); R. W. McGraw, Professor Emeritus of Orthopaedics (2000); D. E. McGreer, Professor Emeritus of Chemistry (1993); B. L. McGregor, Assistant Professor Emerita of Rehabilitation Medicine (1986); J. McIver, Clinical Professor Emeritus of Anatomy (1994); T. D. McKie, Professor Emeritus of Educational Psychology and Special Education (1988); D. M. McLean, Professor Emeritus of Pathology (1991); P.D. McLean, Professor Emeritus of Psychiatry (2005); A. McLeod, Senior Instructor Emeritus of Curriculum Studies (1997); W. McLeod, Clinical Professor Emeritus of Medicine (2002); G. H. McMorland, Clinical Professor Emeritus of Anaesthesiology (1991); F. E. McNair, Clinical Assistant Professor Emeritus of Psychiatry (1984); J. A. McNeely, Associate Professor Emeritus of Germanic Studies (1987); R. McNeill, Clinical Professor Emeritus of Surgery (1997); C. McNiven, Associate Professor Emerita of Social Work (1989); J. D. McPhail, Professor Emeritus of Zoology (1999); D. McPhillips, Associate Professor Emeritus of Commerce & Business Administration (2002); K. C. McTaggart, Professor Emeritus of Geological Sciences (1985); J. D. McWhannel, Assistant Professor Emeritus of Education (1981); G. McWhirter, Professor Emeritus of Theatre, Film and Creative Writing (2004); T. R. Meadowcroft, Professor Emeritus of Metals & Materials Engineering (2001); D. F. Measday, Professor Emeritus of Physics and Astronomy (2002); M. Meissner, Professor Emeritus of Sociology (1993); Z. A. Melzak, Professor Emeritus of Mathematics (1995); T. K. Menon, Professor Emeritus of Geophysics and Astronomy (1993); A. J. Merer, Professor Emeritus of Chemistry (2002); P. Merivale, Professor Emerita of English (1999); R. F. Merriam, Assistant Professor Emeritus of Mathematics and Science Education (1987); J. Meyer, Professor Emeritus of Physics & Astronomy (2003); P. J. Middleton, Professor Emeritus of Pathology (1997); J. E. Miles, Professor Emeritus of Psychiatry (1992); C. W. Miller, Associate Professor Emeritus of English (1980); H. S. Miller, Clinical Professor Emeritus of Orthopaedics (1991); L. L. Miller, Associate Professor Emeritus of Germanic Studies (1992); M. Miller, Clinical Assistant Professor Emerita of Anaesthesia (1993); S. Miller, Clinical Professor Emeritus of Anatomy (1982); R. S. Milne, Professor Emeritus of Political Science (1984); J. H. Milsum, Professor Emeritus of Health Care and Epidemiology (1991); S. Mindess, Professor Emeritus of Civil Engineering (2005); A. Mitchell, Professor Emeritus of Metals & Materials Engineering (2001); A. G. Mitchell, Professor Emeritus of Pharmaceutical Sciences (1994); C. L. Mitchell, Professor Emeritus of Commerce and Business Administration (1986); H. Mitchell, Professor Emeritus of History (1989); J. R. Mitchell, Associate Professor of Physical Education and Recreation (1987); K.A.R. Mitchell, Professor Emeritus of Chemistry (2004); V. F. Mitchell, Professor Emeritus of Commerce and Business Administration (1988); R. Miura, Professor Emeritus of Mathematics (2001); H. F. Mizgala, Professor Emeritus of Medicine (1997); R. Modrow, Associate Professor Emeritus of Health Care & Epidemiology (2003); J. Mogan, Assistant Professor Emerita of Nursing (1990); B.A. Mohan, Professor of Language and Literacy Education; J. G. Moir, Assistant Professor Emeritus of Pharmaceutical Sciences (1988); T. Money, Professor Emeritus of Chemistry (1997); P. Montgomery, Associate Professor Emerita of Educational Psychology and Special Education (1987); P. R. Moody, Assistant Professor Emeritus of Physical Education (1989); Y. S. Moon, Professor Emeritus of Obstetrics & Gynaecology (2003); A. M. Moore, Professor Emeritus of

Economics (1984); **L. F. Moore**, Associate Professor Emeritus of Commerce and Business Administration (1996); **P. Moore**, Clinical Associate Professor Emeritus of Pediatrics (1990); **A. J. More**, Associate Professor Emeritus of Educational and Counselling Psychology and Special Education (2000); **M. M. Morehart**, Associate Professor Emerita of Fine Arts (1989); **W. R. Morford**, Professor Emeritus of Human Kinetics (1995); **J. Morison**, Assistant Professor Emeritus of Family Practice (1988); **J. E. W. Mornin**, Professor Emeritus of Germanic Studies (2001); **R. B. Morris**, Professor Emeritus of Music (1986); **B. Morrison**, Professor Emerita of Health Care and Epidemiology (1999); **B. M. Morrison**, Professor Emeritus of Asian Studies (1991); **E. Morrison**, Professor Emeritus of English (1970); **F. A. Morrison**, Professor Emeritus of Pharmaceutical Sciences (1983); **R. T. Morrison**, Associate Professor Emeritus of Radiology (1997); **K. S. Morton**, Professor Emeritus of Orthopaedics (1990); **M. Morton**, Senior Instructor Emeritus of English (1987); **B. N. Moysls**, Professor Emeritus of Mathematics (1984); **A. Mular**, Professor Emeritus of Mining and Mineral Process Engineering (1996); **M. Mullinger**, Associate Professor Emerita of Pediatrics (1987); **P. M. Mullins**, Associate Professor Emeritus of Physical Education and Recreation (1986); **W. J. Mullins**, Associate Professor Emeritus of Philosophy (1986); **D. D. Munro**, Professor Emeritus of Forest Resources Management (1995); **G. R. Munro**, Professor Emeritus of Economics (1999); **E. K. Murakami**, Clinical Associate Professor Emeritus of Family Practice (1997); **M. Muratorio-Posse**, Associate Professor Emerita of Anthropology and Sociology (2000); **R. Muratorio-Posse**, Senior Instructor Emeritus of Anthropology and Sociology (1989); **D. C. Murdoch**, Professor Emeritus of Mathematics (1977); **A. B. Murray**, Professor Emeritus of Pediatrics (1992); **D. Murray**, Professor Emeritus of Medicine (2000); **J. S. Murray**, Associate Professor Emeritus of Visual and Performing Arts (1987); **P. A. Murtha**, Professor Emeritus of Forest Resources Management (2003); **K. Nagatani**, Professor Emeritus of Economics (1997); **S. Nakai**, Professor Emeritus of Food Science (1992); **S. D. Nalevykin**, Assistant Professor Emerita of Education (1987); **F. P. D. Navin**, Professor Emeritus of Civil Engineering (2003); **J. Nearing**, Clinical Assistant Professor Emeritus of Health Care and Epidemiology (2004); **P. A. Neher**, Professor Emeritus of Economics (1997); **W. E. Neill**, Professor Emeritus of Fisheries (2003); **B. Nelems**, Professor Emeritus of Surgery (2004); **P. M. Nerland**, Clinical Associate Professor Emeritus of Health Care and Epidemiology (1987); **G. R. Neufeld**, Associate Professor Emeritus of Educational Psychology and Special Education (1997); **M. B. Nevison**, Professor Emerita of Education (1982); **W. H. New**, University Killam Professor Emeritus of English (2002), Professor Emeritus of English (2003); **P. Newbery**, Clinical Professor Emeritus of Family Practice (2006); **F. S. Newby**, Assistant Professor Emeritus of English (1979); **D. E. Newman**, Professor Emeritus of Radiology (1997); **J. Newman**, Associate Professor Emeritus of Theatre, Film and Creative Writing (2000); **J. S. Newton**, Associate Professor Emeritus of Theatre, Film and Creative Writing (2004); **H. Nichol**, Associate Professor Emeritus of Psychiatry (1990); **D. J. Niederauer**, Professor Emeritus of French (1987); **H. Niskala**, Associate Professor Emerita of Nursing (1995); **J. E. Nixon**, Clinical Associate Professor Emeritus of Anaesthesia (1988); **H. C. Nordan**, Associate Professor Emeritus of Zoology (1988); **M. Norman**, Professor Emerita of Pathology (1997); **J. M. Norris**, Professor Emeritus of History of Medicine (1991); **M. North**, Senior Instructor Emerita of Geography (2000); **R. N. North**, Associate Professor Emeritus of Geography (2001); **T. G. Northcote**, Professor Emeritus of Forest Sciences and Zoology (1992); **S. M. Oberg**, Professor Emeritus of Commerce and Business Administration (1988); **H. P. Oberlander**, Professor Emeritus of

Community and Regional Planning (1988); **G. O'Connor**, Clinical Associate Professor Emeritus of Anaesthesia (2006); **J. R. O'Connor**, Senior Instructor Emeritus of Anthropology and Sociology (1995); **A. L. Oglvie**, Professor Emeritus of Oral Medicine (1986); **E. A. Ogryzlo**, Professor Emeritus of Chemistry (1999); **A. H. Ohanianian**, Senior Instructor Emeritus of Slavonic Studies (1988); **W. K. Oldham**, Professor Emeritus of Civil Engineering (1995); **O. A. Oldridge**, Professor Emeritus of Educational Psychology and Special Education (1989); **P. G. Olley**, Assistant Professor Emeritus of Mathematics and Science Education (1990); **C. W. Oloman**, Professor Emeritus of Chemical and Biological Engineering (2004); **B. Olson**, Clinical Assistant Professor Emerita of Anaesthesia (2004); **M. D. Olson**, Professor Emeritus of Civil Engineering (1995); **J. Orr**, Associate Professor Emeritus of Pharmaceutical Sciences (1999); **D. L. Overmeyer**, Professor Emeritus of Asian Studies (2000); **B. D. Owen**, Professor Emeritus of Animal Science (1991); **I. Ozier**, Professor Emeritus of Physics & Astronomy (2004); **A. Pacheco**, Professor Emeritus of Hispanic and Italian Studies (1997); **N. L. Paddock**, Professor Emeritus of Chemistry (1983); **H. Pafitt**, Clinical Professor Emeritus of Psychiatry (2000); **S. S. Page**, Professor Emeritus of Mathematics (1999); **B. F. Paige**, Clinical Professor Emeritus of Medicine (1987); **J. Panter**, Assistant Professor Emeritus of French (1994); **D. Parker**, Associate Professor Emerita of Nursing (2000); **C. Parkin**, Senior Instructor Emerita of English (1999); **R. Parkinson**, Clinical Associate Professor Emeritus of Psychiatry (1988); **T. R. Parsons**, Professor Emeritus of Oceanography and Zoology (1993); **L. Paszner**, Professor Emeritus of Wood Science (1999); **B. Pate**, Professor Emeritus of Medicine (1993); **K. M. Patel**, Senior Instructor Emeritus of Botany (1997); **T. E. Patton**, Professor Emeritus of Philosophy (1997); **J. L. Pavelich**, Senior Instructor Emerita of English (1987); **R. H. Pearce**, Professor Emeritus of Pathology (1989); **P. H. Pearce**, Professor Emeritus of Forest Resources Management (1997); **R. J. Pearson**, Professor Emeritus of Anthropology and Sociology (2000); **J. E. Peck**, Professor Emeritus of Computer Science (1984); **R. Pederson**, Professor Emeritus of Physiology (2003); **V. S. Pendakur**, Professor Emeritus of Community and Regional Planning (1997); **P. S. Penfold**, Professor Emerita of Psychiatry (2001); **G. Pennington**, Associate Professor Emeritus of Human Kinetics (1995); **C. D. Pennock**, Associate Professor Emeritus of Language Education (1987); **D. Peretz**, Clinical Professor Emeritus of Medicine (1997); **S. A. Perkins**, Professor Emeritus of Education (1986); **A. M. Perks**, Professor Emeritus of Zoology (1997); **Z. Perler**, Clinical Professor Emeritus of Surgery (2000); **E. Peters**, Professor Emeritus of Metals and Materials Engineering (1991); **K. Petersen**, Professor Emeritus of Central, Eastern and Northern European Studies (2002); **R. Peterson**, Associate Professor Emeritus of Animal Science (1998); **R. E. Petty**, Professor Emeritus of Rheumatology/Medicine (2005); **J. E. Phillips**, Professor Emeritus of Zoology (1999); **R. J. Phillips**, Senior Instructor Emeritus of Physical Education and Recreation (1980); **W. Phipps**, Clinical Assistant Professor Emeritus of Family Practice (2006); **G. L. Pickard**, Professor Emeritus of Oceanography and Physics (1979); **F. Pieronek**, Associate Professor Emerita of Language Education (1996); **E. Piers**, Professor Emeritus of Chemistry (2004); **A. E. Piloto**, Associate Professor Emeritus of English (1984); **H.-K. Piltz**, Professor Emeritus of Music (1989); **R. Pincock**, Professor Emeritus of Chemistry (1999); **D. Pincus**, Associate Professor Emerita of Fine Arts (1995); **K. L. Pinder**, Professor Emeritus of Chemical Engineering (1994); **A. C. Pinkerton**, Clinical Associate Professor Emeritus of Medicine (1991); **P. Pinkus**, Professor Emeritus of English (1984); **G. E. Pirie**, Associate Professor Emeritus of Pediatrics (1993); **A. B. Piternick**, Professor Emerita of Library, Archival and

Information Studies (1992); **M. Pitt**, Associate Professor Emeritus of Agroecology (2002); **I. H. Plenderleith**, Clinical Professor Emeritus of Medicine (1996); **A. Podlecki**, Professor Emeritus of Classical, Near Eastern and Religious Studies (1998); **G. W. Poling**, Professor Emeritus of Mining and Mineral Process Engineering (1997); **R. Pollay**, Professor Emeritus of Commerce and Business Administration (2001); **R. W. Pollay**, Professor Emeritus of Commerce & Business Administration (2001); **J. B. Pomfret**, Associate Professor Emeritus of Physical Education and Recreation (1988); **M. Pomfret**, Assistant Professor Emerita of Physical Education and Recreation (1987); **G. S. Pond**, Professor Emeritus of Oceanography (1996); **N. Poppe**, Associate Professor Emeritus of Slavonic Studies (1992); **G. B. Porter**, Professor Emeritus of Chemistry (1991); **R. Potashin**, Assistant Professor Emerita of Psychology (1987); **R. Poutt**, Assistant Professor Emeritus of Educational Psychology and Special Education (1989); **G. Povey**, Clinical Professor Emeritus of Health Care and Epidemiology (1997); **G. E. Powell**, Professor Emeritus of English (1997); **J. V. Powell**, Associate Professor Emeritus of Anthropology and Sociology (1999); **W. D. Powrie**, Professor Emeritus of Food Science (1992); **M. E. Prang**, Professor Emerita of History (1986); **I. C. Pratt**, Associate Professor Emeritus of Theatre, Film and Creative Writing (2004); **C. Price**, Professor Emeritus of Oral Biological & Medical Sciences (2001); **J. Price**, Professor Emeritus of Medicine (1992); **M. A. Primeau**, Associate Professor Emerita of French (1979); **E. Proctor**, Clinical Associate Professor Emerita of Pathology and Laboratory Medicine (1999); **E. Puiil**, Professor Emerita of Pharmacology Therapeutics (2004); **E. G. Pulleyblank**, Professor Emeritus of Asian Studies (1988); **L. Pulos**, Clinical Assistant Professor Emeritus of Psychiatry (1998); **H. M. Purkis**, Associate Professor Emerita of French (1984); **P. A. Quartermain**, Professor Emeritus of English (1999); **D. M. J. Quastel**, Professor Emeritus of Pharmacology & Therapeutics (2001); **L. N. Quastel**, Assistant Professor Emerita of Rehabilitation Medicine (1990); **T. Querec**, Clinical Associate Professor Emeritus of Anaesthesia (2004); **M. C. Quick**, Professor Emeritus of Civil Engineering (1998); **S. J. Rachman**, Professor Emeritus of Psychology (1999); **A. Rae**, Clinical Professor Emeritus of Medicine (1996); **M. D. Rainey**, Assistant Professor Emeritus of Language Education (1989); **H. K. Ralston**, Assistant Professor Emeritus of History (1987); **M. V. Ralston**, Associate Professor Emerita of Language Education (1989); **R. L. Ramsay**, Associate Professor Emeritus of Physical Education and Recreation (1989); **H. Ramsey**, Professor Emeritus of Mechanical Engineering (1996); **E. N. Rand**, Senior Instructor Emeritus of Philosophy (1993); **D. J. Randall**, Professor Emeritus of Zoology (2004); **R. E. Rangno**, Associate Professor Emeritus of General Medicine (2004); **D. P. Rapanos**, Assistant Professor Emeritus of Architecture (1997); **P. Rastall**, Professor Emeritus of Physics and Astronomy (1997); **R. S. Ratner**, Professor Emeritus of Anthropology & Sociology (2003); **H. Ratzlaff**, Assistant Professor Emeritus of Educational Psychology and Special Education (1994); **P. M. Rebbeck**, Clinical Associate Professor Emerita of Surgery (1994); **I. Rebrin**, Senior Instructor Emerita of Slavonic Studies (1992); **F. L. Reed**, Professor Emeritus of Forest Resources Management (1993); **M. Regester**, Senior Instructor Emerita of Nursing (1997); **C. Reid**, Professor Emeritus of Chemistry (1984); **I. Reid**, Assistant Professor Emerita of Slavonic Studies (1991); **R. S. Reid**, Associate Professor Emeritus of Law (2003); **G. Reith**, Assistant Professor Emeritus of Psychiatry (1996); **M. Reitzik**, Associate Professor Emeritus of Oral, Medical and Surgical Sciences (1990); **A. J. Renney**, Professor Emeritus of Plant Science (1979); **C. S. Rennie**, Clinical Associate Professor Emeritus of Medicine (1982); **R. A. Restrepo**, Professor Emeritus of Mathematics

(1996); **G. D. Reubart**, Professor Emeritus of Music (1986); **V. Revutsky**, Associate Professor Emeritus of Slavonic Studies (1976); **A. J. Reynertson**, Professor Emerita of Theatre (1988); **J. F. Richards**, Professor Emeritus of Biochemistry (1992); **J. S. F. Richards**, Associate Professor Emeritus of Ophthalmology (1999); **J. F. Richards**, Professor Emeritus of Food Science (2001); **A. S. Richardson**, Professor Emeritus of Clinical Dental Science (1994); **J. I. Richardson**, Assistant Professor Emeritus of Religious Studies (1982); **W. A. Richter**, Professor Emeritus of Clinical Dental Sciences (1989); **W. R. Ridington**, Professor Emeritus of Anthropology (1995); **J. M. Rigg**, Clinical Professor Emeritus of Pediatrics (1995); **N. Risebrough**, Associate Professor Emeritus of Metals and Materials Engineering (1999); **D. Rix**, Clinical Assistant Professor Emeritus of Pathology and Laboratory Medicine (1999); **D. L. Rizer**, Associate Professor Emerita of Education (1975); **D. J. Robataille**, Professor Emeritus of Curriculum Studies (2001); **F. Roberts**, Clinical Professor Emeritus of Pathology and Laboratory Medicine (2000); **R. E. Robins**, Clinical Professor Emeritus of Surgery (1991); **C. E. Robinson**, Clinical Professor Emeritus of Medicine (1983); **C. L. Robinson**, Clinical Professor Emeritus of Surgery (1986); **G. C. Robinson**, Professor Emeritus of Pediatrics (1987); **H. S. Robinson**, Clinical Professor Emeritus of Medicine (1984); **J. L. Robinson**, Professor Emeritus of Geography (1984); **R. E. Robinson**, Associate Professor Emeritus of Philosophy (1993); **R. A. Robson**, Professor Emeritus of Anthropology and Sociology (1986); **R. H. Rodgers**, Professor Emeritus of Family and Nutritional Sciences (1991); **L. Rodman**, Assistant Professor Emerita of English (2002); **R. Rogers**, Professor Emeritus of Music (1998); **R. H. Rogers**, Clinical Associate Professor Emeritus of Family Practice (1994); **S. M. Rogow**, Professor Emerita of Educational Psychology and Special Education (1995); **M. W. Rose**, Assistant Professor Emeritus of Visual and Performing Arts in Education (1984); **L. Rosen**, Professor Emeritus of Mathematics (2003); **R. S. Rosenberg**, Professor Emeritus of Computer Science (2004); **G. Rosenbluth**, Professor Emeritus of Economics (1986); **H. J. Rosengarten**, Professor Emeritus of English (2005); **A. Rosenthal**, Professor Emeritus of Chemistry (1979); **I. S. Ross**, Professor Emeritus of English (1993); **J. E. Ross**, Clinical Associate Professor Emeritus of Obstetrics and Gynaecology (1982); **J. V. Ross**, Professor Emeritus of Geological Sciences (1993); **P. L. E. Ross**, Clinical Associate Professor Emerita of Anaesthesia (2000); **S. Rothstein**, Professor Emeritus of Library, Archival and Information Studies (1986); **G. E. Rouse**, Professor Emeritus of Botany (1994); **L. A. Rousseau**, Associate Professor Emeritus of Mathematics and Science Education (1987); **V. C. Runeckles**, Professor Emeritus of Plant Science (1996); **K. M. Ruppenthal**, Professor Emeritus of Commerce and Business Administration (1983); **J. Russell**, Professor Emeritus of Classical, Near Eastern and Religious Studies (1999); **R. D. Russell**, Professor Emeritus of Geophysics and Astronomy (1991); **S. O. D. Russell**, Professor Emeritus of Civil Engineering (1997); **B. Saint-Jacques**, Professor Emeritus of Linguistics (1990); **M. Salcudean**, Professor Emerita of Mechanical Engineering (1999); **J. Sams**, Professor Emeritus of Chemistry (1998); **D. E. Sanders**, Professor Emeritus of Law (2003); **H. D. Sanders**, Associate Professor Emeritus of Pharmacology and Therapeutics (1991); **G. Sandy**, Professor Emeritus of Classical, Near Eastern and Religious Studies (2002); **T. Sandy**, Clinical Professor Emeritus of Surgery (1994); **A. R. Sawyer**, Professor Emeritus of Fine Arts (1984); **J. Sawyer**, Associate Professor Emeritus of Music (2002); **R. F. Scagel**, Professor Emeritus of Botany (1986); **J. R. Scheffer**, Professor Emeritus of Chemistry (2004); **J. R. Schell**, Associate Professor Emeritus of Music (1999); **N. Schmidt**, Clinical Professor Emeritus of Surgery (2002); **R. Schofer**, Clinical Associate Professor Emeritus of Anaesthesia (19970); **W. B. Schofield**, Professor Emeritus of Botany (1993); **G. F. Schrack**, Professor Emeritus of Electrical Engineering (1996); **B. Schrodt**, Associate Professor Emerita of Human Kinetics (1994); **H. Schuetze**, Professor Emeritus of Educational Studies (2004); **D. M. Schultz**, Senior Instructor Emerita of Co-operative Education; **M. H. Schultz**, Clinical Instructor Emeritus of Anaesthesia (1988); **M. Schulzer**, Professor Emeritus of Medicine (2001); **R. W. Schutz**, Professor Emeritus of Human Kinetics (2000); **B. Schwab**, Professor Emeritus of Commerce & Business Administration (2001); **D. W. F. Schwarz**, Professor Emeritus of Surgery (2004); **D. R. Schweitzer**, Associate Professor Emeritus of Anthropology and Sociology (2001); **C. F. Schwerdtfeger**, Professor Emeritus of Physics and Astronomy (1997); **A. D. Scott**, Professor Emeritus of Economics (1989); **G. G. E. Scudder**, Professor Emeritus of Zoology (1999); **W. R. Seal**, Associate Professor Emeritus of Education (1979); **R. Seamon**, Associate Professor Emeritus of English (2002); **R. Seebaran**, Assistant Professor Emeritus of Social Work & Family Studies (2001); **M. Y. Seelig**, Professor Emeritus of Community and Regional Planning (1999); **G. R. Selman**, Associate Professor Emeritus of Administrative, Adult and Higher Education (1992); **R. Sexsmith**, Professor Emeritus of Civil Engineering (2003); **M. Shaw**, Clinical Professor Emeritus of Medicine (2000); **M. Shaw**, University Professor Emeritus (1989); **R. A. Shearer**, Professor Emeritus of Economics (1997); **J. M. Sherrill**, Professor Emeritus of Curriculum Studies (1999); **S. S. Shim**, Professor Emeritus of Orthopaedics (1995); **B. Shizgal**, Professor Emeritus of Chemistry (2003); **H. Shore**, Associate Professor Emerita of Nursing (1990); **R. Shulman**, Associate Professor Emeritus of Psychiatry (1988); **D. M. Shultz**, Senior Instructor Emerita of Applied Science (2005); **C. Siegel**, Associate Professor Emeritus of Theatre, Film & Creative Writing (2001); **A. H. Siemens**, Professor Emeritus of Geography, (1997); **R. I. Sikora**, Professor Emeritus of Philosophy (1993); **F. Siller**, Associate Professor Emeritus of Commerce & Business Administration (2002); **H. Silver**, Clinical Professor Emeritus of Medicine (1997); **M. Silverman**, Professor Emeritus of Anthropology and Sociology (2000); **R. Silverman**, Professor Emeritus of Music (2003); **P. A. Simmons**, Professor Emeritus of Library, Archival and Information Studies (1998); **R. Simpson**, Clinical Associate Professor Emeritus of Anaesthesiology (1987); **E. Sinanan**, Clinical Assistant Professor Emeritus of Surgery (1995); **A. J. Sinclair**, Professor Emeritus of Earth and Ocean Sciences (1999); **G. D. Sinclair**, Associate Professor Emeritus of Human Kinetics (1997); **J. G. Sinclair**, Professor Emeritus of Pharmaceutical Sciences (2001); **N. R. Sinclair**, Associate Professor Emerita of Education (1981); **A. A. Sinel**, Professor Emeritus of History (2001); **M. Sion**, Professor Emeritus of Mathematics (1989); **J. P. Skala**, Professor Emeritus of Pediatrics (1997); **K. Slade**, Associate Professor Emeritus of Language Education (1999); **M. Slade**, Professor Emerita of Economics (2003); **J. Sladen**, Clinical Professor Emeritus of Surgery (2000); **R. Slakov**, Clinical Associate Professor Emeritus of Psychiatry (2004); **H. O. Slaymaker**, Professor Emeritus of Geography (2004); **G. Slobin**, Senior Instructor Emeritus of Pharmaceutical Sciences (1994); **C. E. Slonecker**, Professor Emeritus of Anatomy (2004); **B. Slutsky**, Associate Professor Emeritus of Law (2003); **G. Smedley**, Professor Emeritus of Fine Arts (1992); **F. Smith**, Senior Instructor Emeritus of Athletics and Sports Services (1997); **G. A. Smith**, Professor Emeritus of Education (1983); **J. C. Smith**, Professor Emeritus of Law (1995); **J. E. Smith**, Associate Professor Emeritus of Mathematics (1971); **J. M. Smith**, Senior Instructor Emeritus of Mathematics and Science Education (1987); **C. Snelling**, Clinical Professor Emeritus of Surgery (2004); **R. F. Snider**, Professor Emeritus of Chemistry (1997); **G. Snyder**, Assistant Professor Emerita of Language Education (1993); **M. Soga**, Professor Emeritus of Asian Studies (1992); **J. J. Solecki**, Associate Professor Emeritus of Slavonic Studies (1984); **A. C. Soudack**, Professor Emeritus of Electrical Engineering (1999); **D. E. Soule**, Professor Emeritus of Theatre (1984); **H. M. Southard**, Assistant Professor Emerita of Rehabilitation Medicine (1983); **R. Spencer**, Associate Professor Emeritus of Civil Engineering; Registrar Emeritus (2005); **R. W. Spitzer**, Clinical Professor Emeritus of Pathology (1986); **R. B. Splane**, Professor Emeritus of Social Work (1982); **J. D. Spouge**, Professor Emeritus of Oral Medicine (1985); **F. B. St. Clair**, Assistant Professor Emeritus of French (1996); **C. Staab**, Associate Professor Emerita of Language Education (1996); **J. K. Stager**, Professor Emeritus of Geography (1993); **W. T. Stanbury**, Professor Emeritus of Commerce and Business Administration (2000); **G. Stanick**, Professor Emeritus of Music (1999); **W. J. Stankiewicz**, Professor Emeritus of Political Science (1987); **S. Stanton**, Associate Professor Emerita of Nursing (1990); **P. G. Stanwood**, Professor Emeritus of English (1988); **A. Stark**, Clinical Associate Professor Emerita of Health Care & Epidemiology (2001); **R. C. Steele**, Associate Professor Emeritus of Visual and Performing Arts in Education (1990); **G. Oddo-de Stefanis**, Associate Professor Emerita of Hispanic and Italian Studies (1990); **J. R. Stein**, Professor Emerita of Botany (1987); **M. W. Steinberg**, Professor Emeritus of English (1983); **G. H. Stephenson**, Clinical Associate Professor Emeritus of Psychiatry (1982); **S. W. Stevenson**, Associate Professor Emeritus of English (1999); **I. F. Stewart**, Clinical Professor Emeritus of Surgery (1995); **J. F. Stewart**, Professor Emeritus of English (2000); **R. Stewart**, Professor Emeritus of Chemistry (1989); **H. F. Stich**, Professor Emeritus of Zoology (1991); **C. W. Stocker**, Associate Professor Emeritus of History (1999); **F. E. Stockholder**, Assistant Professor Emeritus of English (1996); **K. Stoddart**, Associate Professor Emeritus of Anthropology & Sociology (2003); **G. E. Stolar**, Professor Emerita of Social Work (1999); **S. N. Stordy**, Clinical Professor Emeritus of Medicine (1996); **A. Storr**, Professor Emeritus of Chemistry (2004); **K. G. Strassmann**, Associate Professor Emeritus of Theatre (1991); **B. Stuart-Stubbs**, Professor Emeritus of Library, Archival and Information Studies (1992); **G. T. Stubbs**, Associate Professor Emeritus of Education (1981); **L. D. Sullivan**, Professor Emeritus of Surgery (2001); **E. G. Summers**, Professor Emeritus of Educational Psychology and Special Education (1992); **S.-C. Sung**, Professor Emeritus of Psychiatry (1990); **J. N. Sutherland**, Professor Emeritus of Educational Studies (1996); **M. C. Sutter**, Professor Emeritus of Pharmacology and Therapeutics (1998); **R. Sutton**, Professor Emeritus of Medicine (2002); **W. K. Sutton**, Assistant Professor Emerita of Language Education (1997); **D. Suzuki**, Professor Emeritus of Sustainable Development Research (2001); **A. E. Swanson**, Associate Professor Emeritus of Oral Medical and Surgical Sciences (1992); **D. Swanson**, Lecturer Emerita of Teacher Education (1998); **V. P. Sweeney**, Professor Emeritus of Medicine (1995); **D. Syklocha**, Assistant Professor Emerita of Microbiology (1991); **P. J. Sykes**, Assistant Professor Emeritus of Physics (1984); **B. Sylvester**, Associate Professor Emeritus of English (1991); **G. Szasz**, Professor Emeritus of Psychiatry (1995); **I. Szasz**, Clinical Associate Professor of Radiology (1998); **W. F. Szetela**, Associate Professor Emeritus of Mathematics and Science Education (1991); **M. Tadych**, Assistant Professor Emerita of Social Work (1986); **M. Tait**, Associate Professor Emeritus of Animal Science (1998); **K.-I. Takashima**, Professor Emeritus of Asian Studies (2004); **D. E. Talney**, Associate Professor Emeritus of Music (1994); **F. J. R. Taylor**, Professor Emeritus of Earth and Ocean Sciences and Botany (2004); **I. E. P. Taylor**, Professor Emeritus of Agroecology and Botany (2004); **P. Taylor**, Assistant Professor Emeritus of English (1999); **P. Taylor**, Professor

Emeritus of Obstetrics & Gynaecology (2001); **S.I. Taylor**, Senior Instructor Emeritus of Architecture (2005); **J. M. Teasdale**, Associate Professor Emerita of Pediatrics (1990); **R.C. Tees**, Professor Emeritus of Psychology (2005); **E. Teghtsoonian**, Professor Emeritus of Metals and Materials Engineering (1988); **G. M. Tener**, Professor Emeritus of Biochemistry (1993); **L. Tenn**, Senior Instructor Emerita of Nursing (2001); **P. R. Tennant**, Professor Emeritus of Political Science (2004); **J. V. Thirgood**, Professor Emeritus of Forest Resources Management (1989); **H. L. Thomas**, Senior Instructor Emerita of English (1993); **J. P. Thomas**, Clinical Professor Emeritus of Pathology and Medicine (1987); **G. Thompson**, Professor Emeritus of Surgery (1992); **M. Thompson**, Assistant Professor Emerita of Education (1973); **M. Thompson**, Professor Emeritus of Commerce & Business Administration (2002); **R. Thompson**, Assistant Professor Emerita of Nursing (2001); **R. C. Thompson**, Professor Emeritus of Chemistry (2002); **J. E. Thornton**, Associate Professor Emeritus of Administrative, Adult and Higher Education (1993); **S. C. Thorson**, Associate Professor Emeritus of Medicine (1990); **A. Thrasher**, Associate Professor of Music (2005); **H. A. Thurston**, Associate Professor Emeritus of Mathematics (1987); **F. A. Tickner**, Professor Emeritus of Music (1996); **C. A. Tiers**, Professor Emeritus of Architecture (1990); **A. D. Tilley**, Associate Professor Emerita of Human Kinetics (1994); **B. Tischer**, Clinical Professor Emeritus of Pediatrics (1989); **E. C. Todd**, Professor Emeritus of Law (1993); **M. E. Todd**, Professor Emerita of Anatomy (2002); **M. Tolmie**, Associate Professor Emeritus of History (1990); **R. J. Tolsma**, Assistant Professor Emeritus of Counselling Psychology (1995); **J. W. Tomlinson**, Associate Professor Emeritus of Commerce and Business Administration (1994); **M. G. Tomsich**, Associate Professor Emerita of Hispanic and Italian Studies (1996); **R. S. Tonkin**, Professor Emeritus of Pediatrics (1997); **G. Tougas**, Professor Emeritus of French (1984); **A. Toupin**, Clinical Associate Professor Emerita of Health Care & Epidemiology (2001); **P. M. Townsley**, Professor Emeritus of Food Science (1991); **L.D. Travis**, Assistant Professor Emeritus of Educational and Consulting Psychology and Special Education (2005); **D. Tromans**, Professor Emeritus of Metals & Material Engineering (2003); **J. Trotter**, Professor Emeritus of Chemistry (1999); **G. C. Trowsdale**, Professor Emeritus of Visual and Performing Arts in Education (1988); **I. Tsang**, Clinical Professor Emeritus of Medicine (2004); **I. Turnbull**, Associate Professor Emeritus of Surgery (1999); **K. W. Turnbull**, Clinical Professor Emeritus of Anaesthesia (2004); **C. J. Turner**, Professor Emeritus of Germanic Studies (2000); **R. Turner**, Professor Emeritus of Anthropology and Sociology (1994); **B. G. Turrell**, Professor Emeritus of Physics & Astronomy (2003); **G. F. O. Tyers**, Professor Emeritus of Surgery (2000); **R. Uhler**, Professor Emeritus of Economics (2000); **T. J. Ulrych**, Professor Emeritus of Earth and Ocean Sciences (2000); **A. Urrello**, Professor Emeritus of French, Italian and Hispanic Studies (2004); **D. H. Uyeno**, Associate Professor Emeritus of Health Care and Epidemiology (2001); **Y. Vaid**, Professor Emeritus of Civil Engineering (2002); **M. Vallance**, Clinical Professor Emeritus of Psychiatry (2000); **F. Valle**, Assistant Professor Emeritus of Psychology (2006); **C. Van Breemen**, Professor Emeritus of Pharmacology & Therapeutics (2001); **J. Vanderstoep**, Associate Professor Emeritus of Food Science (2002); **J. Varah**, Professor Emeritus of Computer Science (2002); **H. Vaughan**, Professor Emeritus of Mechanical Engineering (2000); **P. S. G. Verriour**, Associate Professor Emeritus of Language Education (2003); **J. Vielkind**, Professor Emeritus of Pathology (2004); **D. J. Vince**, Professor Emeritus of Pediatrics (1993); **E. Vizsolyi**, Senior Instructor Emerita of Zoology (1997); **E. W. Vogt**, Professor Emeritus of Physics (1995); **R. Vrba**, Associate Professor Emeritus of Pharmacology and Therapeutics (1990); **J. A. Wada**, Professor Emeritus of Psychiatry (1991); **P. M. Wadsworth**, Clinical Professor Emeritus of Health Care and Epidemiology (1997); **T. J. Wales**, Professor Emeritus of Economics (2000); **D. C. Walker**, Professor Emeritus of Chemistry (1999); **D. E. Walker**, Senior Instructor Emerita of Fine Arts (1986); **G. A. H. Walker**, Professor Emeritus of Physics and Astronomy (1997); **M. J. A. Walker**, Professor Emeritus of Pharmacology Therapeutics (2005); **R. B. Walkey**, Associate Professor Emeritus of Architecture (2004); **R. A. Wall**, Associate Professor Emeritus of Pharmacology and Therapeutics (1995); **J. H. Wallin**, Professor Emeritus of Administrative, Adult and Higher Education (1990); **G. Walsh**, Associate Professor Emeritus of Education (1979); **J. B. Walsh**, Professor Emeritus of Mathematics (2004); **G. A. Walter**, Associate Professor Emeritus of Commerce & Business Administration (2001); **L. L. Walters**, Associate Professor Emeritus of Educational Psychology and Special Education (1989); **M. Walters**, Clinical Professor Emeritus of Medicine (1987); **E. M. Warbinek**, Assistant Professor Emerita of Nursing (1994); **J. B. Warren**, Associate Professor Emeritus of Commerce (1987); **R. A. J. Warren**, Professor Emeritus of Microbiology (1998); **T. Watanabe**, Professor Emeritus of Geophysics and Astronomy (1993); **W. G. Waters**, Professor Emeritus of Commerce and Business Administration (2000); **A. P. Watkinson**, Professor Emeritus of Chemical and Biological Engineering (2004); **N. Watt**, Associate Professor Emeritus of Physical Education (1992); **D. J. Watterson**, Clinical Professor Emeritus of Psychiatry (1982); **N. Waxler-Morrison**, Associate Professor Emerita of Social Work (1992); **J. M. Weakland**, Associate Professor Emerita of Visual and Performing Arts (1987); **G. Wedeking**, Assistant Professor Emeritus of Philosophy (2003); **S. A. Weese**, Assistant Professor Emeritus of Theatre (1989); **G. F. Weetman**, Professor Emeritus of Forest Sciences (1998); **C. F. Wehrhahn**, Associate Professor Emeritus of Zoology (1992); **W. G. Wellington**, Professor Emeritus of Plant Science (1986); **T. I. Westermark**, Associate Professor Emeritus of Language Education (1988); **G. Westgate**, Clinical Associate Professor Emeritus of Surgery (1992); **M. Westrom**, Assistant Professor Emeritus of Curriculum Studies (2003); **R. Westwick**, Professor Emeritus of Mathematics (1998); **B. L. White**, Professor Emeritus of Physics (1996); **K. J. White**, Professor Emeritus of Economics (2003); **R. B. White**, Assistant Professor Emeritus of Educational Psychology and Special Education (1987); **R. L. White**, Professor Emerita of French (1989); **L. M. Whitehead**, Associate Professor Emeritus of English (1988); **F. H. Whitman**, Associate Professor Emeritus of English (1994); **D. N. E. Whittaker**, Associate Professor Emeritus of Educational Psychology and Special Education (1997); **E. W. Whittaker**, Professor Emerita of Anthropology and Sociology (1997); **J. V. Whittaker**, Professor Emeritus of Mathematics (1996); **S. A. Whittaker-Bleuler**, Assistant Professor Emerita of Human Kinetics (2000); **E. Wickberg**, Professor Emeritus of History (1992); **J. S. Wiggins**, Professor Emeritus of Psychology (1996); **R. D. Wild**, Assistant Professor Emeritus of Curriculum Studies (2000); **G. Wilkins**, Clinical Professor Emeritus of Medicine (2005); **D.L. Williams**, Professor Emeritus of Physics & Astronomy (2002); **J. M. Williams**, Assistant Professor Emerita of Fine Arts (1999); **M. D. Willman**, Professor Emerita of Nursing (1994); **D.C. Wilson**, Associate Professor Emeritus of Curriculum Studies (2004); **E. N. Wilson**, Associate Professor Emeritus of Music (2002); **J. D. Wilson**, Professor Emeritus of Educational Studies (1999); **J. W. Wilson**, Professor Emeritus of Harvesting and Wood Science (1990); **E. R. Winkler**, Professor Emeritus of Philosophy (1999); **J. H. Winter**, Professor Emeritus of History (1991); **J.L. Wisenthal**, Professor Emeritus of English (2005); **C. C. Wisnicki**, Assistant Professor Emerita of Architecture (1984); **R. Wong**, Professor Emeritus of Psychology (1997); **S. Wong**, Associate Professor Emerita of Curriculum Studies (1997); **J. R. Wood**, Associate Professor Emeritus of Political Science (2005); **S. Wood**, Professor Emeritus of Medical Genetics (2000); **W. F. Wood**, Assistant Professor Emeritus of Commerce and Business Administration (1990); **W. S. Wood**, Professor Emeritus of Pathology (1992); **W. W. Wood**, Associate Professor Emeritus of Architecture (1996); **J. Woodrow**, Professor Emerita of Curriculum Studies (1998); **A. Woodside**, Professor Emeritus of History (2003); **L. I. Woolf**, Professor Emeritus of Psychiatry (1984); **J.G. Worrall**, Associate Professor Emeritus of Forest Sciences (2003); **I. Wright**, Professor Emeritus of Curriculum Studies (2002); **J. Wright**, Professor Emeritus of Theatre, Film and Creative Writing (2002); **M. Wong**, Assistant Professor Emeritus of Electrical Engineering (1995); **M. A. Wyness**, Associate Professor Emerita of Nursing (2002); **D. J. Yeo**, Professor Emeritus of Clinical Dental Sciences (1987); **W. Yeomans**, Assistant Professor Emeritus of English (1990); **M. M. Yeung**, Professor Emerita of Respiratory Medicine (2004); **N. J. Yorkston**, Professor Emeritus of Psychiatry (1991); **G. G. Young**, Associate Professor Emeritus of Forest Resource Management (1996); **L. Young**, Professor Emeritus of Electrical Engineering (1991); **M. N. Young**, Assistant Professor Emeritus of Theatre (1992); **R. Young**, Associate Professor Emeritus of Fine Arts (1998); **Y.-N. Yu**, Professor Emeritus of Electrical Engineering (1975); **N. C. Zacharias**, Senior Instructor Emeritus of Pharmaceutical Sciences (1980); **M. W. Zacher**, Professor Emeritus of Political Science (2003); **J. W. Zahradnik**, Professor Emeritus of Bio-Resource Engineering (1991); **J. V. Zidek**, Professor Emeritus of Statistics (2004); **W. Ziemia**, Professor Emeritus of Commerce and Business Administration (2004); **J. Zilber**, Professor Emeritus of Creative Writing (1989)
